First Lieut. Earl Wells, Philippine Scouts, from December 22, 1921.
First Lieut. Raynor Garey, Field Artillery, from December 22, 1921.
First Lieut. Philip Schneeberger, Air Service, from December 23, 1921.
First Lieut. Gouverneur Hoes, Infantry, from December 24, 1921.
First Lieut. Victor Schmidt, Coast Artillery Corps, from December 24, 1921.
First Lieut. George Franklin Parris, Air Service, from December 24, 1921.
First Lieut. Fred Bidwell Lyle, Field Artillery, from December 25, 1921.
First Lieut. Karl Shaffner Axtater, Air Service, from December 26, 1921.
First Lieut. Clinton Bowen Fisk Brill, Quartermaster Corps, from December 28, 1921.
First Lieut. William Joseph Flood, Air Service, from December 28, 1921.
First Lieut. Francis Dundas Ross, jr., Infantry, from December 30, 1921.
First Lieut. Frank Edward Monville, Quartermaster Corps, from January 1, 1922.
First Lieut. George Merrill Palmer, Air Service, from January 1, 1922.
First Lieut. Charles Rawlings Chase, Cavalry, from January 2, 1922.
First Lieut. Loren Francis Parmley, Cavalry, from January 4, 1922.
First Lieut. Erle Fletcher Cress, Cavalry, from January 4, 1922.
First Lieut. Lynn Packard Vane, Coast Artillery Corps, from January 6, 1922.
First Lieut. John Austin Pixley, Coast Artillery Corps, from January 7, 1922.
First Lieut. Otta Marshall, Coast Artillery Corps, from January 8, 1922.
First Lieut. Edwin Cleveland Callicutt, Coast Artillery Corps, from January 9, 1922.
First Lieut. Ray Harrison Green, Quartermaster Corps, from January 11, 1922.
First Lieut. Hugh Williamson Rowan, Chemical Warfare Service, from January 12, 1922.
First Lieut. Russell William Goodyear, Quartermaster Corps, from January 12, 1922.
First Lieut. Lewis Rinehart Pfoutz Reese, Air Service, from January 15, 1922.
First Lieut. Byron Turner Burt, jr., Air Service, from January 21, 1922.
First Lieut. Earle Gene Harper, Air Service, from January 28, 1922.
First Lieut. Philip Gilstrap Bruton, Corps of Engineers, from January 29, 1922.
First Lieut. Eugene Joseph Minarelli FitzGerald, Infantry, from January 31, 1922.
First Lieut. Charles Earl Whitney, Ordnance Department, from February 5, 1922.
First Lieut. Lotha August Smith, Air Service, from February 5, 1922.
First Lieut. Edward Higley Guilford, Air Service, from February 11, 1922.
First Lieut. Junius Augustus Smith, Air Service, from February 22, 1922.
First Lieut. William Henry Carthy, Air Service, from February 22, 1922.
First Lieut. Horace Leland Porter, Corps of Engineers, from February 22, 1922.
First Lieut. Arthur Leo Lavery, Coast Artillery Corps, from February 22, 1922.
(The resignation of First Lieut. Edwin Philip Hart, Coast Artillery Corps, May 25, 1922, necessitates the removal of his name from the nomination list and causes a change in the vacancies for all first lieutenants junior to him who have been nominated for promotion.)
First Lieut. Ernest Andrew Thompson, Signal Corps, from February 22, 1922.
First Lieut. William Andrew Gray, Air Service, from February 22, 1922.
First Lieut. Franz Joseph Jonitz, Quartermaster Corps, from February 24, 1922.
First Lieut. William Valery Andrews, Air Service, from February 24, 1922.
First Lieut. George Stetekluh, Quartermaster Corps, from February 25, 1922.
First Lieut. Frank Marion Barrell, Quartermaster Corps, from February 28, 1922.
First Lieut. Stanton Higgins, Cavalry, from February 28, 1922.
First Lieut. Holden Spear, Quartermaster Corps, from February 28, 1922.
First Lieut. Frank Merrill Bartlett, Air Service, from March 2, 1922.
First Lieut. Benson Glenwood Scott, Field Artillery, from March 2, 1922.
First Lieut. Redding Francis Perry, Cavalry, from March 2, 1922.
First Lieut. Walter Arthur Metts, jr., Field Artillery, from March 5, 1922.
First Lieut. Frank Camm, Field Artillery, from March 6, 1922.
First Lieut. Robert Morgan Burrowes, Infantry, from March 7, 1922.
First Lieut. Richard Oscar Bassett, jr., Infantry, from March 9, 1922, subject to examination required by law.
First Lieut. Percy Stuart Lowe, Coast Artillery Corps, from March 12, 1922.
First Lieut. Lewis Alonzo Murray, Corps of Engineers, from March 14, 1922.
First Lieut. Rene Edward de Russy, Coast Artillery Corps, from March 23, 1922.
First Lieut. Marion Gardner Putnam, Air Service, from March 27, 1922.
First Lieut. Clyde Grady, Infantry, from March 29, 1922.
First Lieut. Walter Drake Williams, Air Service, from March 29, 1922.
First Lieut. William Henry Payne, Quartermaster Corps, from April 1, 1922.
First Lieut. Thomas Tilson Conway, Infantry, from April 2, 1922.
First Lieut. Edgar Ambrose Jarman, Infantry, from April 4, 1922.
First Lieut. Regeon Victor Love, Coast Artillery Corps, from April 5, 1922.
First Lieut. Svening Johannes Bang, Cavalry, from April 6, 1922.
First Lieut. Allan Sheldon Willis, Infantry, from April 6, 1922.

HOUSE OF REPRESENTATIVES.

FRIDAY, *June 2, 1922.*

The House met at 12 o'clock noon.
The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Almighty God, for all encouragements that make us more hopeful, we bless Thee; for all loving messages and glad surprises, we thank Thee; for sincere friendships that mean trust and confidence, we praise Thee, and for all the little joys and sweet blessings that come to us through the hours of each day we are grateful to Thee. Strengthen us by daily communications of truth and wisdom and always may our fidelity to duty be without hesitation. Subdue and restrain all evil passions. May there be the enjoyment of fellowship and the exercise of high and just desire among our fellow citizens, and may hate be a bitterness unknown. O make the whole earth glad with a new song, young with a new spring, and alive with a new hope. Through Jesus Christ our Lord. Amen.

The Journal of the proceedings of yesterday was read and approved.

EXTENSION OF REMARKS.

Mr. APPLEBY. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on H. J. Res. 337, with respect to the port of New York.
The SPEAKER. Is there objection?
There was no objection.
The extension of remarks referred to are here printed in full as follows:
Mr. APPLEBY. Mr. Speaker and colleagues, I appreciate your courtesy in permitting me to extend my remarks in the

CONGRESSIONAL RECORD on the important resolution known as House Joint Resolution No. 337, for the development and administration of the port of New York. The first resolution introduced on this subject—House Joint Resolution No. 172—was passed by the House and the Senate, and signed by President Harding last August. At that time I had the pleasure of speaking in favor of the resolution. Since the passage of that resolution both the State of New York and the State of New Jersey have adopted a comprehensive plan for the development of the port of New York. I quote from the report on the resolution as follows:

Historically, geographically, and commercially, New York and the industrial districts in the northern part of New Jersey constitute a single unit, a great metropolitan district of 8,000,000 people. The port of New York, with its three entrances, 800 miles of water front, 12 railroads (exclusive of local transit lines) entering the port, a terminus for nearly all of the more important trans-Atlantic lines, not only concerns the people of the two States but constitutes an asset of the entire Nation. The necessity of creating the port district and authorizing the creation of the port authority is manifest from the fact that over 40 municipalities are involved, some of them controlled by men of divergent views and many of them working at cross-purposes and in the dark. The port of New York is one of the main arteries and principal gateways between the United States and the markets of the world, and any improvement to the port of New York will work a benefit to the entire Nation. Concededly, the terminal facilities at the port are grossly inadequate, mainly due to the lack of cooperation between the two States of New York and New Jersey. It is submitted that a unified authority and control will bring order out of chaos and afford a blessing not only to the contiguous municipalities but also to the country at large.

In a letter addressed to the chairman of the Judiciary Committee under date of June 30, 1921, in regard to the resolution, Hon. John W. Weeks, Secretary of War, says:

The adequate improvement and development of port facilities at New York is a deserving enterprise, and if the work is accomplished on the comprehensive plan of cooperation contemplated by the two States it will doubtless result in benefit to the transportation interests of the entire Nation. I recommend, therefore, that Congress give its consent to the agreement.

Since House Joint Resolution No. 172 was passed legislation for the improvement of New York Harbor and its adjacent waters has been enacted by this body, namely, the authorization of a 30-foot channel extending from Sandy Hook through Raritan Bay to Perth Amboy, then through Arthur Kill and Kill Van Kull to upper New York Bay. In addition to this an appropriation was approved by both the House and the Senate for additional aids to navigation in Raritan Bay and by lighting these waters at night, giving traffic over them a full 24-hour service. The War Department is now making inquiries as to the advisability of recommending to Congress the adoption of a project for deepening the channel of the Raritan River, that adequate water transportation facilities may be afforded the industrial establishments lining its banks.

The discussion in regard to these projects has brought to the attention of the public as never before the tremendous possibilities of the port of New York. The State of New Jersey, by its natural advantages, will be the outlet for the many railroads now having terminal stations there, and the development of the same is fully comprehended in the plan of the Port of New York Authority. Public interest has been aroused in this great project and many municipalities have held meetings to indorse the movement. The magnitude of the project is appealing to the enterprising citizens of the State, and they are giving practically their unanimous indorsement to this great waterways and transportation undertaking.

I feel sure, fellow Members, you have made no mistake in voting for this joint resolution.

MESSAGE FROM THE SENATE.

A message from the Senate by Mr. Crockett, one of its clerks, announced that the Senate had passed without amendment the following House Concurrent Resolution No. 47:

Resolved by the House of Representatives (the Senate concurring), That 100,000 copies of the report of the special mission on investigation to the Philippine Islands to the Secretary of War, without the map but with the data on the Philippines proceeding and accompanying such report, be, and the same is hereby, ordered printed as a public document, to be distributed as follows: Sixty-five thousand through the document room of the House, 25,000 through the document room of the Senate, 5,000 through the Committee on Insular Affairs of the House, and 5,000 through the Committee on Territories and Insular Possessions of the Senate.

The message also announced that the Senate had passed with amendments the bill (H. R. 9527) to amend section 5136, Revised Statutes of the United States, relating to corporate powers of associations so as to provide succession thereof until dissolved, and to apply said section as so amended to all national banking associations; in which the concurrence of the House of Representatives was requested.

The message also announced that the Senate had passed bill and joint resolution of the following titles, in which the concurrence of the House of Representatives was requested:

S. 3416. An act to permit the city of Fort Smith, Sebastian County, Arg., to erect or cause to be erected a dam across the Poteau River.

S. J. Res. 171. Joint resolution granting consent of Congress and authority to the Port of New York Authority to execute the comprehensive plan approved by the States of New York and New Jersey by chapter 43, Laws of New York, 1922, and chapter 9, Laws of New Jersey, 1922.

ENROLLED BILLS SIGNED.

Mr. RICKETTS, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same:

H. R. 11408. An act granting the consent of Congress to the county of Winnebago and the town of Rockton, in said county, in the State of Illinois, to construct, maintain, and operate a bridge and approaches thereto across the Rock River, in said town of Rockton; and

H. R. 11409. An act granting the consent of Congress to the city of Ottawa and the county of La Salle, in the State of Illinois, to construct, maintain, and operate a bridge and approaches thereto across the Fox River.

SENATE BILL REFERRED.

Under clause 2, Rule XXIV, Senate bill of the following title was taken from the Speaker's table and referred to its appropriate committee as indicated below:

S. 3416. An act to permit the city of Fort Smith, Sebastian County, Ark., to erect or cause to be erected a dam across the Poteau River; to the Committee on Interstate and Foreign Commerce.

REPAIR OF LEVEES ON MISSISSIPPI RIVER ABOVE CAIRO, ILL.

Mr. MADDEN. Mr. Speaker, I ask unanimous consent for the present consideration of H. J. Res. 339, making available funds for repairing and restoring levees on the Mississippi River above Cairo, Ill., which I send to the desk and ask to have read.

The Clerk read the resolution, as follows:

Resolved, etc., That an amount, not exceeding $100,000, of the funds authorized to be expended by Public Res. No. 54, approved May 2, 1922, is hereby made available as an emergency fund to be expended by the Mississippi River Commission, under the direction of the Secretary of War, for repairing and restoring any levees on the Mississippi River above Cairo, Ill., which have been destroyed or seriously injured by the recent floods of the Mississippi River, and which are not now within, but may, before June 15, 1922, be brought within, the provisions of the Act entitled "An act to provide for the control of floods of the Mississippi River and of the Sacramento River, and for other purposes," approved March 1, 1917: *Provided*, That if the Mississippi River Commission finds that the levee or drainage district in which the broken levee is situated can not legally, by or before June 15, 1922, comply with section (b) of such act of March 1, 1917, the commission may accept, in this emergency, bonds of standing approved by it in amount sufficient to cover not less than one-third of the cost involved: *Provided further*, That nothing in this resolution shall be construed as authorizing a departure from the established practice of the commission except so far as may be necessary to permit the restoration of broken levees in districts which are willing but can not legally comply with said method of procedure in time to avoid another threatened overflow this year.

The SPEAKER. Is there objection?

Mr. WALSH. Mr. Speaker, reserving the right to object, I wish the gentleman would make a statement and answer one or two questions which I would like to ask in respect to the necessity for the resolution.

Mr. MADDEN. Mr. Speaker, the necessity for action in this matter was presented to the committee by reference to it of House Joint Resolution 326, introduced by Representative DENISON, of Illinois, calling for an appropriation of $1,000,000. Two relief measures have been approved for levee protection and repair work in connection with the recent unusual and disastrous floods on the Mississippi River and its tributaries. Public Resolution No. 50, approved April 21, 1922, appropriated $1,000,000 to be expended by the Mississippi River Commission on levees under its jurisdiction and falling within the scope of the flood control act of March 1, 1917; this amount to be deducted from the regular appropriation for that purpose in the pending War Department appropriation bill, and in practical effect amounted only to an advance of $1,000,000 of next year's money for Mississippi River flood control. Public Resolution No. 54, approved May 2, 1922, made not to exceed $200,000 of funds heretofore appropriated for river and harbor work, and unexpended because the projects have been completed or abandoned, available for protecting life and property by preserving and maintaining during the present flood emergency levees not under Government control on the Mississippi River, its tributaries and outlets.

The allotments made by the Chief of Engineers from the $200,000 fund aggregate approximately $70,000, leaving an unallotted balance of $130,000. The accompanying joint resolu-

tion makes not to exceed $100,000 of the foregoing sum of $200,000 available for repairing and restoring levees on the Mississippi River above Cairo, Ill. The levees which the resolution provides for fall within the scope of the flood control act of March 1, 1917, but the levee districts in which they are located have not heretofore elected to take advantage of the provisions of the act, but they are going to now.

Mr. WALSH. I have read the substance of that in the report, and it is a very concise statement of the situation, but I want to know what there is about Public Resolution 54 which makes necessary this legislation. That made available $200,000 from the funds heretofore appropriated for rivers and harbors, which were unexpended because the project had been abandoned and not completed. That was available for expenditure by and under the direction of the Secretary of War and the supervision of the Chief of Engineers, for the purpose of protecting life and property by preserving and maintaining during the "present flood emergency," the levees not under Government control on the Mississippi River, its tributaries and outlets. These levees come under that classification.

Mr. MADDEN. The levees proposed to be provided for in the resolution here are to come under the jurisdiction of the Flood Control Commission, and instead of appropriating money with which to meet the emergency under the act, we are diverting $100,000 of the $200,000 already made available, which is not to be used for other purposes, in order that this very necessary and urgent work may proceed.

Mr. WALSH. I know, but why do they not go ahead and proceed with the matter? They have authority under existing law.

Mr. HUMPHREYS. Oh, no; because the flood emergency has passed. They were authorized under that Resolution 54 to expend it during "the present flood emergency." And that has passed and did pass before they ever expended a single dollar of it.

Mr. MADDEN. The June floods are likely to be coming down in the territory embraced within the provisions of this resolution at any time, and if this resolution is not made effective so that they may be able to take advantage of the situation before the 15th of June, we are liable to have a very great emergency that may call for a large sum of money. This is to be expended only on the condition that those levees affected or the districts affected will come within the provisions of the flood-control act.

Mr. WALSH. Do I understand from the gentleman from Illinois that there was no flood emergency at the time his colleague introduced the resolution calling for an appropriation of $1,000,000?

Mr. MADDEN. There was; but in order to take advantage of the situation that always comes in June, when the second flood never fails to arrive, it was proposed to meet that situation by an appropriation of this nature, pending in the resolution.

Mr. WALSH. Then, the present flood emergency is continuing?

Mr. MADDEN. No; the flood emergency which was provided for in the former resolution was on the lower stretch of the river and has passed, and has been provided for, but the upper stretch of the river is the place where the June floods always come, and I may say in this connection that they were affected also by the floods that have occurred.

Mr. WALSH. How many more of these resolutions and how many more of these floods and high waters are we going to have which must be taken care of?

Mr. MADDEN. I very much hope we will not have any more resolutions, and I sincerely trust the Lord will prevent us having any more floods, but unfortunately we can not control that situation as much as we would like to do it.

Mr. CHALMERS. Will the gentleman yield?

Mr. MADDEN. The gentleman from Massachusetts has the floor.

Mr. WALSH. I will yield to the gentleman.

Mr. CHALMERS. I would like to ask the chairman of the committee, under authority of this resolution, if the $70,000 already expended——

Mr. MADDEN. Allotted.

Mr. CHALMERS. Well, expended?

Mr. MADDEN. It has not all been expended, but it has met the situation and is meeting the situation.

Mr. CHALMERS. That is, the flood-control crisis?

Mr. MADDEN. Yes; but not in this particular locality.

Mr. CHALMERS. I would like to ask another question. I would like to ask the gentleman why he did not appropriate in his bill the balance of the $130,000 for this purpose?

Mr. MADDEN. The reason why we did not do it is this: In the first place, out of the $200,000 already appropriated there has only been allotted $70,000. While the resolution on which we acted called for a million dollars, the evidence disclosed the fact that only $52,000 would be needed to meet the situation; but lest there might be an emergency we could not foresee and nobody could realize, we made available by this resolution $100,000 to do what the Chief of Engineers said would cost $52,000. If they do not need as much as $100,000, they will not expend it.

Mr. TOWNER. Will the gentleman yield?

Mr. WALSH. I will yield.

Mr. TOWNER. I desire to call the attention of the gentleman from Illinois to the provisions of the joint resolution, which says that this emergency fund to be expended on the Mississippi River under the direction of the Secretary of War is now being used for repairing and restoring any levees on the Mississippi River above Cairo, Ill., which have been destroyed or seriously injured by the recent floods of the Mississippi River, so of course this money could not have been used until after it occurred.

Mr. MADDEN. No; the repair work could not have been done until now.

Mr. TOWNER. And it is because of the fact these levees have been repaired since the other emergency came, and anticipating the June flood, that you desired to use this fund for the purpose of repairing them?

Mr. MADDEN. And put these levee districts under the control of the Mississippi River Commission.

Mr. TOWNER. That is my understanding.

Mr. WALSH. Mr. Speaker, I withdraw the reservation of objection.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. The question is on agreeing to the joint resolution.

Mr. MADDEN. I yield the gentleman from Illinois [Mr. DENISON] five minutes.

Mr. DENISON. Mr. Speaker, I want to make just a brief statement which I think possibly will clear up the confusion in the mind of my friend from Massachusetts. The first million dollars which was appropriated by the resolution of April 21 contained this language:

> For the purpose of preserving, protecting, and repairing the levees under its jurisdiction.

Now, the Mississippi River Commission who had charge of the expenditure of this money interpreted it so that it could not be applied to rebuilding the levees that were washed out north of Cairo. The resolution which was afterwards passed and to which the gentleman from Massachusetts referred, by which were made available $200,000, namely the resolution of May 2, contains this language:

> It is hereby made available for expenditure by and under the direction of the Secretary of War and the supervision of the Chief of Engineers for the purpose of protecting life and property by preserving and maintaining during the present flood emergency the levees not under Government control on the Mississippi River, its tributaries and outlets.

Now, that says for preservation and maintaining, and the Mississippi River Commission interpreted it as being available only for preservation and maintaining during the flood period, and they could not use it to repair a levee that had been washed out after the flood had gone down; and it so happens that neither one of these appropriations under these two resolutions could be used by the commission for the very important purpose of repairing breaks in the levee after the water had gone down.

Mr. WALSH. Will the gentleman yield?

Mr. DENISON. Yes.

Mr. WALSH. When this $200,000 item was under discussion here in the House there was a telegram read from somebody on the spot in which it was stated it would be necessary to repair and restore the levees that had been washed away, and that was stated to be one of the purposes of the resolution and that the language drafted covered such intention.

Mr. DENISON. I agree with the gentleman that a great many of us thought that fund could be used for that purpose, but, after all, the Mississippi River Commission has the last say as to where and how the money shall be expended, and so it becomes necessary to pass this additional resolution.

Mr. WALSH. This covers the situation?

Mr. DENISON. By this resolution the levees north of Cairo can be repaired immediately.

Mr. WALSH. The gentleman prefers a million instead of the $100,000?

Mr. DENISON. It has been submitted to the Chief of Engineers, and he thinks this will meet the situation, I will say to my friend.

Mr. LAZARO. You stated that $1,000,000 was to be spent by the Mississippi River Commission upon waterways under their jurisdiction?

Mr. DENISON. Yes.

Mr. LAZARO. And that the $200,000 was to be spent by the Department of War on waterways under its jurisdiction on the Mississipi River. You also state that the interpretation is that they can not use any of this money for the purpose of repairing levees?

Mr. DENISON. Yes.

Mr. LAZARO. Why is it that in this resolution this broadening of the language applies to only waterways above Cairo? Why not below?

Mr. MADDEN. Because provision has already been made in the other resolution for that, and money is available for the part below Cairo.

Mr. DENISON. We have just had the highest flood in the history of the Mississippi River. In various places our present levees proved wholly inadequate to take care of the unprecedented amount of water that came down upon us. The result was that levees north of Cairo which were thought to be sufficient gave way, and in my own district between two and three hundred thousand acres of the best farm land in Illinois have been overflowed. Stock has been drowned, homes have been washed away, and all growing crops have been ruined. It is a serious emergency, and if the farmers in the overflowed districts put in any crop at all for the coming year the breaks in the levees must be repaired immediately so as to stop the June and July floods. The purpose of the resolution which I introduced and for which this has been substituted by the Appropriations Committee is to authorize the Mississippi River Commission to at once repair the breaks so as to allow farmers to reseed their land and raise a crop for the coming year. Serious breaks in the levees in Missouri opposite southern Illinois, as well as some of the levees on the Iowa side in the district of Mr. KOPP, have broken. The Chief of Engineers has estimated that the amount made available by this resolution will be sufficient to repair these breaks. I hope the resolution may pass without any opposition.

The SPEAKER. The question is on the engrossment and third reading of the resolution.

The resolution was ordered to be engrossed and read the third time, was read the third time, and passed.

On motion of Mr. MADDEN, a motion to reconsider the vote by which the resolution was passed was laid on the table.

BRIDGE ACROSS ALLEGHENY RIVER AT FREEPORT, PA.

Mr. STRONG of Pennsylvania. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (H. R. 11345) to authorize the building of a bridge across the Allegheny River at Freeport, Pa. This is for the rebuilding of a bridge recently destroyed or seriously damaged when the ice went out. The contract has been awarded. The contractor is on the ground. Work had actually been begun when it was discovered that there never had been congressional action authorizing the building of the bridge, in the first instance, and the Chief of Engineers asked that this bill become law in order that he might approve the plans.

The SPEAKER. The gentleman from Pennsylvania asks unanimous consent for the consideration of a bill, which the Clerk will report.

The Clerk read as follows:

A bill (H. R. 11345) authorizing the construction of a bridge across the Allegheny River at or near Freeport, Pa.

Be it enacted, etc., That the State of Pennsylvania be, and it is hereby, authorized to construct, maintain, and operate a bridge and approaches thereto across the Allegheny River at a point suitable to the interests of navigation at or near Freeport, in the State of Pennsylvania, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The SPEAKER. Is there objection to the present consideration of the bill? [After a pause.] The Chair hears none.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. STRONG of Pennsylvania, a motion to reconsider the vote by which the bill was passed was laid on the table.

CORPORATE POWERS OF ASSOCIATIONS.

Mr. MCFADDEN. Mr. Speaker, I ask to take from the Speaker's table the bill H. R. 9527, disagree to the Senate amendments, and ask for a conference.

The SPEAKER. The gentleman from Pennsylvania calls from the Speaker's table, moves to disagree to the Senate amendments, and asks for a conference, a bill which the Clerk will report by title.

The Clerk read as follows:

A bill (H. R. 9527) to amend section 5136, Revised Statutes of the United States, relating to corporate powers of associations, so as to provide succession thereof until dissolved, and to apply such section as so amended to all national banking associations.

The Senate amendments were read.

The SPEAKER. Is there objection to disagreeing to the Senate amendments and asking for a conference?

There was no objection, and the Speaker appointed as conferees Mr. MCFADDEN, Mr. DALE, and Mr. WINGO.

READJUSTMENT OF PAY AND ALLOWANCES OF ARMY, NAVY, ETC.—CONFERENCE REPORT.

Mr. MCKENZIE. Mr. Speaker, I call up the conference report on the bill H. R. 10972, an act to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service.

The SPEAKER. The gentleman from Illinois calls up a conference report on the bill H. R. 10972, which the Clerk will report.

The conference report and statement were read, as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 10972) to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows: That the House recede from its disagreement to the amendments of the Senate numbered 3, 4, 5, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, and agree to the same.

Amendment numbered 1: That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment as follows: In lieu of the language inserted by the Senate, insert the following: "except those whose promotion is limited by law to this grade and who are not entitled under existing law to the pay and allowances of a higher grade"; and the Senate agree to the same.

Amendment numbered 2: That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment as follows: In lieu of the language stricken out by the Senate, insert the following: "Nothing contained in the first sentence of section 17 or in any other section of this act shall authorize an increase in the pay of officers or warrant officers on the retired list on June 30, 1922"; and the Senate agree to the same.

Amendment numbered 6: That the House recede from its disagreement to the amendment of the Senate numbered 6, and agree to the same with an amendment as follows: In lieu of the language inserted by the Senate insert the following: "on June 30, 1922, there shall be included in the computation"; and the Senate agree to the same.

Amendment numbered 7: That the House recede from its disagreement to the amendment of the Senate numbered 7, and agree to the same with an amendment as follows: In lieu of the language inserted by the Senate insert the following: "and service as a contract surgeon serving full time; and also 75 per cent of all other periods of time during which they have held commissions as officers of the Organized Militia between January 21, 1903, and July 1, 1916, or of the National Guard, the Naval Militia, or the National Naval Volunteers since June 3, 1916"; and the Senate agree to the same.

JOHN C. MCKENZIE,
JAMES F. BYRNES,
Managers on the part of the House.

J. W. WADSWORTH, Jr.,
TRUMAN H. NEWBERRY,
DUNCAN U. FLETCHER,
Managers on the part of the Senate.

STATEMENT.

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 10972) to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service submit the following statement in explanation of the effect of the action agreed upon by

the conference committee and submitted in the accompanying conference report:

1. This amendment as modified in the conference prevents officers whose promotion in grade is limited by law to the grade of captain or corresponding grade in other services from receiving a promotion in pay except in those cases where existing law specifically authorizes a higher rate of pay than that of the grade. In general this affects only the medical administrative corps of the Army, the officers of which are limited by law to the maximum grade of captain, and one officer of the Coast Guard, whose promotion is limited by law to the grade of lieutenant but who is under existing law entitled to the pay of lieutenant commander.

2. The House amendment provides in effect to change the percentage of retired pay for certain grades and leave the percentages untouched for other grades. The general rule governing the pay of retired officers is that they shall receive 75 per cent of the active pay. The House amendment would change this rule so that while all first and second lieutenants and all brigadier generals and major generals and practically all captains would continue to receive when retired 75 per cent of their active pay, most majors and all lieutenant colonels and colonels would receive a less percentage than 75 per cent. The Senate amendment provides that all officers, including those now on the retired list, should have their retired pay based on the schedule provided in this bill for the active list after July 1, 1922. The amendment as agreed to in conference provides that officers now on the retired list shall continue to draw the same retired pay which they are now receiving—in other words, the pay of officers now on the retired list is in no way affected by the provisions of this bill—while the retired pay of officers who retire after July 1, 1922, shall be 75 per cent of the active pay which they will be drawing at the time of their retirement, regardless of whether it will be more or less than the retired pay they would receive under the existing laws.

3, 4, 5, 19, 20, 23, 29, 33, 36, 38, 42. These amendments were inserted by the Senate and agreed to in conference so as to provide that all those parts of the bill which would have become effective on the date of the approval of the act shall become effective with all other parts of the bill on July 1, 1922.

11, 12, 13, 14, 15, 16, 17, 21, 22, 24, 27, 28, 30, 31, 35, 37, 39, 40. These amendments, inserted by the Senate and agreed to in conference, provide simply for the correct numbering of the sections of the bill.

6, 7, 10. As the bill passed the House it provided that Regular Army officers who had prior commissioned service in the Organized Militia and in the National Guard should receive credit for 50 per cent of all such service for pay purposes. As the bill passed the Senate this provision was modified so as to provide that such officers should count 50 per cent of only that service in the Organized Militia or the National Guard which has been rendered since the passage of the so-called Dick bill in 1903, which carried the first provisions for Federal supervision of the Organized Militia. As modified and agreed to in conference, the amendment now authorizes credit for 75 per cent of the commissioned service rendered since January 21, 1903, and also 75 per cent of commissioned service rendered in the Naval Militia or the National Naval Volunteers since June 3, 1916.

8, 9. These amendments, inserted by the Senate and agreed to in conference, provide simply for a transposition in words for the sake of clarity.

18. This amendment, inserted by the Senate and agreed to in conference, simply gives to the Secretary of the Navy and the Secretary of the Treasury the necessary administrative authority to put into operation the provisions of this bill which provide for the pay-grade classification of enlisted men of the Navy and Coast Guard.

25, 26. These amendments, inserted by the Senate and agreed to in conference, restore the provisions of the bill regarding nurses to the form in which they were worked out and agreed to by the joint committee which framed the bill. The nurse provisions of the bill were agreed upon by the joint committee after a very careful investigation of nursing conditions in civil life and in the Public Health Service. These provisions, as now agreed to, place the Army and Navy Nurse Corps on an equitable basis with respect to other nurses and give to these nurses an increase which amounts to something more than $1,000,000 more than they are now receiving.

32. This amendment, inserted by the Senate and agreed to in conference, provides that the old Philippine Scout officers who were retired prior to June 4, 1920, the date of the passage of the Army reorganization act, shall be placed in the same identical status as other retired officers, including the Philippine Scout officers who have retired since that date. This is believed to be an act of justice on the part of the Government to these officers who have rendered most meritorious service to the Government and who have been for many years badly neglected.

34. This amendment, inserted by the Senate and agreed to in conference, simply completed the title of the Coast and Geodetic Survey which was inadvertently left incomplete in the House bill.

41. This amendment, inserted by the Senate and agreed to in conference, simply makes clear the meaning of the section and in no wise changes the intent or purpose of the bill.

JOHN C. MCKENZIE,
JAMES F. BYRNES,
Managers on the part of the House.

Mr. McKENZIE. Mr. Speaker, I yield 10 minutes to the gentleman from Alabama [Mr. OLIVER].

Mr. OLIVER. Mr. Speaker, the retirement pay of officers presents the only real difference between the House and Senate on the pending pay bill. The compromise reported by the conferees should not, in my opinion, be approved by the House. When the pay bill was considered the House adopted an amendment limiting the retirement pay of colonels, lieutenant colonels, majors, and officers below the grade of major, and of corresponding grades in the other services, to $3,750 for colonels, $3,375 for lieutenant colonels, and $3,000 for majors and officers below the grade of major. In other words, the House fixed the maximum retirement pay of officers in the above grades at the same amounts as are now allowed under existing law.

Under the bill as reported by the conferees the maximum retired pay after July 1, 1922, of a colonel will be $4,500; of a lieutenant colonel, $4,312.50; of a major, $3,975; and of a captain, $3,375. It will thus be seen that the conference report provides an increase in the maximum retired pay of a colonel of $750; of a lieutenant colonel, $937.50; of a major, $937.50; and of a captain, $675. I submit that no sound reason has been or can be advanced for increasing the retirement pay of officers in these grades so that hereafter a colonel with 30 years' service will draw $4,500 retired pay; a lieutenant colonel with like service, $4,312.50; a major with like service, $3,975; and a captain with like service, $3,375.

The report of the conferees denies this increase of retirement pay to officers now on the retired list, or who may be retired between now and July 1, 1922, but grants it to all officers retired after July 1, 1922. Now, while I do not favor increasing the retirement pay of officers in the grades mentioned, yet I confess that I am unable to understand why, if an increase is granted, it should not apply to officers now on the retired list or who may be retired between now and July 1, 1922. It is not fair to fix an arbitrary date line which will determine hereafter a wide difference in the retirement pay of officers of the same grade and with like service.

What good reason can be assigned why a colonel retired on June 30, 1922, should receive only $3,750, whereas a colonel retired on July 1, 1922, should receive $4,500—why a lieutenant colonel and major, with 30 years' service, retired during the month of June, 1922, should receive $937.50 less than a major with like service retired on or after July 1, 1922. The very fact that the conferees have denied an increase in retirement pay to officers now on the retired list, or who may be retired between now and July 1, 1922, is to my mind an unanswerable reason why no increase should be provided in the retirement pay of officers in the grades referred to.

There are more than 450 officers now in grades corresponding to that of colonel who, if retired after July 1, 1922, will receive the maximum retired pay of $4,500 provided for in the conferees' report; likewise, there are lieutenant colonels and majors and officers of corresponding grades who will be entitled to the maximum retired pay provided for in the conferees' report.

An examination of Table 1, attached to the minority report, will show that many additional colonels, lieutenant colonels, and majors will have sufficient service in the next few years to be also retired at the maximum pay.

When it is recalled that the maximum retired pay of Government civilian employees is $720, to which the employees must, out of their pay, have contributed, I submit that it would be unfair, unjust, and unwise to fix the maximum retired pay of a colonel at $4,500, of a lieutenant colonel at $4,312.50, of a major at $3,975, of a captain at $3,375.

The present retired pay of these officers is more than the yearly salaries paid many high State officials, including many judges of important state courts.

I recognize that there are limitations on the acceptance of employment by retired officers, and this may be suggested as a reason by some of the conferees for recommending an increase in their retired pay. It must be remembered, however, that the

same limitation as to employment applies to the officer now on the retired list, and if there be no good reason for increasing the retirement pay of this last class of officers, surely none can be assigned for increasing the retirement pay of officers retiring after July 1, 1922, since all retired officers suffer the same business handicaps imposed by existing limitations. It so happens that bills are now pending before committees of the House to repeal or modify the limitations referred to, and I understand that the House Committee on Naval Affairs has favorably reported a bill on this subject. The House may later modify existing limitations and vest the Secretary of the Navy and the Secretary of War, with some discretion in reference to civilian employment for retired officers.

In connection with the proposed increase in the retirement pay of officers it is well to recall that the House recently went on record as favoring a reduction of 2,000 in the officer personnel of the Army, and the House Naval Affairs Committee has reported a bill looking to the retirement of a limited number of naval officers. There is also pending in the Senate a bill, known as the Pershing bill, which seeks further authority to retire officers now in the service.

It is safe to predict, then, that this Congress will pass some bill looking to the separation of many present officers from the service. Any reductions in the commissioned personnel which this Congress may require or authorize can not be made effective until after July 1 next. Then, why should Congress increase the retirement pay of colonels, after July 1, from $3,750 to $4,500; of lieutenant colonels, from $3,375 to $4,312.50; of majors, from $3,000 to $3,937.50?

These grades are now top-heavy, and there are many officers, holding commissions in the grades of colonel, lieutenant colonel, major, and captain, who will be retired from active service within the next year. Many of these have sufficient service to entitle them to the maximum retirement pay, and it will prove very expensive to the Federal Treasury to grant the retirement increases, recommended for these grades by the report of the conferees.

In this connection I repeat that if this large increase is granted to officers retired after July 1, 1922, then Congress will be urged at a subsequent session to grant like increases to those now on the retired list and those who may be retired between now and July 1, 1922. The only argument that can be made against granting such increases will be that the amount now received is sufficient, and the same argument, I submit, applies with like force to officers retiring after July 1, 1922.

I do not favor increasing the retirement pay of officers now on the retired list or who may be retired between now and July 1, 1922, in the grades of colonel, lieutenant colonel, major, captain, and of corresponding grades in the other services; but if this Congress grants an increase of retirement pay to officers in these grades, retired after July 1, 1922, then I am at a loss to understand what good reason can be given by those voting for such increase for denying the same to officers now on the retired list.

Many on the retired list have had the same service that those retired after July 1 will have had. They have served in the same grades, and some bear wounds received on the field of battle, yet all increase to them is denied, and you arbitrarily fix a date to wit, July 1, 1922, when retirement pay will be increased.

Mr. WARD of North Carolina. What was the reason for that?

Mr. OLIVER. I am unable to state. I don't think the conferees can offer any satisfactory reason therefor. The pending pay bill is generous to colonels, lieutenant colonels, majors, and captains with more than 20 years' service to their credit, and they are permitted to count, for the purpose of advancement to a pay period higher than that corresponding to the grade in which they hold commissions, all service which now counts for longevity; but the officer commissioned after July 1 is denied the right to count any service, except effective commission service, for advancement, although advancement to a pay period higher than that in which the officer holds a commission involves an automatic increase of $500 in the base pay of the officer.

The pending bill also removes the $1,000 limitation as to the longevity pay of colonels, lieutenant colonels, and majors, and of corresponding grades, and these it will be remembered are the only grades in which any longevity limitation is fixed. It was this fact that led the House to adopt the amendment limiting the retired pay of such officers. The longevity percentage has also been increased by the pending bill from 40 to 50 per cent, so that after July 1, 1922, the maximum pay of a colonel will be $6,000, instead of $5,000; that of a lieutenant colonel, $5,750 instead of $4,500; that of a major, $5,250 instead of $4,000; that of a captain, $4,500 instead of $3,000.

The SPEAKER. The time of the gentleman from Alabama has expired.

Mr. McKENZIE. Mr. Speaker, would the gentleman like some more time?

Mr. OLIVER. I would like to have one minute more.

Mr. McKENZIE. I yield to the gentleman one minute more.

The SPEAKER. The gentleman from Alabama is recognized for one minute more.

Mr. OLIVER. The pending bill, in addition to an increase in pay, as I have just pointed out, grants also a ration and allowance increase to these same officers, as follows:

To colonels, with dependents, a maximum increase from $1,325.35 to $1,878.

To lieutenant colonels, with dependents, a maximum increase from $1,151.70 to $2,097.

To majors, with dependents, a maximum increase from $975.65 to $2,097.

There is a limitation of $7,200, however, in the pending bill, on the total compensation, including pay and allowances, which any officer below the grade of brigadier general may receive, not including extra pay for aviation.

I have mentioned these matters only to emphasize that a generous pay has been provided for officers in the grades of colonel, lieutenant colonel, and major by the pending bill, and that for this reason no increase should be granted in their present retirement pay. The officers now on the retired list have never received the increased pay and allowances that those now in the service will receive in future, and to my mind this strongly argues that no difference should be hereafter made in the retirement pay of officers placed on the retired list before and after July 1, 1922.

The SPEAKER. The time of the gentleman from Alabama has expired.

Mr. McKENZIE. Mr. Speaker, I yield five minutes to the gentleman from South Carolina [Mr. BYRNES].

The SPEAKER. The gentleman from South Carolina is recognized for five minutes.

Mr. BYRNES of South Carolina. Mr. Speaker and gentlemen of the House, the retirement statute to-day provides that the officer who is retired shall receive three-fourths of the pay he is receiving at the time he was retired. This bill as now presented to you does not disturb that provision of law in any way except to provide that no man now on the retired list shall suffer any decrease in pay by reason of the operation of this bill. In other words, it leaves the men on the retired list just where this bill found them, receiving three-fourths of the pay they were receiving at the time they were retired. As to the men to be retired in the future, the existing statute will apply, and it provides that when retired they shall receive three-fourths of the pay they are receiving at the time they retire.

Now, the gentleman who has preceded me has talked to you always of the officers with maximum service, as if every man retired was going to receive the maximum pay. The fact is that in the Army to-day there are only 37 officers awaiting retirement and only 137 who during the next four months will retire. Of this number there are only 10 colonels who will receive the maximum of $750 more than they would receive under the law of 1908.

No lieutenant colonel and no major will receive the maximum retirement pay provided by this bill. The 26 lieutenant colonels to retire will receive an increase ranging from $165 to $430 a year. Fourteen of the 39 majors will receive an increase of from $37 to about $800 a year. All others will receive the same retired pay as under the law of 1908. My friend [Mr. OLIVER] has held up to you only the maximum, omitting to state that practically all officers retired with 15 years' service or less will suffer a decrease in retired pay as compared with the law of 1908. His complaint is not that we refuse to give an increase to the men now on the retired list. He says that is all right. But he thinks his amendment should have been retained as he offered it. But look at what his amendment did. Look at what your managers had to support in conference. By the terms of his amendment he changed the retirement law only as to three grades of officers, colonels, lieutenant colonels, and majors; but the general who retires would still receive three-fourths of his pay under his amendment adopted by the House. The captain who was retired would receive three-fourths of his pay. The first lieutenant and the second lieutenant would receive three-fourths of their pay. But when you get to the colonel, lieutenant colonel, and major of 30 years' service the retirement percentage would be changed from 75 per cent to 62 per cent. He says no discrimination should be made against men now on the retired list in favor of men retired in the future.

He would make a discrimination against some men now on the retired list in favor of other men who are now on the retired list. A captain of 24 years or less would get three-fourths of his retirement pay, a first lieutenant would get the same, a second lieutenant would get the same, and so would a general, whereas a colonel, a lieutenant colonel, or a major would receive only 62 per cent of their retirement pay. Suppose you had done that. Would you not have had just cause of complaint from the retired officer who would say, "Tell me why you give to one officer on the retired list three-fourths of his pay and give to me only 62 per cent?" Manifestly it was unfair and impracticable. The Senate, on the other hand, wanted the retirement schedules as provided for in this bill to apply to every man now on the retired list, where it would result in an increase of pay but not where it would result in a decrease of pay. Your conferees compromised by providing in this conference report that we should leave the men now on the retired list where we found them.

In 1920, when the cost of living was high, when people had lots of money to pay taxes and were not complaining, this House raised the pay of the personnel of the military services and yet did not disturb the status of the men on the retired list. They left them right where they found them. Now, should the Congress to-day be more liberal in granting money to men on the retired list than the Congress was in 1920?

And then there is an additional reason. The pay of the future is established by this bill for the purpose of keeping men in the service. That was the reason why in 1920 you adopted the new pay schedule—the so-called bonus bill—in order to keep good men in the service and attract men to the service. It was not for the purpose of increasing the pay of retired officers. And the readjustment authorized by the same bill was not for the purpose of increasing retired pay. Now, gentlemen on the retired list who have got an increase do not want this new bill to apply where it means a decrease in pay. I will tell you, though the gentleman from Alabama [Mr. OLIVER] failed to state it, that as to every man whose service is under 15 years who is now in the service, if he is retired now he will receive less pay than under the law of 1908. This maximum amount he mentions only refers to officers with the maximum service of 30 years. Out of 1,247 men on the retired list in the Navy, 800 men were retired because of physical disability. It follows that most of these men would not receive the maximum amount, and it is an indication of what would occur in the future. The compromise adopted by the conferees is the logical thing to do; it makes no change in the retirement statute, allowing it to apply to retirements in the future, just as it has to retirements in the past, regardless of whether it means more or less retired pay to an officer.

From my investigation I believe that the whole subject of retirement ought to be investigated, that we ought to determine whether we will continue the provisions prohibiting the employment of a retired officer by any concern doing business with the Government, or whether there should be some modification of these provisions; and if this is done, then reduce the retired pay or provide for a reduction where a man has other sources of income. But certainly you can not ask your conferees to agree to hang out and kill this bill by insisting upon a proposition that would give to three grades of officers 62 per cent and give to every other officer 75 per cent of his active pay as retired pay.

Under the Oliver amendment, adopted in the House, a captain now on the retired list, with 24 years' service, would receive $3,000 retired pay, as against the $2,520 he is to-day receiving, an increase of $480; while the major, lieutenant colonel, and colonel with 30 years would receive no increase. This would be true of the other junior officers, because his limitation would let the three-fourths pay apply to generals and junior officers. This report will not increase any officer on the retired list one dollar and lets the existing statute govern in the future, whether it means an increase or decrease.

If the House thinks the retirement law should be changed, let it be done in a proper manner, changing the percentage of retired pay as to all grades, not three.

Mr. LINTHICUM. Will the gentleman yield for a question?

Mr. BYRNES of South Carolina. Yes.

Mr. LINTHICUM. I do not understand why the man on the retired list who has performed the same length of service should not receive the same retired pay that an officer now in the service would receive when retired.

Mr. BYRNES of South Carolina. They do not want that; they only want the same pay when the same pay is greater than what they now receive. Under this bill the retired pay of many officers will be less. But we specifically provide that no man on the retired list shall suffer a reduction. Is there any reason why a colonel should receive 62 per cent and a first lieutenant and a general should receive 75 per cent?

Mr. LINTHICUM. I am not arguing in favor of what the gentleman from Alabama says.

Mr. BYRNES of South Carolina. That was the House proposition from which the conferees receded in order to accept this compromise.

Mr. LINTHICUM. I do not understand why a man who has given the same length of service in the past should not receive the same pay as an officer retired in the future.

Mr. BYRNES of South Carolina. In many cases it would be less, and my friend would not want that. Whenever a man was retired in the past he received what the law provided he should receive, three-fourths of his base pay and longevity pay. Of course, the allowances never figure in it. He had a right to expect that. He got it. Now the question is raised here as to whether this bill should apply where by its provisions there is an increase. If it should apply to him where there is an increase, why should it not apply where there is a decrease? If you should have the House bill apply, and change the retirement statute in a haphazard manner as to only three grades, it would cause just as much complaint. We contend that, so far as the Government is concerned, it has kept its contract with the officers on the retired list. When he retired the law provided that he should receive the three-quarters pay, and he is receiving it. If hereafter an officer who retires with 10 years' service receives less pay, they have no complaint, but if an officer with 30 years' service happens to receive more, then it is said that he ought not to have it.

Mr. LINTHICUM. What I had in mind was that you increased the pay because of the increased cost of living, and that affects the man on the retired list just as much as a man on the active list.

Mr. BYRNES of South Carolina. When the cost of living was much higher and they were in better position to advocate an increase as an immediate necessity, Congress, in 1920, refused to grant it and should not now be more liberal simply because we are readjusting the pay of the officers in the active service.

The SPEAKER. The time of the gentleman from South Carolina has expired.

Mr. McKENZIE. I will yield to the gentleman two minutes more.

Mr. BYRNES of South Carolina. I believe this is a good bill. It will cost approximately $14,000,000 less than the amount appropriated for this year and $14,000,000 less than the estimate for the personnel for next year. The reduced amount that is authorized by the bill is so distributed that it receives the approval of every one of the services; it receives the approval of 8 of the 10 men who constituted the joint committee and who studied the question for months; it receives the approval of 3 out of 5 of the special committee; it receives the approval of nearly every man on the Military Committee of the House. The gentleman from Kansas [Mr. ANTHONY] is in favor of it. It is approved by the gentleman from Michigan [Mr. KELLEY]. It receives the approval of the gentleman from Tennessee [Mr. PADGETT], of the Committee on Naval Affairs. It of course receives the approval of the gentleman from Illinois [Mr. McKENZIE], its author, who possesses an intimate knowledge of military affairs. Now, when it comes to the consideration of so complex a bill, Members who have not time to investigate it will, I know, have confidence in the judgment of these gentlemen who heretofore have won and justified the confidence of the House in naval and military matters. [Applause.]

Mr. McKENZIE. Mr. Speaker, I yield seven minutes to the gentleman from Ohio [Mr. BEGG].

Mr. BEGG. Mr. Speaker and gentlemen of the House, it is not my purpose to criticize nor commend particularly the bill. The gentleman from South Carolina [Mr. BYRNES] said that we ought to have confidence in the men who have studied the subject and accept their word for it. I have all the confidence in the world in the gentlemen who are responsible for this bill, their honor, their integrity, and their ability. However, that does not preclude me from taking a pencil and doing a little calculation on the result of their efforts. The whole proposition that I want to discuss for a minute or two is that I do not believe there is any warrant or any necessity or any reason why we should retire the military officers in our National Establishment at the end of 30 years' service, provided they are in good physical condition, and retire them at any such figure as we are proposing to do in this bill.

Mr. TILLMAN. Will the gentleman yield?

Mr. BEGG. I would rather not just at this time. I want to give the House these figures, and I believe if you check them up you will find that they are accurate. There are 435 colonels

now in the Army with over 30 years of service; 244 colonels with a service between 28 and 30 years. There are 138 colonels with a service of over 26 years, and the colonel's pay, according to this bill, the retirement pay, will range from $3,750 to $4,500.

In arriving at my figures I have taken the average between $3,750 and $4,500. There is no way that you can find out the total number of colonels that will be retired within the next four years. But, taking the average between $3,750 and $4,500, the cost of retiring that many men is $3,418,800 yearly assessed against the people of the United States for dead weight on the military service.

Now, of lieutenant colonels there are 32 with a service of over 30 years; 126 with a service between 28 and 30 years; 372 with a service between 25 and 27 years; 456 with a service between 22 and 24 years. Their retired pay ranges from $3,375 to $4,312. I again take the average between the two extremes for my basis of figuring the cost annually of retiring the lieutenant colonels in the period of six years from date. That makes $3,746,800.

Now, let us take the majors. You have 11 with a service of over 30 years; 23 with a service between 28 and 30 years; 89 with a service between 26 and 27 years; 140 with a service over 23 and under 25. Their pay ranges from $3,000 to $3,975. It will cost to retire the majors in the Army $920,500.

Now, take the captains. There are 139 captains with a service of over 30 years; 87 captains with a service between 28 and 30 years; 107 captains with a service between 25 and 27 years; 138 captains with a service between 22 and 24 years. Their pay ranges from $2,700 to $3,375. It will cost to retire the captains $1,413,000.

Now, within a period of six years, adding the total retired pay of these eligible to be retired within the next six years in the Military Establishment of the Government, you have $9,499,100 which must be raised from taxation to carry the dead weight on the military service.

Do you gentlemen realize that $9,499,000 lacks only a very few dollars of being one one-hundredth as much as the total cost of operating the Government in 1915–16? Yet here we are paying one one-hundredth as much as the total cost of operating the Government for carrying the dead weight in the Army and the Navy in the military branch.

Every other branch of the Government service is compelled to contribute to the support of the fund out of which they draw their retirement. Every old-age pension scheme that I know anything about is founded upon the principle that while one is able to earn he must contribute to his old-age support.

The SPEAKER. The time of the gentleman from Ohio has expired.

Mr. McKENZIE. Mr. Speaker, I yield three minutes to the gentleman from Indiana [Mr. BLAND].

Mr. BLAND of Indiana. Mr. Speaker, I can not support by my vote any measure that gives a retired Army officer at the age of 46, $4,500 per year. I am reluctant to take this position, because I think this bill, with possibly this exception, is a good bill. I believe in the doctrine of length of service being calculated in the pay of an Army officer, and I think the committee has worked hard and faithfully on this proposition, but I do not believe the Oliver amendment should have been stricken out by the Senate. I think it has put upon the Congress the responsibility of voting a burden of taxation for retired Army officers which the people will resent, and I can not give the measure my support. I realize that we would be in quite a predicament if a pay bill were not passed. I realize that this pay bill is an improvement over the present condition so far as Army officers' pay is concerned. I realize that it will not do to go back to the old 1908 law, and there are several features of the bill that I approve heartily, but I can not permit the other body of this Congress and a conference committee to cram down my throat a provision that I have said I never would vote for; and I never will vote for a provision that retires Army officers at the age of 46 at a salary of $4,500 per year, to be paid by the people of this country. [Applause.]

Mr. McKENZIE. Mr. Speaker, I yield two minutes to the gentleman from Alabama [Mr. OLIVER].

Mr. OLIVER. Mr. Speaker, I simply wish to make a statement in answer to some of the matters referred to by the gentleman from South Carolina [Mr. BYRNES]. He complains that under the amendment, adopted by the House, a difference was made between the percentage retirement pay of colonels, lieutenant colonels, majors, captains, and of officers below the grade of captain. It must be remembered in this connection that there is a limitation under existing law only on the longevity pay of colonels, lieutenant colonels, and majors and those of corresponding grades in the other services, to wit, $1,000. This limitation does not apply to any other grade. In the absence of such limitation, the pay proper of a colonel, lieutenant colonel, and major would be largely increased.

Now, the House in limiting the retirement pay simply gave consideration to this limitation of existing law on the longevity pay of this class of officers. While removing the limitation as to the pay of the grades when on active service, yet it fixed retirement pay on the limitations of existing law.

Allusion is also made to the fact that retired officers were granted no increased pay by the May 12, 1920, bill, known as the bonus bill. In this connection it must be remembered that no increased retirement pay was provided for any officer under the May 12, 1920, bill, and that this bill sought only to provide a temporary increase in the pay of officers while on active service.

If you adopt the conference report, the maximum retired pay of a colonel will hereafter be the same as the maximum retired pay of a brigadier general, to wit, $4,500, and the maximum retired pay of a captain in the Navy will be the same as the maximum retired pay of an admiral—of the lower half—to wit, $4,500.

The gentleman from Ohio [Mr. BEGG] has well pointed out that there are now more than 450 colonels and officers holding corresponding grades in the other services, who will be eligible for retirement at the maximum retired pay, if the conference report is adopted. He has also given interesting data relative to the number of lieutenant colonels and majors, who now and hereafter will be entitled to the maximum retirement pay fixed by the Senate amendment, and which the House conferees have yielded to.

In conclusion, permit me to say that I do not think any sound reason has been offered for increasing the retired pay of colonels, lieutenant colonels, majors, and captains.

The refusal of the conferees to allow increased retirement pay to officers now on the retired list, or who may be placed on the retired list prior to July 1, 1922, completely answers why an increase should not be granted to officers retired after July 1, 1922.

In the pending pay bill many concessions are made to the officers now in the service which are denied to officers who will be commissioned after July 1, 1922, and I submit we should not add a further discrimination in favor of the officers now in the service as to the matter of retired pay.

You can not make gifts and concessions to officers now on active service and deny the same either to officers hereafter commissioned or to officers who may be retired before July 1, 1922. Such concessions and discriminations will unquestionably rise to confront this and subsequent Congresses, and must be dealt with on a basis fair and equitable to all officers, whether now retired or commissioned after July 1, 1922.

The SPEAKER. The time of the gentleman from Alabama has expired.

Mr. McKENZIE. Mr. Speaker, I yield two minutes to the gentleman from Massachusetts [Mr. WALSH].

Mr. WALSH. Mr. Speaker, I direct the attention of the gentleman from Illinois [Mr. McKENZIE] to the fact that the action of the conferees in substituting new language for that of Senate amendments numbered 6 and 7, in my judgment, throws the paragraph in which those amendments are included entirely out of gear. I take it it does not mean anything as I read it. The paragraph as finally agreed to by the conferees reads as follows:

> For officers now in the service all service on June 30, 1922, there shall be included in the computation which is now counted in computing longevity pay, and service as a contract surgeon serving full time; and also 75 per cent of all other periods of time during which they have held commissions as officers of the Organized Militia between January 21, 1903, and July 1, 1916, or of the National Guard, the Naval Militia, or the National Naval Volunteers since June 3, 1916, and service as a contract surgeon serving full time shall be included in the computation.

It would seem to me that the conferees in eliminating the amendments of the Senate and substituting new language have omitted to include certain words which give force to this paragraph as finally amended. Does the gentleman from Illinois think that this now means anything at all?

Mr. McKENZIE. That matter was very carefully gone over by the people who are vitally interested in it. It was gone over repeatedly and checked up. If there is an error in it, it can not be helped at this time, in my judgment. The way the language is written I take it it carried out the wishes of the conferees.

Mr. WALSH. What were the wishes of the conferees?

Mr. McKENZIE. The wishes of the conferees were that the officers who had service in the National Guard should have counted 75 per cent of the time served as officers in the Organized Militia from 1903 and in the National Guard from 1916 on.

The SPEAKER. The time of the gentleman from Massachusetts has expired.

Mr. McKENZIE. Mr. Speaker, I yield five minutes to the gentleman from Texas [Mr. CONNALLY].

Mr. CONNALLY of Texas. Mr. Speaker and gentlemen of the House, I am opposed to the adoption of this conference report for the particular reason that it contains the amendment of the Senate which removes that provision of the House bill which placed a limitation upon the retired pay of officers. There is no other branch of the Government in which there is anything comparable to the provision which we make for the retirement pay of Army officers, naval officers, and officers of the Coast Guard, and the other services provided for in this bill. I do not challenge the justice of a retirement system, but this House is going to great lengths when it makes it possible for 400 colonels in the Army, many of whom are yet capable of rendering the Government service, to be retired at a compensation of $4,500 per year.

What will they do in return for that compensation? Will they render the Government any service? They will go on the retired list, most of them, the very day they are eligible for retirement. Talk to Army officers and get their viewpoint and you will not talk to them very long until it will creep out from somewhere in their conversation that they will be eligible for retirement on such and such a day. They look forward to it anxiously. They look forward to it as a period of ease, a period in which they may pursue other callings and engage in other lines of activity. Many retired Army officers pursue other vocations, and yet draw compensation from the Government as their retired pay. In this city now there are officers who are engaged in business retired from the Army on three-fourths of their pay. This bill as it passed the House contained a provision limiting the retirement pay of colonels to $3,750, and I believe for a lieutenant colonel to $3,200.

Mr. OLIVER. From $3,375 to $4,312.50.

Mr. CONNALLY of Texas. That was a limiting provision and ought to have been retained in this bill. Under this bill, as I understand it, it is possible for colonels to be retired and receive the same retired pay as that a brigadier general receives and render to the Government absolutely no service whatever. Now, gentlemen, talk about economy. I have been hearing people talk about economy ever since I have been in this House. If you call out gentlemen on the majority side and call out gentlemen on the minority side they will tell you, and they will tell their constituents, they are for economy, but it is economy for to-morrow, it is economy for next month, it is economy when the other party comes into power. But it is not economy now. I want to say to the Republican side of the House and I want to say to the Democratic side of the House that if you really believe in economy now is the time to show your colors. If you really believe in economizing in the matter of salaries—you told the country you did not believe in increasing them; you told the voters of the country if they would put you in power you would sit on the lid and keep it from blowing off.

The Democrats said to the people that if they would put us in power we would hold salaries of Government employees down and not increase them. The Republicans went before the country and told the people that if they would put them in power they would stand at the doors of the Treasury with flaming swords; that they would cut out all increase of pay and compensation. So when the bill comes before the House increasing pay of Army officers, they say, "Oh, I believe in economy, I am for economy, but the committee has labored very diligently. This is a good bill; I think it is going to save money." We are told that it will save $14,000,000. It is not true. It will not save a cent, because the temporary bonus law, on the 1st of July, expires, and instead of saving money this bill will not only extend it over to the next fiscal year but over every year that shall follow. I am telling you now, gentlemen, if you believe in economy you had better wake up and practice some and stop increasing salaries that will be given to retired officers, retired on account of length of service and not on disability until the end of creation, and who, the most of them, will retire at the earliest possible moment.

The SPEAKER. The time of the gentleman has expired.

Mr. McKENZIE. Mr. Speaker, I ask to be notified when I have used 15 minutes. Mr. Speaker and gentlemen of the House, I am somewhat at a loss to know just what to say to you. I have listened this morning to the oft-repeated criticism of a few gentlemen who have opposed this bill from its incipiency, and finally the gentleman from Texas [Mr. CONNALLY] winds up his impassioned speech by saying if you favor economy vote against the conference report. I said when I opened the discussion on this bill that I love a good fair fight. I like to meet men who fight in the open and decline and disdain to strike below the belt, but I want to say to you gentlemen very frankly here this morning that every one of these speeches which have been made to you this morning are unfair to the members of the committee.

They pointed out to you that perhaps some of these 400 colonels—who won the Spanish-American War for us; every one of them with the exception perhaps of two dozen are men who served in that war and in the Philippine insurrection—will draw the maximum retired pay. They complain that under this bill that perhaps they will get a little increase in pay when they go out of the active service of the Army. Now, they forget that these men have rendered more service to our country than perhaps any 400 colonels who will be in the service of our Government for many, many years to come. They will tell you about these cases where a colonel who has given 30 years of commissioned service to his country may get a little increase in retired pay. They do not tell you that all down the list that the men who have had short services when they go on the retired list will not go on the retired list on account of a certain kind of badge they have on their shoulder, but that they will be retired according to their length of service, and I challenge the gentleman from Alabama and the gentleman from Texas, or any other man, to show wherein this will not be a saving to this country, because there are infinitely more officers who go on the retired list with a short length of service than those who go on the retired list with long length of service. They talk about longevity pay, and the gentleman from Alabama brought up the old limitation of $1,000 on longevity pay.

Gentlemen, under this law that we have struggled six months to enact we provide for longevity pay that reaches out 30 years over a man's service, and when it is all done he will not receive any more longevity pay than under the existing law. We are criticized for some of these things over which we have no control. And I want to say to you frankly, and I say it in this House to-day, that a joint committee ought to be organized at once for the purpose of revising and readjusting the laws on retirement in this country of ours. If I had my way about it, no man would go on the retired list of his own volition. He would go on the retired list for physical disability alone. [Applause.] But it is a matter over which we have no jurisdiction. We were confined to pay of men on the active list.

Mr. BLAND of Indiana. Will the gentleman yield?

Mr. McKENZIE. Certainly.

Mr. BLAND of Indiana. If the gentleman feels that retirement ought to be made on account of physical disability, why did he as a conferee agree to bring in a provision that increases the retired pay of an officer without any disability whatever?

Mr. McKENZIE. The fact is, we had no power to change the law of retirement. We could not do that. But we did one thing—we said that hereafter men going on the retired list shall be retired on the basis of length of service.

Mr. BLAND of Indiana. Will the gentleman yield a minute?

Mr. CONNALLY of Texas. The gentleman says they have no power to do that. Now, he put a provision in this bill providing the increases at least should not go except to those already retired.

Mr. McKENZIE. I want to say to the gentleman from Texas that it always pays for an individual to be fair. It pays the Government to be fair. And when we provided that men who were to be retired for a short length of service, based on the length of service, it is fair to say that men who had long service have retired pay for that service, not simply on grade.

Mr. BLAND of Indiana. By the action of this House we limited it to $3,750. If you could not agree to it, you could have limited the pay to men who were going out without disability.

Mr. McKENZIE. I stated at the time that I was against that amendment. It discriminated against men in the service in the higher grades and did not touch the men down the line. In conclusion, the opposition steer away from the good things in this bill. They steer away from the humanity in it. They get away from what we have done for the National Guard. They do not tell you that we have done justice to the old Philippine Scouts that have been knocking at the doors of Congress for years for the fair treatment that we have given to the other officers of the Army. They do not tell you about those things, but they ask you to vote against a proposition which I say on my honor as a man will not only be economical, in my judgment, for the Government but one which this Congress will feel proud of in the years to come.

The SPEAKER. The question is on ordering the previous question.

The previous question was ordered.

The SPEAKER. The question is on agreeing to the conference report.

The question was taken, and the Speaker announced that the ayes seemed to have it.

Mr. OLIVER. Mr. Speaker, I make the point of no quorum.

The SPEAKER. It is evident that there is no quorum present. The Doorkeeper will close the doors, the Sergeant at Arms will bring in the absentees, and those in favor of agreeing to the conference report will, as their names are called, answer "yea," those opposed will answer "nay," and the Clerk will call the roll.

The question was taken; and there were—yeas 202, nays 50, answered "present" 1, not voting 178, as follows:

YEAS—202.

So the conference report was agreed to.

The Clerk announced the following pairs:

Until further notice:

Mr. Treadway with Mr. Cockran.

Mr. Paige with Mr. Sullivan.

Mr. Atkeson with Mr. Padgett.

Mr. Kahn with Mr. Favrot.

Mr. A. P. Nelson with Mr. Swank.

Mr. Sanders of Indiana with Mr. Gallivan.

Mr. Winslow with Mr. Almon.

Mr. Evans with Mr. Crisp.

Mr. Burdick with Mr. Stoll.

Mr. Snell with Mr. Aswell.

Mr. Fitzgerald with Mr. Carew.

Mr. Arentz with Mr. Rayburn.

Mr. Cole of Ohio with Mr. Sears.

Mr. Kiess with Mr. Parks of Arkansas.

Mr. Frear with Mr. O'Brien.

Mr. McPherson with Mr. Woods of Virginia.

Mr. Murphy with Mr. Sabath.

Mr. Codd with Mr. Tyson.

Mr. Bowers with Mr. Carter.

Mr. Maloney with Mr. Tague.

Mr. Wason with Mr. Kitchin.

Mr. Dowell with Mr. Tucker.

Mr. Rose with Mr. Sisson.

Mr. Kennedy with Mr. Fields.

Mr. Dickinson with Mr. Weaver.

Mr. Larson of Minnesota with Mr. Larsen of Georgia.

Mr. Beck with Mr. Rainey of Alabama.

Mr. Davis of Minnesota with Mr. Bell.

Mr. Bacharach with Mr. Mead.

Mr. Rogers with Mr. Driver.

Mr. Perlman with Mr. London.

Mr. Fenn with Mr. Lee of Georgia.

Mr. Knight with Mr. Bankhead.

Mr. McArthur with Mr. Smithwick.

Mr. Reed of New York with Mr. Griffin.

Mr. Ransley with Mr. Hudspeth.

Mr. Henry with Mr. Taylor of Colorado.

Mr. Robsion with Mr. Dupré.

Mr. Michaelson with Mr. Sanders of Texas.

Mr. Cooper of Ohio with Mr. Hammer.

Mr. Coughlin with Mr. Collins.

Mr. Vestal with Mr. Taylor of Arkansas.

Mr. Stiness with Mr. Kunz.

Mr. Cramton with Mr. Goldsborough.

Mr. Vare with Mr. Cullen.

Mr. Burtness with Mr. Black.

Mr. Olpp with Mr. Mansfield.

Mr. Nolan with Mr. Clark of Florida.

Mr. Fuller with Mr. Drane.

Mr. Moore of Ohio with Mr. Kindred.

Mr. Hutchinson with Mr. Cantrill.

Mr. Glynn with Mr. Blanton.

Mr. Johnson of Washington with Mr. Park of Georgia.

Mr. Graham of Pennsylvania with Mr. Blanton.

The result of the vote was announced as above recorded.

The SPEAKER. A quorum is present. The Doorkeeper will open the doors.

On motion of Mr. McKENZIE, a motion to reconsider the vote whereby the conference report was agreed to was laid on the table.

LEAVE OF ABSENCE.

Mr. McCLINTIC. Mr. Speaker, I ask unanimous consent that my colleague, Mr. CARTER, be excused for one day on account of sickness.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

VALUATION OF RAILROADS.

Mr. CAMPBELL of Kansas. Mr. Speaker, I submit a privileged report from the Committee on Rules.

The SPEAKER. The gentleman from Kansas submits a privileged report from the Committee on Rules, which the Clerk will report.

The Clerk read as follows:

House Resolution 340.

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into Committee of the Whole House on the state of the Union for the consideration of H. R. 6043, a bill to amend paragraphs enfitled "First" and "Second" of section 19a of the Interstate Commerce act, as amended; that in consideration of said bill it shall be in order to move to substitute Senate bill 539 for the House bill, and that the House bill lie upon the table; that there shall be not to exceed three hours of debate upon said bill; that at the conclusion of the general debate the bill shall be read for amendment, whereupon the bill with the amendments, if any, shall be reported back to the House; the previous question shall be considered as ordered on the bill and on all amendments thereto to final passage, without intervening motion except one motion to recommit.

Mr. CAMPBELL of Kansas. Mr. Speaker, the resolution makes in order the consideration of what is known as the railroad valuation bill. That bill provides in substance that in the revaluation of the railways the value of the real estate used by the roads for depot and other purposes may not be taken into consideration.

Mr. WINGO. Mr. Speaker, will the gentleman yield for a question?

Mr. CAMPBELL of Kansas. I yield for a question.

Mr. WINGO. The rule provides for three hours' debate?

Mr. CAMPBELL of Kansas. I was just going to move or ask unanimous consent to change the time provided for general debate in the rule as reported from three hours to one hour and a half, to be divided as provided in the rule.

The SPEAKER. The gentleman from Kansas asks unanimous consent to amend the rule changing the time of general debate from three hours to one hour and a half. Is there objection?

Mr. BARKLEY. Reserving the right to object, Mr. Speaker, I did not understand how the time was to be divided.

Mr. CAMPBELL of Kansas. To be divided equally between those favoring and those opposing the resolution; 45 minutes to a side, if this agreement is acceded to.

Mr. GARNER. Mr. Speaker, will the gentleman yield?

Mr. CAMPBELL of Kansas. Yes.

Mr. GARNER. Has this a unanimous report from the Committee on Rules?

Mr. CAMPBELL of Kansas. It has.

The SPEAKER. Is there objection?

There was no objection.

Mr. NEWTON of Minnesota. It has a unanimous report from the Committee on Rules?

Mr. CAMPBELL of Kansas. It has a unanimous report from the Committee on Rules. I understand that the bill made in order does not have a unanimous report from the Committee on Interstate and Foreign Commerce.

I want to take a brief moment here to make a pertinent comment, as I think, on a comment made yesterday upon the Committee on Rules by the gentleman from Virginia [Mr. MOORE] during his discussion.

Mr. MOORE of Virginia. May I interrupt the gentleman?

Mr. CAMPBELL of Kansas. Yes.

Mr. MOORE of Virginia. Will an opportunity be given to reply?

Mr. CAMPBELL of Kansas. The gentleman from Virginia will have no objection to what I have to say. I am not about to comment on Joseph's coat or the journey to Damascus. The gentleman from Virginia referred to the fact that he had in mind amending the rules of the House so as to require the Committee on Rules to report expeditiously on matters reported out by that committee. I wish the gentleman from Virginia could do that. I wish the House could do that. The business now coming to the Committee on Rules practically covers the business of the House. Even the Committee on Ways and Means, the Committee on Appropriations, committees that report privileged business, now come to the Committee on Rules for rules governing the consideration of matters that they have reported out. Practically every resolution, every bill from every committee of the House, is referred to the Committee on Rules and a special rule asked for its consideration.

Mr. WALSH. Mr. Speaker, will the gentleman yield?

Mr. CAMPBELL of Kansas. In just a moment. Facetious comment has frequently been made about what the chairman of the Committee on Rules carries in his hip pocket or his coat pocket. [Applause.] If the work of the Committee on Rules continues to grow as it has been growing in the past seven or eight years, there will have to be a calendar for the Committee on Rules instead of a place in the pockets of the chairman for the rules that are reported.

The Committee on Rules does not seek business. Other committees of the House seek the Committee on Rules as soon as they get favorable reports on their bills from the other committees of the House. It has been impossible for the Committee on Rules to secure immediate action on resolutions that have been favorably reported by that committee. The resolution that I have just sent to the Clerk's desk was reported out of the Committee on Rules on the third day of May. I have in my pocket other resolutions reported by that committee on that same day, which I have been unable to present to the House.

Mr. MOORE of Virginia. Will my friend allow me to interrupt him for a minute?

Mr. CAMPBELL of Kansas. Gladly.

Mr. MOORE of Virginia. The resolution which I offered yesterday proposes only two things. I recognize, of course, the great importance of the Committee on Rules, and the way in which it deals with a very large proportion of the business of the House, which is of major interest. These are the two things: First, that when the Committee on Rules adopts a resolution and directs it to be reported, it shall be reported to the House at once for printing, so that the House may know what resolutions have been adopted by the Committee on Rules; second, that the question shall be considered of allowing the House, after the expiration of a definite prescribed period, to determine as a question of privilege whether or not a given resolution shall be considered.

Mr. WALSH. Will the gentleman yield?

Mr. CAMPBELL of Kansas. In just a moment. The suggestions made in the resolution offered by the gentleman from Virginia [Mr. MOORE] are very interesting; but, in the first place, the rules would lose their privileged character immediately upon their being put into the basket and placed on the calendar.

Mr. MOORE of Virginia. I do not contemplate that. The resolution does not provide that.

Mr. CAMPBELL of Kansas. But that act would carry with it the loss of the privileged character of the rule.

Mr. MOORE of Virginia. I think my friend misunderstands the proposition which I have offered. The purpose is not to take away the privileged character of the rules. It is to give information to the House. For instance, the Committee on Rules meets this morning, we will say, and adopts half a dozen resolutions. My thought is that the action of the committee ought to be reported to the House at once and the resolutions printed, and then that the resolutions shall be subject to be called up thereafter by the committee as a matter of privilege, subject to the right of the House, after a reasonable time, to require consideration.

Mr. CAMPBELL of Kansas. A number of years ago there was an attempt to cover the second proposition made by the gentleman from Virginia [Mr. MOORE] by having what was known as the Calendar for the Discharge of Committees, which was on all fours with the proposition contained in the resolution offered by the gentleman from Virginia. There have been, I think, just two bills considered in the last 12 years under a motion to discharge a committee from that calendar. It is a proposition that is wholly impracticable and impossible of application.

Mr. RUCKER. That rule was not intended to expedite business.

Mr. CAMPBELL of Kansas. It could not, as a matter of fact.

Mr. RUCKER. The very language of it made it impossible. That rule was a fraud.

Mr. CAMPBELL of Kansas. A rule could not be made so as to make it possible of practicable application.

Mr. RUCKER. Oh, yes; it could.

Mr. WALSH. Will the gentleman yield?

Mr. CAMPBELL of Kansas. I yield for a question.

Mr. WALSH. Does the gentleman mean to say that the Committee on Appropriations and the Committee on Ways and Means were asking for rules for the consideration of privileged matters?

Mr. CAMPBELL of Kansas. The Ways and Means Committee have brought in at least three major bills in this session of Congress and each of them has been considered in the House under a special rule.

Mr. WALSH. Were they privileged bills?

Mr. CAMPBELL of Kansas. They were privileged bills.

Mr. WALSH. After all, what the Committee on Rules really needs is a larger wastebasket, is it not?

Mr. CAMPBELL of Kansas. Then the criticism that would go up against the Committee on Rules would be like a thunder storm in comparison to a whisper if the wastebasket were resorted to more than it is now.

Mr. WALSH. The gentleman is not afraid of thunder or lightning?

Mr. CAMPBELL of Kansas. No.

Mr. WALSH. If he were afraid he ought not to be chairman of that committee.

Mr. GARNER. Will the gentleman yield?

Mr. CAMPBELL of Kansas. Yes.

Mr. GARNER. The gentleman spoke about special rules for the Ways and Means Committee. If he had put those rules in the wastebasket the House would have had a better opportunity to consider the bills reported from the Committee on Ways and Means. It was not necessary to have special rules in order to get those major measures before the House. The purpose of those rules was to restrict the House in the consideration of those major measures.

Mr. CAMPBELL of Kansas. But notwithstanding that, the Committee on Rules was asked for a special rule, and the Committee on Rules is created in order to aid the House in doing what the House wants to do.

Mr. GARNER. Will the gentleman yield for another question?

Mr. CAMPBELL of Kansas. Yes.

Mr. GARNER. What percentage of the special rules reported by the Committee on Rules are governed by the wishes of the steering committee?

Mr. CAMPBELL of Kansas. The Committee on Rules takes into account the bills that the steering committee has shifted into a place for privileged consideration. Then the Committee on Rules provides the machinery whereby the bill may be considered.

Mr. GARNER. I did not know but what the gentleman might have avoided some of the thunder and lightning referred to by the gentleman from Massachusetts by shielding behind the steering committee.

Mr. CAMPBELL of Kansas. No; the Committee on Rules does not need any shield.

Mr. MOORE of Virginia. I am not going to engage in any contest between the gentleman from Massachusetts [Mr. WALSH], who favors the wastebasket, and the gentleman from Kansas [Mr. CAMPBELL], who favors the hip pocket. [Laughter.] What I wish to say is that for the life of me, notwithstanding all that my friend has said, I can not understand why the House should not be advised and given very timely information of the action of the Committee on Rules without interfering at all with the future privileges of the committee.

Mr. CAMPBELL of Kansas. That might well be done, but the second proposition would be wholly impracticable.

Mr. GREEN of Iowa. Will the gentleman yield?

Mr. CAMPBELL of Kansas. I yield to the gentleman from Iowa.

Mr. GREEN of Iowa. I did not entirely understand the gentleman's statement. I was away for a short time, but I did not know that the Ways and Means Committee had presented any matter to the Rules Committee which the Speaker was ready to hold privileged.

Mr. CAMPBELL of Kansas. It was not a question whether the Speaker would hold it privileged or not. The Ways and Means Committee reported the tariff bill, which was entirely privileged.

Mr. KINCHELOE. And the bonus bill.

Mr. CAMPBELL of Kansas. The bonus bill and two tariff bills and all were considered under special rules.

Mr. GARNER. And the internal revenue bill.

Mr. CAMPBELL of Kansas. And the internal revenue bill.

Mr. GARNER. To which all amendments were cut off at the suggestion of the gentleman from Iowa [Mr. GREEN]. [Laughter.]

Mr. CAMPBELL of Kansas. Never mind about that.

SEVERAL MEMBERS. Vote! Vote!

Mr. CAMPBELL of Kansas. I do not care to take any more of the time of the House. I have stated some of the conditions with which the Committee on Rules is confronted that apparently have not been appreciated by the membership of the House generally. Did the gentleman from Arkansas rise to ask me a question?

Mr. WINGO. I did want to ask the gentleman a question, but a gentleman on the other side who constantly uses time was yelling "Vote" so loudly that he absolutely jarred the question out of my head, and I do not know what it is. [Laughter.]

Mr. CAMPBELL of Kansas. Then I move the previous question on the resolution.

The SPEAKER. The gentleman moves the previous question.

The previous question was ordered.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

Mr. NEWTON of Minnesota. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of S. 539, to further amend an act entitled "An act to regulate commerce," approved February 4, 1887, as amended.

Mr. BARKLEY. Pending that I should like to make an inquiry about the control of the time. I understand the rule says it shall be equally divided between those for and against the bill, but it does not provide who shall control the time.

Mr. CAMPBELL of Kansas. I suggest that the time be controlled one half by the gentleman from Minnesota and the other half by the gentleman from Kentucky.

Mr. MERRITT. Mr. Speaker, I put in a minority report and I think I ought to control one-half of the time. I am the only member of the committee opposed to the bill.

The SPEAKER. The rule does not provide who shall control the time.

Mr. NEWTON of Minnesota. Mr. Speaker, I ask unanimous consent that the time be equally divided between those in favor of the bill and those opposed.

Mr. BARKLEY. The rule provides for that, that the time shall be divided between those in favor and those opposed to the bill.

The SPEAKER. The rule does not provide for the division of time; it says that there shall not be exceeding one and a half hours' debate. That is all it says. The gentleman from Minnesota asks unanimous consent that the hour and a half shall be divided equally between those who favor the bill and those who oppose the bill.

Mr. BARKLEY. That does not settle the question that I asked to have settled as to who is to control the time.

Mr. MONDELL. Would it not be well to have the time controlled one half by the gentleman from Minnesota and one half by the gentleman from Kentucky?

Mr. MERRITT. But the gentleman from Kentucky is in favor of the bill.

Mr. BARKLEY. I am willing to make any kind of an agreement that will give the gentleman from Connecticut all the time he wants. I would like to have the opportunity to yield some time.

Mr. MERRITT. If the gentleman from Connecticut is put in control of one-half of the time, he will be liberal in yielding time to the gentleman from Kentucky.

Mr. BARKLEY. I do not think the tail ought to wag the dog. Why can not we divide the time into three parts, give the gentleman from Connecticut 30 minutes, the gentleman from Minnesota 30 minutes, and I control 30 minutes?

Mr. WALSH. That is giving 60 minutes to those who favor the bill and 30 minutes to those who oppose.

Mr. BARKLEY. Mr. Speaker, I will ask unanimous consent that the time be divided into three parts, 30 minutes to be controlled by the gentleman from Connecticut, 30 minutes by the gentleman from Minnesota, and 30 minutes by myself.

Mr. WALSH. I will object to that, Mr. Speaker, before the request is put. The gentleman from Connecticut is a member of the committee and opposed to the bill, and he ought to have control of the time in opposition to the bill. If there are no others opposed to it he can yield to some one in favor of the bill, but we ought not to depart from the practice that a member of the committee opposing the bill shall control the time.

Mr. BARKLEY. Mr. Speaker, I ask unanimous consent that the gentleman from Connecticut may control 45 minutes, the gentleman from Minnesota [Mr. NEWTON] 25 minutes, and I control 20 minutes.

The SPEAKER. The gentleman from Kentucky asks unanimous consent that the gentleman from Connecticut may control 45 minutes, the gentleman from Minnesota 25 minutes, and the gentleman from Kentucky 20 minutes. Is there objection?

Mr. HUDDLESTON. I object.

Mr. WINGO. Mr. Speaker, I call for the regular order.

The SPEAKER. The question is on the motion of the gentleman from Minnesota that the House resolve itself into Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 6043.

Mr. NEWTON of Minnesota. Mr. Speaker, I submitted a unanimous-consent request.

The SPEAKER. That was objected to; the regular order was demanded.

The motion of Mr. NEWTON of Minnesota to go into Committee of the Whole House on the state of the Union was agreed to; accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. CAMPBELL of Kansas in the chair.

The CHAIRMAN. The House is now in Committee of the Whole House on the state of the Union for the consideration of the bill of which the Clerk will read the title.

The Clerk read as follows:

A bill (H. R. 6043) to amend paragraphs entitled "first" and "second" of section 19a of the interstate commerce act, as amended.

Mr. NEWTON of Minnesota. Mr. Chairman, I move that the bill S. 539 be substituted for H. R. 6043, and that it be considered as provided under the rule.

Mr. WINGO. Mr. Chairman, does the rule provide for that peculiar motion?

The CHAIRMAN. The rule provides that the Senate bill may be offered in lieu of the House bill and that the House bill lie on the table.

Mr. WINGO. That it be offered as an amendment or in lieu?

The CHAIRMAN. In lieu.

Mr. WINGO. Here is what I am trying to get at. The gentleman makes the motion before we begin general debate.

The CHAIRMAN. Before general debate begins, so that general debate will be on the Senate bill.

Mr. WINGO. Will the Senate bill be considered as one amendment?

The CHAIRMAN. No; the Senate bill will be considered as a separate bill.

Mr. WINGO. Then the effect of this motion the Chair will hold is that we consider the Senate bill in lieu of the House bill?

The CHAIRMAN. That is the manner in which it will be considered. The question is on agreeing to the motion of the gentleman from Minnesota.

The motion was agreed to.

The CHAIRMAN. The Clerk will read the Senate bill.

The Clerk read the bill, as follows:

Be it enacted, etc., That the paragraph entitled "First" of section 19a of the interstate commerce act, as amended, is amended by inserting after the words "In such investigation said commission shall ascertain and report in detail as to each piece of property" the words and commas following: ", other than land,"; so that said paragraph as amended shall read as follows:

"First. In such investigation said commission shall ascertain and report in detail as to each piece of property, other than land, owned or used by said common carrier for its purposes as a common carrier, the original cost to date, the cost of reproduction new, the cost of reproduction less depreciation, and an analysis of the methods by which these several costs are obtained, and the reason for their differences, if any. The commission shall in like manner ascertain and report separately other values, and elements of value, if any, of the property of such common carrier, and an analysis of the methods of valuation employed, and of the reasons for any differences between any such value and each of the foregoing cost values."

SEC. 2. That the paragraph entitled "Second" of said section 19a is amended by striking out the comma after the words "and the present value of the same," and inserting a period in place thereof, and by striking out the words "and separately the original and present cost of condemnation and damages or of purchase in excess of such original cost or present value" at the end of said paragraph, so that said paragraph as amended shall read as follows:

"Second. Such investigation and report shall state in detail and separately from improvements the original cost of all lands, rights of way, and terminals owned or used for the purpose of a common carrier, and ascertained as of the time of dedication to public use, and the present value of the same."

Mr. MAPES. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MAPES. Under the rule, who is to control the time in the one hour and a half of general debate?

The CHAIRMAN. The Chair will probably have to make recognition under the general rules of the House.

Mr. MAPES. And it will be distributed as the Chair sees fit?

The CHAIRMAN. There was a unanimous-consent agreement, as the Chair recalls, submitted by the chairman of the Committee on Rules when introducing the resolution, asking that the time be equally divided between those favoring and those opposing the bill, and that request was put when the time was reduced from three hours to one hour and a half. That unanimous-consent agreement was agreed to. The chairman of the Committee on Rules had overlooked the fact that the rule did not itself divide the time between those favoring and those opposing the bill.

Mr. MAPES. The gentleman from Minnesota [Mr. NEWTON] submitted a unanimous-consent request such as the chairman has stated to the Speaker pending his motion to go into the Committee of the Whole, but that was not agreed to.

The CHAIRMAN. The Chair recalls that the chairman of the Committee on Rules submitted a request that the time be reduced from three hours to one hour and a half, to be equally divided between those favoring and those opposing the bill, and that unanimous-consent agreement was agreed to. That would enable the Chairman to recognize the gentleman from Minnesota or any other gentleman favoring the bill, and any gentleman opposing the bill, under the agreement.

Mr. MAPES. As I understand it, the Chair fixes the time that he will allow any one Member to speak?

The CHAIRMAN. Within that time; and the Chair will endeavor to divide the time so that those opposing may have half the time and those favoring may have half the time.

Mr. WALSH. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. WALSH. If a member of the committee is opposed to the bill, is he entitled to priority of recognition?

The CHAIRMAN. Certainly. Recognition will be made under the general rules of the House.

Mr. BARKLEY. Mr. Chairman, would any gentleman who is recognized be recognized for 5 minutes or for 45 minutes? For instance, the gentleman from Connecticut is opposed to the bill. If he is recognized will he be recognized for the full 45 minutes or for 5 minutes?

The CHAIRMAN. That would be determined largely by the gentleman from Connecticut. He would have control of the 45 minutes if he saw fit to take them.

Mr. MONDELL. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MONDELL. Under the rules of the House a gentleman who is recognized is entitled to an hour.

The CHAIRMAN. No; the time has been divided between those favoring and those opposed to the bill.

Mr. MONDELL. The time has been divided, but the division of the time does not affect the general rule that the gentleman who is recognized is entitled to an hour.

The CHAIRMAN. The Chair holds otherwise under the rule under which the bill is now being considered. A gentleman would not be entitled to over 45 minutes, if he was favoring or opposing the bill.

Mr. MONDELL. But before the Chair decides that I think the matter should be carefully considered. This is a rather important decision. The rule entitling a gentleman to an hour is an old and long-established rule of this House. I am sure the chairman does not want to overturn that without due consideration. I think, under the agreement entered into, that the gentleman first recognized would not be authorized to use more than half of the entire time favorable to the bill, but I question whether the arrangement with regard to the division of time takes the control of the hour from the gentleman who was recognized.

The CHAIRMAN. Let the Chair ask the gentleman from Wyoming a question. There was a unanimous-consent agreement that the time be equally divided between those favoring and those opposing the bill. The time was limited to one hour and a half for general debate. Under those circumstances could any gentleman secure the floor for one hour?

Mr. MONDELL. I think so.

The CHAIRMAN. The Chair disagrees with the gentleman from Wyoming, under the unanimous-consent agreement entered into.

Mr. MONDELL. May I make this suggestion? I have been here some time, and I think this is the first time that any occupant of the chair has held that without some definite, specific provision to the contrary, which this division of time is not, in my opinion, the gentleman first recognized in general debate is not entitled to one hour.

Mr. WALSH. Mr. Chairman, will the gentleman yield to a question?

Mr. MONDELL. Certainly.

Mr. WALSH. Does the gentleman have in mind the fact that when the rule was amended and the time reduced from three hours to an hour and a half it was accompanied by a provision that the time should be equally divided between those in favor and those against?

Mr. MONDELL. I do, and I think that the gentleman first recognized is bound by that agreement, but I do not think that deprives him of the control of his hour.

Mr. WALSH. How can the previous agreement of the House, entered into by unanimous consent, be carried out in committee?

Mr. MONDELL. By the gentleman who has the hour yielding a portion of his time. I do not think you can set aside the old rule of one hour in this way. This is a rather important question. I certainly want a proper division of time here, and I am sure everyone does, but I do not believe that a standing, long-established, well-understood rule of the House can be set aside by a mere unanimous-consent agreement with regard to the division of time as between those for and against a proposition.

Mr. GRAHAM of Illinois. Mr. Chairman, will the gentleman yield?

Mr. MONDELL. Yes.

Mr. GRAHAM of Illinois. Suppose the gentleman from Minnesota [Mr. NEWTON] is recognized by the Chair for an hour. He is for the bill. Suppose he decides to take the whole hour himself, discussing the bill; must he stop when he gets through his 45 minutes?

Mr. MONDELL. That is for him to determine.

Mr. GRAHAM of Illinois. Oh, no; it would be for the House to determine.

Mr. MONDELL. Under the rule, as to how he shall yield and when is for him to determine. He might use five minutes.

Mr. LAYTON. Then, what is the virtue of a unanimous-consent agreement on the part of the House?

Mr. MONDELL. The unanimous-consent agreement should be carried out, will be carried out; I have no manner of doubt about that.

But I do not think that sets aside the rule of the House relative to the control of time.

Mr. CHINDBLOM. Will the gentleman yield?

Mr. MONDELL. I will.

Mr. CHINDBLOM. Mr. Speaker, my recollection is that when the chairman of the Committee on Rules presented the rule he asked unanimous consent to amend the rule providing that there should be debate of one and a half hours to be divided equally between those for and those against the legislation. The result of that is that this last agreement is not a unanimous-consent agreement in the ordinary sense. It is under the special rule adopted by the House which contravenes all rules of the House, does it not?

Mr. MONDELL. My understanding is that that was a unanimous-consent agreement.

Mr. CHINDBLOM. No; he asked unanimous consent to make it part of the resolution coming from the Committee on Rules.

Mr. MONDELL. Well, I did not understand that, and I am not sure that that changes the situation any. I do not quite understand that in view of the fact that the gentleman from Minnesota submitted a request for a division of time, because the gentleman from Minnesota was here and must have heard all the discussion.

Mr. CHINDBLOM. I will say I distinctly heard the request of the chairman of the Committee on Rules.

Mr. WINGO. If the gentleman will yield, does not the gentleman overlook the fact that the object of the rule itself is to change the general rules of the House for the purpose of considering this particular bill?

The CHAIRMAN. The Chair wants to make it clear that there is nothing unusual in the ruling heretofore made. If the time in the rule had been five hours instead of an hour and a half to be equally divided and controlled by the two gentlemen, the Chair would have recognized the gentleman from Minnesota for two and a half hours in favor of the bill and some other gentleman for two and a half hours in opposition; but the agreement being for 45 minutes on a side the Chair will recognize, there being no division of time, those who rise in favor of the proposition and those who rise in opposition to it, and——

Mr. MONDELL. If the Chair will permit, I think the Chair did not intend to convey the impression that his words did. If the rule had provided for five hours of debate and had made no provision for the control of time the Chair could not have recognized some gentleman for two and a half hours and another gentleman for two and a half hours. The Chair would have recognized some gentleman for an hour.

The CHAIRMAN. We have been operating under rules which divided the time between gentlemen favoring and those opposed to a measure. Whether it was an hour and a half on a side, or two hours, gentlemen in favor of the bill have been recognized to control the time in favor, and gentlemen opposed to the bill have been recognized in opposition to the bill. In this case there is no agreement as to the persons who shall control the time, and, therefore, the Chair will have to control the time when gentlemen rise, whether they are favoring or opposing the bill. The gentleman from Minnesota.

Mr. NEWTON of Minnesota. Mr. Chairman, will I be recognized for 45 minutes, with the right to reserve and yield?

The CHAIRMAN. The Chair will recognize the gentleman with the right to yield. The Chair will recognize the gentleman for 45 minutes, and at the conclusion of that time a gentleman opposed to the bill would be recognized for the remainder of the time.

Mr. MAPES. Mr. Chairman, a point of order.

The CHAIRMAN. If the gentleman from Minnesota should desire to use the entire 45 minutes, it is up to him.

Mr. JOHNSON of Mississippi. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. If the gentleman desires to control the time he may use the time or yield it.

Mr. JOHNSON of Mississippi. That is the parliamentary inquiry I proposed to propound.

Mr. NEWTON of Minnesota. Mr. Chairman, I hope this is not taken out of my time.

Mr. WALSH. It is.

Mr. NEWTON of Minnesota. Then I can not yield.

Mr. JOHNSON of Mississippi. I am not asking the gentleman, but I want to know of the Chairman if Mr. NEWTON can yield to his colleagues on the committee if he so desires.

The CHAIRMAN. The Chair did not understand the parliamentary inquiry.

Mr. JOHNSON of Mississippi. The Chair has ruled two or three times on the question and I do not understand it, and I want to know if Mr. NEWTON can yield to any of his colleagues if he so desires.

The CHAIRMAN. If he takes 45 minutes he can use it or yield it.

Mr. MAPES. Mr. Chairman, I make a point of order.

Mr. NEWTON of Minnesota. Mr. Chairman, I ask to be notified at the end of 10 minutes.

The CHAIRMAN. The gentleman from Michigan will state his point of order.

Mr. MAPES. I want to ask if I understood that the chairman of the committee under the ruling has control of the time and it is his duty to control it as he sees fit? I have no objection if he wants to give time to the gentleman from Minnesota, but under the ruling I think it is plain that it is the duty of the chairman of the committee to control the time, dividing it equally between those in favor of the bill and those opposed to it.

Mr. JOHNSON of Mississippi. I understand the gentleman is not going to take all the 45 minutes.

Mr. NEWTON of Minnesota. No.

Mr. WALSH. Does the gentleman contend that the chairman of the committee can permit the gentleman from Minnesota——

Mr. WINGO. I make the point of order that the Chair has already ruled on this.

Mr. WALSH. To speak for 45 minutes.

Mr. MAPES. The only limitation on the chairman of the committee in distributing time is that he shall allow it to those in favor of the bill and to those against it. It is his duty first to recognize members of the committee within that limitation, and it is his duty to control the time within that limitation.

The CHAIRMAN. This is the rule under which the debate is to be conducted. The chairman of the Committee on Rules made this request, speaking of the time:

> To be divided equally between those favoring and those opposing the resolution, 45 minutes to a side, if this agreement is acceded to.
>
> The SPEAKER. The gentleman from Kansas asks unanimous consent to amend the rule, changing the time of general debate from three hours to one hour and a half. Is there objection?

Mr. MAPES. Mr. Chairman, I would like to follow what I said by this:

The ruling of the Chairman, as I understand it, would be overriding the attempted action of the House of Representatives when the gentleman from Minnesota submitted the unanimous-consent request that he control one half of the time and the gentleman from Connecticut [Mr. MERRITT] the other half. Now, that was objected to. So we passed back into the committee with the chairman of the committee controlling the time, simply limited by the provision that he shall allow one half of it to those who favor and one half to those who oppose the bill.

The CHAIRMAN. The situation is this: We fall back upon the general rules of the House. The gentleman from Minnesota [Mr. NEWTON] is seeking recognition first. If the time were one hour, he would have it. He has only 45 minutes on his side of the question, and if he can not enter into an agreement with his colleagues on the committee the Chair, of course, has no discretion as to when to call the gentleman from Minnesota down until the expiration of the 45 minutes. It is up to the gentleman from Minnesota. The gentleman is recognized.

Mr. NEWTON of Minnesota. Mr. Chairman and gentlemen, the bill before us seeks to amend in two vital particulars the valuation act, passed by Congress in 1913. There is no more opportune time for considering such legislation than the present. Everyone is complaining of the present high freight rates and their detrimental effect upon business and industry.

In approaching this question of rates it must be remembered that the courts have held from time immemorial that rates must be just and reasonable to both the carrier and shipper.

In an endeavor to arrive at what is a just and reasonable rate and what will bring a fair return the question of the value of the property used for carrier purposes is most important. In Smythe *v.* Ames (169 U. S. 546), the Supreme Court of the United States said the following:

> We hold, however, that the basis of all calculations as to the reasonableness of rates to be charged by a corporation maintaining a highway under legislative sanction must be the fair value of the property being used by it for the convenience of the public.

The valuation of the property used for transportation purposes is, therefore, of fundamental importance. Later on, in the same case, the court said:

> And in order to ascertain that value the original cost of construction, the amount expended in permanent improvements, the amount and market value of its bonds and stock, the present as compared with the original cost of construction, the probable earning capacity of the property under particular rates prescribed by statute, and the sum required to meet operating expenses are all matters for consideration and are to be given such weight as may be just and right in each case.

The general rule as to valuation as laid down by the courts is the cost of reproduction, less such depreciation as may have been caused by using the property for transportation purposes.

In an endeavor to obtain trustworthy information as to the physical valuation of the property used by the railroads of the country for carrier purposes, Congress in 1913 passed the valuation act. I quote from the first and second paragraphs thereof:

> First. In such investigation said commission shall ascertain and report in detail as to each piece of property owned and used by said common carrier for its purposes as a common carrier, the original cost to date, the cost of reproduction new, the cost of reproduction less depreciation, and an analysis of the methods by which these several costs are obtained, and the reason for their differences, if any. The commission shall in like manner ascertain and report separately other values and elements of value, if any, of the property of such common carrier, and an analysis of the methods of valuation employed, and of the reasons for any differences between any such value, and each of the foregoing cost values.
>
> Second. Such investigation and report shall state in detail and separately from improvements the original cost of all lands, rights of way, and terminals owned or used for the purposes of a common carrier, and ascertained as of the time of dedication to public use, and the present value of the same, and separately the original and present cost of condemnation and damages or of purchase in excess of such original cost or present value.

Mr. RAKER. Will the gentleman yield?

Mr. NEWTON of Minnesota. I prefer not to yield until I get through with my statement.

Provision is therefore made for the ascertaining and determining of the evidentiary facts from which the real worth and value of the property of the carrier can be determined. To this end provision is made for a tentative valuation and service of the same upon the carrier, with the right of a judicial review if the carrier is not satisfied with the tentative valuation served. Since the passage of the act the Interstate Commerce Commission has been engaged in this work, and several millions of dollars have been appropriated and expended for that purpose.

In 1920 Congress passed the transportation act, conferring upon the Interstate Commerce Commission the duty of establishing such rates that the carriers in a certain rate group would, under efficient management, and so forth, "earn an aggregate annual net railway operating income, equaling as nearly as may be to a fair return upon the aggregate value of the railway property of such carriers held for and used in the service of transportation." The enactment of this legislation furnishes an added reason for obtaining the true worth and value of railroad property.

The first section of the valuation act requires the commission to define in detail as to the property used for carrier purposes the following:

> A. Original cost.
> B. Cost of reproduction new.
> C. Cost of reproduction less depreciation.

The present bill seeks to so word this paragraph as to make it not to apply to land. This is done by inserting after the word "property" the words "other than land."

The second paragraph requires the commission in its report to state in detail and separately from improvements the following:

> A. Original cost of all land, etc., used for carrier purposes as of time of dedication to public use.
> B. Present value thereof.
> C. Separately, original and present cost of condemnation and damages or purchase in excess of such original cost or present value.

This bill seeks to amend this paragraph by doing away with the necessity of ascertaining anything but the original cost and present value of the land. This is done by inserting a period after "present value of the same" and striking out the remainder of the paragraph and its reference to "excess of cost of acquisition."

The passage of the valuation act was followed by the decision of the Supreme Court in the Minnesota Rate case, which will be found in Two hundred and thirtieth United States, page 352. In this opinion the court condemned this principle of the excess of the cost of acquisition of real property as a basis of value for rate-making purposes. I quote from the decision of the court herewith:

> The company would certainly have no ground for complaint if it were allowed a value for these lands equal to the fair average market value of similar land in the vicinity, without addition by the use of multipliers or otherwise, to cover hypothetical outlays. The allowances made below for a conjectural cost of acquisition and consequential damages must be disapproved.

As a result of this decision the Interstate Commerce Commission never ascertained this excess cost of the acquisition of new land. The commission proceeded to ascertain the value of the various railroad lands without regard to this provision. They so valued the Kansas City Southern Railway system and served a tentative valuation without these figures upon that road. The railroad company brought mandamus proceedings against the commission to compel the commission to find and report this excess cost of acquiring land. The case finally reached the Supreme Court. It will be found in Two hundred and fifty-second United States, page 178. In this case the court in nowise qualified its opinion in the Minnesota Rate case as to the unreliability and lack of worth of such information for rate purposes. But the court said that "Congress undisputably had the authority to impose upon the commission the duty in question"; and that the commission was not at liberty to disobey the express mandate of Congress, even if in its judgment the information was valueless or deficient or impossible to acquire.

The commission has been asking Congress to change the law ever since that time. The question before this House is whether we feel that this excess of cost over original cost of acquiring real property is a proper element upon which to find value for rate making or other purposes. It must be remembered that this amendment applies only to land valuation. There is no attempt to amend the law as to personal property or as to improvements upon the land. The cost of reproduction theory should not apply to land. You can not reproduce land; neither does land depreciate with use.

The courts have held that without regard to the original cost the carrier is entitled to have the present value of his property considered. Again I quote from the Minnesota Rate cases (p. 454):

> It is clear that in ascertaining the present value we are not limited to the consideration of the amount of the actual investment. If that has been reckless or improvident, losses may be sustained which the community does not underwrite. As the company may not be protected in its actual investment, in the value of its property being plainly less, so the making of a just return for the use of the property involves the recognition of its fair value if it be more than its cost. Properties held in private ownership, and it is that property, not the original cost of it, of which the owner may not be deprived without due process of law.

This gives the railroad company, therefore, the benefit of what is known as the unearned increment, which, added to the original cost of the property, equals the present value thereof.

This is the way the commission arrives at the present value of railroad land. I quote from their decision in the Texas Midland case:

> The present value is arrived at by ascertaining the number of acres of land owned or used by the carrier for its purposes as a common carrier, and multiplying this acreage by market value determined from the present market value of similar adjacent and adjoining land. Due allowance is made for any particular value which may attach by reason of peculiar adaptability of the land to railroad use. Nothing is included for the expense of acquisition, nor for severance damages, nor for interest during construction.

The railroads, however, are not content with present value as a rate basis. They want the commission to take into consideration a certain fictitious value which is in excess of the present value. Let me illustrate. Here is a railroad right of way of 100 acres. The original cost of acquisition was $10 per acre, or $1,000 for the tract. The original cost, therefore, would be $1,000. To-day the market value of adjoining farm land is $20 per acre. If there are 100 acres in the right of way, the present market value of the right of way is $2,000. This is the method of valuation that the Supreme Court approved in the Minnesota Rate case. This is the valuation method that the commission used until the decision in the Kansas City Southern case. The railroad, however, is not content with this method of valuation. It wants to add to this what it would cost now to condemn 100 acres from this farming country, now worth

double its original value. This present value would not be there if there had not been a railroad. There could not have been a railroad without the railroads originally acquiring the land upon which the road was built, and the cost of acquisition of this land, of course, is already figured in the value not only as to the original cost but in the present value, for the present value is made up in part by the original cost of acquisition. Of course, there is no question but what to-day if the railroad wanted an additional acre it might possibly cost much more than $20 per acre to acquire this particular tract. This would depend altogether upon the circumstances. There is no way of telling who would sell fairly or unfairly. One man might force the railroad to the expense of condemnation proceedings and another might not. It is all speculative and mere guesswork. To arrive at it you must assume that where there is a railroad there is none. One thing is certain: The present value of farm land is, in part, due to the railroad, which originally acquired its land from the adjoining farm land. If there were no farms, there would be no railroads. One is dependent upon the other. The cost of acquisition, as I have said, is already figured in in arriving at the present value of the land. It helps make up that value. If that is the case, why, then, again figure this cost of acquisition? I again quote from the opinion of Mr. Justice Hughes in the Minnesota Rate case:

It is contended that the valuation was made upon a wrong theory; that it is a speculative estimate of cost of reproduction; it is largely in excess of the market value of adjacent or similarly situated property; that it does not represent the present value in any true sense, but constitutes a conjecture as to the amount which the railway company would have to pay to acquire its right of way in yards, in terminals, or an assumption inadmissible, that while the railroad did not exist, all other conditions, with respect to the agricultural and industrial development of the State and the location, population, and activities of towns, villages, and cities were as they now are.

Mr. Justice Hughes then proceeds to condemn the cost of reproduction method in valuing land for rate-making purposes, and in so expressing his disapproval uses the following language:

It is manifest that an attempt to estimate what would be the actual cost of acquiring the right of way if the railroads were not there is to indulge in mere speculation. The railroad has long been established. To it have been linked the activities of agriculture, industry, and trade. Communities have long been dependent upon its service, and their growth and development have been conditioned upon the facilities it has provided. The uses of property in the communities which it serves are to a large degree determined by it. The values of property along its line largely depend upon its existence. It is an integral part of the communal life. The assumption of its nonexistence and at the same time that the values that rest upon it remain unchanged is impossible and can not be entertained. The conditions of ownership of the property and the amounts which would have to be paid in acquiring the right of way, supposing the railroad had to be removed, are wholly beyond reach of any process of rational determination. The cost of reproduction method is of service in ascertaining the present value of the plant when it is reasonably applied and when the cost of reproducing the property may be ascertained with the proper degree of certainty. But it does not justify the acceptance of results which depend upon mere conjecture.

This is what the Supreme Court of the United States thinks of the method of valuation set forth in existing law. But they hold that Congress has in plain words ordered that method of valuation and that the Interstate Commerce Commission must carry that order until it is changed. It is the law until we change it.

This condemned method of valuation the Interstate Commerce Commission has been following since the decision of the Supreme Court in the Kansas City Southern case. Let me illustrate just how it works out.

The commission, under the terms of the transportation act and in the proceedings known as Ex parte 74, for rate purposes made a tentative valuation of $18,900,000,000 as the aggregate value of the railroads of the country. More than 12½ per cent of this valuation is in lands only, as distinguished from lands with improvements figured in. In other words, the real estate alone, without improvements, figure up 12½ per cent of the total valuation of the railroads' property. Twelve and one-half per cent of this amount equals a sum approximating $2,000,000,000. It must be borne in mind that this tentative valuation of $18,900,000,000 was arrived at by ascertaining the present value without any additions for the excess cost of acquisition new of land over and above the original cost. So that the lands at the present fair market value are worth $2,000,000,000. If the commission, in figuring this valuation, followed the valuation act as to excess cost, as that act has been interpreted by the Kansas City Southern case, the valuation would have been much higher, and this would have meant higher freight and passenger rates. Let me illustrate the differences in the valuation as between the original cost, present value, and present value plus excess cost, in reference to but one railroad property, the Kansas City Southern system.

	Original cost.	Present value.	Excess above present value.	Present value plus excess.
Kansas City Southern Ry	$2,232,549	$2,609,155	$2,735,490	$5,344,645
Texarkana & Fort Smith (Arkansas and Texas)	121,828			
Texarkana & Fort Smith (Arkansas)		117,961	161,017	278,978
Texarkana & Fort Smith (Texas)		645,980	579,315	1,225,295
Kansas City, Shreveport & Gulf	241,203	522,746	539,933	1,062,679
Kansas City, Shreveport & Gulf Terminal	16,795	34,851	26,266	61,117
Maywood & Sugar Creek	6,550	8,729	9,768	18,497
Fort Smith & Van Buren	25,388	7,870	11,570	19,440
Poteau Valley	983	828	1,686	2,514
Arkansas Western	3,573	10,720	17,360	28,080
Port Arthur Canal & Dock Co	52,842	278,695	271,989	550,684
Port Arthur Canal & Dock Co. (leased)				
	2,701,711	4,495,283	4,362,566	8,858,851

The first column contains the figures for the original cost; the next column contains the present value at market prices. The third column is the excess of cost over and above the present market value. The last column is the present market value plus this excess of cost, including cost of condemnation, damages, and so forth. This is for lands which originally cost the railroad $2,700,000 and which the commission appraised at a fair market value of $4,500,000. If the law is not changed, the railroad will be able to have considered a valuation of at least $8,858,000.

However, the Kansas City Southern was not even satisfied with this apparently excessive figure. They filed a protest against the latter figure. I quote from their protest, as follows:

The commission's estimate of the cost of acquisition is inadequate and insufficient. The cost of acquisition of the carrier's land, exclusive of interest, taxes, and incidental cost of acquisition, is not less than double the so-called present value of said lands as determined by the commission.

The present value as found by the commission was four and one-half million dollars. The carrier wants the excess above the present value figured at $9,000,000, which would make a total for present value, plus excess, of $13,500,000 for valuation purposes, as against an original cost of $2,700,000. This would be using, therefore, for valuation purposes a multiple of three. The railroad companies therefore are not content with a profit upon the actual investment—the original cost—or upon the present value with its unearned increment, but they insist upon a fictitious value which is greater by far than the present value. They do this in spite of the fact that the reproduction-new theory as to land as applied to land has met with the expressed disapproval of the Supreme Court.

The multiplier used by the Interstate Commerce Commission I shall ask leave to have inserted as an appendix to my remarks. This excess of cost runs from 55 per cent over and above the present value to 200 per cent. This is figured from 55 per cent to 100 per cent as to city property and up to 200 per cent as to suburban and farm property. To the land where adjoining the right of way is city property the commission must add at least 55 per cent to the present fair market value. If the land adjoining the right of way is in the country the commission, following this multiple plan, may add up to 200 per cent.

Let me apply this to the present railroad rate situation. The present value of all railroad land, not including improvements, is $2,000,000,000. Present rates are based upon this valuation. If a multiplier of 2 is used the value of these lands would be $4,000,000,000. If a multiple of 3 is used—this is the multiple contended for by the railroads in the Minnesota rate case and the Kansas City Southern case—the value of the land alone would be increased to $6,000,000,000. The Interstate Commerce Commission have just held that a fair return under the provisions of the transportation act is 5½ per cent on the aggregate value of the railroad property devoted to transportation purposes. Five and three-fourths per cent on $2,000,000,000 is $115,000,000. If the multiple of 2 is used and the value is increased $2,000,000,000 an additional revenue would be required of $115,000,000. If a multiple of 3 is used additional revenue would be required of $230,000,000. This increased revenue could only be obtained through a material increase in both freight and passenger rates. To advocate this at a time when the whole country is feeling the effects of the present high rates seems absurd.

This would bring other absurd results. For example, the Texas Midland Railroad on valuation date of June 30, 1914, was capitalized for $2,622,000, made up of bonds to the extent

of $2,000,000, outstanding stock $122,000, and $500,000 due the Texas Midland Construction Co. which had never been capitalized by the actual issuance of stock. The cost of reproduction new, less depreciation of the Texas Midland, other than land, as shown by the commission's valuation report, is $2,597,000, or without depreciation, $3,461,000. If this road should be valued upon the basis of the multiple requested by the Kansas City Southern road the value would be $3,384,000 or $4,248,000, as deduction is or is not made for depreciation. Deduct the bonds at par from the value found, and the stock equity in the property will be $1,384,000 if depreciation is deducted, or $2,248,000 without such deduction, making in each case, respectively, for stock, $209, or $367 per share of $100. The evidence submitted to the committee at the hearings was to the effect that this stock had never yet paid a dividend. It has no market value, so far as could be ascertained. Surely such a method of valuation should not be countenanced by this Congress.

Mr. WINGO. Will the gentleman yield there?

Mr. NEWTON of Minnesota. I will.

Mr. WINGO. If you amend the law, as proposed by this bill, then thereafter in fixing the value of any railroad you will take the replacement value determined by the acreage value of the surrounding farms instead of taking the replacement value of condemnation proceedings? Is that the idea?

Mr. NEWTON of Minnesota. Exactly.

Mr. WINGO. In other words, you propose to go back to the rule that was contrary to the one that was contended for by the railroads prior to the Kansas City Southern decision?

Mr. NEWTON of Minnesota. We propose to place this law squarely with the ruling of the Supreme Court in the Minnesota Rate case, where the railroads made the same contention.

Mr. WINGO. This bill is contrary to the Kansas City Southern rule?

Mr. NEWTON of Minnesota. Yes; this bill is contrary to the rule which the Supreme Court in the Kansas City Southern case said Congress had prescribed, but it is in accord with the principle or rule in the Minnesota Rate case.

Mr. BARKLEY. Mr. Chairman, will the gentleman yield there?

Mr. NEWTON of Minnesota. Yes.

Mr. BARKLEY. This bill relieves the commission from doing what the decision in the Kansas City Southern case said they had to do, which, after they had done it, was of no value to them in complying with the Minnesota Rate case?

Mr. NEWTON of Minnesota. The gentleman is correct.

Mr. MOORE of Virginia. Mr. Chairman, will the gentleman yield there?

Mr. NEWTON of Minnesota. Yes.

Mr. MOORE of Virginia. As I look at it now, I am for the bill. As I understand the present law, the commission is required to ascertain the value of the land at the time it was dedicated to the use of the public and was acquired by the railroad?

Mr. NEWTON of Minnesota. That is correct.

Mr. MOORE of Virginia. And the present value of the land?

Mr. NEWTON of Minnesota. Yes.

Mr. MOORE of Virginia. You propose to stop at that?

Mr. NEWTON of Minnesota. Yes.

Mr. MOORE of Virginia. The present law also requires two things additional; that is, it requires the commission to ascertain the condemnation value of the land at the time it was acquired by the railroad company and the present condemnation value of the land. Those two things you strike out, because they contemplate what is useless or, at least, impracticable.

Mr. NEWTON of Minnesota. The condemnation value at the time of acquiring the right of way.

Mr. MOORE of Virginia. You retain the following language:

> Such investigation and report shall state in detail and separately from improvements the original cost of all lands, rights of way, and terminals owned or used for the purposes of a common carrier, and ascertained as of the time of dedication to public use and the present value of the same.

Your bill stops there. The existing law goes on further, and you strike out the following portion of the existing law:

> And separately the original and present cost of condemnation and damages or of purchase in excess of such original cost or present value—

Your contention is that for the commission—and the commission has said so itself, and the court has said so—your contention is that for the commission to try to ascertain the condemnation values as of the past and of the present is an unprofitable and vain thing, and does not assist in getting at the real value?

Mr. NEWTON of Minnesota. The gentleman is correct.

Mr. HOCH. Mr. Chairman, will the gentleman yield there?

Mr. MOORE of Virginia. Yes.

Mr. HOCH. Where there was an original condemnation cost, that is included in the cost?

Mr. MOORE of Virginia. Yes; the original cost.

Mr. HOCH. So that there is no disposition to take out the condemnation costs where there was an original cost?

Mr. MOORE of Virginia. No. You would leave the commission to ascertain the original value—or, rather, cost—and the present value of the land.

Mr. HOCH. Yes; but not the excess of present condemnation.

Mr. PARKER of New Jersey. Mr. Chairman, will the gentleman yield?

Mr. NEWTON of Minnesota. Yes.

Mr. PARKER of New Jersey. The gentleman has not discussed what would be done when, instead of running through farm lands, the railroads should run through a city, from block to block. Then you would assess the improvements?

Mr. NEWTON of Minnesota. Those improvements were caused by the railroad going through there and the people having the patronage of the railroads. The present value is represented in the market value of the property.

Mr. PARKER of New Jersey. Is that followed the same as if it were land occupied by a house next door?

Mr. NEWTON of Minnesota. The land as distinguished from improvements on the land is so followed, and that is what the Supreme Court upheld in the Minnesota Rate cases. That is the method of valuation. This bill only applies to land as such and not to structural improvements.

Mr. DOWELL. Mr. Chairman, will the gentleman yield?

Mr. NEWTON of Minnesota. Yes.

Mr. DOWELL. I understand that in this bill you eliminate entirely the present condemnation value of the land?

Mr. NEWTON of Minnesota. The gentleman has stated it correctly.

Mr. DOWELL. You leave the original condemnation cost only where that represented the only measure of the cost?

Mr. NEWTON of Minnesota. As the gentleman from Kansas stated it, the commission must ascertain the original cost. That may mean condemnation cost or purchase cost. That is not included.

Mr. FROTHINGHAM. Value or cost?

Mr. NEWTON of Minnesota. Yes.

Mr. CHINDBLOM. Where it was the condemnation cost the commission may still take that figure?

Mr. NEWTON of Minnesota. Yes.

To sum up: Congress has heretofore passed a law—the valuation act—which requires the commission to ascertain and report incompetent and irrelevant evidence as to the value of railroad land. This bill says that such evidence need not be further gathered and what has been gathered need not be considered by the commission or be presented in court by the commission in any valuation proceedings. Of course, if the carriers themselves desire to present such evidence in a court proceeding, and the court should desire to consider it, this bill would in nowise prevent it. The whole question is whether we are to aid the railroads of the country in compelling the Interstate Commerce Commission to allow this multiplied land value in the work that they are doing in valuing the railroads of the country. There should be but one answer. This Congress should not countenance in any way the gathering and consideration of this guesswork information under a doctrine which is unsound in every way and which if applied will mean multiplied and unjustifiable burdens upon our people. [Applause.]

Mr. Chairman, under leave granted to extend, I insert a table from the Bureau of Valuation of the Interstate Commerce Commission, showing the multiples used in arriving at this excess of cost of acquisition view of real property, which table has been in use since the decision in the Kansas City Southern case. I also insert another table from the commission, showing comparison between present value and excess of cost of acquisition as to 100 carriers.

Mr. Chairman, I reserve the balance of my time.

APPENDIX I.

COST OF ACQUISITION.

FINAL TYPES.

I. HIGHLY DEVELOPED LOT PROPERTY.
- (a) Commercial:
  1. Whole lots taken, $0.60.
  2. Part only of lots taken, $0.75.
- (b) Residential:
  1. Whole lots taken, $0.55.
  2. Part only of lots taken, $0.70.
- (c) Industrial:
  1. Whole lots taken, $0.65.
  2. Part only of lots taken, $0.70.
- (d) Mixed utility when not included in the above subdivision:
  1. Whole lots taken, $0.55.
  2. Part only of lots taken, $0.65.

II. PLATTED PROPERTY IN TOWNS OR OUTLYING PORTIONS OF LARGE CITIES.
1. Whole lots taken, $0.60.
2. Part only of lots taken, $1.

III. IRREGULAR TRACTS—SUBURBAN.
(a) Residential:
1. Whole tracts taken, $0.70.
2. Part only of tracts taken, $1.
(b) Industrial:
1. Whole tracts taken, $0.65.
2. Part only of tracts taken, $0.70.
(c) Truck gardens, undeveloped or property not falling in either residential or industrial:
1 Whole tracts taken, $0.80.
2. Part only of tracts taken, $1.

IV. RURAL.
A. Right of way strip only taken:
(a) High-grade land—
1. Adjoining land held in large tracts (if irrigated, indicate by symbol "i"), $1.60.
2. Adjoining land held in small tracts (if irrigated, indicate by symbol "i"), $1.70.
(b) Medium-grade land—
1. Adjoining land held in large tracts, $1.60.
2. Adjoining land held in small tracts, $1.70.
(c) Low-grade land—swamp, rocky, desert, and grazing—
1. Adjoining land held in large tracts, $1.90.
2. Adjoining land held in small tracts, $2.

Value of orchards, minerals, and timber deducted and land then valued.

(d) Orchard lands—
1. Adjoining land held in large tracts.
2. Adjoining land held in small tracts.
(e) Mineral lands—
1. Fissure veins or pockets.
2. Sedimentary beds.
(f) Timberlands—
1. Adjoining land held in large tracts.
2. Adjoining land held in small tracts.

B. Large areas taken by carrier:
(a) High-grade land—
1. Adjoining land held in large tracts (if irrigated, indicate by symbol "i"), $0.60.
2. Adjoining land held in small tracts (if irrigated, indicate by symbol "i"), $0.70.
(b) Medium-grade land—
1. Adjoining land held in large tracts, $0.70.
2. Adjoining land held in small tracts, $0.80.
(c) Low-grade land—swamp, rocky, desert, and grazing—
1. Adjoining land held in large tracts, $0.80.
2. Adjoining land held in small tracts, $1.

V. WATER-FRONT LANDS.
1. Right of way, $1.
2. Docks and wharves, $0.40.

VI.

A. Owned right of way for industrial track, where the adjoining land is owned by the industry served.

B. Where the right of way is through large tracts of noncarrier land, owned by the carrier.

APPENDIX II.

INTERSTATE COMMERCE COMMISSION.

BUREAU OF VALUATION.

Statement showing comparison between the present value, as of date of valuation, and the excess cost of acquisition of carrier lands owned by the following carriers.

	Present value.	Excess cost of acquisition.
Atlanta, Birmingham & Atlantic R. R. Co.	$1,426,938	$1,188,329
Georgia Terminal Co.	1,029,019	257,255
Alabama Terminal R. R. Co.	857,955	386,080
Texas Midland R. R.	254,490	268,734
New Orelans, Texas & Mexico Ry. Co.	141,686	149,148
Kansas City Southern Ry. Co.	2,604,693	2,758,590
Texarkana & Fort Smith Ry. Co.	759,181	740,210
Kansas City, Shreveport & Gulf Ry. Co.	522,746	539,847
Maywood & Sugar Creek Ry. Co.	8,729	9,767
Fort Smith & Van Buren Ry. Co.	7,870	11,569
Poteau Valley R. R. Co.	828	1,686
Arkansas Western Ry. Co.	10,720	17,355
Kansas City, Shreveport & Gulf Terminal Co.	34,851	26,261
Port Arthur Canal & Dock Co.	537,445	280,096
Winston-Salem Southbound Ry. Co.	510,655	468,022
Elgin, Joliet & Eastern Ry. Co.	1,965,335	1,667,307
Chicago, Lake Shore & Eastern Ry. Co.	1,421,560	1,170,525
Joliet & Blue Island Ry. Co.	.....	.....
Wrightsville & Tennille R. R. Co.	243,333	240,918
Toole Valley Ry. Co.	8,976	8,410
Alabama Central Ry.	1,099	1,924
St. John & Ophir R. R. Co.	664	80
Missouri Southern R. R. Co.	25,169	25,461
Ray & Gila Valley R. R. Co.	160	191
Quincy Western Ry. Co.	1,758	2,511
Tonopah & Tidewater R. R. Co.	6,889	1,278
Bowdon Ry. Co.	9,603	12,820
Georgia Southern & Florida Ry. Co.	1,231,456	889,747
Georgia Northern Ry. Co.	155,031	168,857
Death Valley R. R. Co.	527	.....
Dover & South Bound R. R.	4,400	6,631
Carolina R. R. Co.	4,697	7,002
Hampton & Branchville Railroad & Lumber Co.	11,853	15,079
Arizona Southern R. R. Co.	1,716	2,890
New Mexico Midland Ry. Co.	363	156
Sylvania Central Ry. Co.	34,286	40,360
San Pedro, Los Angeles & Salt Lake R. R. Co.	4,043,749	2,813,354
Louisville & Wadley R. R. Co.	10,462	12,538
Albany Passenger Terminal Co.	50,397	33,275
Macon & Birmingham Ry. Co.	121,934	145,006
Mississippi Eastern Ry. Co.	50,027	65,146

Statement showing comparison between the present value, etc.—Contd.

	Present value.	Excess cost of acquisition.
Norfolk Southern R. R.	$2,418,698	$1,842,540
Atlanta & North Carolina R. R. Co.	583,272	384,884
Carthage & Pinehurst R. R. Co.	8,918	9,557
Tampa & Jacksonville Ry. Co.	32,730	33,178

The CHAIRMAN. The gentleman from Minnesota has used 17 minutes. The Chair recognizes the gentleman from Connecticut [Mr. MERRITT] for 45 minutes.

Mr. MERRITT. Mr. Chairman, this bill is an attempt to settle a judicial question by legislation. To accomplish this it is proposed to strike out from the valuation act of March 1, 1913, an element of value in the property of common carriers dedicated to public use, which was specially provided for in paragraph 2 of the valuation act, which element always has been and still is embodied in our common law as an element to be considered in property valuation.

This paragraph is as follows. This is the present law:

Second. Such investigation and report shall state in detail, and separately from improvements, the original cost of all lands, rights of way, and terminals owned or used for the purposes of a common carrier, and ascertained as of the time of dedication to public use, and the present value of the same—

Now comes the part which it is proposed to strike out—

and separately the original and present cost of condemnation and damages or of purchase in excess of such original cost or present value.

Now that this element of value as embodied in the common law may be shown by reference to the case of Smythe *v.* Ames (169 U. S. 466), decided in 1898, where the court says:

We hold, however, that the basis of all calculations as to the reasonableness of rates to be charged by a corporation maintaining a highway under legislative sanctions must be the fair value of the property being used by it for the convenience of the public.

And, in order to ascertain the value, the original cost of construction, the amount expended in permanent improvements, the amount and market value of its bonds and stock, the present as compared with the original cost of construction, the probable earning capacity of the property under particular rates prescribed by statute, and the sum required to meet operating expenses, are all matters for consideration, and are to be given such weight as may be just and right in each case. We do not say that there may not be other matters to be regarded in estimating the value of the property.

This decision of Smythe against Ames has been approved in many subsequent cases, notably in the Kansas City Southern case, to which reference will be made later.

I hope that the House will not fail to note that in the decision of the court, and in the valuation act itself, the language which it is proposed to strike out does not provide that the commission shall find the present cost of condemnation and damages as the value of the property. That is an erroneous impression which I think is quite common. It is merely that they shall find the present cost of condemnation and damages and state it separately, and give it such consideration in the final estimate as it is entitled to.

Mr. CHINDBLOM. Will the gentleman yield?

Mr. MERRITT. I yield to the gentleman from Illinois.

Mr. CHINDBLOM. If it does not represent the present value, what consideration should be given to it?

Mr. MERRITT. For instance, take a case with which I am familiar, and which is probably typical of situations in other cities. That is the case of the great New York Central terminal in New York City. Under the rule which is now followed by the commission they would find out the acreage value or the lot value of the surrounding land and say that the value of the terminal is its acreage based on surrounding value; but we all know that the railroad could not possibly acquire its terminal acreage for anything like that money, and it appears to me just that the railroad, which would be put to so much extra expense, should have a higher rate of valuation on which it should be allowed to earn a return.

Mr. DOWELL. Will the gentleman yield?

Mr. MERRITT. Yes.

Mr. DOWELL. But that is the rate which is fixed upon land that is already owned by the railroad company.

Mr. MERRITT. Yes.

Mr. DOWELL. Therefore because the railroad company owns the land, that does not make it more valuable than the land adjoining. So will the gentleman explain why the valuation should be higher than that of the surrounding property because the railroad company has possession of it now?

Mr. MERRITT. I say as I said a minute ago, not that that fact in itself would be controlling. I only say that it is an evidential fact, and the commission might take that into consideration in determining the fair value.

Mr. DOWELL. But the gentleman is assuming now that if the railroad company attempted to purchase the land the condemnation valuation would be higher than its actual value; but if the gentleman will take the question as it now stands, this is real estate that is actually owned by the railroad company.

Mr. MERRITT. I understand that.

Mr. DOWELL. And not land which they may in future desire to condemn or purchase.

Mr. MERRITT. I can not yield further. After the well-known Minnesota Rate case the valuation committee of the Interstate Commerce Commission so interpreted the decision as to make it unnecessary for them to obey the last clause in paragraph 2 of the valuation act, and they went ahead and made a number of tentative valuations without reporting separately, as required by the act, the original and present cost of condemnation and damages or purchase in excess of original cost or present value.

The Minnesota Rate case was decided in June, 1913. In March, 1920, the Kansas City Southern case was decided by the Supreme Court, and that decision set forth clearly that the interpretation of the Interstate Commerce Commission of the decision of the court in the Minnesota Rate case was erroneous. In the Kansas City Southern case the Supreme Court quotes the reasoning which led the commission to disregard the last part of section 2, which is as follows. The commission says:

We are unable to distinguish between what is suggested by the carrier in this record and nominally required by the act and what was condemned by the court (in the Minnesota Rate cases) as beyond the possibility of rational determination; nor is there any essential difference in the actual methods there employed and those now urged upon us. Before we can report figures as ascertained, we must have a reasonable foundation for our estimate, and when, as here, if the estimate can be made only upon inadmissible assumptions, and upon impossible hypotheses, such as those pointed out by the Supreme Court in the opinion quoted, our duty to abstain from reporting as an ascertained fact that which is incapable of rational ascertainment is clear.

Mr. HOCH. Will the gentleman yield?

Mr. MERRITT. I will.

Mr. HOCH. The gentleman does not contend, does he, that in the Kansas City Southern case the Supreme Court passed upon the justice or the wisdom of this valuation act? The Kansas City Southern case was a mandamus action to compel the Interstate Commerce Commission to do what the statute required them to do. It did not involve at all the question of policy, as I understand it. It was simply the question whether the statute required them to do that thing, and whether therefore they should proceed to do it; so that regardless of the Kansas City Southern case the question of policy is still before the Congress, is it not?

Mr. MERRITT. It is.

Mr. HOCH. The Kansas City Southern case did not touch the question of policy at all.

Mr. MERRITT. I do not agree about the case not touching the question. I think the case was decided on the statute, but it does show that this question is an open one. The case did not decide the question the other way, certainly.

Mr. WINGO. Will the gentleman yield?

Mr. MERRITT. I yield to the gentleman from Arkansas.

Mr. WINGO. Do I understand that in the gentleman's opinion this bill if passed would revert the rule back to the old rule of valuation as covered in the Minnesota case, and completely overturn the rule as approved in the Kansas City Southern case?

Mr. MERRITT. I do not think so.

Mr. WINGO. Would it establish any new rule?

Mr. MERRITT. If the gentleman will follow me, I think he will see what I think it will do. Then I will be glad to answer any further questions that may be asked.

On this position of the Interstate Commerce Commission the Supreme Court comments, in the Kansas City Southern case, as follows:

It is true that the commission held that its nonaction was caused by the fact that the command of the statute involved a consideration by it of matters beyond the possibility of "rational determination," and called for "inadmissible assumptions" and the indulging in "impossible hypotheses" as to subjects "incapable of rational ascertainment," and that such conclusions were the necessary consequences of the Minnesota Rate cases.

We are of the opinion, however, that, considering the face of the statute and the reasoning of the commission, it results that the conclusion of the commission was erroneous, etc.

After the decision of the Supreme Court in the Kansas City Southern case the valuation commission proceeded to do what it had previously said it could not do, and found the original and present cost of condemnation and damages or of purchase in excess of original cost or present value, and Judge Prouty, director of valuations, in a hearing before the commission March 24 to 28, 1917, on pages 230 and 231 of the record, states that the cost of acquisition of railway lands can be ascertained without difficulty and with reasonable accuracy. Judge Prouty testified as follows:

Director PROUTY. I understand, Mr. Chairman, that Mr. Butler is trying to prove that, knowing the acreage value of the lands taken by a railroad company, it is possible to apply a percentage to that acreage value which will reasonably express the costs of acquiring that land by the railroad company.

I understand that is his proposition.

Now, if the commission please, I concede that. I concede that it is possible, from the experience of carriers in the past, to determine, not accurately but within certain limits, a multiple or percentage, or whatever you may call it, which you can apply to the base value of these lands in ascertaining the cost of those lands to the railroad company, and we do not need to introduce any more testimony to prove that. I have never denied it.

The above shows that Director Prouty believes that the present cost of condemnation and damages or of purchase in excess of such original cost or present value can be obtained, and in fact such values have been obtained in connection with approximately 200 railways.

It is somewhat surprising to find, on page 5 of the majority report on this bill, a table showing percentages of increment and original cost as shown by the commission, and a percentage of hypothetical increment obtained by applying a multiple of 3.1. The unfairness of this method of showing percentages by selected individual cases was clearly pointed out in the testimony before this committee on the hearings on a similar bill (H. R. 13997) in the Sixty-sixth Congress, held during January and February, 1921. The method of arriving at these percentages is evident, namely, taking the first case cited, the Texas Midland Railway, the original cost, as stated in the table, is deducted from the present value, as there stated, and the remainder is divided by the original cost and produces the per-

centage of 279, as shown. It is clear that by taking isolated cases, which may give high percentages, an entirely misleading impression is produced. Before we give any weight to such figures, a number of them must be collected in order to give anything like an average result. There are very few railways in this table, but by adding the original costs, as stated, together and the present value of lands found by the Interstate Commerce Commission together and treating them in precisely the same manner in which the figures of the Texas Midland were treated, as above, we get in round figures $25,000,000 for the original cost column and $64,000,000 for the present value column, and deducting the cost from the present value and dividing the remainder by the original cost the result shows a small fraction over 150 per cent, which is not so alarming as the percentages set forth in individual instances. It was shown also in the testimony that the figures stated for these 16 roads involved a total of over 45,000 parcels of land, of which over 9,000 were reported as apparent aids, gifts, or grants. The memorandum, therefore, institutes an impossible comparison between the original cost of over 36,000 parcels of land, with an acreage of 109,000, and the present value of 45,000 parcels of land, with a total acreage of 159,000.

Mr. NEWTON of Minnesota. Will the gentleman yield?

Mr. MERRITT. I will.

Mr. NEWTON of Minnesota. Is it not true that in the Kansas City case where there was a multiple of 2 established, the railroads were not satisfied with that multiple, and contended for 3.1 multiple, and protested?

Mr. MERRITT. That may be; I am showing that the multiple used by the commission, which it is presumed would have weight with the court, is less than 3.1.

Mr. NEWTON of Minnesota. It runs all the way from 55 to 200 per cent.

Mr. MERRITT. Yes. I will not take the time to read all the figures, but I will say that whereas Mr. Benton in his testimony claimed that the excess cost of acquisition would be one hundred and forty-eight million, in the identical cases fixed by him, the amount fixed by the Interstate Commerce Commission was $100,000,000 less.

I read somewhere the other day in the paper that the author of this bill, Judge SWEET, stated in his campaign literature that the effect of the bill would be to reduce the railway valuation $3,000,000,000.

Mr. BARKLEY. The gentleman does not contend that everybody is responsible for all that he says in a campaign.

Mr. MERRITT. I hope not.

And finally, on this point, since the tabulation quoted by the majority from Mr. Benton's testimony was made, the commission has reported tentative valuations for all the railroads mentioned in the table except the Boston & Maine, and instead of $148,000,000 of excess valuation in Mr. Benton's table, the amount fixed by the Interstate Commerce Commission is only slightly over $44,000,000. For convenience of examination the figures are appended.

Comparison of figures of cost of acquisition of carrier lands in excess of acreage value shown in the tabulation of Mr. John E. Benton, inserted in and made a part of the above report, and the actual figures of cost of acquisition in excess of acreage value found by the commission in tentative valuations. No tentative valuation of the Boston & Maine has been served.

	Present value.	Excess cost of acquisition.	
		Benton.	Amount fixed by Interstate Commerce Commission.
Texas Midland R. R	$254,480	$787,000	$268,734
Texarkana & Fort Worth Ry	763,851	2,368,000	740,332
Kansas City, Shreveport & Gulf Ry. Co.	522,746	1,621,000	539,933
Port Arthur C. & D. Co	278,695	865,000	271,981
Winston-Salem Southbound Ry. Co	510,655	1,584,000	468,022
Wrightsville & Tennille R. R	245,638	753,000	243,443
Tonopah & Tidewater R. R	7,019	22,000	1,481
Georgia Southern & Florida Ry. Co	1,239,362	3,816,000	894,281
San Pedro, Los Angeles & Salt Lake R.R.	4,136,858	12,536,000	2,504,529
Macon & Birmingham Ry	121,821	378,000	144,805
Norfolk Southern R. R. Co., including Carthage & Pinehurst R. R. Co	3,011,353	7,526,000	2,236,991
Wadley Southern Ry	65,948	204,000	82,755
Hawkinsville & Florida Southern Ry	148,000	459,000	166,187
Chicago, Rock Island & Pacific R. R. Co.	44,330,507	115,584,000	35,732,867
	55,636,933	148,503,000	44,296,341

The excess of cost of acquisition in these cases averages 79.6 per cent of the "present value," and is one hundred million less than Mr. Benton's estimated result.

In a total of 198 tentative valuations reported by the commission the following is shown:

Total "present value" of lands, $156,345,283.

Total excess cost of acquisition, $121,167,073.

"Excess cost," 77½ per cent of "present value."

I have called the attention of the House to these figures to show that the agitation for striking out the portion indicated for section 2 of the valuation act is not only based upon an erroneous conception of the law but upon an entire misconception of the results if carried out. In short, the present cost of condemnation and damages can be found; it has, in fact, been found in about 200 different cases; and, when found, the excess cost of acquisition is neither startling nor unfair.

It is shown beyond question in the evidence that the result of the passage of this bill will be to cause the valuation of railway lands to be made strictly on an acreage basis, based upon the valuation of contiguous lands.

This is the rule which the commission has followed rigidly in its valuations. An extreme case appears in the lands of the Kansas City Terminal Railway Co., located in Kansas City, Mo., and Kansas City, Kans., where its lands were acquired both by purchase and condemnation during the reconstruction period, so that their actual cost and their present cost of acquisition would be substantially the same. In 1910 the land was condemned at a cost of about $2,400,000, but the land appraiser of the commission determined the present value of those lands as about $1,400,000. There is no uncertainty about these figures, as one is a court record and the other is the commission's record.

That such a result as this is unfair seems to be conceded by the lawyers who represented, in the hearings, both the Interstate Commerce Commission and the Association of State Utilities Commissions. In the hearings on H. R. 13997, in the Sixty-sixth Congress, on this same bill, Mr. Farrell, the counsel for the Interstate Commerce Commission, said (p. 32):

The probabilities—of course, I can not speak authoritatively for the Interstate Commerce Commission, but I have never known of any attempt made by the commission to compel a carrier to accept as the value of its common carrier lands less than it in fact paid for them.

And in the same hearings, on page 38, Mr. Benton, the counsel for the State commissions, stated:

And the carriers know that they are not in danger of losing what they have actually paid, because, in substance, they have been told so from the bench of the Interstate Commerce Commission during these valuation proceedings.

Mr. NEWTON of Minnesota. Will the gentleman yield?

Mr. MERRITT. Yes.

Mr. NEWTON of Minnesota. The bill as amended would still require the commission to ascertain the original cost as well as the present value. They still have both elements—the original cost and the present value.

Mr. MERRITT. Yes; and why should they not have further the condemnation cost?

Mr. NEWTON of Minnesota. Because that is too speculative.

Mr. MERRITT. Judge Prouty says himself that he can give it fairly accurately.

Mr. GRAHAM of Illinois. Will the gentleman yield?

Mr. MERRITT. I will.

Mr. GRAHAM of Illinois. The gentleman does not contend that the million and a half, or whatever the less value is, would be the rate-making value, does he?

Mr. MERRITT. I think it is doubtful what it would be. I expect to refer to that later. It depends altogether on the legislation.

Mr. GRAHAM of Illinois. The commission would take a valuation that was fair.

Mr. MERRITT. They should also take the condemnation valuation.

Mr. DOWELL. Will the gentleman yield?

Mr. MERRITT. Yes.

Mr. DOWELL. Is it not true that they must take into consideration the present condemnation value, which is a fictitious value and not an actual value?

Mr. MERRITT. They must take it under consideration, but they need not rely on it.

Mr. DOWELL. The gentleman will concede that all they are entitled to is the actual value.

Mr. ANDREWS of Nebraska. Will the gentleman yield?

Mr. MERRITT. Certainly.

Mr. ANDREWS of Nebraska. The gentleman contends that the condemnation value should be taken into account in connection with lands now owned by the railroad.

Mr. MERRITT. Yes.

Mr. ANDREWS of Nebraska. Why so?

Mr. MERRITT. I have tried to show that.

Mr. BARKLEY. It might give additional value to land that would have to be condemned in order to get possession of it.

Mr. MERRITT. That is true.

Mr. BARKLEY. Although this land might be obtained by purchase.

Mr. MERRITT. That same thing would be true of actual value. If the land were given you would under the gentleman's suggestion get no return on it at all.

Mr. BARKLEY. Actual value of land is not speculative value. Not only is the cost of condemnation speculative but it is speculative as to whether it would be condemnation or not.

Mr. MERRITT. I do not agree with the gentleman.

This testimony shows that the present value in this case should be stated as the actual cost value, because the lands had been actually acquired at that cost, and it seemed a shocking injustice that where a carrier had in good faith expended two and a half million dollars it should only be allowed a return on one and a half million dollars. But the Kansas City Southern owns another belt line in exactly the same territory, being in many places adjacent and parallel; the right-of-way lands are of equal value, and the so-called present value would be substantially the same. Under the rule stated by the lawyers for the commission the terminal company land should be valued at its actual cost, which would be about two and a half millions, because it had been recently purchased, but the value of the Kansas City Southern Co.'s right of way, which had been purchased some years before, and the present value of which was unquestionably the same, should only be valued at a million and a half; that is, on precisely the same property, one company should be permitted to earn 6 per cent on two and a half millions, while the other could only earn 6 per cent on a million and a half.

This and other injustices arising out of the law as it is proposed to be amended by this bill show that the rigid practice of the commission in valuing a railway right of way on an acreage value is absolutely inequitable and unjust. And that it is absolutely illegal is shown by the decision of the court in the Monongahela case (148 U. S. 312). There an act of Congress provided for the condemnation of certain property of the navigation company, consisting of a lock and dam, and directed that its franchise to collect tolls should not be considered in estimating the value of the property; that is, the amount to be paid as compensation under the fifth amendment.

The lower court followed the statute and excluded the value of the franchise, but this was reversed by the Supreme Court, which held that the determination of the value of the property was a judicial question and not a legislative one, and hence that it was beyond the power of Congress to say that the value of the franchise should not be included. The court said:

> By this legislation Congress seems to have assumed the right to determine what shall be the measure of compensation. But this is a judicial and not a legislative question. The legislature may determine what private property is needed for public purposes—that is a question of political and legislative character—but when the taking has been ordered, then the question of compensation is judicial. It does not rest with the public taking the property, through Congress or the legislature, its representative, to say what compensation shall be paid, or even what shall be the rule of compensation. The Constitution has declared that just compensation shall be paid, and the ascertainment of that is a judicial inquiry.

It is argued by the proponents of this bill, and accepted in the majority report, that the bill will simplify and hasten the final report of the commission on the valuation of the railways.

Mr. WYANT. Mr. Chairman, will the gentleman yield?

Mr. MERRITT. Yes.

Mr. WYANT. Looking at this from a practical standpoint, to what extent has this work progressed? The commission was established some time subsequent to 1913.

Mr. MERRITT. All of the field work has been done, and substantially all of the expense has been incurred. The work has been done under this clause that it is now proposed to have stricken out.

Mr. WYANT. There would be but little additional cost in considering this element to which the gentleman refers?

Mr. MERRITT. It would be inconsiderable.

Mr. WYANT. Does not the gentleman believe it wise to complete this, so that finally if it should be considered an element of valuation the court would have it before it?

Mr. MERRITT. I do.

Mr. GENSMAN. Mr. Chairman, will the gentleman yield?

Mr. MERRITT. Yes.

Mr. GENSMAN. Speaking of the injustice that may have been done to the Kansas City Southern, has the gentleman any figures or does he know how much of the right of way was purchased by public subscription, such as was done on other lines in Oklahoma and Kansas?

Mr. MERRITT. I have not any such figures.

Mr. GENSMAN. Then, as a matter of fact, if a town through which the road ran presented the right of way to the railroad company, no great injustice has been done to them if as a matter of fact it did not cost them anything.

Mr. MERRITT. That is hard to distinguish. I submit that if the gentleman's constituents should present him with a corner lot and a house he would have just as much right to collect the rent upon that as if he had bought it.

Mr. GENSMAN. That is correct; but I am talking about the injustice of the matter which the gentleman from Connecticut says has been done to the railroad companies by undervaluing their property.

Mr. MERRITT. What I say is that with identical rights of way of identical value, from a business point of view, it is an injustice that one should be allowed to get a return on two and one-half million dollars and the other on the return of one and one-half million dollars.

Mr. GENSMAN. If one of the rights of way be given to the railroad company, if it did not cost the railroad anything, does the gentleman think as a matter of fact that the railroad would be getting very much the worst of it?

Mr. MERRITT. That is a matter of opinion.

Mr. NORTON. As a matter of fact, if there had been stock issued upon that and that stock got into the hands of bona fide holders, it would not make any difference how much it cost originally.

Mr. MERRITT. We believe, on the contrary, that it will not hasten the final report of the commission, and certainly will not hasten the final determination by the courts of the railway valuation, because it is almost certain that this final decision will have to be made by the courts owing to difference of view between different parties interested. It must be borne in mind that in view of existing law these railway valuations are of very great importance in many directions. They are to be used as a basis for rates at the present time and also as a basis for possible future consolidations or combinations. It is of great moment, therefore, that they be settled not only as promptly as possible but accurately. The Interstate Commerce Commission and the State commissions contend that under the Minnesota rate cases the court has decided—and that this decision has not been reversed by the Kansas City Southern case—that it is not proper to add the costs of acquisition to the present value of the lands, ascertained by the present cost of lands in the vicinity of the right of way. Accordingly, although the commission has found this cost, and in a manner which Director Prouty says is reasonably accurate, it has not in fact allowed this element of value to enter into its final valuations as reported.

If this bill becomes a law, apparently the first result will be that the Interstate Commerce Commission must recall their tentative valuations and eliminate therefrom the information which they have now obtained to carry out section 2 under the instruction of the court.

Mr. WHITE of Maine. That is the tentative valuation in the case of some 200 railroads.

Mr. MERRITT. Yes. But suppose that the contention of the railways turns out to be correct and that a proper interpretation of the Minnesota rate cases and the Kansas City Southern rate case is that the information called for by section 2 is a proper element to be considered in fixing a final value. Then we shall be in the position indicated in the Monongahela case—that we have tried by legislation to settle a judicial question, and then the Interstate Commerce Commission will have to do its work over again. Stated in a practical manner, the information which the commission has already obtained in accordance with section 2 can do no harm. Whatever expense is involved has already been incurred and the information has been obtained. The valuations have not as yet been affected, according to the testimony of the commission, but the information is there so that the court can pass on it. If the information is removed by this legislation, and the court does not have it for its information, then it is quite possible that the whole matter may be set back and this necessary valuation be delayed for an unknown period.

It appears, therefore, that both on account of justice and for practical results this bill is unwise and should not be passed. [Applause.]

Mr. NEWTON of Minnesota. Mr. Chairman, I yield six minutes to the gentleman from Michigan [Mr. MAPES].

Mr. DENISON. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MAPES. I understood the chairman to rule awhile ago that after the gentleman from Minnesota had yielded the floor he could not parcel out the remaining time. Has the Chair changed his position?

The CHAIRMAN. The Chair has recognized the gentleman from Minnesota for the whole time. The gentleman from Michigan is recognized for six minutes.

Mr. MAPES. Mr. Chairman, the railroad valuation act requires the Interstate Commerce Commission in making and reporting the valuation of the railroads to state, among other things, "in detail and separately from improvements the

original cost" and the "present value" "of all lands, rights of way, and terminals owned or used for the purposes of a common carrier," "and separately the original and present cost of condemnation and damages or of purchase in excess of such original cost or present value." This bill proposes to strike out the language "and separately the original and present cost of condemnation and damages or of purchase in excess of such original cost or present value." If the bill becomes a law the Interstate Commerce Commission will still be required to find both the original cost and the present value "of all lands, rights of way, and terminals" used for railroad purposes.

What does the language which the bill proposes to strike out mean? After giving some study and consideration to the subject I am willing for my part to subscribe to the statement of the chief counsel of the Interstate Commerce Commission in the hearings on a similar bill in the last Congress, "that nobody can tell." He says further "that it is absolutely impossible to construe" the language "so that you can do anything more than guess at the probable meaning that Congress intended to convey when it used those words," and that as a "practical matter" no man can do anything "except to guess" when he undertakes to comply with that provision of the statute.

The chief counsel of the Interstate Commerce Commission is Mr. P. J. Farrell. He was for four years the Solicitor of the Bureau of Valuation before he became chief counsel of the commission. He has occupied this latter position about four years. During these eight years it has been his business to study the valuation act and to tell the Bureau of Valuation and the commission what it means. In order that you may get some notion of this provision, I want to quote further from his statement to the committee during the hearings on a similar bill in the last Congress. He said:

Is the commission to undertake to estimate what it would cost the railroads to acquire each piece of land used for common-carrier purposes in the United States through court proceedings, condemnation proceedings, or, if not, is it to assume that every piece of land that is now used for common-carrier purposes would have to be purchased, if it became necessary to reproduce the railroads, and in doing so acquire the land necessary for that purpose? Or is the commission to try to find out how much of this land was originally donated to the carriers; how much of it was given to them by the State legislatures and by the Congress of the United States, etc.? * * * But the carriers insist that in attempting to get these excess costs or estimate them the commission must assume that there would not be any land given to them if it became necessary to reproduce these railroads; that they would have to purchase all of it and that they would have to condemn some of it. Now, it is true that there were a few condemnation proceedings when the roads were originally constructed, but we can not find out how many, and we are absolutely at sea, and there is not a word in that last clause of paragraph entitled "Second" about donations. It simply asks the commission to estimate how much the railroads would have to pay in excess of the value—present value—if the lands were to be reacquired for railroad purposes. But it says "present cost of condemnation and damages or of purchase." Those words are all put right in together without any punctuation even. What does it mean? We do not know.

From the date of the passage of the act in 1913 up to the time of the decision of the Supreme Court of the United States in March, 1920, in what is known as the Kansas City Southern Railway case (252 U. S. 178), the Interstate Commerce Commission, acting in harmony with what it conceived to be the opinion of the Supreme Court in the Minnesota Rate cases (230 U. S. 352), took the position that—

it was impossible to ascertain or report as a separate item what it would cost the railroad company to acquire by condemnation or purchase its existing right of way and lands used for carrier purposes, and therefore that it could not comply with the command of the statute directing it to report excess of cost over present value.

The Supreme Court in the Kansas City Southern Railway case said that the Interstate Commerce Commission had misinterpreted the opinion of the court in the Minnesota Rate cases, and held that Congress in passing the valuation act and putting in this provision was acting within its constitutional power, and that it was the duty of the Interstate Commerce Commission to carry out the commands of Congress, although it did not tell the commission how it could comply with that particular provision of the statute.

The report of the Senate Committee on Interstate Commerce on this bill states that—

it is the opinion of the committee that it is not only an indefensible expenditure of public money to do the work required of the commission by that part of the statute which the bill seeks to eliminate but the result of the work when done will be valueless and mischievous.

That report further states that—

to ascertain what it would cost any given railroad company to acquire its present right of way or lands at the present time—

Is—

absolutely impossible.

And again:

No matter what path may be pursued in the effort to comply with the part of the statute sought to be eliminated, it leads into the field of pure conjecture.

In view of all this uncertainty as to the meaning of this language, how does the Interstate Commerce Commission proceed in actual practice in its endeavor to carry out this mandate of Congress, as the Supreme Court says it must do? This is what the commission itself says it does:

In meeting the requirements of paragraph "second" of section 19 (a) of the interstate commerce act to report the present cost of condemnation and of damages or of purchase in excess of present value, we attempt to show what the expense to a carrier will be of acquiring its common-carrier lands upon the date of valuation on the assumption that it did not possess those lands, but was obliged to obtain them through purchase or condemnation at the value of similar lands in the vicinity on that date.

Mr. Farrell, the chief counsel, states the procedure in this way:

Our people go on and zone the land as they call it. They will take along a railroad right of way considerable land where the adjoining and adjacent land is all similar in character, and they will place a value practically upon all the land in that stretch of right of way, which is measured by the value of that adjoining land of a similar character.

Now, if the adjoining land changes from good meadow land, we will say, or cultivatable field, to somewhat swampy land, they have to make another zone, and the effort is to include in zones only such portions of the railroad as are bounded by land of a similar character.

What use is made of these findings of the excess cost after they have been found? The Bureau of Valuation and the Interstate Commerce Commission take the position that the excess-cost element is not a proper element to be considered in arriving at the present or real value of the railroad property, and they have not considered it in fixing the tentative values so far. They find the excess cost because they are required to do so by the statute as interpreted by the Supreme Court, but make no practical use of it. It is not considered by the commission as an element which should be included in arriving at the present value.

In view of this position of the commission it seems to be an idle procedure and an unnecessary expenditure of time and money to require it to find something which after it is found is put to no practical use.

If Congress could be assured that the courts would sustain the Interstate Commerce Commission in the position which it has taken in regard to the matter perhaps no harm could come from the present law further than the additional expense incurred and the time consumed in finding this excess cost. The danger, however, is that the courts will require the commission, in fixing the final valuations of the railroads, to take this excess cost into consideration unless this bill passes and this language is stricken out. The railroad representatives frankly say that they expect to test the matter in the courts and to ask the courts to compel the commission to include or consider the excess cost item as an element in the final valuation of the railroads.

If this is done, the importance of the matter is at once apparent. Nobody knows just how much it would mean, and the estimates vary widely. I have been told that the valuation of the lands, rights of way, and terminals of the railroads used for carrier purposes on the excess-cost basis would be nearly double the present value of the same. I have also been told that the present value of the same—that is, the present value of the lands, rights of way, and terminals of the carriers used for carrier purposes—is about 25 per cent of the total valuation of the railroad property. The estimated total valuation of the property of the railroads now is $18,990,000,000. Twenty-five per cent of that is over four and one-half billion dollars. If these figures are anywhere near accurate, it can readily be seen what it might mean to have this amount or any part of it added to the present tentative valuation of the railroad property for rate making and other purposes.

The gentleman from Connecticut [Mr. MERRITT] says that by passing this bill we usurp the function of the court in that we attempt to tell the court what shall be considered in fixing the value. It seems to me that we usurp the function of the court more if we leave this provision of the law in the valuation act, because by so doing I am afraid that we say to the court in effect that it is our legislative judgment that this excess-cost feature should be considered as an element in fixing the value of the railroad property. It seems to me that we usurp the functions of the court if we leave it in, but if we take it out, then the court is at liberty to pass on what are proper elements to be considered without any congressional expression on that subject.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MAPES. I ask unanimous consent to revise and extend my remarks in the RECORD.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. NEWTON of Minnesota. Mr. Speaker, I yield 20 minutes to the gentleman from Illinois [Mr. GRAHAM].

Mr. GRAHAM of Illinois. Mr. Chairman and gentlemen, this bill is quite simple. The law contains this provision:

Second. Such investigation and report shall state in detail and separately from improvements the original cost of all lands, rights of way, and terminals owned or used for the purposes of a common carrier, and ascertained as of the time of dedication to public use, and the present value of the same, and separately the original and present cost of condemnation and damages or of purchase in excess of such original cost or present value.

In the Minnesota Rate cases (230 U. S., 352) the court very distinctly held that you could not do what the statute said ought to be done. I quote a part of the opinion of Justice Hughes in that case:

It is contended that the valuation was made upon a wrong theory; that it is a speculative estimate of cost of reproduction; that it is largely in excess of the market value of adjacent or similarly situated property; that it does not represent the present value in any true sense, but constitutes a conjecture as to the amount which the railway company would have to pay to acquire its right of way, yards, and terminals, or an assumption, itself inadmissible, that, while the railroad did not exist, all other conditions, with respect to the agricultural and industrial development of the State, and the location, population, and activities of towns, villages, and cities were as they now are.

* * * * * * *

It is manifest that an attempt to estimate what would be the actual cost of acquiring the right of way if the railroad were not there is to indulge in mere speculation. The railroad has long been established. To it have been linked the activities of agriculture, industry, and trade. Communities have long been dependent upon its service, and their growth and development have been conditioned upon the facilities it has provided. The uses of property in the communities which it serves are to a large degree determined by it. The values of property along its line largely depend upon its existence. It is an integral part of the communal life. The assumption of its nonexistence and at the same time that the values that rest upon it remain unchanged is impossible and can not be entertained. The conditions of ownership of the property and the amounts which would have to be paid in acquiring the right of way, supposing the railroad had to be removed, are wholly beyond reach of any process of rational determination. The cost of reproduction method is of service in ascertaining the present value of the plant when it is reasonably applied and when the cost of reproducing the property may be ascertained with a proper degree of certainty. But it does not jusify the acceptance of results which depend upon mere conjecture.

Does anybody in this House—any lawyer—know how to go about to prove what the present condemnation or cost value of a railroad right of way would be through a country? Imagine, if you can, gentlemen, what the condition would be if the road was not there, and then try to figure what it would cost to-day to put a railroad there. How are you going to find it out? You have to guess at it.

Mr. HOCH. Will the gentleman yield?

Mr. GRAHAM of Illinois. I will.

Mr. HOCH. Is it not true in following that line they imagine a railroad nonexistent and leave the other values just as they are?

Mr. GRAHAM of Illinois. Yes. Just take for example the country between here and Philadelphia or between here and New York and imagine there is no railroad there: Can you or anybody else make an estimate of what it would cost to put one through now? How can any lawyer or court establish any measure of damages by which that can be proven?

Mr. DENISON. It is being done very frequently and—if the gentleman will permit——

Mr. GRAHAM of Illinois. I do not care to yield to the gentleman at this time. I understand he is going to have considerable time later, in which he can make such comments as he desires. But it is not done; it can not be done. There is no way by which a man can contrive any rules of evidence by which you can do so.

Mr. CHINDBLOM. Is there any matter of large expense or a saving of a large expense?

Mr. GRAHAM of Illinois. This valuation is fixed by this last clause—

and separately the original and present cost of condemnation and damages or of purchase in excess of such original cost or present value.

This gives the condemnation or present cost of acquisition, and in practice it almost doubles the value of the railroad real property over the country. It increases it by about 100 per cent. I have several railroads in my mind in my State where the value was practically doubled by this method of arriving at what the cost to-day would be. Let me quote the figures of present values and values under this so-called present condemnation cost, as fixed by the Interstate Commerce Commission:

	Present value.	Excess cost of acquisition.
Elgin, Joliet & Eastern Ry. Co.	$1,965,335	$1,667,307
Chicago, Lake Shore & Eastern	1,421,560	1,170,525
Peoria Ry. Terminal Co.	94,078	102,480

And so, very properly, Justice Hughes has said, in the Minnesota Rate cases, that it is all conjecture and all guess, and such a value is not ascertainable in any court by any fixed rules the court knows anything about.

Mr. CHINDBLOM. My question went to the cost of ascertaining these items by the Interstate Commerce Commission.

Mr. GRAHAM of Illinois. It costs a great deal. It takes a lot of time to do so. The Interstate Commerce Commission has never been able to do it except in this way: They have tried to imagine a case, and then by imagining what it would cost in that particular case they make what they call a multiple. Then in all cases where these values are involved they use that multiple instead of trying to ascertain it exactly. Of course, the multiple is an arbitrary figure which they take from the one suppositious case they have in mind.

Mr. CHINDBLOM. What items of value are in the condemnation costs that are not in the atcual cost?

Mr. GRAHAM of Illinois. Many elements—possible court costs, attorney fees, and consequential damages. The value ascertained may be the fair value or it may be an exaggerated value. Any man who has tried condemnation cases knows that ordinarily the land costs much more than you can buy it for on the open market. And so you can not tell. Now, following that, the Interstate Commerce Commission concluded that, inasmuch as the court in the Minnesota Rate cases had stated such values could not be fixed with any degree of certainty, they did not need to follow the exact letter of the law, and they did not follow it until in the Kansas City Southern case the court held that they must follow the mandate of the statute in this respect.

While the court had said in the Minnesota Rate cases it could not be done, now the court decided that because the statute said it must be done that therefore the commission must try to do it.

Mr. BURROUGHS. And so the net result of it now is that after all of these decisions the commission is doing a perfectly vain and idle thing?

Mr. GRAHAM of Illinois. Yes; an absolutely useless thing.

My time is almost ended, and I must, therefore, conclude my remarks. However, let me call your attention to the fact that with the last clause stricken from this second section of the law the law will still require a statement and report of "the present value of the same," referring to real estate. If it is claimed that by omitting this language in question, directing an ascertainment of the present condemnation cost, we are taking from the law an element of value which the railroads are entitled to and which they can establish in court. Permit me to suggest that the remaining language of the act gives them the right to the present value of their property, and this will be fixed by the rules of law and will include every possible element of value.

Recent experience has proved the lack of wisdom of writing into railroad legislation some particular provision or direction or indication of congressional opinion for the guidance of the Interstate Commerce Commission. I need only refer to the very unwise provision in the present transportation act, fixing an arbitrary standard of earnings at 5½ or 6 per cent, a provision which has been slavishly followed by the Interstate Commerce Commission, which contends this is a mandate of Congress. Let us in the future avoid such mandates so far as possible, if we do not want them followed by the Interstate Commerce Commission and railroads.

This law will take from the railroad valuations a very considerable sum to which, in my judgment, the railroads are not entitled, and which will have a tendency to reduce the valuation upon which freight and passenger rates are figured, and therefore ought to have a tendency to help reduce such rates and fares. This is something greatly required.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. GRAHAM of Illinois. Mr. Chairman, I ask unanimous consent to revise and extend my remarks.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. JOHNSON of Mississippi. Mr. Chairman, no more important question has been presented to the House since this Congress convened than is involved in this bill. The bill provides that the Interstate Commerce Commission shall ascer-

tain the original costs of all lands, rights of way, and terminals owned or used for purposes of common carriers, and the present value of same.

The railroad companies are asking that in valuing the railroads' lands they shall not only be given credit for the original costs of lands and the present value of the lands and adjacent similar lands but they are asking that the commission add to that a speculative additional sum of what it might cost the railroads to acquire the same lands at this time by condemnation proceedings or otherwise.

Under the transportation act the Interstate Commerce Commission was required to establish such freight and passenger rates as would bring the carriers 6 per cent on their investment. In undertaking to carry out the provisions of the transportation act the Interstate Commerce Commission guessed at the value of the railroads and fixed the sum at $18,900,000,000. It is admitted that there was no evidence to justify the conclusion that the railroads were worth $18,900,000,000. No one who is fair will controvert the proposition that the railroad companies are entitled to earn a fair return on their unearned increment, the same as the holders of any other real estate, but certainly the railroad companies are not entitled to earn anything on what it would probably cost to acquire these lands to-day by condemnation or other proceedings. To even consider valuing the railroad lands and terminals at what it might cost through condemnation or other proceedings to acquire same land and terminals to-day would be preposterous.

Judge Prouty, for whom we all have a high regard, in his statement in discussing the value of the railroads, stated that the Interstate Commerce Commission, in fixing the valuation of the railroads, indulged in speculation; that there was no conclusive evidence before them on which to base the valuation of $18,900,000,000.

Mr. ANDREWS of Nebraska. Will the gentleman yield for a question?

Mr. JOHNSON of Mississippi. I will.

Mr. ANDREWS of Nebraska. What would be the total approximate valuation of the railroads by the adoption of this bill? You quoted the total valuation as $18,900,000,000.

Mr. JOHNSON of Mississippi. There is no way of telling exactly at this time. It will be for the Interstate Commerce Commission to work out. The valuation fixed by them, as I said before, is guesswork.

Since the commission placed the valuation of $18,900,000,000 on the railroads, its engineers have learned the cost of this property on the basis of war-time valuation. The work of valuation on 71 first-class roads has been completed. These roads have a book value of $1,520,000,000, but the commission's engineers report they could be rebuilt and equipped new for $877,000,000, or just a little more than one-half the amount the railroads claim to be the value. Estimating that the other roads have watered their stock in proportion to the 71 first-class roads just mentioned, then the total valuation of the railroads of the United States does not exceed $11,000,000,000. It will show $7,900,000,000 watered stock in the railroads, upon which the Government was paying, up to March 1 last, to the railroad companies 6 per cent dividend; and since March 1 last, complying with the provisions of section 15-A of the transportation act, the Government has fixed the "fair return" at 5¾ per cent on the valuation of the railroads.

It has been clearly demonstrated from evidence gathered from the stock market in Wall Street that every share of stock and every bond issued by every railroad in the United States could have been purchased at prices quoted on the New York Stock Exchange last January for $10,640,000,000; yet the people of the United States are taxed to pay to these railroads, according to these figures, 5¾ per cent on $8,260,000,000 of watered stock.

The transportation act requires that the railroad companies shall economically operate the railroads, yet it is officially shown that several of the big railroad companies have let their piecework and repair work to the Baldwin Locomotive Works and other large repair shops, for which they have paid to these companies in a number of cases four times the price, and in some cases six times the amount it would take to have repaired them in the shops of the railroad companies. The repair shops, as has been shown, are owned principally by the same people who own the stocks and bonds of the railroad companies. For instance, on the Boston & Albany the company which repaired a boiler charged for and collected for removing and applying 900 flues in a boiler which contained only 202 flues. All these charges were made and charged against the Government of the United States under the transportation act, which guaranteed to the railroad companies 6 per cent on their investment.

All this waste, extravagance, graft, and stealage was charged up to the Government as a legitimate expense on which the Government allowed the railroad companies 6 per cent.

On the Pennsylvania Railroad it was found that the officials voluntarily overpaid pieceworkers to the extent of $2,500,000. The piecework was done in shops owned principally by the same people who control the railroads. The Philadelphia & Reading Railroad overpaid for two weeks for their piecework $50,000. The Baltimore & Ohio Railroad has overpaid for its piecework. It is shown that the Pennsylvania Railroad Co. padded its pay roll in order to show increased cost of operation.

During one publicity campaign, in order to create a sentiment—at the expense of the taxpayer—in favor of the railroads, $8,000,000 was spent by the railroads for publicity and charged to operating expenses.

Last year, after the railroad companies had been charged with grafting, the Interstate Commerce Commission called upon the railroad companies for information covering car and locomotive contracts. The railroads admitted that a number of railroads had made extravagant contracts with private concerns for repairing locomotives and cars.

The average cost of making class 5 repairs at the Baldwin Locomotive Works was $15,079.95 per locomotive, while the average cost for the same class of repair work at the railroad shop was $3,668.43. The average cost of class 3 repair work at the Baldwin Locomotive Works was $19,272.60 per locomotive, while the average cost in the railroad companies' own shops was $4,009.13. The cost of class 4 repair work at the Baldwin Locomotive Works was $20,781.52 for each locomotive, while the cost at the railroad companies' own shops was $4,200.08. For class H-9 locomotives at Baldwin Works, the cost for repair was $24,620.93, while the cost in the railroad companies' shops was $5,250.21.

For repairing 200 locomotives the Pennsylvania Railroad Co. paid the Baldwin Locomotive Works $3,173,900. Of this sum, $2,500,000 was graft, according to Mr. M. C. List, special examiner of the Interstate Commerce Commission, who conducted the investigation into these raids upon the Treasury.

Now, the law required the railroad companies, in order to obtain the 6 per cent guaranty on their investment, to economically operate the railroads, yet, intending to cheat and defraud the Government of the United States, the railroads entered into a conspiracy with the Baldwin Locomotive Works and other repair shops to pay them four or five times the value of the work.

There are 263,707 miles of railroads in the United States. Ninety-two per cent of the mileage is in the class 1 railroads. Ninety-eight per cent of the capital invested in railroads is invested in the class 1 roads. All of this waste, fraud, and extravagance practiced on the taxpayers of the country by the railroad companies show the necessity not only for the passage of this bill we are now considering but it is convincing of the necessity for the repeal of section 15-A of the transportation act.

It must be remembered that during Federal control of the railroads the rates were increased so much that the people throughout the country complained grievously, but on account of it being war time they felt they should forbear to criticize the Government for the raise in rates; but when the railroads were returned to private ownership March 1, 1920, under the Cummins-Esch bill, commonly known as the transportation act, the railroad rates were raised 35 per cent throughout the United States, and in many places more than 40 per cent, in addition to the increase of rates during the war. This was done because under section 15-A of the transportation act the Interstate Commerce Commission was required to fix the rates at such a sum as would bring to the owners of the railroads a 6 per cent dividend on their investment. Passenger rates were raised 20 per cent, and on Pullman tickets a 50 per cent surcharge was made for the benefit of the railroad companies. To what other industry or business does the Government of the United States guarantee a dividend?

At the very time when railroad rates were raised throughout the country agricultural products depreciated in value as much as 75 and 80 per cent. It was admitted by Governor Allen, of Kansas, who testified before our committee—Interstate and Foreign Commerce—that if four carloads of cattle were shipped to market from his State, it took one carload to pay transportation charges. Witnesses from Oklahoma, Nebraska, South Dakota, and many other States testified that corn and hay and other agricultural products were rotting in the fields because transportation charges were so high it would not justify them shipping. Other witnesses testified to burning corn for fuel on account of the railroad rates being so high it was cheaper to

burn corn than to ship it to the market and then pay freight charges on coal. Witnesses from the State of Illinois testified to the disastrous effect high freight rates was having on the economic conditions throughout that State; and practically every other State in the Union showed the depressing effect it was having on business in the country. At that time a policy of deflation was inaugurated by the present administration as to everything else except railroads. A policy of inflation was adopted as to railroads.

There is no business in the United States that will pay so well at this time under the present transportation act as the railroad business. The Government of the United States is lending its strong arm to the railroads of the country to systematically rob the people.

The Republicans abused the last administration shamefully for what they charged was waste and extravagance, but it must be remembered that at the time the Democrats were in control of the railroads this country was engaged in the greatest war the world had ever seen, and there was neither time nor opportunity for preventing the graft and extravagance by the railroad owners like there is to-day.

March 4, 1919, the Republican Party had full control of the House and the Senate. That Congress passed the transportation act, and you Republicans have been in control of Congress ever since. With all the waste and extravagance, graft and stealing, fraud and rascality practiced by the railroads, and special privilege generally, no voice has been raised to any effect by you.

I have protested, as other Democrats have, against the Cummins-Esch bill for two years. I have urged the reduction of freight rates so that business in the country could return to a normal condition. Our committee has been holding hearings since February 23 of this year considering a bill for the repeal of section 15–A, the guaranty section of the transportation act. We have heard many witnesses who advocate the repeal of that law. We are still holding hearings and will continue to hold hearings until the Congress adjourns. While I would be happy to have an opportunity to vote for a repeal of section 15–A of the act, I know it will not be repealed, because the President of the United States has already stated that he did not want the transportation act amended during this Congress. All these hearings will amount to nothing more than to deceive the people, who are hoping and praying that this iniquitous law will be repealed, but it will not be repealed under Republican rule, because special privilege is entrenched as it never was before in the history of the country, and the people of the country have to bear the burden.

The railroads constitute one of the great arteries through which flow the lifeblood of our economic life. No intelligent man would wish to hamper the railroads so that they could not earn a fair return on their investment; but it is an outrage for the great body of people of the country to be ground down beneath the burden of taxation in order that a few purse-proud, bloated bondholders may continue to swell their exchequer.

In my State the farmers are beginning to diversify, and this year they have made large vegetable crops, for which they have had a very good market; but on account of the freight rates the farmers have been unable to obtain scarcely enough from their crop to pay the expense of production. A few days ago I read in my home paper, the Hattiesburg American, a dispatch from Jackson, Miss., that a carload of vegetables had been shipped to an eastern market, for which the shipper received $675, of which $495 was paid for freight, leaving the grower only $180, or 45 cents a hamper for the produce less than the cost of growing. It is a sample of the oppression that is being practiced by the railroads of the country at the expense of those who feed and clothe the world—the farmers.

The small reduction of 10 per cent ordered by the Interstate Commerce Commission will not satisfy the public. The Interstate Commerce Commission did not intend a few weeks ago to make any reduction, but the protests of the people were so great that something had to be done in order that the public condemnation of the Interstate Commerce Commission and the railroad companies would subside; but the people are not going to continue to stand this oppression. It must be changed; and unless you Republicans, who have 304 Members in the House of Representatives to the Democrats' 130, and who have control of the United States Senate and the Presidency, make a change in this transportation law the people of the country will make a change in the Congress and in the Presidency.

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. NEWTON of Minnesota. I yield to the gentleman one minute more. The gentleman, I think, seems to be under the impression that the valuation of $18,900,000,000 is based upon the use of this multiple and a fictitious value. Now, it is my understanding that in ascertaining the value of $18,900,000,000 the commission did not use the multiple or fictitious value, and if the commission should be called upon in a final proceeding to use the multiple that we would be paying rates upon a value far in excess of the $18,900,000,000.

Mr. JOHNSON of Mississippi. The gentleman and I agree as to that.

Mr. MAPES. Will the gentleman from Minnesota yield to me one minute, so that I may answer the question of the gentleman from Nebraska [Mr. ANDREWS]?

Mr. NEWTON of Minnesota. I yield one minute to the gentleman.

Mr. MAPES. Mr. Chairman, I would like to answer the question of the gentleman from Nebraska. I have been told by a member of the Bureau of Valuation that the present value of the land, rights of way, and terminals of the railroads, as tentatively fixed by the Interstate Commerce Commission, represents about 25 per cent of the value of the total property of the railroads, and if this so-called excess cost is included it will increase that to about 50 per cent. Twenty-five per cent of $18,900,000,000 is over $4,500,000,000. If that amount is added to the present tentative value of the railroads for rate-making purposes and other purposes, anyone can figure out what it means.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. DENISON. Mr. Chairman, I will use my time.

The CHAIRMAN. The gentleman from Illinois is recognized for 16 minutes.

Mr. DENISON. Mr. Chairman, I am not particularly interested in this bill one way or another. I do not think it will make very much difference, so far as results are concerned, whether it passes or whether it does not. I am opposed to it, not because of any effect it will have on the final valuation of the railroads, as I do not think it will have very much effect on that. The purpose of those who are urging this legislation is evidently based upon their belief that consideration by the commission of evidence touching the so-called present condemnation value of the railroads will have a tendency to enhance or increase their final conclusions as to the value of the railroads. And, naturally, it is thought to be popular to propose or favor legislation that might depreciate the final valuation fixed for the railroads of the country.

I do not think that it will have that effect. If it would have that effect, and if I thought the courts would finally hold that it ought properly to have that effect, I would be in favor of it, because, of course, I think the railroads ought to be allowed every element of value to which they are justly entitled under our existing law, and nothing more.

Mr. ELLIS. Mr. Chairman, will the gentleman yield?

Mr. DENISON. I will yield to the gentleman briefly.

Mr. ELLIS. The suggestion was made here by the gentleman from Iowa [Mr. SWEET], of the Committee on Interstate and Foreign Commerce, that if this bill passed it would reduce the valuation something like $3,000,000,000. I want to ask the gentleman if that reflects the sentiment of the gentleman's committee?

Mr. DENISON. It does not reflect my sentiments or any sentiment that I have heard expressed in the committee.

Mr. ELLIS. Has the committee devised any other means to take off another billion?

Mr. DENISON. Not that I know of. Of course, I do not care what political advantage anyone may get from the passage of this bill. If they can get any political capital out of it I am entirely willing. I am looking at the matter from the standpoint of a country lawyer, and I am opposed to the bill, because, in the first place, I think it is a futile thing, and in the next place I think it is a wholly useless thing for Congress now to attempt to limit by legislation the evidentiary facts that the commission may consider in reaching their conclusions as to the valuation of the railroads.

Let me make our position clear, if I can. In considering whether you shall pass this bill or not you are acting in the capacity of a court when it sits in the trial of a condemnation case, in which a railroad or other public-service corporation, for instance, would seek to condemn property; the Interstate Commerce Commission is the jury charged with the duty of determining the value of the property to be taken.

The court decides what evidence is admissible, what can be considered by the jury, what evidence or facts can be admitted in the consideration of the case. The court can not properly undertake to say what weight should be given to the evidence. By passing this law we are saying whether or not the com-

mission in ascertaining the value of railroads shall take into consideration certain evidentiary facts. And what are they? The principal evidentiary fact sought to be excluded from consideration is the present cost of reconstructing the railroads. The original valuation act, passed in March, 1913, provided among other things that the commission should ascertain and report in reaching its conclusions as to the value of railroad property, that it should ascertain what was the present, as compared with the original, cost of construction. Now, it is plain as day to me that if we pass this bill we are to that extent usurping the functions of the courts.

Mr. MAPES. Mr. Chairman, will the gentleman yield for a question?

Mr. DENISON. If my friend will make it very brief I will yield.

Mr. MAPES. If the courts are going to say that certain elements are to be taken into consideration in making up the value of the railroad property, what is the harm in eliminating this provision and giving the courts the privilege of doing that without considering what the congressional idea is?

Mr. DENISON. I will answer the question because it is a question that arose a moment ago. The harm is this: When the commission assembles the evidence on which it bases its final conclusions as to the value of the railroad's property it is far better that it should assemble too much evidence than that it should assemble not enough. It is better that it should have some facts that it does not necessarily need or consider than that it should lack some facts that it ought properly to have. If certain facts are proper for consideration in fixing the value of the railroad property under existing law, Congress can not constitutionally take such facts from the consideration of the commission.

Mr. MAPES. In view of the decision in the Kansas City case, when the court said the commission must follow the mandate of Congress, does not the gentleman think that the courts will be influenced somewhat by the fact that Congress leaves this provision in the law, and therefore it would be considered the opinion of Congress that it is a proper element in making up the value?

Mr. DENISON. No. I think the question of what evidence is admissible, what evidence is relevant or proper, and what evidence is necessary in determining the value of the property taken for public use, or in fixing the value of the property of the railroad for the various purposes named in the interstate commerce act, is a judicial question, and Congress can not enlarge it or limit it. Those are all questions for the courts and not for Congress.

Mr. BURROUGHS. Mr. Chairman, will the gentleman yield for a short question?

Mr. DENISON. Yes.

Mr. BURROUGHS. Right on that point, does not the gentleman understand that the Supreme Court of the United States has already held in the Minnesota Rate case that this particular piece of evidence is not worth anything?

Mr. DENISON. Not at all. The gentleman from New Hampshire wholly misunderstands the Minnesota Rate cases. The Interstate Commerce Commission also misunderstood the Minnesota Rate cases, and the United States Supreme Court in the Kansas City Southern case said that the commission had misconstrued the Minnesota Rate case. In the Minnesota Rate case the court was considering and commenting on a particular schedule of property values that was then before it, and was not discussing general principles, as I understand it.

Mr. BURROUGHS. Was not the Kansas City Southern case a mandamus case, and was not the whole question there that the commission should carry out the mandate of the statute?

Mr. DENISON. That is, of course, true. But the gentleman should understand that no court ever by mandamus compels anybody to do a futile or a useless or an impossible thing. If the Supreme Court had recognized the decision in the Minnesota Rate case as a conclusive and correct statement of the law, they would not have granted the mandamus in the Kansas City Southern case.

Mr. JOHNSON of Mississippi. They did not pass upon the reasonableness or unreasonableness of the case at all.

Mr. DENISON. Now, in the case of Smythe against Ames, One hundred and sixty-ninth United States Reports, the Supreme Court, through Mr. Justice Harlan, speaking for the court, considered what were the elements to be considered in determining the value of railroad property. I think Judge Harlan's views are worthy of consideration by the Congress. He was one of our greatest constitutional lawyers and judges. He had all these questions before him, and he laid down the rule and defined the evidentiary facts which should be taken into consideration in determining the value of railroad property. Now, let me tell you briefly what he said. I quote:

> We hold, however, that the basis of all calculations as to the reasonableness of rates to be charged by a corporation maintaining a highway under legislative sanction must be the fair value of the property being used by it for the conveyance of the public. And in order to ascertain that value, the original cost of construction, the amount expended in permanent improvements, the amount and market value of its bonds and stock, the present as compared with the original cost of construction, the probable earning capacity of the property under particular rates prescribed by statute, and the sum required to meet operating expenses, are all matters for consideration, and are to be given such weight as may be just and right in each case. We do not say that there may not be other matters to be regarded in estimating the value of the property. What the company is entitled to ask is a fair return upon the value of that which it employs for the public convenience. On the other hand, what the public is entitled to demand is that no more be exacted from it for the use of a public highway than the services rendered by it are reasonably worth.

Here is the important part:

> The present as compared with the original cost of construction.

Mr. Justice Harlan was there laying down the general rule as to evidentiary facts merely; namely, that the court or the commission, as the case may be, in fixing the value of railroad property for rate-making purposes, or for other purposes, under the interstate commerce act, must have before it, not as a conclusive fact, but as an evidentiary fact, the present as compared with the original cost of construction. Now, what is the present cost of construction? Clearly that means what it would cost at the present time to reproduce the railroad where it is in its present condition. That would necessarily include a determination of what it would cost at the present time to secure the right of way by purchase or by condemnation. It may be difficult to secure such evidence. It would necessarily be but an estimate in any event. But it is proper and necessary evidence, unless the decision in Smythe against Ames does not correctly state the law. And the fact that such evidence may be difficult to obtain does not make it improper or unnecessary. As I have said, if such evidence is improper or impossible to obtain, or unnecessary for consideration in the fixing of the value of railroad property, I do not think the Supreme Court would by mandamus compel the Interstate Commerce Commission to proceed with the assembling of such evidence as has been done in the Kansas City Southern case.

The original valuation act was passed in March, 1913. It just happened that it included all the necessary evidentiary facts in the legislative enactment and required the Interstate Commerce Commission, in proceeding to value the property of the railroads, to take into consideration the very things which the Supreme Court in Smythe against Ames said must be taken into consideration. I have no doubt the Supreme Court decision in that case was used in drafting the valuation act.

My friend the gentleman from Illinois [Mr. GRAHAM] said a thing which could not be done, that it was too speculative. I want to read to you what Judge Prouty had to say about that. He is the man who has charge of doing the work of the commission. I said a moment ago that I was opposed to this bill because I think it is a futile thing. As a matter of fact, the work has been practically completed and we are now passing a law to stop the Interstate Commerce Commission from doing a thing which it has already done. As I said, this legislation may be of some political benefit to somebody, but I am now talking about the real value of the legislation. Here is what Judge Prouty said last year after the decision in the Kansas City Southern case. Here is a man who knew more about this subject than any other man in the country, because he had charge of the work of valuation from the beginning of it in 1913. Here is what he said:

> At the same time, while I believe that the bill ought to pass, I should perhaps add that we are proceeding in a satisfactory way with this work, and that the result when completed, within the limitations proposed, will be accurate.

My friend, the gentleman from Illinois [Mr. GRAHAM], said that you can not do this at all; that you can not reach any definite or accurate conclusions. Mr. Prouty says that the results will be accurate. He further said:

> Immediately after the decision of the Supreme Court in the Kansas City Southern case I organized a force for the development of the facts required, and the work has been proceeding under the immediate direction of our supervisor of land appraisements. I have given special attention to it myself. In my estimate the work is about one-half done.

This statement was made on February 7, 1921, considerably over a year ago:

> We should complete it along with our other land work in from a year to a year and a half from the present time.

That is, a year or a year and a half from the 1st of February, 1921, Mr. Prouty said this work would be completed in accordance with the present law. The year and a half has

nearly gone, and yet gentlemen have stood here to-day and said that we ought to pass this law; that it is necessary because the work of valuation can not be completed unless we do pass it. Mr. Prouty further said:

I estimate that this work from now on will cost approximately $300,000. The doing of this work will not interfere with or delay the balance of our valuation work. The result, in the very nature of things, is an average estimate, but within the limitations fixed by those terms it will be accurate.

Now, how can anyone stand here and in order to help get this bill through say that the work can not be done, when the man charged with doing it says it is being done, and being done accurately?

As a matter of fact the expense involved in assembling the evidence and estimating the present cost of reconstructing the railroads has already practically all been incurred. I understand the field work is already completed. The result of this legislation will be that the Interstate Commerce Commission will not consider the evidence as to the present cost of reconstruction which it has already obtained, and it will expunge from the facts which it finds and reports all estimates as to the present cost of reconstruction or reobtaining the rights of way of the different railroads by condemnation or purchase. Of course, if such evidence is not necessary or proper evidence to be considered in fixing the value of the railroads' property, then no harm will be done. But if such evidence is proper or necessary, as the Supreme Court said in Smythe against Ames, then this legislation will result in almost interminable litigation and delays in the final determination of the value of the railroads' properties.

The relevancy of evidence as to the present cost of reconstruction results from this: When private property is condemned for railroad purposes the railroad has to pay two kinds of damages. First, the fair market value of the land actually taken. Second, such damages as the taking may cause to the land not taken. This latter damage is usually referred to as consequential damage. Very often it amounts to far more than the value of the land actually taken. The original cost of a railroad can not be properly determined without including the consequential damages to the property not taken which the railroad had to pay in order to obtain its right of way. If it is proper or necessary to consider at all the present cost of reconstructing a railroad company's property in fixing its value for rate making or other purposes, it would seem to me to be equally proper and necessary to consider the cost, both direct and consequential, which would be incurred in reconstructing or reobtaining such right of way.

Mr. MAPES. Will the gentleman yield?

Mr. DENISON. Yes; I will yield to my friend from Michigan.

Mr. MAPES. Does the gentleman know of any present member of the Bureau of Valuation who is not in favor of the passage of this bill, and who does not say that it is practically impossible to arrive at any proper scheme of valuation without it?

Mr. DENISON. I do not know whether any of the present members of the Valuation Bureau are in favor of it or against it. I have not talked with any of them. I do not know what any of them say about it, but I am giving you what Mr. Prouty, the chairman of the bureau, said nearly a year and a half ago.

Now, this is the reason why I do not think we ought to pass this bill. By passing this bill we are directing the Interstate Commerce Commission to disregard the present cost of construction so far as land is concerned. Suppose we do that and the commission follows the mandate of Congress and disregards the present cost of construction, so far as land is concerned, and makes its valuation of the property of the railroads, and the railroads object to the valuation because the commission has not taken into consideration an element which the Supreme Court of the United States through Mr. Justice Harlan said in Smythe against Ames is a proper or necessary element in ascertaining the value of the property. The result will be that the valuations will be set aside, just as verdicts in condemnation cases are set aside when the jury have not been allowed to take into consideration elements of value that are proper to be taken into consideration. Congress can not say what evidence shall or shall not be taken into consideration by a jury in a condemnation proceeding. That is a question of law for the courts. We may pass laws limiting the evidence which may be considered, but such laws will not amount to anything. The Supreme Court will set them aside as invalid if we do not include all the elements that are necessary or proper to be considered in a condemnation proceeding in order that the constitutional requirement that private property may not be taken without just compensation may be satisfied.

Mr. ANDREWS of Nebraska. Will the gentleman yield?

Mr. DENISON. I yield to the gentleman from Nebraska.

Mr. ANDREWS of Nebraska. If the law should say that a certain thing should be included and that a certain other thing should not be included, could the court disregard either of them?

Mr. DENISON. What law is the gentleman talking about?

Mr. ANDREWS of Nebraska. If the statute should say that a certain thing should be included and that certain items should be reckoned, as was said in the Kansas City case, could the court disregard them?

Mr. DENISON. I will try to explain my view upon that question. The Constitution says that no one shall be deprived of his property without due process of law, and that private property shall not be taken for public use without just compensation. In order to determine the just compensation you have to determine the value of the property taken. The question of the evidence that shall be considered in determining the value of the property taken is a judicial question. It is not a legislative question. I am sure my friend from Nebraska recognizes that to be the case. Congress could not pass any law that would deprive any railroad or anyone else of any proper evidence to be considered in fixing the value of his property. To do so would be tantamount to depriving him of his property without due process of law or without just compensation.

It seems to me that the Supreme Court in the Kansas City-Southern case (252 U. S. 178) conclusively settled the question involved in this proposed legislation, and that in view of that decision this bill ought not to be passed. The Interstate Commerce Commission accepted literally the views of the court as expressed in the Minnesota rate case and governed their action in accordance with the language of the court in that case. The commission in presenting its argument to the court in the Kansas City-Southern case took exactly the position that is being taken to-day by those who are advocating this legislation. In presenting their argument to the court in the Kansas City-Southern case, the Interstate Commerce Commission used this language:

We are unable to distinguish between what is suggested by the carrier in this record and nominally required by the act and what was condemned by the court (in the Minnesota rate case) as beyond the possibility of rational determination; nor is there any essential difference in the actual methods there employed and those now urged upon us. Before we can report figures as ascertained, we must have a reasonable foundation for our estimate, and when, as here, if the estimate can be made only upon inadmissible assumptions and upon impossible hypotheses, such as those pointed out by the Supreme Court in the opinion quoted, our duty to abstain from reporting as an ascertained fact that which is incapable of rational ascertainment is clear.

Because of the impossibility of making the self-contradictory assumption which the theory requires when applied to the carrier's lands, we are unable to report the reproduction cost of such lands or its equivalent, the present cost of acquisition and damages, or of purchase in excess of present value.

The Supreme Court took due notice of its former decision in the Minnesota Rate case as thus stated by the Interstate Commerce Commission, and after quoting from that statement of the commission the court said:

It is true that the commission held that its nonaction was caused by the fact that the command of the statute involved a consideration by it of matters "beyond the possibility of rational determination" and called for "inadmissible assumptions" and the indulging in "impossible hypotheses" as to subjects "incapable of rational ascertainment" and that such conclusions were the necessary consequence of the Minnesota Rate cases.

We are of the opinion, however, that, considering the face of the statute and the reasoning of the commission, it results that the conclusion of the commission was erroneous.

I can not believe that the court would by mandamus have compelled the Interstate Commerce Commission to proceed as required by the valuation act, to ascertain and report the present cost of constructing the railroads by condemnation or purchase, if it had recognized its own decision in the Minnesota Rate case as holding that such a task was beyond the possibility of rational determination or that it amounted to indulging in impossible hypothesis or that it was impossible of reasonably accurate ascertainment. Surely the court would not have compelled the commission to do a thing if, as is claimed, the same court had held that the thing could not be done.

Mr. NEWTON of Minnesota. Mr. Chairman, how much time remains?

The CHAIRMAN. The gentleman has nine minutes.

Mr. NEWTON of Minnesota. Mr. Chairman, I yield the remainder of my time to the gentleman from Kansas [Mr. HOCH].

Mr. HOCH. Mr. Chairman and gentlemen of the committee, in a matter which is so technical as this is it is impossible to do much in nine minutes. What is it the railroads are asking in opposing this bill? They are asking that in valuing the railroads' land they shall not only be given credit for the original

cost of the land and for the present value of the land as compared with the adjacent and similar land, but they are also asking that the commission shall add a speculative additional item of what it would probably cost the railroads to acquire these lands to-day by condemnation proceedings or otherwise. I can not believe that the gentleman from Illinois has read the Minnesota case carefully, for he seems to have failed to catch the way Justice Hughes characterized that proposition. The gentleman from Illinois said that this statute was not involved in the Minnesota Rate case. That is true. The Minnesota case was handed down soon after the valuation act was passed, but identically the same question of policy came up from Minnesota involving State regulations and was involved in the case. Here is what Judge Hughes said in that case:

The railroad has long been established; to it have been linked the activities of agriculture, industry, and trade. Communities have long been dependent upon its service, and their growth and development have been conditioned upon the facilities it has provided. The uses of property in the communities which it served are to a large degree determined by it. The values of property along its line largely depend upon its existence. It is an integral part of the communal life. The assumption of its nonexistence and at the same time that the values that rest upon it remain unchanged is impossible and can not be entertained.

Now, that is exactly what the railroads are asking. They are asking us to assume the railroad wiped out, and to leave all adjacent values just as they are, and then estimate what it would cost the railroads to buy into this high state of development to secure a right of way and to secure yards and terminals.

Mr. ANDREWS of Nebraska. Will the gentleman yield?

Mr. HOCH. I will.

Mr. ANDREWS of Nebraska. Why should there be any credit given to the road for the acquisition of property it already owns?

Mr. HOCH. I think there should not be, and that is all that this bill proposes to take out of the law. I can not agree with the gentleman from Illinois; I think it pernicious for it to remain in the law for it amounts to a declaration of legislative intent that the hypothetical cost of present reacquisition should be taken into consideration in fixing the value of railroad land. Let me give you an illustration in the minute or two I have remaining showing what this means in the figures. The gentleman from Oklahoma asked a moment ago with reference to the value of railroad land in Oklahoma. I happen to have the tentative value fixed by the Interstate Commerce Commission on the land of the Rock Island, Choctaw & Gulf Railroad in Oklahoma. The original cost of the land of that railroad in Oklahoma, according to the figures of the railroad itself, was $760,163. That is what the land cost them to acquire. The Interstate Commerce Commission gives them a present value upon the same land of $3,226,259—four times its original cost. Not content with the valuation of four times its original cost the railroad asks under the present valuation act to have the speculative cost of present acquisition figured. What does the Interstate Commerce Commission figure as to that? It figures that the cost of acquisition to-day, under the present high state of development, leaving all other values as they are, would be $6,130,261. That is what the railroads ask. They are asking you to put a value on the railroad land in Oklahoma of approximately eight times the original cost of those lands.

Mr. MERRITT. Will the gentleman yield?

Mr. HOCH. Yes.

Mr. MERRITT. The gentleman does not contend that even if the valuation committee gave the extra amount that the commission would find that as the value?

Mr. HOCH. I do not know what they would find as the final value, but I say it is mischievous to have Congress say that that is an element of value. That is what it amounts to, and it seems to me an unconscionable claim on the part of the railroads.

I have here a list of the first 100 railroads upon which tentative final values have been fixed by the Interstate Commerce Commission. It so happens that practically all of them are small railroads, with a total mileage of only about 10,000 miles out of 245,000 miles upon which final values are ultimately to be fixed. Upon those first 100 railroads the commission finds that the present value of the railroad lands is $42,240,816. We do not have all of the figures, but it is probable that the original cost of those lands was not over $15,000,000. In other words, the present value is found, giving them a value of approximately three times what they originally cost. But that is not all they are asking. They are asking for this speculative reacquisition cost. The commission estimates it would cost, in addition to the present value, $34,330,214. In other words, they figure that while the present value of the lands of those 100 railroads is $42,240,816—and that gives them the benefit of what other land has had in normal increase in value—the hypothetical cost of acquisition now, with other land values high as they are, would be $76,580,930. And that is the value that the railroads are asking to have put upon their land.

As another specific illustration, take the case of the valuation put upon the land of the Rock Island Railroad in my own State of Kansas. The Interstate Commerce Commission recently issued its tentative final values upon the Rock Island. It fixes the present value of the Rock Island lands in Kansas at $3,063,345. That figure gives to the Rock Island the benefit of the normal unearned increment—the increment enjoyed by other lands. But, following out the direction contained in the provision of the valuation act which we are here seeking to strike out, it figures the present cost of acquisition of the same lands at $6,071,257. Now, since the Rock Island has those lands, and does not have to acquire them under the present state of development of the country, what reason or fairness is there in giving consideration to a speculation as to what it might cost the Rock Island to acquire them to-day? Is not an allowance of the present value all, in any view of the matter, that they are entitled to?

Another thing which should not be overlooked is that while in this business of speculating as to the cost of present acquisition they do not speculate as to what proportion of the lands might be donated to the railroads. Indeed, I have it from the Interstate Commerce Commission that, following a ruling of former Director Prouty, they do not assume that any lands would be donated.

As to the final totals that might be added to railroad land values, if the contention of the railroads were agreed to in this matter of reacquisition cost, it is impossible now to estimate closely. But the figures to date indicate that it would probably be double the figures on present value. It would mean certainly an additional $1,000,000,000 to railroad land values, and some estimate it as high as four or five billions. Taking two billions as an estimate, that means that in order to earn a return upon that additional amount there would be added over $100,000,000 a year to the transportation costs, the freight and passenger burden of the country.

The CHAIRMAN. The time of the gentleman from Kansas has expired. The Clerk will read the Senate bill for amendment.

The Clerk again reported the Senate bill.

Mr. NEWTON of Minnesota. Mr. Chairman, I move that the committee do now rise and report the bill back to the House with the recommendation that it do pass.

The motion was agreed to.

Accordingly the committee rose, and the Speaker having resumed the chair, Mr. CAMPBELL of Kansas, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill S. 539, to further amend an act entitled "An act to regulate commerce," approved February 4, 1887, as amended, under a special rule authorizing its consideration, and had instructed him to report the same back to the House without amendment, with the recommendation that the bill do pass and that the bill H. R. 6043 do lie upon the table.

The SPEAKER. The rule under which the bill has been considered provides that the previous question shall be considered as ordered. The question is on the third reading of the bill.

The bill was ordered to be read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

The question was taken; and on a division (demanded by Mr. MERRITT) there were—ayes 49, noes 18.

So the bill was passed.

On motion of Mr. NEWTON of Minnesota, a motion to reconsider the vote by which the bill was passed was laid on the table.

The SPEAKER. Without objection, House bill 6043 will lie upon the table.

There was no objection.

LEAVES OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. FUNK, until June 10, 1922, on account of important business.

To Mr. BLANTON, indefinitely.

To Mr. PARKS of Arkansas, at the request of Mr. WINGO, indefinitely, on account of important public business.

RECOMMITTING CERTAIN BILLS TO COMMITTEE ON CLAIMS.

Mr. EDMONDS. Mr. Speaker, I ask unanimous consent that the bills H. R. 8186, 9941, 9942, and 9432, which have been reported by the Committee on Claims and are now on the Calendar, be recommitted to the committee.

The SPEAKER. Is there objection?

Mr. WALSH. Mr. Speaker, reserving the right to object, nobody knows anything about what these bills are.

Mr. EDMONDS. Mr. Speaker, the Treasury Department wishes to reconstruct these bills in another form. They are bills for the reimbursement of lost securities. In addition to that, we have some new testimony in regard to them which I would like very much to examine.

Mr. WINGO. Mr. Speaker, what is the nature of the bill?

Mr. EDMONDS. These are four bills for lost securities.

Mr. WINGO. And the Treasury Department has requested the gentleman to withdraw them and have them reconstructed?

Mr. EDMONDS. Yes.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

EXTENSION OF REMARKS.

Mr. NEWTON of Minnesota. Mr. Speaker, I ask unanimous consent that Members who spoke upon the bill (S. 539) amending the act to regulate commerce have the privilege of revising and extending their remarks in the RECORD.

The SPEAKER. Is there objection?

Mr. WALSH. Mr. Speaker, reserving the right to object, will the gentleman make that some definite time?

Mr. NEWTON of Minnesota. Yes; within five days.

The SPEAKER. The gentleman from Minnesota asks unanimous consent that Members who spoke upon the bill amending the act to regulate commerce have five legislative days within which to extend and revise their remarks in the RECORD. Is there objection?

There was no objection.

Mr. BOX. Mr. Speaker, I ask unanimous consent to revise and extend my remarks in the RECORD upon immigration legislation during the Sixty-sixth and the Sixty-seventh Congresses.

The SPEAKER. Is there objection?

There was no objection.

The extension of remarks referred to are here printed in full as follows:

Mr. BOX. Mr. Speaker, the first efforts to control immigration were made by the States, but the laws passed by them were ineffective and were finally declared void, because Congress alone had power to legislate adequately on the subject. An almost fatal delay in meeting the perils of the immigration situation has already occurred.

The act of 1917, which, because of the force of public sentiment behind it and because of the overwhelming demand in Congress for restriction, was passed over the President's veto. It has been estimated that that act would keep out about one-fourth of those who were coming during the preceding years, but the flood was rising so high that the three-fourths who would continue to come would probably tax the carrying capacity of passenger shipping, and thus pour upon us a number as great as the ships could bring, notwithstanding the restrictions of the literacy test, the enactment of which was certainly a step in the right direction.

Immediately after the close of the war, while that act was in force, the tide began to rise higher and higher, and threatened to pass all former flood stages, but it was still difficult to enact an adequate law.

Finally the House organiaztion was forced, by public senti-ment, to respond to the continuous, insistent demand of those Members of Congress who saw and pointed out the peril to which our people were exposed by an overflow of vast alien populations upon us. An act was passed during the last days of the Sixty-sixth Congress, the first of which I was a Member, which would have kept out four-fifths of those who would have come. That act died for lack of the President's approval. Another was passed by the House early in 1921.

While that act was not what it should have been it was the best that could be obtained. I said of it on the floor of the House, at the time, that it was too weak. But many groups and special interests banded together under camouflaged names, such as "The Interracial Council," under other names, and no known name, to oppose that bill in the Senate after it had passed the House.

As one of the members of the House committee I had made the fight in the committee and in the House itself for its passage.

When the legislation was being delayed and opposed in the Senate I went before the Senate Committee on Immigration in favor of its passage and in opposition to its being weakened or broken down by exceptions which would flood the country with Mexican peons and other pauper laborers. A veteran newspaper correspondent, who saw the fight I was making before the Senate committee and the powers of the opposition, said that it was a fight for the welfare of the people as against special interests. The following are his words used at the time:

To a large degree the hearings were a case of the general interest versus special interests. For example, a Texas Congressman, JOHN C. BOX, stated that the masses of his constituents do not want Mexican peon labor to come in, and placed his objection on the same fundamental social grounds that constituted the objection to bringing in slaves before the Civil War.

Immediately after Congressman BOX's testimony the committee was inundated by telegrams and personal representations from the great Western Sugar Co., the Utah-Idaho Sugar Co., the Texas Land Owners' Association, and similar organizations. Against the compactness and alert energy of these special interests the lone and unorganized advocates of restriction had an air of futility. (Mark Sullivan, in New York Evening Post.)

The special interests, representing alien groups and greedy financial interests, made a clamor which the unthinking might have regarded as an expression of public opinion, but those of us who were in the thick of the fight knew that the present and future welfare of the country was at stake, and believed that the will of the people would effectually assert itself in support of our contention. The sequel showed that the fight was not futile.

While the bill was hanging in the Senate I again took up the question on the floor of the House for the purpose of exposing the unwholesome and sinister influences opposing the bill in the Senate, and among other things said in the House on Saturday, January 8, 1921, that the influences of the foreign-born and their kinspeople and the power of individual and corporate greed were opposing with ominous results the efforts of the people to protect themselves and their country against the peril of a threatened overflow of millions of aliens, such as have destroyed many nations throughout the history of mankind.

Finally, the fight being made and public sentiment for restriction prevailed, and the Senate passed the measure with some good amendments, proposed by men like Senator HARRISON, of Mississippi, and supported by Senators CULBERSON and SHEPPARD.

As stated, we had been getting from 750,000 to practically 1,300,000 immigrants from the Old World every year, many of whom were of the most degraded and wretched type.

During the last 10 years immediately preceding the World War 10,121,859 aliens came in as regular immigrants. In addition to these, great numbers came as nonimmigrants, as deserting foreign seamen, and by many other irregular methods, including vast numbers illegally smuggled in. The war had temporarily stopped them, but in 1919, the next year after the World War closed, the flood began to pour in again. About 400,000 came in the year ending with June, 1920, which increased to about 800,000 for the year ending with June, 1921.

It was known by all who were informed on the subject that 1,200,000 to 1,500,000 of these unhappy creatures would come during the next year, ending with June, 1922. But in May, 1921, I had the very great privilege of helping to write and fight through to passage the act which reduced the number coming during that year to but slightly more than one-fourth of what had come the preceding year and to less than one-fifth of what would have come that year but for that act. So that instead of having 1,200,000 to 1,500,000 unhappy and dangerous people poured from the Old World into America in that year, when there was much unemployment, much restlessness, and much genuine distress among our own people, the number was reduced to but slightly above 200,000, or less than one-fifth of those who would have come had the new law not stopped them.

But that act was to expire with June, 1922, when a new, big rush would start. Unless a better law could be enacted it must be amended and extended as long as possible. The fight was renewed and carried on persistently until an act was passed amending and extending it for two years more. That law will expire again during the life of the Congress to be elected this year. I urged upon the committee that a more logical and permanent law should have been written; but this was the best that could be obtained in the face of the complicated situation and the powerful and sinister opposition to the legislation. It must be still further amended and continued. The fight will be a long, hard one; in fact, this contest will go on as long as the overcrowded world wants to overflow on us. No one can foresee the result with certainty; but every fighting American who wants this country saved for ourselves and our children must be determined that this fight shall be won. A few more decades of pouring Asia, Europe, and Africa into the United States at the rate of 1,200,000 to 1,500,000 per year and our America will have ceased to exist. Indeed, there will be hundreds of motley, mongrel, anarchistic, jabbering millions here; but with such a people in the ascendency, the country will have ceased to be our America.

Just now there is a hidden, sinister plan to "dig under." It is hoped, by a system of mining and sapping, to divert the control of this important question, this question of life and death, from the Halls of the Congress elected by the people, and place it in the secret chambers of the treaty-making power, over which the will of the people has much less direct and effective control, and with the Shipping Board and steamship companies, whose only interest is to make money by bringing millions from the Old World to America.

It has been my privilege to point out the danger of this in a recent speech made by me in the House, which will be found in the CONGRESSIONAL RECORD of May 5, 1922, to which I refer.

If anyone wishes to know how deep is the alarm of the American people of America on account of this vast overflow of alien peoples on us, he should see the great number of letters written by Americans from every part of the country to members of the House Committee on Immigration and Naturalization. I use the phrase "American people of America" deliberately, because there are now many millions in America who are not American in name, or language, or character, or desire, or true allegiance. These include many of alien races naturalized or born here whose hearts, like the hearts of their fathers, still give paramount homage to the old countries and clans from which they sprang. If tempted to it, under circumstances permitting it, they would side with alien races and foreign lands. Of course, all such oppose the efforts of America to protect herself against the un-American, often anti-American, invading hordes which such aliens love better than they love America. These and greedy financial interests, with whom the dollar is above country and God, by scheming, propaganda, falsehood, and corruption, strive to prevent the enactment of laws or to break them down after they are enacted. But Americans see the peril and want the country protected.

To quote any considerable percentage of these letters, of which I have great numbers, would unduly burden the RECORD, but I insert below a few typical ones, including none of the many coming from my own district and State and only the slightest fraction of those coming from elsewhere:

ST. LOUIS, MO.

Congressman BOX,
State of Texas, Washington, D. C.

MY DEAR CONGRESSMAN: I had the great privilege of reading your speech in the House recently, published in the CONGRESSIONAL RECORD. I refer to your address on immigration. I have been studying this situation and condemning it for several years, and I want to extend to you my heartfelt appreciation of your viewpoint and sentiment with regard to this all-important subject. * * *

A. O. PIER.

—

POTTSVILLE, PA.

Congressman J. C. BOX: I congratulate Texas and the whole Nation on having such a splendid Congressman as they have in you. I refer to your recent immigration speech in the House.

A. D. BOYER.

—

WASHINGTON, PA.

Congressman BOX: Your recent speech on immigration, like all your other speeches, was capital. You're a real statesman and genuine American. * * *

J. W. WASSON.

—

HARVARD UNIVERSITY,
Cambridge, Mass., May 8, 1922.

DEAR JUDGE BOX: I have just read with the greatest satisfaction your admirable speech of May 5 with reference to the provisions of the marine subsidy bill, with reference to foreign inspection of aliens. * * * It is more satisfaction to me than you can realize to feel that you are so constantly on the alert watching for every opportunity to urge the need of restriction (of immigration). * * * I only wish there were more men in Congress like you.

ROBERT C. DE WARD.

Mr. HUDDLESTON. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD upon the Cape Cod Canal bill.

The SPEAKER. Is there objection?

There was no objection.

The extension of remarks referred to are here printed in full as follows:

Mr. HUDDLESTON—

"Unload it on Uncle Sam."

The Committee on Interstate and Foreign Commerce has favorably reported the bill H. R. 11674, which provides for the purchase by the United States of the Cape Cod Canal at a price of $11,500,000, with the view to its operation by the Government as a tolls-free canal. As a member of the committee it was my purpose to submit an adverse minority report. However, due to delay in printing the committee hearings, same did not become available in time for me to file the minority report along with the majority report. Hence I extend my remarks in the RECORD for the purpose of expressing my views upon said measure.

Some 20 years ago August Belmont and his associate financiers conceived the plan of constructing a canal across Cape Cod so as to connect Buzzards Bay with Cape Cod Bay, and thereby shorten the water route from New York to Boston some 65 miles and avoid the dangers of passage around the cape. The canal was opened for traffic in 1914.

The venture was a purely commercial one entered into for purposes of profits. However, the hopes of its promoters were not borne out. The canal was not a financial success. By 1917 it had become certain that the canal could never earn interest on the investment. To quote the statement of Hon. Newton D. Baker, made before the Committee on Interstate and Foreign Commerce in 1920, while he was Secretary of War:

> These gentlemen built this canal; they thought it was going to be a great commercial success; they found it was more expensive to build than they had anticipated. They found very great difficulty in tempting people to use it. * * * And so they came to the conclusion that there was not enough liveliness to their hope of large commercial success to justify their continuing to carry the burden, and so they came to Congress. * * * They have been seeking to get the Government to take this burden off their shoulders, and they have said, "We were patriotic in doing this; we were trying to build a great highway for the commerce of the Nation, and we find that the burden is so great that private enterprise ought not to be asked to sustain the losses that are involved in carrying it to a profitable status." And therefore they said, "Being a public work, Congress ought to take this off our shoulders."

THE FIRST STEP TOWARD UNLOADING.

Of course, the first step toward unloading the canal on the Government was for its owners to appeal to the commercial instincts of Boston and other New England interests. "If the Government acquires the canal, tolls will not be charged; this means a saving of 10 cents per ton on coal, and more upon other traffic—you will have water competition with the railroads." These were the arguments. Civic bodies were influenced to take action. Hired solicitors circulated petitions which the public were asked to sign. Even the help of labor bodies was invoked.

Hon. John W. Weeks, then a Senator from Massachusetts, introduced a bill—the opening wedge. He succeeded in getting the Senate to accept the substance of his bill as a rider upon the river and harbor appropriations act approved August 8, 1917. The House had never considered the matter. Its committee had not heard of it. However, the conferees agreed, with a slight amendment.

The rider was ingeniously worded. It authorized the Secretary of War, "subject to future ratification" by Congress, to make a contract for the purchase of the canal, or, if unable to agree upon the price, to conduct condemnation proceedings, "the acceptance of the award in said proceedings to be subject to future ratification and appropriation by Congress." The sum of $5,000 was appropriated to cover all expenses.

The war was on. There was a submarine scare. The Railroad Administration took over the canal under the Federal control act. Its use was greatly increased by governmental pressure. These circumstances aided the powerful interests pressing upon Secretary of War Baker. He was induced to offer $8,200,000 for the canal and subsequently to start condemnation proceedings. An award was made in the lower court, which was reversed on appeal, so that such proceedings remain in their initial status.

Then there came a change in administrations. Mr. Baker, who had refused to pay more than $8,200,000, went out and Mr. Weeks came in. As a Senator he had driven the opening wedge to unload the canal on the Government. He lost no time in agreeing with the canal owners to pay them $11,500,000 for the canal..

WEEKS HAD NO AUTHORITY.

Under the terms of the act of 1917 the authority of the Secretary of War spent itself when, being unable to agree with the canal owners, the matter was referred to the Attorney General for the institution of condemnation proceedings. The ball was then passed to the Attorney General; it yet remains in his hands.

Secretary of War Weeks in making his agreement with the canal company was in the legal sense an interloper and a volunteer—he had no official authority. But technicalities of this kind did not trouble him. Promptly he agreed to buy the canal.

A bill to confirm Secretary Weeks's contract was introduced by Mr. WINSLOW, also of Massachusetts. The rider which had constituted the entering wedge was upon a river and harbor appropriation bill. The subject was one which the Rivers and Harbors Committee might well have considered. However, the Speaker, also of Massachusetts, promptly referred this bill to the Committee on Interstate and Foreign Commerce, of which Mr. WINSLOW was chairman, a committee having among

its members a number of influential and respected Representatives also from New England.

Promptly again the committee laid aside its grave and important public business to consider the canal purchase which Mr. Weeks had agreed to. The Sweet and Hoch bills to amend the transportation act of 1920, the Newton coal bill, soldier relief measures, in fact, dozens of other matters of pressing public moment were laid aside—the Cape Cod Canal took the right of way.

Behold, first to press his measure upon the committee was Secretary of War Weeks. He even argued that our Government was honor bound to buy the canal; that equity and good conscience required that Congress should approve his action. On July 26, 1917—page 5498 of RECORD—Mr. Weeks had said in the Senate:

I wish frankly to say at this time that with the information that Congress has, if the appropriation had been required for the purchase of the canal without additional information I should not have pressed it, but the monetary importance in this matter is of so slight importance that it did not seem to me there was any objection on that score.

On the strength of that statement the Senate adopted his rider. Now he says that Congress is honor bound, that we are morally bound. Yet his original measure had carried the provision that all actions taken under it should be subject to the approval of Congress.

A "NEW PROJECT"—NO PRESSING NEED.

The purchase of Cape Cod Canal has the same status for congressional action as would have a measure for the construction of the canal at the beginning. Its status is the same for our practices as though a proposal for the construction of the canal was now being brought forward for the first time. In this sense it is a "new project."

On the other hand there is no emergency. Indeed, there is no necessity for early action. The canal is now in operation. To the extent of its capacity it may be used as fully as though it was Government owned. The only difference is that now in private ownership tolls must be paid. If the Government buys the canal it will, of course, be toll free. The item of tolls is all that any interest can at present find upon which to base any pressure for purchase by the Government. In so far as there is any pressure for the passage of this bill not created in the interest of the canal owners, it is based upon the desire of certain users of the canal to be relieved of paying tolls for such use.

Upon what theory it may be urged that the Government owes the duty to the citizen to furnish him at public expense a free artificial waterway for his convenience, I confess that I am unable to see.

LARGE FUTURE EXPENDITURES.

But while the canal is already constructed and under operation it is certain that once the commercial and shipping interests succeeded in getting the Government to buy the canal they will begin to press for its enlargement. Indeed, already a principal reason given why the Government should buy the canal is that it should be enlarged to a 35-foot depth by 200 feet width and that such enlargement will not be done by private enterprise and, indeed, will not be profitable from a commercial standpoint.

Let not Congress assume that by passing this bill its advocates will be satisfied. They will use that success mainly as a basis for pressure that further construction work at a cost of many millions of dollars shall be entered upon. It is difficult to fix the mark to which expenditures will go if we buy the canal. On this point I do not believe that I can do better than to quote what the able and respected Representative, Hon. JOSEPH WALSH, also from Massachusetts, said in the House while the subject was under discussion on August 3, 1917. Referring to the Cape Cod rider, Mr. WALSH, in whose congressional district the Cape Cod Canal lies, said—page 5731 of RECORD:

Mr. WALSH. I have voted against the bill and expect to vote to recommit it, and also expect to vote against the conference report.

Mr. SMALL. And this particular item?

Mr. WALSH. And am opposed to this item because it will involve an expenditure of over $50,000,000 before this Government gets any benefit from it.

And mark you how the applause of the House followed upon that frank statement.

AGREED PRICE TOO HIGH.

It is not my desire to discuss at length the price Mr. Weeks proposes to pay for the canal. Mr. Baker, after careful investigation, refused to offer more than $8,200,000 for it. He had gone into the matter exhaustively. See his report to Congress, page 213 of hearings; also see report of General Black, page 214 of hearings.

The Government had employed a firm of accountants, Price, Waterhouse & Co., who examined the canal company's books and accounts exhaustively. The direct cost of actual construction of the canal was found to be $6,243,171.01; interest and taxes during construction, $748,112.40; total, $8,265,743.04, substantially the same as the amount which Mr. Baker had offered to pay. The canal company claimed that in addition to above items of direct cost they had expended $4,787,410.67 in capital stock for rights, franchises, and services of promoters, and so forth, making a total alleged cost of $13,053,153.71, counting the stock and bonds at par.

Mr. Baker's offer of $8,200,000 for the canal was based upon the Report of the Board of Engineers for Rivers and Harbors. See page 218 of hearings. I quote from section 16 of said report, as found on page 221 of hearings:

While the board has concluded that $10,000,000 would be a fair price for the canal, based upon the reported expenditures, it is not convinced that an investment of this amount is justified on the part of the United States in order to make this a free waterway. The information submitted indicates that the claimed advantages of this route over the outside one around Cape Cod have diverted from the latter only about one-fifth of its tonnage. * * * At 4 per cent, the interest on $10,000,000 would amount to $400,000 a year, and, allowing $200,000 a year for the cost of maintenance and operation, the total annual charges on this basis would amount to $600,000.

The saving to be effected by the canal is estimated by various parties interested at from 5 to 10 cents a ton. Assuming a saving of 8 cents a ton, a commerce of 7,500,000 tons a year would be required in order to make a saving equal to this estimated annual cost to the public of acquiring and operating the present canal without enlargement or further protection. This is more than one-half the total annual cargo movement between New England and points south, as estimated by Colonel Shunk in paragraph 4 of his report on May 13, 1918. (See p. 77.) Assuming that the saving should be at least double the cost to the public in order to warrant the charge upon public funds, the admissible public charge for this tonnage, which is far in excess of the traffic to be expected in the near future, should not exceed $300,000. Subtracting $200,000 for annual cost of maintenance leaves $100,000 for interest charges, which at 4 per cent corresponds to a capital investment of $2,500,000. This amount, therefore, is apparently an upper limit of any justifiable expenditure by the United States to acquire public ownership for commercial purposes.

I ask close study of the report of the Board of Engineers for Rivers and Harbors from which I have quoted this extract. It shows why the owners of the canal want to sell. It shows that the canal can never be a success as a commercial proposition. It shows that no private interest can afford to own the canal.

Now, manifestly, if the canal is worth only $2,500,000 to a private interest, it is worth no more to the Government. It can not possibly be worth more to the Government than the benefit which the general public—users of the canal—can derive from its toll-free operation. The fact that the Government is to bear the cost of owning and operating the canal is unimportant. The Government can not afford to own and operate unless its citizens—the public—derive a benefit equal to its cost of owning and operating. Such benefit, of course, may not be wholly reflected in terms of tolls-earning capacity. Subject to this thought, it is clear that any price which the Government may pay for the canal above what it could be made to earn interest upon if privately operated is excessive.

CANAL HAS SMALL VALUE FOR NATIONAL DEFENSE.

These people who are trying to sell the canal to the Government lay stress upon its value for purposes in connection with military and naval strategy. On this point I quote from letter from the General Board of the Navy dated August 19, 1916, found in section 17 of the report of Board of Engineers for Rivers and Harbors, page 222 of hearings:

The expense of rendering the Cape Cod Canal available to all types of naval vessels not only requires a considerable expenditure for enlarging it but also additional continuing expense for the maintenance of such increased size, and an even greater expenditure for the defenses that should be given an important military waterway at a salient of our coast. Such large additional expenditures are not warranted by the apparent increased military advantages of having the canal available for the passage of ships requiring a depth of over 25 feet at mean low water.

The board has no doubt of the advantages of a sufficient depth and width to permit the passage of battleships. It adheres, however, to its previous expressions to the effect that military necessity is not sufficiently great to warrant the department in urging the expenditure of public funds to that end.

The Board of Engineers for Rivers and Harbors upon this point report as follows, page 222 of hearings:

The Board of Engineers for Rivers and Harbors has no data upon which it can assign a definite value to the canal for these naval uses. As the canal is a going concern and now available for military and naval uses upon payment of reasonable tolls, there is no urgency for acquisition of the canal for these purposes, unless it is deemed essential to enlarge it to accommodate capital ships of the Navy, which is apparently not the case. The value of public ownership for any uses that can be made of the present canal would obviously be due to the saving of tolls on Government vessels.

Bear in mind that the reports from which I have quoted were made during the war period, at a time when almost anything was being done which it was claimed would promote the national defense.

AN ADMINISTRATION MEASURE.

This is an administration measure. Mr. Secretary Weeks has seen to that. As Secretary of War he pressed it upon the committee. He brought with him, for their influence, Secretary Hoover and Secretary Denby. They want his contract ratified by Congress.

The present administration came in upon the slogan, "Get the Government out of business," and, safe in, is giving the people a startling interpretation of its meaning. Get the Government out of business when it is profitable—get the Government into the business of lending money to railroads and subsidizing shipowners when it is unprofitable. Get the Government out of business where in competition with profiteers and dollar grabbers—get the Government into business when no profit is probable. Get the Government out of the railroad business which would furnish transportation at a reasonable cost—get it into the business of furnishing a toll-free canal.

The gentlemen advocating this bill have a spasm whenever Government ownership of railroads is mentioned, yet they want a Government owned and free canal. It makes all the difference in the world to their principles whether the vehicle of commerce moves on rails as a freight car or upon water as a barge. They would have the Government provide a free canal, "but none but a Bolshevist would think of the Government owning a railroad," even though a charge was made for its use. So long as there are profits to be made these gentlemen are for unrestrained individualism; they view all Government ownership with abhorrence. But when the enterprise promises no reward, like the Cape Cod Canal, then it is "Unload it on Uncle Sam."

Mr. FESS. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD upon Federal legislation in respect to education.

The SPEAKER. Is there objection?

There was no objection.

Mr. FESS. Mr. Speaker, at the close of the World War I addressed the House on "A Crisis in American Education." I had made a survey of the situation by addressing governors of States and State superintendents of public instruction and others on the loss to the schools of efficient teachers.

The replies were discouraging on the existent situation for the most part and not reassuring to any degree for the immediate future.

The low range of salary as compared with salaries in other fields was the cause given for the loss to the school service of much of its best talent. This feature discounted school work as a profession to the young man or woman. Patronage of training schools fell off at an alarming rate, while in professional schools it was quite to the contrary. The standard of teaching was inevitably lowered when, from every standpoint, it should have been elevated to meet the increased complications of the future.

This feature of education demanded attention by both State and Nation. It was the basis for the demand for Federal aid. The draft records, when the Army was built, disclosed some of the most astounding facts in our educational situation. They revealed an amazing adult illiteracy in which a large per cent of our young men of draft age, capable otherwise for service, were so illiterate they could not read the orders. This was especially true in specific sections of the country. They either had to be rejected or at once placed in squads for elementary training in the merest rudiments.

This led to a demand for Federal aid to remove adult illiteracy for a defensive, if no other reason. It has been the policy of the country that it could not afford to allow its citizens to grow up in ignorance, hence the existence of compulsory education in most of the States in the Union.

The draft records disclosed another most startling fact, viz, 35 per cent of those examined were found physically defective for military service, and medical authority stated to a committee of Congress that 80 per cent of these physically incapacitated could have been relieved of the defect if taken in charge at school age for treatment.

This led to a demand for better physical education in the public schools. This demand took on a national interest and Federal aid was sought to help care for the problem. The war also brought out and emphasized the problem of Americanization of the foreigner.

There was discovered a very respectable number of foreign people who had come to take advantage of the benefits of our country. Many had become naturalized citizens, others had taken out their first papers but had not completed their naturalization, while a vast number had taken no steps to become a part of the Nation but were here simply to profit from the country's advantages.

It was noted that some naturalized were unwilling to serve the Nation at war. Many who had not completed their steps for citizenship pleaded that fact as a defense from conscription. Many aliens did not only refuse to serve the Nation but were violent to the point where the Government had to take steps to deport them. While it was estimated that 60,000 such were apprehended, only about 500 were actually deported.

The alien can be handled by legislation, through deportation, if he refuses to abide by the laws of the country. Those who so act can be Americanized through our school facilities. But there are in our midst many, not foreigners or aliens, but Americans, who must be dealt with not so much by law as by education. The Americanization of the un-American American is our most difficult problem. The remedy here is education, and while it is conceded that education in the main is a State matter, this feature of Americanization is certainly a Federal function. This phase of the subject is the basis of the demand for Federal aid in the work of Americanization.

In the United States, unlike other countries, we have no national system of education. Popular education is now and has always been primarily a State matter. So we have State systems, as many as we have States, but no national system.

But with the growth of the Government and new emphasis constantly placed on intelligence as the basis of popular government, there has been a gradual recognition of education as a Federal as well as a State function. This principle was recognized when the land-grant college was established, and in the several amendments enlarging the range of the law. It was again recognized in the agricultural extension act, known as the Lever Act. It was again recognized by the wide extension of the Agricultural Department in Washington, which in its research work is largely educational. It was again recognized in the Smith-Hughes vocational educational legislation in 1917. It was again recognized by the soldier rehabilitation act, and again by the industrial cripple act.

There is no question about the constitutionality of the legislation for Federal aid, nor whether we have adopted it as a policy. These are established by what has already been done. Federal activity in education has been growing steadily in spite of the limitation of the Federal Bureau of Education. This has reached a point where a demand is justified for a better rank of Federal education. That demand has taken the shape of a Department of Education with Cabinet rank.

In the light of the needs as disclosed by the war, bills were introduced covering all the items of (1) Department of Education, (2) Americanization, (3) physical education, (4) removal of adult illiteracy, (5) training of teachers, and (6) increased salaries for teachers. While most of these subjects are covered by separate bills now pending in Congress, one bill, embracing all of the items, is also before Congress—the Sterling-Towner bill, formerly the Smith-Towner bill.

The Education Committee of the House in the Sixty-sixth Congress conducted hearings on the Smith-Towner bill and also on the separate bills. The committee considered and reported favorably the Smith-Towner measure, but it failed to reach consideration of the House before adjournment.

In the present Congress, all these measures were again introduced. Also another bill was introduced providing the establishment of a public welfare department, recommended by the President. At the beginning of the extra session of the present Congress a reorganization committee was authorized to report a plan for a complete reorganization of all the executive departments.

Since there were two proposals for the creation of additional executive departments before the Committee on Education, one department of education and the other department of public welfare, it was thought best not to consider further either until a report of the Reorganization Committee, which had the entire field to cover, was made.

This reorganization plan is now before the President and has been the subject of some Cabinet meetings. It is expected to be laid before Congress in the near future, either as a complete or partial report.

The friends of education are to be congratulated upon that portion of the report relating to education. It recommends a new department of education and public welfare. This is the original suggestion I made to the President after failing to secure his indorsement of the department of education. He had committed himself to a new department of public welfare, to which he was devoted in the fulfillment of a pledge he had made during the preelection campaign. I introduced the bill in the House, and Senator Kenyon in the Senate. Hearings were conducted, but consideration was deferred awaiting the report of the Reorganization Committee. For the same reason consideration of the Sterling-Towner bill was deferred.

The prospects for legislation for a department giving education its proper place are very good.

When this stage is reached and passed, then the way opens for advanced legislation on the various subjects of physical education, Americanization, adult illiteracy, and home economics. These proposed measures, although existing as separate bills, were also included in the department bill. No one of them would be taken up before the larger bill, and it could not be taken up awaiting the reorganization plan. While I have hoped that the reorganization plan will in due time be before Congress and will meet the approval of the best judgment of the teachers, in case it is not forthcoming within a reasonable time I shall feel obligated, as chairman of the Committee on Education, to take up for consideration the measures now before the committee, including the Sterling-Towner bill.

The committee, having favorably reported this measure in the last Congress, will doubtless give it favorable consideration now. I am hopeful that the reorganization plan will be ready for consideration soon. It will give us a plan upon which we can unite the two pledges to the public and serve best the Nation's highest interests.

Notwithstanding the delay in legislation granting Federal aid to education, there has been a very marked improvement in the educational situation since the war. Boards of education have as a general principle met the fatal error of lack of compensation. This has been done by State authority, which has been the most important item in the State's increased taxation. In some States, such as Ohio and Pennsylvania, this item has been pronounced. School facilities as a rule are readily supplied to meet the rapid growth of school interests.

Recently a school authority published figures upon the growth of school attendance since 1870. They were given in percentage of enrollment to age population. It increased in sixth grade from 69 per cent in 1870 to 92 per cent in 1918; in the seventh grade from 60 per cent in 1870 to 78 per cent in 1918; and in the eighth grade from 44.5 per cent in 1870 to 72 per cent in 1918.

The growth of attendance in high school first year showed an increase from 5 per cent in 1870 to 35 per cent in 1918; in the second year, from 3 per cent to 24 per cent; third year, from 8 per cent to 17 per cent; last year, from 1 per cent to 13.7 per cent. This ratio will show increase since that year. It shows very well when compared with foreign countries, as the highest rate of attendance in Europe, according to this same authority, is in Scotland, which was 8.1 per cent for the period of our high school, which here in 1914 was 16.2 per cent.

The most encouraging feature of the entire educational situation is the substantial recognition of education as a profession. The immediate prospects are much better and are now promising to hold out to the able young men and women a better field for their talents, in which reasonable remuneration as well as proper recognition are to be assured. This is a good omen for America.

There is another educational interest which has greatly appealed to me for years, viz, the establishment here in Washington of a great research institution, a national university. There is no place where can be found such an abundance of research material in the way of library and laboratory facilities as in the Capital. If an organization for the utilization of these materials by specially adapted and qualified research investigators were effected, in time this Capital would become the greatest center for research training, as it is already the greatest center of scholarship in the country, if not in the world. This city of Washington would soon become the Mecca of all the world for special students striving to add to the sum of knowledge. There is no limit to be placed on the possibilities of discovery and invention of a proper use of these facilities by the brightest minds of the country. I hope Congress will in time embrace the opportunities lying before the Nation along this line of achievement.

WAR FINANCE CORPORATION ACT.

Mr. CAMPBELL of Kansas. Mr. Speaker, I submit a privileged report from the Committee on Rules.

The SPEAKER. The gentleman from Kansas submits a privileged report which the Clerk will report.

The Clerk read as follows:

House Resolution 353, Report 1062.

Resolved, That upon the adoption of this resolution it shall be in order to consider the bill S. 2775, being an act to extend for one year the powers of the War Finance Corporation to make advances under the provisions of the act entitled "An act to amend the War Finance Corporation act, approved April 5, 1918, as amended, to provide relief for producers of and dealers in agricultural products, and for other purposes," approved August 24, 1921.

Mr. CAMPBELL of Kansas. Mr. Speaker, the rule states the title of the bill, which is to extend the activities of the War Finance Corporation for another year. Does the gentleman from Tennessee desire some time?

Mr. GARRETT of Tennessee. Is it a Union Calendar bill?

Mr. CAMPBELL of Kansas. It is a Union Calendar bill. If the gentleman from Tennessee desires no time, I ask for a vote on the resolution.

The SPEAKER. The question is on agreeing to the resolution.

The question was taken and the resolution was agreed to.

Mr. McFADDEN. Mr. Speaker——

Mr. WALSH. Mr. Speaker, I make the point of order that there is no quorum present. If we are not going to do anything under this rule which has been adopted——

Mr. MONDELL. I wish the gentleman would withhold that. I think we ought to begin the consideration of the bill.

Mr. WALSH. If that is the intention, I withdraw the point.

Mr. McFADDEN. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (S. 2775) and, Mr. Speaker, pending that, I ask if we can not come to some arrangement as to time for general debate?

Mr. WINGO. What time does the gentleman suggest?

Mr. McFADDEN. I will say that I have calls for quite considerable time. I realize the importance of early and favorable action on this bill, and I suggest an hour on a side. Can the gentleman get along with that?

Mr. WINGO. Does the gentleman figure on sitting here and concluding to-night or putting it over?

Mr. McFADDEN. I think we can get started to-night, as I understand the House will be in session to-morrow, and we can finish it to-morrow morning.

Mr. WINGO. What is the gentleman's request?

Mr. McFADDEN. The request is that the debate be limited to two hours.

Mr. WINGO. How controlled?

Mr. McFADDEN. One-half to be controlled by the gentleman on this side and one-half on that side.

Mr. WINGO. One hour is to be controlled by the gentleman from Pennsylvania and one hour by myself.

Mr. McFADDEN. Yes.

Mr. WINGO. That is satisfactory.

The SPEAKER. The gentleman from Pennsylvania asks unanimous consent that the time for general debate be limited to two hours, one hour to be controlled by himself and one hour by the gentleman from Arkansas [Mr. WINGO]. Is there objection?

Mr. WALSH. Mr. Speaker, I object.

The SPEAKER. The question is on the motion to go into the Committee of the Whole House on the state of the Union.

The question was taken and the motion was agreed to; accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (S. 2275), with Mr. CAMPBELL of Kansas in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the consideration of the bill (S. 2275), which the Clerk will report.

The Clerk read as follows:

An act (S. 2775) to extend for one year the powers of the War Finance Corporation to make advances under the provisions of the act entitled "An act to amend the War Finance Corporation act, approved April 5, 1918, as amended, to provide relief for producers of and dealers in agricultural products, and for other purposes," approved August 24, 1921.

Be it enacted, etc., That the first sentence of section 23 of the War Finance Corporation act, approved April 5, 1918, as amended, is amended to read as follows:

"SEC. 23. That notwithstanding the limitation of section 1, the advances provided for by section 21 and section 22 of this act may be made until July 1, 1923."

SEC. 2. That the last sentence of section 24 of such act as amended, is amended to read as follows:

"Advances or purchases may be made under this section at any time prior to July 1, 1923."

The committee amendment was read as follows:

Strike out all after the enacting clause and insert: "That the time during which the War Finance Corporation may make advances and purchase notes, drafts, bills of exchange, or other securities under the terms of sections 21, 22, 23, and 24 of the War Finance Corporation act, as amended, is hereby extended up to and including May 31, 1923: *Provided*, That if any application for an advance or for the purchase by the War Finance Corporation of notes, drafts, bills of exchange, or other securities is received at the office of the corporation in the District of Columbia on or before May 31, 1923, such application may be acted upon and approved, and the advance may be made or the notes, drafts, bills of exchange, or other securities purchased at any time prior to June 30, 1923.

SEC. 2. That the second paragraph of section 12 of title 1 of the War Finance Corporation act, as amended, be further amended to read as follows:

"The power of the corporation to issue notes or bonds may be exercised at any time prior to January 31, 1926, but no such notes or bonds shall mature later than June 30, 1926."

SEC. 3. That paragraph 3 of section 15 of title 1 of the War Finance Corporation act, as amended, be amended by striking out at the beginning of said paragraph the words "beginning July 1, 1922," and inserting in lieu thereof the words "beginning July 1, 1923."

That paragrapn 4 of said section 15 be amended by striking out at the beginning of said paragraph the words "After July 1, 1922," and inserting in lieu thereof the words "After July 1, 1923."

Mr. McFADDEN. Mr. Chairman, the committee gave very careful consideration to the proposition of continuing the operations of the War Finance Corporation. We heard the Secretary of the Treasury, the managing director of the War Finance Corporation, and held quite extensive hearings, and the committee by practically a unanimous vote agreed to extend the operations of the War Finance Corporation for another year. In doing so we realized the important part which the operations of this institution have played in the rehabilitation of values of the South and in the West. The operations of the system show that total loans have been made since January 4, 1921, up to and including May 27, 1922, of a total sum of $354,718,000; $50,355,000 of this were loaned direct to aid in the financing of corporations under sections 21, 22, and 24 of the act approved on January 4, 1921; $304,000,000 were loaned direct to financial institutions to aid in these same operations; $59,392,000 were loaned to cooperative associations, largely the cooperative-marketing associations, so that the operations of this system as it stands today means that additional help is being extended to the great agricultural areas of the country which are engaged in production, and it has been shown to the committee that it is necessary to continue these operations for the period of another year. We were assured by the managing director of the War Finance Corporation that only in the greatest need, and in emergency cases, would advances be made in the future; that he proposed to extract from the would-be borrower the fact that they were unable through the regular banking and financial channels to procure the necessary assistance. Now, Mr. Chairman, I do not care to consume very much more time.

Mr. WALSH. Will the gentleman yield for a question?

Mr. McFADDEN. I will yield.

Mr. WALSH. Is it the opinion of the Banking and Currency Committee that as conditions improve in various lines of agriculture that the time will be extended for giving aid?

Mr. McFADDEN. No; the committee has been assured quite the contrary; but that the extensive operations of this corporation are such that demands are still from certain sections, which seems to make it necessary to continue its operations over a period of a year to come.

Mr. WALSH. And how has the gentleman reached the date of exactly 365 days when there will be no more need for Government participation in farm operations?

Mr. McFADDEN. I will say to the gentleman that the first proposition before the committee was for the extension of six months. The managing director felt that that was too short a time and that it should be extended a year. He gave us assurances that within the year he felt that the financial situation would have so improved in those sections of the country that are receiving aid that it will not be necessary to continue the operation over another period. I will say to the gentleman, in addition to that, that it is the report to the committee of the managing director that great relief could be occasioned if a proper plan was promulgated, and such a plan is pending before the committee now, to finance what is called short-time cattle paper loans.

Mr. LINEBERGER. Will the gentleman yield for a question there?

Mr. McFADDEN. I will.

Mr. LINEBERGER. What is the term for which interest has to be paid on the cattle paper—six months or a year?

Mr. McFADDEN. That was not determined. I do not think there is any time specifically fixed, but there is need for the financing of cattle paper from six months to three years. I think a general plan of not to exceed one year would take care of the situation.

Mr. LINEBERGER. I meant the interest payment. I know the cattlemen in my section of the country have had great difficulty because they have exacted the interest payments each six months.

Mr. McFADDEN. I will say to the gentleman the committee has not given consideration to that bill as yet, and I am not very familiar with all the details, especially the rate of interest and the payment of interest.

Mr. WALSH. Will the gentleman state that these men are being required to pay interest on these loans—these cattlemen?

Mr. McFADDEN. Why, certainly, the cattlemen will pay interest on the loans the same as any other borrowers.

Mr. GARNER. It is not as if you sent it to Massachusetts, where you get it free of charge. The western and southern fellows pay interest.

Mr. WALSH. That is a good claim for the gentleman from Texas to make. I hope the chairman of the Committee on Banking and Currency can produce records to substantiate the claim. Has the gentleman any information which leads him to believe that this will be the only extension asked for by these agriculturists, who have had such hard sledding, as the result of this deflation, which never should have occurred, according to some of them, that this will be the only extension they will need, or has the gentleman any information which leads him to think that this is going to be a permanent institution?

Mr. McFADDEN. I have no information to indicate that it is going to be a permanent institution. On the contrary, I have heard the statement made before the committee, by the managing director of the War Finance Corporation, Mr. Eugene Meyer, that this would be the last extension that would be necessary. The Secretary of the Treasury thought six months would do. Now, on the question of the interest payment on these loans, I would refer the gentleman to the law that provides a definite and fixed rate of interest on the loans made by the corporation.

Mr. WALSH. We provided when we made advances for the purchase of seed grains that it should be repaid, but you look at the records of that transaction and you will find that a very small proportion of it has ever been repaid, and they came in and got a further advance—these same people who are asking the War Finance Corporation to be continued for their benefit.

Mr. McFADDEN. I will say to the gentleman in answer to the question that he has raised that the War Finance Corporation are collecting more than they are loaning daily now, and they do collect a stipulated rate of interest on every one of these loans, in accordance with the law. The total amount of loans outstanding as of June 1, 1922, is $247,851,998.17.

Mr. TOWNER. Will the gentleman yield?

Mr. McFADDEN. I will.

Mr. TOWNER. For the benefit of the gentleman from Massachusetts, I wanted to call attention to the last statement which the gentleman from Pennsylvania made. Now, these loans are being liquidated. Every week and every month they are collecting more than they pay out, and it is expected that the entire necessity, perhaps, for these loans will have expired at the expiration of the year. I am frank to say that if it does not I think they will be so reduced that even the gentleman from Massachusetts will not complain about the situation at the end of the year.

Mr. WALSH. This is, I suppose, if the gentleman from Pennsylvania [Mr. McFADDEN] will permit, another cog in the program of taking the Government out of business?

Mr. TOWNER. Let me answer the gentleman from Massachusetts, if the gentleman will permit. We have not been trying to take the Government out of business.

Mr. WALSH. You have not been trying to do it, but only promised to do it.

Mr. TOWNER. Do not interrupt, please. We have been trying to put the farmer of the United States into business, and that has been for your benefit as much as for theirs.

Mr. WALSH. Oh, yes——

Mr. GARNER. I want to ask the gentleman a question. The gentleman from Massachusetts speaks about the interest rate and whether or not it is to be extended. If the gentleman from Massachusetts and his party has the statesmanship which they boast of, and which I think they have if they have the courage, they will pass a substantive law extending the loaning of credit to the farmers and stock raisers of this country, that ought to be passed and put on the statute books and ought to have been done when the Federal reserve system was created. The farmers and stock raisers of this country must have at least nine months more if they are going to properly market their products. Under that system at this time they have a limit of six months. Some system ought to be devised by the gentleman from Pennsylvania, or suggested by the gentleman from Pennsylvania, whereby the raisers of stock will be able to get credit that will enable them to market their products.

Mr. WALSH. When this new member of the Federal Reserve Board gets the dirt off his hands he will arrange a system for them.

That was the claim of the old Populist Party after the Civil War days, and it is being made here now on the floor, not only by the gentleman from Texas [Mr. GARNER], who represents one of the parties in the House, but by others who represent other parties in the House.

Mr. GARNER. The trouble with the gentleman from Massachusetts is that when this new member of the Federal Reserve Board gets the dirt washed off his hands he will not pay any attention to these recommendations unless they come from the gentleman from Massachusetts.

Mr. WALSH. Well, the gentleman from Texas may have recommendations to make for his constituents in the fall when they begin picking cranberries.

Mr. KINCHELOE. Mr. Chairman, will the gentleman yield?

Mr. McFADDEN. I am trying to get through and give time to gentlemen to whom I have promised time.

Mr. KINCHELOE. Will the gentleman yield?

Mr. McFADDEN. Yes.

Mr. KINCHELOE. The gentleman from Pennsylvania a moment ago seemed to refer to a statement there, showing by items where this money had been loaned, and to whom. Has the gentleman information as to how much was advanced to the Burley tobacco growers of Kentucky?

Mr. McFADDEN. I will state to the gentleman that the report I have here shows that in financing exports under that section there was financed for the tobacco interests $3,937,000, and in addition there were loans made through financial institutions for the financing of tobacco to the extent of $10,000,000 and there were other loans made through financial institutions of the different States, which I presume went indirectly in some part to financing tobacco.

Mr. KINCHELOE. I did not know the amount, but whatever the amount was that was loaned was paid back to the Government long before it became due.

Mr. MONDELL. Mr. Chairman, will the gentleman yield?

Mr. McFADDEN. Yes; I yield.

Mr. MONDELL. Following the line of inquiry and suggestion made by the gentleman from Texas [Mr. GARNER] it is a fact, as I understand it, that the Committee on Banking and Currency now has before it a number of suggestions of legislation purposed to give us a permanent system of stock and farm loans which will afford a longer period of credits than ordinary banking institutions furnish?

Mr. McFADDEN. The gentleman is correct. The Committee on Banking and Currency has before it and is considering now in hearings the so-called Anderson bill, which is the result of a report of the Joint Commission on the Agricultural Inquiry. It also has before it the bill of Representative STRONG of Kansas proposing to amend the Federal reserve act by providing long-term credits for farmers. The committee also has before it the bill I have introduced at the instance of the War Finance Corporation, or that of Mr. Meyer, the managing director, proposing a method whereby longer-time cattle paper can be financed. I will say to the gentleman that the committee is very carefully and seriously considering the very proposal that the gentleman from Texas [Mr. GARNER] suggests—that is, proper relief and better relief for the farmers on longer-term credits.

Mr. GARNER. What are the prospects of getting legislation of that character?

Mr. McFADDEN. I think they are very good, sir. There are other bills which I do not recall to mind now in connection with this same subject, and the committee is giving very careful attention to all of them. It is the intention of the committee at an early date to report out some very definite conclusions along this line for the benefit of the farmers of the country.

Mr. KNUTSON. Mr. Chairman, will the gentleman yield?

Mr. McFADDEN. Yes.

Mr. KNUTSON. The legislation that the gentleman mentions as being before the committee at the present time does not limit the loans to be made to cattle raisers, does it?

Mr. McFADDEN. One of the propositions does, but the Anderson bill provides for short-time credit for all agricultural production in general and marketing as well.

Mr. KNUTSON. When can we look for this bill to be reported out?

Mr. McFADDEN. I can not give the gentleman a definite date, but the committee is giving very careful consideration to these measures, and daily new suggestions are being made in the light of present-day events, which are very helpful.

Mr. MONDELL. Will the gentleman yield for a question?

Mr. McFADDEN. I will.

Mr. MONDELL. The extension of the War Finance Corporation is for the purpose of giving the country the very great benefit of the activities of that organization until such time as we may hope for permanent legislation covering the same class of credits and possibly a broader class of credits?

Mr. McFADDEN. That is the idea exactly. The committee are of the opinion that there should be relief to the agricultural interests, more relief than they are getting through the farm loan system and through the Federal reserve system, and they are imbued with the idea also that the continuance of the operations of the War Finance Corporation, which I said the other day "is the back door to the Treasury," should be discontinued, and that proper legislation should be enacted to give relief to the demands for short-time credit which lie in between the relief afforded by the Federal reserve system and the farm loan system, and permit the closing down of the operations of the War Finance Corporation in an orderly manner.

Mr. WALSH. Will the gentleman yield for a question?

Mr. McFADDEN. I will.

Mr. WALSH. If that is the case, why does not the gentleman report out those bills and not extend the life of the War Finance Corporation for another year?

Mr. McFADDEN. The gentleman is familiar with the parliamentary situation in another body, and knows how impossible it would be to get legislation of that kind through within six months.

Mr. WALSH. I do not know of the impossibility of putting through any legislation affecting agricultural interests. They are in control, and anything beneficial to them will receive consideration and go through. Now, if you are going to do that, why not do it instead of continuing the War Finance Corporation another year?

Mr. McFADDEN. I have said already that the committee have been assured that the operations of the War Finance Corporation will be tapered down and that as fast as the new facilities are available they will carry the load. Besides that the committee must have time to consider properly important legislation of this kind.

Mr. FESS. Will the gentleman yield for a question?

Mr. McFADDEN. I will.

Mr. FESS. When the matter was up for revival before I could not give my assent to it because I thought at the time that when it expired we would be asked to revive it again, and I have felt that it would likely become a permanent agency of the Government. I should like to know whether the judgment of the chairman of the committee is that it will not become a permanent agency of the Government?

Mr. McFADDEN. The gentleman has my opinion to that effect. I do not believe it will become a permanent agency of the Government. I think its operations should be discontinued at the end of this extension.

Mr. YOUNG. The gentleman means that the War Finance Corporation will not be lending the money of the Government, but that they will mobilize the credit of the farmers through the sale of bonds, and so forth, in such a way that there will not be any burden to speak of on the Treasury of the United States.

Mr. McFADDEN. The gentleman's statement is substantially correct.

Mr. WALSH. The gentleman means that the operations of the War Finance Corporation will not be permanent, but perpetual.

Mr. McFADDEN. That the War Finance Corporation will be the means of giving the farmer credit which he has not at the present time; and I am opposed to the perpetual continuance of this corporation and am assured that it will begin to wind up its affairs at the end of this extension.

Mr. TINCHER. Has the War Finance Corporation been any burden on the Treasury?

Mr. McFADDEN. It has to this extent, that the $500,000,000 capital which was the original capital of the institution has come from the Public Treasury.

Mr. TINCHER. That $500,000,000 capital was not for the farmer, not for agriculture. That was for business; but just as quick as we had an amendment to the law giving a little advantage to the men engaged in actual production, then it became a serious question whether its operations should be continued.

Mr. McFADDEN. Only about $60,000,000 was loaned to business under the original War Finance Corporation act. Since amended, it has been a great relief to the agricultural interests of the country.

Mr. TINCHER. That was only by an amendment put on last summer.

Mr. McFADDEN. A little over a year ago.

Mr. TINCHER. Now, I want to know if the country can not feel reasonably sure that this Congress will maintain in action the War Finance Corporation until such time as we can enact constructive legislation giving the men engaged in production something like equal treatment to what other business has from the banking institutions of this country?

Mr. McFADDEN. I believe the Banking and Currency Committee are impressed with the necessity of enacting proper legislation, as I have previously stated, to take care of the short-term credit needs of the country.

Mr. TINCHER. If it is for one year, it is all right, and if it is for 10 years it is all right; but the people engaged in production are entitled to the same banking facilities and advantages as those enjoyed by any other class of people.

Mr. WALSH. And they will never be put into bankruptcy either.

Mr. McFADDEN. Mr. Chairman, I reserve the balance of my time.

The CHAIRMAN. The gentleman from Pennsylvania has used 21 minutes.

Mr. WINGO was recognized.

Mr. WALSH rose.

The CHAIRMAN. For what purpose does the gentleman from Massachusetts rise?

Mr. WALSH. I was wondering how anybody opposed to the measure would go about it to get recognition.

The CHAIRMAN. By rising in his place, addressing the Chair, and saying that he is opposed to the bill.

Mr. WALSH. Mr. Chairman, I am opposed to the bill.

The CHAIRMAN. The gentleman from Arkansas [Mr. WINGO] has been recognized.

Mr. KNUTSON. Mr. Chairman, I would like to ask the gentleman from Arkansas if he is against the bill.

Mr. WINGO. Oh, the gentleman is not serious in asking that question. He has been here long enough to know that if there is anything for the benefit of the farmer in Minnesota or Arkansas, I am for it. [Applause.] Now, Mr. Chairman, I wish to use a few minutes and then yield to the gentleman from Mississippi [Mr. LOWREY], who wishes to discuss a nonpartisan subject. The situation presented by this bill is practical, and I hope you business men will not get the impression that the bill is not for American business as much as it is for agriculture. Every business man recognizes that the interests of American business is interwoven with the prosperity and interest of American agriculture. What does the bill propose to do? It proposes to continue the operation of the War Finance Corporation for an additional year. I hope the gentleman from Massachusetts and other gentlemen will give me their attention. Gentlemen will remember that when this bill was up before I made the statement then that the American farmers were not going to get as much direct benefit from it as some people would try to lead them to believe. I made the statement then, and I think it has been borne out by the subsequent action, that the greatest benefit would come to the banks in agricultural territory. In my candid judgment the operation of the War Finance Corporation has kept at least 300 or 400 country banks from failing.

Here is the practical side, in which you business men of New England are as much interested as the people of the agricultural States. Agriculture in the West and South suffered certain losses. The farmers owed their merchants or their local banks money, which represented the losses of these farmers during the last two years. Now, there is just one alternative that confronts you. If the banks or the merchants call these loans of the farmers and wipe them out, you will put these farmers into bankruptcy, and they would not realize enough to save the merchants from bankruptcy or to save the large number of small country banks from bankruptcy. So here is the practical business proposition—to permit the War Finance Corporation to continue operations for 12 months more, because by that time there will be enough losses absorbed so that the necessity for continued operation of the War Finance Corporation will cease to exist.

Now, every man who has studied the question, and I have talked with the business men, and business men have testified before our committee that you have got to take from three to five years to enable these people in the wheat and cotton belts to absorb the losses of the last two years. Are you going to carry them until they can work out the future earnings, so that in from three to five years they will absorb those losses? Some will absorb their losses in one year, but it will take in some cases three and in some five years. That is the cold-blooded business proposition. We have by the establishment of the Federal reserve system a magnificent system for short-time commercial credit. The gentleman from Massachusetts talks about populism. There is not a single bill pending before our committee, being seriously considered, in the way of short-time agricultural credit that contains any more populism than is in the present existing commercial credit law. It says that you business men through your bankers can take up short-time liquid commercial paper, and by rediscounting get gold demand obligations on the United States Treasury. If that is good business for the American business man, why is it populism when you propose to establish a more conservative system for American agriculture?

Why does the statesman from Cape Cod regard the established governmental paper money issuing system maintained for commercial needs as safe, sound, and statesmanlike and yet denounce as populism a proposal to establish a separate system to meet the credit needs of agriculture? Does the Government owe a special duty to commerce and industry, or does not the public welfare demand credit agencies of equal facilities for commerce, industry, and agriculture?

In the very nature of things a commercial demand deposit banking system can not take care of all the credits essential to the agriculturist and the cattle grower. The gentleman from Texas said it takes nine months at least. Every man who has studied the question knows that agriculture in America can not thrive unless it is given a stable, safe, sound credit agency that will take care of credits from 12 months to 3 years. The cattle growers out yonder in the West must have three years' credit in order to have the cattle business thrive and have it stabilized and make it profitable, in order that the American food supply may be built up instead of frozen out and destroyed. We have all got an interest in that.

Mr. SNYDER. Mr. Chairman, will the gentleman yield?

Mr. WINGO. Just let me finish this thought. You have an interest in that. We have provided credit agencies for short-term commercial credits. We owe the same duty to long-term personal agricultural credits, not simply to a class. We did not do that for the commercial business of the country because we wanted to help that class.

We did it because it was our duty to furnish from a public standpoint proper credit machinery in this country. We have furnished that to the commercial business of the country. It is in the interest of public welfare, the welfare of American business as well as American agriculture, to establish a safe, sane agency that will take care of the long-term personal credits of American agriculture, extending from one year to three years. There have been more banks in this country that have failed because the good-hearted banker violated the philosophy of demand-deposit banking and put out his deposits on long-term loans, so that he did not have funds to meet the demand obligation of the depositors, than for any other cause. That has caused the wreck of more commercial banks than anything else. If you establish that kind of system it will be as much for the benefit of the commercial banking system in this country as anything else, because it will leave that system free of long-term credits, and will stabilize both and add to the strength and prosperity of them. I now yield to the gentleman from New York.

Mr. SNYDER. The gentleman realizes, of course, when he speaks of short-term paper that is rediscounted, that one of the reasons for that short-term period is that it gives the banker the right to examine the credit occasionally. I agree with this extension and shall vote for it. I think the farmers should have the things that the gentleman speaks about, but too long credit in one transaction is not going to be beneficial to the farmer or anybody else.

Mr. WINGO. Oh, I must decline to yield further. If the gentleman knows anything about agriculture he knows that it can not thrive on any three months or six months paper.

Mr. SNYDER. I do know this: That it is much better for the bank and the Federal reserve system to have paper run for six months and nine months and then have it renewed than to have it run for two or three years.

Mr. WINGO. You are talking about one thing, I about another. We had to choose between two things. Will you permit the Federal reserve system to be continually loaded down with what they contend are frozen credits, or will you relieve that load and prevent the threatened bankruptcy of a lot of commercial banks? Not having established a short-term credit system for agriculture, personal credits, what did we do? We said that, as a matter of precaution, as a precaution to the commercial credit system of the country, we would establish this separate organization, the War Finance Corporation, that will ease off during this period and take care of that long-credit need until a complete agricultural system is established. It has been successful. The gentleman from Pennsylvania [Mr. McFADDEN] spoke truly when he said they are now refunding and liquidating rapidly. The cotton loans of Texas and Oklahoma have every one been liquidated, but there are other territories that are not so prosperous. Some farmers will take five years to absorb the loss. Some will absorb the loss this year and others will take two years, but in any event it is thought by those who are familiar with the operations of this corporation that if we give it another year that will relieve to some extent the load and give the greatest amount of relief. Most of the

relief has gone to the banks in agricultural States, and by loosening up and taking care of that class of paper it has enabled those commercial banks to take care of a greater amount of short-term paper.

As you know, I have continually urged the establishment of a separate system to meet the personal-credit needs of the farmers, and if you had done so there would have been no necessity for this legislation. But you simply have commissions and hearings and refuse to do what you should do and what I have insisted should be done; that is, establish a separate adequate system of personal farm credits. Failing in that, we Democrats unanimously support this legislation which Republican leaders have opposed.

I reserve the remainder of my time.

Mr. KNUTSON. Mr. Chairman, I ask unanimous consent to extend and revise my remarks in the RECORD.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. WALSH. Mr. Chairman, I am not favorably disposed toward this measure. I opposed it at the time it was originally passed. We are hearing a rehearsal and a rehash of many of the arguments advanced at that time as to why this should be revised. Now, it seems to me that with all of the facilities that have been created and set up in order to help the downtrodden farmer finance his operaions that they might well go along without carrying this instrumentality of the Government over for another year. Why, the other day we passed a bill which is going to make it very easy for anybody with high boots and overalls to arrange for loans through banks in the Federal reserve system. We provided that that board should have upon it a representative of the agricultural industry. We have also farm loan banks—joint-stock loan banks which are operating primarily for the benefit of the agriculturists. The gentleman from Arkansas [Mr. WINGO] would prefer rather than have loans made on short-term paper that the loans be extended over three years, during which period the credit of the farmer would gradually decrease, and at the end of that period Uncle Sam would be left standing at the gate holding the bag and whistling for the money. I have read the very eloquent and expressive speech of the gentleman from North Dakota [Mr. YOUNG], in which I find that the War Finance Corporation has loaned something like $341,000,000, of which some $21,000,000, or nearly 6 per cent, was loaned in the State of North Dakota, and that $15,000,000 of that was the first loan which was authorized to be made to the Equity Cooperative Exchange, the greatest cooperative organization in the United States, with over 23,000 farmer stockholders; and yet we have been told from time to time that there is no cooperation among the farmers, and, of course, I suppose that is true, except when it comes down to getting money loaned through Federal aid.

I have read with a thrill of pleasure and emotion I can not describe some of the commendations of various organizations out in the great agricultural reaches of the country upon the noble work accomplished by the distinguished gentleman from North Dakota, all of which I heartily indorse and trust that notwithstanding the character of the affiliations of some of the gentlemen who have burst into print in his behalf that he may, overcoming all obstacles, be permitted to retain his seat here in the House and continue his good work for these poor producers, who are practically the only people in the country to-day whose business is going along and increasing in the amount of production and also in other respects. I find that the Washington headquarters of the Farmers' National Council, which includes in its list of members the vice president of the National Non-Partisan League, has written a letter saying they are very prone to forget and ignore the work that is being done by Members of Congress for the farmers. How remarkable, Mr. Chairman, that these beneficiaries out there in his section of the country should forget that practically every day that the sun rises and sets a part of the money which they use in their work comes through Federal activities, and they remember the source of the money but forget the work of the gentlemen who have made it possible for them to secure this great aid. In some of these recommendations we find that the gentleman from South Dakota is a member of the farmers' bloc. Of course, the rules of the House will not permit me to refer to Members of the other branch. The Member of the other branch is referred to in this document as the head of the bloc. [Laughter.]

GEORGE M. YOUNG should be reelected to Congress because he is an important member of the farm bloc. We, of the great wheat State, agree with the Senator. And we believe YOUNG will be reelected by a greatly increased majority.

[Applause.]

Now, I assume the farmers of North Dakota will welcome the cooperation of a representative of the agricultural interests of Cape Cod and will not resent a few casual observations of that representative as to the activities of the gentleman from North Dakota along agricultural lines here upon this floor.

The main part of the speech is devoted to an explanation of this War Finance Corporation. The evident expectation of the gentleman from North Dakota is that even though this should be extended for another year it would not adequately meet the situation. He seems to bemoan the fact that if the War Finance Corporation were to cease operations at this time the large cash capital which it now has will be transferred into the general fund of the Treasury. What a misfortune that would be to the country at large that any amount of large cash capital now outstanding in the hands of any Government agency should be transferred to the Treasury. And later there would be increased difficulties in having such funds made the basis of a permanent farm credit system.

Evidently we are to hear later in the hearings before the Banking and Currency Committee of some plan whereby these three to six year credits can be extended, and Mr. Eugene Meyer can switch the funds now in possession of the War Finance Corporation into some other agency whereby they, together with other millions, can be available for long-time credits for the purpose of financing the sheep and cattle grower of the South and West.

The present law is temporary. While it has been criticized, there has also been quite general recognition of the fact that it has done much good, and all agree that there has been disappointment. If there has been disappointment, it has not been because of any lack of effort or lack of ability or lack of enthusiasm upon the part of the administrative board.

Mr. HERRICK. Will the gentleman yield?

Mr. WALSH. I trust the gentleman will not destroy the flow of my remarks.

Mr. HERRICK. I would like to ask the gentleman a short question.

Mr. WALSH. If the gentleman will permit me just a few moments more, I will let him insert his peroration in my remarks. He certainly ought to be satisfied with that. [Laughter.]

Mr. HERRICK. Just one short question.

Mr. WALSH. I will answer it a little later.

Mr. HERRICK. I would rather ask it now.

Mr. WALSH. I may not be able to answer it now.

Mr. HERRICK. I only wanted to ask this: The distinguished gentleman from Massachusetts seems to be terribly worried that a little assistance to those farmers out in the West and South is awfully populistic and paternalistic, and getting the Government in business, and so forth. I would like to ask the gentleman if, after due consideration, he can see anything more paternalistic or more populistic in this species of aid than he can in the proposition to extend Government aid in the form of a ship subsidy to his citizens back in New England and his constituents in particular back in Massachusetts? You ought to understand that we are hearing an awful lot about ship subsidy. Of course, these shipowners will be quite appreciative of the gentleman from Massachusetts for a ship subsidy. [Applause.]

Mr. WALSH. Well, I would like to say to the distinguished agriculturist and breeder of Hereford shorthorns and white-faced prize winners, that I believe that the aid rendered to shipping through subsidy is paternalistic and is keeping the Government in business; that we have been in business for a number of years through shipping and have squandered a good many millions of dollars.

Mr. HERRICK. I am extremely glad to hear the gentleman make that statement. I am hoping that when the ship subsidy bill is up he will be against it.

Mr. WALSH. We can all tell that the gentleman is glad. One glance at his radiant countenance can but tell how glad he is at the response of the "gentleman from Massachusetts."

Mr. Chairman, I doubt whether lending this form of assistance to the farmer is going to be for their best interests. If we get the agricultural sections of this country into the frame of mind that whenever misfortune threatens or whenever hard times approach, all they need to do is to make a demand and the Government will come to their aid, you will find that you will not have very many self-reliant and, in a few years, very many self-respecting farmers throughout the land. Why, the old pioneers that went forth and conquered the wilderness and built up the agricultural sections of this country were never given the benefit of the assistance which is proposed nowadays. They went out and conquered in spite of all obstacles. And I

believe the sooner we cease holding out to these people the idea that we will aid them because they are farmers and can call upon the Federal Congress for assistance, the better in the end it is going to be for them. That is the result of the formation of these class blocs, so to speak, in the Federal Congress, men who will vote for and who devote most of their energies to measures, many of which have not been properly considered, simply upon the ground that they will aid agriculture and increase production.

Now, I believe, particularly in view of the program which the gentleman from Pennsylvania, the chairman of the Committee on Banking and Currency, has outlined, as brought out by the question of the gentleman from Wyoming [Mr. MONDELL], the distinguished majority leader, which question was prompted by the suggestion of the gentleman from Texas [Mr. GARNER]—he who has in days gone by raised his voice to the high heavens in behalf of the Angora goat—I believe in view of that program, it were better if we went ahead with the proposition to provide long-time credits for the stock raisers and to permit longer credits to be established for the agricultural interests, and say to them that as long as that is allowed we proposed to enact it; and if it does not come until after the expiration of the War Finance Corporation, which expiration will probably come during the immediate summer, when the need for it will not be so great, it will be better for the farming interests, rather than to continue this for another year, because we all know that the oftener we extend the life of Federal boards and commissions, whether it be for a short time or for a long time, the more nearly we make those organizations and Federal activities permanent; and I believe that it is expected by some, particularly the beneficiaries in certain sections of the country, that this War Finance Corporation is going to become a permanent institution. I do not believe it ought to. I believe we should endeavor to withhold many of these activities which have been operating now and see if we can not let the farmer, as well as the other business of the country, go along relying upon his own resources. By doing that, with a little self-reliance, he will come out at the head of the procession in the end. For that reason I am opposed to continuing this War Finance Corporation another year. [Applause.]

Mr. Chairman, I reserve the balance of my time.

The CHAIRMAN. The gentleman from Massachusetts reserves the balance of his time.

Mr. McFADDEN. Mr. Chairman, I yield to the gentleman from North Dakota [Mr. YOUNG] such time as he desires.

The CHAIRMAN. The gentleman from North Dakota is recognized.

Mr. YOUNG. Mr. Chairman, it is true, as stated by the gentleman from Massachusetts [Mr. WALSH], that the War Finance Corporation loaned a large amount of money in North Dakota. The corporation undertook under the law to loan money where it was needed. We needed large sums of money, and I think, to the credit of the War Finance Corporation, we got them. But I will say this: Not a single dollar was loaned there without excellent security. The Government will take no losses on its North Dakota loans.

Now, as to the farm bloc, it is true we have a pretty well-defined group interested in seeing that justice is done to the great farm industry. And some of us think that that industry has been getting better and more fair attention. And if the proposals made by our farm group were not fair and just the Members of this House would not have adopted them.

Mr. Chairman, I am glad that this bill extending the life of the War Finance Corporation is to be passed this afternoon. As explained to the House when I spoke on this question before, perhaps the most important reason for extending the period within which the corporation may make loans is to keep intact its cash balances, so that whatever system of personal farm credits is hereafter adopted there will be sufficient money which can be diverted from the War Finance Corporation to start the new system fully equipped to take care of farm credits adequately.

If I were to criticize the bill introduced by Mr. ANDERSON it would be to suggest that the amount of cash capital proposed by him—$1,000,000 for each bank—is entirely too small to take care of the business which will doubtless be offered. In the plan proposed by Mr. ANDERSON, and in any plan yet suggested, and under the plan now being worked out by a committee of the farm bloc it is proposed that there shall be created a division or department of each Federal land bank to handle personal farm credits for the purpose of financing farm business where production requires from six months to three years, and to do this money is to be raised by the issuance of bonds secured by such farm paper.

Anyone who has given careful thought to this subject will agree that it will not be possible to handle such business to advantage and sell the bonds unless they are offered in comparatively large amounts, and the bonds can not be sold with security deposited for their payment until after the loans have been made and the money advanced. To do this each bank should have $7,500,000 capital to finance commodity farm production.

The United States Grain Corporation made profits amounting to $48,000,000. These profits were made entirely out of handling grain produced by farmers, and in all fairness belongs to them. Large profits have been and are now being made by the War Finance Corporation. I venture to say that the profits made by the United States Grain Corporation plus the profits made by the War Finance Corporation will be sufficient to adequately capitalize the proposed personal farm-credit division of each of the Federal land banks, and the entire original fund supplied by the Government to the War Finance Corporation can be returned to the general fund of the Treasury.

Mr. Chairman, I ask permission to revise and extend my remarks.

The CHAIRMAN. Is there objection to the request of the gentleman from North Dakota?

There was no objection.

Mr. WINGO. Mr. Chairman, I yield 10 minutes to the gentleman from Mississippi [Mr. LOWREY].

The CHAIRMAN. The gentleman from Mississippi is recognized for 10 minutes.

Mr. LOWREY. Mr. Chairman, I have not risen to discuss any measure now before this Congress. For more than a year now, since I have been privileged to take part in the deliberations of the House, we have heard in practically every utterance before us one constant monotone of "Trade."

There has been the constant jingle in our ears of dollars and cents. And I make no objection that such has been true. It has been necessary, for the people whom we represent have been laboring under terrible material need. Their loads have been heavy with tax, and have been heavier with more or less artificial conditions, which in many instances have taken from the money value of their raw products and have added to the cost of their bare necessities. It is not for me in the present instance to discuss whether or not our efforts here have availed anything, or why or how they have failed. Those things we have all discussed, and will discuss again. But certain it is that we could in no wise have discharged the duties pertinent to the office which we hold had we not for these months addressed ourselves very largely to matters of revenue and public expenditure, of debt and credit, and rate and trade.

But as I say, with your indulgence, Mr. Chairman, and with the indulgence of my fellow Members, I want to turn aside for these few minutes. I shall discuss, I believe, a matter of public policy no less pertinent to our office and, I venture, no less vital to our national welfare. Christ said to us that man should not live by bread alone. Nor shall a nation. Coequal with our national material consciousness we must have a national moral consciousness. We must have, and do have, a national character. That character, in the nation as well as in the individual, grows out of the past. "We are a part of all that we have met." In the nation, as in the individual, it is fatal to turn toward the past and to take our being in it. But it is equally fatal to face the future without a consciousness of the past. The man of character does not talk largely to the people he meets of the fires which have molded his character, but as he faces a new testing he has within himself faith and courage born out of the past. So the nation which parades over much its "glorious past" argues its own youthfulness. Nevertheless it does become us to speak on occasions of our national past and reverently to take counsel of it.

We have again reached Decoration Day. My mother bore me, Mr. Speaker, almost within earshot of the guns at Shiloh and Corinth. The first time I ever lay in my father's arms I lay against the Confederate gray. Until recent years Decoration Day meant little to me. My people, when they thought of it at all, thought of it as a day peculiarly given over to sectionalism. When they read addresses made in the National Capitol on that day they occasionally found, I am afraid, things which offended and wounded. When they read articles which came to them in national publications they sometimes put down their papers wondering whether there had been reunion or conquest. Needless to say, gentlemen, this feeling of separateness on our part, or on the part of any group of American citizens, constitutes a menace to the well-being of the Nation. It is a matter of urgent public policy to go about healing such a breach. And we, all of us, feel, I am sure, devoutly thankful that so great progress has been made.

A year ago—on the 5th of June—I had the honor to address the Confederate veterans of Washington on their memorial day at Arlington. By generous request of the gentleman from Tennessee [Mr. GARRETT] my address was published in the RECORD. With a definite purpose, I quote a few passages:

We are met—

I said—

in historic Arlington, made sacred by its consecration to be the resting place of thousands who have dedicated their lives to their country's cause.

Far be it from me on such an occasion to utter words that would stir sectional strife or arouse animosity of any kind. Yet to us of the South, Arlington is a place of peculiar consecration and peculiar sorrow. Linked with it indelibly in our minds and hearts is the name and silent glory of Robert E. Lee, who has been called "the most stainless of earthly commanders and, save in fortune, the greatest." A man who, in the words of Ben Hill, of Georgia, was—

"Cæsar without his ambition, Frederick without his tyranny, Napoleon without his selfishness, and Washington without his reward."

This immediate spot whereon we meet is made to us the holy of holies by the graves of hundreds of heroes of the "lost cause," mistakenly so called, and by the living benediction of this remnant of that army which, considering all its disadvantages and handicaps, fought a fight that will be the wonder and admiration of historians for all ages. The army of which a Union soldier who had followed Sherman against Joseph E. Johnson said:

"When you hear a northern man speak disparagingly of the southern soldiers you may know that he never came up against them. We who had to face that thin line of rebel gray knew that we were disputing with just about the best valor the world ever saw."

No, gentlemen of the old Confederacy, no man ever faced you and called you coward. They may through misunderstanding have thought your ideals perverted; they may through misinformation have believed your aims sordid; they may through inexperience have imagined you barbarians; but I find that they all, speaking as with authority, render you the homage of Rudyard Kipling, in paraphrase:

"He's a daisy, he's a ducky, he's a lamb,
He's a injia-rubber idiot on a spree.
He's the only thing that doesn't care a damn
For a regiment of Yankee Infantry.
So here's to you, rebel soldier, in your home in Dixie lan',
You're a poor benighted heathen, but a first-class fightin' man."

You were not rebels, you were not traitors; you were patriots, and American patriots. You fought for rights guaranteed to your fathers under an American compact. When that guaranty was erased by the sword and a "higher law," as they said, was written in its place, as Americans you accepted the decision.

You have been called upon to pay tribute to the valor of the North, and gladly you have paid it. As worthy foemen you have honored them; as honest foemen you have respected them; as reunited brethren you have worked with them; as comrades in arms your sons have shed a common blood under a common flag with theirs through two wars in common cause. For more than half a century your money has been added to theirs to pension the veterans of the Grand Army, against which you fought; to buy, beautify, and maintain Federal cemeteries from Gettysburg to Vicksburg; to erect monuments to their leaders.

Here in Arlington you are permitted to bury your dead; you have been permitted to raise your monuments. Yet you look here on the home of Robert E. Lee, kept not as the home of Lee but as a house of business and convenience, stripped of every vestige of its former glory.

Within the week the President of our Nation has declared of the North and South:

"There is no longer any sign of conflict. We are united in the sweetest concord that ever united men."

The Secretary of the Navy has said publicly in a southern city:

"I am a northerner, but first I am an American. You can not take from me my pride in Lee and Jackson and Pickett and your immortal Forrest."

This is nobly spoken. And if its leaders can speak thus, can not the Nation? Then let the names of Lee, of Jackson, of Stuart, of Forrest, of Semmes, and of Davis take their rightful places by the names of Grant, Thomas, Sheridan, Sherman, Farragut, and Lincoln. Is it reasonable to deny this simply because they lived south of the Mason-Dixon line; simply because they fought against the Government that kept its seat in Washington? Are there no precedents? Have you forgotten that the body of Cromwell was hanged at Tyburn, and that to-day the Island Kingdom is filled with statues to him, erected by a Government bearing the same name as that which he destroyed? Is there not echoing in your ears even now the voice of a Briton declaring the rebel Washington to be the "greatest Englishman"?

Let us teach the children of the Nation that American valor is American valor, wherever found. Let the home of Lee, as the home of Washington, be held sacred in the hearts of the people. Let it be kept in its original form and beauty, the peculiar care and treasure of the Daughters of the Confederacy, as Mount Vernon is kept by a band of noble women.

Then, indeed, will "we dwell together in the sweetest concord that ever united men." Then, indeed, will we be not northerners and southerners, but Americans. Then, indeed, will the blood of your young men at San Juan Hill, at Beleau Woods, and at the Argonne, shed under a common flag and in a common cause, have sealed our hearts with a bond eternal.

When this speech went out I received kind letters from friends North and South. One of the kindest was from the gentleman from California [Mr. OSBORNE], who has the distinction of being the one old Union soldier in this House. I take the liberty to quote a part of that letter.

The more inseparably we are cemented—

He said—

the greater will be our country. Nothing to that end should go undone. Much already has been done; perhaps all can not be done whilst we both live. But we may believe and fervently hope that some day it will be.

Not many days ago we heard a southern Democrat on this floor speak of General Grant, "Who was as generous as he was brave"; and we have witnessed under the very shadow of the Capitol the unveiling of the Grant Memorial, where the most striking tribute paid to the Union commander came from the present commander of the United Confederate Veterans.

Why should it not be so? Men who are gallant enough to fight as these men fought are usually generous enough to do each other justice when the fight is over. It is typical of the spirit of the Nation. The great objective to which we all are now striving is permanent world peace; and the eyes of the world are turned to America for leadership. If we are to lead the world to peace we must be at peace among ourselves.

Twenty-five years ago I came to Washington, as people do occasionally, with a party of sightseers—about 100 persons, all of them southerners. Most of them were on their first visit to Washington. I noted with grief, and yet with approval, their expressions of disappointment that in and around the splendid residence of Robert E. Lee there was not one thing to remind us by atmosphere that this was once his home. There mingled into our party a stalwart New Englander who had come to visit the grave of his father. As he heard these expressions from my southern friends he quietly remarked, "I don't blame them. I should feel that way myself."

From that day to this I have had a growing conviction that this thing ought to be changed, and that one day it would be changed. There is reason enough in the man, Lee, himself for the change. "His enemies themselves being judges," he stands as one of the purest and gentlest and at the same time one of the most brilliant and heroic men in American history.

I need not argue other reasons. They are obvious. The loyalty of the South is established—sealed with the blood of her sons. Before the secession she had given largely to the building of the Nation. Since the reunion she has given just as generously. I would not say that she has come back to the Nation conquered, because in her attitude toward the Government she has exhibited none of the animus of the defeated and none of the sniveling of the cowed. I do not know another case in history where a people have mastered themselves with the strength and poise of their own character as hers have. In Europe—and I mean no reflection—such a situation as existed at the close of the Civil War in this country would have been the breeding for a score of wars and provincial hatreds to a dozen generations. The South has come back with head erect and eyes unafraid, having fought to her last energy for a principle which she considered vital, but accepting the verdict of battle with good grace and honest courage.

As my good friend, Mr. OSBORNE, agreed in the letter to which I have referred, we each fought as Americans for what we believed to be American rights, and the valor of both sides is a heritage to all Americans.

If this brotherhood does exist in our hearts it is certainly reasonable to expect that it be given material expression and that we make haste to remove such material conditions as exist in contradiction to it.

May I make this suggestion? What would have been the reaction in the minds and hearts of most of the gentlemen here had the South opposed the erection of the Grant or the Lincoln Memorial? And who did not feel a thrill of gratitude and joy when the South so wholeheartedly entered into the dedication of those memorials? We do not offer the erection of a memorial. We simply offer the proper preservation of one. Is it fitting that any should oppose? There has "come to the kingdom for such a time as this" an advocate of the Lee memorial who is greater than I, one who is peculiarly fitted for the work and who is in position to promote it more effectively and more gracefully, I am sure, than any of us here. She is a woman, a Virginian by birth and a New Englander by parentage, a woman of broad culture and large ability, a writer of distinction, the wife of a New England Senator. By birth and lineage and by ability and social position she is equipped to influence the people North and South. I refer to Mrs. Frances Parkinson Keyes.

At Richmond, Va., and elsewhere she has eloquently advocated the proper maintenance of the Arlington Mansion through the agency of the United Daughters of the Confederacy. Through her charming "Letters from a Senator's wife," published in Good Housekeeping, she has aroused the interest of people over the entire country, and by her personal efforts here in Washington she has gained assurance of support. In due time, when preliminaries have been properly arranged, we hope to see proceedings instituted which will give the United Daughters of the Confederacy proper authority for restoring the home of Lee and for saving it to his memory as Mount Vernon has

been restored and maintained to the memory of Washington. To that end I bespeak the cooperation and support of Members of this House and of Americans everywhere. [Applause.]

Mr. Chairman, I ask unanimous consent to revise and extend my remarks in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. WALSH. Mr. Chairman, I desire to yield the balance of my time to my colleague, Mr. LUCE. I think I have 42 minutes.

The CHAIRMAN. The gentleman from Massachusetts yields 42 minutes to his colleage [Mr. LUCE].

Mr. McFADDEN. Mr. Chairman, how much time have I remaining?

The CHAIRMAN. The gentleman from Pennsylvania has 37 minutes remaining.

Mr. McFADDEN. I ask unanimous consent, Mr. Chairman, to revise and extend my remarks.

The CHAIRMAN. The gentleman from Pennsylvania asks unanimous consent to revise and extend his remarks. Is there objection?

There was no objection.

Mr. McFADDEN. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. CAMPBELL of Kansas, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having under consideration the bill (S. 2775) to extend for one year the powers of the War Finance Corporation to make advances under the provisions of the act entitled "An act to amend the War Finance Corporation act, approved April 5, 1918, as amended, to provide relief for producers of and dealers in agricultural products, and for other purposes," approved August 24, 1921, had come to no resolution thereon.

LEAVE OF ABSENCE.

Mr. WALSH, by unanimous consent, was granted leave of absence, for one day, on account of business.

ADJOURNMENT.

Mr. McFADDEN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 22 minutes p. m.) the House adjourned until to-morrow, Saturday, June 3, 1922, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

621. Under clause 2 of Rule XXIV, a letter from the Secretary of War, transmitting copy of a cablegram received from Hon. C. M. Cotterman, president of the American Chamber of Commerce of the Philippine Islands, was taken from the Speaker's table and referred to the Committee on Insular Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. BARKLEY: Committee on Interstate and Foreign Commerce. H. R. 11477. A bill granting the consent of Congress to the Freeburn Toll Bridge Co. to construct a bridge across the Tug Fork of the Big Sandy River, in Pike County, Ky.; without amendment (Rept. No. 1056). Referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. VINSON: Committee on Naval Affairs. H. R. 10555. A bill for the relief of Russell Wilmer Johnson; with an amendment (Rept. No. 1057). Referred to the Committee of the Whole House.

Mr. KRAUS: Committee on Naval Affairs. H. R. 968. A bill to change the retired status of Chief Pay Clerk R. E. Ames, United States Navy, retired; with an amendment (Rept. No. 1058). Referred to the Committee of the Whole House.

Mr. STEPHENS: Committee on Naval Affairs. H. R. 9081. A bill to reimburse certain persons for loss of private funds while they were patients at the United States Naval Hospital, Naval Operating Base, Hampton Roads, Va.; without amendment (Rept. No. 1059). Referred to the Committee of the Whole House.

Mr. PATTERSON of New Jersey: Committee on Naval Affairs. H. R. 8683. A bill for the relief of John F. O'Neil; without amendment (Rept. No. 1060). Referred to the Committee of the Whole House.

Mr. McCORMICK: Committee on the Public Lands. S. 2004. An act for the relief of the First International Bank of Sweetgrass, Mont.; without amendment (Rept. No. 1061). Referred to the Committee of the Whole House.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Interstate and Foreign Commerce was discharged from the consideration of the bill (H. R. 11740) providing for a preliminary examination of the Brazos River, Tex., with a view to the control of its floods, and the same was referred to the Committee on Flood Control.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. SNYDER: A bill (H. R. 11869) to authorize the sale of lands and plants not longer needed for Indian administrative or allotment purposes; to the Committee on Indian Affairs.

Also, a bill (H. R. 11870) to define the availability of a deficiency appropriation for support of Indian schools; to the Committee on Appropriations.

By Mr. TAYLOR of Colorado: A bill (H. R. 11871) for the further protection of homestead and desert-land entrymen of public lands where, subsequent to entry, the mineral deposits are embraced in permits or leases, or are otherwise disposed of; to the Committee on the Public Lands.

By Mr. DENISON: A bill (H. R. 11872) to amend sections 7, 8, and 9 of the Panama Canal act; to amend sections 288, 289, 342, 343, 368, and 461 of the Penal Code of the Canal Zone; and section 2 of the Executive order of July 9, 1914, establishing rules and regulations for the opening and navigation of the Panama Canal and approaches thereto, including all water under its jurisdiction; to amend section 6 of an act entitled "An act extending certain privileges of canal employees to other officials on the Canal Zone and authorizing the President to make rules and regulations affecting health, sanitation, quarantine, taxation, public roads, self-propelled vehicles, and police powers on the Canal Zone, and for other purposes, including provision as to certain fees, money orders, and interest deposits," approved August 21, 1916; and to regulate divorces in the Canal Zone, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. FISH: Resolution (H. Res. 360) for the immediate consideration of House Joint Resolution 322; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BOWLING: A bill (H. R. 11873) authorizing the Secretary of the Interior to sell and patent to George M. Bailey certain lands; to the Committee on the Public Lands.

By Mr. BRENNAN: A bill (H. R. 11874) for the relief of Kathleen Blackwell; to the Committee on Claims.

By Mr. BURTON: A bill (H. R. 11875) granting a pension to Alice L. Byers; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11876) for the relief of Margaret Moser; to the Committee on Claims.

By Mr. EDMONDS (by request): A bill (H. R. 11877) for the relief of the International Manufacturers' Sales Co. of America (Inc.); to the Committee on Claims.

By Mr. LANGLEY: A bill (H. R. 11878) granting an increase of pension to William T. Litteral; to the Committee on Invalid Pensions.

By Mr. RIDDICK: A bill (H. R. 11879) for the relief of Elizabeth McKeller; to the Committee on Claims.

By Mr. TAYLOR of New Jersey: A bill (H. R. 11880) granting a pension to Frances B. Eaton; to the Committee on Pensions.

By Mr. TAYLOR of Tennessee: A bill (H. R. 11881) granting a pension to Grant Brown; to the Committee on Pensions.

Also, a bill (H. R. 11882) granting a pension to Sarah Harris; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11883) granting a pension to Nancy D. Kitts; to the Committee on Pensions.

Also, a bill (H. R. 11884) granting a pension to Bennie Nelson; to the Committee on Pensions.

By Mr. WEBSTER: A bill (H. R. 11885) authorizing the issuance of patent to the Pioneer Educational Society and its successors for certain lands in the diminished Colville Indian Reservation, State of Washington; to the Committee on Indian Affairs.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

5868. By the SPEAKER (by request): Resolution adopted by the Cleveland Grays, urging the passage of House bill 11066, for the establishment, maintenance, and organization of a naval reserve; to the Committee on Naval Affairs.

5869. By Mr. DOWELL: Resolution adopted by the Presbytery of Indianola, Iowa, indorsing House Joint Resolution 131; to the Committee on the Judiciary.

5870. Also, resolution adopted by the Presbytery of Indianola, Iowa, indorsing Senate Joint Resolution 31; to the Committee on the Judiciary.

5871. Also, resolution adopted by the Presbytery of Indianola, Iowa, indorsing House bill 9753; to the Committee on the District of Columbia.

5872. By Mr. FROTHINGHAM: Resolution from the Sole Fasteners' Local, No. 111, Boot and Shoe Workers' Union, Brockton, Mass., asking that the Government of the United States recognize the present government of Russia, and establish trade relations therewith; to the Committee on Foreign Affairs.

5873. By Mr. GALLIVAN: Resolution adopted by the Boston Central Labor Union, Boston, Mass., urging an amendment to the Constitution of the United States granting to Congress the power to enact legislation to make uniform in the United States a child-labor law; to the Committee on the Judiciary.

5874. By Mr. GREENE of Vermont: Petition of Vermont State Baptist Convention indorsing House bill 9753, to secure Sunday as a day of rest in the District of Columbia; to the Committee on the District of Columbia.

5875. Also petition of Vermont State Baptist Convention, indorsing Senate Joint Resolution 31, proposing a constitutional amendment authorizing Congress to enact uniform laws on the subject of marriage and divorce; to the Committee on the Judiciary.

5876. Also, petition of Vermont State Baptist Convention, indorsing House Joint Resolution 131, proposing a constitutional amendment prohibiting polygamy and polygamous cohabitation in the United States; to the Committee on the Judiciary.

5877. By Mr. KISSEL: Petition of National Committee on American Japanese Relations, New York City, N. Y., as affected by the Washington conference; to the Committee on Foreign Affairs.

5878. Also, petition of the American Cotton Oil Co., New York City, N. Y., relative to the proposed duty on oriental vegetable oils; to the Committee on Ways and Means.

5879. By Mr. RAKER: Petition of Commercial Standards Council of New York, N. Y., indorsing and urging the passage of House bill 10159, to prohibit bribery and other corrupt trade practices; to the Committee on the Judiciary.

5880. Also, petition of the Pennzoil Co., of Los Angeles, Calif., protesting against any changes in the transportation act of 1920, as proposed by Senate bill 1150 and House bill 6861; to the Committee on Interstate and Foreign Commerce.

SENATE.

SATURDAY, *June 3, 1922.*

(Legislative day of Thursday, April 20, 1922.)

The Senate met at 11 o'clock a. m., on the expiration of the recess.

The VICE PRESIDENT. What is the pleasure of the Senate?

Mr. UNDERWOOD. I presume the Senator from North Dakota [Mr. MCCUMBER] desires to take up the tariff bill, and after it is laid before the Senate I shall suggest that we have a quorum.

Mr. SMOOT. The pending question is on the brick paragraph.

Mr. UNDERWOOD. But the bill was laid aside——

Mr. MCCUMBER. Temporarily.

Mr. UNDERWOOD. Yes; and it has to be laid before the Senate.

Mr. MCCUMBER. I ask that the bill be laid before the Senate.

The VICE PRESIDENT. The Chair lays before the Senate the unfinished business.

The READING CLERK. The bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

Mr. UNDERWOOD. Mr. President, I think we had better let the absent Senators know that the tariff bill is before the Senate again. So I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ball	Gooding	McNary	Sheppard
Borah	Hale	Moses	Simmons
Brandegee	Harris	Myers	Smith
Bursum	Harrison	Nelson	Smoot
Calder	Heflin	New	Spencer
Cameron	Johnson	Newberry	Stanley
Capper	Jones, Wash.	Nicholson	Sterling
Colt	Kellogg	Oddie	Townsend
Culberson	Ladd	Page	Underwood
Curtis	La Follette	Pepper	Wadsworth
Dial	Lenroot	Phipps	Walsh, Mont.
Dillingham	Lodge	Poindexter	Watson, Ga.
Ernst	McCumber	Pomerene	Watson, Ind.
France	McKinley	Rawson	Williams
Gerry	McLean	Robinson	Willis

Mr. UNDERWOOD. I was requested by the senior Senator from Florida [Mr. FLETCHER] to announce that he is unavoidably absent to-day on account of illness. I desire to have the announcement stand for the day.

Mr. MCKINLEY. I was requested to announce that the Senator from Nebraska [Mr. NORRIS], the Senator from New Hampshire [Mr. KEYES], and the Senator from Wyoming [Mr. KENDRICK] are absent at a meeting of the Committee on Agriculture and Forestry.

The VICE PRESIDENT. Sixty Senators have answered to their names. A quorum is present.

PETITIONS AND MEMORIALS.

Mr. CALDER. Mr. President, I am in receipt of certain resolutions adopted by the Central Republican Club, of New York City, calling the attention of the Senate to the failure of the Senate to enact the Dyer antilynching bill. The resolutions are signed by President Arthur B. Murtha and by Executive Member David B. Costuma. I move that the resolutions be referred to the Committee on the Judiciary.

The motion was agreed to.

Mr. CAPPER presented a resolution adopted by the Grade Teachers' Club, of Kansas City, Kans., favoring the enactment of legislation creating a department of education, which was referred to the Committee on Education and Labor.

Mr. RANSDELL. I present a resolution adopted by the Grand Chapter, Order Eastern Star, of Louisiana, dated May 11, of this year, memorializing Congress to pass promptly the Towner-Sterling educational bill. The resolution is very brief, and I ask unanimous consent that it may be printed in the RECORD and referred to the Committee on Education and Labor.

There being no objection, the resolution was referred to the Committee on Education and Labor and ordered to be printed in the RECORD, as follows:

ORDER OF THE EASTERN STAR, GRAND CHAPTER OF LOUISIANA,
New Orleans, La.

Resolutions adopted by Grand Chapter, Order of the Eastern Star, of Louisiana, May 11, 1922.

Whereas the safety of our country depends upon an intelligent electorate; and

Whereas our public schools are the foundation stone of our educational system; and

Whereas there is pending before the Congress of the United States what is called the Towner-Sterling bill in the interest of the public-school system of the country; and

Whereas the passage of the Towner-Sterling bill would be to the best interests of our beloved land: Therefore be it

Resolved, That the Grand Chapter of the Order of the Eastern Star of Louisiana, in annual convention assembled, do hereby strongly indorse the Towner-Sterling bill and urge that the Senators and Congressmen of Louisiana exert every effort for its passage at an early date; be it further

Resolved, That a copy of this resolution be forwarded to each United States Senator and Congressman from Louisiana, chairman of the Committee on Education of the House of Representatives and Senate at Washington, and to Congressman TOWNER and Senator STERLING.

Mr. BROUSSARD presented the following letter with an accompanying resolution, which were referred to the Committee on Education and Labor and ordered to be printed in the RECORD:

ORDER OF THE EASTERN STAR, GRAND CHAPTER OF LOUISIANA,
New Orleans, La., May 28, 1922.

Senator EDWIN S. BROUSSARD,
United States Senate, Washington.

MY DEAR SENATOR BROUSSARD: In keeping with instructions, I am inclosing herewith copy of resolution adopted at our recent meeting of the Grand Chapter, Order of the Eastern Star, at Lake Charles, with request that you introduce same in the CONGRESSIONAL RECORD.

Assuring you of our appreciation of any consideration you may give this matter, I am,

Yours very truly,

F. B. NELKEN, *Grand Secretary.*

ORDER OF THE EASTERN STAR, GRAND CHAPTER OF LOUISIANA,
New Orleans, La.

Resolutions adopted by Grand Chapter, Order of the Eastern Star, of Louisiana.

Whereas the safety of our country depends upon an intelligent electorate; and

Whereas our public schools are the foundation stone of our educational system; and

Whereas there is pending before the Congress of the United States what is called the Towner-Sterling bill in the interest of the public-school system of the country; and

Whereas the passage of the Towner-Sterling bill would be to the best interests of our beloved land: Therefore be it

Resolved, That the Grand Chapter of the Order of the Eastern Star of Louisiana in annual convention assembled do hereby strongly indorse the Towner-Sterling bill and urge that the Senators and Congressmen of Louisiana exert every effort for its passage at an early date; and be it further

Resolved, That copy of this resolution be forwarded to each United States Senator and Congressman from Louisiana, chairman of the Committee on Education of the House of Representatives and Senate at Washington, and to Congressman TOWNER and Senator STERLING.

REPORTS OF COMMITTEES.

Mr. SPENCER, from the Committee on Claims, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

A bill (S. 463) for the relief of Charles Hurst (Rept. No. 740); and

A bill (S. 3118) for the relief of Herbert E. Meilstrup (Rept. No. 741).

Mr. SPENCER, from the Committee on Claims, to which was referred the bill (H. R. 5918) for the relief of the Michigan Boulevard Building Co., reported it with an amendment and submitted a report (No. 742) thereon.

He also, from the same committee, to which was referred the bill (H. R. 5349) to amend the act authorizing the Secretary of the Navy to settle claims for damages to private property arising from collisions with naval vessels, reported it with amendments and submitted a report (No. 743) thereon.

Mr. SPENCER. In behalf of the Senator from Oklahoma [Mr. HARRELD] and in his name, I report back favorably without amendment from the Committee on Claims the bill (S. 3413) for the relief of the city of New York, and I submit a report (No. 744) thereon.

Mr. ROBINSON, from the Committee on Claims, to which was referred the bill (S. 2294) to confer jurisdiction upon the Court of Claims to ascertain the cost to the Alaska Commercial Co., a corporation, and the amount expended by it from November 5, 1920, to April 18, 1921, in repairing and rebuilding the wharf belonging to said company at Dutch Harbor, Alaska, which wharf was damaged and partially destroyed on or about November 5, 1920, through collision therewith of the United States steamship *Saturn*, United States Navy, and to render judgment therefor, reported it with amendments and submitted a report (No. 745) thereon.

Mr. WADSWORTH, from the Committee on Military Affairs, to which was referred the bill (S. 3630) to amend an act entitled "An act to amend an act entitled 'An act for making further and more effectual provision for the national defense, and for other purposes,' approved June 3, 1916, and to establish military justice," approved June 4, 1920, reported it without amendment and submitted a report (No. 746) thereon.

Mr. CALDER, from the Committee to Audit and Control the Contingent Expenses of the Senate, to which were referred the following resolutions, reported them each without amendment:

A resolution (S. Res. 294) amending Senate Resolution 282, directing the Secretary of the Interior to send to the Senate certain detailed information as to oil leases made by the department within naval oil reserves Nos. 1 and 2 in California and No. 3 in Wyoming, agreed to April 29, 1922; and

A resolution (S. Res. 295) amending Senate Resolution 292, directing the Committee on Manufactures to investigate and report to the Senate the conditions of the crude-oil and gasoline markets during the years 1920, 1921, and to date in 1922, agreed to April 20 (calendar day, May 13), 1922.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SHEPPARD:

A bill (S. 3674) authorizing the use of special canceling stamp in the post office at Cuero, Tex.; to the Committee on Post Offices and Post Roads.

By Mr. SPENCER:

A bill (S. 3675) granting the consent of Congress to the county courts of Howard and Saline Counties, in the State of Missouri, to construct a bridge across the Missouri River; to the Committee on Commerce.

ADDITIONAL SENATE EMPLOYEES.

Mr. FRANCE submitted the following resolution (S. Res. 299), which was read:

Resolved, That the Sergeant at Arms be, and he is hereby, authorized to employ such additional pages, doorkeepers, and attendants as he may deem necessary to relieve the present employees from excessive duties because of long hours due to night sessions and that the said additional employees be paid out of the contingent fund of the Senate.

Mr. FRANCE. If there is no objection, I should like to ask for the immediate consideration of the resolution.

Mr. JONES of Washington. I think it has to go to the Committee to Audit and Control the Contingent Expenses of the Senate. It proposes to make a payment out of the contingent fund.

The VICE PRESIDENT. The resolution will be referred to the Committee to Audit and Control the Contingent Expenses of the Senate.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. Overhue, its enrolling clerk, announced that the House had passed the bill (S. 539) to further amend an act entitled "An act to regulate commerce," approved February 4, 1887, as amended.

The message also announced that the House had passed a bill (H. R. 11345) authorizing the construction of a bridge across the Allegheny River at or near Freeport, Pa., in which it requested the concurrence of the Senate.

HOUSE BILL REFERRED.

The bill (H. R. 11345) authorizing the construction of a bridge across the Allegheny River at or near Freeport, Pa., was read twice by its title and referred to the Committee on Commerce.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

Mr. McCUMBER. If the Senator from Kentucky [Mr. STANLEY] is ready, I would like to return to paragraph 201, fire brick.

The VICE PRESIDENT. The pending amendment in that paragraph will be stated.

The READING CLERK. The pending amendment is the amendment offered by the senior Senator from Arkansas [Mr. ROBINSON] to the amendment of the senior Senator from North Dakota [Mr. McCUMBER].

The senior Senator from North Dakota has moved to strike out paragraph 201 and to insert a new paragraph 201 as follows:

PAR. 201. Bath brick, chrome brick, and fire brick, not specially provided for, 25 per cent ad valorem; magnesite brick, three-fourths of 1 cent per pound and 10 per cent ad valorem.

The senior Senator from Arkansas moves to strike out "25" before "per cent" and to insert "10."

Mr. STANLEY. Mr. President, the principle involved is much more vital than the duty imposed by the proposed Smoot amendment upon fire brick. We can not judge of the importance of this particular item by the duty imposed. It is highly illustrative, however, of the character of the bill. It furnishes a striking illustration of the fact that this proposed tariff measure is not founded upon any principle, either of free trade or of protection.

In a recent address on behalf of the fire-brick producers of the country the Senator from Idaho [Mr. GOODING] made an especial plea for the imposition of a duty upon brick produced in his State. In the course of that address he read a letter from J. B. Watson, of Troy, Idaho, the manager of the Idaho Fire Brick Co., in which that gentleman states his reason for seeking a duty upon fire brick. I ask unanimous consent to insert in the RECORD at this point that portion of the letter of Mr. Watson which was quoted by the Senator from Idaho.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

TROY, IDAHO, *April 3, 1922.*

Hon. F. R. GOODING,
United States Senate, Washington, D. C.

DEAR SENATOR: We believe the new tariff bill has passed the House of Congress and is now up for discussion in the House of Senators. We do not know whether the import tariff on imported fire brick has been increased from 10 per cent, as it was, or not. We earnestly ask yourself to use your best efforts to have this tariff increased from 10 per cent to 25 per cent.

We are selling very few brick in Everett, Seattle, Tacoma, or Portland. Any business we are getting is from inland points.

FACTS TO BE REMEMBERED.

Ocean freight rate from the Clyde River in Scotland and the Tyne River in England to Seattle and other Pacific coast ports is only a few cents more per ton than the railroad freights are from Troy, Idaho, or Spokane, Wash., to Seattle and other Pacific ports. Then, in Scotland a very great deal of the labor necessary in manufacturing the fire brick is done by females.

As to fire brick imported from Clayburn, British Columbia: The railroad freight, Clayburn to Seattle, is 17 cents and to Tacoma is 18 cents per hundredweight. Our rate to Seattle and Tacoma is 21½ cents per hundredweight, a difference of $3.15 to Seattle and $2.45 to Tacoma per 1,000 brick in favor of Clayburn, British Columbia. Besides this, this Clayburn company use cheap Hindu labor at their plant, and, further, on account of Hindu and Chinese labor in the coal mines, their coal is much cheaper in price than our coal is.

Again, the Canadian import tariff on fire brick, United States manufacture, is 22 per cent, with 2 per cent sales tax; total, 24½ per cent. * * *

Mr. STANLEY. After reading that letter the Senator from Idaho said:

So that is the condition the brickmakers in my State have to meet. The manufacturers in Canada employ Hindu labor not only in the brickyards but in the coal mines. Women laborers are employed in Scotland, and that is what the brick plants of the West must meet. The freight rate the foreigners have to pay is about the same or a little more than we have to pay in Idaho. That is the condition which confronts the two little manufacturing plants we have in our State, and that is the real issue before Congress and before the Senate to-day, whether we will fix a rate which will equalize the difference which exists in the costs of production of any product, whether it is brick or anything else, and give us a chance to work our factories. The other side is not even willing to give our citizens the same protection that Canada gives theirs as against the United States. It is a simple, plain story, but it presents the whole tariff question as to protection, and it will be found to apply to every industry and every case, if Senators on the other side will just take the time to make an honest investigation, instead of casting insults across the aisle to this side, talking about the bill having been framed behind closed doors in the interest of predatory wealth, in all of which they know there is no truth at all.

I gave up a great deal of time while this bill was being framed and saw a great deal of the efforts of the committee. No men ever worked harder than they did, and this is the best tariff bill that has ever been presented to Congress protecting the interests of this whole country.

After that address, and after the statement of the Senator from Idaho that we were not willing to give our own citizens the same protection that was given to citizens of Canada—and it is a fact that there is a 25 per cent ad valorem duty, including a sales tax, on brick imported into Canada, while there is none upon such exports—this schedule, as I understand, was reviewed by the official reviewers on the other side of the aisle and mutilated accordingly. They returned an amendment providing for free brick, with the exception of fire brick, magnesite brick, and two or three other peculiar kinds of brick, but embodying a modest and simple proviso that in the event any other country imposed a duty on brick we were to impose a like duty, a retaliatory duty, or, as the Senator from North Dakota [Mr. McCUMBER] calls it, a "countervailing" duty.

Mr. President, it is a fact that the only brick of any importance that is imported into this country comes from Canada, and, therefore, the proposed countervailing duty is nothing more nor less than a retaliatory duty upon such Canadian exports. The protection afforded is identically the same as if the committee had honestly and candidly imposed a 25 per cent duty on ordinary brick and the same duty upon fire brick.

Upon a superficial view, with no other item before us, it might be plausibly contended that if a 25 per cent duty is imposed on brick coming into Canada we should impose a 25 per cent duty upon brick which Canada exports to this country; but, Mr. President, this continual nagging at Canadian exports; this attempt to build a tariff wall along the Canadian border is the most indefensible, the most unwise, and the smallest piece of politics that was ever played by intelligent legislators. The future political economist or the future historian in reviewing the industrial progress of this country will pause either in pity or amazement at this effort to prevent reciprocal trade relations between Canada and the United States.

The same physical conditions exist in both countries. The Great Plains and the valley of the Mississippi extend across the Canadian border; the same mountain ranges run from Canada through the United States and that part of Canada which is industrially developed happens to be a narrow strip 400 miles wide and 4,000 miles long, producing, in the main, raw materials. This attempt of the United States to keep Douglas fir and pine and wool and metal, the raw materials of Canada, from the smelters and the mills and the factories of the United States has compelled the producers of raw materials in Canada to build a per capita mileage of railroads 300 per cent greater than in the United States, and has resulted in the development of mills in the eastern portion of Canada, in many instances, 3,000 miles from the seat of the production of the raw materials.

For the year ending June 30, 1920, we received from Canada in copper, precious metals, nickel, asbestos, lumber and timber, furs and fur skins, and pulp wood to a value of $253,089,155.

Mr. President, Senators on the other side may talk about a little countervailing duty against Canada, but by this bill it is proposed to impose a duty upon salt coming from Canada, whereas salt may be imported into Canada free. We are exporting annually to Canada from ten to fourteen million dollars' worth of corn, with no Canadian tariff on the commodity, whereas on the Canadian corn a duty is imposed. Potatoes and flour may be exported by us to Canada free upon condition that we grant a like privilege. Canada is to-day receiving free into her ports $23,921,938 worth of our tropical and semi-tropical fruits; she receives without any import duty nearly $27,000,000 worth of our cotton. Of corn, manufactured tobacco, electrical and gas apparatus, the latter of which enter Canada practically free, we shipped into Canada in 1920 nearly $40,000,000 worth. In addition to that, Canada takes our gasoline, peanut oil, soya beans, such brick as is not manufactured in Canada, iron ore, brass and copper scrap, nickel, wool, native hides, furs and skins, and they all enter Canada free, whereas we impose enormous duties against Canada. In spite and in face of the liberal policy pursued by Canada, it is proposed that we shall slap her in the face with a petty countervailing duty on a few wheelbarrow loads of bricks. It would have been infinitely better to have left your bill as it was than for the purposes of small politics to have taken this gratuitous slap at the Canadian Government.

Mr. President, let us look at this brick schedule a minute and see what is the necessity for this tax on brick. If a duty upon fire brick were of any material benefit, I should be, from personal or selfish reasons, the last to appear against it.

The fire-brick kilns of my own State in any one day in the year produce more fire brick than is produced in the State of Idaho in a year. The production of fire brick, upon which you place this heavy duty, is an important industry. It is a scientific industry. It is essential to the smelting of metals. It is an essential item in every home. The fire brick makes the backs of your stoves. It goes into your fireplaces, and the seconds and the less fine brick are peculiarly fitted, on account of their hardness, to the building of roads and the erection of public and private buildings of all kinds. As I stated once before upon the floor of the Senate, in the little town of New Cumberland, W. Va.—a town of three or four thousand inhabitants—where they have vast veins of fire clay, the streets are paved with fire brick, the houses are builded with it, and the tonnage from the little village of New Cumberland, where they have these vast brick industries, exceeds in weight the entire freight from the imperial city of Memphis.

These brick must be made scientifically. It is not a simple matter to make fire brick. It is not a question of a few ignorant laborers. These brick are made to stand three or four thousand degrees of heat. They are the component parts of one of the most wonderful and scientific of mechanisms. With the exception of the steam engine and various electrical devices, I know of nothing that has done more to make the United States the industrial master of the world than the perfection of the open-hearth furnace. Until this furnace was perfected all our steel had to be made in a Bessemer converter holding a few tons, operated at great cost, and using no other material than the Bessemer ore of the Mesabi Range, for the reason that all of the basic ores all over the United States were too high in phosphorus to make steel; they were used only for castings. With Schwab's perfection of the open-hearth furnace we produced a finer quality of basic steel than by the use of the Bessemer ore, and it made every single pound of ore in the United States immediately available for the highest purposes of fabricated steel, and every one of these open-hearth furnaces is made of fire brick. These fire brick stand only a few heats and then they must be torn down and builded over again.

Our exports of fire brick in the year 1920 amounted to $82,570,000 and our imports amounted to $4,200,225—twenty times as many fire brick exported as imported. In addition to that, we have put heavy duties upon the various widely scattered chemicals that go into these brick. It must be remembered that an ordinary rock, like serpentine, will fuse at 700 degrees. Limestone is put in the furnace because it melts more quickly than the ore; and yet by the careful and scientific selection of clays and chemicals ground up and mixed together a brick is produced which will withstand a heat of over 3,000 degrees and hold 5 or 6 tons of molten metal boiling like a caldron. The cheapness with which that furnace can be constructed is an essential element in the production of steel, and in the facility and cheapness with which we can make steel lies our hope of the future mastery of the iron markets of the world; and we first deliberately increase the cost of the production of steel by putting a duty upon fire brick, notwithstanding the fact that

we are exporting twenty times as many brick as we are importing, and why? Because a Senator of the United States must be placated.

Do Senators know that only $3,000 worth of brick is made in Idaho in a year? The total fire-brick production in Idaho, according to the census of 1920, was 100,165 brick, valued at $3,000; and in order to protect a shirt-tail full of fire brick in Idaho you place this incubus upon one of the key industries of the world! It is the first time that sane, sober, thoughtful legislators ever met and kept their faces straight while they attempted by legislative processes to construct a barrel around a bung hole.

There are a little over 100 people employed in making fire brick in Idaho, and in the United States as a whole there are thousands employed. My own State is fourth in the production of fire brick. We produce annually in Kentucky not 100,000 fire brick but 100,000,000 fire brick—110,259,000 fire brick, valued at $3,841,458. If fire brick needed this duty, do you suppose I would be up here making war upon fire brick? I do protest against increasing the cost of production of fire brick. I do protest against increasing the cost of every furnace in the United States and increasing the price of steel. I hold no brief for the Steel Trust, but I will be just, even to it. "For justice all places are a temple, and all seasons summer," and we can never take the duty off of fabricated steel while by unwise, half-baked legislation we increase the cost of its production.

Many political economists believe that but for the sharp competition for the control of the iron business of the world we would have had no World War, and but for our own incomprehensible stupidity in hampering, in weighting, and in manacling this giant of iron we could to-morrow rid this great industry of all the red tape and legislative shackles that impede its progress, we could to-morrow take the iron industry of the world, because none could approach us in production of fire brick as well as everything else entering into the production of iron and steel.

Oh, but says the Senator from Idaho, it costs more to make fire brick in this country. Hindus work in the coal mines in Scotland; and, of course, that would not amount to a row of pins if they did not make cheaper coal than we do here. What does it matter who works in coal mines in Scotland or at what they work if the coal in Scotland costs more than the coal in the United States? But they work Hindus in the coal mines in Scotland and they dig coal for less than our miners, and labor is an item in the cost of producing coal, and the cost of coal is an item in the production of fire brick in Scotland, and that is the house that Jack built.

Why, let us see the real cost of fire brick, if it ever is or ever was imported from Scotland. Now, remember, they state that they can make fire brick for $30 a ton in Idaho, and it is quoted at much less than that.

Mr. KING. Mr. President, before the Senator leaves the question of the production of coal, will he permit an interruption?

Mr. STANLEY. Certainly.

Mr. KING. I think the evidence conclusively shows that prior to the war we produced coal in the United States perhaps cheaper than it was produced at any other place in the world. The cost of a ton of coal at the tipple was approximately 97 cents to $1 a ton—cheaper than in Canada, cheaper than in New Brunswick, cheaper than in any of the British possessions to the north, and, as I recall, cheaper than in Scotland or in England, either.

Mr. STANLEY. Why, Mr. President, it is amusing to hear Senators talk about high-priced coal. I am amazed that any informed statesman should do it. Here is the trouble: Some fellow imagines that somebody is getting into his market, and he writes a letter, and he is my constituent, and I believe him. I honestly do believe that if some constituents would write and tell Members of Congress that they needed protection on the American Santa Claus they would demand a duty for the adequate protection of an "American Santa Claus."

Mr. President, as everybody knows, the only country in the world that exports coal to any degree and can produce coal cheaply enough to export it is Great Britain. The coal that is most available, that is high enough in carbon and low enough in ash, that has the quality of a steam coal, is found in Wales.

Just recently the English Government conducted an investigation of the cost of producing coal in Cardiff. They pay their miners, I will say to the genial Senator from Idaho, about half the wages we pay, and, therefore, of course, our coal industry is prostrate. In Scotland they pay still less, and Scotland would no more send coals to Newcastle now than it did a hundred years ago, when poets laughed about such a performance; and yet I read you from the testimony of Mr. William Alexander Lee, taken before the British Coal Commission. The British Government was investigating the lower cost of American coal in the markets of the world.

Question 1126. Mr. Evan Williams, a member of Parliament, to the witness:

You arrive at a c. i. f. price for South Wales coal in the Argentine of what?—A. Of about 91s. a ton.

Q. What is the American price f. o. b. and what is the freight?—A. The American price f. o. b. is 21s. and the freight, I understand, now stands 60s.

So that we can put a ton of coal to-day in Buenos Aires at 31s. a ton, 33⅓ per cent less than they can put it there from Wales and much less than what they can put it there from Scotland. Why is that? I read further:

1128. Q. Still at 60s.?—A. Yes. I have not heard of any reduction below 60s. That would make it 81s.

1131. Q. Mr. Evan Williams: Given an adequate supply of tonnage from the States, they can take from us in normal times, or at the present time, even with a considerable reduction in our price f. o. b., the whole of our South American trade?—A. Yes. It is purely a question of what rates the Americans can run their ships. The difference between the South Wales ports and South American ports is roughly the same as that between the American ports and the South American ports, and the Americans will have whatever margin there is between the cost of British coal and American coal f. o. b.

1161. Q. It was just a little in favor of England over the United States?—A. There was about 2s. 6d. in favor of England in freight, but the Americans had it in price.

1337. Q. Supposing pre-war prices, would there be the fear of American competition?—A. On pre-war prices there is a probability of severe American competition in both South America and in the Mediterranean.

To-day, give us the same cost per ton and we can take from the British miner, at from $1 to $1.50 less per ton, every market for coal in the western world, from the North Pole to Cape Horn, and we can take every port upon the Mediterranean. Nobody denies that except the Senator from Idaho, and he would not deny it if he had not read a fool letter from a fellow who was making $3,000 worth of brick out of a production of $53,000,000.

Let us follow to Boise, Idaho, this apocryphal ton of brick, made out of cheap Scotland coal which never existed. It could reach Idaho by several different ways. The average price of all fire brick in Idaho is $23 per 1,000. Suppose we start from Scotland. The ocean rate from Glasgow to New York is 25 shillings a ton, and reckoned at the $4.44 rate, it would be $5.50 a thousand, or $19.42 a ton laid down in New York. The rate from New York to Boise is $25.44 a thousand (3½ long tons), so that it would cost the Glasgow manufacturer $79.32 to ship a thousand of $23 brick to Idaho, if he went by that route.

Suppose he wanted to go by way of New Orleans. These figures I am about to read are official. It would cost him $73.92. Or he might get into Idaho by the Pacific Ocean, which seems to be lined with Chinese and cheap labor, and all sorts of horrible things. It would cost him, by way of Portland, only $102.63 to get a thousand of brick into Idaho—worth when it landed just $23—and if he came from Canada, it would cost him, shipped from Montreal, $74.59. More than that, you employed a tariff commission once. Why on earth you ever established a tariff commission I do not know. The worst enemy to such schedules as this is a tariff commission, or any other commission which can read and write. We did not need a tariff commission to tell us that you could not ship a thousand brick, weighing three or four tons and worth $23 when you started with it, any great distance without having the freight eat up the value of the brick.

In addition to that, fire clay almost invariably underlies coal, if the Senator from Idaho only knew it. Wherever you have a coal mine with fire clay under it, you can make the kind of brick you manufacture in Idaho. They use the great cutting machines to undercut the fire clay and throw it away in order to get the coal. So you can generally make fire brick wherever you have a coal mine. But you can not ship it over a hundred miles or two hundred miles, if it is ordinary fire brick, because the rate on the brick is more than the price of the brick, and some other fellow will set up a kiln at a coal mine and make fire brick more cheaply than you can ship it.

Mr. SIMMONS. Mr. President, it is suggested that a few thousand brick a year come in as ballast, and therefore we ought to put this duty on for the purpose of protecting against those few thousand ballast brick.

Mr. STANLEY. The committee has reported on that question. In this very same speech the Senator from Idaho states that ships loaded with fire brick come into Seattle and San Francisco after our grain. That would have been all very well if it had not been for the fact that in discussing the matter they accidentally put in some figures.

They say the wharves in Seattle are stacked with fire brick. Suppose they were. Suppose you had brick piled a mile high in

Seattle and San Francisco, you could hardly ship it across the street. You could not send it 50 miles. You could not break bulk and ship a thousand fire brick 100 miles from Seattle, 100 miles from San Francisco, 100 miles from Portland, Oreg., without paying more than $23, because it weighs several tons. Yet, as I will show further on in a few minutes, you are going to throw the cloak of protectionism about the most gigantic and soulless combination of convicted criminals who ever made a world houseless and homeless, in order that $3,000 worth of brick in Idaho may be protected from the cheap coal and the pauper labor of Scotland.

Mr. GOODING. Mr. President——

The PRESIDING OFFICER (Mr. SPENCER in the chair). Does the Senator from Kentucky yield to the Senator from Idaho?

Mr. STANLEY. Certainly.

Mr. GOODING. Did the Senator say there were 200 men employed in Idaho manufacturing fire brick?

Mr. STANLEY. About that.

Mr. GOODING. And they produce $3,000 worth of fire brick in a year?

Mr. STANLEY. Those are the figures.

Mr. GOODING. In a year?

Mr. STANLEY. Yes, sir. I will read the Senator what he himself said about it.

Mr. GOODING. I did not say anything about it.

Mr. STANLEY. Well, what your man said. Let us get the story of this diminutive and suffering industry. Talk about infant industries. This one has hardly learned to suck yet; it has not been worked. It is just born, but it is not dry. If it is, it is kiln dried. Let me see if I can find that speech in the mass of data I have here.

In this address they say it is a little bit of a suffering industry. I have the figures on it and will put them in the RECORD. It says there are less than 200 people employed in that concern.

Mr. POMERENE. Mr. President, the Senator means to limit that statement about the 200 people being employed in the industry to Idaho?

Mr. STANLEY. Yes; in these two little factories. They have but two brick kilns in Idaho, making $3,000 worth of bricks. We make $3,000 worth of bricks in one day in Kentucky. If this is going to hurt anybody, I am ruined.

Mr. POMERENE. If the Senator will permit me, I happen to come from the very center of the brick industry. There are brick companies galore in and about Canton and Cleveland and down along the Ohio River. I never heard of anybody suggesting a tariff on brick. The thing they have been complaining about is railroad rates, which cut them out of a large part of new markets. If there is one thing in the world that we can make in this country it is brick, and because of the freight rates nobody can compete with the brickmakers of Ohio. This must be one of the gold bricks that is being handed to the farmers.

Mr. STANLEY. Mr. President, there is but one bigger fool thing than a tariff on brick, and that would be a tariff on atmosphere—on hot air. In this letter to the Senator from Idaho, the writer says:

> There are two small plants producing fire brick located in my home county in Idaho, and these plants are competing with fire brick produced in Scotland, England, and elsewhere, where the wage conditions are not at all adequate for American labor.

Mr. President, I had to hunt for this fire brick in Idaho like hunting for a needle in a haystack. I sent down to the department and asked them to tell me about fire brick, and in the tabulated statement they sent me I could not find Idaho. I went back and said, "Is anyone producing fire brick in Idaho?" The man scratched his head and said, "Fire brick in Idaho?" I said, "Yes." He said, "We can't find it. It is not mentioned. It is negligible." I said, "Go back with your microscope and see if you can find it."

They came back and said, "It is discovered. It has never been brought to the attention of the experts before, but they do make $3,000 worth in a year." These are official figures from the department, which I will put into the RECORD.

Mr. President, what is the purpose of this duty on brick? The Senator from Arkansas read before this body a most remarkable statement from the Lockwood Committee. If the Senator from Idaho were given the New York market and ran his little kilns full tilt for a hundred years, he could hardly supply the demand of New York for brick for a week.

Mr. GOODING. Mr. President——

The PRESIDING OFFICER. Does the Senator from Kentucky yield to the Senator from Idaho?

Mr. STANLEY. Certainly.

Mr. GOODING. The Senator from Kentucky states very clearly the facts in connection with fire brick or any other brick. You can not ship them more than 200 miles over a railroad in this country and pay the freight rate, he said. I will say that usually the common brick, at least, can not be shipped over a hundred miles, though fire brick may be shipped farther, but not more than three or four or five hundred miles, and pay the freight rates on American railroads. I quite agree with the Senator in that. But I do not agree with him that a duty on fire brick, or on common brick, as far as that is concerned, will increase the price of brick to any man in the United States. The Senator had better be a little consistent in his argument.

Mr. STANLEY. I am more than consistent. I am candid. I am severely truthful. Of course, it does not increase the price to the consumer. Oh, Mr. President, we had a typical instance of that the other day when a little 10 per cent duty on cyanide was imposed. It just happens that cyanide is made by one corporation and used by another. A big trust makes cyanide and the great gold mines of the world consume it. So we had a fight between the great producers of gold and the great producers of cyanide, and from the other side of the Chamber we heard the helpless wails that this was a tax that could not be passed on. Why did you not tell the gold miner that the consumer did not pay the tax; that the importer paid the tax on cyanide? Why did you not tell him competition would settle it; that it did not matter if you put it on? But Senator after Senator rose and said as a matter of course this is a tax; said the Senator from South Dakota [Mr. STERLING] this is a tax, said the Senator from Nevada [Mr. ODDIE], the consumer must pay—and the Senator from South Dakota honors me by his attention—the consumer must pay it because you can not pass it on, the price of gold being fixed. If you admit the corporation must pay the tax, why does not the individual have to pay it, too? The minute you found that you had one tax that you could not pass on to the naked, helpless, silent, and undefended consumer, you turned about face and in the twinkling of an eye you took the thing off.

That is a poor argument. If the consumer does not pay it, and the importer pays it, it will come in anyway and the tax will not do you any good. If the importer does not pay it and the consumer pays it, there is every reason for my argument.

It is proposed to put a duty of 25 per cent on brick. There are $53,000,000 worth of fire brick produced in the United States. There are $82,000,000 worth of common brick produced. In the city of New York alone there are $488,000,000 worth of brick consumed in a year. Suppose you gave the Senator from Idaho the market, how long would it take him to supply it? The Senator from New York [Mr. CALDER] has introduced a memorial stating, among other things, that—

> There is a present shortage of housing accommodations of the cheaper class for about 400,000 people among the masses of the workers, all of which is set forth in detail in the accompanying report.
>
> * * * * * * *
>
> The committee now finds that there is a famine in the basic materials required in building construction, such as bricks, sand, lime, cement, etc. The supply of these materials has been restricted in many cases through the operation of these unlawful combinations and in other instances by reason of the phenomenal demand due to the increase of building activity that is essential to meet the emergency.
>
> The exactions of manufacturers and dealers in building materials due to this scarcity of supply have resulted in abnormal price increases, and in some instances in the inability to meet the demand on any terms. Manufacturers and dealers are either unable or unwilling to satisfy these demands upon a basis of reasonable prices over and above the actual cost. This situation prevails not only in the city of New York but in many of the cities throughout the country, and for the same reason. Unless corrected it threatens to paralyze the efforts to correct the present crisis.
>
> As illustrative of the extent to which oppression has been practiced by these combinations above referred to, it appears from the evidence that at a time when the price of building sand was abnormally high, largely as the result of a monopoly in the transportation facilities, a trans-Atlantic steamer of the Munson Line brought as ballast into the port of New York a cargo of high-class sand, which it endeavored to market. Because of the then existing combinations on the building-materials market, no dealer or builder dared buy the sand, although it was of high quality, was greatly needed, and could have been had for less than one-quarter of the price that was then being charged for a similar product. The steamship company was finally compelled, at considerable expense, to take the sand out to sea and there to dump it, because of the grip of this monopoly.
>
> * * * * * * *
>
> Unless this situation is corrected the continuance of these arrangements will materially interfere with the importation into this country of building materials, unless Congress will, in fixing the tariffs, make such reductions as will take into account the added cost of transportation, due to the fact that our Government is a party to combinations against which its antitrust laws are directed.
>
> The only immediate remedy in sight is to permit the prompt importation into this country of building materials of the classes that are now excluded through prohibitive tariffs, under cover of which the present

profiteering demands are being exacted. The added cost of freight upon such importations due to combinations between the steamship companies increases the burdens to that extent.

Think of this: These makers of brick, these producers of cement——

Mr. GOODING. Mr. President——

Mr. STANLEY. I yield to the Senator from Idaho.

Mr. GOODING. I hope the Senator will not confuse my statement on the small quantity of brick made in Idaho with the brick used in New York or any part of the country. It is a question of the territory we have been covering for a number of years, and we have lost a great deal of that market because of the shipment of brick there from Scotland and England and Canada, where they have cheaper freight rates than we have in Idaho, and are thus enabled to ship fire brick into our markets at Seattle and Tacoma.

The Senator is quite right when he says it could not affect prices more than 200 miles distant. I am sure he does not want to waste time by trying to make me out as saying we have had a chance to ship fire brick to New York and need a duty of 25 per cent. I do not think we can find any new market now with the duty, so far as that is concerned, but we want to hold our own market, and it will not affect the price of brick anywhere in the United States unless to the people of Seattle. It will give us our market, and we are entitled to it.

Mr. STANLEY. If they can ship brick from Scotland to Idaho, I do not see why they should not ship brick from Idaho to New York. But, be that as it may, of course I know they can not ship brick from Idaho to New York, but here is the vice of this "you tickle me and I tickle you" proposition. The Senator from Idaho must have protection on brick. You can not protect the brick of Idaho without protecting the brick of New York. The prices of brick in New York have gone up from $17 to $50 a thousand. When the price of brick in twenty-odd cities of the United States, from Boston to Los Angeles, ranged from $15 to $20 a thousand, a merciless gang of highbinders took by the throat the great city of New York, with 400,000 homeless people, an empire in itself, and are demanding 150 per cent profit on brick. Not only that, they are in close combination with the makers of cement and the producers of sand, and for these crimes they have been tried and convicted in the courts.

The price of brick in New York was raised to such an exorbitant price by this criminal conspiracy that it has overcome the hitherto impenetrable barrier of freight rates upon such a heavy commodity, and brick were about to be imported from Canada into New York. The people of New York, the houseless ones, with the sworn officers of the law, come here and out of the mouth of a Republican, not a Democratic, Congressman, and in the name of common justice and common decency they pray and plead with you and memorialize you not to put a duty of 25 per cent upon an essential commodity so necessary to the industrial life of the greatest metropolis in the world.

Your answer is, "We would like to do it, but the Senator from Idaho has $3,000 worth of fire brick and we must take care of a fellow Senator if New York goes to the ding-bowwows or industrially to the devil."

That is the absurdity, that is the wickedness, that is the assininity of imposing duties of this kind. I have taken the time of the Senate upon this schedule not on account of the size of the industry—considerable as it is—but because it is a startling instance not of protectionism gone mad but of protectionism gone demented. Senile and shameless, reduced to a point where it no longer realizes that the people of the United States, the intelligent electorate of America, if they do not condemn it for its crime, will spew it out of their mouths for its stupidity and its folly.

Mr. GOODING addressed the Senate. After having spoken for some time,

Mr. McNARY. Mr. President——

The PRESIDING OFFICER (Mr. SPENCER in the chair). Does the Senator from Idaho yield to the Senator from Oregon?

Mr. GOODING. I yield.

Mr. McNARY. The Senator from Idaho is making a most valuable contribution to this discussion. I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum is suggested. The Secretary will call the roll.

The roll was called, and the following Senators answered to their names:

Ashurst	Cameron	Curtis	Hale
Ball	Capper	Dillingham	Harris
Borah	Caraway	du Pont	Harrison
Brandegee	Colt	Ernst	Heflin
Bursum	Culberson	Gerry	Johnson
Calder	Cummins	Gooding	Jones, Wash.
Kellogg	McNary	Poindexter	Stanley
Kendrick	Moses	Pomerene	Sterling
Keyes	Nelson	Ransdell	Swanson
King	New	Rawson	Townsend
Ladd	Newberry	Robinson	Underwood
La Follette	Nicholson	Sheppard	Wadsworth
Lenroot	Norris	Shortridge	Walsh, Mont.
Lodge	Oddie	Simmons	Warren
McCumber	Page	Smith	Watson, Ga.
McKinley	Pepper	Smoot	Willis
McLean	Phipps	Spencer	

The PRESIDING OFFICER. Sixty-seven Senators having answered to their names, there is a quorum present.

EXTENSION OF NATIONAL BANK CHARTERS.

Mr. KING. Mr. President, will the Senator from Idaho yield to me?

Mr. GOODING. Yes; I yield.

Mr. KING. During my absence a day or two ago House bill 9527 extending the charters of national banks was called up and passed. I was opposed to that bill. I do not believe that it is wise or prudent to grant charters for 99 years. Of course, the bill as passed by the Senate was an improvement over the bill as passed by the House. I was entirely willing to support a measure granting charters to national banks for a period of 50 years. The distinguished Senator from Virginia [Mr. GLASS] and others who I thought shared the views which I entertained, I am now advised, had acceded to the Senate bill, and so far as I know now there are perhaps only two or three of us who are opposed to the bill. I do not feel like carrying the fight further, in view of that fact.

Mr. WATSON of Georgia. Mr. President——

Mr. KING. I yield.

Mr. WATSON of Georgia. I think I am right in saying that heretofore national banks have never asked for charters for longer than 20 years at a time. I think they have been renewed at 20-year periods heretofore.

Mr. KING. That is my recollection.

Mr. WATSON of Georgia. Then, why this perpetual charter, which is against the spirit of democratic institutions?

Mr. CALDER. Mr. President, if the Senator will permit me, the national banks of the country, through their organizations, have asked for perpetual charters, pointing out the fact that under our Federal reserve act they were given certain fiduciary powers; and also, in view of the fact that the State banks can come in under the Federal reserve act and have every right and privilege that a national bank has under the Federal reserve system, the national banks felt that they ought to have all the privileges accorded the State banks, and they think that they can not get the trust business that the State banks get unless they have perpetual charters.

As the Senator knows, the Committee on Banking and Currency examined every phase of that question; and in view of the opposition, particularly on the other side, they determined not to press the matter of perpetual charters, and therefor brought in an amendment to the House bill providing for 99-year charters. The bill has passed the House, the House has disagreed to our amendments, and the bill is back here from the House with a request for a conference.

Mr. WATSON or Georgia. But, Mr. President, there is no similarity between State banks and national banks. The State banks have no authority to issue notes to circulate as money. The national banks have; and the Democratic Party, if it has any record at all, is on record as eternally hostile to the issue of money by private institutions. That was the creed of Jefferson. That was the great fight that Jackson made. That subject takes up some of the most thrilling chapters in the autobiography of Martin Van Buren. I am amazed, Mr. President, that on the Democratic side no opposition is made to the renewal of these charters for any length of time, and certainly I am astonished that anybody should agree to renew the charters for so long a time as 50 years, when heretofore the banks themselves have only asked for 20.

Mr. KELLOGG. Mr. President, will the Senator yield?

Mr. GOODING. Mr. President——

Mr. KING. If the Senator from Idaho will indulge us for a few moments more, I shall be much obliged.

Mr. GOODING. I shall be very glad to yield, if it is only for a reasonable time.

Mr. KELLOGG. Of course, the issuing of circulating notes has nothing to do with the charters of banks. Congress has absolute control of that privilege, and can take it away at any time it sees fit. Congress can take away the charter of any national bank. Even if it is made a perpetual charter there is a reservation, and not only can Congress take it away but it can be revoked for a violation of any of the terms of the charter.

Mr. WATSON of Georgia. That has always been the case, Mr. President.

Mr. KELLOGG. That has always been the case. The question of whether a national bank should or should not issue notes to circulate as money, of course, is entirely in the hands of Congress, as is the question whether a charter shall be continuous or not. There is one object in not requiring the renewal of these charters every 20 years. It is a very expensive proceeding, while Congress has the absolute power at any time to take away the charters, to repeal the charters, or to amend the charters.

Mr. WATSON of Georgia. The Senator knows the strength of the plea that is made in favor of vested rights.

Mr. KELLOGG. I understand that, but the Senator will understand that there are 18 States already which grant perpetual charters.

Mr. CALDER. There are 21.

Mr. KELLOGG. And the number is increasing constantly. I submit there can be no particular object in requiring a bank to go to the expense of reorganizing and liquidating every 20 years.

Mr. WATSON of Georgia. Mr. President——

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Georgia?

Mr. GOODING. I do not think I shall yield any longer, unless the Senator from New York is compelled to go away.

Mr. CALDER. I am going to leave the Chamber in a few moments. The bill has passed. It is simply a question whether the Senator from Utah is disposed to withdraw his motion to reconsider the vote. The bill must become a law within a few weeks, or a great many banks will be compelled to liquidate.

Mr. WATSON of Georgia. If the Senator will examine the Statistical Abstract as to the profits paid by these banks, which are stupendous, I am sure he will agree that the expense of reorganization once in 20 years is a mere drop in the bucket.

Mr. KING. Mr. President, I share the views which have been expressed by the Senator from Georgia. This legislation is very obnoxious to me, and I am opposed to it. If I could defeat it I certainly should. However, with the limited opposition which I perceive exists—the Senator from Georgia and myself are, as far as I know, the only two opposed to it—I do not feel like pressing the fight, and therefore I was disposed to withdraw my motion to reconsider; but if the Senator from Georgia desires to discuss the matter further——

Mr. GOODING. I shall object to any further discussion of this matter.

Mr. WATSON of Georgia. I will not take any more time of the Senate.

Mr. KING. I shall not withdraw my motion to reconsider.

Mr. WATSON of Georgia. I hope the Senator will not withdraw his motion.

Mr. KING. I shall not withdraw it at this time.

Mr. CALDER. If the Senator from Idaho will yield further, and it is in order, I would like to make a point of order against the motion of the Senator from Utah. The Senator made his motion after the House had taken action on the bill. The bill had passed the Senate, gone to the other House, they had disagreed with the Senate amendments, and had asked for a conference. I submit that that action having been taken, the motion is not in order.

Mr. WATSON of Georgia. But the Senator from Idaho has the floor.

The PRESIDING OFFICER. The Senator from Idaho has the floor, and he has yielded to the Senator from New York.

Mr. WATSON of Georgia. Does that not take unanimous consent?

The PRESIDING OFFICER. Not for the Senator from Idaho to yield to the Senator from New York.

Mr. WATSON of Georgia. The question is not here now in regular order. Can the Senator bring it up without unanimous consent, or even with unanimous consent now?

Mr. KING. Mr. President, I suggest to the Senator from New York to let the matter go over until Monday.

Mr. CALDER. I submit that if the Senator proposes to insist upon his motion, and my point of order is not well taken, the papers must be returned to the other Chamber, their action in appointing conferees rescinded, and the bill returned to the Senate. We have only a week or two to dispose of this whole matter, and it is a subject of great inconvenience to the business interests of the country.

Mr. KING. I do not desire to hold this matter up, or to occasion any confusion or trouble to the banks, and that is why I suggested that if the Senator would let it go over until Monday we will join in requesting the chairman of the Committee on Finance to give us a little while on Monday morning to consider this.

Mr. KELLOGG. I suppose the Senator knows there is no general law for the extension of bank charters.

Mr. KING. I am familiar with that.

Mr. KELLOGG. And that they go out of business when their charters expire.

Mr. KING. I understand that.

The PRESIDING OFFICER. The Senator from Idaho [Mr. GOODING] is entitled to the floor.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

Mr. GOODING resumed and concluded his speech, which is entire as follows:

Mr. President, again let me say, I have not any quarrel with Senators on the other side of the aisle who believe that protection is unconstitutional and morally wrong. That is the issue before this body in this protective tariff measure to-day, whether we shall have on the one hand protection or on the other hand free trade. I think we have spent something like two days discussing the brick schedule and yet in their own argument they admit that it can not affect the price of brick more than 200 miles from the Canadian border, and I agree with them thoroughly so far as common brick are concerned. Yet they would have the American people believe that a 25 per cent ad valorem duty on brick would raise the price of brick to every man who is building a home in America.

That is what they are trying to do, to impress upon the American people that protection to an American industry and to American labor is robbery and an outrage. Believing as they do that it is unconstitutional they have the right to say that protection is a robbery. In this case where Canada gives a 25 per cent ad valorem duty and our brickmakers are denied that protection, they would continue the denial of that rate to American brickmakers. I say it is unfair, it is unjust, and it is un-American for any man to take an attitude that would destroy an industry in this country, I do not care how small it is, if it only employs 200 men a year. That principle is un-American, and I do not care from what party it comes.

It is true that British Columbia can manufacture brick and can put it into Tacoma and Seattle at a less freight rate than can be done from my State, and that they are monopolizing and taking that market. It is true that they are bringing brick as ballast from Scotland and selling it there and that brick are piled up on the wharves of Seattle at the present time. But it is a question of whether you are going to be as fair to your people as Canada is to her own people, and give them protection.

Of course, everybody knows, so far as a tariff on brick is concerned, or whether it is on the free list, that the price can not be affected in New York if there is a brickkiln within 100 miles of that city. They can not ship from Canada very far into the United States, nor can we ship into Canada very far. There may be exchanges of brick in different cities along the border, but that is about all there is of it. That is all it amounts to. But in order to destroy a great principle of government, you have fought this little brick protection for two long days with the hope that it will go out to the American people that this is an iniquitous measure, an infamous measure, conceived in corruption and behind closed doors, all of which you know is not true. That is your game. You are fighting your campaign right now, and unless somebody answers in behalf of the great principle of protection on this side, you will do very well when election time comes. There is no question about that. Unless somebody on this side of the aisle tells the truth to the American people and meets the accusations and false statements made on the other side, of course you will be ready to let the bill pass when you have sold it to the American people as a gold brick and a bunch of bunk—there is no question about that—and not until then. The Senator from Alabama [Mr. UNDERWOOD] has been more than fair in making his statement that when they tell the American people about this bill—and that means from the viewpoint of the free trader and the man who believes it is unconstitutional and morally wrong to have protection—then you are going to let it pass, and not until then. It is just as plain as if it were written on the walls what you intend to do.

In the great international bankers of this country who are internationalized to-day, who have lost their touch with the American people, who have been for more than a year accentuating the importance of foreign trade, you have a political ally of great power. All through the papers for more than a year they have been talking about our foreign trade. They have been doing more than that. They have had public speak-

ers all over America accentuating the importance of our foreign trade. I will agree that it is important, but we need not destroy our own industries, which I am going to show, too, before I get through, in order to have foreign trade.

Then, again, you have the importers, many of them great owners of department stores in this country, the Shylocks of America—do not forget that, and I will prove it before the bill is passed—the great Shylocks of America.

A thousand per cent is a common thing with them on goods produced by the pauper labor of Europe, which they bring in here and sell to the American people. They are supported by the great daily newspapers, of which the department stores are the best customers. Of course the Senator from Kentucky and his Democratic colleagues have a right to be encouraged, with all these great daily papers advocating their cause. In Detroit one department store paid to three Detroit newspapers last year $600,000 for advertising. The sum of $700,000,000 is paid yearly to the newspapers by the retail stores of this country, no small amount of it coming from the department houses, if you please. It is not strange that they say it is no time to pass a protective tariff measure. It never will be, so far as they are concerned.

Of course the Senator from Kentucky is not willing that we shall do for our brick manufacturers what Canada is doing for her brick manufacturers. It does not make any difference, as the Senator from Arkansas said the other evening, what Canada does. If the Democratic Party live up to their principles and follow the faith of their fathers, they have got to put bricks on the free list or impose a duty upon them that is not protective. That is the issue between us, and there is not any retreating from it, so far as I am concerned. That is the line I am going to follow in the discussion of the pending bill before the Senate.

I shall now undertake to conclude the remarks begun by me some days ago. I shall resume my discussion of tariffs in foreign countries. First let me refer to the tariff in Belgium. I find that on cocoa Belgium levies a tax of $7.80 per 100 pounds, and cocoa is a breakfast food. On coffee there is levied a tax of $2.60 per 100 pounds; on vegetables, tinned or bottled, $3.90 per 100 pounds; on cheese, $2.08 per 100 pounds; on apples, $8.63 per 100 pounds; on grapes, $7.77 per 100 pounds; on coconuts, 69 cents per 100 pounds; on prunes, $5.17 per 100 pounds; on dates, $2.76 per 100 pounds; on raisins, $1.73 per 100 pounds; on oats, 26 cents a bushel; on oat flour, 69 cents per 100 pounds; on vermicelli and macaroni, 69 cents per 100 pounds; on honey, $3.10 per 100 pounds; on soap, from $7.03 per 100 pounds to $15.53 per 100 pounds; on sugar, $1.52 per 100 pounds; on tobacco, from $5.17 to $10.40 per 100 pounds; on tobacco manufactured, $21.57 per 100 pounds; on dressed poultry, $10.34 per 100 pounds.

So we find that Belgium taxes the breakfast table. The United States levies the lightest tax on the breakfast table of any country in the world, and its tariff duties are the lowest of any country in the world, with the exception of China, and she has no right to fix her own duties and afford protection to her industries.

Of agricultural products and provisions the amount imported under the Payne-Aldrich law in 1912 was $34,146,822. At that time our population was 95,097,289, and they paid a per capita tax of 36 cents on agricultural products and provisions, with the exception of sugar. We collected a duty of $50,951,199 on sugar, a per capita tax of 53 cents. For the year 1912, under the Payne-Aldrich law, the total per capita tax collected on all agricultural products and provisions was 89 cents. The total customs receipts for that year were $311,321,672. So during that year the American people paid a per capita tax on everything they ate and everything they wore, including luxuries and everything else, amounting to the insignificant sum of $3.20 per capita. That was under that "robber" tariff bill—that "outrageous robbery" that was forced upon the American people by the Republican Party.

In 1914, on agricultural products and provisions imported into this country, we received a revenue amounting to $24,817,322. Our population at that time was estimated as being 97,297,515. Under the Underwood law the people paid a per capita tax on agricultural products, not including sugar, of 25 cents. During that year the revenue collected from sugar was $61,870,547; so that under the Underwood-Simmons law the per capita tax on sugar was 63 cents. The total revenue collected on all agricultural products for the year 1914 was $86,678,779, representing a tax of 88 cents per capita. The total customs receipts for that year were $283,718,081, representing a per capita tax in 1914, under the Underwood-Simmons law, of $2.85.

For the year 1920 we collected revenue on agricultural products and provisions, with the exception of sugar, of $24,521,305; and on sugar we collected revenues of $79,556,137. It appears, therefore, that the per capita tax on the American people on sugar for the year 1920 was 75 cents, and the American people paid a total per capita tax of 98 cents on all agricultural products and provisions, including sugar. The total customs receipts for that year were $325,645,565, representing a per capita tax under the Underwood-Simmons law of $3.01.

Under the emergency tariff bill it is estimated that in 1922, on agricultural products and provisions, not including sugar, there will be collected a revenue of $45,881,959, representing a per capita tax for agricultural products and provisions of 43 cents. On sugar it is estimated that we will collect a revenue of $103,979,805, or a per capita tax of 98 cents on sugar alone. For that year under the emergency tariff law the total amount of revenue from agricultural products of all kinds is estimated at $149,879,764, or a per capita tax of $1.41.

Mr. STANLEY. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Kentucky?

Mr. GOODING. I yield.

Mr. STANLEY. The Senator has questioned the authority for the statement made by me that there are about 200 wage earners making fire brick in Idaho. I am in receipt of a letter from the chief statistician for the Bureau of Manufactures of the Department of Commerce, dated May 19, 1922, in which he says, among other things—and I will incorporate the letter in the RECORD in the remarks which I have already made—

> These concerns manufacturing fire brick in Idaho employed an average number of 109 wage earners. I regret that it is impossible to separate the statistics for fire brick from those of other brick.

I placed the number too high. It is 109, instead of 200.

Mr. GOODING. Do the figures refer to those employed in making fire brick?

Mr. STANLEY. Yes; those employed in making fire brick.

Mr. GOODING. And the total value of their labor for a year was $3,000, according to the Senator's statement. Let that go in the RECORD with the Senator's statement, and let it stand. I am satisfied with it.

Mr. STANLEY. The statement as to $3,000 was from the census.

Mr. GOODING. Very well, let it go in the RECORD as the Senator's statement.

Mr. STANLEY. The census for manufactures for 1920 gives the value of $231,457 for every kind of brick in Idaho produced in Idaho.

Mr. GOODING. Mr. President, to resume my discussion where I was interrupted, under the Fordney-McCumber bill the revenue collected will be, it is estimated, $350,000,000. The American people will be asked to pay $1.45 per capita on agricultural products and provisions, including sugar; and they will be asked to pay on all commodities under a measure that gives protection to every American industry the stupendous sum of $3.29 per capita.

The United Kingdom in 1922 collected from her people, through her customhouses, $632,052,720, or nearly twice what will be collected from the American people under a protective tariff measure. With a population of 42,767,530, England collected a per capita tax, through her customhouses, of $14.78, as against $3.29 in America under the rates of the pending bill.

Why, we are nearer a free-trade country than any other country on earth. There is no question about it. Canada in 1922 collected a revenue of $104,420,451 from a population of 8,769,489, a per capita tax of $11.90. They are a protected country as compared to ours, and yet you would not give the American brickmakers where they are exposed to competition the same duty that Canada is willing to give to her citizens. You can not help it; you have to vote for free trade, and be against all protection; and I have no feeling about it as far as I am concerned.

France in 1921 collected a revenue through her customhouses of $360,880,770, with a population of 41,500,000, a per capita tax of $8.69.

Germany in 1922 collected through her customhouses $1,047,200,000, with a population of 62,000,000, a per capita tax of $16.89.

Argentina collected through her customhouses in 1920 a revenue of $70,526,398, with a population of 9,000,000, a per capita tax of $7.83 down in Argentina.

Mr. President, before this bill is passed our friends on the other side of the Chamber will be shedding tears for the laboring men of America, and I am sure they are going to be genuine tears, from the heart; but if they will take the time to ascer-

tain how light the burdens are here in America on the laboring man, who pays a smaller tax than any other laboring man in all the world, they can save their tears and shed them for other people in foreign countries. We will hear a good deal about the breakfast table, of course, when we come to farm products, which are necessities of life. Of course, the clothes you wear, everything you have in your home which is taxed under the Underwood law, are not necessities!

I have taken the four great articles of breakfast food used to determine the difference in taxes paid on tea, cocoa, coffee, and sugar in the different countries of the world as compared with America.

England places a duty of 24 cents a pound on tea and collects a revenue of $86,150,710, or $2 per capita, on tea alone. She places a rate of 10 cents a pound on cocoa, collects a revenue of $9,845,320, or 23 cents per capita, on cocoa, another breakfast table necessity in England and all over the world. England places a duty of 12 cents a pound on coffee and collects a revenue of $3,118,857, or a per capita tax of 7 cents. She places a duty of 6 cents a pound on sugar. She collects a revenue of $204,338,700, a per capita tax on sugar alone in England of $4.48 every year, at least that is what it was in 1921. These figures are for 1921.

The average daily wage for carpenters, bricklayers, machinists, plasterers, painters, and shoemakers in the United Kingdom at present is $3.08. The average for these trades in the United States is $7.17 a day in 45 of our great cities. If the American laborer were taxed in proportion to the earnings of the laborer of the United Kingdom he would be forced to pay a tax on foreign imports of $34.80 a year, while the per capita tax collected in England from her customhouses on foreign imports is $14.80.

France places a duty of $2.70 a hundred on tea, and she collects a revenue of $66,962,304, a per capita tax of $1.62. On coffee for the breakfast table she places a duty of 26 cents a pound. She collects a revenue of $37,719,648, a per capita tax of 90 cents, on coffee alone; while in America everything that goes on the breakfast table and on the dinner table, and everything the American eats, will carry a tax of but $1.45, as estimated, under the tariff bill that is before the Senate at the present time.

On those four articles France collects a revenue of $2.77 per capita per year. The average daily wage paid to carpenters, bricklayers, machinists, plasterers, painters, and shoemakers in France at the present time is $1.46. The average for those trades in the United States is $7.17. If the American laborer were taxed in proportion to the earnings of the laborer of France, he would be forced to pay a tax on foreign imports of $42.60 a year, as compared with $3.29 under a protective tariff measure which gives labor protection, and which gives every industry in America protection. Ah, yes; the American laborer has been robbed.

The average daily wage paid to carpenters, bricklayers, machinists, plasterers, painters, and shoemakers in Germany at the present time is the princely sum of 71 cents. I was unable to get the figures of the receipts from the different items—coffee, sugar, tea, and cocoa—in Germany, but they collect a total per capita tax of $16.89 from their people on foreign imports. If the American laborer were taxed in proportion to the earnings of the laborer in Germany he would be forced to pay a tax on foreign imports of $168.90 a year.

I shall next give the figures for Canada, right across the border, in whose favor the Senator from Kentucky is so keen to destroy the brick plants in this country, where they can be destroyed, along the line, from the fact that in Canada they have cheaper labor and cheaper freight rates in some cases. Canada places a tax on the breakfast table; on tea of 10 cents a pound.

Mr. STANLEY. Mr. President, does the Senator mean to say that the level of wages in Canada is lower than in the United States?

Mr. GOODING. Lower than in the United States on an average.

Mr. STANLEY. That is contrary to the information furnished by every investigation of every industry we have ever had brought to the attention of the Senate or the Congress, and I would like to have incorporated in my address statements which prove the contrary.

Mr. GOODING. My information is that they are quite considerably lower in Canada on an average, especially in the trades, than they are in this country. In Canada in the woods I know they are working 10 hours a day. I think the scale is the same, but in America they have an eight-hour day in the woods right along the border, and in Canada they employ Japs, Hindus, and that class of labor. The Pacific Northwest is the only place I know of where outdoor labor in the woods is given an 8-hour day.

Canada places a duty of 10 cents a pound on tea. She collects a revenue of $2,570,480, or a per capita tax on breakfast tea of 29 cents. She places a duty on coffee of 5 cents a pound. The per capita tax is 6 cents.

She places a duty on cocoa of 35 cents a pound, and collects a revenue of $184,355.72, or 2 cents per capita.

She places a duty on sugar of 2 cents a pound. She collects a revenue of $8,150,797.60, a per capita tax on sugar in Canada of 92 cents.

The total per capita tax on those four articles in Canada is $1.29. The total per capita tax in Canada on foreign imports is $11.90, compared with $3.29 estimated under the McCumber bill.

The Republican policy has always been never to place any tax on any articles not produced in this country unless they have a displacement value, unless they displace some product of this country. This is practically the only great country in the world that follows that policy. That is the principle of the Republican Party, only to put a tax, if you please to call it a tax—I am not willing to admit that it is a tax except to the foreigner, as he brings his imports into this country and pays his money into the customhouse in order to bring his goods in here to sell in our market. Every tax placed on every industry is placed there for the benefit of labor, without a single exception to the rule.

In 1912 we admitted free of duty foreign imports to the value of $861,512,987. That same year we admitted foreign imports to the value of $759,209,915 upon which duties were paid. So that 53 per cent of all imports passed the customhouse free of duty under the protective tariff act of 1909.

In 1920 we received in this country free of duty imports to the value of $3,113,948,338. That same year we received imports to the value of $1,985,865,155, upon which duties were paid. In 1921, 61 per cent of all our foreign imports passed our customhouse free of duty, a larger percentage both under protection and free trade passing the customhouse of this country free of duty than any other country on earth. Yet we are asked, How can Europe sell to us unless we open our ports and give them an opportunity to bring their products in free.

Our duties on the average are lower than those of any other country on earth. The receipts at the customhouse prove that beyond any question of doubt. I placed in the RECORD the other day a list of the articles that we buy from foreign countries upon which no duty is paid at all. Why, we buy 80 per cent of all the rubber of the world. We are the biggest buyers of raw silk in the world that comes in here free, and many other of the great commodities of the world are admitted here free. Yet the great importers of this country and the international bankers come pretty near making the American people believe that our ports are practically closed to the foreigners of the world, which is not true. The Fordney-McCumber bill reduces the free list from 6 to 8 per cent, so that no doubt, as in the past, more than 50 per cent of our imports will come into this country free of duty.

I regret that we have people of foreign birth in this country who are objecting to this Government levying duties on imports that come in from their native land. I can not understand a foreigner, who comes to America to make a home, being pro-English, pro-German, pro-French, pro-Italian, pro-anything but pro-American. Never since the beginning of time has there been such a Government as ours. Never since the beginning of time has the laboring man had such an opportunity as he has had in America. Under the protection of this great Government of ours, foreigners are coming to our shores, and are given an opportunity to enjoy privileges and liberties such as the nobility in their own native lands have never enjoyed. It is time, as Andrew Jackson said way back in 1824, that we become a little more Americanized.

I want to tell Senators on the other side of the Chamber that we have reached a milestone in the history of this country, a milestone in the history of the whole world, when the question comes to find employment not only for the people of America but for the people of the world. I do not know how we are going to go on being the great beacon light for humanity unless we protect our own people and keep them strong, hoping some day that the people of Europe, the poor people of Europe, will come up to our standards. But as long as I have strength I am not going to see our ports thrown wide open, as the Democratic Party would have done if they could, and will do if they can, to the cheap labor of all the world.

I never was in more deadly earnest in my life than I am over the great principle of protection. I believe it is responsible

for the American standard of living and wages and citizenship that have made us the supercountry of all the world and the greatest people that ever graced the footstool since the dawn of civilization. I sometimes wonder if there can be an American who, in the words of Sir Walter Scott, has not said:

Breathes there the man with soul so dead
Who never to himself hath said,
This is my own, my native land?
Whose heart hath ne'er within him burned,
As home his footsteps he hath turned
From wandering on a foreign strand?
If such there breathe, go, mark him well;
For him no minstrel raptures swell;
High though his titles, proud his name,
Boundless his wealth as wish can claim—
Despite those titles, power, and pelf,
The wretch, concentrated all in self,
Living, shall forfeit fair renown,
And, doubly dying, shall go down
To the vile dust from whence he sprung,
Unwept, unhonored, and unsung.

Mr. President, I ask permission to have inserted in the RECORD the tables to which I have referred.

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to is as follows:

Total and per capita revenue derived from imports in the countries named for the latest year for which the figures are available.

Country.	Year.	Total receipts.	Population.	Per capita.
United States	1921	$292,397,349	105,710,620	$2.76
United Kingdom	1922	632,052,720	42,767,530	14.78
Canada	1922	104,420,451	8,769,489	11.90
France	1921	360,880,770	41,500,000	8.69
Germany	1922	1,047,200,000	62,000,000	16.89
Argentine	1920	70,526,398	9,000,000	7.83
Chile	1920	52,377,367	3,870,023	13.53

Estimated total receipts under the McCumber bill, $350,000,000; estimated total per capita, $3.29.

All receipts converted into American money at par. The fiscal year in the United Kingdom, Canada, and Germany ends March 31. The receipts for Germany for 1922 are estimated.

Source of information: Bureau of Foreign and Domestic Commerce.

TARIFF OF BELGIUM.

Monetary unit, 1 franc equals 100 centimes or $0.192; metric system of weights and measures.

Article.	Unit.	Duty.
	Pounds.	
Butter	100	$1.73
Cocoa, prepared	100	7.80
Coffee, roasted	100	2.60
Vegetables, tinned or bottled	100	3.90
Cheese	100	2.08
Cream, for manufacture	(1)	0.08
Milk, for manufacture	(1)	.016
Almonds	100	3.00
Bananas	100	1.30
Lemons, oranges, figs	100	1.56
Apples	100	8.63
Grapes	100	7.77
Walnuts in shell	100	1.72
Walnuts, shelled	100	2.44
Coconuts	100	.69
Prunes	100	5.17
Dates	100	2.76
Raisins	100	1.73
Oats	(2)	.26
Oat flour	100	.69
Flour, all other	100	.17
Vermicelli, macaroni, etc	100	.69
Honey	100	3.10
Soap	100	1.03 to 15.53
Sugar	100	1.52
Tobacco	100	5.17 to 10.40
Tobacco, manufactured	100	21.57
Game, dead	100	5.17
Poultry, dead	100	10.34

[1] Gallon. [2] Bushel.

NOTE.—Duties converted at par.

GERMANY.

Population, 1922	62,000,000
Total customs receipts from imports, 1922	$1,047,200,000
Per capita total receipts	$16.89

The average daily wage paid to carpenters, bricklayers, machinists, plasterers, painters, and shoemakers of Germany at the present time is 71 cents a day. The average for these trades in the United States is $7.17. If the American laborers of this country were taxed in proportion to the earnings of the laborers of Germany, they would be forced to pay a tax on foreign imports of $168.90 a year.

FRANCE.

Revenue derived from duties on imports of tea, coffee, cocoa, and sugar into France for the fiscal year ended March 31, 1920.

Article.	Duty.	Receipts.	Per capita tax.
	Pound.		
Sugar	$0.027	$66,962,304	$1.62
Coffee	.26	37,719,648	.90
Cocoa	.26	9,549,412	.235
Tea	.35	672,384	.015
Total		114,903,748	2.77

Population, 1921	41,500,000
Total customs receipts from imports, 1921	$360,880,770
Per capita total receipts	$8.69

The average daily wage paid to carpenters, bricklayers, machinists, plasterers, painters, and shoemakers of France at the present time is $1.46 a day. The average for these trades in the United States is $7.17. If the American laborers of this country were taxed in proportion to the earnings of the laborers in France, they would be forced to pay a tax on foreign imports of $42.60 a year.

UNITED KINGDOM.

Revenue derived from duties on imports of tea, coffee, cocoa, and sugar into the United Kingdom for the fiscal year ended March 31, 1921.

Article.	Duty.	Receipts.	Per capita tax.
	Pound.		
Tea	$0.24	$86,150,710	$2.00
Cocoa	.10	9,854,512	.23
Coffee	.12	3,018,837	.07
Sugar	.05	204,338,700	4.48
Total		303,462,765	6.78

Population, 1922	42,767,530
Total customs receipts from imports, 1922	$632,052,720
Per capita total receipts	$14.78

The average daily wage paid to carpenters, bricklayers, machinists, plasterers, painters, and shoemakers of the United Kingdom at the present time is $3.08 a day. The average for these trades in the United States is $7.17. If the American laborers of this country were taxed in proportion to the earnings of the laborers of the United Kingdom, they would be forced to pay a tax on foreign imports of $34.30 a year.

CANADA.

Revenue derived from duties on imports of tea, coffee, cocoa, and sugar into Canada for the fiscal year ended March 31, 1921.

Article.	Duty.	Receipts.	Per capita tax.
Tea	10 cents per pound	$2,570,480.74	$0.29
Coffee	5 cents per pound	538,551.11	.06
Cocoa	35 per cent	184,355.72	.02
Sugar	2 cents per pound	8,150,797.60	.92
Total		11,444,185.17	1.29

Population, 1922, 8,769,489; total customs receipts from imports, 1922, $104,420,451; per capita total receipts, $11.90.

Revenue derived from duties levied on imports of agricultural products and provisions and on sugar under the Payne-Aldrich, Underwood-Simmons, and the emergency tariff laws.

Articles.	Import revenue, 1912 (Payne-Aldrich.)	Population.	Per capita tax.
Agricultural products and provisions	$34,146,871	95,097,298	$0.36
Sugar	50,951,199		.53
Total	85,098,070		.89

Total: Customs receipts, $311,321,672; per capita, $3.20.

Articles.	Import revenue, 1914 (Payne-Aldrich.)	Population.	Per capita tax.
Agricultural products and provisions	$24,817,322	97,297,515	$0.25
Sugar	61,870,457		.63
Total	86,678,779		.88

Total: Customs receipts, $283,718,081; per capita, $2.85.

CANADA—Continued.

Revenue derived from duties levied on imports, etc.—Continued.

Articles.	Import revenue 1920 (Underwood).	Population.	Per capita tax.
Agricultural products and provisions..	$24,521,305	106,418,175	$0.23
Sugar	79,536,137		.75
Total	104,057,442		.98

Total: Customs receipts, $325,645,565; per capita, $3.01.

Articles.	Emergency bill, year ending June, 1922, estimated.	Population.	Per capita tax.
Agricultural products and provisions..	$45,881,959		$0.43
Sugar	103,997,805		.98
Total	149,879,764		1.41

The estimated revenue to be derived from agricultural products and sugar under the McCumber bill is $1.45 per capita.

The estimated total receipts under the McCumber bill is $350,000,000, or $3.29 per capita.

ATTORNEY GENERAL DAUGHERTY.

Mr. STANLEY. Mr. President, thus far I have had nothing to say in the controversy in which the Attorney General of the United States has played a conspicuous part. It is a fact that men of his own party have made, deliberately made, grave and serious charges against the Hon. Harry M. Daugherty, of Ohio, and they have been made against him in his official capacity. On the floor of the House and of the Senate he has been repeatedly charged with offenses serious and revolting to every sense of honor and of patriotism.

Into the question of the truth or falsity of these charges I do not propose to enter in this brief digression from the tariff bill. There is, however, a phase of the situation which must be painful, if not humiliating, to every true and patriotic American citizen.

It is recalled that men who have laid aside the honors and the emoluments of the highest office save one the American people can confer, and have gone out to do and dare for their country, men of the same political faith as Mr. Daugherty, demand his impeachment. On the floor of the Senate still more serious charges are made.

No civilized country in the world, Mr. President, hesitates to shoot on sight a ghoul in time of war. Instant death awaits the wretch who invades a battle field to rifle the bodies of the defenseless dead. He who runs his cadaverous fingers through the unprotected pockets of a dead soldier is not more a ghoul than the dollar-a-year man who rifles the Treasury of his country in the hour of need and peril.

He has been charged by men of his own party with using his high office as a fence for unpenitentiaried profiteers.

It is said that a lion will turn and flee
From a maid in the pride of her purity.

It is charged here, Mr. President, that those who despoil the honor of women in time of peace or betray their country in time of war command the good offices of the Attorney General; that no crime, however vile or repulsive, has failed to command his services as a common pardon broker. I do not make these charges; I am simply reviewing them.

Is it possible that we, in this day of bureaucracy, have reached the point, Mr. President, when the mere vesting a man with high authority renders him immune from criticism, that the law of lese majeste applies to a Cabinet officer? Is it not the duty of the President of the United States to demand of his official family that they stand like men and meet every aspersion upon their official integrity and on their personal honor? To my utter amazement—I say it in all kindness; I say it in sorrow rather than in anger—we find the President of the United States at one hour commending the patience of Lincoln under every form of traduction and slander, recalling to your mind and to mine the amazing tolerance of the great father of Democracy. On one occasion a visitor from Germany, seeing a foul and vicious libel published in a paper lying upon his library table, said, "I would have the man executed; I would have him thrown into prison"; but Jefferson replied, "The best proof of the freedom of our institutions is that he is at large. Take this paper back and read it to your king, and tell him that the President thus permits the freedom of speech and of the press of the United States of America"; and in the next, after this glowing tribute to the magnamity of Lincoln, to my amazement—to my utter amazement—I behold this same President exerting the dread powers of his high office to stifle if not to muzzle the freedom of the press.

I quote from the Philadelphia Ledger, a Republican newspaper—and later I shall ask leave to incorporate the entire article in my remarks—

President Harding to-day took a two-fisted fling at "political blackguards"—

"Political blackguards!" Who are the "political blackguards" assailing the Attorney General? They are two Members of Congress, one of them, at least, and I think both, wore the uniform of a soldier, and eminent Senators, representing sovereign States, ambassadors from two proud Commonwealths. Is it possible that the once genial, self-poised, courteous gentleman, occupying the White House could so far forget himself, in his desperate attempt to save a man who dares not shield himself; to speak for a man who dares not speak for himself? It is true. This Republican Party for the first time in nearly a hundred years to-day sees charge after charge hurled into the teeth of the chief law officer of the United States, and yet there are "none so poor to do him reverence," remembering the pathetic end of the Senator from Indiana [Mr. WATSON], they dare not speak in his defense, lest his subsequent confessions shall shame them. Will the President in his desperation, finding no other who dare to say a word for this discredited official, denounce as blackguards Senators who criticize the nefarious operations of a pardon broker who makes it a business, as it is charged at least, to deceive the Chief Magistrate of the United States in order that men may despoil women in time of peace and plunder the Treasury in time of war, and if one dares express his abhorrence of these unclean and abominable offenses he is a rascal and a blackguard?

It is said further by the Philadelphia Ledger:

Mr. Harding bitterly resents any such imputations against executive officers of the Government.

Executive officers of the Government!

He appears to resent no less the space given in newspapers "to the blackguarding of any rascal who gets up and makes charges."

In the President's view newspapermen and newspapers perform a public service by "putting on the brakes."

Think of it! The President of the United States has the power to make and unmake men. The Attorney General to-day, in a public interview, admonishes those who are seeking high judicial offices that some time ago the President agreed "with me" that in naming judges they ought to consult "us"—Harry M. Daugherty and Warren G. Harding, the President of the United States. Twenty-four judges are shortly to be named, and "You must consult us." That is given to the public. Why? As a notice to all who seek a place upon the bench, "Do not say anything about Daugherty, because Daugherty shadows the Representatives and Senators; Daugherty's sleuths are charged with framing up important witnesses, and Daugherty is not very apt to give his consent." "Us" will not consent to the naming of a judge who says anything about "us."

O God of battles and of war, is it possible? It is enough to send a shudder through the bronze heart of the Goddess of Liberty, now adorning the lofty dome of this Capitol.

Is the ermine to be besmirched by all the filth that now distains and dishonors the Department of Justice? And does the President mean to announce to the world that Daugherty must be consulted before he will name a judge, and that a Senator or a Representative is a rascal or a blackguard who dares assail him?

Then the President says the brakes must be put on the press. I say to the President of the United States this is not Austria; this is not Prussia; this is once free America. "Putting on the brakes" is the next thing to putting on a muzzle, and the statement is an implied threat to the press. Not the President nor Congress nor Senators nor judges shall shackle or abridge the freedom of the press in the United States while the first amendment of the Constitution is intact and there are men of wisdom and courage ready to defend and maintain it.

I ask permission to incorporate in the RECORD the article from the Philadelphia Ledger, to which I have referred, and also an article from the New York Tribune of to-day's issue, both orthodox Republican papers.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The articles referred to are as follows:

[From the Philadelphia Public Ledger of June 3, 1922.]

HARDING ASSAILS PUBLIC "SCOLDS"—PRESIDENT'S FLING AT TRADUCERS SEEN AS ATTACK ON CRITICS OF DAUGHERTY AND HOOVER—DEPLORES SENSATIONALISM—"POLITICAL BLACKGUARDS" GET TOO MUCH SPACE IN SOME NEWSPAPERS, HE BELIEVES.

(By Frederic William Wile. Copyright, 1922, by Public Ledger Co.)

PUBLIC LEDGER BUREAU,
Washington, June 2.

President Harding to-day took a two-fisted fling at "political blackguards" who assail members of his administration. No names were mentioned, but it was the general impression that recent attacks on

Attorney General Daugherty and Secretary Hoover were in the President's mind.

Efforts to induce him to discuss the Daugherty case were futile. Mr. Harding indicated he did not feel called upon to dignify by any utterance of his own the accusations now raging around Mr. Daugherty's name in and out of Congress. Instead, the President expressed himself forcefully regarding that section of the American press which advertises the "outgivings of unknowing, unthinking, and unheeding men."

His observations were in the nature of an appeal to newspapers to eschew "sensational" exploitations of men who utilize their positions to "traduce" faithful public servants.

The President's observations, while evoked by an inquiry designed to secure an expression of the Daugherty affair, did not refer exclusively to it. They were called forth in part by the recent uncouth attacks on Herbert Hoover by Senator WATSON, Democrat, of Georgia. Mr. WATSON a few days ago attacked the Secretary of Commerce in relation to Russian relief funds. Mr. Harding bitterly resents any such imputations against executive officers of the Government. He appears to resent no less the space given in newspapers "to the blackguarding of any rascal who gets up and makes charges."

WOULD CURB SENSATIONALISTS.

In the President's view newspaper men and newspapers would perform a public service by "putting on the brakes" and by ceasing to glorify the mendacity of sensational windjammers, effectually rob them of their chief stock in trade—public advertisement. It is the White House conviction that front-page headlines and "boxes"—the President likes talking newspaper language—only "add to the unrest" when they are used to direct public attention to the vaporings of mud slingers.

As an illustration of the unrecorded work of "unknown, unsung, and unheralded heroes"—in contrast to the prominence given to attacks on public servants—the President told of one of Herbert Hoover's relief workers in Russia who recently died of typhus. Mr. Harding said that brave young American "fell on the firing line of a generous civilization." The President has just written to the relief worker's mother, who has lost her last surviving son and support, a letter of cordial sympathy. It was evidently Mr. Harding's purpose to point out that while such national service usually goes untold and unappreciated in the public prints, no alleged misdemeanor besmirching the name of a high public official, if cried to the housetops loud enough by a "political blackguard," is too unimportant to claim the notice of "the sensational press."

SECOND PLEA AS "EDITOR."

To-day was the second occasion since he was elected President that the editor of the Marion Daily Star has unburdened himself on the topic of journalistic ethics. The first time was in December, 1920, following the President elect's return from his ill-starred vacation trip to Texas. Addressing the assembled corps of Washington correspondents in the press gallery of the Senate, Mr. Harding mentioned that in December, 1919, he made a League of Nation's speech in the Senate—"which was a good one, if I do say it myself."

Then he recalled and deplored the fact that, though his utterance dealt seriously with the burning topic of the moment, those few newspapers which dignified it with any attention at all gave it only a "stick."

Mr. Harding went on to soliloquize aloud that if instead of a reasoned address on the league he had called one of his senatorial colleagues a name, or indulged in fisticuffs, the news might have been "front paged" under "streamer" headlines.

It was in the same general sense that the President talked to-day. He spoke with uncommon candor and conveyed a distant impression that he is losing his patience with the kind of criticism now being leveled at his Attorney General and intimate political associate, Harry M. Daugherty. The President probably also had in mind the unfounded innuendoes leveled in Congress a few weeks ago against John W. Weeks, Secretary of War, in connection with alleged profiteering in alien property transactions.

—

[From New York Tribune of June 3, 1922.]

RESIGN, PLEA OF CANDIDATES TO DAUGHERTY—REPUBLICAN CONGRESSMEN FEAR REACTION IN FALL ELECTIONS TO COURSE OF "POLITICAL STUPIDITY"—PRESIDENT RESENTS ATTACKS ON CABINET—BLAMES WASHINGTON CORRESPONDENTS FOR GIVING SO MUCH SPACE TO CRITICS.

(By Carter Field.)

WASHINGTON, June 2.—Harry M. Daugherty's resignation would be a highly acceptable political present to most of the Republican Senators and Members of the House who are facing hard fights for reelection. This desire to be relieved of the embarrassment which attacks on Daugherty is causing the candidates is heard in conversations wherever a few of them get together.

At the same time it became known to-day that President Harding resents the attacks which are being made against members of his official family. This was made clear in a White House statement to-day.

SENATE MAY HEAR OF CONTRACTS.

Prospects that the investigation of war contracts proposed in the House of Representatives by the Woodruff-Johnson resolution, which was snuffed out in the House yesterday, would be revived in the Senate, with the backing of Senator GEORGE W. NORRIS, added materially to the irritation and to the desire that the cause of it be removed.

The fact that many of these same Republicans who are now anxious to see Mr. Daugherty get out believe that a mountain has been made of a molehill has nothing to do with the case. They do not accuse Mr. Daugherty of crookedness. Some of them do not even regard his alleged actions as reprehensible but as something incomparably worse—political stupidity.

Not only has Mr. Daugherty, they point out, hurt himself by his course, and not only is he hurting every Republican candidate for office this fall by having through it given the Democrats what they have made into a fine talking point, but there is the instance of Senator JAMES E. WATSON, of Indiana, who was pretty well left out on a limb as a result of his attempt to rush to the defense of a member of President Harding's Cabinet.

DEMOCRATS SEEKING ISSUES.

All this at a time, as one angry Republican points out, when the Democrats are terribly hard up for good issues on which to attempt to arouse the people. The constant harping on the Newberry case, they say, and the recent attempt of Senator PAT HARRISON to compare the expenditure of Gifford Pinchot and his wife in Pennsylvania to those of NEWBERRY in Michigan offer the best proof of this.

Mr. Daugherty, according to the Republicans who are irritated over the situation, has only himself to blame for the present attacks on him in connection with the Morse case. Senator CARAWAY had no inside information when he began his drive on the Attorney General. His friends say that he was not even on a fishing expedition, but merely trying to get away with a partisan attack. He admitted on the floor that he had no proof and was talking entirely from hearsay.

The Attorney General maintained silence, but Senator WATSON, of Indiana, a strong friend of the administration, and generally regarded as an astute politician, did not like the political aspect of the situation. He called up the Attorney General. What was said may be left to the imagination, but at any rate Mr. WATSON seized the first opportune moment to make denial of Senator CARAWAY'S charges.

Twenty days later Mr. Daugherty admitted the Caraway accusation and repudiated the Watson defense. Mr. WATSON had this printed in the CONGRESSIONAL RECORD without comment. Six days later Mr. Daugherty decided to make public the details, giving his side of the case.

NONE EAGER TO DEFEND DAUGHERTY.

All of which leaves the Republicans in Congress guessing as to what Mr. Daugherty will do next. One thing is very certain. Not one of them is now going to rush in to Mr. Daugherty's defense when some new attack is made unless he has something definite to fall back on. In addition, the general desire is for each candidate to get his own campaign as separate and distinct from the Attorney General as possible, especially as Mr. Daugherty and Mr. NEWBERRY seem to be the chief issues of the Democrats so far.

It is conceded by Democrats as well as contended by Republicans that had Mr. Daugherty made a frank statement—such as he did make—immediately after Senator CARAWAY began his attacks, and without any seemingly authorized denials such as that made for the Attorney General by Senator JAMES E. WATSON, the whole thing would have blown over without attracting any great amount of public attention. Certainly there would have been little excuse for the Democrats to keep harping on it.

Whatever may come, however, the Republicans on Capitol Hill know Warren G. Harding well enough to know that he is not going to make a Jonah out of Mr. Daugherty. Mr. Harding doesn't throw his friends overboard, even when the crew think such an act will change the luck or the weather. The President is distressed over the criticisms being hurled at his old friend Daugherty, but while he may think Mr. Daugherty has handled the publicity badly and been caught in a bad trap by the common political enemy, he intends to stand by him.

HARDING STANDS BY FRIEND.

If Mr. Daugherty should resign, which as a matter of fact would surprise most observers here, the President, so far from feeling a sense of political relief, will actually be greatly concerned. This is not, as has been frequently stated of late, because of a sense of gratitude to Mr. Daugherty for what the Attorney General did during the preconvention campaign of 1920. As a matter of fact, Harding had before him pretty good evidence during that campaign that he could make better progress if he would not make Mr. Daugherty his campaign manager. He will not throw him overboard now for the same reason that he did not throw him overboard when Daugherty's enemies in Ohio begged him to in 1920. The reason is simply and solely that Warren Harding does not throw his old friends overboard.

It was Senator TOM WATSON'S denunciation of Herbert Hoover that brought the White House statement to-day, but it served to call up the whole series of recent events which have given rise to curiosity as to how Mr. Harding's well-known urbanity is withstanding the constant assaults upon his Cabinet officers. And it was made evident at the executive offices, while the White House gardens were enveloped in rainy gloom, and while beyond at the Capitol new vituperation was being heaped upon Attorney General Daugherty, that the President was thoroughly vexed.

His speech Tuesday at the Lincoln Memorial dedication, when he dwelt at length upon Lincoln's fortitude under criticism, had no special significance, as applied to Mr. Harding's own tribulations, according to the White House spokesman, nor did the President wish to deal with the attacks which were being made upon members of the Cabinet. Yet it was represented to be Mr. Harding's wish to speak frankly what was in his heart concerning certain matters.

HARDING CRITICIZES PRESS.

Then, while the protest was at its climax of feeling, the White House spokesman declared that Mr. Harding felt, as one who understood the workings of the press, that he was warranted in directing criticism at the Washington newspaper men. The trouble with them, it was declared, was that they gave too much space to the critics.

That, it was said, was all wrong. That was not helping to better the world. Why, it was asked, should they not devote their attention to things worth while and cease to encourage those who criticize unjustly and who belittle those undertakings which represent a sincere desire to achieve better conditions?

President Harding, it was asserted feelingly, was sensitive about some of these things.

CONDITION OF THE ARMENIAN PEOPLE.

Mr. ASHURST. Mr. President, I ask the Secretary to read some letters in the nature of petitions. They are brief and relate to the rumor or announcement emanating from various chancelleries to the effect that the Armenian people are to be delivered over to the Turk.

The PRESIDING OFFICER. Without objection, the Secretary will read as requested.

The reading clerk read as follows:

DOUGLAS, ARIZ., *May 26, 1922.*

Hon. HENRY F. ASHURST,
United States Senate Chamber, Washington, D. C.

MOST HONORABLE SIR: I have recently heard with great distress that there is a plan on foot by the allied powers to return the long-suffering Armenians to the hands of the unspeakable Turk. To me this is unthinkable. My whole nature revolts at the suggestion, and I believe it will be so to the soul of every true American.

I humbly beseech you to use your good offices to have our Government to exert every possible influence to protect the present and future interests of this heroic and worthy people, and, above all, to save them from the murderous hand of the Turk.

I believe I am expressing the feeling of my people here at Douglas and of the Presbyterians of our State.

Most respectfully yours,

C. A. FOREMAN,
Pastor Presbyterian Church.

MINISTERIAL ASSOCIATION,
Douglas, Ariz., May 27, 1922.

Mr. HENRY F. ASHURST,
United States Senate, Washington, D. C.

HONORABLE AND DEAR SIR: At a meeting of the Ministerial Association of Douglas, Ariz., the following resolution was unanimously adopted:

"That we are opposed to intrusting the Armenians to the sovereignty of the Turk, and plead that your influence be used to assure a protected country in the interest of the Armenians."

Sincerely yours,

WILBUR FISK, *President.*
S. F. FRASER, *Clerk.*

MESA, ARIZ., *May 29, 1922.*

Hon. HENRY F. ASHURST,
United States Senate, Washington, D. C.

DEAR SIR: Whereas the Armenians were one of our allies in the late war and fought for its ideals; and

Whereas in consequence of their loyalty they suffered untold persecution, almost to the extent of annihilation; and

Whereas the Allies, as well as our own country, pledged them a safe area for themselves and their children; and

Whereas the American public has given millions of dollars to save the remnant of this shattered race; and

Whereas the allied powers are preparing a treaty with the Turkish nationalists which threatens to return the Armenians to unrestricted Turkish control: Therefore be it

Resolved, That we, the members and friends of the First Baptist Church of Mesa, Ariz., here assembled, express our strong sentiment and horror at the thought of exposing the Armenians to further suffering and persecution; and be it also

Resolved, That we are opposed to intrusting the Armenians to the sovereignty of the Turk; and be it further

Resolved, That we unitedly and earnestly petition you as our Senator to use every means within your power to give the Armenians a protected country.

THE FIRST BAPTIST CHURCH OF MESA, ARIZ.,
By F. E. HAWES, *Minister.*
ROYAL H. WHITAKER, *Church Clerk.*

Mr. ASHURST. Mr. President, in presenting these letters—and doubtless I shall have occasion later to present more of the same tenor—I do so from a sense of duty, and for the additional reasons that their sentiments meet my views entirely. It is shocking to any humane person to think that the Armenians may be delivered over to the Turk. Armenia was evangelized in the year 33 A. D. by Apostles fresh from the company and memory of our Lord, and Armenia has stood the storm of centuries. It is frightful to contemplate that these people shall be further exploited by the barbarous and murderous Turk.

In causing these letters, in the form of petitions, to be read, I do so in the hope that they may in some way reach and influence the various chancelleries contemplating any action, and I hope that protests will come not only from Arizona but from every other part of the United States against delivering to the Turk a mandate or any authority over the Armenians.

Mr. KING. Mr. President, I am glad the Senator from Arizona [Mr. ASHURST] has called attention to conditions in Turkey and to the barbarous treatment which is now being accorded to the Armenian race and to all the Christian population within the borders of the Angora Government. I have upon a number of occasions offered resolutions challenging attention to the brutalities and barbarities of the Turks and to their evident determination to exterminate all Christian peoples within the boundaries of the Turkish Empire in Asia. These resolutions have not received the support of Congress, nor are they receiving the approval of the present administration.

One of the resolutions asked that the President of the United States use his good offices to induce the allied nations to enforce the treaty of Sevres and protect the Armenian race and the Hellenic people of Asia Minor from further atrocities and from the exterminating policy of the Turks. I regret no action has been taken by the Foreign Relations Committee to which the resolution was sent. Nor has the State Department or the President taken any steps to show the sympathy of the United States for the suffering and unfortunate people, or to indicate that the United States views with abhorrence the wicked and cruel course pursued by the Kemalist régime.

Mr. President, I shall offer another resolution—one which, it seems to me, should promptly be adopted. I have diluted it to the point of extreme weakness. Even those who are afraid of speaking for the fallen and the weak, or entangling the United States in the affairs of other nations, can find no pretext, in my opinion, for refusing assent to such resolution. It is as follows:

Senate Resolution 300.

Whereas the Government of the United States has recognized Armenia as a free and independent state; and

Whereas the Government and people of the United States have a special concern for the political independence and territorial integrity of Armenia and for the welfare and security of the Armenian people: Now, therefore, be it

Resolved, That it is the sense of the Senate that the Government of the United States can not regard with indifference attempts or projects to oppress the Armenian people or to deprive the Republic of Armenia of its status as a free and independent state.

Mr. President, this resolution may be considered innocuous. I concede that it fails to express what I think should be stated by the Senate of the United States, or to declare a policy that I think should be pursued by this Republic in dealing with the Armenian situation. However, the resolutions which I have heretofore offered, and which do call for a more vigorous policy, have not met with the approval of the administration, nor have they been reported from the Committee on Foreign Relations. Indeed, I do not think, no matter what the individual opinions of the members of the committee may be, that an affirmative report will be had with respect to either of them.

In offering this resolution I am not abandoning the former ones, nor taking the position that a less vigorous policy should be pursued than that suggested in former resolutions. Indeed, Mr. President, I feel that this Republic should announce to Turkey and to the allied nations and to the world that it does have a profound interest in the Republic of Armenia and in the enforcement of the provisions of the Sevres treaty, and that it looks with abhorrence upon the cruel and sanguinary acts of the Ottoman Turks and their policy of exterminating not only the Armenians but the Christian minorities found within Anatolia and territory under the control of the Ottoman Turks.

In my opinion the President of the United States could with propriety suggest to our former allies that they enforce the terms of the Sevres treaty and effectually act to protect the Armenian people from destruction. The Turks were our enemies, and though we did not declare war against Turkey, nevertheless it was a belligerent, as much so as was Austria. The Turkish armies were arrayed against the military forces with which our Nation was allied, and they were aiding our enemies, though, perhaps, none of the Turkish military forces came into direct contact with the armies of the United States. While we did not participate in the Sevres treaty, we are interested in its terms and can not, in my opinion, look with indifference or apathy upon the course of the nations parties to the treaty, even though the United States was not a signatory to the same.

The Armenians and the Greeks fought for the same cause for which our soldiers fought. It was announced repeatedly by officials of the United States, as well as by the allied Governments, that with the termination of the war and the triumph of the allied cause, the Armenian race should be protected and the Armenian people should have a Government of their own.

The Armenian troops bravely fought upon a hundred battle fields against the Turks and against the forces of the Central Empires. When Russia withdrew from the contest the heroic Armenian troops held the Caucasian front for many long and weary months against the Turkish armies led by German officers and aided in every way possible by the Central Powers. Their brave and heroic resistance prevented the Turkish forces from entering the oil fields of Baku, and this reacted to the advantage of the allied forces, including the American troops, upon the western front.

Ludendorf, in his Memoirs, declares that the failure to obtain oil from the region of the Caspian Sea contributed to the defeat of the Central Empires. The Armenian troops and the Syrian troops fought bravely in Palestine and Syria and materially contributed to the successes which came to General Allenby and to French armies in the Levant. Armenians from the United States were found fighting upon many battle fronts, and their blood was shed not only in behalf of the redemption of their native land but to preserve this Republic and the cause of civilization.

And the gallant Greeks also gave their lives fighting against the Turks and the Bulgarians and the Central Empires. We have not appreciated the heroic sacrifices made by the Hellenic peoples, by the Syrians, and by the Armenians. We have not understood the martyrdom which has come to them, and now, when the war is over, we close our eyes to the atrocities and cruelties perpetrated by the Ottoman Turks upon the Christian minorities in Asia Minor, in Syria, in Armenia, and in those communities where the Turks are found to be in the majority. The soil of Anatolia has been reddened by the blood of hundreds of thousands of Armenians and Pontian Greeks. Even now the Kemalist forces are murdering and butchering men, women, and children who have been driven from their homes along the southern borders of the Black Sea, and from Cilicia and from the vilayets which constituted the Republic of Armenia. The bloodthirsty Turks have determined to exterminate the Armenians and to destroy the Christian population inhabiting the littoral of the Black Sea, the Smyrna district, Cilicia, the Turkish vilayets of Armenia, and, indeed, all who reside in any part of Anatolia. More than a million Armenians were murdered by the Turks, led by Germans, during the war, and

tens of thousands have been deported and slain by these fiends since the armistice was signed.

The allied nations are doing nothing to protect Armenia nor to enforce the treaty of Sevres; indeed, France and Italy have furnished munitions of war to the Kemalist forces, who have turned their weapons upon the Christian peoples, and have thus contributed to their martyrdom.

I repeat, this resolution which I have offered is somewhat enemic. It is the least that we could say. It should be unanimously agreed to in the Senate. In drafting it I have drawn largely from a communication addressed by Daniel Webster, when Secretary of State, to our minister to Great Britain, regarding Liberia, and also a note addressed by John Hay, when Secretary of State, to our ambassador to France, which also related to Liberia. Mr. Webster's note is as follows:

This Government regards Liberia as occupying a peculiar position, and as possessing peculiar claims to the friendly consideration of all Christian powers; that this Government will be at all times prepared to interpose its good offices to prevent any encroachment by Liberia upon any just right of any nation; and that it would be very unwilling to see it despoiled of its territory rightfully acquired, or improperly restrained in the exercise of its necessary rights and powers.

Mr. Hay's note is as follows:

The Government of the United States having recognized Liberia feels that it has a peculiar interest in its citizens and could not be justified in regarding with indifference any attempt to oppress them or deprive them of their independence.

Are we less concerned for two or three million Christians in Asia Minor than we were in the Government of Liberia? If there was not violation of international proprieties in speaking for Liberia, shall it be said that it is improper to speak for Armenia and the Greek and Syrian people, who are threatened with destruction?

I have stated the United States has recognized Armenia as an independent nation. President Wilson was selected by our former allies to aid in delimiting the boundaries of the Armenian Republic. He accepted the trust, and, after making full investigation, reported, fixing the western boundaries of Armenia. His action was approved by the powers, as well as by the Armenian people. The Armenian Republic was organized as a nation and had an area of 26,491 square miles. As a matter of fact, when first organized, its area was 42,000 square miles. There are now more than a million and a quarter of Armenians within the boundaries of the republic. So far as I can ascertain, there are in what is called Turkish Armenia and Russian Armenia approximately 2,250,000 Armenians. Those in Turkish Armenia are being deported and butchered, and unless the Christian nations of the world interpose for their preservation the Ottoman Turks and the Kurds will sooner or later destroy them.

Mr. President, I offer another resolution which, after being read, I ask to be referred to the Committee on Foreign Relations. The resolution is as follows:

Senate Resolution 301.

Whereas the systematic deportations, murders, and outrages which have been continuously practiced against the Christian minorities in Anatolia and within the boundaries of the Armenian Republic by the so-called Kemalist Government, having its seat at Angora, have recently been confirmed in reports made by American citizens engaged in relief work in Anatolia, which reports have been published in Great Britain and in the United States, and have received the official notice of the British Government; and

Whereas such reports indicate that it is the purpose of said Kemalist Government to continue such systematic deportations, murders, and outrages as a nationalist policy; and

Whereas on or about the 12th of May, ultimo, the British Government dispatched to the Government of the United States a suggestion and invitation that the American high commissioner at Constantinople be authorized and instructed to act in conjunction with the high commissioners of Great Britain and the other powers in Constantinople to conduct an investigation of the atrocities and outrages which have been committed upon Christian minorities in Anatolia by and under the authority of said Kemalist Government; and

Whereas such investigation is necessary in order to authoritatively establish the facts and to prepare and arrange adequate measures against the recurrence of such outrages, for the protection of the Christian minorities in Anatolia, for the rectification of the sanguinary and intolerable conditions which exist in Anatolia, and for the general pacification of Anatolia: Now, therefore, be it

Resolved, That it is the sense of the Senate that the Government of the United States should accept the said invitation of the British Government and authorize the American high commissioner at Constantinople, by himself and through competent deputies, to act in conjunction with the high commissioners of Great Britain and the other powers, to investigate outrages and atrocities committed against the Christian minorities in Anatolia and other places where the Ottoman Turks are found, and to ascertain the facts and determine the responsibility therefor, as the basis for the formulation of adequate measures for the prevention of the recurrence of such atrocities, for the protection of such Christian minorities, and the pacification of Anatolia.

Mr. President, I have in my hand the London Times under date of May 16, 1923. The subject to which I am now calling attention was brought before the House of Commons for consideration, and Mr. Chamberlain, replying to Mr. T. P. O'Connor, stated:

Confirmation has been received of the statements contained in the recent report to Major Yowell—

Major Yowell, as I understand, was an American—

to which, I presume, the honorable member refers. With the permission of the House I will read out two telegrams from His Majesty's high commissioner at Constantinople on the subject, dated May 10. The first runs:

"I have interviewed at great length Doctor Ward"—

Doctor Ward, as Senators know, is an American. He is now en route for the United States. He was deported by the Turks, and he has given evidence to the people in Constantinople, and his reports have been in part published in the United States of the atrocities which had been and were being committed by the Turks, and the probable annihilation of the Armenians in various sections of Anatolia and the Armenian Republic, as well as the destruction of thousands and hundreds of thousands of the Greeks who resided upon the southern borders of the Black Sea.

Let me add that centuries before the Christian era Hellenic peoples settled upon the southern borders of the Black Sea, and during all the years intervening they and their descendants have maintained their Hellenic culture and ideals.

I will continue reading from the Times:

I have interviewed at great length Doctor Ward, of Near Eastern Relief Commission, who had just arrived from Kharput, which he left March 15. He corroborates statements as to treatment of minorities contained in telegram from Constantinople published in the Times of May 5. The Turks appear to be working on a deliberate plan to get rid of minorities. Their method has been to collect at Amasia Ottoman Greeks from region between Samsun and Trebizond. These Greeks are marched from Amasia via Tokat and Sivas as far as Caesarea, and then back again, until they are eventually sent through Kharput to the east. In this manner a large number of deportees die on the road from hardship and exposure. The Turks can say they did not actually kill these refugees, but a comparison may be instituted with the way in which the Turks formerly got rid of dogs at Constantinople, by landing them on an island where they died of hunger and thirst. Large numbers of deportees who were being sent to Van and Bitlis passed through Kharput between June and December last year. Now that spring has come these deportations have begun again. Once these gangs have passed Diarbekr, which is the last American relief station, Americans lose all track of them, but Doctor Ward has little doubt that many deportees die in the mountains east of that place. Turks in preference choose winter weather for driving these deportees into mountains. American Near Eastern Relief was not allowed to shelter children whose parents had died on the road. These children were driven forward with other deportees. Doctor Ward himself last year in December counted 150 bodies on the road between Kharput and Malatia. A fellow worker saw and counted 1,500 bodies on the road to Kharput, and 2,000 deportees died on the road east of that place. Two-thirds of Greek deportees are women and children.

At present fresh deportation outrages are starting in all parts of Asia Minor from northern seaports to southeastern district. Turkish official at head educational department at Kharput told Doctor Ward as an illustration of Turkish inefficiency that in 1915 Turks had not made a clean job of massacres. He said that next time Turks would take care to do their work thoroughly. Doctor Ward indorsed Signor Tuozzi's statement of January last that deliberate policy of Turks is to exterminate minorities. He considers that they are accelerating their activities in this respect before peace settlement, and he stated that if action is not taken soon problem will be solved by disappearance of minorities. I am confirmed in my belief that the Turkish protests now being received in regard to alleged Greek excesses are designed to divert attention from Turkish atrocities. Another American of high character and standing, who came with Doctor Ward, states that Doctor Gibbon, formerly a professor at Robert College, who has just been visiting Greek front, and went into Turkish lines, reports that Greeks have behaved well in Afiun Karahissar-Aidin sectors; also that Mussulman population seem quite content with Greek rule in these districts.

I shall not take the time of the Senate to read the second and third telegrams which appear here, but I ask that they, too, be inserted in the RECORD.

There being no objection, the telegrams were ordered to be printed in the RECORD, as follows:

[Second telegram.]

Further reliable information received from American relief workers, dated April 25, shows that whole Greek population from the age of 15 upward of Trebizond area and its hinterland is being deported, apparently to labor battalions at Erzerum, Kars, and Sarikamysh. Since armistice proposal there has been marked recrudescence of these deportations, which are carried out in conditions of terrible hardship, and now embrace bank employees and others whose position had hitherto exempted them. There are numbers of Christian women and children in deplorable straits in Trebizend, who have been driven out of their villages. I have also received other reports, dating back to September, 1921, of deportations of Armenians from Zeitum.

[Third telegram.]

Information reported by you as received in the main from an American relief worker reveals such an appalling tale of barbarity and cruelty now being practiced by the Angora Turks as part of a systematic policy for the extermination of Christian minorities in Asia Minor that His Majesty's Government, who have in the proposed terms of peace assumed a serious responsibility for the future protection of these minorities, can not allow such reports to remain uninvestigated or such incidents to continue unchecked. I am informing the French, Italian, and American ambassadors of our opinion, with a view to securing their cooperation in action which I now propose, and I am requesting them to ask their Governments to send instructions to their high commissioners at Constantinople to act in concert with you. My proposal (this is a telegram, Mr. Chamberlain explained, from the secretary of

state for foreign affairs) is that each of these four powers should at once depute a carefully selected officer to proceed to Trebizond, or whatever Black Sea port may be suitable, with a view to proceeding to such places in the interior as may best enable them to make the necessary investigations. The permission of the Angora authorities will have to be sought and facilities demanded. It will be difficult for them to refuse these, since it is their contention either that the deportations and the massacres have not taken place or that they have been provoked by the conduct of the Greek and other minorities themselves. Should permission, nevertheless, be refused, His Majesty's Government will have to reconsider their entire attitude toward the peace proposals, which obviously could not be pursued with any chance of success in such conditions as I have described. It is inconceivable that Europe should agree to hand back to Turkish rule, without the most stringent guaranties, communities who would be liable to be treated in the manner described by competent American witnesses, whose reports, moreover, are confirmed by independent information in our possession.

Mr. KING. Doctor Ward and a number of Americans have recently been deported by the Turks from Armenia, where they were witnesses of the cruelties and barbarities committed by the Turks upon the Armenian and Christian minorities. Permit me to state that the barbarous treatment and the exterminating policies are not confined to Armenia. As Senators know, Anatolia consists of that great stretch of territory bounded upon the north by the Black Sea, upon the south by the Mediterranean Sea, and upon the east by what may be denominated the Mesopotamian region. Syria also borders it upon the southeast. On the west it overlooks the Bosphorus and Constantinople. Within the Smyrna district there were, at the end of the war, nearly a million Greeks. In what might be called Pontian Greece, bordering the northeast, there were more than three-quarters of a million of the Hellenic race. In Syria there were hundreds of thousands of Syrian Christians, and in eastern Anatolia, or Turkish Armenia, there were, as I have stated, hundreds of thousands of Armenians.

When the French troops withdrew from Cilicia, thousands of Armenians who were there gathered were murdered. It has not been definitely determined how many of the Greeks were driven from Pontus and how many have been killed, but we know that of the three-quarters of a million Greeks who inhabited the littoral of the North Sea the great majority have been driven from their homes and hundreds of thousands have been killed. Hundreds of towns have been burned and ruin and desolation have followed in the wake of the cruel and advancing hordes of Ottoman Turks. Pontus was Hellenic rather than Turkish, but nevertheless it has been subject to Turkish rule for several hundred years. Nearly 1,000 years B. C. representatives of the Hellenic race settled upon the southern borders of the Black Sea and founded a Greek State. Their descendants have since that time occupied that extensive district, perhaps five or six hundred miles easterly and westerly and extending from the Black Sea into the interior for varying distances. From that time until the present they there preserved Greek culture and resisted with great heroism the hordes of Tartars and Turks and Asiatics as they advanced, during the centuries that passed, in their westward march.

When they were overcome by the force of numbers, they still maintained their traditions, their language, their religion, their culture; and because of their superior intellectual powers and their superior civilization the Turks have now determined upon their destruction. Accordingly, as I have stated, they have, since the armistice, pursued a policy looking to the extermination of this heroic people.

The Turks, as I have stated, have determined to destroy the Greeks and the Armenians who inhabit Anatolia and Armenia. They are defying the allied nations, disregarding the terms of the treaty of Sevres, and continuing their barbarous policy of extermination.

Shall nothing be done by the Christian nations of the world to preserve these peoples from destruction? Mr. President, while the blood of Christians is now being shed, this Nation does not even lift its voice in protest. I wish the Senate would lift its voice in solemn protest against the wicked and cruel course of Turkey. I wish this Republic would demand of the Kemalist Government that it cease its atrocities and conform its course to the dictates of justice and to the demands of civilization.

Mr. President, I ask that these two resolutions be referred to the Committee on Foreign Relations.

The VICE PRESIDENT. That reference will be made.

ATTORNEY GENERAL DAUGHERTY.

Mr. WALSH of Montana. Mr. President, on April 7 I called to the attention of the Senate a memorandum addressed by Mr. Rush Holland, Assistant Attorney General, to his chief, the Attorney General of the United States, in which he spoke of nominations for judicial positions in the Hawaiian Islands. It is brief, and I read it at this time from the RECORD of the date mentioned:

MEMORANDUM FOR THE ATTORNEY GENERAL.

Hon. Robert Shingle, Republican national committeeman for the Territory of Hawaii, has recommended the appointment of Emil C. Peters, of Honolulu, to be chief justice of the Supreme Court of the Territory of Hawaii, vice James L. Coke, term expired. He also recommends Antonio M. Perry, of Honolulu, to be associate justice of the Supreme Court of the Territory of Hawaii, vice Samuel B. Kemp, term expired.

In addition to the recommendation of Mr. Shingle, the above-named gentlemen are recommended by the Republican central committee and by the bar association of the islands. This matter has been carefully gone into, and both Mr. Perry and Mr. Peters appear to be eminently qualified for the positions for which they are recommended, and their selection meets the approval of the large majority of the bar association and of the leading Republicans of the islands.

There is at present no Delegate from the islands. Prince Kalanianaole recently died and the election of his successor has not yet taken place. It is believed that if these nominations are made now that such action will materially aid the Republican candidate for Delegate. I recommend that the appointments be made.

Respectfully,

HOLLAND,
Assistant Attorney General.

I believe that the ideals prevailing in the Department of Justice on April 7, or thereabouts, as evidenced by this letter, were quite generally condemned in this body upon both sides when attention was directed to the matter. To utilize the opportunity to make appointments to judicial positions for political ends seems such a prostitution of the judiciary as to call for universal reprehension.

We have not in anywise been advised, however, that any rebuke was administered to Mr. Holland for entertaining such sentiments as were expressed in the letter, or for penning the same. So far as I am advised, he still holds the place he occupied at the time the letter was penned, as Assistant Attorney General in charge of appointments.

I am pleased to note, however, from an address made on yesterday by the Attorney General, that very much higher ideals now prevail in that department, and I feel it due to the Attorney General to call attention to his present views on the matter of appointments to judicial positions, notwithstanding the fact that apparently the ideas of Mr. Holland had his approval at the time, since the letter was sent to him and the nominations were promptly transmitted to the Senate.

In an address delivered a few days ago to the Bar Association of the State of Illinois the Attorney General said:

> The appointment of a Federal judge requires the most painstaking investigation of the men under consideration. In grading men, if there is no question as to their honesty and their ability, I would discount brains as a matter of fact 10 per cent for an additional 5 per cent of the right kind of courage.
>
> It became, in my judgment, advisable upon a certain occasion to write a note to the President in connection with the appointment of a Federal judge. At the time the note was written I did not expect the letter would ever be published, but in connection with my visit upon this occasion I have the President's consent to make it public.
>
> The letter was written on April 8, 1922, acknowledging the recommendation by a very distinguished gentleman of this country urging the appointment of certain men to the Federal bench in case additional judges were provided for. In this letter I said to the President:
>
> APPOINTMENTS HARD TASK.
>
> "You will hardly have a harder task than that of appointing the judges under the bill which recently passed the House and Senate and is now in conference, and I know that you are impressed with the importance of inquiring fully into the qualifications of every man before a decision is reached. I shall make no committals of any kind that might in the least embarrass you or this department. I never commit myself to any appointment in this department which you are required to make without first giving you all the facts and conferring and cooperating with you.
>
> "Because of the pride I have in this department and in the judiciary and my desire that this administration shall be credited with the appointment of judges of high standing, to the end that the judiciary shall stand for years as an example and a sustaining force in the Government, and because I feel that this department will stand or fall with the final decision in connection with these appointments, we must take sufficient time and make thorough investigation before committing ourselves to appointments.
>
> "Senators and Representatives and political influences generally should be given to understand that they must not expect, as a matter of patronage, to dominate or dictate these appointments, and before they get immovably behind anybody we should be consulted."

I apprehend that, in view of these splendid sentiments just expressed by the Attorney General, he will promptly dismiss from the service Mr. Holland, who seems to entertain views quite at variance with those of the Attorney General.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. Overhue, its enrolling clerk, announced that the House had agreed to the amendments of the Senate to the bill (H. R. 9344) providing for the appropriation of funds for acquiring additional water rights for Indians on the Crow Reservation, in Montana, whose lands are irrigable under the Two Leggins Irrigation Canal.

The message also announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 10871) making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1923,

and for other purposes; requested a conference with the Senate on the disagreeing votes of the two Houses thereon; and that Mr. ANTHONY, Mr. STAFFORD, and Mr. SISSON were appointed managers on the part of the House at the conference.

WAR DEPARTMENT APPROPRIATION.

The VICE PRESIDENT laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 10871) making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1923, and for other purposes, and asking for a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. WADSWORTH. Mr. President, I move that the Senate insist upon its amendments, agree to the request of the other House for a conference, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Vice President appointed Mr. WADSWORTH, Mr. JONES of Washington, Mr. SPENCER, Mr. HITCHCOCK, and Mr. HARRIS conferees on the part of the Senate.

REPAIRING AND RESTORING OF LEVEES ON THE MISSISSIPPI RIVER.

Mr. WARREN. From the Committee on Appropriations, I report back favorably without amendment the joint resolution (H. J. Res. 339) making available funds for repairing and restoring levees on the Mississippi River above Cairo, Ill. As it is an urgent matter, I ask unanimous consent for the immediate consideration of the joint resolution.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution, which was read as follows:

Resolved, etc., That an amount, not exceeding $100,000, of the funds authorized to be expended by Public Resolution No. 54, approved May 2, 1922, is hereby made available as an emergency fund to be expended by the Mississippi River Commission, under the direction of the Secretary of War, for repairing and restoring any levees on the Mississippi River above Cairo, Ill., which have been destroyed or seriously injured by the recent floods of the Mississippi River and which are not now within, but may, before June 15, 1922, be brought within, the provisions of the act entitled "An act to provide for the control of floods of the Mississippi River and of the Sacramento River, and for other purposes," approved March 1, 1917: *Provided,* That if the Mississippi River Commission finds that the levee or drainage district in which the broken levee is situated can not legally, by or before June 15, 1922, comply with section (b) of such act of March 1, 1917, the commission may accept, in this emergency, bonds of standing approved by it in amount sufficient to cover not less than one-third of the cost involved: *Provided further,* That nothing in this resolution shall be construed as authorizing a departure from the established practice of the commission except so far as may be necessary to permit the restoration of broken levees in districts which are willing but can not legally comply with said method of procedure in time to avoid another threatened overflow this year.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

REPORT OF PUBLIC BUILDINGS COMMISSION.

Mr. SMOOT. Mr. President, I shall not take more than a moment of the Senate's time. I merely desire to submit a report as the chairman of the Public Buildings Commission. That commission was created on March 1, 1919, and since its creation I have been making an annual report of its activities. I ask that the report which I now present for the last year be printed in the RECORD without reading.

The VICE PRESIDENT. Without objection, it is so ordered.

The report is as follows:

REPORT OF THE PUBLIC BUILDINGS COMMISSION.

The Public Buildings Commission, created by the act of March 1, 1919, is charged with the control and allotment of space in buildings owned or rented by the Government in the District of Columbia, with certain exceptions. In creating the commission Congress was undoubtedly actuated by a desire to effect a reduction in the Government's enormous expenditures for the rental of office space in the District of Columbia. The commission has, therefore, kept this idea uppermost in mind in carrying on its work, and has adopted a policy of requiring the departments to vacate rented space whenever practicable. The following table, which shows the annual rental expenditures of the various departments three years ago as compared to the rentals being paid at this time, will show what has been accomplished:

Department.	Annual rental May 22, 1919.	Annual rental May 22, 1922.
Agriculture	$190,910.00	$148,189.96
Alien Property Custodian	31,200.00	
Bureau of Efficiency		
Civil Service Commission	16,875.00	16,875.00
Commerce	66,900.00	65,500.00
Court of Claims		
Court of Customs Appeals	7,000.00	7,000.00
Employees' Compensation Commission	3,600.00	
Federal Board for Vocational Edutation	6,400.00	
Federal Power Commission		
Federal Trade Commission	12,600.00	
General Accounting Office[1]		
Government Printing Office		
Grain Corporation		
Interdepartmental Social Hygiene Board		
Interior	$23,000.00	
International Boundary Commission	2,040.00	
International Joint Commission	1,724.00	
Interstate Commerce Commission	72,058.04	$72,058.04
Justice	36,000.00	36,000.00
Labor	58,363.60	24,000.00
National Advisory Committee for Aeronautics		
Panama Canal Office	7,500.00	
Post Office		
Public Buildings and Grounds		
Railroad Administration[2]	86,985.00	
Shipping Board	210,105.56	
State	5,000.00	
Superintendent State, War, and Navy Buildings		
Tariff Commission	11,000.00	
Treasury	174,839.00	146,550.00
Veterans' Bureau		
War	111,797.08	29,700.00
Total	1,135,897.28	545,873.00

[1] Rented buildings occupied by the General Accounting Office are being paid for out of appropriations for the Treasury Department.

[2] Rentals for buildings occupied by the Railroad Administration are now being paid by funds derived from operation of the railroads.

The difference between these two totals shows a saving to the Government in rental charges of $590,024.28, to which will shortly be added the rental of $49,500 now being paid for the Hooe Building, which will be vacated by the Treasury Department on the 1st of September. This will make a total saving in rental charges of $639,524.28 annually, and will reduce the rental now being paid by the Government for office space in the District of Columbia to $496,373. The commission has several other moves in view at this time which it is confidently believed will bring the annual expenditures for rental well under $400,000 by the end of the present calendar year.

Two other savings of considerable size which the commission has been able to make are, first, the assignment of temporary building No. 2, Nineteenth and D Streets NW., to the Interstate Commerce Commission for the housing of certain field offices of the commission, which were occupying rented buildings in several cities at an annual cost of $66,418.92. Second, the assignment of temporary building No. 7, Eighteenth and C Streets NW., to the War Department for the housing of certain troops on duty in Washington. Officials of the War Department estimate that utilization of the building in this manner effects a saving to the Government of $175,000 annually in commutation of quarters and subsistence. This saving is of particular interest at this time in view of the proposal recently presented to Congress to acquire the sites of the temporary buildings west of Seventeenth Street. Temporary building No. 7 occupies one of the sites it is proposed to acquire. Estimating the life of the building at 10 years, which is conservative, it can readily be seen that the saving effected by the use of this one structure will in 10 years pay for the sites of all seven buildings and leave $250,000 to spare.

Adding these items of $66,418.92 and $175,000 to $590,024.28, which is the amount rentals in the District of Columbia have been reduced to date, it will be noted that the commission has been directly responsible for a reduction in the Government's annual expenditures amounting to $831,443.20.

Another considerable item of saving, which has naturally resulted from giving up rented buildings, is the saving in maintenance charges. Many Government activities occupying rented quarters were expending almost as much for maintenance as for rent. In moving them into Government-owned buildings this charge was eliminated almost entirely, as they were moved into buildings already being maintained by the Government and it is a well-known fact that the cost of maintenance of a building varies only slightly whether that building be partially or fully occupied. That this saving alone amounts to several hundred thousand dollars annually is believed to be a very conservative estimate.

The commission has not found it necessary to employ large clerical forces in order to accomplish the above result and has but a single employee, the secretary. Of the initial appropriation of $10,000, made more than three years ago, there is in the Treasury of the United States to-day an unexpended balance of $1,084.10.

After three years' experience in dealing with the housing of the Government departments in this city, this commission is unanimously of the opinion that at the earliest practicable date Congress should adopt a building program which will lead to the housing of all Government departments in permanent fireproof structures. That the great Government of the United States should be a tenant in its own Capital City is certainly food for serious reflection, to say the least. Probably no other large government in the world has given so little thought to an adequate housing of its activities as this.

The kind of building best adapted to the needs of the Government is the modern office-type structure, designed with due regard for the safety, health, and comfort of the people who are to use it. To embark upon a program of building Greek temples for housing the Government departments is both foolish and unnecessary. These buildings are exceedingly expensive and wasteful of space.

A very illuminating example of a building of this type is the Treasury Annex No. 1, located on Pennsylvania Avenue at Madison Place.

Among the more urgent needs of the Government for new buildings at this time are:

AN ARCHIVES BUILDING.

The erection of a building for the storage of the records and archives of the Government is probably the most urgently needed building. Aside from the protection it would afford these records from fire, it would make available for office purposes many thousands of square feet of office space, now being used for storage in the various public buildings.

DEPARTMENT OF AGRICULTURE.

This department is probably the worst housed institution in the city of Washington. It is now occupying 25 buildings scattered over the city and many of them are poorly adapted for office purposes.

GENERAL ACCOUNTING OFFICE.

The various divisions of this activity should by all means be housed under one roof. They are compelled to occupy several rented buildings at this time, in order to obtain fireproof space, which is very necessary in view of the character of their work.

TREASURY DEPARTMENT.

The construction of a building for the Bureau of Internal Revenue and other outlying bureaus of the department is a most urgent need.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Arkansas [Mr. ROBINSON] to the amendment proposed by the Senator from North Dakota [Mr. MCCUMBER].

Mr. UNDERWOOD. May the amendment to the amendment be reported?

The VICE PRESIDENT. The Secretary will state the amendment to the amendment.

The ASSISTANT SECRETARY. In the amendment proposed by the Senator from North Dakota [Mr. MCCUMBER], the Senator from Arkansas [Mr. ROBINSON] moves to strike out "25" and to insert "10," so that if amended the part to be inserted would read:

PAR. 201. Bath brick, chrome brick, and fire brick, not specially provided for, 10 per cent ad valorem; magnesite brick, three-fourths of 1 cent per pound and 10 per cent ad valorem.

Mr. UNDERWOOD. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. HALE (when his name was called). I transfer my pair with the senior Senator from Tennessee [Mr. SHIELDS] to the junior Senator from Maryland [Mr. WELLER] and vote "nay."

Mr. HARRISON (when his name was called). I transfer my general pair with the Senator from West Virginia [Mr. ELKINS] to the senior Senator from Nebraska [Mr. HITCHCOCK] and vote "yea."

Mr. WALSH of Montana (when his name was called). I have a general pair with the senior Senator from New Jersey [Mr. FRELINGHUYSEN], who is absent. I transfer that pair to the junior Senator from Massachusetts [Mr. WALSH] and vote "yea."

Mr. WARREN (when his name was called). I have a general pair with the junior Senator from North Carolina [Mr. OVERMAN], which I transfer to the senior Senator from Pennsylvania [Mr. CROW] and vote "nay." I ask that this announcement of my pair and its transfer may stand for the day.

Mr. WATSON of Indiana (when his name was called). I transfer my general pair with the senior Senator from Mississippi [Mr. WILLIAMS] to the junior Senator from Oklahoma [Mr. HARRELD] and vote "nay."

The roll call was concluded.

Mr. BALL. I transfer my general pair with the senior Senator from Florida [Mr. FLETCHER] to the junior Senator from Ohio [Mr. WILLIS] and vote "nay."

Mr. NEW. I transfer my pair with the junior Senator from Tennessee [Mr. MCKELLAR] to the junior Senator from South Dakota [Mr. NORBECK] and vote "nay."

Mr. DILLINGHAM. I have a general pair with the junior Senator from Virginia [Mr. GLASS]. In his absence, I transfer that pair to the junior Senator from Arizona [Mr. CAMERON] and vote "nay."

Mr. COLT. I transfer my general pair with the junior Senator from Florida [Mr. TRAMMELL] to the junior Senator from Oregon [Mr. STANFIELD] and vote "nay."

Mr. CURTIS. I desire to announce the following pairs:

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN]; and

The Senator from Maine [Mr. FERNALD] with the Senator from New Mexico [Mr. JONES].

Mr. ROBINSON. I transfer my pair with the Senator from West Virginia [Mr. SUTHERLAND] to the Senator from Rhode Island [Mr. GERRY] and vote "yea."

The result was announced—yeas 21, nays 39, as follows:

YEAS—21.

Ashurst	Heflin	Robinson	Underwood
Caraway	King	Sheppard	Walsh, Mont.
Cummins	La Follette	Simmons	Watson, Ga.
Dial	Myers	Smith	
Harris	Ransdell	Stanley	
Harrison	Rawson	Swanson	

NAYS—39.

Ball	Capper	Dillingham	Gooding
Broussard	Colt	Ernst	Hale
Calder	Curtis	France	Johnson
Jones, Wash.	McCumber	Nicholson	Smoot
Kellogg	McKinley	Oddie	Spencer
Kendrick	McLean	Page	Sterling
Keyes	McNary	Pepper	Wadsworth
Ladd	Moses	Phipps	Warren
Lenroot	New	Poindexter	Watson, Ind.
Lodge	Newberry	Shortridge	

NOT VOTING—36.

Borah	Fernald	McKellar	Shields
Brandegee	Fletcher	Nelson	Stanfield
Bursum	Frelinghuysen	Norbeck	Sutherland
Cameron	Gerry	Norris	Townsend
Crow	Glass	Overman	Trammell
Culberson	Harreld	Owen	Walsh, Mass.
du Pont	Hitchcock	Pittman	Weller
Edge	Jones, N. Mex.	Pomerene	Williams
Elkins	McCormick	Reed	Willis

So Mr. ROBINSON'S amendment to Mr. MCCUMBER'S amendment was rejected.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from North Dakota [Mr. MCCUMBER].

Mr. WALSH of Montana. Mr. President, before voting on the amendment I desire to say a word in view of the renewal of the declaration on the part of the Senator from Idaho [Mr. GOODING] that the question before us is as to the integrity of the protective tariff system—a question of free trade on the one side and the protective tariff upon the other.

That view is not entertained uniformly, if it is indeed entertained generally, by the advocates of a protective tariff in this country. I have before me an editorial appearing yesterday morning in the Philadelphia North American. The Philadelphia North American, as everybody knows, is a Republican newspaper, and is issued from a State which has profited very widely and very largely by protective tariff, and issued from a city, Philadelphia, that might properly be spoken of as the very citadel of protection. This paper frankly declares that it is in favor of the protective principle and in favor of a protective tariff, but it is denouncing the measure now under consideration by the Senate, and denouncing it because of the high, excessive, and unjustifiable rates which Senators upon this side have been steadfastly protesting.

There are two particular features of the editorial to which I desire to invite attention, after I have read a portion of it. I shall not read it all, but shall ask that it be incorporated in full in the RECORD. After reciting the history of tariff legislation in a general way in this country and bringing the discussion down to the time of President Roosevelt, the editorial continues:

His conflicts with the reactionary Republican leaders, however, revived the issue, and public discontent with the excessive protection they had put into the tariff law impelled Taft, when a candidate in 1908, to pledge revision downward. After his election, nevertheless, he yielded to the reactionary bosses and signed the iniquitous Payne-Aldrich bill, which revised important schedules upward. The effect of this was that in 1910 the Republicans lost control of Congress, and in 1912 the party was repudiated.

The Democrats put in power as a result of the Republican split undertook to carry out their program of a low protective tariff, modified by removal of all duty from some products, and passed the Underwood bill in 1913. This measure proved so unpopular that in the natural course of events it would have led to Democratic defeat in 1916; but meanwhile the World War had begun, and the virtual cessation of foreign commerce made the act inoperative and removed the tariff issue temporarily from politics.

Returned to power in 1920, the Republican Party has at last undertaken the drafting of a tariff law of its own. In this action it is following precedent, and there is no reason to expect that the process which so often has led to a party's defeat has ceased to operate.

Almost before the votes of the 1920 presidential election had been counted the manufacturing interests began to press for a new tariff bill to meet their ideas of protection. Some of the demands came from manufacturers who had real reason to fear that the Underwood bill would enable large quantities of cheaply made European goods, held back by war conditions, to flow into the country. On the other hand, the most aggressive agitation has been promoted by interests which aim to repeat the old performance of getting the highest duties possible, not for legitimate protection against foreign competition, but as a shelter behind which to raise prices to the domestic consumer.

A contention which has repeatedly been made from this side of the Chamber, notably by the Senator from Alabama [Mr. UNDERWOOD] and the Senator from North Carolina [Mr. SIMMONS]. The editorial continues:

Because the situation in international trade demanded early action, the Republican leaders sought to meet the demands by passing an emergency tariff bill, postponing the enactment of a regular measure until conditions had become stabilized. Affairs in the industrial and commercial world are still far from normal, but the pressure upon the party leaders has been so strong that they have been forced to take up the hazardous task anyway. Moreover, the methods employed differ in no essential way from those used in framing former tariff measures, methods which so often proved disastrous to the party in power.

There are two factors in the present situation which are certain to be used by the exploiters in their efforts to get the kind of tariff they want.

First, the farmers demand protection for their products. Whereas in the past the agricultural interests, particularly those of the West, stood against the high tariff forces of the East, they are now so de-

termined to get protection that they will make trades with the manufacturing interests. Second, costs of production abroad can not be accurately determined, and the American industries will take advantage of that fact and drive for the highest duties obtainable.

For these two reasons it is virtually certain that the new measure will set the rates higher than ever before. There is every indication, likewise, that the consumers will resent the scramble for plunder, and they have shown in the past that eventually they can make their protests painfully effective.

But the situation is complicated this time by still another factor, which is loaded with political and economic dynamite. Under the high tariffs of the past the United States was a debtor nation, and its export trade helped to meet its obligations abroad. Since the war, however, the United States has been the world's chief creditor nation. The balance of trade is billions of dollars in our favor, and besides Europe owes us more than $11,000,000,000 for war loans and deferred interest. In attempts to equalize exchange European countries have sent us nearly all their gold and can not pay in that metal. The only alternative is for them to liquidate their obligations by sending goods, and the tariff bill being framed will set duties so high that European goods will virtually be shut out.

In other words, the United States must soon face the question whether it will cancel most of the $11,000,000,000 of loans or lower the tariff wall so as to admit the European goods that would pay them. Upon the Republican Party, already burdened with a distrusted tariff, will fall the burden of convincing the people that they ought to cancel Europe's colossal indebtedness in order to maintain the high duties enacted.

This newspaper has been persistently optimistic and still is in that mood. It believes that the country is entering an era of prosperity. It is satisfied, moreover, that the Republican Party is the better fitted to carry on great constructive work, and it would regard the return of the Democratic Party to power as a national calamity. Nevertheless, as we contemplate the operation of the old, unscientific, logrolling methods of tariff legislation, we feel it would be uncandid not to acknowledge that we view the situation with concern for the Republican Party and for the Nation.

Mr. President, the protective policy as outlined by the Senator from Connecticut [Mr. McLEAN], for instance, and the Senator from Idaho [Mr. GOODING] has very many persuasive and taking and fetching features. The trouble about the matter is that whenever that policy is announced and is embodied in a measure looking to the imposition of duties with a view to the protection of so-called American industries it inevitably becomes a vicious logrolling measure. Senators from one State want a high protective duty upon certain articles. Senators from another State want high duties upon another article. So the thing goes. There is no hard and fast written agreement about the matter at all, but of course it is understood that there is a general understanding, "You support my duties and I will support yours." The vote in this body upon the measure clearly disclosed that condition of things.

Another thing, Mr. President, is that it invites the interests claiming protection to come here to Washington. They appear before the committees and appeal to them, representing onesidedly their claim for high protective duties, and the consuming public generally are not heard in opposition. Take the item upon which we just voted, the matter of fire brick, produced in the State of Idaho. It is barely possible, I dare say, that some amount of that commodity will reach the great commercial cities upon the coast—Portland, Seattle, and Takoma—and there come into competition possibly with brick, as suggested by the Senator from Idaho, that comes in ballast from Scotland. We put a duty upon fire brick at the suggestion of the Senator from Idaho, while the great people of those great cities, who must buy the brick at an increased price for the construction of homes, are not heard upon the proposition at all. There is no one to represent them.

Finally, Mr. President, it becomes perfectly obvious to everyone that the situation invites its utilization for political purposes. Great, powerful interests in the country come here represented by persuasive and adroit gentlemen and get what they ask from Republican Members of Congress, and it is the most natural thing in the world that they will be expected to return the favor and advantage when election time comes around.

So that, even though one may admit the wisdom of the principle stated in abstract terms, yet when it comes down to the actual application of the principle it becomes a matter of solicitude, as it seems to me, to everyone who is wedded to the principle at all to see that the duties are not such as are oppressive or exist, as stated by this able Republican newspaper, merely for the purpose of erecting a wall behind which the American producer can exact exorbitant prices from the American consumer without the peril of encountering opposition from abroad.

I ask that the editorial may be printed in the RECORD in full.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the North American, Philadelphia, Friday, June 2, 1922.]

TARIFF PITFALLS.

Now that the Republican leaders are unable to hold back tariff legislation any longer, and it has become the dominant issue in Congress, it may be well to emphasize some facts and opinions which have behind them the weight of public acceptance.

The first is that a protective tariff is as essential to the business life of this Nation as food is to human existence. It is as much a specific for certain industrial ills as quinine is for malarial fever. But a protective tariff, in the same way as overeating or overdosing, aggravates maladies instead of curing them. The tariff treatment should be administered as scientifically and conscientiously as any powerful drug employed as a remedial agent. The history of the American tariff shows that while there have been instances of mishandling and abuse of the policy, on the whole, it has operated to the incalculable benefit of the country.

A second fact is that the century-old conflict between the theories of free trade and protection ended in America several years ago in favor of the latter principle. So long ago as 1894, leading Democrats in the Senate joined with the Republicans in opposing drastic reduction of duties; and the last tariff bill passed by the Democratic Party, although admitting a large number of products free, was, in fact, a protective measure. It may be said that the controversy was officially brought to a close when President Wilson sent a special message to Congress advising effective tariff protection for the American dyestuffs industry. Today there is in Congress not a single outspoken advocate of free trade. Protection in principle is no longer a real issue between the Republican and Democratic Parties; the division is merely as to the extent of protection that shall be given.

Ever since the protective tariff policy was initiated by Alexander Hamilton, the greatest constructive statesman for the formative period of the Republic, it has been an important issue between two opposing schools of political thought. The economic structure of the country in Hamilton's time was almost wholly agricultural. He acted upon the belief that the United States would not be able to establish and maintain complete independence so long as it had to look to England for manufactured goods. He further held that this could not become a great and prosperous Nation until it had established an economic balance by developing its industrial capacities as well as its agricultural resources. Hamilton's Federalists, their Whig successors, and the Republican Party of the last 60 years have upheld the protectionist doctrine, while the Democratic Party, following the Jeffersonian tradition, stood until recent years for free trade or a tariff for revenue only.

Throughout the entire period the tariff issue has been a factor in virtually every congressional and presidential contest. During the last 40 years, especially, it not only has influenced elections but repeatedly has driven one party or the other from power.

The Garfield-Arthur administration, for example, faced growing criticism of the existing high duties, and to meet this Congress in 1883 made a general revision of the tariff; but the changes did not satisfy the public, and in 1884 the Democrats won the Presidency for the first time since the Civil War. Cleveland inaugurated a vigorous assault upon the protective policy, and his party in the House prepared a bill embodying drastic reductions. Republican control of the Senate prevented legislation, and the issue dominated the 1888 campaign, in which Harrison defeated Cleveland.

The McKinley Act of 1890 embodied the idea of high protection, and two years later the administration was defeated, Cleveland being elected the second time, on a pledge of tariff reduction. The result was passage of the Wilson Act of 1894; but although this measure was so far from the Cleveland idea that he let it become a law without his signature, it enabled the Republicans to make protection a prominent issue in 1896, and the Democratic Party was overthrown again. In the following year the Dingley bill, with increased duties, was enacted. Thereafter the old controversy was obscured for a time, first by the Spanish-American War and then by the realignment over the policies inaugurated by Roosevelt during his seven years in the White House.

His conflicts with the reactionary Republican leaders, however, revived the issue, and public discontent with the excessive protection they had put into the tariff law impelled Taft, when a candidate in 1908, to pledge revision downward. After his election, nevertheless, he yielded to the reactionary bosses and signed the iniquitous Payne-Aldrich bill, which revised important schedules upward. The effect of this was that in 1910 the Republicans lost control of Congress, and in 1912 the party was repudiated.

The Democrats, put in power as a result of the Republican split, undertook to carry out their program of a low protective tariff, modified by removal of all duty from some products, and passed the Underwood bill in 1913. This measure proved so unpopular that in the natural course of events it would have led to Democratic defeat in 1916; but meanwhile the World War had begun, and the virtual cessation of foreign commerce made the act inoperative and removed the tariff issue temporarily from politics.

Returned to power in 1920, the Republican Party has at last undertaken the drafting of a tariff law of its own. In this action it is following precedent, and there is no reason to expect that the process which so often has led to a party's defeat has ceased to operate.

When a large majority of the American people came to accept the protective principle as a national policy the controversy over free trade as against tariff protection vanished as a legitimate political issue. From that time the question has been purely economic, a matter to be determined on the basis of facts and not of partisan tradition or theory. Intelligent advocates of the protective principle fought persistently for establishment of a permanent, nonpartisan tariff commission, empowered to determine from time to time the amount of protection which might legitimately be given to the various industries, the basic factor being the difference in the cost of production of foreign-made and American-made goods.

This demand derived great momentum when it was made a principal plank in the Progressive platform of 1912, and afterwards was adopted by both the Republican and Democratic Parties. Eventually a tariff commission was established, but before it had begun to function effectively the outbreak of the war stopped imports and at the same time provided an unlimited foreign market for American goods. Moreover, since the return of peace it has been impossible to apply the principles adopted, since the demoralization of European currencies and the chaotic conditions of foreign exchange prevent any sound comparison of production costs here and abroad.

Almost before the votes of the 1920 presidential election had been counted the manufacturing interests began to press for a new tariff bill to meet their ideas of protection. Some of the demands came from manufacturers who had real reason to fear that the Underwood bill would enable large quantities of cheaply made European goods, held back by war conditions, to flow into the country. On the other hand, the most aggressive agitation has been promoted by interests which aim to repeat the old performance of getting the highest duties possible, not for legitimate protection against foreign competition but as a shelter behind which to raise prices to the domestic consumer.

Because the situation in international trade demanded early action, the Republican leaders sought to meet the demands by passing an emer-

gency tariff bill, postponing the enactment of a regular measure until conditions had become stabilized. Affairs in the industrial and commercial world are still far from normal, but the pressure upon the party leaders has been so strong that they have been forced to take up the hazardous task anyway. Moreover, the methods employed differ in no essential way from those used in framing former tariff measures—methods which so often proved disastrous to the party in power.

There are two factors in the present situation which are certain to be used by the exploiters in their efforts to get the kind of tariff they want.

First, the farmers demand protection for their products. Whereas in the past the agricultural interests, particularly those of the West, stood against the high-tariff forces of the East, they are now so determined to get protection that they will make trades with the manufacturing interests. Second, costs of production abroad can not be accurately determined, and the American industries will take advantage of that fact and drive for the highest duties obtainable.

For these two reasons it is virtually certain that the new measure will set the rates higher than ever before. There is every indication, likewise, that the consumers will resent the scramble for plunder; and they have shown in the past that eventually they can make their protests painfully effective.

But the situation is complicated this time by still another factor, which is loaded with political and economic dynamite. Under the high tariffs of the past the United States was a debtor nation, and its export trade helped to meet its obligations abroad. Since the war, however, the United States has been the world's chief creditor nation. The balance of trade is billions of dollars in our favor, and, besides, Europe owes us more than $11,000,000,000 for war loans and deferred interest. In attempts to equalize exchange European countries have sent us nearly all their gold, and can not pay in that metal. The only alternative is for them to liquidate their obligations by sending goods—and the tariff bill being framed will set duties so high that European goods will virtually be shut out.

In other words, the United States must soon face the question whether it will cancel most of the $11,000,000,000 of loans or lower the tariff wall so as to admit the European goods that would pay them. Upon the Republican Party, already burdened with a distrusted tariff, will fall the burden of convincing the people that they ought to cancel Europe's colossal indebtedness in order to maintain the high duties enacted.

This newspaper has been persistently optimistic and still is in that mood. It believes that the country is entering an era of prosperity. It is satisfied, moreover, that the Republican Party is the better fitted to carry on great constructive work, and it would regard the return of the Democratic Party to power as a national calamity. Nevertheless, as we contemplate the operation of the old unscientific, log-rolling methods of tariff legislation, we feel it would be uncandid not to acknowledge that we view the situation with concern for the Republican Party and for the Nation.

The VICE PRESIDENT. The question is upon agreeing to the amendment offered by the Senator from North Dakota.

The amendment was agreed to.

The VICE PRESIDENT. The Secretary will state the next amendment.

The ASSISTANT SECRETARY. The next amendment proposed by the Senator from North Dakota is, on page 217, after line 5, to insert a new paragraph to read as follows:

PAR. 1535a. Brick, not specially provided for: *Provided*, That if any country, dependency, province, or other subdivision of government imposes a duty on such brick imported from the United States, an equal duty shall be imposed upon such brick coming into the United States from such country.

Mr. McCUMBER. I wish to modify the amendment by adding after the word "country" a comma and the words "dependency, province, or other subdivision of government," so as to make the provision definite and certain.

The ASSISTANT SECRETARY. After the word "country," at the end of the proposed amendment, insert a comma and the words "dependency, province, or other subdivision of government."

Mr. UNDERWOOD. Mr. President, I have no objection to that. The Senator has a right to perfect his amendment.

Mr. President, the amendment having been perfected, I desire to move to strike out the proviso. Under the proposal of the chairman of the Finance Committee ordinary brick are seemingly taken from the tax list and placed on the free list and then a proviso is added that, for the time being, at least, establishes an embargo instead of a tax. If the amendment proposed by the chairman of the committee, representing the committee, merely placed common brick on the free list I should most gladly cooperate with him; but he adds the proviso to his motion to the effect that they shall not go on the free list so long as any other country imposes a tax on brick imported from this country.

The effect of the amendment, although seemingly it puts ordinary brick on the free list, will be that instead of putting a tax on such brick at the customhouse we are going to prohibit their importation from the only country in the world from which importations might be expected.

I realize what the proviso means. I have no doubt that some Senators in proposing it think that by imposing reciprocal duties on brick Canada may be induced to lower or eliminate her tariff duty on brick. I myself entertained a similar view 9 or 10 years ago, and in the present law there was an effort made to bring about reciprocity of trade by providing that we should reduce or eliminate our duties when the other country did likewise. As a matter of fact, practically all of those provisions related to Canada; but the experience of 10 years has proven that they are ineffective; that they have not produced results.

I know of no more striking instance of that than the efforts that were made to bring about reciprocity in the trade in pulp wood, the raw material from which newsprint paper is made, in order to provide a necessary supply for the American press on which to print their newspapers. We put such provisions into the bill which is now the law in order to accomplish results of that kind, but they have proven ineffective; they have produced no results.

Everyone who is familiar with conditions in Canada, and will judge of the future with the light of the past staring him in the face, knows that the amendment which the Senator from North Dakota has just proposed will afford no relief whatever. The Senator is seemingly giving us bread, but in reality he hands us a stone, because by his amendment he makes the tariff wall higher than it was when bricks were left on the tax list. The Senator now proposes to put bricks on the free list if Canada puts them on the free list, knowing that Canada will not reciprocate. Therefore his proposal in reality is to put an embargo on brick coming in from Canada, brick being one of the materials from which the homes in America must be built. Therefore I have moved to strike out the proviso. If that be done we may have some little competition, some little threat against a great monopoly which is preventing the building of homes in America; but that monopoly will rejoice and welcome with open arms the proposal of the Senator from North Dakota, knowing that instead of a tax behind which they may stand and exercise their powers of monopoly they are going to have a wall built over which nothing can come.

Mr. President, I am in favor of reciprocity in trade and commerce between the United States and Canada. The Senator from Idaho [Mr. GOODING] this morning justified his position in contending for a duty on brick by stating that Canada imposes a duty on brick imported from the United States. Of course, if we are to enact laws only for the interest of those who manufacture and are to have no regard for those who must consume, that argument may be sound; but to follow the argument to its logical conclusion, if our neighbors propose to raise a tax on food, then we must burden our consumers with a tax on food, no matter in what dire stress they may be for the necessities of life.

But I wish to answer the Senator's argument from another standpoint—not one of reason but one of fact. The contention is made that we must tax goods coming from Canada, because Canada taxes goods coming from the United States. Where does the responsibility lie—with the Canadians or with ourselves? At this good hour it lies under the dome of this Capitol, here in the United States Senate. More than 10 years ago a Republican President, realizing that there were no stronger bonds that might tie a people together than the bonds of commerce and trade, proposed a treaty or understanding with the Dominion of Canada under which we might have at least partial reciprocity in trade. His party was then in power in both branches of the Congress. He negotiated a treaty with Canada and submitted it to the Congress for ratification. A Republican Congress, wedded to the idol of protection, wedded to the belief that the only way a manufacturer could exist in this country was to build a prohibitive wall around the United States and allow nothing to come in that seriously affected him, regardless of the effect on the American people, defeated the proposal of their President. A few months afterwards, in response to the mandate of the American people, a Democratic majority took possession of the House of Representatives. The Republican President who proposed this reciprocal arrangement with Canada, whereby she should lower her gates to our commerce and we should lower our gates to hers, sent for me to come to the White House and asked, if he called an extra session of Congress, if the Democratic Party would pass a bill providing for reciprocal trade with Canada; and, after consulting my colleagues, I assured him that it would be done. The extra session of Congress was called. I introduced the bill, and it passed the Congress, was signed by the President, became the law of the land, and is now on the statute books.

Unfortunately, when the matter was submitted to the Canadian Parliament, Laurier, then Premier of Canada, went to the country on the proposal. Canada was not prepared for the issue, and on account of other issues being involved the opposition came into power, the Conservative Party, and no action was taken for nearly a decade as to reciprocal tariff duties. Then the reaction came. The Conservative Party lost control of the Parliament. It was dissolved, and they went to the country, and the Liberals, who favored reciprocity in trade be-

tween the United States and Canada, were returned to power by an overwhelming majority, and are in power to-day.

I know, because I talked to him personally in regard to the matter before he was selected as Premier of Canada, that the present leader of the Canadian Government favors reciprocity in trade relations between these countries. I know that he sent one of the ministers of his Government to Washington within the last few months to feel out the present administration as to whether they were willing to act under the law of the land, the law that never has been repealed, the law that has been on the statute books in favor of reciprocity with Canada for nearly 10 years, and join with Canada in a reciprocal treatment that would encourage the trade of both nations; and I have been told that this minister of the Canadian Government, their representative, was received with slight courtesy in Washington, and sent back to his home with the understanding that this administration will not recognize the principle of reciprocity between Canada and the United States, notwithstanding it is a law on the statute books.

If you really wanted Canada to reduce the tax on brick so that American brick could flow across the border and at certain points Canadian brick could come into this country and compete, your administration in an hour could vitalize the proposition, could make it a living entity, without waiting for the passage of this tariff bill; but you do not want it. You ordered the Canadian envoy home, you repudiated the action of a Republican President, and you spit upon the law of the land; so I say that when you add to this amendment, seemingly in favor of allowing brick to come into this country without a tax, a proviso that it shall not come in if Canada levies a tax against brick, you are putting a joker into this bill, you are sandbagging your own proposal by putting on it a proviso that means the erection of an embargo instead of a tax.

Mr. LENROOT. Mr. President, will the Senator yield?

Mr. UNDERWOOD. Yes; I yield.

Mr. LENROOT. I should like to ask the Senator whether it is not true that Canada was well satisfied with the Underwood law, and would be satisfied to-day but for the emergency tariff act, because under the Underwood law the rates upon imports from Canada were, as a rule, very much less than the rates imposed by Canada upon imports from the United States?

Mr. UNDERWOOD. I will say to the Senator candidly that when the present law, which the Senator calls the Underwood law, was passed, it was passed shortly after a bill was passed recognizing reciprocity between Canada and the United States; and with a view to encouraging reciprocity of trade and commerce between Canada and the United States I did not attempt, so far as I was concerned—and I think I can speak for the committee that sat with me and wrote the bill—to establish embargoes against Canadian trade.

I have often been charged with being a free trader, but I never have been a free trader. I do not believe in a protective tariff; I do not believe in embargoes against commerce; but I believe it is a convenient way to raise revenue to levy reasonable taxes at the customhouse that do not interfere with reasonable importations from abroad and do not place embargoes on trade, and I am more in favor of that proposition between the United States and Canada than any other country in the world.

The Canadians are our brothers in kin. Only recently they have been our brothers in arms. No country on this globe made greater sacrifice for the cause of the Allies than did the Canadian soldiers. Hundreds of thousands of American farmer boys crossed the line and builded their homes in Canada. As far as I am concerned, I would make the trade relations between this country and Canada as free and full as possible. I would tear down the impediments to trade. I would welcome the tying to this country of Canada, and the tying to Canada of the United States of America, by bonds of trade that would make us inseparable for the future, make us brothers in commerce, brothers in war, and brothers in kin.

Mr. McCUMBER. Mr. President, I can readily understand why one who believes in free trade can also be a sincere friend of the reciprocity agreement that was entered into between this country and Canada under President Taft; but I can not agree with the philosophy of the Senator from Alabama in his description of what that meant to the United States and to Canada, and whether that law is still alive.

Let us see the conditions.

President Taft presented his scheme for reciprocity with Canada, in which most of the agricultural products, which were the things the Canadians desired to get rid of, should come in competition with the agricultural products of the United States, while most of the manufactured products would be reasonably well taken care of. It seemed to touch the heart of the manufacturing section of the country, but it did not appeal to those who believed in the principle of protection and not merely the selfish ideals of some of the protectionists.

That was submitted to one Republican Congress, and I think I did as much as any one Senator in battling against it. It was defeated; and then, as the Senator from Alabama says, the President of the United States consulted with the leader of the Democratic forces in the country. He made a mistake, I think, when he did that. I think he should have consulted with the Republicans rather than with the hereditary enemies of Republican principles; and, as the Senator from Alabama says, a coalition was made between a few of those who represented the manufacturing interests and the whole Democratic Party, and it was an unholy alliance which was strongly repudiated by the American people at the next election.

Mr. POMERENE. Mr. President——

The VICE PRESIDENT. Does the Senator from North Dakota yield to the Senator from Ohio?

Mr. McCUMBER. I yield, with pleasure.

Mr. POMERENE. The Senator has referred to those who believe in protection as opposing the Canadian reciprocity legislation.

Mr. McCUMBER. I said those who believe in protection as a principle, and not as a matter of local benefit.

Mr. POMERENE. I recognize that fact, but my recollection is that there were a very large number of Republicans who voted in favor of the reciprocity legislation. Does the Senator mean by his statement to say that the Republicans who voted for that reciprocity legislation were not protectionists?

Mr. McCUMBER. No, Mr. President; I stated that there was a certain element of the manufacturing interests, whose interests were not injured in any way, who joined in the movement for Canadian reciprocity, while what would be called to-day the farm bloc was earnestly against it.

It went over to the next session. The alliance was formed, and, as I remember it, with a solid Democratic vote in favor of it, and a few Republican votes on this side in favor of it, considerably in the minority upon this side, we passed the Canadian reciprocity pact. Then it was submitted to Canada, and it was submitted to the voters of Canada, and the voters turned it down.

I am not discussing whether they acted in accordance with their own interests or whether they were governed, as I believe they were, by what they considered a patriotic principle to stand by their own country and to develop it as a manufacturing country; but the fact is that it was repudiated by a vote of the Canadian people.

There was an offer on one side. The other side refused the offer, and refused it in the strongest way they could refuse it. It was an offer to take effect at the time it was passed, not 10 years thereafter, or 20 or 30 years thereafter. It was an offer, and the offer was refused. That ended it. The law, so far as it remained upon the statute books, was and is a dead letter. It is not a law to-day.

When the Democratic Party came into power, they did not recognize it. They immediately passed a tariff law as though we had never made an offer of that character. Then the Republican Party came into power again, and it recognizes that that was an offer, that the offer was refused, and that that was the end of the proposition.

The Senator says that a representative from Canada came down here and received scant courtesy, as he understands. On the contrary, the representative of the Canadian Government discussed the matter with me, asked candidly whether we regarded that law as an open offer still in existence, and I told him candidly that we did not. He came down to see whether there would be any possibility of renewing the reciprocity offer, and suggested that if it was offered again they would accept it, and I candidly informed him that it would not be offered again. That was courteous. He said that was the view he had gotten from everyone he had talked with upon the subject, that it would be useless for them to attempt at this time to renew the Canadian pact.

I do not think the argument which the Senator from Alabama makes, based upon the reciprocity agreement, is a very good one when you consider the result. One of the strongest elements of objection against the Taft administration throughout the United States was the Canadian reciprocal agreement. I do not say that there were not other matters which were taken into consideration, but that was the chief objection to his administration.

I know a great many people now claim that the only issue in the last campaign was the issue against a league of nations or an agreement with other nations. There were a great many issues which entered into the last campaign, and it would be unfair to say that any one of them was the only issue in that

campaign. There was a mighty big change in the vote from one side to the other, but it was not due to that alone, although it was an important feature in the dissatisfaction with the last administration.

Let us see whether the Senator from Alabama is entirely consistent. He says he believes in reciprocity, and I want the Senator's attention to this, if I may have it, because I want to place his own argument in the RECORD. The Senator says he believes in a reciprocal relation with Canada. Very well. If we say to Canada, "We will give you free trade in brick on condition that you give us free trade in brick," that would be a reciprocal arrangement, and the Senator believes in it. But if we say to Canada, "If you put 25 per cent ad valorem upon brick, then we will put 25 per cent on brick," that is not reciprocal, according to the Senator. What is the difference? The only difference is between a reciprocal tariff and a reciprocal free trade. They mean exactly the same thing.

Under the free trade we say to Canada that we will allow their brick to come in free just so long as they allow us to export brick to Canada free. Under the tariff reciprocal—and that is all it is—we say to Canada, "We will continue to levy a duty of 22½ per cent ad valorem just so long as you fix a duty of 22½ per cent ad valorem." They are both reciprocal. The one depends upon the other. The moment Canada takes off her 22½ per cent duty, off goes our 22½ per cent duty.

I think I would agree with the Senator from Alabama upon one element in this matter, and that is the idea of taking somebody else's tariff as a basis in fixing ours. I say most candidly that I do not like that method of making a tariff bill; but the majority of the committee always rules in determining what rate we shall fix upon any item, and while I must say it is perfectly fair in this instance, I do not think it would be a good policy to adopt that principle to any great extent. It is just as fair as a reciprocity proposition is fair, but we ought to levy our duties according to the needs of the country, especially if it is a protective duty, and that which we reserve to ourselves we ought to grant as a right to our neighbors.

Mr. POMERENE. Mr. President, my friend from North Dakota, always very frank and candid, said he did not like the method which was adopted, but he was overruled by the majority of the committee.

Mr. McCUMBER. I did not say I was overruled, but I stated that the majority ruled.

Mr. POMERENE. The Senator may put it in that way. Does not the Senator think, under those circumstances, that his colleagues on the floor of the Senate ought to have the benefit of his direct vote on that proposition, the same as in the committee?

Mr. McCUMBER. My direct vote is to sustain what we considered to be for the best interests, as the committee recommended. If it were a question of great importance, if it were important at all, I might reserve the right to take a different view. But we must act together on this side in putting a bill through, the same as Senators do on the other side.

Mr. POMERENE. They must act together, if they are going to put it through, I think that is true; but, in other words, the Senator's position, as I construe it, is that on the floor of the Senate he is willing to vote against his convictions as expressed by his vote in the committee.

Mr. McCUMBER. No, Mr. President; the Senator knows nothing about my vote in the committee.

Mr. POMERENE. I simply know what the Senator has said on the floor of the Senate.

Mr. McCUMBER. I said that the majority of the committee voted in this way, and I am not stating what was my vote or the vote of any other Senator. I think, so far as this particular item is concerned, the rate is fair. I am stating as a general proposition that I do not believe in the policy of fixing our tariffs on the basis adopted by some other country in fixing its tariff, and in that I think the Senator from Ohio will undoubtedly agree with me.

Mr. POMERENE. Of course, Mr. President, we should not be absolutely bound by what other countries do, I agree with the Senator: but I have regretted ever since the day of the defeat of the reciprocity pact that it was not adopted. I think we would be better off, and every element of society would be better off to-day.

Mr. McCUMBER. I know the Senator thinks that way, but I believe we would be immensely worse off. However, we will not stop to discuss that now.

The Senator from Alabama says that by allowing this tariff we do not afford relief against a monopoly. I want the Senator to stop and think of that for just a moment. You have free trade now, have you not? You have no relief against the monopoly, have you? The monopoly was formed under free trade; it exists under free trade; and if it was formed and exists under free trade I do not believe the Senator thinks for a single moment that it is going to be continued by reason of charging for a few thousand brick which come over from Canada.

But if I understand it correctly, the monopoly has already been dissolved; a consent decree has been entered through the activity of the Attorney General. If that be true, then the monopoly which was created under free trade, which drew its breath of life under that benign policy, has gone out of existence by reason of the action of the law itself.

I want to read to the Senator a little statement from the Tariff Commission report. I have stated many times that this tariff will affect only a few localities along the Canadian border; that it will not affect in any degree the general price of brick throughout the United States. I want to substantiate that by the finding of the Tariff Commission.

Mr. POMERENE. Mr. President, the Senator said in this connection that it would not affect the price of brick except in a few localities.

Mr. McCUMBER. That was my statement.

Mr. POMERENE. Of course the Senator will concede that it will result in increasing the price of brick to the consumers of brick in those localities, will he not?

Mr. McCUMBER. It may. I assume that it probably will in those localities.

Mr. POMERENE. I think that is a more accurate statement.

Mr. McCUMBER. If Canada would just relieve from the 22½ per cent tax, we would have free brick on both sides. But this is what the Tariff Commission says:

> Structural brick is the most important clay product manufactured in the United States. The production surpasses in value the total production of pottery and chinaware or of all other clay products.
>
> Suitable clays are widely distributed, and bricks are produced in every State and Territory except Hawaii and Alaska.

Now note:

> The industry is local in character, very few bricks being shipped more than a few miles. Local demand is enormous near the large centers of population.

Now, that is correct. On account of the weight of the brick, as a rule it is shipped only a few miles.

Mr. CALDER. Mr. President——

The PRESIDING OFFICER (Mr. JONES of Washington in the chair). Does the Senator from North Dakota yield to the Senator from New York?

Mr. McCUMBER. I yield.

Mr. CALDER. I will state that all the common brick used for structural purposes in and about New York City come from points within 100 miles of that city. We have great brick plants on the Hudson River and along the Shrewsbury River and the Newark Bay section of New Jersey. Rarely, if ever, to my knowledge have brick come to that city on the railroad cars. They always come in on barges floated down the river or across the bay from New Jersey.

With the permission of the Senator, I may add that just now brick are higher than at almost any other period in the history of the article in and about New York. Last spring they sold at the wharf at about $12 per 1,000, and now $17 is being paid. That comes from the shortage of brick, due to one of two causes,—either a premeditated effort upon the part of producers to limit the supply or else perhaps their neglect in estimating the amount needed.

We are having in New York to-day the greatest building boom the city has ever seen. We are using more brick than we ever used before. When the brick come to the wharf to-day they are so much in demand that those who need them are bidding for them. We have had a small shipment of brick from Denmark recently. Those brick are being imported——

Mr. POMERENE. How many of those brick came in?

Mr. CALDER. Only a few thousand; but they are being brought in for the purpose of determining whether or not they can be used to advantage and whether they can compete with our brick in the way of price. The freight charges on them from Denmark would be about $4 a thousand. The price of the brick in Denmark is $7 a thousand, which would make $11 a thousand, plus the profit in the handling. If the price of domestic brick continues as at present, at the price now being asked, there is no doubt in my mind that more brick will come in from Denmark.

Mr. McCUMBER. Mr. President, about the imports of brick, this again is the finding of the Tariff Commission:

> Imports of common brick are negligible and are confined to shipments from Canadian plants to points in the United States near the international boundary.

I think that is all I need to read from the Tariff Commission report. It is a matter which affects, as I stated before, a few Canadian brickkilns that manufacture a few thousand brick,

as against the American, right across the line. I admit that it is not important. It will not affect in any way the general price of brick throughout the United States, but it may possibly affect the price to some extent along the border on a few thousand brick that would be imported without the tariff duty.

Now, Mr. President, I want to say in addition to what I have said before that I regard the Canadian reciprocity pact as a dead letter in the law, for the reason that the offer was made and refused. The conditions have changed since. We have made new laws upon the subject on the assumption that it has been declined and that the offer is no longer extant; but to be certain that no one could claim that it was still in existence, we have inserted a special provision in the bill repealing it.

Mr. UNDERWOOD. Mr. President, I realized that the Senator was proposing to repeal a law which he says did not exist. That is why I did not interrupt the Senator in his argument, because I know it is very much more satisfactory to speak without interruption.

I stated in my argument that the responsibility for the lack of reciprocity and for the fact that Canada insisted on high duties against the commerce of the United States rested in this Chamber with the Republican Party, and it does. The Senator from North Dakota has admitted it. Of course he announces, with a sweep of his hand as if he were the law itself, that because Canada did not at once accept the proposal for reciprocity in trade which was made by the United States, that it was wiped out; that it does not exist; that it has gone. Well, Mr. President, it is a new way to repeal a law by the negative action of some person.

But, as I intended to point out, the Senator, as he has admitted, makes the argument that there is no reciprocity law existing. He says he told the minister of the Canadian Government that it no longer existed; but, as I intended to point out to him, which he admits, he thinks it so much a law, so much on the statute books, that he puts a clause within the borders of the bill to repeal it.

Of course the policy of the Republican Party is so much against reciprocity in trade that they are going to repeal an offer for reciprocity in trade, and the Senator is only admitting, more strongly than I could state the case, what I charged him with a moment ago, that the reason why we did not have reciprocity in trade, the reason why Canadian duties rested on American commerce, was because it is the policy of the Republican Party that the gates of commerce should be closed between this country and Canada. I am sure the Senator from North Dakota will not deny it. He pleads guilty to the charge in the items of this bill.

Now the Senator says that he, in part, is willing to have reciprocity and he evidences it by this clause in the bill, and asserts with much pride that although he repudiates reciprocity in trade by the terms of his bill repealing that law, that we authorize it now; that this is reciprocal trade; that this provision brings about reciprocity in trade, and we are only waiting for Canada to lower the door. The Senator knows as well as I do that we do not bring about reciprocity of trade on one item. An item that we want lowered going into Canada may be of no interest whatever to Canada or not of enough interest to cause her to lower her tariff rate, and that usually is the case. If Canada admits one of our products into her country, it is usually because of her goods not coming into our country and there being a balance of commerce on this side of the line for that particular article. Of course, if she is going to admit that article into her country, she wants some article from Canada to flow in here.

Mr. McCUMBER. Mr. President——

Mr. UNDERWOOD. I yield to the Senator from North Dakota.

Mr. McCUMBER. Will the Senator tell me why Canada refused the reciprocity offer?

Mr. UNDERWOOD. Canada refused it for many reasons. I will not say that Canada was not opposed to reciprocity in trade at that time, because I can not say it. I am willing to admit the record as it was made at that time. But the Senator knows that there were many other questions which drove the Laurier Liberal Party out of power, and returned the Conservative Party. The Senator knows that western Canada, made up largely of sons and descendants of American citizens, voted with the Conservatives and drove the Laurier government out of power. Yet those same men in western Canada to-day make up almost unitedly the majorities of the liberal government under Mackenzie King, the premier of that government. There has been an entire reversal of sentiment, and because the sentiment a few years ago was not willing to meet us is no argument against our accepting the opportunity when sentiment in Canada has changed and we can make reciprocal trade an existing fact instead of a theory as the Senator would make it on brick.

The Senator knows we can not bring about reciprocal trade on one item. He knows it is absurd to contend that we can. More than that, we have contended here for hours about this schedule. It is not because the item is so great——

Mr. McCUMBER. Mr. President, may I ask the Senator another question?

Mr. UNDERWOOD. Certainly.

Mr. McCUMBER. If it is wicked to put it in this bill at this time, was not that principle equally wicked when the Senator put it in his bill on wood pulp in 1913?

Mr. UNDERWOOD. The Senator listens, but his ears are not open. Half an hour or an hour ago I answered that question, as the Senator would know if he had been listening to me, by stating that I had tried the same experiment in the law which is now on the statute books, because I was very anxious to produce a condition in reference to pulp wood, used as the raw product in the manufacture of paper, in order to give the great American press an opportunity to get its paper on reasonable terms. I tried the experiment and I said to the Senate in my opening statement that it failed. It did fail. Now I think that as it failed after I tried it I certainly would be unkind, when I see the Senator walking into a mistake of this kind, stumbling over impediments in his path, if I did not point out to him where they lay in the path so that he might avoid them in the future.

I admit that in quite a number of instances in the present law it was tried. Of course we tried it from the viewpoint that we hoped a general reciprocity treaty would soon be accepted by Canada, but it was not. The hour has come within the past few months, or within the year, when it can be accepted, but the Senator says himself that he told the emissary of the Canadian Government who called on him about it that he repudiated it, that it was lost, that it was only a temporary matter; that he told him the proposal was only temporary, and that he would not accept it now; and yet he thinks it is so temporary that it is necessary to repeal it from the statute books.

Mr. McCUMBER. If the Senator will allow me, I stated I wanted it repealed so that no one among the Canadians could claim that it was the law, simply to make absolutely certain a matter in which we might be in dispute ourselves.

Mr. UNDERWOOD. I do not contend that the party in power if it has the votes to do it can not repeal any law it wishes to repeal. I do not say that they have not the power, or that we are committed, morally or otherwise, to continue to carry out this agreement. If the party in power wishes to repudiate it, they have the right to repudiate it; and they are going to do it, as they proclaim in this bill; but I say the responsibility of repudiating it must rest with them. They can not contend that as to the little item of brick that they are proposing reciprocity with Canada when in fact they are trying to impose an embargo instead of a tax on the importation of brick.

The Senator from North Dakota said that the President 10 years ago was very unwise to consult with the Democratic leader, but I want to call to his attention the fact that at the time the reciprocity act was passed there were distinguished Senators on the Republican side of the Chamber who voted for the bill. Among them were the Senator from Connecticut [Mr. Brandegee], the Senator from Massachusetts [Mr. Lodge], Senator Penrose, of Pennsylvania, the Senator from Connecticut [Mr. McLean], Senator Crane, of Massachusetts, the Senator from Washington [Mr. Poindexter], Senator Root, of New York, and the Senator from Michigan [Mr. Townsend], and so on. The bill was not only supported by Democrats, but I have read a list of names of Senators who stood at the forefront of the Republican Party when the bill went through. It is now to be repudiated by being thrown out of the window and telling the envoy of a foreign Government before Congress acts, before it is known that there is a majority behind the proposal, he can go home, that because the arrangement was not accepted at once it is a dead letter.

Mr. President, I do not think the country will take that view of the question; but what I wish to point out is what this proviso will accomplish. It is proposed that brick shall be on the free list unless another country from which they may be imported levies a duty on bricks imported from the United States. There is nothing on the free list, as the Senator knows, except that which is expressly put on the free list; we shall have no dispute about that, and as bricks are not put on the free list, unless Canada by her affirmative action in

removing her tariff consents that the American people may bring in brick untaxed, bricks must be taxed at some rate.

Mr. McCUMBER. If I understand the Senator from Alabama correctly, I desire to say that I do not think he has carefully read the amendment. The committee propose, first, to place this paragraph under the free list items.

Mr. UNDERWOOD. Undoubtedly.

Mr. McCUMBER. Of course, it is recited before the colon that these articles are placed upon the free list.

Mr. UNDERWOOD. Undoubtedly.

Mr. McCUMBER. Then it is provided that against imports from countries which levy a duty upon the American commodity there shall be levied an equal duty.

Mr. UNDERWOOD. Undoubtedly. I have aided in writing tariff bills, and I am familiar with the fact that when articles are placed upon the free list they are not to be taxed unless a proviso is inserted stating that they shall only go on the free list on the happening of a certain event; and it is provided in the amendment not against all countries—for there is only one country involved in this controversy, and that is Canada—that bricks shall come in free of duty in the event that Canada admits bricks from this country free. Senators know that Canada does not admit brick from this country free. When we send home her envoy who comes here and asks for reciprocity in trade and tell him that it is an absurd proposition to contend for reciprocity in trade now, of course, Senators do not expect that Canada is going to eliminate her duty on bricks under those circumstances. Of course, practically no bricks come into this country from any country except Canada. I do not contend that the imports from Canada are very great, although they afford relief to certain American citizens; but the principle for which Senators on the other side are contending is, in my judgment, wrong when it requires that taxation shall be imposed on building material with which to build the homes of America. I think it is wrong to pick out a few little special interests and put into their pockets money which belongs to the taxpayers of America.

I want to know under which clause of the bill bricks are to fall. The Senator knows that Canada has a tax on bricks; the Senator also knows that this proviso will apply to Canada and that bricks will not be on the free list. So they must be provided for somewhere else. Now, I want to ask the Senator to answer the question whether when a duty is imposed at the customhouse on bricks coming from Canada, so long as Canada does not put American brick on the free list, whether they are going to fall under paragraph 201 of the bill providing that bath brick, chrome brick, and fire brick not specially provided for, shall pay a duty of 25 per cent ad valorem or whether they are going to fall under the basket clause. I do not recall what the tax under the basket clause is.

Mr. McCUMBER. I can answer the Senator; but I must say to the Senator most candidly that it seems to me he has not carefully read the amendment, because it says that there shall be then imposed "an equal duty"; that is, a duty equal to the duty that is imposed by the country from which they are imported. So brick would not fall under any other clause; but if they are imported from Canada, and Canada levies a 22½ per cent duty on American brick, of course the duty on brick from Canada would be a 22½ per cent ad valorem. They would not fall under any other clause.

Mr. UNDERWOOD. The Senator from North Dakota has satisfactorily answered my inquiry. I wanted to know under what paragraph brick from Canada were going to fall, because the tax has not been repealed. The Senator has very kindly answered the question that Canada has a tax of 22½ per cent on imported brick, and therefore, under the proviso, so long as the Canadian rate stands—and he admits that it will stand—brick imported into this country from Canada will be taxed 22½ per cent.

Now, what do we find the condition to be. We have fought for two days over the taxing of bricks.

Under the House bill "fire brick, weighing not more than 10 pounds each, not glazed, enameled, ornamented, or decorated in any manner," carried a rate of duty of 10 per cent, and as reported to the Senate by the committee, the rate of duty was 15 per cent ad valorem. That covered common brick. Now, the Senator admits that the proviso which he offers will raise the ad valorem rate on brick. I am not talking about the theory of their being on the free list, but I am talking about the fact that while the Senator and the committee are saying to the Senate they are going to provide free brick, yet they are putting brick in this bill under a proviso which in fact will result in levying a duty of 22½ per cent on common building brick. Am I wrong?

Mr. McCUMBER. On brick from Canada.

Mr. UNDERWOOD. On brick from Canada, the only country whence competition comes. The Senator admits I am right. Now, after discussing the brick item for two days, the Finance Committee come in here and say, "We are giving relief to the American people," yet we find a joker in the amendment, so that instead of reducing the tax on bricks, in reality the tax is being increased from 15 per cent ad valorem, as originally provided in the bill, to 22½ per cent on bricks coming from Canada, the only country from which come any material amount of bricks.

I hope, therefore, Mr. President, that my motion to strike out the proviso will prevail, and on that I ask for the yeas and nays.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Alabama to the amendment of the Senator from North Dakota, on which the yeas and nays are demanded.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. HARRISON (when his name was called). I transfer my pair with the junior Senator from West Virginia [Mr. ELKINS] to the senior Senator from Nebraska [Mr. HITCHCOCK] and vote "yea."

Mr. WARREN (when his name was called). Announcing my pair as earlier in the day, I vote "nay."

The roll call was concluded.

Mr. COLT. Making the same announcement as before, I vote "nay."

Mr. NEW. Making the same announcement with respect to the transfer of my pair as on the last preceding vote, I vote "nay."

Mr. HALE. I transfer my pair with the Senator from Tennessee [Mr. SHIELDS] to the Senator from Ohio [Mr. WILLIS] and will vote. I vote "nay."

Mr. ROBINSON (after having voted in the affirmative). I have a general pair with the Senator from West Virginia [Mr. SUTHERLAND]. I transfer that pair to the Senator from Texas [Mr. CULBERSON] and will let my vote stand.

Mr. JONES of New Mexico. I transfer my general pair with the Senator from Maine [Mr. FERNALD] to the Senator from Missouri [Mr. REED] and will vote. I vote "yea."

Mr. SIMMONS. I wish to announce the unavoidable absence of my colleague [Mr. OVERMAN]. He is paired with the Senator from Wyoming [Mr. WARREN]. I will let this announcement stand for the day. If my colleague were present, he would vote "yea" on this amendment.

Mr. CURTIS. I have been requested to announce the following pairs:

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from Delaware [Mr. BALL] with the Senator from Florida [Mr. FLETCHER];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN]; and

The Senator from New Jersey [Mr. FRELINGHUYSEN] with the Senator from Montana [Mr. WALSH].

The result was announced—yeas 22, nays 42, as follows:

YEAS—22.

Borah	Harrison	Rawson	Swanson
Caraway	Heflin	Robinson	Underwood
Cummins	Jones, N. Mex.	Sheppard	Watson, Ga.
Dial	King	Simmons	Williams
Gerry	La Follette	Smith	
Harris	Pomerene	Stanley	

NAYS—42.

Broussard	Johnson	McNary	Ransdell
Bursum	Jones, Wash.	Moses	Shortridge
Calder	Kellogg	New	Smoot
Cameron	Kendrick	Newberry	Spencer
Capper	Keyes	Nicholson	Sterling
Colt	Ladd	Norris	Townsend
Curtis	Lenroot	Oddie	Wadsworth
Ernst	Lodge	Page	Warren
France	McCumber	Pepper	Watson, Ind.
Gooding	McKinley	Phipps	
Hale	McLean	Poindexter	

NOT VOTING—32.

Ashurst	Elkins	McKellar	Shields
Ball	Fernald	Myers	Stanfield
Brandegee	Fletcher	Nelson	Sutherland
Crow	Frelinghuysen	Norbeck	Trammell
Culberson	Glass	Overman	Walsh, Mass.
Dillingham	Harreld	Owen	Walsh, Mont.
du Pont	Hitchcock	Pittman	Weller
Edge	McCormick	Reed	Willis

So Mr. UNDERWOOD's amendment to Mr. McCUMBER's amendment was rejected.

The PRESIDING OFFICER. The question now is on agreeing to the amendment offered by the Senator from North Dakota.

The amendment was agreed to.

Mr. McCUMBER. Mr. President, I now ask to return to paragraph 203, page 32; and I propose, on behalf of the committee, to move to strike out all of paragraph 203, and then to insert, on page 217, after line 24, a new paragraph, to read as follows:

PAR. 1541 a. Cement, Roman, Portland, and other hydraulic.

That would place it upon the free list. Then the same provision that we had in reference to brick:

Provided, That if any country, dependency, Province, or other subdivision of government imposes a duty on such cement imported from the United States, an equal duty shall be imposed upon such cement coming into the United States from such country, dependency, Province, or other subdivision of government.

It would then be necessary, if that is carried, on page 33, line 14, after the word "ton," to insert a semicolon and the following:

Other cement not specially provided for, 20 per cent ad valorem.

Mr. UNDERWOOD. Mr. President, I desire to ask a question of the Senator from North Dakota. I have not the Canadian tariff before me; and I want to ask, under this change, with the proviso in, what rate of duty cement would bear coming from Canada?

Mr. McCUMBER. I will turn to it in a moment.

Mr. UNDERWOOD. I ask for information, because I have not the information.

Mr. McCUMBER. I will look it up.

Mr. UNDERWOOD. I should like to have the information before we vote.

Mr. McCUMBER. If the Senator will indulge me a moment, I have the book here and will have the matter looked up.

The PRESIDING OFFICER. The Senator from North Dakota proposes an amendment, which will be stated.

The READING CLERK. It is first proposed, on page 32, to strike out paragraph 203, relative to Roman, Portland, and other hydraulic cement, as amended; then to insert, on page 217, after line 24, a new paragraph, to read as follows:

PAR. 1541a. Cement, Roman, Portland, and other hydraulic: *Provided*, That if any country, dependency, province, or other subdivision of government imposes a duty on such cement imported from the United States, an equal duty shall be imposed upon such cement coming into the United States from such country, dependency, province, or other subdivision of government.

Mr. McCUMBER. I will say to the Senator that the Canadian tariff reads as follows:

Cement, Portland, and hydraulic or water lime, in barrels, bags, or casks, the weight of the package to be included in the weight for duty, per hundred pounds, 11 cents.

Mr. UNDERWOOD. In other words, so far as Canada is concerned, if this amendment is adopted it will raise the tax on cement from 5 cents per 100 pounds, as provided in the bill, to 11 cents per 100 pounds?

Mr. SMOOT. Unless she changes her rate.

Mr. McCUMBER. That is correct; just the same as in the case of brick, if Canada retains her duty.

Mr. UNDERWOOD. The Senator from North Dakota has already admitted that the policy of the Republican Party is to have no reciprocity, and therefore, of course, we can not expect to change Canada, and the Senator's amendment protects American cement 11 cents per 100 pounds instead of 5 cents.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from North Dakota.

Mr. ROBINSON. Mr. President, I move to strike out the proviso in the amendment offered by the Senator from North Dakota.

It is perfectly apparent that from a practical standpoint the tax on cement under the pending amendment, in so far as it relates to importations from Canada, will be more than double the rate if the provision in the bill is adopted; and unless the proviso be stricken out the effect of adopting the amendment of the Senator from North Dakota will be to increase the tax on cement imported into the United States from Canada by more than 2 to 1 over the amendment proposed originally by the committee in paragraph 203.

For these reasons I move to strike out the proviso.

Mr. SIMMONS. Mr. President, I was somewhat pleased when I heard early this morning that the majority members of the Finance Committee, in their accustomed morning sessions at which they are now revising the tariff bill, rewriting the schedules, and cutting down the rates, from day to day under the compulsion of the fire that has been leveled at the high rates, had decided to put cement upon the free list. We had only to a limited extent discussed the item of Portland cement. There was no committee amendment to the House rate, and therefore it was not before the Senate; but an amendment to the same paragraph by the committee relating to other cements than Portland cement and Roman cement—the duty of 5 cents a hundred upon Portland and Roman and other hydraulic cements—was discussed, and the facts with reference to that provision were laid before the Senate, and the utter lack of justification for any such duty upon this material was strongly argued.

It was then made clear that cement is one of the chief factors in practically all the heavier construction that is going on in the United States to-day, including road building, which is more active to-day in every State in the Union than it ever has been before; and I suppose that as the result of this discussion, and the exposure of the injustice of imposing such a rate of duty, the committee decided to surrender in this case, as it has, I am glad to say, surrendered in many other cases heretofore, and as I hope it will continue to do in rewriting this outrageous bill from day to day. Probably they consider it too late for them to recall the bill and rewrite it altogether, because we have gone nearly through three of the larger schedules.

It is enough, Mr. President, to assure the country that even the majority members of the committee itself, in the light of the discussions, have now been driven to the conclusion that the bill's rates are unjust and unfair to the people of the country, and that they ought to be revised. I suppose that that admission as to the rates they have already revised can be taken as an admission that the rates generally carried in this bill are too high, and are oppressive and burdensome to the people, and that they ought to come down.

I was delighted when I heard that they were going to put this article of common use upon the free list, just as they had claimed they had done with reference to brick; but in the case of cement and in the case of brick it turns out that they seek to accomplish the same purpose by the use of what is known as a countervailing duty. Probably the committee felt that the brick and cement were articles of such common use, so well known and understood by the people of the United States, that it would be a little risky, after the exposures which have taken place with reference to those items, to have them specifically carry these high rates, and that they could camouflage their action and accomplish practically the same purpose by the application of a countervailing duty.

The present proposition of the committee is that we are to have absolutely free trade in cement unless that cement happens to come from Canada, unless it is produced across this artificial boundary which separates the United States from Canada. If it comes in from any other country by the Atlantic Ocean or the Pacific Ocean, or from south of us, then it is to be free. If it comes to our Pacific ports from Japan or from China, although I do not know whether they make it there, or from any of the Pacific Ocean countries where they do make it, it is to be free. If it comes in from Europe and enters any of the American ports on the Atlantic coast, then it is to be free. But if it comes from our neighbor, Canada, it is to bear a duty equal to that levied by Canada, not the 5 per cent duty which the committee proposed as a just and fair rate when they brought this bill in, and from which they have now receded as to other countries, for the reason, I assume, that they have come to the conclusion that it is an unjust rate to impose as against other countries. Notwithstanding they have admitted that as to other countries this duty is unwarranted, as to Canada they propose now to more than double that rate by the imposition of a countervailing duty.

What have we against Canada? Why should we single her out for discrimination? We recently passed here an emergency tariff bill by which we practically embargoed most of the things which Canada sold to us, and that in face of the fact that Canada was, next to Europe, our best customer in all the world. As a result of that onslaught against the purchase by us of Canadian goods, the things they sold us in exchange for the things they bought from us—and they were only selling us about half as much as they bought from us—as the result of that onslaught upon our neighbor country, which has always been our friend, which is inhabited largely by people of the same nationality, speaking the same language, who live right at our door, in one short year we have lost over $600,000,000 of our Canadian business, and our trade with Canada to-day is only about one-half of what it was before the enactment of the so-called emergency tariff act.

Now, after having dealt her this body blow, it is proposed to establish free trade with all nations in cement except with Canada, and to impose in the case of Canada a rate twice as high as the committee attempted to impose against the world, but from which they have receded, thereby admitting and confessing that it was an unjust and an unwarranted duty.

I remind the country that in the Senate debates on the so-called emergency tariff bill I predicted just what has since happened with respect to the disastrous effects that bill, if en-

acted, would have upon our commerce with Canada. I said we must expect retaliation in that event. Now, having already lost as a consequence of the emergency tariff approximately one-half our Canadian trade, the Republican majority members propose to cut the vitals out of what remains of it by striking this wanton and foolish blow at our friend and neighbor, while admitting free of duty the cement of all other countries.

Mr. TOWNSEND. Mr. President, I do not propose to delay the action of the Senate on this amendment for a moment.

I remember that several years ago I voted for Canadian reciprocity. Subsequent events show that I made a mistake. Some of the Senators who are now condemning the committee because it imposes a reciprocal duty on one or two items, differed from the rest of us who favored reciprocity with Canada at that time. They strongly condemned this policy, but now they wish to surrender our market forever to those who place tariff duties on our products.

The Senator from North Carolina [Mr. SIMMONS] seems to suffer a great deal because of what he says is the injustice that is to be done to Canada in that we propose to have free trade in cement with all the rest of the world except Canada, and in that case we propose to almost double the duty that was originally proposed.

He does not tell the country that under this tariff Canada gets exactly the same benefit granted to every other country. Canada can have free trade with the United States in cement if she will remove her duty. This reciprocal provision does not apply to Canada alone, but applies exactly alike to all countries.

I am informed on good authority that in the country for which the Senator seems so solicitous, just across the river from Detroit, there is being erected now by the United States Steel Trust, as it has been called so frequently, a mammoth cement plant. Under the present law in Canada that corporation will have an advantage of the market in Canada over the United States to the extent at least of 11 cents per hundred pounds protection. It is planting its factory over there because it is for its advantage to do it. It would not do it otherwise. It gets an advantage over its United States competitors.

It is an easy matter for Canada to remove her duty of 11 cents against the United States and get free trade on cement. It is up to her. We are not discriminating against her. We are saying, "We will treat all nations fairly and exactly alike. All nations that furnish reciprocal privileges to us get their cement free of duty, and those nations which impose a tariff on our product will have the same tariff imposed on their product."

That is the story, and that is all there is to it. This statement that we are discriminating against Canada is not, in my judgment, in accord with the real facts in the case. This tariff will, if the Senate amendment is adopted, impose no duty upon foreign cement except upon cement coming from a country which imposes a duty upon cement from the United States, and in that case the duty will be self-imposed by such country.

Mr. CUMMINS. Mr. President, I regret that I feel compelled to differ from the conclusions of the Senator from Michigan [Mr. TOWNSEND] with regard to this proposition. He was in favor of the proposed reciprocity treaty with Canada a few years ago. I was against it, and I am just as much opposed to it now, or would be if it were before the people of the country, as it was then.

This is not a reciprocal arrangement. Properly speaking, there can be no such thing as reciprocity in competitive products. We may be able to make a bargain with another country respecting the admission of her products into our markets and the admission of our products into her markets of a different character, but there can be, at least from my standpoint, no such thing as reciprocity in a retaliatory duty. This is retaliation, not reciprocation.

If I believed that the cost of production of cement produced in the United States was, generally speaking, greater than the cost of the production of cement in Canada, I would favor a duty not only upon the importations from Canada but upon the importations from every country in the world. But I do not believe that there is any substantial difference between the cost of producing cement in Canada and the cost of producing it in the United States.

Mr. ROBINSON. Will the Senator yield at that point?

Mr. CUMMINS. I yield to the Senator from Arkansas.

Mr. ROBINSON. Directly in point with the statement the Senator has just made, I call attention to the information in the tariff surveys, furnished by the Tariff Commission, at page 261. The statement is:

> Most Canadian plants operate at a disadvantage, since fuel must, in most cases, be imported from mines in the United States.

The indications are that if there is any difference in the cost of production, the difference is in favor of the plants in the United States.

Mr. CUMMINS. I believe the information contained in the extract just read by the Senator from Arkansas is true, and it is fortified by the fact that Canada, a country which believes in protection, just as we do, has thought it necessary to levy a duty of 11 cents a hundred pounds upon this commodity in order to prevent the United States from taking her market, and it seems most astonishing that it is necessary for Canada to provide a duty to prevent importations from the United States and that at the same time it is necessary for the United States to levy a duty in order to prevent importations from Canada. The two things are not consistent with each other.

Mr. McCUMBER. Mr. President——

The PRESIDING OFFICER. Does the Senator yield to the Senator from North Dakota?

Mr. CUMMINS. I yield.

Mr. McCUMBER. I wanted to ask the Senator if the real question is not a question of freight rather than of cost of production?

Mr. CUMMINS. I have heard that mentioned several times, but the moment the article from Canada reaches the United States it must pay American freight rates. Canadian cement can not move upon railroads within the United States at any lower rate than that paid on the American product. Even if our freight rates, as compared with Canada's, may be a little higher, although I think that has been somewhat exaggerated, it can not be said that our freight rates warrant a duty upon this generally produced and widely used product.

Now, I would like to see a tariff law that all Republicans can defend, at least those who believe in protection. I believe in it as profoundly as does the Senator from North Dakota, but, in my judgment, some of the duties that are being imposed in the bill will do more to disparage the doctrine of protection among the American people than other duties in the bill, properly imposed, will do to sustain that doctrine.

I differ from my Republican friends on some of these points, and I do it with great regret. I expect to uphold the committee upon the greater number of the articles concerning which I know nothing, but there have been some mistakes, from my standpoint, made in the composition of the tariff bill that ought to be corrected, and this is one of them. I do not believe in a duty of 5 cents a hundred upon cement, nor do I believe in attaching a duty upon the importations from Canada because Canada has found it necessary to levy duties in order to prevent importations from the United States. I think we ought to be governed by the ancient and honorable rule that we have announced so often, that we intend to protect our manufacturers to the extent of the difference in the cost of production at home and abroad.

Mr. McCUMBER. Mr. President, I want the attention of the Senator from Iowa for just a moment. Let us admit, now, as a rule that we need no protection whatever. That is why we are proposing the free list. If the Senator will look over the exports, imports, and production, he will find that for every pound we import we export 6 pounds. The importations, I think, would not amount to 1 per cent of the production.

I am making that general statement, or admission, if you desire to call it such, in order to clear the ground that we are really giving a free importation, with the exception of possibly less than 1 per cent of our production, and that 1 per cent coming from Canada is not going to increase or have any particular effect upon the general market price of cement. It is too small to have that effect. What is it for, then? It is simply to protect or, if I may put it in another form, to give the American who lives upon the Canadian border the same opportunity to sell his product into Canada that the Canadian has to sell his product in the United States.

Here is an imaginary line with a little American factory on one side and a little Canadian factory upon the other side. Neither of them produces in any appreciable amount as compared with the entire production. The Canadian goes into the market of the American with free hands and has no duty to pay. The American who goes on the other side of the line has to pay about 40 cents for every barrel of cement that he takes across the Canadian border. While the Senator from Alabama [Mr. UNDERWOOD] says that when he put this like arrangement into his tariff law it failed, I am not so certain that it will fail in reference to cement. It may be that if we put this rate upon the Canadian cement factory, they will be willing that the American on the opposite side of the boundary line shall have the same privileges they have, but if we do fail we have not

done any harm particularly to the general public who buy cement.

Mr. CUMMINS. Mr. President, may I interrupt the Senator at that point?

Mr. McCUMBER. I yield.

Mr. CUMMINS. The Senator from North Dakota says it will do no harm. From the abstract standpoint I think it will do great harm, if it did not influence the movement of a single ton or pound of cement, because it furnishes one of those illustrations so often used and so effectively used by our friends upon the other side of the Chamber to disparage the doctrine of protection.

But I think it will do harm in another way. I think the great object of a protective tariff law is to employ and keep in employment the maximum number of people living in the United States. The Senator has said that we export to Canada 6 pounds of cement——

Mr. McCUMBER. No; the Senator is mistaken. I say that we export 6 pounds of cement to 1 pound that we import, but not as to Canada.

Mr. CUMMINS. How much of that comes from Canada?

Mr. McCUMBER. I think very little, if any. I would have to look up the record, but I think only a very small amount.

Mr. CUMMINS. I understood the Senator to say we exported to Canada 6 pounds of cement to 1 imported from Canada, but I may have misunderstood him.

Mr. McCUMBER. No; it is exported to Cuba and South American countries. I do not know whether there has been a pound exported to Canada.

Mr. CUMMINS. However that may be, when we enter into a war of tariff with Canada, and Canada pursues the same plan that some of our people want to have pursued by this country, I assume she would raise her duty to 50 cents and exclude all American cement upon the theory that it is better for that dominion that her cement be manufactured within her own borders. That, it would seem to me, might result in a very serious diminution of labor performed in the United States.

But I do not myself believe in retaliatory tariffs. I believe in legislating for the welfare of the people of the United States. It is better for us to admit cement from Canada, manufactured under conditions certainly not more advantageous than ours. Then, let us take that Canadian cement which comes in under those conditions. It might at times serve as a slight restriction in certain parts of the United States on the enormous prices that have been charged in recent times and that may be charged in the future.

I did not intend to take up the time of the Senator or of the Senate, but I wanted the Senate to know why I can not vote for a retaliatory duty upon cement.

Mr. McCUMBER. Mr. President, if, of course, we say that it is a retaliatory duty, the Senator's position would be correct from that standpoint. But during the first 10 years since 1900, according to the Tariff Commission's report, practically all of our imported cement came from Belgium, France, and Great Britain, and once in a while some would come over from Canada. Of course, the war came on and that cut off practically all the trade in cement from across the ocean. After the armistice they began to renew gradually and are continuing gradually the imports and the foreign product is now beginning to come in. I think, inasmuch as we imported large quantities in the earlier part of this century, that as soon as we reach normal conditions, or at least as soon as those countries get upon their feet again, they can import and will import to this country a sufficient amount to affect the price here and to prevent any combination, unless the combination is made with the foreigner as well, to impose an extortionate price against the American people.

But the Canadian exports only along the Canadian line for a short distance into the United States and the Tariff Commission so states:

> The bulk of the increase is Canadian cement from plants located near the border.

If they are any distance from the border the freight rates are such that they do not get into the interior. Now, within that zone in which both the American and the Canadian trade, the American is cut off from the Canadian side while the Canadian has the free use of the American side. While we may not like the policy, at the least the Canadian can not complain if we say to him, "We will give you free imports for your one-tenth of 1 per cent, or whatever it may be, provided you will give us free importation in your territory."

Mr. ROBINSON. Mr. President, cement of the class embraced in this paragraph—namely, Roman, Portland, and hydraulic cement—is now on the free list. Notwithstanding that fact, the industry is so completely organized throughout the United States that the prices which are being charged for the product are excessive beyond reason or justification.

The uses to which cement is put are in a measure public uses. It is used in a large number of industries of a public or quasi-public character. It is the most important building material and is constantly increasing in its importance, taking the place in many localities of brick and other building material. The United States, according to the Tariff Commission report, was the pioneer in concrete building and industrial construction, and the production and consumption per capita of concrete exceeds that of any other nation.

As stated by the Senator from North Dakota [Mr. McCUMBER], domestic production exceeds consumption. It is impossible, in my judgment, to determine what effect a tariff on this commodity will have on prices. Certainly the imposition of this duty is not intended to reduce prices. The only justification offered for it is to enable American producers of cement to maintain the trust-controlled prices along the Canadian border. The Senator from North Dakota gave a pathetic illustration of a little cement factory on the American side and a factory on the Canadian side, and appealed for protection in behalf of the American factory. He neglected to say, however, that both factories—certainly it is true of the American factory—now charge twice as much as the commodity ought to sell for.

On another occasion in discussing this subject I put into the RECORD a statement of the manner in which this industry is controlled, and also some information concerning the rapid rise in prices of cement during the last five years. My recollection is that cement is now selling for close to five times as much as it was selling for approximately five years ago. In view of that fact, I agree with the Senator from Iowa [Mr. CUMMINS] absolutely that the friends of protection, who, I admit, under the political situation that now prevails in the Congress, are entitled to write this bill, are discrediting the theory of protection by imposing high rates on commodities that are admittedly trust controlled and for which exorbitant prices are now being charged.

When the committee reported this bill it evidently felt that a rate of 5 cents per 100 pounds was adequate for protection purposes, but now, under the guise of putting cement on the free list, they have actually more than doubled the tariff on this important construction material. The original committee amendment contemplated the imposition of 5 cents per 100, while the pending amendment contemplates the imposition of 11 cents per 100, unless Canada sees fit to change her law, on all importations from Canada, and, as stated by the Senator from North Dakota, the principal importations come from Canada. So long as that is true, if we write the pending amendment into this proposed law, instead of putting cement on the free list, we shall be more than doubling the high rate originally proposed by the committee. It does not take a logician or a philosopher to see that.

It is absurd to say that cement shall be put upon the free list, but that importations of it from countries that impose duties on cement made in this country shall bear a rate of 11 cents per 100, when all the while we know that the principal effect of the provision will be to require every consumer of cement who is within access of the Canadian factories to pay a tribute of 11 cents per 100 pounds to the monopoly which dominates the industry in every State of the Union, including Michigan.

One can not buy one pound of cement from any factory in the State of Michigan for one cent less than he can buy it from any other factory in Michigan. One can not buy any quantity of cement from any factory that sells cement in the city of New York for less than he can buy it from any other producer of cement.

Mr. CARAWAY. And the Senator will also remember that if one is not within the territory contiguous to that particular factory he can not buy it at all.

Mr. ROBINSON. Yes. If he is not located in the territory allotted to the factory, he can not buy it at all. The country is divided into zones; the price is fixed; the quantity that may be sold to a consumer is limited; and it must be used upon particular works. If not used upon the job for which it was purchased, the consumer who uses it upon some other job can not thereafter purchase cement from anyone.

With this condition prevailing in the industry, with the public already being charged from two to three times what the commodity ought to sell for, with a condition which everybody realizes prevails in all our great cities respecting the building of houses, with gigantic enterprises involving road construction and other similar enterprises in progress throughout the United States, the Congress certainly should not take any steps calculated to fasten upon the country conditions that have

become intolerable in regard to this great industry. If the proposed rate will not tend to increase the price or maintain the price, then there is no justification for it on the theory that it is a protective tariff.

I have been hoping that the result of the proceedings instituted by the Department of Justice would be the dissolution of the Cement Trust, so that this country may go forward with its great construction enterprises; but this step, under the disguise of a free-trade amendment is, in fact, more than doubling the original high protective amendment which was proposed by the committee.

It is for this reason that I have moved to strike out the proviso and to leave this important material on the free list. When American factories reduce their prices so that they may receive ample but not extortionate and unreasonable profits I shall be willing to see written into a Republican tariff bill provisions for their protection.

Mr. HEFLIN. Mr. President, it would greatly please all American consumers of cement if the Republican Senate would place this important material on the free list. As has just been pointed out by the able Senator from Arkansas [Mr. ROBINSON], cement is a very important building material. While he was speaking I thought of the many ways in which we use cement. Watering troughs for fowls and animals are made of cement; walk ways in yards are made of cement; foundations for buildings—dwelling houses, schoolhouses, and churches—are made of cement; it is used in building sidewalks in towns and cities; it is used for paving streets; it is used for the construction of bridges and for the building of public roads. Not only that, Mr. President, but dwelling houses and even steamboats are actually being constructed of cement.

Mr. POMERENE. And business blocks.

Mr. HEFLIN. Yes; and business houses are being constructed of cement; the homes of the people are being built of cement. In fact, not a thing that can be thought of is in more general use except air and water and salt, and the Republican majority have imposed a tariff tax on salt. Cement is a very important commodity in daily use everywhere.

Now, Senators on the other side come here and propose a tax upon this very essential material. They talk about the increased prices affecting only people who live along the Canadian border, but the Senator from Arkansas is absolutely right in what he has said regarding that, for when the price of cement is increased on the Canadian border by an import duty levied against the small amount of cement which would come over into the United States every producer in the United States is given an opportunity to say "Congress has placed a tariff upon cement, and that is why cement is costing you more than before." He may add for your benefit, "I do not think Congress ought to have put that tax on; but it is on, and, of course, you must pay it." The cement manufacturers will hide behind that excuse to filch money from the pockets of the cement consumers of America.

by it—and the only people who are going to profit by it are the manufacturers who are interested in the 4,000 items upon which it imposes excessive duties—the cement manufacturers along the Canadian border can come here and tell the majority members of the committee that they are having a hard struggle with their competitors across the Canadian border; being framed purely for the manufacturers, who are to profit but what heed is paid to the man who comes and tells you, "I have got to build a bridge across a branch or creek running through my farm," or "I want to build a dwelling house, a stable for my horses and for my cow, and a house for my hogs out of cement." He has not been considered or consulted. He can say, "You are taking money out of my pocket and giving it to the cement producers in the United States. They ask you to do it, but you did not consider me or consider my interest."

Yet the Senator from Idaho [Mr. GOODING] repeatedly gets up here and says, "This tariff bill was not framed behind closed doors." Every Democratic member of the committee will substantiate the statement which has been made here time and time again that no Democrat was permitted to sit in the committee when the Republican Senators were framing this bill. If that is not true, let some Republican member of the committee deny it. They framed the bill by themselves, and no Democrat was there. The Democrats were shut out. Oh, Mr. President, nobody had access to that "chamber of horrors" except the profiteers and the tariff barons. When they tapped on the door and said, "Open sesame," it flew open, and they walked in, and when they laid their silk hats and kid gloves and gold-headed canes down on the table the Republican members of the committee bowed and smiled like a bunch of green-neck Muscovy ducks over a mud puddle full of fat tadpoles. [Laughter.]

There was never anything like it, and yet when we get up here and tell those who framed this monstrosity that we ought to have a right to combat the committee proposals in behalf of the American consumer they grow impatient and become indignant because we are exposing to the public item after item on which they add more and more to the tax burden of every consumer in America.

I want to see every legitimate manufacturing concern in America prosper; but, Mr. President, when I hear Republicans over there speaking about what is going to become of this pet manufacturer and that I think about the poor fellow in other walks of life out yonder who is now eking out a miserable existence. You are not considering him. The Senator from North Dakota [Mr. MCCUMBER] was talking a while ago about that poor little cement producer on the Canadian border and how hard it was for him to struggle along in competition with his neighbor just over the line. I want to ask him what you said to the farmer who was fleeced, robbed outright, by your deadly deflation policy carried out by the Federal Reserve Board? Your leaders said, "He has got to take his medicine." I said, "He can not live under this thing unless you furnish him money and credits to carry on his business." Your side said, "He must take his medicine."

What did you mean by that? You meant that if he could not live producing agricultural products he could quit. That is what you meant by it. You did not extend any helping hand to him. You did not pick him up and cry out that he was being ruined, when Wall Street was hoarding the gold supply of the country, and had a Federal Reserve Board that did its bidding day by day, to the robbery and ruin of the farmers of the country. What were you doing then for the millions of farmers in the South and West? I never heard you crying out then that the Government must come to their rescue; but now this little cement producer on the Canadian border is being held up by you as an example and a pitiful object, and you are going to his rescue and making that an excuse to tax every consumer of cement in America. That is what you are doing.

What happened to the farmers of the South by the thousands under your deflation policy? They quit the farm, driven from it, sold all their products and lost the farm; and with farm gone and debts still hanging over their heads, they have gone to towns and industrial centers to work for wages. That is what happened under your deflation system. Now you want to tax those men and tax everybody else who has to use cement for the benefit of the Cement Trust of the United States. That, I repeat, is what you are doing.

More cement is made in the State of Michigan, I believe, than is produced in all the world outside—4,000,000 barrels last year, I understand, against the importation of 5,000 barrels, or something like that—and then you say we need a tariff tax against the imports of cement into the United States! Senators, it is utterly ridiculous, inexcusable, and indefensible. That is the situation that we have.

Where is this thing going to stop? My good friend, the junior Senator from Arkansas [Mr. CARAWAY], suggests, and I think he is right, that it will stop at the next election. Oh, it will be a glorious thing when we can get the men and the women in America who wield the power of the ballot to stand up and face those who stood here day after day and night after night under whip and spur taxing, taxing the American masses at every turn in the road. That is precisely what you are doing. Four thousand captains of industry, 4,000 tariff barons, have demanded this pound of flesh from nearest the heart of the American consumer, and under the skillful leadership of the surgeon from North Dakota you are proceeding to cut it out. You are doing this for 4,000 tariff barons in the 4,000 items in your bill. For what purpose? To increase the profits and the fortunes of these men.

What of these millions of farmers who will not get out of debt for five years to come? What of them? Nothing. You Republicans say, "Let them take their medicine." That is what you said; and now we are told that your President is thinking of reappointing the present governor of the Federal Reserve Board. Well, what have I said all the time? Have I not told you all the time that Wall Street and the money changers of the East kept him in? Have I not told you all the time that they would not permit him to be turned out? What is this going to do but prove what I said?

Mr. WATSON of Georgia. Mr. President——

The VICE PRESIDENT. Does the Senator from Alabama yield to the Senator from Georgia?

Mr. HEFLIN. I am glad to yield to my friend from Georgia.

Mr. WATSON of Georgia. I will inform the Senator from Alabama that at this time, in one county in the State in which I in part represent—a county which was one of the most thriving farming counties in Georgia—three pages of the county paper are taken up with advertisements of land to be sold for taxes.

Mr. HEFLIN. Mr. President, that is true of nearly every county in the South, and it is true of many, many counties in the West, if not all of them. The State of Texas by a resolution of the legislature extended the time for the payment of taxes, and I understand that the State of Mississippi did the same thing. These two Commonwealths took these steps in order to save from ruin their farmers. What were you saying, then, should be done for them? "Take their medicine." What about these 4,000 captains of industry and tariff barons? Why, they say, "We want this increase." You say, "All right; you shall have it. What is your reason for it?" "Why, I want to increase my profits. I want to increase my fortune through party machinery in Congress by the use of the taxing power." That is what he would say if he told the truth.

Mr. GOODING. Mr. President——

The VICE PRESIDENT. Does the Senator from Alabama yield to the Senator from Idaho?

Mr. HEFLIN. I yield to the Senator from Idaho.

Mr. GOODING. I want to ask the Senator if he will give us the date when this deflation started in this country?

Mr. HEFLIN. Mr. President, it started when a Republican Congress in control of both Houses passed a progressive interest rate, permitting 40 and 50 per cent and higher rates, and put in the hands of that board a knife with which to cut the throat of the farmer, the merchant, and the banker and everybody else in the agricultural sections of the country. That is when it started. There was not a ripple on the surface when Wilson was in health and the Democrats were in control of both branches of Congress.

It was when the Republican Party took control, and you put this progressive interest-rate measure through both Houses. It was when the Senator from Illinois [Mr. McCORMICK] passed through this body a deflation resolution, calling on this board to know what it was doing to deflate, and so forth, and when the governor of that board, W. P. G. Harding, who truckled to your party to hold his job and get reappointed, and to do some other things—that is when it started. You have kept him in power; the President could have asked for his resignation in the spring of 1921, just like he did that of the district attorney in the State of Texas, but he never asked for it—it was when that governor of the board commenced playing to your party to retain his position, and wrote back to the Senator from Illinois [Mr. McCORMICK] that he would not hesitate to use every power under the law to bring about that deadly thing. That is when it started. It started after President Wilson was stricken down and the Democrats lost control of the House of Representatives and the Senate. It started when you were using this deflation policy for political purposes in the South and the West, and well did the farmers of the South and West pay for it. My God, how they suffered!

Mr. GOODING. Mr. President——

Mr. HEFLIN. I yield to the Senator from Idaho.

Mr. GOODING. I will ask the Senator from Alabama if the Federal Reserve Board, all the time that this deflation was going on, did not have the support and indorsement of the Secretary of the Treasury, a Democrat?

Mr. HEFLIN. He was not a Democrat. He was appointed as a Democrat.

Mr. GOODING. I am talking about the Secretary of the Treasury under President Wilson.

Mr. HEFLIN. The Senator is talking about Houston and I am talking about his not being a Democrat at heart. Houston was Secretary at the time of which the Senator is speaking. I repudiated him long since. He betrayed the Democratic Party just as W. P. G. Harding betrayed it, and both of them, in betraying the Democratic Party, betrayed the people of the United States.

Why, this man W. P. G. Harding is so eager for the continuance of his connection with certain interests that he went up here the other day in Pennsylvania, when he was hardly acquainted with Secretary Mellon, and just fell all over himself saying that Mr. Mellon was "the greatest Secretary of the Treasury the country had ever had." Now, think of that, O ye of little faith [laughter]—the greatest the country had ever had. Why, Mr. Mellon had not been in that service long enough to cut his eyeteeth, and here is this man, with the month of August looking him in the face, when his term will expire and when he is going out, just taking on up there in Pennsylvania over Mr. Mellon, whom he pronounced "the greatest Secretary of the Treasury the country has ever produced."

When Mr. McAdoo was in there he was the greatest, according to Harding's idea, and then when Houston came in he was the greatest, according to his idea. They are out and gone. Mellon is now in a position of power, where he can say a good word to the President, and he suddenly becomes "the greatest Secretary of the Treasury that the country has ever had." Oh, this man is a great palaverer, this financial high priest of Wall Street.

The people are already burdened, yes, and overburdened, with taxes, Mr. President, and I rose simply to say a word in behalf of the American consumers, and to protest against this tariff tax now being levied by the Republican Party. It is a fortunate thing indeed that we do have elections every two years in the United States. It is fortunate that the man and woman out yonder, who will have their money taken from them without being given an opportunity to protest, without being heard at all by your committee, who were held up and robbed, shall confront on the hustings these men who have robbed them for the benefit of somebody else. I know that against that you will have heavy campaign funds, as you always do. You will have large contributions made to you by these men in whose name and in whose behalf you levy these taxes against the American people. You will have the influence of some of the press, subsidized agents of your party. Some of the press you can not control; some of it you can. You will have the wherewith given to you by these 4,000 captains of industry in whose interest you invoke the taxing power to try to hoodwink the people, fool them again, and make them think that you have done something for their benefit. You want them to smile as you go through their pockets; but when they meet you on the hustings this time with their ballots in their hands they will have an opportunity to answer you Senators, and I believe that their answer will be absolute repudiation.

Some of your newspapers are admitting now that we are going to beat you and carry the House, and they are saying that the Congress has not been good; that you would not mind the President; that he told you what to do and you would not do it. Now they are trying to shift the burden, and they say they are going to punish you, when you all look alike. You are all in the same boat. The people, Democrats and Republicans, are going to attend to all of you in 1924, because this is but brief authority that you have—only a temporary abiding place for you. You have been weighed in the balance and been found wanting. Well, you know what happened at old Belshazzar's feast. You are just reveling here now with your tariff barons and Newberries and all sorts of juicy financial berries. We are going to stew them all up for you and give you such a concoction in the fall of 1922 and 1924 that will restore to the people the blessed instrumentalities of constitutional government. The tariff barons will weep bitter tears, but the American people will rejoice that the day of their deliverance has come.

Mr. President, I fear that some Senators here have forgotten that this is the people's government and should be conducted in the interest of the whole people. We see the taxing power employed here day after day to take money out of the pockets of one class of people and put it in the pockets of another class.

The average citizen is willing to be taxed to meet the legitimate needs of the Government, but he is not willing to have this taxing power turned over to private individuals and corporations who use it to enrich themselves. You have no right to do that. The people are justified in crying out against this unjust usurpation of power. The title of this measure should be, "A bill to tax the American people for the financial benefit of 4,000 tariff barons in the United States." These men or their agents have been here and told you just what they wanted, and they were all very liberal in their demands upon the taxpayers' money, and you were very generous in granting their requests. But the fellow who is to be taxed, the man whose living expenses are to be greatly increased, you did not have him here. He has not been heard, except as we protest now in his name against the great injustice that you have done him. We did not know what you had done until the case was closed and you had framed your bill when only the Republican members of the committee were present. No Democrat was permitted to be present. But the bill thus framed taxes Democrats, Republicans, and everybody else for the benefit of those who told you what to write in the bill. Those who will repudiate your conduct will be found in the ranks of both parties. The improper use of the taxing power should be condemned by Democrats and Republicans alike. This bill is the worst example of the misuse and abuse

of the taxing power that has been presented to Congress in my day.

Mr. LENROOT. How about graphite?

Mr. HEFLIN. You can not say anything about graphite. The graphite industry here is closed down and the laborers have gone. The foreign graphite producer came in and took control of the American market. You who profess friendship for the American laboring man saw him come out of the American mines, having lost his employment, and you would not come to his rescue. Why? Because the big crucible makers of the United States told you not to do it, and you closed the graphite mines of America, you drove the American laboring man out of those mines, and trafficked to the foreigner the graphite market of your own country. Then you stand up and talk about doing something for the laboring man.

You are not going to do anything against the big interests. Certain big interests have written this bill. They furnish the campaign funds. If they elect a Republican Congress, why should they not write the bill. That is the way they feel about it. These things will happen every now and then, but the people get aroused, and when they do get aroused I have observed that they can do a heap of work around the polling places of the country. You used to talk about beating us in 1920 by 7,000,000, but you have stopped that. Since Pinchot won up in Pennsylvania and the cyclone struck Indiana you have sort of waked up. You realize what is going on in the country.

The people are becoming aroused. They ought to become aroused. They will become more and more aroused as the days come and go, and we show them how you are arranging to take money out of their pockets. The only thing you are doing is to enable somebody else to take money out of their pockets.

Mr. DIAL. Mr. President, what wages did the Senator say are paid to the foreign labor in the graphite mines abroad?

Mr. HEFLIN. Three cents a day for slave labor. They drove out free American citizens from the graphite mines in America and closed the mines for the benefit of graphite mined by slave labor of the Old World at 3 cents a day. Then they stand up and talk about being friends of the American laboring man.

I heard my friend from Idaho [Mr. GOODING] say he expected us on this side to shed tears for the laboring man. I have reminded the Senator from Idaho and others of 7,000,000 laboring men who have already been out of employment under your party's control for months and months. It has come to be a common thing for labor to be out of employment under Republican rule. That has become the order of the day until the man higher up gets ready to start the wheels to running. His robbing process will be employed again in due season. The shepherd usually waits for the wool to grow out on his sheep before he shears them again.

Mr. MOSES. Mr. President——

The VICE PRESIDENT. Does the Senator from Alabama yield to the Senator from New Hampshire?

Mr. HEFLIN. I gladly yield to the Senator from New Hampshire.

Mr. MOSES. I wish the Senator would enlighten the Senate and the country as to who enacted the tariff law under which all this misery occurred to the graphite industry.

Mr. HEFLIN. Mr. President, during the war the Government used some of the product and that industry flourished. This industry was not in existence when the Underwood-Simmons law was passed. It did not amount to anything in the United States at that time.

I want to say to the Senator from New Hampshire that half of the graphite supply of the United States is in my State. It is an infant industry, and the Republican Party would not come to the rescue of an infant. They let this old, hoary-headed monster from the Old World, employing slave labor, come over here and choke an infant to death in the United States.

Mr. MOSES. May I ask the Senator if he voted for a good duty on the product of his own State, namely, graphite?

Mr. HEFLIN. I voted for a wholesome revenue duty. I am not a free trader.

Mr. MOSES. No; not on the products of Alabama.

Mr. HEFLIN. It does not make any difference whether it is in Alabama or not. One of the Senators on the other side reminded me that most of those mines in my State are owned by eastern capital. I said that did not make any difference with me. The owners are American citizens and their investments are entitled to be treated fairly, and when they came to my State and invested their money there, they showed good taste, as well as good judgment, and I want them to have a fair deal. I do not care where the citizen lives, whether in my State or your State.

The Senator from Iowa suggested a thought this afternoon commented on by my friend from Arkansas [Mr. ROBINSON]. Under your theory of protection you are employing one excuse and another to literally plunder the American people. You used to say, "Here is an industry growing up and we should levy some taxes against its competitor abroad, at least until it can get on its feet and get in the game." The Government would derive some revenue, and if incidental benefit goes to the industry, very well. If labor shares it, all right. But, Mr. President, under that boasted protection theory of your party hundreds of fellows who go into business now say, "We are not making as much profit as we would like to make. We will go down to see the Republican Congress and ask that the taxing power be used to increase our profits."

You tax the American people to make certain interests enormously successful in business and these interests write checks for your campaign fund. They feel that they have paid for the privilege of using the taxing power. You have a hodge-podge arrangement, and you are taxing the American people for the benefit of 4,000 captains of industry in the United States.

Senators, what right have you to do that? I ask you, in the name of the toiling masses of America, what right have you to tax the salt that goes into their bread?

Mr. SHORTRIDGE. Mr. President, in the name of the people of Louisiana, let me ask the Senator a question. Is the Senator in favor of a protective tariff on sugar and on rice produced by the good people of that great State?

Mr. HEFLIN. I am not in favor of a high protective tariff duty on anything.

Mr. SMOOT. Only on graphite.

Mr. HEFLIN. I hope that answers my good friend from California. I favor a revenue tax on a great many things. I voted for the Underwood-Simmons revenue tax bill, under which we collect nearly $300,000,000 annually. That shows that I am not a free trader and that we were not for free trade when we levied those taxes. The difference between us is that we are taxing luxuries, in the main, and you are taxing now the absolute necessities of life.

If you tax something I could get along without, I could say, "No; I will not buy it, the price has gone so high. I would probably be better off without it. Excuse me." And I would just walk out of the store. But when you tax salt, which I must have to season my food, to give me health and strength, and to save and season meat, then you touch my pocketbook, and I have to respond and I have to buy.

Then, when you tax cement you tax a common necessity of life, and I have to have that. Then you tax brick; I have to buy brick if I do any building. The other day I saw you tax medicine—yes, you taxed medicine. Under the grinding process of your party you are reducing the people to such a state they can hardly walk, they are so weak; and when they put them to bed and send for the doctor you put a tax on the medicine he is going to give them to bring them back to health again.

Mr. MOSES. Mr. President——

The VICE PRESIDENT. Does the Senator from Alabama yield to the Senator from New Hampshire?

Mr. HEFLIN. Yes; I yield to the Senator from New Hampshire.

Mr. MOSES. I would like to ask the Senator from Alabama to what year he referred when he said there was $300,000,000 of revenue collected under the Underwood tariff law? What year was that?

Mr. HEFLIN. I understand that we have averaged somewhere between $240,000,000 and $300,000,000.

Mr. MOSES. For the benefit of the Senator, I would like to read the figures.

Mr. HEFLIN. Just give them to me in round numbers.

Mr. MOSES. There is no year of operation under the Underwood law in which anything like $300,000,000 was collected. In 1914, during which they had the benefit of the Payne-Aldrich law for a considerable portion of the year, the collections were $292,000,000. The next year they were $209,000,000 under the full operation of the Underwood law. The next year they were $213,000,000; the next year $225,000,000; the next year $182,000,000; and the next year $183,000,000. It is only since the emergency tariff law, a Republican measure, was added to the Underwood law that the revenues have approached anywhere near $300,000,000.

Mr. HEFLIN. How did the Senator vote on the emergency tariff question?

Mr. MOSES. I voted against it.

Mr. HEFLIN. That is what I thought.

Mr. MOSES. But the fact that I voted against it did not make it not a Republican measure any more than the fact that the Senator repudiates Governor Harding makes him not a Democrat.

Mr. HEFLIN. The fact that the Senator did not vote for that bill is something in its favor, perhaps. Anyhow, we will not fall out about figures. I am not quarreling about what the exact figures were, but we derived revenue under the Underwood tariff law.

In 1914 we collected under the Underwood-Simmons law $292,000,000. Of course, the amount fell off when German submarines were destroying millions of tons of commerce. But in 1920 when the war was over and before your emergency tariff went into effect, we collected $323,000,000. These are the figures given by the Department of Commerce.

Here is what is going to happen under your law, if you ever get to operate this thing for any length of time: If $2,000,000,000 worth of goods come in you will take out of the American people's pockets more than $3,000,000,000 in addition by reason of that. That is what you are going to do.

Let me illustrate: Suppose you tax a certain kind of pocketknife 25 cents, we will say. The manufacturer abroad stops sending that knife into the country. He will say, "I can not do it. The high tax you put on it shuts me out." He stops at the border line and his knives cease to come in. The man who manufactures the same knife in America, which he formerly sold at $1, will now sell it for $1.25. You have legislated into his pocket 25 cents on every knife that he sells. Why is that? He will tell the buyer, "They have put a tariff tax on this knife." The customer will say, "But I understand you have not any competition now." "Well, that is true. They have shut out foreign knives, but if you got that knife from abroad and paid the tax it would cost you $1.25, and I am going to add 25 cents onto my knife and you will have to pay it to me."

Under that plan the American Government would not get one cent, and yet you tax every knife buyer 25 cents who uses that particular kind of knife. That is what will happen under your bill. God, and God only, knows how much money you are going to filch from the pockets of the American people through this tax bill. You are going to leave the American people at the mercy of the tariff barons of our country, and they will fill their pockets with money that you have enabled them to extract from the pockets of the people.

Mr. SMOOT rose.

Mr. HEFLIN. Did the Senator desire to say something?

Mr. SMOOT. I thought the Senator was through.

Mr. HEFLIN. What is the Senator's suggestion?

Mr. SMOOT. I was going to ask for a vote on the amendment that is pending.

Mr. HEFLIN. I have no objection to voting on it, but let us have the yeas and nays.

Mr. POMERENE. I ask that the amendment be read.

The VICE PRESIDENT. The amendment will be read.

The ASSISTANT SECRETARY. There are three amendments in one.

Mr. SMOOT. I desire to have each amendment voted on separately. Let the first amendment be stated.

The ASSISTANT SECRETARY. On page 32, it is proposed to strike out the paragraph embraced in lines 13 to 17, both inclusive, in the following words:

PAR. 203. Roman, Portland, and other hydraulic cement, in barrels, sacks, or other packages, 5 cents per 100 pounds, including weight of barrel or package; in bulk, 4 cents per 100 pounds; other cement, not specially provided for, 20 per cent ad valorem.

The VICE PRESIDENT. The question is on the amendment striking out the paragraph just read.

The amendment was agreed to.

The ASSISTANT SECRETARY. The second amendment is, on page 217, after line 24, to insert a new paragraph to read as follows:

PAR. 1541a. Cement: Roman, Portland, and other hydraulic: *Provided*, That if any country, dependency, province, or other subdivision of government imposes a duty on such cement imported from the United States an equal duty shall be imposed upon such cement coming into the United States from such country, dependency, province, or other subdivision of government.

That amendment the Senator from Arkansas [Mr. ROBINSON] proposes to amend by striking out the proviso.

The VICE PRESIDENT. The question is on the amendment of the Senator from Arkansas to the amendment of the Senator from North Dakota.

Mr. ROBINSON. I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. POMERENE. The vote is on the motion to strike out the proviso?

The VICE PRESIDENT. It is. It is on the amendment proposed by the Senator from Arkansas to the amendment of the Senator from North Dakota.

The reading clerk proceeded to call the roll.

Mr. KENDRICK (when his name was called). I transfer my general pair with the Senator from Illinois [Mr. MCCORMICK] to the junior Senator from Massachusetts [Mr. WALSH] and vote "yea."

Mr. ROBINSON (when his name was called). I transfer my pair with the Senator from West Virginia [Mr. SUTHERLAND] to the Senator from Texas [Mr. CULBERSON] and vote "yea."

Mr. WARREN (when his name was called). Making the same announcement as before, I vote "nay."

The roll call was concluded.

Mr. NEW. Repeating the announcement as to my pair and its transfer, I vote "nay."

Mr. HALE. Making the same announcement as before, I vote "nay."

Mr. HARRISON. Making the same announcement as before, I vote "yea."

Mr. COLT. Making the same announcement as before, I vote "nay."

Mr. STANLEY (after having voted in the affirmative). I transfer my general pair with the junior Senator from Kentucky [Mr. ERNST] to the Senator from Montana [Mr. MYERS] and allow my vote to stand.

Mr. CURTIS. I wish to announce the following pairs:

The Senator from Delaware [Mr. BALL] with the Senator from Florida [Mr. FLETCHER];

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN]; and

The Senator from New Jersey [Mr. FRELINGHUYSEN] with the Senator from Montana [Mr. WALSH].

The result was announced—yeas 26, nays 35, as follows:

YEAS—26.

Borah	Jones, N. Mex.	Pomerene	Stanley
Caraway	Kellogg	Ransdell	Swanson
Cummins	Kendrick	Rawson	Underwood
Dial	King	Robinson	Watson, Ga.
Harris	La Follette	Sheppard	Williams
Harrison	Lenroot	Simmons	
Heflin	Pittman	Smith	

NAYS—35.

Brandegee	Hale	Moses	Shortridge
Broussard	Jones, Wash.	Nelson	Smoot
Bursum	Keyes	New	Spencer
Cameron	Ladd	Newberry	Sterling
Capper	Lodge	Norris	Townsend
Colt	McCumber	Oddie	Wadsworth
Curtis	McKinley	Pepper	Warren
France	McLean	Phipps	Watson, Ind.
Gooding	McNary	Poindexter	

NOT VOTING—35.

Ashurst	Ernst	McCormick	Shields
Ball	Fernald	McKellar	Stanfield
Calder	Fletcher	Myers	Sutherland
Crow	Frelinghuysen	Nicholson	Trammell
Culberson	Gerry	Norbeck	Walsh, Mass.
Dillingham	Glass	Overman	Walsh, Mont.
du Pont	Harreld	Owen	Weller
Edge	Hitchcock	Page	Willis
Elkins	Johnson	Reed	

So Mr. ROBINSON'S amendment to Mr. MCCUMBER'S amendment was rejected.

The VICE PRESIDENT. The question recurs on the amendment of the Senator from North Dakota [Mr. MCCUMBER].

The amendment was agreed to.

The VICE PRESIDENT. The next amendment proposed by the Senator from North Dakota will be stated.

The ASSISTANT SECRETARY. On page 33, line 14, after the word "ton," where it occurs at the end of the line, it is proposed to insert the words "other cement not specially provided for, 20 per cent ad valorem."

Mr. SIMMONS. Mr. President, I do not understand on what page that amendment is to come in.

Mr. MCCUMBER. I can explain it, if the Senator will allow me. We have just stricken out paragraph 203, which embraced not only Portland cement but the other cement put up in packages, for which we have already agreed upon a 20 per cent ad valorem duty. That action necessitates this clause being put in at some other place; so I am asking that it be put in at the end of paragraph 205. The words are just the same as those we have already agreed to.

Mr. SIMMONS. I have no objection to that.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from North Dakota.

Mr. POMERENE. Mr. President, do I understand that this imposes a duty of 20 per cent on all other cement?

Mr. MCCUMBER. It places a duty of 20 per cent upon patent cements which come in zinc tubes, and so forth.

Mr. SIMMONS. We have already voted on it, and it is merely desired to transpose the committee amendment.

Mr. POMERENE. Very well.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. LENROOT. Mr. President, I understand that we shall very shortly take a recess, and I simply wish to take a moment in acquainting the Senate with the present status of the pending bill, because probably very few Senators have taken the trouble to ascertain what progress we are making upon the bill.

Night before last I took the trouble to ascertain how many committee amendments had been acted upon by the Senate. There are 2,087 committee amendments to the bill. Night before last when we took a recess we had acted upon 196 of them; to-day I believe we have acted upon 4 amendments, making 200 committee amendments thus far acted upon out of a total of 2,087. We are now upon the seventh week of the actual consideration of the bill. If we shall make the same progress as we have during the past 7 weeks, this bill will pass the Senate, if none but committee amendments are considered, in 57 weeks. Of course, at this rate of progress the bill must fail on the 4th day of next March.

Senators across the aisle are insisting that they are indulging in nothing but legitimate debate. If that be true, and if we have had nothing but legitimate debate so far, there is no hope, under the present rules of the Senate, of passing this bill before the 4th of next March. That is the only statement that I care to make at this time.

Mr. ROBINSON. Mr. President, the statement just submitted by the Senator from Wisconsin is interesting, but, considering the facts surrounding the history of this bill since it reached the Senate, it does not seem to me to be of very great importance.

In the first place, it is extraordinary, without precedent, that to any bill a committee of either House of Congress should report 2,087 amendments. Why the Finance Committee saw fit, after a prolonged consideration of this measure in what amounted to executive sessions, to report 2,087 amendments remains to be explained.

In so far as the statement of the Senator from Wisconsin is concerned that the bill will not pass until the expiration of 57 weeks, I desire to say that unless the committee pursues in an intense degree the practice that it has adopted within the last few days, namely, of receding from or revising the important amendments which it has proposed to the House provisions, it would be better for the United States if it were 57 years before this bill were passed.

The Senator from Wisconsin referred to the declarations frequently made in the course of the debate upon this side that no filibuster is being conducted. Every Senator here knows that that is true. Every Senator in the Chamber knows that during the last week the other side has consumed more time than this side of the Chamber has consumed. Every Senator in the Chamber knows that speeches made about irrelevant subjects have been made from the other side of the Chamber oftener during the last week than from this side. In addition to that, another bill was injected on yesterday which consumed a day of the Senate's time. It was one of the most important of the department appropriation bills and carried many amendments. We passed this measure, the War Department bill, in a single day. This shows there is no filibuster.

Now, if the Finance Committee will do what it seems disposed to do, take this bill back into committee and revise it before the debate compels them to do so, they will save the Senate a great deal of time and the committee humiliation. So far as I recall, there has not been an important amendment considered by the Senate during the present week but what, after the debate on the amendment has proceeded at great length, the committee has withdrawn it and proposed another as a substitute for it. If the committee wants in good faith to pass this bill, they should take it back and revise these excessively high rates before the debate occurs in the Senate. This would take much less time to dispose of the bill.

The course which we have pursued here has resulted in great benefit to the country. The debates have informed the public. There is not a great Republican newspaper of which I know in the United States that indorses this measure. From limit to limit of the Nation, by every class of citizens familiar with the provisions of the bill, it is regarded as a legislative monstrosity, justified neither in economic experience nor in political theory. There is no sound basis for it. It discredits every principle of honest protection; it fortifies and entrenches monopoly; it justifies extortion and perpetuates unfair price control over the commodities which are most commonly and generally used.

Mr. STANLEY. Mr. President——

Mr. ROBINSON. I yield to the Senator from Kentucky.

Mr. STANLEY. The Senator from Arkansas has overlooked one thing. The bill may be intended to carry out the platform pledge "to reduce the high cost of living."

Mr. ROBINSON. Oh, Mr. President, the authors of this bill are ashamed of it. I violate no confidence when I assert that the Senators who manage the bill on the floor of the Senate, as evidenced by their conduct and their expressions, take no pride in it. They admit that this is an inopportune time to attempt to revise the tariff; they admit, if I understand them correctly, that the bill is not based upon any theory of protection heretofore recognized or advanced. It is a hodgepodge, a miserable compound, made by throwing together whatever may seem necessary to please the selfish interests that are dictating it.

Mr. SIMMONS. I want to suggest to the Senator that the reason we can not discuss this bill as a general proposition is because it is not based upon any principle of tariff, either of protection, free trade, or moderate tariff. It is therefore necessary for us to discuss each item of the bill in order to show what it is.

Mr. ROBINSON. That is true. The only rule followed is "give everyone what he asks." The debates show that the important items of the bill have been dictated by the interests which it is designed to benefit. Little consideration has been given to the general interests of the public. Therefore I characterize it as an unwholesome mixture the constituent elements of which when taken separately are palatable and sweet smelling, but when combined in the compound are obnoxious and repulsive to everyone. I repeat that with the possible exception of the Senator from Idaho [Mr. GOODING], who, it seems to me, stands in a distinct class to himself, this bill as a whole—I mean as reported by the Finance Committee—has no approval in the Senate, and is repudiated contemptuously in the Republican press of the Nation.

Oh, no; it will not take 57 weeks to dispose of this bill. The Finance Committee will either take back the important schedules and revise them before the debates, or they will revise them after the debates. If they take the first course, they will save time; but if the sentiment against this bill which has been gathering volume from the very day it was reported by the Finance Committee continues to grow among sincere Republicans and honest people generally throughout the United States, you yourselves will be glad of an excuse to "defer" its consideration, which, of course, means its death.

This business of talking in the Senate is not and can not be made a one-sided privilege. When you bring 2,087 amendments into the Senate on a bill it is the privilege of Members to discuss those amendments. It is the duty of Senators to give the public information concerning them; and the result of that course, which has been in good faith pursued by this side of the Chamber during the debate on this bill, has been to render your efforts obnoxious, to make the measure distasteful. I doubt now whether you are very anxious to pass this bill. I doubt whether you will want to enact it when you understand what it means and what it does. If you do want to pass it, you can do so in spite of the fact that its provisions are shown to be detrimental to the public interests, to the interests which we ought to conserve; but you can not intimidate anyone into yielding the just ground that we ought to understand what we are voting on, ought to vote intelligently, and give an explanation of the measure to the public. If the people can be made to realize how bad the Finance Committee's bill really is, they will oppose its passage, and you will not dare defy them.

Mr. McCUMBER. Mr. President, I had supposed that we desired to take a recess at half past 5 this evening, and therefore I am not going to take any time now to answer the argument of the Senator from Arkansas [Mr. ROBINSON]. Possibly before we get through we will see what is back of the papers that are railing against this tariff bill. I will say to the Senator most candidly that I do not believe the committee is going to be stampeded by anything which comes from a press that represents a propaganda that is making from a thousand to three thousand per cent upon its imports, and that possibly will be presented to the American people before we get through.

The Senator from Arkansas has suggested that we are not in a hurry to have a vote upon this bill. All I can say in reply thereto is, just give us a chance, and that will be the best evidence as to whether we desire to have a vote at the earliest possible time or not. Amendments undoubtedly will be suggested from time to time by the committee as additional testimony or conditions in the trade which are shown to us convince us that there ought to be changes; but in every instance I am certain that the committee will recommend a protective tariff bill.

Mr. President, I now ask unanimous consent that when we close our session to-day we shall take a recess until Monday at 11 o'clock.

The VICE PRESIDENT. Without objection, it is so ordered.

EXECUTIVE SESSION.

Mr. McCUMBER. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After 5 minutes spent in executive session, the doors were reopened, and (at 5 o'clock and 40 minutes p. m.) the Senate, under the order previously made, took a recess until Monday, June 5, 1922, at 11 o'clock a. m.

COMFIRMATIONS.

Executive nominations confirmed by the Senate June 3, (legislative day of April 20, 1922).

ASSISTANT REGISTER OF THE TREASURY.

Frank A. DeGroot to be Assistant Register of the Treasury.

PROMOTIONS IN THE COAST GUARD SERVICE.

To be ensigns.

Albert M. Martinson.
Raymond J. Mauerman.
Edward H. Fritzche.
Robert C. Jewell.
Lee H. Baker.
George E. McCabe.
Harley E. Grogan.

To be ensigns (engineering).

Martin J. Bergen.
Howard A. Snyder.

POSTMASTERS.

CALIFORNIA.

Herman C. Lewis, Artesia.
John L. Childs, Crescent City.
Francis C. Harvey, Rivera.
Jennie Kinney, San Quentin.
Cynthia P. Griffith, Wheatland.

GEORGIA.

Philetus D. Wootten, Abbeville.

HAWAII.

Carl Spillner, Makaweli.
Jacintho S. Medeiros, Puunene.

INDIANA.

William J. DeVerter, Cayuga.

MISSISSIPPI.

Alabama Akers, Iuka.

NEW MEXICO.

Harran H. DeLozier, Texico.

NEW YORK.

Seward Latham, Central Bridge.
Frank S. Duncan, Lawrence.
Violet Breen, Roslyn Heights.

NORTH CAROLINA.

Roscoe C. Jones, Manteo.

OHIO.

Cleona M. Dunnick, Ashville.
Joseph E. W. Greene, Newport.
Julius R. Bruns, St. Henry.

WEST VIRGINIA.

Charles J. Parsons, Sabraton.

HOUSE OF REPRESENTATIVES.

SATURDAY, *June 3, 1922.*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

O Lord, our Lord, we are drawn toward Thy throne, which is established forever and ever. It is our defense and the rock of our redemption. How much we need a sense of Thy nearness, for we are humanly weak in the things which are so divinely strong. O guide us in all our ways. As for the difficulties and labors of life, let them chasten our hearts and broaden our minds. Grant that every morning may bring us the light of hope, and every evening the shade of rest. In the name of Jesus. Amen.

The Journal of the proceedings of yesterday was read and approved.

WATER RIGHTS ON CROW RESERVATION, MONT.

Mr. SNYDER. Mr. Speaker, I desire to call up from the Speaker's table House bill 9344, and move that the House agree to the Senate amendments to the bill.

The SPEAKER. The gentleman from New York calls up from the Speaker's table a House bill with Senate amendments. The Clerk will report the bill by title.

The Clerk read the title of the bill (H. R. 9344) providing for the appropriation of funds for acquiring additional water rights for Indians on the Crow Reservation in Montana whose lands are irrigable under the Two Leggins Irrigation Canal.

The Senate amendments were read.

Mr. GARNER. Mr. Speaker, will the gentleman yield for a question?

Mr. SNYDER. Yes.

Mr. GARNER. In order to ascertain whether it is necessary to make the point of no quorum or not, has the gentleman advised with the ranking minority member of the committee concerning this amendment?

Mr. SNYDER. Yes; I have.

Mr. GARNER. And it is agreeable to him?

Mr. SNYDER. It is agreeable to him. I also spoke to the gentleman from Tennessee [Mr. GARRETT] about this matter last evening.

The amendment which the Senate put into this bill was exactly the thing that the committee unanimously reported to the House, and the discussion here in the House was as to whether we would fix the amount at $12.50 per acre plus interest for a certain period or whether we would make the amount $20 as a maximum, and give the Secretary of the Interior the same discretion that he has had heretofore on all other leases of this character. Upon a careful investigation, going into the matter further with the department, I find there is very little difference between what we desired to do and what the department and the Senate desire to do, so that I am asking this morning that the Senate amendment be agreed to.

That is all I desire to say.

The SPEAKER. The question is on agreeing to the Senate amendments.

The Senate amendments were agreed to.

THE NAVAL ESTABLISHMENT.

Mr. BUTLER. Mr. Speaker, I move that the House resolve itself into the Committee on the Whole House on the state of the Union for the further consideration of the bill (H. R. 7864) providing for sundry matters affecting the Naval Establishment. This bill has been debated all the way through and amended by the committee, with the exception of one amendment offered by the gentleman from Kansas [Mr. TINCHER], to which I will agree.

The SPEAKER. The gentleman from Pennsylvania moves that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of a bill which the Clerk will report.

The Clerk read the title of the bill (H. R. 7864) providing for sundry matters affecting the Naval Establishment.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill, with Mr. MADDEN in the chair.

Mr. BUTLER. Mr. Chairman, while I am not going to oppose the amendment offered by the gentleman from Kansas [Mr. TINCHER] I will ask unanimous consent for three minutes to explain the existing situation.

The CHAIRMAN. The Clerk will first report the amendment referred to by the gentleman from Pennsylvania.

Mr. BUTLER. It is to strike out section 10 of the bill.

The Clerk read as follows:

Amendment offered by Mr. TINCHER: Page 11, line 12, strike out all of section 10.

Mr. BUTLER. Mr. Chairman, I will accept the amendment. I think perhaps within the next few months shipbuilding like other construction will not cost as much as it has cost heretofore. Therefore I will accept the motion made by the gentleman from Kansas [Mr. TINCHER] and agree that section 10 shall be stricken from the bill.

The CHAIRMAN. The question is on the amendment of the gentleman from Kansas [Mr. TINCHER].

The question was taken.

Mr. STEENERSON. Mr. Chairman, will the gentleman yield?

Mr. BUTLER. Yes.

Mr. STEENERSON. I should like to know if the gentleman from Pennsylvania and the gentleman from Kansas have entire

control of this matter, or are you going to submit it to the House?

Mr. BUTLER. We will submit it to the House. The Chair has submitted it to the House.

Mr. STEENERSON. It has been voted on, and I suppose my question comes too late.

Mr. BUTLER. Oh, no; I think the Chair will recognize the gentleman.

The CHAIRMAN. The Chair will hold that the gentleman from Minnesota is not too late.

Mr. STEENERSON. I suppose like all other sections of the bill we have the right to vote this up or down.

Mr. BUTLER. Certainly.

The CHAIRMAN. The question is on the amendment.

The amendment was agreed to.

Mr. BUTLER. Mr. Chairman, all the sections of the bill have been debated fully in Committee of the Whole. On July 28 last we concluded the consideration of it with the exception of this one amendment. Before I move that the committee rise I want to say that some of the sections were handled pretty roughly in my judgment, but the committee had its own way all the way through and amended the sections as the committee saw fit. It struck out four sections. Two of them went out upon my own motion. The others were fully debated. I repeat what I said before, that the bill has been amended to suit the committee.

Mr. GARNER. Will the gentleman yield?

Mr. BUTLER. Certainly.

Mr. GARNER. Do I understand that the gentleman and his committee have been laboring on this measure since July 28 last?

Mr. BUTLER. My old friend is all right. I will have a little private conversation with him later on. [Laughter.]

Mr. BEGG. Will the gentleman yield for a question?

Mr. BUTLER. Certainly.

Mr. BEGG. I can not recall exactly all that is in this bill. I should like to ask the gentleman if there is any limitation placed on the Navy Department as to how many dollars it can pay out in the adjustment of claims?

Mr. BUTLER. The section providing for the settlement of claims was stricken out, therefore there is no provision in the bill authorizing the settlement or adjustment or consideration of any claim. The contest in the committee arose largely over these sections and subsections that have been stricken out.

Mr. BEGG. They are still in this copy that I have.

Mr. BUTLER. The gentleman has not the bill as amended. Sections 1 and 2 and the subsections went out.

Mr. BEGG. Right there, if the gentleman will yield, sections 1 and 2 and the subsections went out?

Mr. BUTLER. Yes. There is nothing here which provides for the settlement or adjustment of any claim.

Mr. RAMSEYER. Will the gentleman yield?

Mr. BUTLER. Yes.

Mr. RAMSEYER. It has been almost a year since this bill was up. Will the gentleman explain what is left in the bill, so that we may know what we are voting on?

Mr. BUTLER. I will be delighted to do it. Section 3 in the bill has five paragraphs largely technical. During the war period enlisted men and noncommissioned officers were, many of them, promoted so that they could serve the country better by the promotion. They were told that when the war was over and demotion occurred they could revert to their old places if they wanted to. But the act of July 11, 1919, has been construed differently by the comptroller than what we anticipated. Many enlisted men and noncommissioned officers who served with credit and distinction, when the war was over and their temporary commissions were revoked and after 16 or 20 years' service, were compelled to reenter the Navy in the status of men on first enlistment.

Now, section 4, which provides for the rate of base pay of men serving in the insular possessions, might be stricken out. That would save the Government $150,000. It has been taken care of in the pay bill. As I say, that of itself will save the Government $150,000. It is the base pay of the men in the Philippine Islands recommended by the department and accepted by the Committee of the Whole. Section 6 is for the purpose of taking care of two preachers who came into the service during the war and who asked to be retained in the service until the time comes when they can be retired.

Mr. TINCHER. If the gentleman will yield, there was no trouble about the preachers, the real trouble was in section 10 where they wanted to get $90,000 more money on ships.

Mr. RAMSEYER. The bill has not been read since last July, and I wanted a brief statement from the gentleman from Pennsylvania, which he is now giving, so that we will know what we are voting on.

Mr. BUTLER. Section 7 provides that under certain circumstances men who had prior to the war a dishonorable discharge for desertion, who have since come back and performed honorable service during the war, shall have the charge of desertion removed. That will save us considerable trouble in considering private bills.

Section 8 of the bill provides that where men are called back—and it only affects 30 men—where they are called back from the retired list and placed on active duty they may have the benefit in the computation of their pay of the active service they performed. I am told that this is so in the Army, and it seems absolutely fair and just. Section 9 involves the sum only of $3,000. It provides that paymasters who, acting under an order issued by the department that certain discharged men should be furnished with an outfit of civilian clothes amounting to $15, should be relieved and the money paid out by them for these civilian outfits should not be checked against them.

Mr. CHALMERS. Will the gentleman yield?

Mr. BUTLER. Yes.

Mr. CHALMERS. I think it would save time if the gentleman would state what is in the bill.

Mr. BUTLER. I have been doing that very thing and have gone all over it.

Mr. CHALMERS. The gentleman is stating what was taken out.

Mr. BUTLER. No; I am not. These accounting officers had charged against them the cost of civilian clothes given to men not adapted to the service. We passed an act in 1919 authorizing that to be done, but it was held by the accounting officers of the Treasury that it applied only to the future. So there was a period between 1918 and 1919 that under the direction of the department the paymasters furnished these men with this clothing that they might go home, and the accounting officers hold that the act did not apply to that period. It amounts to only about $3,000. I think it is only fair that they should have it.

Mr. KING. Will the gentleman yield?

Mr. BUTLER. Yes.

Mr. KING. The gentleman from Kansas made a statement which I think ought to be cleared up, that they were asking $90,000 more, and I want to know who "they" is.

Mr. TINCHER. The fact is they wanted to raise the price of building ship *No. 44* from $12,750,000 to $14,750,000. That is a $2,000,000 raise which they ask for. On ship *46* they asked for a raise from $15,000,000 to $17,000,000. That makes $4,000,000 in all.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. RAMSEYER. Mr. Chairman, I ask unanimous consent that the gentleman's time may be extended for five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. TINCHER. The next item was on ship *119*.

Mr. DOWELL. Is that still in the bill?

Mr. TINCHER. No; the whole section has gone out. The objectionable features of the bill have gone out.

Mr. DOWELL. Mr. Chairman, will the gentleman yield for a question?

Mr. BUTLER. Yes.

Mr. DOWELL. What became of the items with reference to the increase in the cost of these ships?

Mr. BUTLER. That item went out of the bill in the last seven minutes on a vote of the committee.

Mr. DOWELL. I understand that; but, as I understand the gentleman, at the time the money had already been expended, and I want to know how it is paid if it is not in the bill.

Mr. BUTLER. I understand that the *California* will likely have been paid for. It was built in a Government yard, out of funds already appropriated, because there is remaining in the Treasury not used a sum of money which we had appropriated for the construction of the 1916 program.

Mr. DOWELL. Then this item came out of that.

Mr. BUTLER. I hope that has been paid for. I have some information to the effect that it likely has been. I am not able to give the gentleman accurate information, which he would like to have. For that reason, not being well informed, I have agreed with our friend from Kansas [Mr. TINCHER] that the item should go from the bill until we are better informed.

Mr. DOWELL. I understand that it has gone from this bill, but what I am getting at is this: As I understood when this question was up before, this money had already been expended, when not authorized, and above the authorization.

Mr. BUTLER. Yes.

Mr. DOWELL. I am now trying to get at the facts, if I can. If this money was taken from some other appropriation, what appropriation was it, or has it been supplied in some other way?

Mr. BUTLER. Mr. Chairman, I will give the gentleman the best information that I have. I think that ship No. 44—the *Maryland*—which was built at Newport News, may have been paid for. The cost of construction was increased by the department without express authority of Congress. It may be that before the naval appropriation bill is passed, under construction of a provision that is in it, a part of the money that is remaining appropriated for the construction of the 1916 program may be used for the purpose of paying the addition to that ship.

Mr. DOWELL. As I understand the gentleman now, while we have stricken this out of the bill—and I am glad to see it go out—the gentleman still has in his mind the fact that we will pay this additional amount not authorized, shown in the bill a year ago.

Mr. BUTLER. I believe on ship 44 that the Congress may yet be asked to increase the cost. When that request comes I want to say to my friend that it will be laid squarely before the Committee of the Whole, so that it can be properly considered.

Mr. JOHNSON of Mississippi. Mr. Chairman, will the gentleman yield?

Mr. BUTLER. Yes.

Mr. JOHNSON of Mississippi. On page 4, section 2a, the bill gives to the Secretary of the Navy full authority——

Mr. BUTLER. Oh, that has gone out.

Mr. JOHNSON of Mississippi. Section 2a has gone out?

Mr. BUTLER. Yes. Mr. Chairman, I move that the committee do now rise and report the bill with the amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

Mr. GARRETT of Tennessee. Mr. Chairman, will the gentleman withhold that motion for a moment?

Mr. BUTLER. Certainly.

Mr. McCLINTIC. Mr. Chairman, will the gentleman yield?

Mr. BUTLER. Yes; I yield to the gentleman.

Mr. McCLINTIC. If I understand correctly, this bill was considered several months ago prior to the time that we had what is known as the Disarmament Conference. At that time the bill was completed with the exception of section 10. As to section 10, a motion was made by the gentleman from Kansas [Mr. TINCHER] to strike it out.

Mr. BUTLER. That motion was pending at the time that the committee rose on the 28th of July, 1921, and it has now been voted on here in the committee and the amendment has been agreed to.

Mr. McCLINTIC. That being true, the bill is ready to be reported to the House.

Mr. BUTLER. Yes.

Mr. BRIGGS. Mr. Chairman, will the gentleman yield?

Did the gentleman state that he was going to move to strike out section 4 of the bill?

Mr. BUTLER. Oh, no. Section 5 was stricken out. Section 4 remains in the bill. I do not think it is important whether it is in or out. It has been provided for in the pay bill which was passed yesterday.

Mr. BRIGGS. Does it affect in any way the pay bill?

Mr. BUTLER. It can remain in or go out. It is not important at all. Mr. Chairman, I renew my motion that the committee do now rise and report the bill to the House with the amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. MADDEN, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 7864) providing for sundry matters affecting the Naval Establishment, and had directed him to report the same back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

Mr. BUTLER. Mr. Speaker, I move the previous question on the bill and amendments to final passage.

The previous question was ordered.

The SPEAKER. Is a separate vote demanded on any amendment? If not, the Chair will put them in gross. The question is on agreeing to the amendments.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. BUTLER, a motion to reconsider the vote by which the bill was passed was laid on the table.

WAR FINANCE CORPORATION ACT.

Mr. McFADDEN. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill S. 2775.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill S. 2775, with Mr. CAMPBELL of Kansas in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the further consideration of the bill S. 2775, which the Clerk will report by title.

The Clerk read as follows:

An act (S. 2775) to extend for one year the powers of the War Finance Corporation to make advances under the provisions of the act entitled "An act to amend the War Finance Corporation act, approved April 5, 1918, as amended, to provide relief for producers of and dealers in agricultural products, and for other purposes," approved August 24, 1921.

Mr. LUCE. Mr. Chairman——

Mr. WINGO. I understand the gentleman from Massachusetts [Mr. WALSH] yielded the remainder of his time to the gentleman?

Mr. LUCE. He did.

The CHAIRMAN. The gentleman from Massachusetts is recognized for 42 minutes.

Mr. LUCE. Henry Ward Beecher once observed that the only amusements tolerated by the American church were banking and the currrency. The faithful have gathered here this morning in the small numbers that under these conditions might be expected.

I desire to use my time chiefly in protest and in prophecy, with a dash of politics; but first, in the way of history, I must get some small basis upon which to build my oratorical edifice.

About a year after we went into the war it was deemed wise to put the public funds at the command of industry and commerce for war purposes, and an emergency bill was passed creating the War Finance Corporation. Three or four months after the armistice the whole country was aflame with the idea that huge profits were to be made in foreign trade. To that end it was deemed necessary to have Government aid, and the powers of this corporation were increased so that out of the Treasury foreign trade might be financed. One member of this corporation, the Secretary of the Treasury, after trying for more than a year to turn this notion to some public advantage, concluded that the corporation ought not longer to function, and his influence was such that its activities were suspended.

In the following December, 1920, there came on the scene one of the early indications of the new power of agriculture in the halls of legislation, and that power demanded the revival of this corporation. Mr. Eugene Meyer, a member of the board, dissatisfied that it had been put out of business, urged the renewal of its activities, and Congress saw fit to pass a resolution reviving the corporation.

The President, disapproving, vetoed the resolution, but it was passed over his veto. The corporation was revived for the purpose of financing export trade.

At that very time there was in process of organization in the city of Chicago a private activity to accomplish this identical thing. The conference there was declared by Mr. Hoover to have been the most momentous since the armistice. In 10 minutes they raised $100,000 for purposes of organization. They were to have a capacity of a billion dollars, but Congress stepped in and gave the same capacity of a billion dollars to this public activity and the private activity died. So the first achievement in this direction was the killing off of private activity, ready and willing and anxious to do precisely the same thing.

The men of great expectations, the men of the West, who hoped for so much from the use of public funds to finance exports, were disappointed by what followed. Instead of doing a billion dollars' worth of business in the way of financing exports, in the 17 months since then this corporation has done a business of $50,000,000, a bagatelle, as such things go. One bank in the city of New York has to-day assets of more than $90,000,000 and loans, acceptances, and discounts of $500,000,000. This great war activity, revived over the protest of the administration, has succeeded in financing foreign trade to the amount of one-tenth of the outstanding business of one bank in New York City. The exports of the United States in the year 1921 were close to four and a half billion dollars, averaging $12,300,000 a day. This great War Finance Corporation in the 17 months of its renewed existence has financed four days of the exports of the United States! No wonder that Mr. Meyer did not even

suggest continuing this corporation for the purpose of financing exports.

Those interested in prolonging the life of this governmental activity, desiring to keep the Government in business, contrary to the pledges of both parties in the recent presidential campaign, saw in August, 1921, that governmental financing of exports was virtually a failure. So they hunted around for some other way of using the public credit. They discovered, among other things, that there were railroad securities the sale of which needed to be financed. This was one of the excuses for the movement in August, 1921, to give the corporation further powers. The result in this particular was a complete fizzle. The powers so generously given to the corporation to this end were never called into exercise.

But there was another and greater opportunity that attracted the attention of our friends from the West. The western farmer appeared to be in hard luck. Times were bad and prices were low, and he felt unable to get himself out of his plight. So the spokesmen for the western farmer proceeded to demand special privileges for one class and for one section.

The farmers as a class had been the great profiteers in the war, according to the report of the commission created by our farmer friends, headed by the gentleman from Minnesota [Mr. ANDERSON].

Mr. HERRICK. Will the gentleman yield?

Mr. LUCE. I shall have no time to yield until I shall have concluded.

The value of the agricultural output in 1913 for each person engaged was $678. In 1919 it was $823. It had gone up one-fifth. In 1916 the average reward to each farmer for labor, risk, and management was $534. In 1918 it was $826.

In the same two years the average yearly earnings of factory employees fell from $793 to $725; of Government employees, from $810 to $566. (These figures are all being given on the basis of the purchasing power of the dollar, as of 1913, with the later inflation taken into account.) The farmer, as the statisticians tell us, at the end of the war was receiving far more for his labor, while the wage earner was receiving far less than at the opening of the war.

Mr. KING. Will the gentleman yield?

Mr. LUCE. I decline to yield until the conclusion of my remarks.

The farmer, then, had enjoyed unprecedented prosperity. He had in 1920 brought the number of automobiles on the farms up to about 2,150,000. His telephones were more than 2,500,000 in number. He had about 250,000 tractors, 130,000 motor trucks, and 450,000 of his farms had gas or electric light. He had, however, not saved his money. He had not exercised thrift. He had not remembered that fat years would be followed by lean years.

And when the break came he found himself, as he thought, in a hard plight. So there was organized here that bloc which one of our brilliant statesmen has described as consisting of 19 lawyers, 1 editor, 1 well driller, and 1 manufacturer of sewer pipe. That, of course, applies to only one segment of this organization. House Members were added thereto, and they have proceeded since then—to use the words of the same gentleman—to control the economic destiny of the United States.

The farmer up to 10 years ago was the most important single element in our economic life, but between 1910 and 1920 he took second place. In 1920 only 26.3 per cent of the persons in this country who were gainfully employed were engaged in farming, forestry, and animal husbandry, while 30.8 per cent were engaged in manufacturing and mechanical industries. At the end of the decade, instead of having agriculture lead industry by 2,000,000 workers, as in 1910, we find industry leading agriculture by 2,000,000 workers.

With the coming of the agricultural bloc the tail started in to wag the dog.

It was the complaint of the farmer that he did not have money enough; that he had been roundly abused by the banks. Yesterday gentlemen from the West repeated these complaints in spite of the fact that the report of the commission of inquiry, for which the agricultural bloc was responsible, showed that whereas on the 1st of July, 1918, the bank loans to farmers were estimated to have amounted to $2,506,814,000, on the 31st of December, 1920, they had risen to $3,869,891,415. Nearly $4,000,000,000 had been lent to the farmers by the banks when the activities of the War Finance Corporation were revived early in 1921.

But the farmers were not satisfied. They came here and said, "We must have more. You must add to the $4,000,000,000 the banks have lent us $1,000,000,000 out of the Public Treasury." So in August of last year we increased the power of this corporation that it might lend money indirectly to the farmers. Since that time we have lent them about $300,000,000 of your money and mine, the money of the taxpayer, put at the service of one section and one class.

Why do I say one section? Because of the $300,000,000 not one cent has been lent to any man in Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New Jersey, Pennsylvania, Delaware, Maryland, the District of Columbia, or West Virginia. Six hundred thousand dollars, one-fifth of 1 per cent of the whole, has been lent to farmers in New York. The value of the agricultural product in the States to which not a penny has gone is about $1,700,000,000 a year, and if you add New York it is nearly $2,500,000,000. But the gentlemen from beyond the Mississippi do not recognize that there is such a thing as a farmer east of Pittsburgh. No measure urged by the agricultural bloc has given a moment of thought to the eastern farmer.

I desire to emphasize that I do not complain of the failure to lend any appreciable part of this money in the East. I am not asking that money be lent in the East. I am criticizing a system demanded for and given to a part of the citizens of but one section of the country.

At the same time that the public funds to the extent of $300,000,000 were being lent to one class in one part of the community, there was another class found in all parts of the community that was suffering more greatly than at any previous period in our country's history. In the eight months during which the farmers of the West and South have thus been helped, there have been in the United States 17,295 commercial failures. The liabilities in December broke all records. The January liabilities were the largest of any January since 1915. In no previous April were there so many large failures.

Mr. TINCHER. Will the gentleman yield?

Mr. LUCE. I will at the conclusion of my remarks.

The authorities in this field declare that as a cause of business failure lack of capital ranges from 22 to 32 per cent. In other words, about one-quarter of all these merchants, tradesmen, and manufacturers who have gone into bankruptcy in these last eight months have gone there by reason of want of credit. We helped the farmer who lacked credit and never thought of the tradesman who lacked credit.

You will say, of course, that I am talking as a Massachusetts man, speaking for the East. For many decades men of the West have felt that they were antagonized by the industrial interests of New England. Let me disclose to you a state of affairs with which I judge you are not acquainted, for I have not seen it mentioned in print. In 1919 there were in New England 1,351,800 wage earners, but in Ohio, Indiana, Illinois, and Michigan there were 2,133,000 wage earners. And while the value of the industrial product of New England was upward of $7,000,000,000, the product of Ohio, Indiana, Illinois, and Michigan was upward of $16,000,000,000. Cease, then, to think that I am speaking only for that small section of the country you have so long viewed with suspicion. I am trying to voice the views, as I believe they will be found to be, trying to explain the situation, of that part of the United States east of the Mississipi River and north of the Ohio and the Potomac.

Largely at the expense of this northeast quarter of the country we are now urged to continue the War Finance Corporation for 12 months longer. Not one valid reason for continuance has been presented, but some reasons have been put forward which do not seem to me valid.

One is that we should provide public funds to continue the orderly marketing of the farmer's product. Time does not permit me to demonstrate the fallacies of the theory that Government should support prices and regulate distribution. It must suffice to say that history furnishes overwhelming proof of the folly of governmental interference with the laws of supply and demand.

Next it is said that we should support cooperative marketing associations. Mr. Meyer, answering in the committee hearing my question as to why in relation to them an emergency would exist beyond July 1, said:

> Because, in the first place, the volume of products marketed by these organizations is greater than the local banks can take care of. In the second place, the cooperatives have always needed some financial assistance; they have never been adequately financed.

To my suggestion that it was a matter of general banking facilities rather than an emergency, he answered:

> It has been a chronic emergency, and the fact that it has not been met before is no reason for not meeting it now.

So the second reason given for continuing this corporation really is that it should be a function of the Federal Government to afford banking facilities and supply capital.

The third reason is that the cattlemen need support, and the answer is that we shall try in some reasonable way to furnish a system that will give it to them.

The fourth reason is the alleged lack of funds at the command of the farmer. This is advanced in face of the fact that in the May just finished the market for call money reached its lowest point in five years; that the United States is borrowing at 3½ per cent and municipalities at 4 per cent; that an abundance of funds is available from the Federal reserve and city banks and city correspondents; and that the discount rates of the Federal bank itself are 4½ per cent and 5 per cent—showing, as everybody knows, a greater abundance of capital than at any time in many years.

On the other hand, the farmer is regaining his prosperity. His purchasing power has increased from 20 to 25 per cent. It is expected that he will get a billion dollars more for his crop this year, or perhaps $2,000,000,000 more, than last year Typical of the state of affairs all along the line is the announcement that he will raise 5,000,000 more hogs, which alone will increase his earnings by $100,000,000. Cotton has gone above 20 cents.

We are asked to continue this war device in time of peace, in the face of the assurances given to us on previous occasions. For example, Mr. Meyer in the hearing of August, 1921, said he felt that July, 1922, would be the appropriate time to end. To the President, after a recent trip in the West, he wrote that January 1, 1923, would be a good time to end. But he met certain gentlemen after that who said to him, "Why stop then? Make it a year." And so, without one single substantial reason for extending it 12 months, he now advises that the farmers of the West and South be financed out of the Public Treasury in the year 1923. The promise of this bill is given 10 months before the money will be required for planting seed, a year and a half before the marketing time comes. Not a man yesterday, not a man in the committee, not a man anywhere, has yet explained why we should to-day promise to finance the farmer to the possible extent of $1,000,000,000 for the year of which the first day is more than six months away.

What is the real reason for this? It was disclosed by Mr. Meyer in the hearings. He said:

> The people there—in the West and South—have come to feel that the War Finance Corporation is necessary to them.

There is the nub of the whole thing. You have been sowing dragon's teeth and you are beginning to gather the crop. You have made this lending of public credit to one class of the community a habit. You have told these men that they may expect it. Gentlemen speaking for the region concerned hold out to its dwellers the alluring hope that they shall permanently continue to receive these great credits from the Public Treasury.

> Vice is a monster of so frightful mien
> As, to be hated, needs but to be seen;
> Yet seen too oft, familiar with her face,
> We first endure, then pity, then embrace.

A year and a half ago in the Committee on Banking and Currency there was the strongest opposition to reviving this corporation. The next time there was less opposition, and yesterday the chairman was able to say that the report of the committee was practically unanimous. So far as I know, I am alone or almost alone in that committee in still holding out against the danger of establishing a permanent policy of financing one class and one section of the country at the expense of the rest. Such a policy incites its beneficiaries to more and more insistence.

> Why, she would hang on him,
> As if increase of appetite had grown
> By what it fed on.

Let me suggest the course that ought to be followed, as shown by Mr. Meyer himself, when he told us that in September, 1921, in Salt Lake City, there had been started a company with $250,000 capital for financing live-stock men. Denver, for Wyoming, had subscribed $200,000 for the same purpose at the first meeting, and now has nearly a million dollars subscribed. Texas has a company with nearly $1,000,000 paid in, New Mexico one with about $600,000, and other States are at work. In that direction lies the course we ought to follow. Let men help themselves and save themselves.

Oliver Wendell Holmes said:

> I find that the greatest thing in the world is not so much where we stand as in what direction we are moving.

In the matter of the measure before us to-day you gentlemen will undoubtedly vote to move still further in the direction of paternalism. Here let me bring in some political considerations, not party considerations, for I am not wise enough to know which party will the most suffer. We have had before our committee this year as a witness one whose name will bring a smile to your faces, Gen. Jacob Coxey, of Ohio. We supposed that his words were hardly to be given weight until he told us that he had visited Dearborn, Mich., where he had passed several hours in company with the lieutenants of the great automobile manufacturer of that State, who thoroughly approved his views. Last week or the week before Mr. Thomas A. Edison presented to the agricultural bloc here a proposal akin to that advanced by the general from Ohio. Will not something of this sort be the next step in your program?

Let me remind you that 30 years ago a new political party came out of the West, out of Kansas, the State that to-day most firmly supports this proposition, out of Iowa and the other States beyond the Mississippi. In the platform of that party you may find two proposals. One was that the per capita currency of this country ought to be increased until it was $50 a head. If you look at the figures, you will find that but a few months ago we went over the $50. It is now reported at about $48 a head. So you have already unconsciously granted that first demand of the populist program.

The second demand was that the money of the public should be lent to the farmer at 2 per cent. We have had before our committee within a few days one Benjamin C. Marsh, the head of one of the groups of farmers' organizations, asking of us that we lend to the farmer at 2 per cent. What are you doing now? You are borrowing at 3½ per cent. You are lending to the banks at 5½ per cent. The banks are lending to the farmers at 7½ per cent. How long will it be before the farmers come up here and say, "Why don't you lend to us directly, not at 7½ or 5½ or 3½ per cent, but at 2 per cent?"

Mr. CONNALLY of Texas. Will the gentleman yield?

Mr. LUCE. Not until I finish. How will you answer the farmer when he points out to you that you are now gouging him, taking 4 per cent out of him beyond the rate you are paying for the money? It is a good business venture, and as a Yankee I can not criticize the program; but when will my friends from Kansas and Iowa and Minnesota wake up to the fact that they are paying 4 per cent more for their money than the Government is paying for the same money?

I have told you of Mr. Marsh's request, that the Government lend money to the farmer at 2 per cent. General Coxey got down lower than that and wanted public funds lent at one-half of 1 per cent. Mr. Edison goes the limit and says you should lend your money at zero per cent. Ah, I see a cloud on the political horizon no bigger than a man's hand, the hand of Mr. Edison's collaborator in bad finance, Henry Ford. I want to say to you Democrats on the right of the aisle here who have aided at every possible opportunity in the advancement of measures like this, it is easy, if you do not have responsibility, to vote for radical programs and to get your hands into the Public Treasury, but chickens will come home to roost. Here is my prophecy, that two years from now you are going to have your party forced to decide whether you will once again take up the heresy of fiat money, whether you will follow the leadership of William J. Bryan, the standard now handed over to Henry Ford, the standard carried down Pennsylvania Avenue with a flivver rampant, or whether you will follow the views of your Democratic brethren in the East who in 1896 demanded the gold standard.

And a word to my friends on the Republican side. What are you going to do about it? How are you going to answer your farmer partisans in Kansas and Missouri and Nebraska and Oklahoma who come here and say, "You have established on a permanent basis the policy of lending the public money to classes and sections. Are you going to continue to grind down the faces of the poor Kansas farmers by forcing them to pay 7½ per cent interest when you pay only 3½ per cent yourselves? Why not take the money from the taxpayer and let the men of the whole country pay the taxes and the interest and lend it to everybody as you have already lent it so freely to the men of one section and one class?"

I want to recall to you that the populist movement 30 years ago carried the electoral vote of four States, that it secured an elector in each one of two other States, and cast more than a million votes, on the program of lending the public money to the farmer at 2 per cent. How many votes will be cast for Henry Ford as a candidate for President, and perhaps Thomas A. Edison running for Vice President, with the proposal that you lend the money of the public to the farmers at zero per cent?

A wise writer, Harold J. Laski, has recently well said that "social legislation has the incurable habit of tending toward paternalism, and paternalism, however wide be the basis of consent upon which it is erected, is the subtlest form of poison to the democratic state." The paternalism here on foot goes beyond anything ever before seen in this country in time of

peace. This is the very first time that classes and sections have been recognized to the extent of $300,000,000, and the possibility of a billion in all yet to come. I bid you beware. I protest against it, not as an easterner, not as a Massachusetts man, but as a student of economics and of history.

There was some truth, some pathos, in a thing the former Senator from Oklahoma, Mr. Gore, said the other night. He observed that no man who believes in fundamental economics and natural laws and who does not believe in fairies can stay in public life. I do not believe in fairies. I do believe in fundamental economics and natural laws, and I will stay in public life only on condition that now and always I may stand up for what I believe to be the truth in these matters. You can not safely fly in the face of the law of supply and demand. You can not safely fly in the face of the individualistic principle upon which this country is founded. You can not make ours a socialistic Government and endure. You have before you the story of Russia. I know Bolshevism will be thought a far cry, but here you are taking a step, and a long step, toward the rule that all should contribute toward the support of each, a long step toward the theory that individualism should be taken out of our lives, a long step toward the theory that every man, no matter how reckless, extravagant, or imprudent he may have been, can come to the Public Treasury to borrow that which he may demand. [Applause.]

Mr. WINGO. Will the gentleman yield for a question?

Mr. LUCE. Yes.

Mr. WINGO. I have enjoyed the gentleman's speech very much; but I want to ask him, Does he seriously contend, as his remarks indicate, that this is a scheme of Henry Ford to turn the United States Treasury over to a New York Jew, Eugene Meyer? Mr. Meyer is the head of the corporation, and the gentleman says this is a scheme of Henry Ford to turn the Public Treasury over to a New York Jew, Henry Meyer. The gentleman is not serious in that, is he?

Mr. LUCE. I thank the gentleman for listening to me, but I wish he had been a little more attentive.

Mr. WINGO. That is the impression the gentleman has left on the House.

Mr. LUCE. The suggestion of Henry Ford's friend, Mr. Edison, that the public money be lent at zero per cent was made independently of the suggestion of the gentleman from Arkansas that the public money should be lent at 7½ per cent.

Mr. WINGO. The gentleman from Massachusetts regards this as a grant of special privilege to a class or to a section. Am I correct in that impression?

Mr. LUCE. "By their fruits ye shall know them."

Mr. WINGO. That is the flower; is not that the fruit of it—it is for a section and a class?

Mr. LUCE. I do so regard it.

Mr. WINGO. The gentleman is opposed to any agency for the American farmer equal to that which has been provided for industry and commerce?

Mr. LUCE. I am not.

Mr. WINGO. The gentleman has opposed every proposition that has been submitted for such a purpose?

Mr. LUCE. The gentleman is in error.

Mr. WINGO. Will the gentleman name one single proposal submitted to our committee to establish a sane agricultural credit system for the American farmer comparable with that provided for commerce and industry?

Mr. LUCE. The question has not reached the point of discussion. Neither the Anderson bill nor any of the others to like purpose have yet been taken up.

Mr. WINGO. We have had numerous bills before the committee, and he has opposed every proposition, and has announced that it is populistic. He has opposed even to a partial extent giving to agriculture the same credit that we have extended to commerce and industry.

Mr. LUCE. I think the gentleman is unjustified in that statement.

Mr. WINGO. I thought that was what the gentleman upheld, and that he regarded agricultural credits as unsafe.

Mr. LUCE. I have not taken any such position.

Mr. WINGO. What is the gentleman's position?

Mr. LUCE. The gentleman is taking me far afield. I am discussing the lending of money to private individuals in one part of the country belonging to a certain group or class.

Mr. WINGO. During the discussion of the farm loan and Federal bank system I happen to know that notes given by New England cotton-mill factors for cotton bought were classed as a part of agricultural paper and discounted by the Federal reserve bank. Now, a New England manufacturer can go to a bank, put up a note and get it rediscounted at the Federal bank, and that bank can and will issue to him a gold demand obligation on the United States Treasury. Does the gentleman regard that as populism?

Mr. LUCE. I think the gentleman has discovered a red herring to draw across the trail.

Mr. WINGO. Can not a New England manufacturer through his banker rediscount a note through the Federal reserve system and get a gold demand obligation, a Federal reserve note on the United States Treasury? Is not that true?

Mr. LUCE. I decline to follow the gentleman into that line of argument.

Mr. WINGO. Is not that the plain letter of the law and the working of the Federal bank system?

Mr. LUCE. The gentleman may think so; but I do not desire to engage in any controversy of that kind.

Mr. WINGO. I am asking if that is not a fact; and is it not done every day by the manufacturers? Have you got a system by which credit is given to the American farmer to the extent that he can go and do anything comparable to that? Is not the gentleman opposed to any such permanent legislation, or even to this makeshift?

Mr. LUCE. When I am discussing a particular subject my mind has no spur track, but I keep on the main line.

Mr. WINGO. That is the trouble with the gentleman—he is on a spur track and I want to get him onto the main track.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. WINGO. Mr. Chairman, inasmuch as I have used considerable of the gentleman's time, I yield him one minute more.

Mr. CONNALLY of Texas. Will the gentleman yield?

Mr. LUCE. Yes.

Mr. CONNALLY of Texas. I recognize the gentleman is a student of economics, and I have great respect for his discussion. Of course, the gentleman is opposed to loaning money to anybody on bad security at ruinous rates of interest or inadequate rates of interest for the Government. Being against loaning the money on these terms he would be opposed to giving money to any particular interest.

Mr. LUCE. I have never been able to satisfy my mind whether usuary laws are prudent or not.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. CONNALLY of Texas. Does the gentleman favor a ship subsidy bill, for instance?

Mr. LUCE. Oh, that is another spur track that I have not even the time to start on.

MESSAGE FROM THE SENATE.

The committee informally rose; and the Speaker having resumed the chair, a message from the Senate, by Mr. Craven, its Chief Clerk, announced that the Senate had passed with amendments the bill (H. R. 10871) making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1923, and for other purposes, in which the concurrence of the House of Representatives was requested.

WAR FINANCE CORPORATION ACT.

The committee resumed its session.

Mr. WINGO. Mr. Chairman, I yield 10 minutes to the gentleman from South Carolina [Mr. STEVENSON].

Mr. STEVENSON. Mr. Chairman, in the discussion of this matter I want to clear away one or two rather erroneous statements that the gentleman from Massachusetts [Mr. LUCE] has made, as well as did the gentleman from Massachusetts [Mr. WALSH] yesterday. He says that this is a gratuity to one class, and the gentleman from Massachusetts [Mr. WALSH] yesterday made the same statement. The gentleman met himself coming around the corner a minute ago when he said that the farmers are having to pay 7½ per cent for this money for which the Government is paying only 3½ per cent. If he calls that a gratuity, I do not, and I do not think he can fool anybody else into believing it is. The fact is that the farmers put up good security. They have to borrow money at their own bank and satisfy the bank with their security so that the bank can underwrite the paper and get the money from the War Finance Corporation. There is no gratuity about that. It is merely a necessary provision for the orderly marketing of the produce of this country, to enable the farmers to get out of the terrific condition into which they were thrust by the processes which came after the war, for which they were not responsible.

The gentleman from Massachusetts [Mr. LUCE] said another thing to which I desire to call attention before I begin to discuss some other features. He said the farmers did not save their money. He said that they had electric lights in their houses. Has not the farmer a right to have electric lights as

well as anybody else? They have also the right to have automobiles if they pay for them.

The gentleman said that there had been an enormous number of commercial failures during the past year, which occurred for want of credit. What does that mean? A lot of people thought they were rich during the flush times and they went into business without sufficient capital, and did not have the security upon which to borrow the money needed when the pinch came. Therefore their business went to smash, but it was not for want of money, it was for want of credit, and I call the attention of the gentleman to the fact that for nearly 12 months now the currency has been contracting every day, because of the want of proper commercial demand for it, because they were not rediscounting at the Federal reserve banks, and to-day, if I am not mistaken, the Federal reserve notes could every one of them be retired and gold certificates issued instead of them, and we would still have a surplus gold reserve in the Treasury. There has been no limitation of money, but it has been a want of credit, a want of solvent commercial paper to be rediscounted.

The gentleman says he does not like one section to get anything for nothing, to get a gratuity, and then he says that we are paying for it. I call the attention of the House to the fact that New England never passes up a bet. She never loses her opportunity. When the tariff bill was going through the House they put a tariff on hides.

New England came up promptly and asked for a 10 per cent tariff on shoes as compensatory. The tariff on shoes would have amounted to about 50 cents a pair, while the tariff on hides to make the shoes would have amounted to about 2¼ cents. We turned down the compensatory duty on shoes and then they turned around and killed the tariff on hides, because, forsooth, they could not get 50 cents for every 2¼ cents that they paid out on a pair of shoes. The gentleman from Massachusetts [Mr. LUCE] was one of the leaders in that movement, and Mr. TREADWAY, of Massachusetts, made the demand for a separate vote, which killed the tariff on hides.

Permit me to call attention to another thing. The tariff bill as printed by the Senate, on page 111, contains a provision where men on licensed fishing vessels who cure their fish with imported salt or who cure their fish on the shores of navigable waters of the United States with imported salt may have all of the tariff on the salt remitted. They get their salt free. That is Cape Cod and Cape Cod fisheries alone. That is what it is. That is not loaning the Cape Codders the money with which to buy salt at 7 per cent interest. It is giving them back the tariff that they had to pay in order to cure the fish, whereas the fellow out on the farm who kills a hog has to pay the tariff on the salt that he puts on the hog. Yet my friend from Massachusetts says he does not want to see anything go west of the Mississippi, even if we pay 7 per cent for it.

Let us look a little further. These middle-western fellows take care of themselves, but they are not so completely wrapped up that they will take everything. There is a provision in the tariff bill about salt for the packers, that when a packer cures his meat with salt that is imported he gets his tariff remitted when he exports the meat—he gets a drawback—provided there is $100 worth of it. That is something in favor of the packer, because the colored man on my place who kills a hog—and all of them kill a few for their own meat—or a tenant on anybody's farm who kills a few hogs has to pay the tariff on the salt with which he salts it down, and he has to stand for it. He never gets it back, he never hears of it any more; and even if he did export he would not export enough to get back the $100 at a time. But the packer exports and he gets it back. The gentleman from Massachusetts stood for that; he never lifted his voice in opposition to it. Yet he does not believe in giving something for nothing. He never was shocked about that provision; but when we talk about giving the farmers money at 7½ per cent in order that they may live up to the law that we passed and carry out their organization for orderly marketing we begin to hear protests from the gentleman from Massachusetts. It is only within the last few months that we made it lawful for the farmers to combine in cooperative-marketing associations so that they could market their products. They have not yet had time to rig up credit corporations with which to carry those products, and it is necessary that this credit be provided for another 12 months until other arrangements can be made. Yet the gentleman from Massachusetts objects to that. It is merely a matter of credit.

If the gentleman will look at page 109 of the tariff bill as printed by the Senate, he will find there a provision making every smelter's establishment a smelter's warehouse. The smelter can import his ore and give a bond that he will pay the tariff if he lets the stuff out in this country. They charge up the tariff and do not make him pay, and when he has exported as much metal as that amount of ore ought to produce, they cancel his bond.

In other words, the United States Steel Corporation with millions and millions of tons of the best ore in the world in China, with coolie labor at 15 cents a day and boarding themselves, are writing into this bill—and the gentleman from Massachusetts will vote for it when it comes back here, or he did vote for it when it passed the House—a provision that they shall have opportunity to bring in competition with the men who dig ore in this country the Chinese ore, with coolie labor digging it against the miner in this country, and smelt it here and reduce it and ship it out by merely giving bond. And yet the gentleman from Massachusetts is not in favor of classes. That is not a class, that is one of the trusts that is having this written in favor of it, and no one can defend it; and yet he will vote for it when it comes over from the Senate.

Mr. MORGAN. Will the gentleman yield for a question?

Mr. STEVENSON. Like the gentleman from Massachusetts, I will yield to the gentleman.

Mr. MORGAN. Is not the importance of the pending bill made necessary by reason of the method of contraction of credits by the Federal Reserve Board and the New York banks resulting in a decline of 40 per cent on agricultural products and the maintenance of an artificial price on New England manufactured products?

The CHAIRMAN. The time of the gentleman has expired.

Mr. STEVENSON. That may be possibly a way of explaining the attitude of New England about it.

MESSAGE FROM THE SENATE.

The committee informally rose; and the Speaker having resumed the chair, a message from the Senate by Mr. Craven, its Chief Clerk, announced that the Senate had insisted upon its amendments to the bill (H. R. 10871) making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1923, and for other purposes, disagreed to by the House of Representatives, had agreed to the conference asked by the House on the disagreeing votes of the two Houses thereon and had appointed Mr. WADSWORTH, Mr. JONES of Washington, Mr. SPENCER, Mr. HITCHCOCK, and Mr. HARRIS as the conferees on the part of the Senate.

The message also announced that the Senate had passed without amendment joint resolution of the following title:

H. J. Res. 339. Joint resolution making available funds for repairing and restoring levees on the Mississippi River above Cairo, Ill.

WAR FINANCE CORPORATION ACT.

The committee resumed its session.

Mr. McFADDEN. Mr. Chairman, I yield 10 minutes to the gentleman from Iowa [Mr. GREEN].

Mr. GREEN of Iowa. Mr. Chairman, I have the highest respect for the talent and ability of the gentleman from Massachusetts [Mr. LUCE], and it causes me a great deal of surprise that he has fallen into so many errors in reference to what has been going on in financial matters in this country. Let me say for his benefit in the first place, as he seems to be very much alarmed about the so-called farm bloc, that I belong to no farm bloc or any other bloc. I seek no legislation for any one class I would not give another. I ask nothing for the farmer, and have not in the past, that I am not perfectly willing to give to the residents of the gentleman's own district and in his own region. Mr. Chairman, with all the ability that the gentleman from Massachusetts has it is a matter of astonishment to me that he can see only the money that is now being loaned in the West and forgets what the Government has done for his own region. He thinks it is done for a class and a section when money is loaned in the West. When it is loaned in the East it is for the great benefit of the whole country.

Mr. Chairman, I know something about the creation of this War Finance Corporation. The act which originally created it was reported by my own committee. I voted to report it and to pass it. Its purpose was to loan money, not, as originally passed, to farmers, but to railroads and other business institutions in various parts of the country, and among one of the early loans which it made, being for $1,300,000, was to the New Haven Railroad Co., the bonds and stock of which are largely held in New England, and particularly in the gentleman's own State.

Mr. STEVENSON. Will the gentleman permit a suggestion?

Mr. GREEN of Iowa. If the gentleman will pardon me——

Mr. STEVENSON. I just wanted to call the gentleman's attention to the fact that the Massachusetts Members voted for it when you passed it.

Mr. GREEN of Iowa. The New Haven road, as you are all aware, is a great railroad and ought to be a most prosperous system. It is not prosperous and it has not been for a number of years, for reasons which I believe you have all known. Later on in 1918 the Government loaned the New Haven Railroad Co. the immense sum of $43,000,000. Why? Because that great institution was on the verge of bankruptcy at the time and it would have gone into the hands of a receiver. Hundreds, perhaps thousands, of people in New England would have lost their all if that had been permitted to take place. It would have damaged and injured the whole country. Was the voice of the eloquent gentleman from Massachusetts heard in protest against this loan? He was as silent as a graven image. For that course I have no criticism, for I sanctioned it. Gentlemen on both sides sanctioned it; the Members from the West sanctioned it. It was specially made in the interest of New England at that time; but was that class legislation? Oh, it would have been class legislation if it had gone out into the West. It would have been sectional if that money had gone out to the West. But, in fact, it was not sectional, and it saved the New Haven Railroad from destruction at that time.

Let me call the attention of gentlemen to another matter in that connection: These loans now being made by the War Finance Corporation are good loans, and nobody denies that; nobody claims that the Government will ever lose a dollar or even 1 cent on them. What kind of a loan was made to the New Haven Co.? It was a loan no private institution would have made. We knew it was not a good loan; neither the gentleman from Massachusetts or anyone else knows when the Government will get its money back. We can only hope we will get the money back some day. Yet the gentleman from Massachusetts did not condemn this loan.

Mr. JOHNSON of Mississippi. Will the gentleman yield?

Mr. GREEN of Iowa. Well——

Mr. JOHNSON of Mississippi. I simply wanted to say the money loaned in my State on cotton has practically been paid back.

Mr. GREEN of Iowa. It is being paid back right along; none of it will be lost. Now the gentleman objects because we wish to enable the banks to make loans to the farmer for a longer time, not exceeding a year, and he says this is paternalistic and socialistic. What consistency, when just a little while ago the director general extended this loan to the New Haven Railroad Co. for 10 years, and the gentleman from Massachusetts did not object.

Mr. REED of West Virginia. At what per cent?

Mr. GREEN of Iowa. My recollection is it is 6 per cent.

Mr. REED of West Virginia. What do the farmers pay under this provision?

Mr. GREEN of Iowa. I understand they pay about 7½ per cent.

Mr. SNYDER. Depending entirely on the section of the country where the loan is made.

Mr. GREEN of Iowa. Yes. It is not to exceed, as I recollect, 2 per cent above the Federal reserve bank for that region. Sometimes it is not that much.

That is not all the money that the New Haven Railroad has. It has been loaned about $17,000,000 by the Railroad Administration to pay what it owes the Government for improvements and betterments. They have also got a loan of something like $10,000,000 or $15,000,000 recently from the Interstate Commerce Commission. And the Boston & Maine Railroad, up in that region, was loaned by the Government about $26,000,000. Is that a good loan? No. It is not a loan that any private concern would make, no matter how much money it had. But it is a loan that is proper, because it is not well for the country that these great systems should go into bankruptcy. That spreads ruin everywhere. The gentleman from Massachusetts [Mr. LUCE] says he is voicing his opposition to this bill on the ground that it is not sound economics. I will say to the gentleman he is dealing in the past. There was a time when it was thought that such operations were not a function of the Government, and we let ruin follow ruin, failure follow failure, and crash follow crash. But later it was thought proper for the Government to interpose. We have seen how property is sacrificed when a financial panic spreads over a section of the country, how production has been impeded, that production which alone would create wealth; we have seen how business is halted; we have seen how nobody profits by the aggregation of ruin that follows, except the speculator and the money shark. They are the only ones benefited by it. The country as a whole invariably loses.

Now we have this great agricultural region in financial distress. The gentleman may say it is through farmers' own mistakes. But how is it that so many farmers lost their financial standing? They lost it because the Federal reserve banks told them to come on, that the banks had plenty of money at a low rate. Then afterwards the reserve banks put on the brakes, with the same effect that would follow with an automobile going at 60 miles an hour on a slippery road. The result was that the whole financial support went into the ditch and the farmers faced ruin. For many the help came too late. Yet they have the resources to make them solvent if given time. They have the means of production which will benefit the whole country if it is preserved, but which, if lost, will injure the whole country. And this can be done without one cent of cost, without one bit of injury to the Government, without taxing the residents of the gentleman's district or of the East anywhere a single cent. And gradually, through this bill, we will restore that region to the prosperity that it ought to have. Gentlemen, this bill is sound economically; it is sound socially; it is not socialistic; it is not populistic. It is a great measure and ought to be passed. [Applause.]

Mr. McFADDEN. Mr. Chairman, I am wondering if we can not come to an agreement as to time. My understanding is that the gentleman has used 30 minutes, and, if I am correct, I have used 37 minutes.

The CHAIRMAN. The gentleman from Pennsylvania has 27 minutes remaining, and the gentleman from Arkansas [Mr. WINGO] has 29 minutes remaining.

Mr. WINGO. We will have to rise, I will suggest to the gentleman, and reach an agreement in the House as to time.

Mr. McFADDEN. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and Mr. TINCHER having assumed the chair as Speaker pro tempore, Mr. CAMPBELL of Kansas, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill S. 2775 and had come to no resolution thereon.

Mr. McFADDEN. Mr. Speaker, I ask unanimous consent that in addition to the time that has already been allotted to the gentleman from Arkansas [Mr. WINGO] and to myself that the time be increased 30 minutes each—the gentleman from Arkansas to have control of 30 minutes, and I to have control of 30 minutes.

Mr. WINGO. In other words, the proposition is to extend general debate for one hour, to be equally divided between us?

Mr. McFADDEN. Yes.

Mr. KING. Mr. Speaker, reserving the right to object, what is the purpose of extending the time?

Mr. McFADDEN. For the purpose of accommodating certain gentlemen who desire to speak.

Mr. KING. On the bill?

Mr. McFADDEN. On the bill, except one Member.

Mr. KING. It is for the purpose of killing time. We ought not to do it.

Mr. McFADDEN. It is not for the purpose of killing time. We want to get through with this bill, and I think we can get through by 4 o'clock.

Mr. KINCHELOE. Reserving the right to object, do I understand the gentleman to say that it is his purpose to pass this bill to-day?

Mr. McFADDEN. It is; yes.

The SPEAKER pro tempore. The gentleman from Pennsylvania asks unanimous consent that the time for general debate be extended one hour in addition to the time already remaining.

Mr. WINGO. In other words, I understand that the general debate shall be limited to such time as will give the gentleman from Pennsylvania and myself the remaining time and 30 minutes apiece additional. We have not had any limit set yet.

The SPEAKER pro tempore. Is there objection? [After a pause.] The Chair hears none.

Mr. LUCE. Mr. Speaker, I ask unanimous consent to revise and extend my remarks on the bill under consideration.

The SPEAKER pro tempore. Is there objection? [After a pause.]

Mr. STRONG of Kansas. Mr. Speaker, I make the same request.

The SPEAKER pro tempore. The gentleman from Kansas makes the same request. Is there objection? [After a pause.] The Chair hears none.

WAR DEPARTMENT APPROPRIATIONS.

Mr. ANTHONY. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill H. R. 10871, a bill making appropriations for the War Department for the next fiscal year, disagree to the amendments made thereto by the Senate, and ask for a conference.

Mr. GARRETT of Tennessee. Mr. Speaker, I do not know of any objection to that. But I have not had any opportunity to confer with the gentleman from Mississippi [Mr. SISSON].

Mr. MADDEN. Mr. SISSON is agreeable to this.

Mr. BYRNS of Tennessee. Mr. Speaker, reserving the right to object, the Senate placed an amendment on the bill carrying $7,500,000, I think, for further work on the dam at Muscle Shoals. I want to ask the gentleman if he will be willing to say that if the House conferees are unable to agree with the Senate upon that amendment, he will give the House an opportunity to pass directly upon it?

Mr. ANTHONY. I think it would be the disposition of the conferees to consult the wishes of the House on such an important matter as that before they come to a decision.

Mr. BYRNS of Tennessee. Of course, I take it that the conferees will be glad and anxious to comply with the wishes of the House in that matter, but it seems to me that on a matter of that very great importance, unless the House conferees should agree with the Senate, the House ought to have an opportunity to vote directly on it.

Mr. ANTHONY. I can say as one conferee that I would hesitate to agree to such an important matter as that, or disagree to it, without carefully consulting the wishes of the House in regard to it.

Mr. GREENE of Vermont. Mr. Speaker, will the gentleman from Kansas permit me to make a suggestion in that regard?

Mr. ANTHONY. Yes.

Mr. GREENE of Vermont. Of course, the gentleman is officially aware of the fact that another committee is already considering the matters involved in this particular foundation at Muscle Shoals and the expenditures on it, namely, the Committee on Military Affairs.

Mr. BYRNS of Tennessee. That may be true, but this does not affect the matter under consideration by the Committee on Military Affairs. This is simply to continue the work that is there.

Mr. GREENE of Vermont. The matter intrusted to the Committee on Military Affairs is the question of whether we shall continue to build it or not.

Mr. BYRNS of Tennessee. If any of the propositions pending before the committee are accepted, or if the committee decides to continue the work, the appropriations will be necessary, and this is simply carrying on the work.

Mr. GREENE of Vermont. If the gentleman will permit me again——

Mr. ANTHONY. Yes——

Mr. GREENE of Vermont. I think, with all due respect toward good old ordinary common business sense, we ought not to have two committees making a fight on the same proposition.

Mr. BYRNS of Tennessee. This does not involve the matter intrusted to the gentleman's committee. As a matter of fact, the gentleman's committee would have no right to recommend an appropriation.

Mr. GREENE of Vermont. Why not?

Mr. BYRNS of Tennessee. This merely provides an appropriation deemed sufficient to take care of the work during the coming year.

Mr. GREENE of Vermont. The committee that I in part represent has charge of War Department property, and, as I understand, this is War Department property.

Mr. BYRNS of Tennessee. I understand that; but I was speaking of the actual appropriation necessary. It carries an appropriation.

Mr. GREENE of Vermont. It carries an appropriation on which there is no substantive law to rest it. It involves a question of policy which is now being considered by the Committee on Military Affairs, as to whether the business shall be conducted by the Government at Muscle Shoals or by private interests.

Mr. GARRETT of Tennessee. Mr. Speaker, will the gentleman yield?

Mr. GREENE of Vermont. Certainly.

Mr. GARRETT of Tennessee. I would not like the statement of the gentleman from Vermont to go unchallenged, that the appropriation has no authority of law.

Mr. GREENE of Vermont. Technically, I must confess I am wrong about that, and perhaps overstepped the fact in making that remark; but practically the question now comes to a matter of public policy, whether the Government shall continue its proprietary interest in Muscle Shoals at its own expense or enter into contractual relations as to work going on there.

Mr. BYRNS of Tennessee. I do not think there is any conflict between this appropriation and the matter which the gentleman's committee has under consideration; none whatever.

Mr. GREENE of Vermont. I think it is just trying to do with a teaspoon now what somebody may later try to do with a 40-horsepower dredge.

Mr. ALMON. Mr. Speaker, reserving the right to object, something has been said about this amendment not being in order. It provides for an appropriation for the continuation of the work on Dam No. 2 at Muscle Shoals which is authorized by section 124 of the national defense act, commonly referred to as the nitrate section of that act, upon which $17,000,000 has already been expended. When this question was before the House at the closing days of the last session of Congress it was admitted by those who had investigated the question that such an appropriation was authorized by that section of the national defense act, and no point of order was made against the amendment proposed at that time.

In view of the statement of the gentleman from Kansas [Mr. ANTHONY], that the House will be given an opportunity to express itself upon this amendment if it is not agreed to in conference, I shall not object to the bill going to conference.

The SPEAKER. Is there objection?

Mr. BYRNS of Tennessee. In view of the statement made by the gentleman from Kansas [Mr. ANTHONY] in reference to his action and the action of the conferees on this matter, so far as I am personally concerned, Mr. Speaker, I am not going to offer any objection. I am sure the gentleman will bring the matter back and give to the House an opportunity to pass upon it.

Mr. KINCHELOE. Reserving the right to object, Mr. Speaker, I want to say to the gentleman from Kansas that I am sure he knows as well as I do that the whole country is interested in this Muscle Shoals proposition. It is not localized at all. Here is an amendment that the Senate has put on, about which the House has not been consulted at all. Yet the House is deeply interested in it, and you gentlemen ought to give the House the right to pass upon it provided the House conferees should not agree to it.

Mr. ANTHONY. I am sure that the conferees on the part of the House will not only give gentlemen an opportunity to express their views on this question, but that we will crave the advice and assistance of gentlemen on this matter.

Mr. KINCHELOE. I will say that if I did not think the conferees would give the House the right to pass upon it I would be constrained to object, but as it is I do not object.

The SPEAKER. Is there objection?

There was no objection; and the Speaker announced as the conferees on the part of the House Mr. ANTHONY, Mr. STAFFORD, and Mr. SISSON.

WAR FINANCE CORPORATION ACT.

Mr. McFADDEN. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill (S. 2775) to extend for one year the powers of the War Finance Corporation to make advances under the provisions of the act entitled "An act to amend the War Finance Corporation act, approved April 5, 1918, as amended, to provide relief for producers of and dealers in agricultural products, and for other purposes," approved August 24, 1921.

The SPEAKER. The gentleman from Pennsylvania moves that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill S. 2775. The question is on agreeing to that motion.

The motion was agreed to.

Accordingly the House again resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (S. 2775) to extend for one year the powers of the War Finance Corporation to make advances under the provisions of the act entitled "An act to amend the War Finance Corporation act, approved April 5, 1918, as amended, to provide relief for producers of and dealers in agricultural products, and for other purposes," approved August 24, 1921, with Mr. CAMPBELL of Kansas in the chair.

Mr. McFADDEN. Mr. Chairman, I yield 20 minutes to the gentleman from Washington [Mr. SUMMERS].

Mr. COLTON. Mr. Chairman, in view of the importance of the subject that the gentleman is going to speak upon, I make the point of no quorum present.

The CHAIRMAN. The gentleman from Utah makes the point of no quorum present. The Chair will count.

Mr. McFADDEN. Mr. Chairman, I move that the committee do now rise.

Mr. COLTON. Mr. Chairman, at the suggestion of gentlemen around me, I withdraw the point of no quorum.

Mr. McFADDEN. And I will withdraw my motion.

The CHAIRMAN. The gentleman from Washington [Mr. SUMMERS] is recognized for 20 minutes.

Mr. SUMMERS of Washington. Mr. Chairman, I am in favor of this bill which will continue to bring relief to farmers and stock raisers, but I wish to speak for a short time on the subject of the best investment that Uncle Sam ever made—on the subject of Jack Rabbits and Markets.

A short time ago on a sage-brush plain in the far West there occurred a jack-rabbit drive.

Between the hours of 9 and 11.30 a. m. 8,000 jack rabbits were killed.

Shortly thereafter another drive in near-by territory slaughtered 5,000. A third drive resulted in 6,000 fatalities; and still the jack rabbit remains undaunted and millions of unborn jack rabbits are weeping to be born. [Laughter.]

Mr. KINCHELOE. Will the gentleman yield?

Mr. SUMMERS of Washington. A little later.

Mr. KINCHELOE. I should like to know why they killed these jack rabbits. I thought they were good to eat.

Mr. SUMMERS of Washington. They are an expensive pest.

The great sweep of level land on which these drives took place is flanked by three rivers and traversed by three railroads, a State highway, and several county roads.

Now, when Columbus discovered America that sagebrush plain was there.

The Declaration of Independence left it untouched.

When the Federal Government in 1836 distributed to Massachusetts, New York, Pennsylvania, Ohio, and 22 other eastern States $28,000,000 that had then accrued from the sale of public lands, this sagebrush plain remained undeveloped.

When Daniel Webster, then Secretary of State, contemplated swapping to Great Britain the "inaccessible barren waste beyond the Rockies," now comprising the great Commonwealths of Oregon, Washington, and Idaho, in exchange for fishing privileges off the banks of Newfoundland, the sagebrush plain had undergone no change and was regarded as worthless.

Now, the sagebrush plain throughout the centuries has been the home of the jack rabbit.

THE JACK RABBIT LEADS THE SIMPLE LIFE.

The jack rabbit pays no taxes. He builds no houses. He requires no saws from Indianapolis, no hammers from Connecticut, no paints from Ohio and Illinois. He wants no furniture, carpets, stoves, kitchen ware, nor sewer pipe from the factories of the East.

Throughout the centuries these sturdy jack rabbits of the purple sagebrush plains have never placed an order for telephone equipment in Chicago nor Pittsburgh. They never wired to South Bend nor Louisville for farm wagons, nor to Ohio or Illinois for farm machinery.

While they multiplied and replenished the earth, their progeny required no fabrics from the looms of the East nor from the South. They placed no orders for wearing apparel in Rochester nor Cincinnati. The factories of Missouri and Massachusetts never furnished their shoes.

These millions of jacks—young and old—never ordered their breakfast food from Niagara nor Cedar Rapids nor from Topeka, Kans.

WISE MEN OF THE EAST.

Great rivers flow through these useless lands and on to the sea, but the fragrant sagebrush plains and the jack rabbits are the same, yesterday, to-day, and—shall I say forever?

The lands are worth $1.25 per acre, and, as I have said, pay no taxes, neither State nor Federal.

I was about to say this condition would continue "forever," but in the days of Theodore Roosevelt the "wise men of the east" had a dream and were troubled.

They said:

"This part of our great national farm has remained unimproved and unproductive for centuries.

"Under present conditions it will remain so throughout all time.

"Can the ingenuity of man do nothing?"

And then the "wise men" had a vision and they said:

"Why not bring the life-giving water and the parched lands of the sagebrush together?

"Why not people these plains with thrifty American citizens?

"Why not build homes?

"Why not increase the wealth of the Nation?

"Why not put producers and consumers and taxpayers where the jack rabbit has for centuries held sway?"

And the "wise men from the east" said one to another, "Why not create markets?"

CONGRESS STIMULATES DEVELOPMENT.

And in the year of our Lord 1902 the great American Congress said, in its heart:

"The thirteen original States have profited greatly from public lands; the territory of the great West, even beyond the Appalachian Mountains and in the valley of the Mississippi and the Western Plains, which we once thought almost worthless, has, under our guidance, developed into a great producing and consuming empire—the backbone of the Nation."

And in its wisdom the Congress hearkened to the "wise men of the East" and West and said, "We will apply the receipts from the sale of public lands to the reclamation of arid lands in those same States," and during the past 20 years 26 projects, comprising 1,700,000 acres of sagebrush land, has been irrigated.

And this is what happened on one of the sagebrush plains when water was put on the dry land:

Homes were built, labor was employed in the West, tools and farming implements and furniture and stoves and carpets and clothing and shoes and breakfast foods and telephones and books and magazines and automobiles and life-insurance policies and codfish were ordered from the East, where vastly more labor was employed than in the West.

And American citizens and defenders of the flag established beautiful and productive farms and homes and replenished the plains, and the $1.25 land became $300 land, and producers and consumers and taxpayers replaced the jack rabbits and are now repaying at the rate of $4,000,000 per annum the loan that was made for purposes of development.

MILLIONS EXPENDED IN EASTERN MARKETS.

Without taking into account millions of dollars worth of merchandise that has been shipped in less than carload lots, the following carload shipments are received annually on one—just one—of the 26 reclaimed plains.

On the accompanying map I have indicated the point of origin, and have shown Boise, Idaho, as the actual destination of these carload shipments. These lines could be extended and similar figures would apply to Yakima, Wash., and to other projects.

Grand total annual car lot shipments to the one project			674

This means a train 5 miles long, carrying products from eastern factories to just 1 of the 26 irrigated plains of the West.

If to this we add the consumption of grain, flour, coal, gasoline, lumber, brick, cement, and miscellaneous shipments, our car lots are multiplied several times and our freight and emigrant train stretches down the track some 20 miles or more.

Twenty million dollars annually goes to the markets of the East from this one reclaimed sage-brush plain.

The existence, growth, and development of 25 other projects of the West duplicate this one to a greater or less extent.

THE YAKIMA PROJECT.

To illustrate further, the Yakima project in the State of Washington shipped out 67,000 carloads of products valued at $80,000,000 in 1919–20.

During the same period it shipped into the Yakima country from the Central and Eastern States the following commodities:

	Value of commodity.
Automobiles, tires, and accessories	$5,825,000
Hardware and building supplies	2,300,000
Canned goods, mixed groceries, and breakfast foods	4,150,000
Farm machinery	1,250,000
Ready-to-wear clothing	3,500,000
Shoes	2,000,000
Furniture and household supplies	2,700,000
Cotton and woolen goods	2,200,000
Drugs and sundries	2,350,000
Millinery, notions, and crockery, and electrical apparatus	1,950,000
Insurance premiums paid to eastern companies	6,200,000
Total	34,425,000

IRRIGATION A NATIONAL ASSET.

Every State with a coal or iron mine and every manufacturing center in the United States shares the prosperity of these projects.

Clearly these are not local but national assets.

The market at Boise, Idaho, to which I have just referred, is created almost wholly by 250,000 acres of irrigated land.

A home market seventy times as great as this awaits development.

In the State of Washington alone are 2,500,000 acres of irrigable but unreclaimed lands, with rivers flowing through, and now traversed by railroads and State highways.

COLUMBIA BASIN.

The proposed Columbia Basin project in east Washington embraces 1,750,000 acres, and when constructed will be the world's greatest irrigation project.

General Goethals has but recently pronounced this project entirely feasible, and has said that its construction would be worth more to the United States than the Panama Canal.

Throughout the Western States are 17,000,000 acres of such lands awaiting the decision of the "wise men of the East."

Will it mean more for this Nation to develop these lands and homes and markets, or shall this decade and this century leave them untouched while tens of thousands of service men beg for farms?

Foreign lands are expensive to exploit. Foreign markets are difficult to secure and hard to hold. Home markets once developed are always ours.

Shall the jack rabbit and his progeny forever hold the sage-brush plains? [Applause.]

An article written by me and published recently in the Country Gentleman embraced much of the matter here presented, and I am indebted to that magazine for the privilege of reproducing it here.

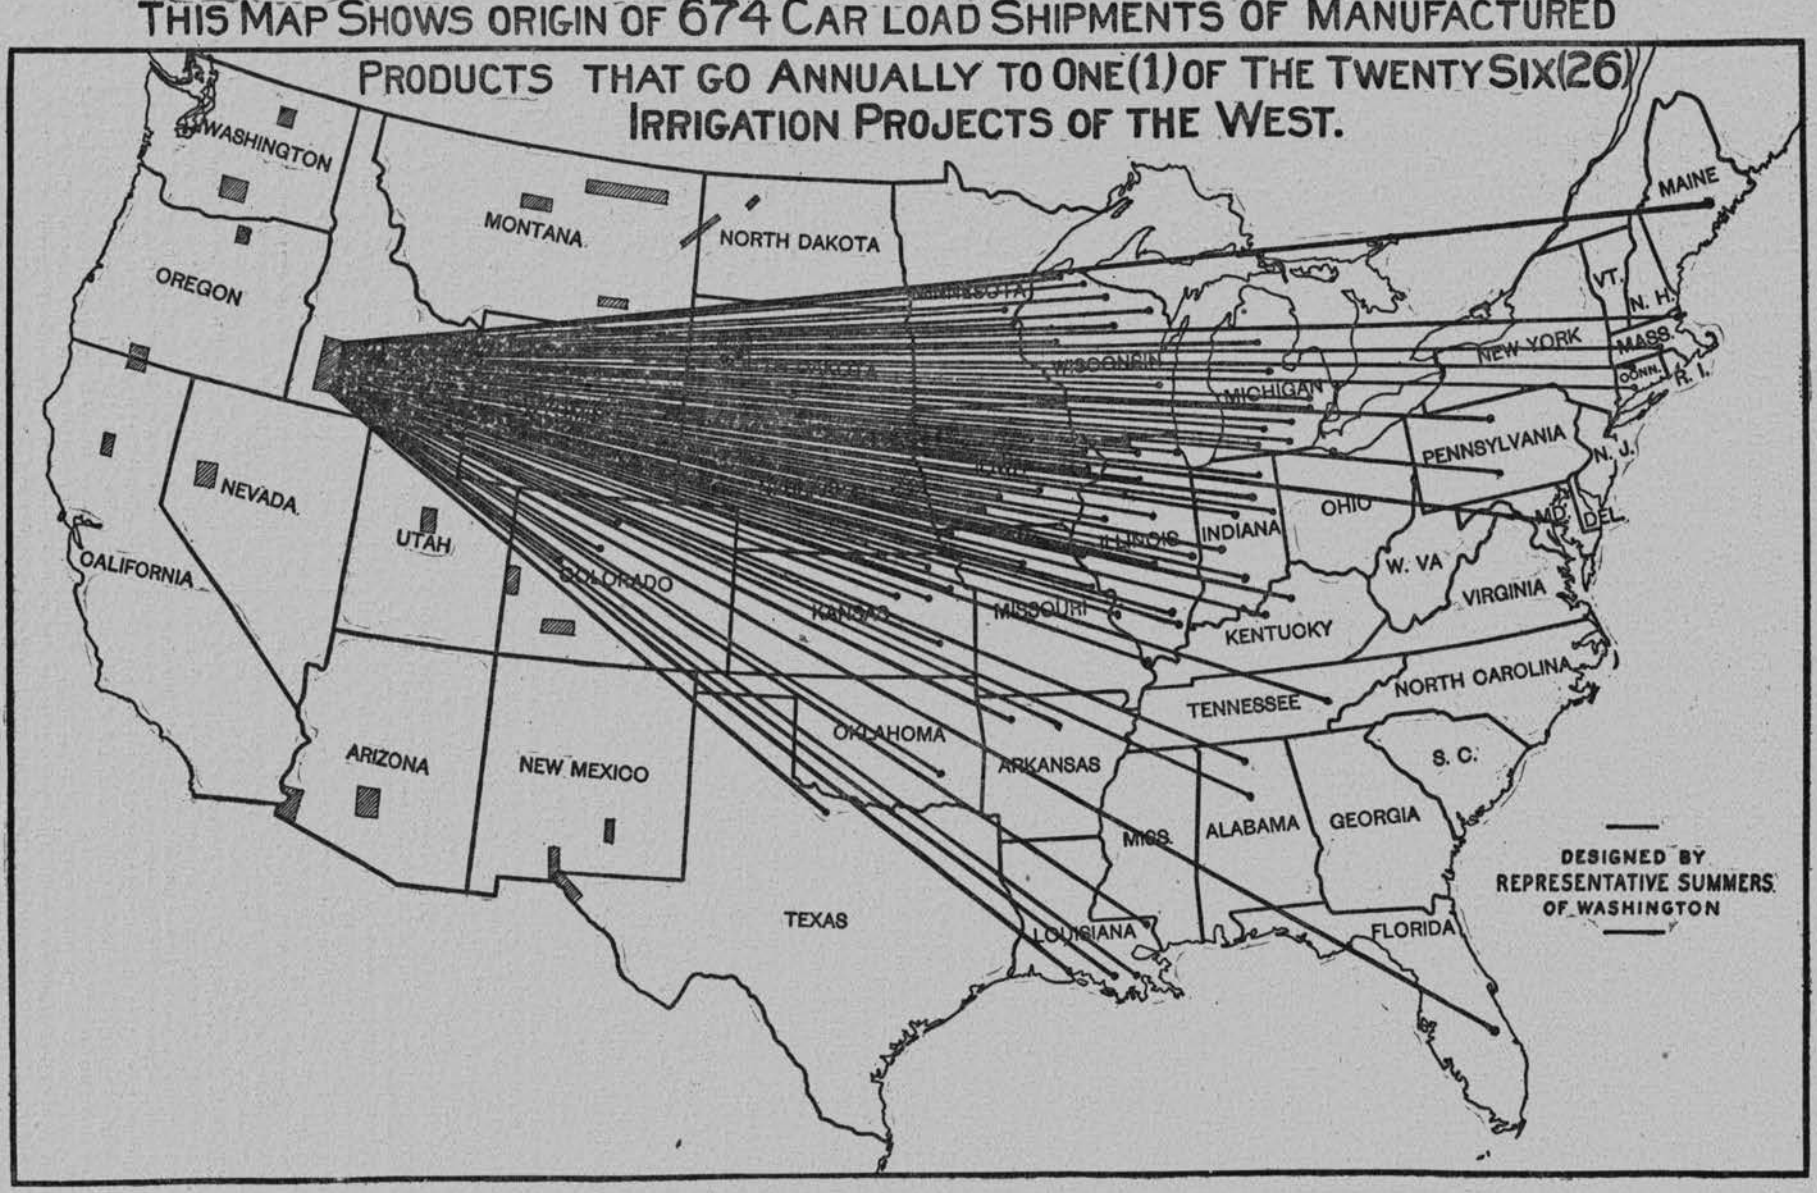
Mr. Chairman, I ask unanimous consent to extend my remarks and to include the map to which I have referred, and that it be printed in the RECORD.

The CHAIRMAN. The gentleman from Washington asks unanimous consent to extend his remarks in the RECORD in the manner indicated and to include the printing of the map. Is there objection?

There was no objection.

Mr. GARNER. Will the gentleman yield for a question?

Mr. SUMMERS of Washington. I yield to the gentleman from Texas.



Mr. GARNER. I take it that the gentleman's argument is in an effort to show the House that it is wise public policy to continue to reclaim these lands?

Mr. SUMMERS of Washington. That is my object.

Mr. GARNER. And, if I understand it, the bill now pending in the House that has the approval of the western people is known as the Smith-McNary bill?

Mr. SUMMERS of Washington. That is correct.

Mr. GARNER. Can the gentleman tell us if we are going to have an opportunity to vote upon that bill at this session?

DESIGNED BY
REPRESENTATIVE SUMMERS
OF WASHINGTON

Mr. SUMMERS of Washington. I am very sorry to say that I can not give you any definite assurances in regard to that matter.

Mr. SINNOTT. You hope the opportunity will be afforded?

Mr. SUMMERS of Washington. Yes; and I hope these remarks may help enlist the interest of others. I trust the bill will be brought to a vote at this session. There is very great interest in the bill throughout the country. It is much broader in its scope than our irrigation policy, because it takes in swamp lands as well as dry lands and provides for the loaning of Federal money at 5 per cent for reclamation purposes.

Mr. GARNER. I understand that the western people as well as the valley people propose to pay their own way, and all they ask is that Uncle Sam go on their notes?

Mr. SUMMERS of Washington. That is the plan.

Mr. GARNER. Up to date Uncle Sam has not lost any money by going on the notes of the people in these various projects.

Mr. SUMMERS of Washington. The gentleman is correct.

Mr. GARNER. If I understand it, the gentleman's party, in its national platform and also in the statement of the President, has agreed to give some relief in this direction.

Mr. SUMMERS of Washington. Both parties have so agreed.

Mr. GARNER. Both parties. I want to say that there are a great many on this side of the House who are anxious to have an opportunity to vote for this bill.

Mr. SUMMERS of Washington. Can the gentleman assure us how many votes there will be for the bill on that side?

Mr. GARNER. I can not say how many, but there will be a large vote in favor of the bill.

Mr. SUMMERS of Washington. It is a very important matter and concerns the whole country.

Mr. GARNER. I think I can assure the gentleman that there will be three-fourths of the Members on this side of the House who will vote for the bill. According to the map which the gentleman has exhibited here there is only one point in Texas which ships anything into that Idaho project.

Mr. SUMMERS of Washington. The map shows only the carload shipments.

Mr. GARNER. Notwithstanding that fact, I think that a very large proportion of the Texas delegation will vote for that proposition, although there is only one point in Texas from which products have been shipped to this reclamation project. But we believe it is good public policy to reclaim these desert lands and to reclaim the swamp lands as well. I do hope that the steering committee will give us an opportunity to vote on this matter, and that the gentleman from Kansas will bring in a rule and not keep it in his pocket. [Laughter.]

Mr. SUMMERS of Washington. We of the West have seen the benefits of reclamation to the whole country and are extremely anxious to see this policy extended. [Applause.]

Mr. Chairman, I yield back the balance of my time.

Mr. McFADDEN. Mr. Chairman, I yield 15 minutes to the gentleman from Kansas [Mr STRONG].

Mr. STRONG of Kansas. Mr. Chairman, the purpose of this bill is to extend for another year the operations of the War Finance Corporation, which otherwise would be prohibited after the 30th of this month from making new loans to assist in financing the marketing and exportation of agricultural products.

The bill will pass, because the great majority of both parties in Congress have come to realize the great relief and assistance it has given through loaning over $500,000,000 in the agricultural sections of the country during the past year, but I regret the opposition from the New England States, led by my friends, the two splendid gentlemen from Massachusetts, who have opposed this bill. I do not believe they are unsympathetic or unwilling to give the rest of the country the consideration to which it is entitled. They simply do not understand the agricultural problem. They have been trained in a school which has taught them that the farmer should not take a hand in finance or other great matters not directly concerned with their business. They believe that if the farmers till the soil and gather in the harvest they should let other interests market their products and provide on their own terms the necessary finances. They are so obsessed with the notion that farmers are not able to attend properly to the business of disposing of their products that they are unable to approach the subject of agricultural legislation from a broad and all comprehending plane. One of them comes from that city of culture and of beans whose principal industry consists in loaning money for hire, while the other represents a district in which the loom and the spindle are the basis of their prosperity.

I hope yet we can convince them, both that their money will not sustain life unless used to enable the farmer to produce food for them and that the operation of their mills must largely depend upon the ability of the farmer, who constitutes one-third of the people of the Nation, to purchase their products. The trouble with the Massachusetts statesman is that he will not step up on the Plymouth Rock and look westward, as his Pilgrim fathers did. He is content with Massachusetts, and uses the hammer freely when legislation in behalf of agriculture is proposed. Especially does he like to knock Kansas. They glory in the statement, "Massachusetts, there she stands, she speaks for herself"; but of Kansas we say, "There she goes; what she does speaks for her."

But the Representatives of agricultural States want no radical legislation. We are only asking a fair share in the benefits which have been already extended to other interests. During the war agriculture was appealed to to increase the production of food products and clothing material. Agents of the Government urged the planting of more wheat, cotton, corn, and other crops; the raising of more hogs and the increasing of the cattle and sheep herds. The banks, through the Federal reserve system, were requested to finance liberally the farmer and the cattleman. Then, that the country and the world might have bread and meat on reasonable terms, a price was set on the products the farmer had to sell. To this he loyally assented. He was not a war profiteer, but he was soon to learn that no price was set upon what he had to buy, and those who produced harness, wagons, implements, and clothing were permitted to charge him what they pleased.

After the war, when the price fixed upon agricultural products was removed and they had largely advanced, it was impossible to market them because of the shortage of cars, which had been brought east to transport war materials and manufactured goods along the Atlantic seaboard.

Then the period of deflation set in, with the crop of 1920 still in the farmers' hands, and because of restriction of credits he was unable to hold the same, but was forced to sell at less than the cost of production. With an immense crop of corn in 1920, it was impossible to secure credit to purchase feeders of the cattlemen, and the corn crop was forced to be sold at the ruinous price of from 25 to 30 cents a bushel while hundreds of thousands of cattle were sold in such a condition that required them to be marketed as canners.

Bankers in agricultural States found that because of the decline in prices the cattle and grain, on which they had taken security for the loans they had been urged to make, would not liquidate the same. One banker interested in 47 banks in the cattle and sheep country of the Northwest came before our Banking and Currency Committee and stated that if credit was not extended so as to relieve the situation that both the banks and the stockman would be forced into bankruptcy. He produced the papers showing the shipment of 900 sheep from Wyoming to Chicago that netted but 35 cents apiece after the freight and handling expenses and commissions were paid. On this shipment one of the banks had a mortgage of $1.75 a head, which it had been urged to make by representatives of the Government when sheep were worth $4.50 apiece. The same condition existed throughout the West from Texas to the Dakotas.

To meet this situation representatives of agriculture in Congress united to pass legislation that would extend relief and avoid a national crisis, and I insist that none of these bills have extended favors that have not been enjoyed by other commercial and industrial interests.

The bill to rehabilitate the War Finance Corporation and empower it to make loans to banks and cooperative associations to finance the marketing and exportation of agriculture, as it had been used to finance manufacturing interests, was reported out of our Banking and Currency Committee and became a law. Also three bills, the principal one of which was that of Senator Curtis, of Kansas, making it possible for the farm-loan banks and the joint-stock banks to sell their bonds to the amount of over $350,000,000, which have made it possible for the farmer and the cattleman to borrow money at reasonable rates of interest that have saved them from bankruptcy. The farm-loan banks are now loaning a million dollars a day on the best security in the world and have lately reduced the interest throughout the country from 6 to 5½ per cent.

The bill to give agriculture representation on the Federal Reserve Board met with the same opposition that this bill is now confronting, and to get it out of our committee we had to consent to amendments which I am glad to say we were able to defeat upon the floor of this House, and yet under that bill we only gave to the agricultural industry the same status that commerce and industry already enjoyed. Why should the bankers of the country and the great moneyed interests oppose having upon the board that controls the Federal reserve system one man who represents the greatest industry in the Nation? [Applause.]

Our committee is now considering agricultural credit bills, and it is the purpose of those of us who represent agricultural districts and States to try and induce the Congress to establish a system so that agriculture may have the same credit facilities as are accorded to other industries.

Our present financial system does not provide for the extension of credits based on personal security for a longer term than six months. This meets the requirements of those engaged in commercial and industrial pursuits, because the length of time of what is termed their "turn-over period" does not exceed six months, but the farmer's turn-over period is one year, because it takes that length of time for him to plant, harvest, and market his crops, while the cattleman's turn-over period is from one to three years, because it takes that length of time for him to produce, prepare, and market his live stock. To insist that the farmer and the stockman shall finance his business through loans that mature before his turn-over period is reached subjects him in case of a financial stringency to be forced into financial embarrassment and perhaps ruin.

We realize that our present financial system is based upon short-time loans which can be readily liquidated, and that this is necessarily so since the commercial deposits in the banks are used to finance the same and must mature in short periods to assure the depositors the return of their money when they call for it, but we want, without injuring the system, to provide a means to finance the farmer and the stockman for his credit needs. It can easily be done.

I doubt, however, if the legislation can be perfected in time to pass at this session of Congress. Some want to establish an independent system of banks; some wish to follow the suggestion that I made last July to the Commission on Agricultural Inquiry to use the farm loan banks. I have come to believe that the farmer and the cattleman should be able to go to his own local bank and secure his credit needs, where he is known and where his security can be easily inspected and approved. I think this can be done by providing a special fund in the Federal reserve system through which all the banks in the country can rediscount the paper of the farmer and the cattleman, if it becomes necessary for them to do so, and with a representative of agriculture on the Federal Reserve Board, which the bill we passed last week will make possible, there will be created increased confidence in agricultural sections in this great financial system, but until we can perfect and pass agriculture credit legislation, the operations of the War Finance Corporation must be continued.

I hope that the Representatives in Congress who do not represent agricultural districts will overcome the prejudice that has been created by the great financial interests of the country against the legislation we have passed and wish to pass in behalf of agriculture. It is an industry in which one-third of the people and one-fifth of the wealth of this great Nation is interested. It is the basic industry of the country. It provides the food and clothing for all. It must be prosperous if it is to continue to serve the Nation, and unless it is, commerce and industry can not prosper. The history of the world reveals the fact that nations begin to decay when agriculture wanes. The continued greatness of this Nation and the prosperity and happiness of its people depend upon the protection and encouragement of all the industries, and as the representative of a great agricultural district in one of the principal agricultural States, I want to cooperate with those who represent the other industries to accomplish such an end. [Applause.]

Mr. WINGO. Mr. Chairman, I yield to the gentleman from Texas [Mr. BRIGGS].

Mr. BRIGGS. Mr. Chairman, the pending measure provides for the extension for another year of the powers of the War Finance Corporation to make advances in order to provide relief for producers of and dealers in agricultural products and for exporters and others, as more fully set forth in the act.

Up to yesterday the War Finance Corporation had made advances aggregating $355,963,442.69, of which $32,515,215 went to the State of Texas, and which latter has practically all been repaid.

The facilities which this corporation has provided and the great volume of loans made to not only the agricultural and live-stock interests of Texas but to those of a great number of other States throughout the Nation, has clearly demonstrated the imperative need for it; the continuing inability to obtain necessary credit without it is still so acute that it is not anticipated that there will be very many in this House voicing any serious objection to the adoption of this extension measure.

The agricultural and live-stock interests throughout the country suffered so severely by reason of the tremendous deflation in values and the existing general depression that the facilities which this Government corporation has provided has enabled such interests to weather a most critical condition and continue to survive. But the critical period is not over, and the relief offered by the War Finance Corporation must be continued another year. By that time it is hoped that the administration will have sanctioned the consideration and adoption by Congress of proposed legislation providing a better and more comprehensive system of agricultural credits, so that loans for longer periods than now permitted under the existing law can be extended to such interests and an independent system of short-term rural credits provided.

The repayments of advances already made by the War Finance Corporation have been most gratifying, so the managing director advises, and such repayments are now exceeding the amount of loans being made.

The action taken by Congress a few days ago in providing for the representation of agriculture on the Federal Reserve Board was a distinct and beneficial step in the right direction, and one which I supported and particularly favored because the appointment on that board of a true representative of agriculture will give to that body a better opportunity for successfully dealing with the problems of agriculture and the farming interests of the Nation. And this will result in the greatest benefit to the country generally.

Agriculture to-day is, however, still confronted with the gravest problems and difficulties, conspicuous among which are the excessively high transportation rates on farm products. A reduction in such rates would, in my opinion, not bring about reduction in revenue to the railroads, but would maintain and increase revenue from such sources by stimulating an increased movement of the products of the farms to consumers and effectually correcting a condition which permits farm products, so badly needed, to go to waste and decay on the farm, because after transportation charges are paid to markets there is so often nothing left out of which to pay the producer for his commodities, and hence there is no incentive to the producer to continue shipments under such discouraging and profitless conditions.

One remedy which, in my opinion, would be of the greatest remedial value in bringing about proper reduction in rates would be to restore to the several States that power of regulating their intrastate rates, which was taken away from them under the transportation act of 1920, the passage of which I strenuously opposed.

All these considerations and problems affecting agriculture ought to be dealt with by Congress and dealt with soon; but this measure for the extension of the life of the War Finance Corporation another year will aid the live-stock and agricultural interests, and exporters as well, in meeting such difficulties and problems until other necessary legislation has been provided.

Mr. WINGO. Mr. Chairman, I yield five minutes to the gentleman from Texas [Mr. CONNALLY].

Mr. CONNALLY of Texas. Mr. Chairman and gentlemen of the committee, the gentleman from Massachusetts [Mr. LUCE], who to-day spoke against this bill to extend the War Finance Corporation, is an entertaining talker. He is an educated and cultured man, but his views are unsound. He comes from the environment of Boston, far from the farms and ranches, far from the open spaces where men toil with their hands out in God's free sunlight and free air, and the gentleman from Massachusetts does not feel any sympathy for the farmers nor any appreciation of the problems and struggles that those engaged in agriculture have suffered during the past two years. The only contact the gentleman from Massachusetts has with the farmer is when at the dinner table he pushes his patent-leather shoes under the table and partakes of the bodily comforts from the farm and from the ranch. When that contact with the farm and the products of the farm is over, the gentleman from Massachusetts forgets the farmer, retires to his study, adjusts his glasses, and begins to commune with himself on the great fundamental questions of economic law, of culture, and of artistic taste in which he delights to revel. [Laughter and applause.]

I agree to the abstract proposition, the abstract principle, that the Government should not go into its purse and give to an individual or a special interest money that is wrung from the people by taxation.

But let us look at the words of the gentleman from Massachusetts and compare them with his actions. There is holy authority that is more acceptable to me than the word of the gentleman from Massachusetts—that "by their fruits ye shall know them." The gentleman from Massachusetts strongly declaims against the War Finance Corporation, which does not have as its object the taking of a single dollar out of the Treasury and giving it to agriculture but has for its object the

continuance of an institution that has loaned to country banks, agricultural pools, and marketing associations more than $300,000,000 with which to market agricultural products, which has for its object the continuance of an agency to enable agriculture to finance the exportation and sale of its products at home and in foreign markets. The gentleman declaims against that, and yet when they bring into the Halls of this Chamber, when they bring on the floor of this House a tariff bill that goes into the pockets of men that labor on the farm and takes money from their pockets and gives it to the manufacturers of New England who live in the district which the gentleman represents he votes for it. Why, when the tariff bill comes before this body the gentleman from Massachusetts closes his study, he deserts his statuary, he forgets his pictures and paintings, and rushes here with haste and votes for the tariff that does not give any special privileges to anybody except the constituents of the gentleman from Massachusetts. [Laughter.]

Mr. LUCE. Will the gentleman yield?

Mr. CONNALLY of Texas. Not now, when I am through. The gentleman from Massachusetts says that this bill is paternalistic. He says he does not believe in paternalism, and when I asked him if he believed in and favored the ship subsidy bill, that measure, which President Harding and the Republican leaders are urging, that measure that proposes to take money out of the Treasury of the United States and give it as a bounty to great shipping companies—when I asked him if he favored the ship subsidy bill the gentleman evaded the question by saying that that question was off on a spur track of his mind and for the moment the gentleman wanted to get away from the spur track. He refused to answer. Everybody knew what he meant.

Everybody knew that the gentleman was in favor of a ship subsidy bill, and everybody knows now that he is in favor of it, because if he had not been he would have said so. He will vote for it because it takes money raised by taxing all the people and will give it to shipping interests, some of whom are in New England.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. CONNALLY of Texas. Can not the gentleman from Arkansas yield me a few minutes more?

Mr. WINGO. Mr. Chairman, I yield the gentleman two minutes more.

Mr. CONNALLY of Texas. When the tariff bill was reported to the House the gentleman from Massachusetts [Mr. LUCE] thought it was the part of statesmanship, the part of justice, of equality, that it was the function of Government which is to govern and not to grant bounties, to have that bill provide a tariff on shoes—after a hide had been tanned and made into a shoe in New England, it should have a compensatory duty of 10 per cent of the price of the finished shoe; but back yonder in the beginning, back yonder in the elemental stages of that shoe, back yonder while that shoe was on the back of some cow feeding on the plains of Kansas or Iowa or Wyoming or Texas—when that shoe was out yonder still in the hide of some cow grazing on the plains, eating the farmers hay and corn and cottonseed products, the gentleman from Massachusetts did not believe that it was right, that it was fair, that it was a function of Government to levy a tariff on hides.

Mr. Chairman, let me say this for the farmers. They are not standing at the doors of this Congress asking that you take out of the Treasury and give them any bounty. Neither do they want to pay a tariff bounty on the manufactured goods that they must buy; nor do they want to pay a ship subsidy. We are demanding in this bill that the Republican Party, which is in control of the Government, give them an opportunity to sell in the markets of the world the products of their toil and industry, and that is all that this bill does. I voted for the bill when the War Finance Corporation was created. This bill is merely to carry forward the Finance Corporation in order to let the farmers have an avenue into European and other foreign markets for the labor and toil that they spend while with bended backs they are digging in Mother Earth. Yet the gentleman from Massachusetts in his easy chair in his study, sustained by the comforts that come from the farm, closes the door of his heart, closes his sense of fairness, forgets the principle of equality, and would say to the farmer that he shall not even have this agency, when it does not cost the Government one single farthing. [Applause.]

The CHAIRMAN. The time of the gentleman from Texas has again expired.

Mr. McFADDEN. Mr. Chairman, I yield five minutes to the gentleman from Oklahoma [Mr. HERRICK].

Mr. HERRICK. Mr. Chairman, I have only five minutes in which to try to do justice to the subject that ought to take five hours, therefore I ask unanimous consent to revise and extend my remarks in the RECORD.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. HERRICK. Mr. Chairman, I have a few notes here from which I will read, and then I shall speak without them. I want to say that I am in favor of extending for one year the powers of the War Finance Corporation, in order to provide relief for the producers of and the dealers in agricultural products. Figures submitted in the debate yesterday show that the total loans made since January 4, 1921, up to and including May 27, 1922, by this corporation amount to $354,718,000, of which sum $304,000,000 was loaned direct to financial institutions and $59,372,000 was loaned to cooperative associations. In the discussion by the opponents of this measure nothing has been said either yesterday or to-day about the $304,000,000 loaned to financial institutions, but they seem to be greatly troubled about the $59,372,000 loaned to cooperative associations, because it is benefiting the farmer.

Mr. Chairman, some gentlemen east of the Allegheny Mountains and north of the Mason and Dixon line, and perhaps one or two south of it, occasionally seem to indulge in what seems to be a popular indoor sport of throwing sarcasm and ridicule at the farmer. I would remind these gentlemen, particularly the gentleman from Massachusetts [Mr. LUCE], that that is eminently unfair. I am sorry that some of the other speakers have paid so much attention to the distinguished gentleman from Massachusetts [Mr. LUCE]. I really do not think he deserves all of the sarcasm and the criticism and the time and attention that have been devoted to him. I would remind gentlemen who have been paying attention to him to-day that the next time he takes the floor on a similar subject they ought to recollect that he is entitled to a reasonable amount of excuse for extenuating circumstances. Gentlemen should recollect that he is a pretty nice man, personally, considering where he comes from. [Laughter.] It has been a misfortune of nature or of the Almighty or of some forces over which he has no control that he lives in a little crab hole in the fog banks of Massachusetts, and as the fog there is pretty dense on the banks it obscures his vision, and he can not see any other portion of the United States except the little strip of sand dunes around Cape Cod. [Laughter.] However, for the benefit of the aforesaid gentleman and of his colleagues I would remind him that when he is casting these slurs at the farmer he is unthinkingly casting slurs at the very foundation on which humanity exists. He would be wholly unable to sell the products of the Massachusetts shoe factories if there were not any farmers to first produce the raw leather. [Applause.]

And I would further like to remind him that his Massachusetts financial institutions could not run at all if there were not any farmers to produce food to feed the New England bankers, because they could not subsist very well upon his New England fog. [Laughter and applause.] If there were not any farmers or agricultural products the railroads would cease to run, the coal mines would cease to operate, because no one could produce food for the coal miners; ships would cease to sail, because there would be nothing to ship, and while it seems to be pretty popular with some of the effete easterners to regard the farmer as a hayseed, or a jay, or a country reuben, or a tar bucket, or some other necessary evil, if they would just stop and think seriously for a few minutes they would realize that they can not exist without the farmer, and they would also realize that their manufacturing States in the East are not self-sustaining. The flour to make their biscuits has to come from the great grain-growing States of the West. And furthermore, I would like to call special attention to one statement that the gentleman made, which is not only grossly erroneous, but I think he must have made it unthinkingly, because otherwise I would certainly give him credit for more intelligence. [Laughter.] That is this: He stated that the farmer was the chief profiteer during the late war. Now, we hear of profiteers who are going to be prosecuted. I would just like to ask how many farmers—in case we have real, genuine, true, honest prosecutions—how many farmers does he expect are going to be sent to the penitentiary? [Laughter.] I make the prediction that not even one will be indicted. I can not say what will happen otherwise.

Last year we passed a bill appropriating over one-half billion of dollars in the payment of the guaranteed dividends of the railroads, and these gentlemen who are now so vigorously opposing this bill and who are contending that this measure is populistic and paternalistic were the foremost advocates of that

measure, and their contention was that it was economically sound for the Government to guarantee the dividends of the railroads—the dividends based upon a highly inflated and fictitious valuation as represented by inflated and watered stocks and bonds. The people were compelled to pay 6 per cent dividends or more thereon; but while these gentlemen appeared to view the guaranteeing of dividends to railways as necessary, no one guaranteed or even suggested guaranteeing dividends in any sum and upon any kind of a valuation to the farmer. The guaranteeing of dividends to one class of business enterprise and the refusal to guarantee dividends to another class was clearly class legislation, and I think it ill becomes the Representatives who favored the guaranteeing of dividends to railroads to characterize as class legislation a measure which is calculated to extend a little relief to the farming industry in the form of a loan, to be paid back with 7 per cent interest thereon. We also passed a bill appropriating $660,000,000 for the completion of the battleships contracted for by the late administration at war-profiteer prices for material, with a 10 per cent plus profit added thereon, and no sooner were these ships practically completed, the United States having gained the naval supremacy of the seas, than the present administration undertakes to expend a lot of additional millions in tearing them down again and scrapping them, which program obligingly restores to the British Empire the supremacy of the seas, which otherwise they had lost to the United States. It appears that any proposal that will take millions from the United States Treasury for the benefit of profiteers is proper and wise legislation in the minds of too many Congressmen, but to expend a few millions in the form of sound loans to stabilize the agricultural industry, upon which the whole people are compelled to depend for subsistence, is paternalism and the extension of a gratuity.

Anyone with the least intelligence knows that a properly secured loan is not a gift but is a sound business investment. Those who slurringly refer to this measure as an act for the purpose of extending a gratuity to farmers had better not throw stones; otherwise they will be liable to break the glass houses of their own constituents. Billions have been loaned to foreign Governments for purposes that will never be of any benefit to the American people, and no effort is being made to even collect the interest thereon, but more and further loans are continuing to be made, which, in all probability, will never be repaid and will never redound to the benefit of the American people in the slightest degree. Witness the recent loan to Liberia. Unfortunately it seems to be the policy to enrich the foreigner and impoverish American citizens. When deflation was decreed after the war, the farmer was compelled to submit to having everything which he had to sell deflated below the cost of production, while nearly everything that he had to buy was allowed to remain at or very nearly at war prices. This had the effect of subjecting him to a double impoverishment by his getting only about one-fourth or one-third of what he had previously been getting for his products, while continuing to pay war prices for everything which he had to buy. I am in possession of more than a bushel of letters from farmers who inclosed itemized lists of their cost of production and the market value of the crops which they produced; and in many instances the cash value at marketing time was not equal to the cost of production. The farmers were thus compelled to work for nothing and face a deficit in cash as well. Many of the letters cited figures to show that the entire cash value of all their crops would not meet their taxes and the interest upon the money which they borrowed for the purpose of producing their crops. This is an alarming condition; for with thousands of farmers being forced into bankruptcy, it is swelling the army of unemployed and causing a depreciation of the national food supply which will ultimately result in a scarcity of foodstuffs and at a greatly enhanced price to the consumer.

The business of the farmer having been deflated and the farmer having been placed in the position where it will take him from five to ten years to recoup his losses, provided nothing further is done to further impoverish him, it now becomes the turn of labor to be deflated. The Railroad Labor Board has reduced the pay of more than a million railway workers, which will undoubtedly cause a strike and add a million or more to the already large army of unemployed, now numbering millions. If it was proper to guarantee dividends to railroads and to guarantee profits of 10 per cent plus to war contractors, and arbitrarily set a market price of $2.20 per bushel for the farmers' wheat at terminal points, which in reality meant about $1.70 or $1.75 to the farmer at the point of delivery, why would it not be proper to pass a standardized wage and commodities bill, which would set a definite coinage value upon the products of the farmer and upon a specified number of hours of labor performed by workingmen? This would stabilize industry, prevent disastrous strikes, enable everyone to make reasonably safe business arrangements, restore employment to the unemployed, and bring national prosperity. A legislator who is himself personally or whose constituents are interested in large commercial enterprises or in railroads can not be expected nor should be expected to favor legislation in the interest of farmers or laboring men. Therefore the only remedy for farmers and laboring men to secure legislation which will give them justice and be beneficial to their interests is to elect more farmers and laborers to Congress, and then and not until then will they secure adequate consideration at the hands of the National Legislature.

Mr. McFADDEN. Mr. Chairman, I yield two minutes to the gentleman from Kansas [Mr. WHITE].

Mr. WHITE of Kansas. Mr. Chairman, I have followed this discussion very carefully. I have studied this subject, at least I have endeavored to study it, from a broad viewpoint. I think, Mr. Chairman and gentlemen, that the unfortunate economic and financial conditions developed as a result of the war, culminating in 1920 and continuing almost entirely through the year 1921, would have been greatly neutralized and ameliorated if the products of agriculture had not been deflated out of all proportion to the products of the factory; and I believe, gentlemen, that the fundamental reason for that, or one of the reasons, is because the farmer is not able to introduce and exercise the monopolistic element in marketing his products that the organized manufacturer has developed the power to exercise, we might say, in a superlative degree.

I am in favor of this bill. I shall vote for it most cheerfully. There can be no doubt that as a direct result of the stimulus administered to the export trade through the reorganization of the War Finance Corporation great assistance has been rendered the American farmer in the stabilization of the price of his products and also in developing the very greatly improved condition of his business generally, and it should be said that all other lines of business are now giving evidence of a very pronounced revival.

I am greatly pleased that the chairman of the Committee on Banking and Currency [Mr. McFADDEN] has given us to-day positive assurance that a bill supplementing the Federal reserve act will soon be reported from his committee which will provide for the permanent reinforcement of agricultural credit, which in times of emergency will fully meet the situation and will obviate the necessity for enforced liquidation and effectually prevent a recurrence of the distressing situation which weighed down American agriculture through the last half of 1920 and the entire year of 1921.

Whether the committee shall decide to report the bill of my colleague, Mr. STRONG, of the fifth Kansas district, or the Capper bill now before the Senate Finance Committee, or a committee bill was not stated. I believe, however, the plan is thoroughly feasible and is entirely sound from a financial standpoint. I do not expect in its operations it shall at all supersede or usurp the functions of the local banks, but that it shall cooperate with and function as their helpful auxiliary. That agriculture is basic and essential—yes, more, that it is imperatively necessary—is admitted by everyone. The American farmer has seventy-five billion of basic capital. He is not a reckless nor an inconsiderate investor. He asks for no special favor; only a square deal. I am more than gratified to note that the Congress is coming to have a better understanding and a keener appreciation of the peculiar credit needs of the stock farmer or the stockman, as we call him in the West. It has been made clear that he has not in the past and does not now have ready access to a source of credit adapted to his peculiar requirements. So that in times of emergency, such as I have described, he has been subjected to losses to which the merchant and manufacturer is not exposed for the reason that the nature of their business does not require the extended credit which is necessary to the stockman and which the latter must have upon occasion or suffer losses through forced sale of unfinished product which in the recent depression sent thousands of hitherto prosperous, conservative stockmen to irreparable financial ruin. I have the greatest confidence that the effect of the pending legislation and of the proposed legislation will be to stabilize the business of agriculture, making its position much more secure and very greatly strengthening its credit.

FREIGHT RATES.

I can not refrain in this connection from again, as I have done in the past, emphasizing the great importance to the entire country of further reductions in transportation charges, especially upon basic commodities, in order that a normal trade and commercial balance shall be restored. Whether, as frequently charged, the agricultural and live-stock interests were

discriminated against in the processes of deflation—and I firmly believe they were—is not now an issue, except for the effect that a knowledge of the fact may have on the future conduct of the bank and its attitude toward farm credit. But it is nevertheless true that 12 months before the prices of other commodities began any important decline the prices of farmers' products as to almost every item were exceeding the speed limit on the toboggan slide, and it should be remembered that the order promulgating the increase of 25 to 35 per cent in freight rates by the Interstate Commerce Commission August 20, 1920, was made when all manufactured goods were at the peak of high prices, while basic farm products had at that very time suffered declines in prices amounting to billions of dollars in the aggregate—a most striking and fatal coincidence.

The preposterous folly, injustice, and utter futility of the horizontal percentage method of adjusting rates has never had a more forceful illustration than in the hardship imposed upon basic commodities as articulated in that particular order. It would seem that everybody in the United States is and has been for years fully cognizant of the impropriety, injustice, utter unfairness, and impracticability of this rule, unless perchance it may be the Interstate Commerce Commission.

The farmer is grandiloquently acclaimed in public speech and written essay "the backbone of the Republic." But he who observes his treatment at the hands of the Interstate Commerce Commission and the Federal reserve banks would naturally conclude that he is the tail end so far as any fair recognition and consideration of his interests are concerned.

I felt at the time the increase of 1920 was granted that it would curtail production, restrict traffic, and therefore would not produce revenue in any greatly increased volume. I have asserted here on this floor and in public speeches elsewhere that excessive transportation charges were the greatest single obstacle in the way of returning prosperity. A rate the traffic will not bear can not be otherwise than injurious both to production and transportation. And 20 months of disastrous experience has proven the soundness of that contention.

But now at last comes this honorable body, the Interstate Commerce Commission, and in their Public Document No. 1392 three commissioners declare in favor of reductions on basic commodities. The entire report, as I interpret it, admits the futility of the excessive rates in Ex Parte Order 74; it repudiates the per cent horizontal method of fixing rates. Two consecutive sentences from the opinion of Chairman McChord, which I here insert as a part of my remarks, approve this statement:

> I think that the times and conditions plainly demand reductions in rates on all materials and products that are basic in industry and in our existence as a people to a level that business interests will recognize as the lowest available for some time to come. Nothing less will quiet the prevalent unrest and agitation for lower transportation costs and encourage the needed healthy flow of traffic.

I have only to add that while reductions ordered will be helpful, I am, if possible, more strongly than ever of the view that further reduction in rates on basic commodities should be promulgated within the near future.

To the American business man there is to-day presented a most hopeful and encouraging outlook. Our industrial and commercial interests are showing steadily increasing activity. The bonds of the Government are all at par or above from day to day.

Speaking more especially of the products of the western farm and range the improvement in the past eight months is most pronounced. In the course of an experience of 50 years actively engaged during all that time in the live-stock business—raising, feeding, buying, selling, and shipping live stock—I do not recall a year when there has been so complete a reversal of conditions favorable to agriculture, and especially the live-stock industry, as we have witnessed within the past 10 months. I shall consume little time in comparison, but if I may do so I will make this statement and challenge contradiction here or elsewhere—in this country one year ago to-day every cattleman and every sheepman, whether a rancher or a feeder, was at the brink of ruin. Every one of these men who said a word about the situation said it could be no worse. Every live-stock man was losing money. The Hon. CLAUDE HUDSPETH, from the sixteenth Texas district, in a speech April 14, 1921, in the Committee of the Whole House on the emergency tariff bill then under consideration, cited an instance where a carload of sheep shipped from Donaldsonville, La., netted but $5.43 for the carload after paying the cost of marketing. Wool and mohair, important products of Mr. HUDSPETH'S district, were cited by him in the same speech as selling at that time at 10 to 20 cents per pound. Their cattle were selling at prices which spelled but one word, and that word was ruin. To-day all is changed.

Any time in the past three months the same carload of sheep to which the gentleman called attention which netted $5.43 for the carload would have netted from $200 to $400 for the same carload in Kansas City. The wool and mohair then going begging for a buyer at 10 to 20 cents per pound is now snapped up at 35 to 45 cents per pound in the grease, almost treble the price of one year ago. His herds have been reorganized on a paying basis. In my own State of Kansas no such losses have ever been sustained as were sustained by the cattle and sheep feeders who sold fat cattle and sheep in the spring of 1921. But to-day we are telling a different story. A letter from a constituent a few days back informs me that his business has never been more profitable than for the present spring. Well may the people of this great progressive country take courage. Much has been accomplished in the past year by legislation. The reorganization of the War Finance Corporation, the appropriation of $25,000,000 additional revolving fund for the Federal land bank, the emergency tariff act, have all contributed to bring about a better and constantly improving situation, and lastly, the unconquerable spirit of the great American people, who are perplexed at no intricacy of conditions, who are never daunted in the face of difficulty, whose indomitable courage, whose arbitrary and unconquerable spirit has made them what they are, the wealthiest, the strongest, and yet the most just people in the world, has been an important, probably the most important, single factor in our remarkable process of successful economic, financial, and industrial readjustment.

Mr. Chairman, I ask unanimous consent to revise and extend my remarks.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. McFADDEN. Mr. Chairman, I yield three minutes to the gentleman from New Jersey [Mr. APPLEBY].

Mr. APPLEBY. Mr. Chairman and gentlemen, as a member of the Banking and Currency Committee I did not look with much favor upon this proposition when it was first presented, but after listening to the testimony from the financial men of the country, especially from the South and West, and Mr. Eugene Meyer, of New York, who is classed as one of the leading financiers of the United States, I came to the conclusion that it was sound legislation and should be favorably reported by the committee. This bill proposes to extend the operations of the War Finance Corporation for one year. Of course, some of my friends say that I come from the East, and this is a southern and western proposition. My answer to that, gentlemen, is this: I came to the House of Representatives to legislate for the whole country. I have been convinced that the farming and agricultural interests of the United States need help at this time, and I am satisfied that when this particular bill becomes a law that the agricultural interests are going to be tided over a very serious proposition. In my opinion many banks would have failed ere this had not the War Finance Corporation been in existence. Now, it has been stated that no loans have been made to the Eastern States by this organization. That is a compliment to those States. If our farmers of the East are in a position to go to their banks and get credit for their needs from their banks, if our manufacturing and transportation interests are able to rediscount through their banks, through the Federal reserve system, and get the accommodation they want, they are also taken care of, and it seems to me that legislation of this character should not be based on any angle, North, South, East, or West, but the whole question is, Is this a fair proposition? A great many of these loans already made have been paid off and this system is functioning satisfactorily. Now a word of warning: I want to say to our southern and western friends that they ought not to encourage their constituents to borrow too much. It is very easy to borrow money, but hard to pay, but on the whole I think this proposed legislation is one of the many accomplishments of which the Sixty-seventh Congress is going to be thoroughly satisfied, and while it is going to benefit the farmers primarily, yet indirectly all classes in the whole United States will be benefited. Gentlemen, I thank you. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. APPLEBY. I ask the privilege of revising and extending my remarks.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. WINGO. Mr. Chairman, I yield five minutes to the gentleman from Texas [Mr. JONES].

Mr. JONES of Texas. Mr. Chairman, as a member of the Agricultural Committee and representing, as I do, a district that is largely agricultural, I feel a very great interest in this bill. I have the honor to represent a district that is one of the largest cattle and agricultural districts in the United States, comprising 53 counties in northwestern Texas.

We are creatures of custom all over this country. Whenever a new departure is advocated there is always some one to call

names. They say it is paternalistic, or populistic, or some other pet aversion. But when you come to analyze the proposition that is before the House to-day, it does not seem to me that you can make any real distinction except in the length of the credit in extending credit to the producer and extending credit to a distributer who wants to borrow money to deal in the very products in many instances, or in the articles that are made from the products that the farmer grows. As a matter of fact, with short-time commercial paper the local bank can go to the reserve bank and rediscount that paper and get credits there or have Treasury notes issued, for that matter, on this short-term commercial paper as security.

Now, I do not see any good reason why the farmer who produces or the stockman who produces these things should not have the same facilities extended him by the Government itself that are extended to commercial paper and the commercial interests of the country. Why should we not arrange the machinery for production as well as the machinery for distribution? Why should not credit and Government money be available for those who are producing as well as those who are working after the production is made?

One of the great problems in this country is the problem of reducing the spread between the producer and the consumer. Everyone recognizes that, and it has been said over and over and over again that one of the best ways to accomplish that is to finance the producer in such a way that he can ship his products to the market at the time when the market can best accept those products. There is not any way to escape from that conclusion. Now, as long as you finance or adopt a financial system, and maintain it, that takes care of the man whose purpose and business is distribution, and at the same time you deny the man who is producing the same facilities, you enable the man who is distributing to maintain the spread, and at the expense of both the producer and ultimate consumer.

The only way really to reduce the spread between the producer and the consumer is to enable the producer to have a way to the ultimate consumer, which may be one that will not be used all the time but one that will be open for use. But, of course, if the producer is forced to sell on a glutted market as soon as he has produced, he can never use an avenue that might be open to him for sale direct to the ultimate consumer. I believe that it is necessary to maintain the machinery of distribution. I am not complaining that the financial system is so arranged as to care for that, but it also ought to be arranged so as to care for the producer in the same way and after the same fashion. [Applause.]

It is amusing to hear some of the opponents of this measure deliver themselves of their remarks and then to observe their position on other matters. Some of these same men seem to think it is all right for the Government to lend money direct to the railways. They seem to think it is all right to grant a subsidy to the private shipowners, and by means of a high tariff to rob the many to enrich the few, but they balk and kick out of the traces at simply providing a means of securing credit on good security to the farmers and stock raisers. Why is it a wrong principle of government to arrange credit facilities for the farmer, when it is a recognized principle to lend the commercial interests of the country? The Government provides a fiscal system. Its credit facilities should be available alike to all essential national activities. And until our general financial system is so modified as to accomplish this end, or until a permanent system of agricultural marketing credits is devised, the present act should be continued in operation.

Mr. TOWNER. Mr. Chairman, I confess I am somewhat surprised that there has developed any opposition to this bill. It is not to create a new activity. It is not to embark on a new enterprise. It is not to try a new experiment. It is only to continue for another year the activities of the War Finance Corporation. It would have been necessary in any event to have continued its existence for another six months in order that it might wind up its affairs in an orderly and provident manner. But when it was realized that this could better be accomplished if a year's time were given instead of the six months at first contemplated, and especially when it was understood that it was very important that some system should be instituted by legislation to take the place of the service now being rendered especially to the farmers by the War Finance Corporation, it was agreed by almost all those interested that a year's extension would be necessary.

Mr. Chairman, the service rendered by the War Finance Corporation in a serious and trying economic emergency has been a great and most effective service. Its revival and extension have been of great value not only to farmers but to all business interests as well. Some of us thought it ought to have begun earlier, and that it could have been more effective if more directly made available. Be that as it may, no unprejudiced mind but will admit it has served a most useful purpose at a time of great distress and need.

The history of the War Finance Corporation is most interesting. It was created in 1918, during the war, to furnish money to industry and commerce for war purposes. Only about $60,000,000 was thus furnished. In 1919, after the armistice, our export trade having greatly decreased because of the inability of foreigners to finance their demands, power was given the corporation to finance exports. But little was done at that time and its activities soon ceased entirely. In 1920 the foreign demand seemed increased and a resolution was passed to revive the activities of the corporation. President Wilson vetoed it, and Congress passed it over his veto. It was not until August, 1921, that its benefits were effectively extended to producers and dealers in agricultural products.

Since then loans have been made amounting to $355,000,000. Of the total amount loaned $107,000,000 has been already repaid, so there is now outstanding only $247,000,000. Amounts paid in now exceed the amounts paid out. Every day and week and month more is collected than is loaned, so that the corporation is now in process of liquidation, and by the end of the period of extension now asked for everything will be settled. And all this without any cost whatever to the General Government.

The beneficial effects of the operation of the corporation when made available for agriculture were almost immediately apparent. Exports increased and large shipments of grain and cotton stimulated the demand and increased the price. Increased demand for these staples increased the demand and price for other farm products. Since that time there has been a slow but steady increase in the sales and prices of all farm products. It is estimated that this year's farm products will bring the farmers at least a billion dollars more than the products of last year. Other factors have influenced these bettered conditions, but it is certain the help rendered by the War Finance Corporation had a large part in this great improvement in conditions.

WHAT IS CLASS LEGISLATION?

I know that there are those who object to this legislation, however much it may benefit agriculture. They say it is class legislation and therefore indefensible. One wonders what would be their definition of "class legislation." All legislation that is beneficial in its character will necessarily benefit some more than others. We help industry, we help labor, we help banking. If help to these is justifiable, why is agriculture under condemnation? Why is it that every time any legislation is proposed to help the farmer it is denounced as class legislation? This Nation in common with every other civilized nation in the world has established its Government to promote the general welfare of its people, and every important interest of the people is entitled to its encouragement and help in time of need. Help to any important interest is help to all interests, and there is no more important interest in the United States than agriculture. If the farmer can not produce, the food and raiment of the whole people are not provided. If the farmer can not purchase, there will be no market for the manufacturer. If the grain and cotton and meat and fruit of the farmer are not in demand, transportation fails. To help the farmer helps all. It is evident to all unprejudiced minds that upon the prosperity of the farmer depends the prosperity of the Nation. And so a benefit conferred upon the farmers, general in its nature, such as this legislation is, and especially when no charge is made upon the Treasury, and no burden placed upon the Nation or upon any individual, can not justly be called "class legislation." Gentlemen who condemn this legislation should, to be consistent, condemn all legislation of this character. But they do not. It is only when the farmer is to be benefited that such legislation falls under their ban.

We established the national banking system. Do gentlemen condemn that legislation? And yet it was established primarily to help the business and commercial interests of the country. Was it paternalistic and socialistic? We went further and established the Federal reserve system. Still more paternalisitc. Still more of a governmental interference with individualistic activities. But gentlemen are not heard denouncing that system. Then we established the Federal farm loan system, a direct interference with legitimate business. But while faint objections were urged against its establishment, they have been drowned beneath the praise and approval of the great body of the people.

In fact, our whole Agricultural Department and the Department of Commerce and the Department of Labor are all un-

justifiable extensions of governmental activities, if this law is subject to objection for that reason.

It must be evident that gentlemen are not justified in picking out legislation in the interest of agriculture and denouncing it as class legislation. It is to meet a national need, to remedy a national defect, and to bring a national benefit that this legislation is demanded and justified.

A FARMERS' CREDIT SYSTEM NEEDED.

A year ago the farmers of the United States were sorely stricken. Prices of farm products had not only dropped to the bottom, but below it. In many instances the home-market price was not one-half the cost of production. There was, of course, a general lowering of all war prices, but the farmers' products were lower in proportion than any others, so that the price level of what the farmers were compelled to buy was much higher than the price level of the things they had to sell.

In this condition he was not able to decrease his indebtedness, and was compelled to increase it if he could obtain credit. Just at this time the banks were notified by the Federal Reserve Board that no more farm paper be rediscounted and that outstanding obligations must be paid. Then drastic enforced deflation, just at the time when the farmer was least able to stand it, forced thousands of farmers into bankruptcy and caused general distress throughout all agricultural sections.

It seems to be the view of some that the farmer does not need and should not have credit. Others engaged in business need and must have credit, but the farmer should not go in debt. It must be evident from the slightest investigation that such a view is erroneous. If the farmer starts with a farm plant ready for operation he must nevertheless purchase seed, hire labor, arrange for maintenance till crops can be produced and marketed, and provide for all family needs in the meantime. He needs to buy fertilizers to produce paying crops. He must buy live stock if he expects to feed. He must prepare for the labor demands of harvesting.

The farmer needs three classes of credits. He must have an opportunity to use, where necessary, the ordinary commercial credit, on short-time paper, not exceeding six months, and usually limited to 90 days. This credit can be procured and is now available at all commercial banks.

The farmer also needs in common with other business enterprises a long-time credit, usually extended in this country on real estate mortgage security. The period of these loans runs from 5 to 30 years. Such credit is now available to the farmer through private mortgage loan companies and through the Federal farm loan system.

There is also a third class, at least as necessary to the farmer in order that he may carry on his farm operations profitably and satisfactorily, and that is what may be termed "intermediate credit facilities." And that class of credit has not been and is not now available. Its period runs from six months to three years. Such credits can not be furnished by the commercial banks, and the farmer should not be compelled to increase his mortgage indebtedness to secure them.

In the past these credit demands have been very unsatisfactorily supplied in two ways—commercial banks have granted credit for six months with promise of renewal for the required period. This is unsatisfactory and dangerous, for it depends upon the bank's ability or desire to grant a renewal. At any expiration period of the short-time paper the bank may demand payment. The farmer is thus placed at the mercy of the bank. The bank itself may be unable to longer carry the credit, or it may be unwilling from mere caprice or personal dislike of the borrower to carry out its promise of renewal. More than this, it enables the bank to dictate when the farmer shall market his grain or his live stock. In this way the farmer is compelled to submit his judgment to that of his banker.

It must appear evident that any system of credit that will not be long enough to cover the maturity of a crop or the preparation of live stock for sale and the orderly and profitable marketing of such products is inadequate.

The other form of credit is even worse and more dangerous. It is easy to increase mortgage indebtedness in most instances, for farm property is the most valuable security for credit that can be offered. This increase may be effected in two ways. The original loan can be taken up and a new one with the added increase made. Or a second mortgage can be made for the needed increase.

With the added burden of increased interest charges and renewal charges, and the necessity of providing some means for reducing and finally paying these mortgages, when depression comes, or untoward crop conditions, forfeiture and foreclosure are possible and in many cases are inevitable. While mortgages appear a necessity, and while we should do all in our power to secure low interest rates and easy terms, still the mortgage is the farmer's greatest burden and worst enemy, and everything possible should be done to avoid it and to make it the last credit resort.

The Government through its national bank system and its Federal reserve system has provided for all necessary facilities for procuring and handling short-time credits. It has provided through its Federal land banks and its joint-stock land banks for all long-time credits. It yet remains for the Government to provide an intermediate system through which the farmer can procure credits of from six months to three years duration.

In 1921 Congress created a Joint Committee of Agricultural Inquiry, which was directed to investigate and report, among other things, as to the "banking and financial resources and credits of the country, especially as affecting agricultural credits." This commission consisted of five Members of the Senate and five Members of the House, able and especially qualified for such service. The commission have already made some very valuable reports and recommendations to Congress. Among these is a very able and valuable report on farm credits, with a recommendation for legislation to provide a system of intermediate farm credits to meet the defects which I have just discussed. A bill has been formulated and introduced in both Senate and House.

The main features recommended for this legislation are:

1. That the Federal farm loan act be amended so as to permit the Federal land banks to rediscount paper representing loans upon which money has been advanced to farmers which has been used or is to be used for agricultural purposes, having a maturity of not less than six months nor more than three years for national banks, State banks, and trust companies, savings institutions, and incorporated live-stock loan companies, and also to permit direct loans by the Federal land banks to cooperative associations of farmers organized under State laws, secured by warehouse receipts upon staple agricultural products.

2. It is recommended that Federal farm land banks be permitted to establish separate departments for the purpose of issuing short-time debentures having a maturity of not more than three years, secured by loans of the kinds described in paragraph 1 above.

In view of the fact that these short-time debentures will be materially different from the long-time bonds now issued by the farm land banks and will appeal to a different market, it is essential that the farm land banks should establish separate departments for the purpose of issuing these short-time debentures. That will preclude the possibility of a confusion of either the character or collateral of the long-time bonds and the short-time debentures. Necessary capital for the separate department in the land bank so established shall be furnished from the Federal Treasury.

3. As the rates of interest on short-time loans will in all likelihood differ from the rate of interest on the long-time loans made by farm land banks because of their maturity, it should be understood that the rates of interest on the loans recommended in paragraph 1 hereof and the rates of interest on the short-time debentures covering those loans need not necessarily coincide with the rates of interest on farm land mortgages and farm land bonds covering those mortgages made or issued by farm land banks.

4. That the Federal reserve act be amended, if necessary, so as to permit Federal reserve banks to purchase debentures issued under the terms of this amendment under the same terms and conditions as now govern the purchase of farm loan bonds by Federal reserve banks.

5. That the Federal reserve act be amended so as to permit Federal reserve banks to rediscount for Federal land banks or joint-stock land banks, with their indorsement, any loans made under the terms of paragraph 1 hereof, when within a maturity of six months.

The farm land banks, not having any large fixed capital, must necessarily turn to the investment market for the sale of their bonds or debentures in order to provide working capital with which to make new loans. In view, however, of the seasonal nature of the requirements of the agricultural interests, it would not be practicable to require the farm land banks to borrow in this manner the amounts necessary to satisfy the demands of the farmers at their peak. For that reason it is believed that it is desirable, if not necessary, to permit the Federal reserve banks to rediscount for farm land banks loans made upon the security of agricultural products in the manner described in paragraph 1 hereof whenever these loans come within a maturity of six months. They will then be of a char-

acter and maturity of the kind which Federal reserve banks are now authorized to rediscount for their member banks.

It is not believed that it will be advisable or necessary to permit farm land banks to become members of the Federal reserve system in order to afford them this one facility, and, because of their limited working capital, the commission does not recommend that they be required to make any deposit with the Federal reserve bank as a prerequisite to their right to apply for the rediscount of any of the loans herein referred to.

If these recommendations of the commission are approved by Congress, the result will be an extension of the powers of present existing agencies in such manner as will best be calculated to grant to the farmer immediate and effective credit facilities for that intermediate period for which there is not now sufficient available credit. The approval of these recommendations will, it is believed, effectively and safely bridge the present gap in the two kinds of credit without sacrificing any of the fundamental principles upon which both the farm-loan system and the Federal reserve system must rest.

Until legislation can be secured which will provide in this or some other way for intermediate credits with from six months to three years maturity it will be unwise for us to discontinue the War Finance Corporation. It is confidently hoped that Congress will, without delay, and at least within the period of extension granted, enact the necessary legislation to provide for a permanent intermediate system of farm credits. Such a system will impose no burden upon the people, for it will be entirely self-sustaining. It is greatly needed and will prove a national benefit.

For these and other reasons that might be urged the passage of this bill to extend the time one year for the continuance of the operations of the War Finance Corporation is entirely justified.

Mr. McFADDEN. Mr. Chairman, will the gentleman on the other side use some of his time?

Mr. WINGO. Mr. Chairman, I yield five minutes to the gentleman from Texas [Mr. SUMNERS].

The CHAIRMAN. The gentleman from Texas is recognized for five minutes.

Mr. SUMNERS of Texas. Mr. Chairman, unless this legislation is favorably acted upon, the life of the War Finance Corporation, in so far as making new loans is concerned, will end July next, and we will be thrown back upon the commercial banks and the credit which may be obtained from cattle loan companies operating on money received from the sale of their own notes to take care of agricultural ranch chattel credits.

In a crisis such as confronted agriculture last year, and through which we have not fully passed, it was demonstrated that these credit-extending agencies could not be depended upon in such a time fully to meet the necessities of the farmer and the ranchman. The country banks themselves in such an emergency required for their own safety such an agency. The uncertainty of these times warns against dispossessing ourselves of any agency of proven efficiency. These are times which call for the maximum of caution and of preparation for any contingency which may be provided against. Aside from the direct beneficial effect upon the agricultural situation which the credit extended through the War Finance Corporation had, the effect was greater upon the general psychology of the situation. And, we must remember, gentlemen, that that thing which is wrong with the world now is more mental than anything else. The world is not yet sane as measured by ordinary standards of world sanity. The extension of the life of this corporation will make the farmer and the stockman as well as the country bank feel more secure. That is of first importance now.

I say this credit extending agency is of proven efficiency. Last year we confronted a situation in the agricultural and livestock sections of the country, as viewed by the ordinary person, as hopeless and as helpless as could be imagined. Prices were on the toboggan, local banks were extended to the limit, and merchants to a very large extent had reached a situation where they could neither obtain nor extend additional credit.

With regard to cotton, while there was a small crop in prospect, and the estimated yield continued to decrease, the price, notwithstanding that fact, continued to decline. Europe, which had taken a large percentage of our cotton, was out of the market in so far as quantity purchases with its own money was concerned. American mills were either closed down or running on very short time. The ability of local banks and of local creditors to extend the time of payment of obligations due them was exhausted. It was the judgment of well-advised men everywhere that when the cotton crop came to maturity last fall it would be forced on the market under this demand for liquidation and would bring with it the entire American carry-over, which was the largest in the history of the industry; and it was the judgment expressed by a group of important American cotton spinners called in conference in Washington that the price would probably go at around 8 cents. The fact of a small crop had no chance to operate on prices. I am not guessing about this.

Immediately after the organization of the Joint Commission of Agricultural Inquiry, of which I was made a member, I made an extended trip through some of the more important cotton States, visiting both the areas of production and of manufacture. There was no hope and no courage among the people there. Their morale was absolutely at the breaking point. This was not limited to the farmers, nor to the country merchants, nor to the country bankers. It was the attitude of the city banker and of the cotton spinner as well.

It was perfectly evident that if the Federal reserve bank system at that time should very greatly liberalize the rediscount privileges extended the country banks, already greatly obligated on their rediscounts, they would not be willing to add to those obligations. Not only were the credits of the banks frozen but the banking system there as a conduit to convey additional credits from the Federal reserve system to the people who needed credit was frozen. It was perfectly evident that any attempt to supply additional credit solely through that agency would be as futile as would be an attempt to force water from a reservoir through a frozen conduit. That situation could not be thawed out from the Federal reserve bank end. In such a condition it was necessary to construct a route around some of the banks in order to get money back to the people, which in turn could thaw out the credit condition of those banks and put them into normal functioning. The necessary relief could not be fed in through the banks. In many instances it had to go around them to the people in order to save the banks and restore their activity.

Very soon after the War Finance Corporation had been fully authorized and equipped to begin its service I went again into this section for the purpose of trying to help bring about a united purpose on the part of the farmers and merchants and bankers of that section to stand resolutely together to save the country, to avail themselves of the credit possible of procurement from the War Finance Corporation and from the Federal reserve system, operating under a liberalized policy. Both were necessary, but I found that the fact that it was proposed by the War Finance Corporation that in the event the local banks could not function in extending the necessary credit to make possible the orderly marketing of that cotton crop the farmers could organize cooperative marketing associations and, under proper conditions and restrictions, procure the necessary credit from the War Finance Corporation, was the most powerful factor in reversing the psychology of that whole section of the country and in renewing its fighting spirit. It was the necessary supplement to and complement of the Federal reserve system to take care of that situation, and the people recognized the fact and felt themselves, by such a provision, equipped to deal with the situation. It was necessary.

In the early fall I also made a trip into the stock-raising section of Texas—an automobile trip of about 1,500 miles—holding numerous conferences with stockmen and local bankers. The situation, if possible, was worse in that section than in the cotton-producing sections. The large cattle-loan companies which held paper against many of the ranchmen were demanding immediate liquidation. This section is peculiarly a breeding section, and under the pressure being exerted upon the ranchmen they were sending their calves and cows to the slaughter market. Their local banks were absolutely powerless to assist them. Those banks are banks of small capitalization. Many of them had reached the state of exhaustion where they could not longer provide credit for the payment of the grocery bills nor the cowboy hire of the ranches, and the cattle-loan companies were refusing in many instances to permit the retention by the ranchmen of any part of the proceeds received from the sale of cattle for the purpose of paying the operating expenses of their ranches.

Gentlemen who are from the North and the East, from the industrial sections, where banks of large capitalization obtain, where the investors in securities reside, have no conception of the situation of an industry like the cattle industry of Texas was in last fall when their breeding stock, which is exactly to their ranches what the machinery of a factory is to the manufacturing plant, was being forced from the ranches, and that, too, not to the feeders of the northern sections but to the slaughter market. With a poor market on one hand, pitiless pressure to sell on the other, with neither credit nor market, these men were literally being destroyed and the future beef

supply of the country was being destroyed in a definite degree. Shall we make possible the recurrence of such a tragedy as that?

When the War Finance Corporation got into operation, it began to extend credit through cattle loan associations, organized largely from capital raised in the cities dependent in a measure upon the cattle industry. And, while the relief extended was not what the situation required, and the plan adopted was not the plan which in my humble judgment ought to have been adopted, still it helped at a time and in a way when there was but little help from any other source, and it helped the psychology of the situation. The bankers' cattle goal failed because the relief which it proposed had to go through the local banks. They were frozen. It matters not how much water is in the reservoir if the pipes leading from it are frozen.

At this time, so I am advised, the big cattle loan companies, many of them are believed to be, and probably with sufficient reason, closely associated with the packing interests, are endeavoring to get out of this business. While bills have been introduced and are pending to provide the necessary longer time chattle credit than is now obtainable, these propositions have not yet been enacted into law. Incomplete and unsatisfactory as is the service being rendered by the War Finance Corporation, we must not destroy it until a better is provided.

In a situation like this, with an experience such as we have recently had and in the face of a condition of uncertainty which yet obtains and the necessity which is well recognized, it seems to me that to fail to continue the War Finance Corporation, an instrumentality of proven efficiency, at least in a definite degree, until some better plan shall have been made possible by the necessary legislation to meet those credit necessities of the farmer and the ranchman, which the ordinary commercial banks have demonstrated themselves unable to take care of in a crisis would be a reckless disregard of a duty which the Congress must not make itself guilty of.

These banks of small capitalization could not take care of the situation. That explains why it is possible for the gentleman from Massachusetts [Mr. LUCE] to make the statement which he made with reference to the fact that the New England States had not demanded this service. That was because the farmer there lives in communities where there are banks of large capitalization and there is much capital to invest in securities. In conclusion I want to direct your attention to the fact that this is not for the farmer alone, not even primarily so. Some such provision as this is required to insure the stability of the commercial banking institutions of the South and West, as I have indicated.

There are two reasons for that. One is that the banks of the South and West serving agricultural territories are banks of small capitalization. The second reason is that the returns from the sale of the products of those communities are seasonal. They fall directly and immediately under the influence of any condition which paralyzes agriculture. And I want to remind the gentleman from Massachusetts that when the cattle loan companies were pressing the western cattlemen and they were sending the cows and the calves that must feed New England to the slaughter market, that was a matter of concern to New England. Some time, somewhere, New England has got to pay the bill in the additional price for its beef and veal that is represented by that economic loss resulting from that situation.

Remember, gentlemen, you can not feed additional money through a frozen conduit, I do not care how much you have got in your reservoir. [Applause.]

The CHAIRMAN. The time of the gentleman from Texas has again expired.

Mr. SUMNERS of Texas. Mr. Chairman, I ask unanimous consent to revise and extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Texas asks unanimous consent to revise and extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. McFADDEN. I yield five minutes to the gentleman from Wyoming [Mr. MONDELL].

Mr. MONDELL. Mr. Chairman, it is proposed by the legislation before us to extend for the period of one year the authority and activities of the War Finance Corporation. We all realize that this corporation and the operations under it are new and unusual to our practice as a people, and at the time this agency was invoked there was doubt expressed by some as to the wisdom of attempting to extend aid in the way proposed. We were confronted with a very unusual condition at the close of a great war which had caused the most extraordinary financial upheaval that the world has ever witnessed, the greatest disarrangement of values, particularly agricultural values, that has been known at least in modern times.

The War Finance Corporation rendered a very excellent service during the war for the purpose for which it was first constituted, that of aiding exports. I am very glad to be able to say—and I say it out of a very considerable knowledge of the operations of the corporation—that it has been even more successful and more useful in its activities in rendering aid and assistance to the agricultural and live-stock industries of the country. The corporation has been under good management, and so far as any of us here know of its operations—and I think that all of us from the West are quite familiar with them—the corporation has been managed with judgment and with conservatism, and while it has rendered a most useful and valuable service; that service has been rendered along sound and sane business lines. I have no manner of doubt that the advances which have been made will be repaid without more than the usual losses in commercial transactions.

Of course we all realize that an organization of this sort for the purposes for which it was organized is necessarily a temporary expedient. It should not be made permanent. The Government should not permanently go into the loaning business, and this organization through its operation does for the time being, indirectly at least, place the Government in the loaning business. What we hope is that through the inquiries and investigations and discussions that are now being had before the Committee on Banking and Currency that that committee will be able to bring out a measure that we can all support that will perform for the stockmen and for the farmers generally the service of providing a plan whereby there may be rendered available to them on reasonable terms and under favorable conditions the financial resources of the country. [Applause.]

There is no lack of wealth in the country, the owners of which would be willing and are anxious to make investments along the sound and safe lines of agricultural credit. Unfortunately, up to this time much as has been done in the building up of banking institutions on behalf of commerce and industry in general, we have not made adequate provision for that class of credits that the farmer and stockmen, the agriculturists in the broadest sense of the word, need and require. I have confidence that the Committee on Banking and Currency, a committee that has proven its sound judgment and good sense in this Congress, will be able to bring out a measure for agricultural credits that we can all of us support. [Applause.]

Mr. WINGO. Mr. Chairman, I yield to the gentleman from Texas [Mr. BOX].

Mr. BOX. Mr. Chairman and gentlemen of the committee, the present and future welfare of the United States and its people depends upon the prosperity of its farmers and the growth and development of its agricultural and rural life. Among many things needed by the farming interests of the country at least two are of paramount importance. These are improved farm-credit facilities and better marketing conditions.

The banking system of the country has been organized mainly for the benefit of the mercantile, trading, and manufacturing groups. Adequate provision has not been made for our farming and stock-raising interests. The Federal reserve banking system, if operated so as to promote the purpose which prompted its enactment, would go far toward meeting the situation. But while that has proven to be a great banking system, as a measure for liberalizing and enlarging farm credits and making them adequate to the strain of hard situations, it has been disappointing to our farming and live-stock people. This has been due in no small degree to the manner of its management. But one of the tasks before Congress is the establishment of a system of farm credits which will adequately meet the needs of our farmers and small stockmen. These people are engaged in a line of industry first in existence, closest to the bosom of nature, and first in its importance to the life of our people. Without this industry all else would perish.

One of the most ominous developments of our industry and social life is the apparent decline of our farms and country homes and the whole rural life based on them. A few years ago our rural population was two-thirds to three-fourths of the whole population of the country. Now it is one-third. There is every indication that it will continue to grow relatively smaller and less attractive unless we improve our economic and financial systems so as to provide better opportunities for it.

For one, I shall give the need for this change my unfailing attention, with the determination that no effort to bring in a better order of things shall be spared by me.

I have improved every opportunity which I have seen during my service here to work to that end, and on two or more occasions have been gratified to afterwards receive from many of my own people and from the heads of the great organizations representing farming interests here, such as the American Farm Bureau Federation, special letters of thanks for my services in

that connection. The problem is a big one, but the country will have to solve it or take dire consequences, which will inevitably follow the decline and decay of agricultural life in America.

Closely, inseparably, connected with this imperative need is the necessity of working out an adequate marketing system. Our present system of marketing farm products is so imperfect that farmers often can not sell and consumers often can not buy what the farmer produces, though the farmer wants to sell and the consumer wants to buy the products.

Think of millions needing and wanting what other millions in the same country have and want to sell, and yet the producers can not sell and the consumers can not buy. When farm products can be sold they must often go at starvation prices. When the consumers of them can buy at all, they frequently have to pay profiteer's prices for what the producer sells for almost nothing.

This situation must be met. The country has met other great difficulties and must meet this one. The Government can do much and must do it. The people must apply themselves to working it out. They must read about it in their farm papers and in the agricultural bulletins and publications of the Department of Agriculture. They must discuss it in their exchanges and market associations. The classes in agriculture in the public schools should study it continually until the younger men and women of the country understand it better than it is now understood and realize its vital importance.

At the same time the Government, which encourages commerce, banking, manufacturing, and all other activities, and aids in finding markets for other products, must concern itself, not spasmodically but with persistent, efficient determination, in the work of helping the producers to sell and the consumers to buy to the advantage of both and for the permanent and general welfare of the country. [Applause.]

Mr. WINGO. Mr. Chairman, I do not think I shall consume much time, but there are a few things that I should like to discuss of a general nature. I do not think we should fall out with our conservative friends who are afraid of measures of this kind, because they but reflect the natural conservative tendency of the American people. I have no personal fault to find with my good friend from Massachusetts [Mr. LUCE]. He is just as sincere as I am. The gentleman from Massachusetts is one of the ablest and most distinguished Members of the House. Those of us who are associated with him personally know him to be not only a man of great ability but of fine character, and it is always a matter of regret when I differ with him. His viewpoint is the conservative viewpoint of the New England statesman. He simply overlooks certain fundamentals. It is refreshing, of course, to a Democrat to hear a New England Republican protest against class legislation. Sometimes when I hear some of my New England friends protest against class and sectional legislation, when it happens not to be for the benefit of his section or class, I can shut my eyes and imagine I hear a Democrat speaking. It is a little incongruous to hear a New England Republican protest against class legislation, because the wealth and prosperity of New England has been built upon class legislation given them by the American Congress.

Now, Mr. Chairman, there is a reason for that; the evolution of the present credit system is but following the natural evolution of American business. What was the situation? In the beginning, when the American Colonies obtained their independence from England, we were peculiarly an agricultural people. We were prosperous from an agricultural standpoint. But as soon as we gained our political independence we realized that a political independence was worthless unless we had economic independence, and the Colonies were still forced to buy their manufactured goods from England. So the statesmen of all parties in that day agreed that in order to establish an economic as well as a political independence for the American Republic they would foster by special class legislation manufactures, so as to enable manufacturers to build up in the original thirteen Colonies the new Republic. That was a proper and sound policy, and I suspect if the statesmen of to-day were confronted with the same kind of a situation they would act as did their forefathers.

So we started on the road of special class legislation for the manufacturers. The American thought, in spite of all its radical utterances at times, is always in the last analysis conservative when it comes to final action. We talk a great deal and say many things that are radical, but when it comes down to action the American people through their representatives are conservative and slow. We gradually built up the great manufacturing enterprises and developed the independence of American manufacturers which not only enabled them to stand alone but to become the marvel and the wonder of the industrial world and the pride of the American people. I say pride deliberately. I think I know my own self, and I have not in me any jealousy of the people and the industries of other parts of my country. In my humble way in the study of American life and American economics I realize the fundamental proposition that all of our interests are interwoven, and it is to the benefit of the cotton grower of the South and the wheat grower of the West that all parts of the country should prosper, because by that prosperity we enlarge the purchasing power in the domestic markets of our products. The only thing we complain about is that sometimes people in other sections of the country are not as broad as that, and they do not realize that the best purchaser, the best market that the New England and the eastern manufacturers have is the farmer of the South and the farmer of the West, and therefore they should join us in our efforts to build up agriculture. Whenever disaster comes to any industry in any part of the United States all other parts suffer. So far as the Committee on Banking and Currency is concerned, when it comes to considering problems that involve the policy and the credit systems of the United States, we find ourselves very seldom divided on partisan or sectional lines. We try to think of the whole country.

Getting back now to my first thought, while the manufacturers were being built up and growing stronger and stronger with the evolution of American business and world business, the credit needs of American agriculture became more acute. In the pioneer days what need did the farmer have for credit? American agriculture in those early days was largely a proposition of living at home and selling locally principally surplus stuff and getting what cash was needed. The farmer obtained what he needed in the mercantile market near by, purchasing the manufactured product, and his wants were few; but as we developed the American standard of living, as we developed our social organization, the need of the American farmer for things that were manufactured and that he did not produce became larger and larger. Even for the implements with which he pursued his husbandry he had to go more and more into the market for cash or credit with which to get them. Then as the world market developed and as American producers of wheat and cotton and manufactured articles further found their interests interwoven with world markets, we found more and more the need of larger and more extended credit agencies. The Civil War produced the national banking system. That national banking system, gentlemen will recall, is a demand deposit banking system. Necessarily, therefore, it has to confine itself to short-term liquid paper that matures automatically within a short time, so that the commercial banker feels safe at all times in being able to meet the demands of his depositors should those demands become exceptional. What happened? As agriculture developed and its needs for additional credits became larger, was there any credit system built up? Oh, no. The American farmer found that he must go to the same credit window, to the same credit merchant, the short-term commercial banker, and there obtain his credit. In the very nature of things, with the philosophy of the system with which he had to deal, he was compelled to purchase that which was inadequate for his needs—that is, short-term credit—when what he needed in order to thrive and be independent was a credit that was commensurate with his needs, his seasonal needs.

The American cotton farmer needs a credit for 12 months. The wheat grower frequently needs a credit for 12 months and longer. The cattle grower—and though I have no very extensive cattle growing in my district I would be sectional if I did not think of him—in order to be independent and prosper, in order to add to the wealth of the American food supply, must have in some instances a credit of three years. Have we done that for him? Have we treated his needs with the same consideration that we have the manufacturers in my city of Fort Smith? I do not have to go to other parts of the country to find the discrimination. We have built a commercial credit agency that gives my manufacturing friends in the city of Fort Smith greater facilities for their credit needs than are given to the farmer in the same county. It is against that class discrimination that I protest. I do not ask for class legislation for the American farmer. I only demand equality of treatment. During the years of my short service in this House, commencing with the original writing of the Federal reserve act, I insisted that commerce, industry, and agriculture stand side by side, and that the needs of all three should be recognized, each upon an equal footing, and that only by doing that could the American Congress meet not simply class needs but the needs of the entire public of the Nation. Those of you who were here at that time will remember that I insisted when the first proposal came that would limit the paper to from 30 to 60 days that there should be adequate provision for agri-

cultural paper put into the bill, so that it might be discounted for a term of maturity of sufficient length to fit agriculture. The older Members here will remember the fight that I made then. And I do not recall this now for political purposes, because I have no opposition and I am not here to play politics, but I am thinking alone of the welfare of the United States. Finally we got six months' paper, which was the best that we could do, and we were promised by the leaders of both parties that if I would stop my fight at that time, that in the next session of Congress the Congress should take up agricultural credits. So far as the President of the United States, Mr. Wilson, was concerned, that pledge was kept, and he urged it in his message to Congress. We partially met the needs of the American farmer by establishing a land bank system. It was insisted then, and with some merit, that we ought not to intermingle the personal credit of the American farmer with the land bank interest and investment credits, and so the personal credit system was not taken care of, but that was put off until another day.

Commissions of inquiry and investigation went on. My candid judgment is that if the war had not come on the thoughtful men on both sides of the aisle would have evolved a scheme—safe, sound, certain, and reasonable—which would have met the personal credit needs of the American farmer by establishing a separate and distinct agency, not in competition with the short-time commercial banker, who too often in his shortsightedness thinks we who are advocating that are trying to destroy his business—not that, but something of a credit system, well rounded, in which there was the same agency, the same facilities for every class and not simply for one or two classes. But the war came on and that fell through. Gentlemen, I am frank to say I have been more anxious—of course, you have got an excuse that since the war things are unsettled. We have pending in the Committee on Banking and Currency several proposals—the King bill, the Strong bill, the Anderson bill, and others. If we had done what we ought to have done long ago, if we had established a personal credit system commensurate with the needs of the American farmer, we would not have had this legislation here to-day. I am for the extension of this because it is simply a stop-gap, the best you will permit, which will be of some benefit. But, gentlemen, if this Congress does not before this year goes around establish personal-credits machinery for the personal credits of the American farmer, we will be derelict in our duty and we will still face the same emergency that faces us at this particular hour. Gentlemen, I have faith in my country. Oh, we are strong and rich and powerful. What a reflection upon the statesmanship of America that agriculture, here in the most powerful and richest nation on earth, has been permitted to suffer the losses which it did suffer in the last two years. It is a reflection upon all parties and the statesmanship on both sides of the aisle, and the question is, Is American statesmanship bankrupt? If it is not, we can evolve a proper plan and then pass it that will meet all the needs.

Gentlemen, if you will do that you will do more to solve the problems of agriculture than anything else. The American farmer is the most conservative voter you have; he is the most industrious citizen you have in America, and the American farmer is the most law-abiding citizen you have. He does not ask for class legislation, he only asks for equality of treatment, and if you will give him the agencies by which he can work out his own salvation, by which he can meet his own needs, the American farmer will prosper and he will develop the food supply of America, not alone to his own personal interest but he will do it for the welfare and the prosperity of the whole American people. [Applause.] Gentlemen, in the solution of this problem you gentlemen of New England have just as much at stake as we have, because, as I said in the beginning, the farmer of the Wheat Belt, the farmer of the Cotton Belt, the farmer of the cattle-growing territory, they are the best customers you have for your manufactured goods, and if you want to avoid the charge of class legislation then you can no longer delay meeting the needs of agriculture along this line, and if you do it, gentlemen, within the next 10 or 20 years that lie before us the American people will rejoice in the greatest prosperity that has ever blessed a people since the dawn of history. Now, let us get together and do it, and do it at once. Let us quit this thing of every two years, about campaign time, talking about farm credits. Let us do it and quit talking about it. Now, I want to say that I do not say this in any partisan spirit here, because gentlemen will concede that I have not played politics. In the committee I have joined with Republicans and I have joined with Democrats, and I want to say this much to you: You Republicans are in complete control. You not only have the right to frame the legislation but the responsibility rests with you, and I want to say to you in the solution of that problem, in working out such a system of credits for the American farmer, I can pledge to you the united support of every Democrat on this side of the aisle. We are with you.

We recognize it as the most pressing problem confronting Congress, and in behalf, not alone of the farmers as a class, but in behalf of stability and business prosperity of the Nation as a whole, I plead with you to hasten in the solution of that problem and solve it in the only possible way by giving the American farmer an independent, ample system that will meet his long-term personal-credits needs. [Applause.]

Mr. McFADDEN. Mr. Chairman, I yield to the gentleman from Georgia [Mr. CRISP].

Mr. CRISP. Mr. Chairman, I rise to ask leave for my colleague, Judge BRAND, who is a member of the Committee on Banking and Currency, and who is very much in favor of this bill, to extend his remarks in the RECORD. He is in the Hall, but does not feel strong enough to make the request.

The CHAIRMAN. The gentleman from Georgia [Mr. CRISP] asks unanimous consent that his colleague from Georgia [Mr. BRAND] have leave to extend his remarks in the RECORD, Judge BRAND himself being indisposed at this time. Is there objection? [After a pause.] The Chair hears none.

Mr. WINGO. Mr. Chairman, I yield three minutes to the gentleman from Kansas [Mr. TINCHER].

Mr. TINCHER. Mr. Chairman, I am sure everyone appreciated the speech just made by the gentleman from Arkansas [Mr. WINGO]. I do not know that any particular one should be censured that an industry like agriculture was not taken care of when they adopted a financial system for this country, but I am glad to know that my friend from Arkansas [Mr. WINGO] protested against the enactment of the Federal reserve system when it left agriculture out.

There is not any question in the world but that the subject of credits for agriculture that will accommodate the producer in season is a complicated and a hard one, and that it has taken considerable time to work it out. I recall the first session I was here that Mr. Morgan, of Oklahoma, every time he got on the floor talked on that subject. I know the complication the Committee on Banking and Currency are confronted with in this matter, and I am glad to know that there is a determined movement now in that committee, as well as at the other end of the Capitol, toward the end that the class legislation which has been our history in the past is to be done away with, and that agriculture is to come into its own and have the same treatment in our economic system in this country that other industries and other businesses have.

Mr. WINGO. I do not want the gentleman to create the impression that I thought the Federal reserve act was not beneficial to the American farmer. As a matter of fact, thoughtful men, both Republicans and Democrats, thought we went as far in that act as was safe and sound to the American banking system.

Mr. TINCHER. What I said was this, that I wanted to compliment my friend here. The fact is that that was class legislation, was known to him at the time, and he protested. If that protest had been heeded no doubt the farmer would not have suffered as he did by reason of the deflation forced by the system after the war. [Applause.]

Mr. McFADDEN. Mr. Chairman, I believe a careful analysis of the applications made to and the loans made by the War Finance Corporation indicate the great need for an intermediate system of rural credits which will give relief to the agricultural interests of this country.

Now, the operations of the War Finance Corporation have not been confined entirely to the agricultural interests. Loans have been made to the railroads of the East and to some of the Southern railroads. They have been made to the rapid transit companies in New York City; loans have been made to the Baldwin Locomotive Works; loans have been made to the International Harvester Co.; and loans have been made to the cotton farmers of the South and to the cattle farmers of the West. Loans have been made to all classes of industrial institutions and banks, both National and State, in this country, and to some public utilities. So that the uses of the War Finance Corporation have been pretty general. While the larger amount of the loans have been made of late to the agricultural interests, at the same time they have been of indirect benefit to all lines of industry in this country.

Now, the Federal reserve system takes care of the commercial banking system of the country. It does provide in a limited manner for the handling of paper which has a maturity up to six months' time. It has and is now giving great relief to the agricultural interests in the country. There is not any question about that. The farm loan system which has been organ-

ized has made loans throughout the country to the farmers for a long-time period, to an extent of something over $600,000,000, and there is a gap between what that system is doing and the Federal reserve system, which must be taken care of. We have discussed it at different times here, and, as I said yesterday, the committee are considering plans to give this relief. I believe we can assure the people that there will be enacted within the year proper legislation to cover this, and what I mean by that is a system similar to the Federal farm loan system, or perhaps an amendment to the farm loan system or the Federal reserve system, which will provide a system through which these intermediate credits which are desired by the farmers can flow in an orderly manner into the investor's hands. It may be necessary that some capital be contributed by the Treasury, but I believe it has been demonstrated to us that if the Federal farm loan system can finance its loans to the American farmers to the extent it has on a capital of $50,000,000, that a capital of $50,000,000, or not to exceed it, would take care of the short-time rural intermediate credits we are discussing here. I believe we are on the eve of the formation of a plan which will give this necessary relief.

Mr. JOHNSON of Mississippi. I realize this is only temporary legislation. I want to know if it was the expectation of the Committee on Banking and Currency to act upon the Strong bill or the Anderson bill at this session of Congress?

Mr. McFADDEN. I will say to the gentleman that we are considering all the propositions that are before the committee. We have not singled out any one of them. It will probably be a composite of suggestions that may be contained in the several bills.

I called attention yesterday to a bill that I introduced, H. R. 11763, which provides credit relief. It may be that this will be the bill, or a modification of it. But I would not want to say to the gentleman that we are going to report out any one specific bill at this time.

Mr. JOHNSON of Mississippi. But from those bills you hope to work out a longer term of credit for the farmers and stock-raisers?

Mr. McFADDEN. Yes.

Mr. Chairman, much has been said during this debate about winding up the affairs of the War Finance Corporation, I believe that no further extension should be granted for the continuance of this corporation. It is a powerful central bank, governmentally controlled, and all the capital furnished by the United States Treasury and under improper management might be so administered as to do great evil. The way to discontinue its operations is to provide a proper means to take care of the intermediate credits, and then this can be done. I hope that this may be done without Treasury aid by private capital, somewhat in the same manner as joint-stock land banks are now organized, with proper governmental supervision. If Treasury aid is necessary provision should be made to return the capital as soon as possible to the Treasury.

Mr. Chairman, for the information of the Members of the House I am going to put in the RECORD at this point an analysis of the bill to which I have just referred.

The CHAIRMAN. Without objection, the analysis referred to by the gentleman from Pennsylvania may be inserted in the RECORD. [After a pause.] The Chair hears no objection.

Mr. McFADDEN. Mr. Chairman, I wish to say that the bill H. R. 11763, introduced in the House by me on May 23, 1922, contains two parts. Title I of the act contains certain amendments to the Federal reserve act designed to adapt the Federal reserve system more nearly to the needs of the agricultural sections of the United States. Title II is substantially the bill heretofore introduced by Senator CAPPER—Senate bill 3563—providing for a system of live-stock financing. It is believed that the two parts of the bill when taken together contain a fairly complete program of agricultural-credits legislation. The two parts of the bill should be considered separately.

TITLE I.

Sections 1 and 2 of Title I of the bill substitute for a brief paragraph, in section 13 of the present Federal reserve act, a new section to be entitled section 13a, containing a full statement of the conditions under which agricultural and live-stock paper shall be eligible for rediscount with Federal reserve banks.

The new section provides that notes, drafts, or bills of exchange issued or drawn for an agricultural purpose or based on live stock shall be eligible with a maturity of not exceeding six months. In this respect the present law is not changed. The new section provides, however, that where agricultural paper is secured by warehouse receipts covering readily marketable and nonperishable agricultural products it may be eligible for rediscount with a maturity not exceeding nine months. It is also provided that loans on the security of live stock which is being fattened for market—generally termed "feeder loans" as distinguished from loans on breeding herds—shall be eligible for rediscount with a maturity not exceeding nine months. It is believed that these changes will go far toward adapting the machinery of the Federal reserve system to the needs of agricultural communities without at the same time sacrificing in any degree the liquid character so essential to Federal reserve discounts.

To guard against the possibility of a Federal reserve bank investing too large a proportion of its assets in six and nine months paper, it is provided that the Federal Reserve Board may limit the amount of paper of six and nine months' maturities which any Federal reserve bank may discount. It is also provided that the Federal Reserve Board may prescribe regulations designed to insure that nine months warehouse-receipt paper discounted by member banks is issued as part of a program of orderly marketing, and not for speculative holding.

The new section 13a also clarifies the eligibility of notes of cooperative marketing associations issued to finance advances to their members or expenditures of the associations for agricultural purposes. As recently interpreted by the Federal Reserve Board, the present Federal reserve act leaves the matter in considerable doubt.

Section 3 of the bill reduces the minimum capital necessary to render a State bank eligible for membership in the Federal reserve system. It is provided that in towns the population of which does not exceed 6,000 inhabitants State banks may be admitted to membership if their paid-in capital is at least $30,000, and that in towns the population of which does not exceed 3,000 inhabitants State banks may be admitted to membership if they have a paid-in capital of at least $15,000. In each case, however, as a condition of membership, there will be filed with the Federal Reserve Board adequate undertakings of the bank and of its principal stockholders that they will within three years increase their capital to the present statutory limit of $50,000 in towns not exceeding 6,000 inhabitants and $25,000 in towns not exceeding 3,000 inhabitants.

TITLE II.

This title represents an attempt to put live-stock financing on a sound and permanent basis, so that credit can be made available to the live-stock industry upon reasonable terms, both as to interest rate and maturity.

The conditions which make such legislation necessary at this time were explained by Eugene Meyer, jr., managing director of the War Finance Corporation, in his recent testimony before the House Committee on Banking and Currency. He explained that live-stock financing had never been on a sound basis. Ranchmen have been compelled to borrow money upon 90-day or six months maturities to finance a turnover to from two to three years. As long as renewals could be obtained there was no difficulty. But in a time of credit stringency, banks would refuse to renew; new funds would be unobtainable, and breeding herds, immature and unfit for slaughter, would be forced to market. Even where live-stock financing was done in the first instance through live-stock loan companies the same conditions were encountered, for these loan companies were in turn obliged to obtain funds by rediscount with commercial banks.

These conditions emphasize the need of a longer term of credit for breeding herds. A ranchman should be assured when he purchases or replenishes his herd that the money he has borrowed for the purpose will be available until he can repay it out of the orderly marketing of the increase.

With these objects in mind, it is proposed that a system of rediscount corporations be established, to be known as Federal live-stock finance corporations. The Federal Farm Loan Board is authorized to divide the continental United States into from 5 to 10 districts,to be known as live-stock districts, and may organize a Federal live-stock finance corporation in any district upon application of five or more eligible live-stock loan companies in the district.

Any live-stock loan company with a paid-in capital of $100,000 or more, is eligible for membership in the system, and entitled to the rediscount privileges therein provided, and as a condition of membership is required to subscribe to capital stock of a Federal live-stock finance corporation in an amount equal to 25 per cent of the paid-in capital of the loan company. Paper eligible for rediscount must be secured by chattel mortgage on live stock having a market value at least 50 per cent in excess of the face amount of the note secured thereby. The live stock must have been inspected in accordance with regulations to be drawn up by the Federal Farm Loan Board. Such

live-stock paper may have a maturity of not more than one year with provision for renewal of such paper up to three years from its original date.

Any member live-stock loan company is entitled to rediscount with a Federal live-stock finance corporation eligible live-stock paper in an amount not exceeding five times its paid-in capital stock. The bill contemplates that the capital of the loan company, aside from the amount necessary for current operations, shall be maintained in safe and readily marketable securities instead of being invested in loans, as has been the custom among loan companies in the past. It is therefore provided that in addition to the 25 per cent of a loan company's capital stock which is invested in stock of the Federal live-stock finance corporation, a further sum equal to 10 per cent of the amount of all paper rediscounted by the loan company shall be invested in United States securities and pledged with the Federal live-stock finance corporation as additional security. This 10 per cent invested in United States securities will be available in the event that unusual expenditures must be made in an emergency to protect and preserve the live stock forming the principal security. The remainder of the loan company's capital stock is to be retained by the company for operating needs.

In order to obtain funds to finance their rediscount operations, it is contemplated that Federal live-stock finance corporations will issue bonds, secured by eligible live-stock paper, and by the 10 per cent deposit of Government securities above mentioned. The bonds will have maturity of from one to three years, and any bonds issued up to June 30, 1925, will be tax exempt. Thereafter they will be taxable. It is believed that with the conservative provisions for security, and the additional backing of the capital stock of the rediscount corporation and of the live-stock loan company, such paper will be readily marketable at a relatively low rate of interest.

In order to assure purchasers of these bonds of the integrity of their security, it is provided that there be appointed by the Federal Farm Loan Board, for each Federal live-stock finance corporation, a Federal custodian who will act as chairman of the board. The bonds will be issued under a collateral trust agreement between the Federal custodian and the corporation, which will require the Federal custodian to certify upon each bond issue that the required securities are in his possession; that they are accompanied by inspection reports indicating that the property has been inspected in accordance with regulations of the Federal Farm Loan Board; and that he has an opinion of counsel that they are in proper legal form. It is not contemplated—as is the practice in the case of Federal farm-loan bonds—that the actual mortgages will be submitted to the Federal Farm Loan Board in Washington.

It is provided that the rediscount rate charged by a Federal live-stock finance corporation shall be not less than one-half of 1 per cent and not more than 1 per cent in excess of the rate at which bonds are sold. In addition, the live-stock loan company is authorized to charge 1½ per cent in excess of the rediscount rate, besides a reasonable inspection fee, to be regulated by the Federal Farm Loan Board.

In addition to the capital stock in a Federal live-stock finance corporation subscribed by the member corporations, the Secretary of the Treasury is authorized to subscribe temporarily an amount of capital stock equal to 25 per cent of the subscriptions of member corporations. It is provided that the Government subscription will be retired out of earnings within a reasonable time.

Capital stock in a Federal live-stock finance corporation will receive out of earnings 6 per cent cumulative dividends. Earnings in excess of 6 per cent will go into a surplus fund until the fund amounts to 25 per cent of the subscribed capital stock. Thereafter all excess earnings will go, first, to retire the stock subscribed by the United States; second, to pay an additional dividend of 2 per cent; third, to increase the surplus of the corporation until it equals the subscribed capital, and any amount in excess to the United States as a franchise tax.

In considering the effectiveness of this bill the following points should be borne in mind:

1. The bill is not designed to take over the whole live-stock loan business of the United States. It contemplates that much of this business will still be conducted through local banks, through nonmember live-stock loan companies, or through other sources. There will still be a substantial amount of live-stock paper, which does not comply with the technical requirements of the bill with respect to margins, and so forth, but which on account of the financial condition and character of the maker of the paper is entirely safe from a banking viewpoint, and it is expected that this will find its way, as it has in the past, into the normal banking channels. The purpose of this bill, however, is to provide a means by which the best quality of live-stock paper, complying with definite standards upon which investors can rely, can be used as a means of raising a substantial amount of funds at reasonable rate, and upon terms, with respect to maturity, which will render it unnecessary for the borrower to concern himself every 90 days or six months with renewals.

2. Except for a temporary and limited use of Government funds for capital stock of the corporations, the bill does not contemplate the pledging of Government credit or the lending of Government money. The functions of the United States Government, as contemplated in the bill, are substantially restricted to the supervision and safeguarding of the security, and the regulation of the terms upon which bonds may be issued. In this respect the bill follows the analogy of the Federal farm loan act.

3. Title 2 of the bill is confined exclusively to live-stock financing, and does not attempt to set up any new machinery for general agricultural credits. It is believed that the financing of live stock, especially so far as the breeding herds are concerned, requires a special machinery of its own. It is impracticable to finance seasonal agricultural operations by means of bond issues, just as it is unsound to finance the three-year turnover of a ranchman out of banking funds representing demand deposits. A farmer engaged in raising commodities for the market can not tell in advance precisely when he will need his money, nor can he anticipate when he will be able to sell his products and repay the loan. Current agricultural financing should, therefore, be provided by a modification and expansion of our banking system rather than by new machinery based upon the sale of bonds in the investment market. Moreover, to the average investor a standardized security, such as would be provided by bonds based solely on live stock, is greatly preferable to a mixed security. It is believed that the addition of general farm paper to the security provided in the bill would greatly diminish the salability of the bonds.

4. The bill renders bonds of the Federal live-stock finance corporations tax exempt, but only in so far as they are issued on or before June 30, 1925. It is believed that tax exemption will be of great assistance in setting the machinery on its feet. At the same time it is recognized that a permanent policy of permitting tax-exempt issues of this character is open to serious objection. It is believed that by the time the bonds will, under the terms of the bill, become taxable, the system will have had an opportunity to establish itself on such a basis that funds will be available at reasonable rates without the artificial stimulus of tax exemption.

The CHAIRMAN. The Clerk will read the bill for amendment.

The Clerk read as follows:

Be it enacted, etc., That the first sentence of section 23 of the War Finance Corporation act, approved April 5, 1918, as amended, is amended to read as follows:

"SEC. 23. That notwithstanding the limitation of section 1, the advances provided for by section 21 and section 22 of this act may be made until July 1, 1923."

SEC. 2. That the last sentence of section 24 of such act as amended, is amended to read as follows:

"Advances or purchases may be made under this section at any time prior to July 1, 1923."

With a committee amendment, as follows:

Strike out all after the enacting clause and insert the following:

"That the time during which the War Finance Corporation may make advances and purchase notes, drafts, bills of exchange or other securities under the terms of sections 21, 22, 23, and 24 of the War Finance Corporation act, as amended, is hereby extended up to and including May 31, 1923: *Provided*, That if any application for an advance or for the purchase by the War Finance Corporation of notes, drafts, bills of exchange, or other securities is received at the office of the corporation in the District of Columbia on or before May 31, 1923, such application may be acted upon and approved, and the advance may be made or the notes, drafts, bills of exchange, or other securities purchased at any time prior to June 30, 1923.

"SEC. 2. That the second paragraph of section 12 of title 1 of the War Finance Corporation act, as amended, be further amended to read as follows:

"'The power of the corporation to issue notes or bonds may be exercised at any time prior to January 31, 1926, but no such notes or bonds shall mature later than June 30, 1926.'

"SEC. 3. That paragraph 3 of section 15 of title 1 of the War Finance Corporation act, as amended, be amended by striking out at the beginning of said paragraph the words 'beginning July 1, 1922,' and inserting in lieu thereof the words 'beginning July 1, 1923.'

"That paragraph 4 of said section 15 be amended by striking out at the beginning of said paragraph the words 'After July 1, 1922,' and inserting in lieu thereof the words 'After July 1, 1923.'"

Mr. LUCE. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Massachusetts moves to strike out the last word.

Mr. LUCE. Mr. Chairman, I do this in order to comment briefly upon the observations made by the gentleman from Iowa [Mr. TOWNER]. For the sake of historical accuracy, and not to engage in controversy at all and not to criticize, but in order that the historian of the fiat money movement of 1924 may prop-

erly describe its genesis, I would like to suggest to the gentleman from Iowa that he misunderstood the circumstances when he suggested that the purpose of this bill is to furnish time for liquidating the business of the War Finance Corporation. Under the act loans made for export purposes can be renewed for five years, and under the change that was made in extending it to the field of agricultural banking, if I may call it such, provision was made for a renewal of loans for three years. Therefore, there is no occasion for this bill at this time in order to liquidate.

The bill is being enacted in order that the corporation may make absolutely new loans after the 1st of July. It is giving 12 months more to this corporation to engage in new business. The present business can all be handled under the law, and there will be ample time for it. It will be unfortunate if readers of the RECORD, in attempting to understand the situation, should gather from what was said yesterday and what has been said to-day that the purpose of this law is to wind up the affairs of the corporation. The purpose of the law is to permit new business to be transacted between the 1st of July this year and the 1st of July next year.

Mr. TOWNER. Mr. Chairman, will the gentleman yield?

Mr. LUCE. Certainly.

Mr. TOWNER. I think the gentleman misunderstood my statement. The statement I made was, if I remember correctly, that it would have been possible for the War Finance Corporation to have had an extension of six months. Of course, the gentleman understands that that does not mean that they could wind up these long-time loans. Provision was made in the original act for that. I did not say that the only purpose of this extension was to give them time to wind up their affairs. I said that for the reason that there had been no provision made for an intermediate credit system to take the place of this it was necessary that they should have a longer time.

Mr. LUCE. With the last statement of the gentleman, Mr. Chairman, I do not take issue. I simply wanted to get into the RECORD the fact that neither in his letter to the President nor in his statement to the Banking and Currency Committee, if my recollection is correct, did Mr. Meyer ever suggest the desirability of more time for the purpose of winding up the business. There are other reasons that have not been as yet commented upon, but this extension is not for the purpose of convenience in liquidation.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. CROWTHER rose.

Mr. STEAGALL. Mr. Chairman, I desire to be recognized in opposition to the amendment.

The CHAIRMAN. The gentleman from Alabama is recognized.

Mr. STEAGALL. Mr. Chairman, broadly speaking, the whole question under consideration since the termination of the war with respect to the Finance Corporation act has been the question of the liquidation of the business of the corporation.

The War Finance Corporation was established originally to assist in the conduct of the war, and after the termination of the war the question presented to Congress has been when and how best to terminate the activities of the corporation without disturbing and upsetting the business interests of the country, which, of course, had felt to a great extent the influence of the use of the vast amount of capital making up the stock of this corporation. So that it can not be accurately said that in the bill now before us an effort is made to venture upon as a new field of banking and to set up a new banking scheme by which loans are to be made directly with capital supplied by the Government. The question with which we are dealing is when it will be wise and prudent and practicable to have the War Finance Corporation wind up its affairs and quit business without disturbing unnecessarily and unwisely the business of the country. We think, many of us, that it was wise, in the disturbed condition following the war, to make use of this great agency of the Government to afford credit to aid in the exportation of American products, both from factory and farm, and later to use this fund and this instrumentality for the purpose of affording credit to the agricultural interests of the country that were suffering peculiarly as the result of the conditions growing out of the war. Nobody expects that this is to become a permanent thing. It is only thought that we will try to utilize it until we can establish some system that is adapted permanently to accomplish the purpose of affording stable credit agencies to the agricultural interests of the Nation.

I do not mean by that that the Government will undertake, as it does in the matter of the War Finance Corporation, to afford the capital; but that a plan may be worked out whereby the farmers of the country may assemble their assets and utilize their resources for the purpose of obtaining credit in the open market. We should by all means create some agency adapted to this work and enable the farmer to obtain credit adapted to his needs, both in volume and in terms and interest rates. We must solve this problem and put the farmer upon an equal footing with the merchant and manufacturer in credit facilities. Not by direct Government loans but by a banking agency under Government supervision and safeguards suited to his needs. Let us do this without further delay. But let us not terminate the War Finance Corporation until we have something to take its place. We must not risk any more shocks and disturbances to agriculture in existing conditions. [Applause.]

The CHAIRMAN. The time of the gentleman from Alabama has expired. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

Mr. McFADDEN. Mr. Chairman, I move that the committee do now rise and report the bill with the amendment to the House with favorable recommendation.

The CHAIRMAN. The gentleman from Pennsylvania moves that the committee do now rise and report the bill with an amendment to the House, with the recommendation that the amendment be agreed to and that the bill as amended do pass. The question is on agreeing to that motion.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. CAMPBELL of Kansas, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill (S. 2775) to extend for one year the powers of the War Finance Corporation to make advances under the provisions of the act entitled "An act to amend the War Finance Corporation act, approved April 5, 1918, as amended, to provide relief for producers of and dealers in agricultural products, and for other purposes," approved August 24, 1921, had directed him to report the same back to the House with an amendment, with the recommendation that the amendment be agreed to and that the bill as amended do pass.

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the third reading of the bill.

The bill was ordered to a third reading, and was accordingly read the third time and passed.

On motion of Mr. McFADDEN, a motion to reconsider the vote by which the bill was passed was laid on the table.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted—

To Mr. BRENNAN (at the request of Mr. MICHENER), indefinitely, on account of illness in his family.

To Mr. LYON, for one week, on account of important business.

To Mr. VINSON, for 10 days, on account of important business.

ENROLLED JOINT RESOLUTION SIGNED.

Mr. RICKETTS, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled joint resolution of the following title, when the Speaker signed the same:

H. J. Res. 339. A joint resolution making available funds for repairing and restoring levees on the Mississippi River above Cairo, Ill.

POST OFFICE APPROPRIATIONS.

Mr. MADDEN. Mr. Speaker, I ask unanimous consent to file a conference report on the Post Office appropriation bill for printing in the RECORD. It will be ready shortly after the adjournment of the House.

The SPEAKER. The gentleman from Illinois asks unanimous consent to file for printing in the RECORD under the rules a conference report on the Post Office appropriation bill at any time up to midnight to-night. Is there objection?

Mr. WINGO. Reserving the right to object, I presume the gentleman has consulted with the ranking minority member?

Mr. MADDEN. We all agree.

Mr. WINGO. All right.

REPORTS OF NATIONAL BANKS.

Mr. CAMPBELL of Kansas. Mr. Speaker, I have a privileged resolution here providing for the consideration of another bill from the Committee on Banking and Currency. In order to save time I ask unanimous consent for the consideration of House bill 8996, and that the general debate be limited to 20 minutes, 10 minutes on a side.

Mr. DOWELL. What is the purport of the bill?

Mr. CAMPBELL of Kansas. Limiting the number of reports required to be made by national banks in any one year, reducing the number from five to three.

The SPEAKER. The gentleman from Kansas asks unanimous consent for the immediate consideration of House bill 8996, and that the general debate be limited to 20 minutes, 10 minutes in favor and 10 minutes against the bill. Is there objection?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The Clerk read the title of the bill (H. R. 8996) to amend paragraph 440, section 5211, act of June 3, 1864.

The SPEAKER. This bill is on the Union Calendar. The Chair thinks it is a fair interpretation of the request which was granted that the House should go into Committee of the Whole House on the state of the Union for the consideration of the bill. The gentleman from Kansas [Mr. CAMPBELL] will take the chair.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 8996) to amend paragraph 440, section 5211, act of June 3, 1864, with Mr. CAMPBELL of Kansas in the chair.

The CHAIRMAN. Without objection, the first reading of the bill will be dispensed with.

There was no objection.

Mr. McFADDEN. Mr. Chairman, all this bill does is to change one word in section 5211 of the Revised Statutes. It changes the word "five" to "three," which applies to the number of reports that the Comptroller of the Currency is authorized to ask in each year from national banks.

Mr. WINGO. Mr. Chairman, I deeply sympathize with the gentleman from New York [Mr. CROWTHER], who charges that all leading Republican American newspapers are against the pending tariff bill and says there is a growing sentiment in the country against protection.

The gentleman had to go away down to Texas for the only persons he could find that indorsed the pending tariff bill, which, of course, is not the old protective tariff but is an outright prohibitive tariff. He asks, "When are we going to have a tariff law?" I ask the gentleman the question himself, "When are you going to pass the tariff bill?" The gentleman's party has an overwhelming majority in this House and in the other end of the Capitol, and every business man in America would like to know just when this do-nothing, wiggle-wobble administration is going to settle down to the major problem which confronts them, which is the matter of taxes, and one of the major tax measures is the tariff bill. I do not know what is going on behind the Republican scenes. The gentleman lifted the curtain a little bit. He must understand why we are kept here all summer. Nobody knows when we are going to get through. The Republicans are quarreling behind closed doors, each one fighting for his own special privilege. That is the trouble when you get to indulging in class legislation. They fall out among themselves when it comes to a division of the swag; and so this Republican administration, like the famous snake railroad—

> Wiggles in and wobbles out,
> And leaves the people all in doubt,
> Whether, in its zigzag track,
> 'Tis going west or coming back.

The gentleman talks about the election. He said something about that, and he had the wisdom to predict that the only hope of even the protectionists lies in a Democratic Congress. That is true. A Democratic Congress could exercise more intelligence in enacting even a protective tariff bill than this administration and this Republican Congress have thus far exercised, because a Democratic Congress would possess both intelligence and courage.

Mr. CROWTHER. Mr. Chairman, will the gentleman yield?

Mr. WINGO. Yes.

Mr. CROWTHER. The gentleman wants to know when we are going to have a tariff bill. I will tell him that under the present rules of the other body we shall have a tariff bill just as soon as the Democratic windjammers get through.

Mr. WINGO. Democratic windjammers? What about your Republican windjammers? Why, you have the votes in the Senate. The Republicans of the Senate took eight months behind closed doors, excluding the Democrats, to report the bill, and now you can not get a majority of the Republicans to stay on the job much less approve the monstrosity, which the gentleman himself admits is condemned and ridiculed by even leading Republican newspapers. The more it is studied, the more disgusted even Republicans are.

Mr. GARNER. Mr. Chairman, will the gentleman yield?

Mr. WINGO. Yes.

Mr. GARNER. It took them eight months to windjam by Republicans behind closed doors in order to get the bill out of the committee to the floor of the Senate.

Mr. WINGO. In other words, the gentleman from New York confesses that even under gag rules, with the distinguished present occupant of the chair [Mr. CAMPBELL] at the head of the Rules Committee, under this administration most of the bills, even those which are privileged, must be considered under special gag rules so that the Republican Members may "hog tie" themselves in advance in order that they may be protected against their own weakness.

The gentleman confesses that under this administration with a big majority in both Houses and with the genial gentleman at the other end of the avenue in charge of the party, you can not find out what you want to do, and when you think you have found out, you are lacking in either the intelligence or courage to do it.

The CHAIRMAN. The time of the gentleman from Arkansas has expired.

Mr. McFADDEN. Mr. Chairman, now that the merits of the bill have been so thoroughly discussed, I ask that it be read for amendment.

The CHAIRMAN. The Clerk will read the bill for amendment.

The Clerk read as follows:

Be it enacted, etc., That paragraph 440 of section 5211 of the act of June 3, 1864, as amended, 1877, be amended to read as follows:

"440. Every association shall make to the Comptroller of the Currency not less than three reports during each year, according to the form which may be prescribed by him, verified by the oath or affirmation of the president or cashier of such association, and attested by the signature of at least three of the directors. Each such report shall exhibit in detail and under appropriate heads the resources and liabilities of the association at the close of business on any past day by him specified, and shall be transmitted to the comptroller within five days after the receipt of a request or requisition therefor from him, and in the same form in which it is made to the comptroller shall be published in a newspaper published in the place where such association is established, or if there is no newspaper in the place then in the one published nearest thereto in the same county at the expense of the association, and such proof of publication shall be furnished as may be required by the comptroller. The comptroller shall also have power to call for special reports from any particular association whenever in his judgment the same are necessary in order to a full and complete knowledge of its condition."

Mr. KING. Mr. Chairman, I move to strike out the last word and ask unanimous consent to extend my remarks in the RECORD on the subject of agricultural credits.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. McFADDEN. Mr. Chairman, I move that the committee do now rise and report the bill without amendment to the House, with the recommendation that the bill do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. CAMPBELL of Kansas, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 8996, and had directed him to report the same back to the House with the recommendation that it do pass.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time and passed.

On motion of Mr. McFADDEN, a motion to reconsider the vote by which the bill was passed was laid on the table.

ADJOURNMENT.

Mr. McFADDEN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; and accordingly (at 4 o'clock and 18 minutes p. m.) the House adjourned until Monday, June 5, 1922, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

622. Under clause 2 of Rule XXIV, a letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on preliminary examination and survey of Lake Washington ship canal, Washington (H. Doc. 324), was taken from the Speaker's table, referred to the Committee on Rivers and Harbors, and ordered to be printed, with illustrations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. HAUGEN: Committee on Agriculture. H. Res. 357. A resolution directing the United States Department of Agriculture and the Post Office Department to investigate the feasi-

bility of furnishing market prices of cotton, corn, wheat, live stock, and dairy products by radiophone to the farmers; with amendments (Rept. No. 1064). Referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. O'CONNOR: Committee on Naval Affairs. S. 1690. An act to correct the military record of John Sullivan; with an amendment (Rept. No. 1063). Referred to the Committee of the Whole House.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. WRIGHT: A bill (H. R. 11886) authorizing the acceptance of the proposal of Henry Ford for the completion and leasing of the dams and hydroelectric plants at Muscle Shoals and for the purchase of nitrate plant No. 1, nitrate plant No. 2, the Waco Quarry, and the interest of the Government in the Gorgas Warrior River steam plant, all in the State of Alabama, dated May 31, 1922; to the Committee on Military Affairs.

By Mr. COLTON: A bill (H. R. 11887) providing for location, entry, and patenting of lands within the former Uncompahgre Indian Reservation in the State of Utah, containing gilsonite, or other like substances, and for other purposes; to the Committee on the Public Lands.

By Mr. WILSON: A bill (H. R. 11888) extending jurisdiction of the Mississippi River Commission; to the Committee on Flood Control.

By Mr. COLTON: A bill (H. R. 11889) providing for the sale and disposition of lands within the former Uncompahgre Indian Reservation in the State of Utah containing gilsonite or other like substances; to the Committee on the Public Lands.

By the SPEAKER (by request): Memorial of the Legislature of the State of Maryland, urging the passage of House bill 10734; to the Committee on Interstate and Foreign Commerce.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. CHINDBLOM: A bill (H. R. 11890) granting an increase of pension to Charles Wilson; to the Committee on Pensions.

By Mr. FITZGERALD: A bill (H. R. 11891) granting a pension to Ella H. Candy; to the Committee on Invalid Pensions.

By Mr. GILLETT: A bill (H. R. 11892) granting a pension to Laura M. A. Jones; to the Committee on Invalid Pensions.

By Mr. HAWLEY: A bill (H. R. 11893) for the relief of Marion F. Wade; to the Committee on Military Affairs.

Also, a bill (H. R. 11894) for the relief of Thomas R. Powers; to the Committee on Claims.

By Mr. HAYS: A bill (H. R. 11895) granting an increase of pension to William H. Hayes; to the Committee on Invalid Pensions.

By Mr. JAMES: A bill (H. R. 11896) granting a pension to John L. Williams; to the Committee on Pensions.

By Mr. KUNZ: A bill (H. R. 11897) for the relief of Ovid Lemieux and Joseph M. Caulfield; to the Committee on Claims.

By Mr. McLAUGHLIN of Nebraska: A bill (H. R. 11898) granting an increase of pension to Caroline Kinsloe; to the Committee on Invalid Pensions.

By Mr. SPEAKS: A bill (H. R. 11899) granting a pension to Sylvester Condon; to the Committee on Invalid Pensions.

By Mr. WURZBACH: A bill (H. R. 11900) for the relief of First Lieut. Claude L. Gamble, Quartermaster Corps, United States Army; to the Committee on Claims.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

5881. By the SPEAKER (by request): Resolutions adopted by the twenty-ninth convention of the Brotherhood of Locomotive Firemen and Enginemen, assembled in Houston, Tex., relative to the proposed steps to be taken by the Government regarding Alaska; to the Committee on the Public Lands.

5882. By Mr. BARBOUR: Petition of Poplar Grange, No. 359, Porterville, Calif., urging the election of farmer stockholders as officers of the Federal land banks; to the Committee on Banking and Currency.

5883. By Mr. BURTON: Evidence in support of House bill 11875, granting a pension to Alice L. Byers; to the Committee on Invalid Pensions.

5884. By Mr. CLASSON: Petition of John O. Miller and others, of Mariette, Wis., for the establishment of a Jewish national homeland in Palestine; to the Committee on Foreign Affairs.

5885. By Mr. DUPRÉ: Resolutions of Order of Eastern Star, Grand Chapter of Louisiana, in behalf of the Sterling-Towner bill; to the Committee on Education.

5886. By Mr. GALLIVAN: Petition of F. L. Dunne & Co., Boston, Mass., protesting against paragraphs 1109 and 1110 of House bill 7456; to the Committee on Ways and Means.

5887. By Mr. HAYS: Petition of Fred Stuart, of Ava, Mo., and 86 other citizens of Douglas County, in favor of passage of Senate bill 3310 and House bill 7213; to the Committee on Invalid Pensions.

5888. By Mr. JAMES: Resolution adopted by the Presbytery of Lake Superior at Sault Ste. Marie, Mich., indorsing Senate Joint Resolution 31, relative to enacting uniform laws on the subject of marriage and divorce; to the Committee on the Judiciary.

5889. By Mr. KISSEL: Petition of Commercial Standards Council, New York City, urging the passage of House bill 10159; to the Committee on the Judiciary.

5890. Also, petition of Devoe & Raynolds Co. (Inc.), New York City, relative to paragraph 62 of House bill 7456; to the Committee on Ways and Means.

5891. By Mr. McLAUGHLIN of Nebraska: Petition of sundry citizens of Seward, Seward County, Nebr., protesting against the passage of House bill 9753, or any other Sunday bill; to the Committee on the District of Columbia.

5892. By Mr. RIDDICK: Petition of residents of Dodson and Gallatin County, Mont., urging passage of the Towner-Sterling bill; to the Committee on Education.

5893. Also, petition of veterans of the Spanish-American War, Bridger, Mont., urging that adjusted compensation bill be amended to give bonus to Spanish War veterans; to the Committee on Ways and Means.

5894. Also, petition of farmers of Aloe, Power, Emory, Enid, and Fairfield, Mont., urging the revival of the United States Grain Corporation; to the Committee on Agriculture.

5895. By Mr. SNYDER: Petition of Immanual Congregational Church, West Winfield, N. Y., protesting against a treaty which will return the Armenians to unrestricted Turkish control; to the Committee on Foreign Affairs.

5896. By Mr. TAYLOR of Arkansas: Petition of Mr. B. Bluestone and Mr. I. B. Williams, Rison, Ark., favoring adoption of a resolution for establishment of the national Jewish homeland in Palestine; to the Committee on Foreign Affairs.

5897. By Mr. WATSON: Petition of citizens of Norristown, Montgomery County, Pa., favoring the Bursum bill; to the Committee on Invalid Pensions.

5898. Also, resolution passed by the Pennsylvania State Chamber of Commerce at its annual meeting, October 11, 1921, favoring the adoption of the amendment to the Constitution of the United States concerning nontaxable securities; to the Committee on the Judiciary.

5899. By Mr. WILLIAMSON: Resolutions adopted by the Hecla Commercial Club urging the passage of the Sweet bill, relative to State railway commissions; to the Committee on Interstate and Foreign Commerce.

5900. Also, resolutions adopted by the Aberdeen Commercial Club, favoring the passage of the Sweet bill, relative to State railway commissions; to the Committee on Interstate and Foreign Commerce.

5901. By Mr. WOODYARD: Memorial relative to completion of river improvements in the Ohio River; to the Committee on Rivers and Harbors.

SENATE.

MONDAY, *June 5, 1922.*

(Legislative day of Thursday, April 20, 1922.)

The Senate met at 11 o'clock a. m., on the expiration of the recess.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

Mr. WATSON of Indiana obtained the floor.

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Borah	Frelinghuysen	McKinley	Smoot
Brandegee	Gooding	McLean	Sterling
Cameron	Hale	McNary	Sutherland
Capper	Harris	Nelson	Swanson
Caraway	Harrison	Newberry	Townsend
Colt	Heflin	Nicholson	Underwood
Culberson	Johnson	Oddie	Walsh, Mass.
Cummins	Jones, N. Mex.	Page	Walsh, Mont.
Curtis	Kellogg	Phipps	Warren
Dial	Kendrick	Pittman	Watson, Ga.
Dillingham	Keyes	Rawson	Watson, Ind.
Edge	Ladd	Sheppard	Willis
Ernst	La Follette	Shortridge	
France	McCumber	Simmons	

Mr. UNDERWOOD. I wish to announce the necessary absence, on account of illness, of the Senator from Florida [Mr. FLETCHER]. I ask that this notice may continue during the day.

Mr. CURTIS. I desire to state that the Senator from Washington [Mr. JONES] is absent on official business.

The VICE PRESIDENT. Fifty-four Senators have answered to their names. A quorum is present.

Mr. WATSON of Indiana. I have agreed for a moment or two to yield to the Senator from Wisconsin [Mr. LA FOLLETTE] to call up a couple of resolutions in which he is interested and which he assures me will take no time for debate.

NAVAL OIL RESERVE LEASES.

Mr. LA FOLLETTE. Mr. President, I ask unanimous consent for the present consideration of Senate Resolution 294. I am certain it will lead to no debate and that it can be disposed of immediately.

The VICE PRESIDENT. The Secretary will read the resolution for information.

The reading clerk read the resolution submitted by Mr. LA FOLLETTE and reported from the Committee to Audit and Control the Contingent Expenses of the Senate, as follows:

Resolved, That S. Res. 282 is hereby amended by adding at the end of said resolution the following:

"That the said committee is hereby authorized to sit and perform its duties at such times and places as it deems necessary or proper and to require the attendance of witnesses by subpœnas or otherwise; to require the production of books, papers, and documents; and to employ counsel, experts, and other assistants, and stenographers, at a cost not exceeding $1.25 per printed page. The chairman of the committee, or any member thereof, may administer oaths to witnesses and sign subpœnas for witnesses; and every person duly summoned before said committee, or any subcommittee thereof, who refuses or fails to obey the process of said committee or appears and refuses to answer questions pertinent to said investigation shall be punished as prescribed by law. The expenses of said investigation shall be paid from the contingent fund of the Senate on vouchers of the committee or subcommittee, signed by the chairman and approved by the Committee to Audit and Control the Contingent Expenses of the Senate."

Mr. WARREN. Mr. President, may I ask the Senator which committee will conduct the investigation?

Mr. LA FOLLETTE. The Committee on Public Lands and Surveys is to carry on the investigation. This is an amendment to the resolution directing the investigation regarding the leasing of certain naval oil reserves and especially the Teapot Dome in Wyoming.

The VICE PRESIDENT. Is there objection to the immediate consideration of the resolution?

The resolution was considered by unanimous consent and agreed to.

PRICES OF CRUDE OIL AND GASOLINE.

Mr. LA FOLLETTE. I now ask unanimous consent for the present consideration of Senate Resolution 295. I will take a moment to state that it is an amendment to the resolution introduced by the junior Senator from Tennessee [Mr. MCKELLAR] directing the Committee on Manufactures to make an investigation into the prices of crude oil and gasoline. I introduced the present resolution as an amendment to that resolution and had it referred to the Committee to Audit and Control the Contingent Expenses of the Senate. It was reported back favorably on Saturday, and I now call it up and ask for its present consideration.

The resolution was read, considered by unanimous consent, and agreed to, as follows:

Resolved, That Senate Resolution 292 is hereby amended to read as follows:

"*Resolved*, That the Committee on Manufactures, or any subcommittee thereof, be, and it is hereby, authorized and instructed to investigate and report to the Senate as early as possible—

"First. The stocks of crude oil, gasoline, and other petroleum products at refineries or elsewhere in the United States at the end of each month for the years 1920, 1921, and 1922, and the holders or owners thereof.

"Second. The prices of crude oil, gasoline, and other petroleum products during the several months in said years and their relations to each.

"Third. Whether or not the recent increases or other recent changes in the prices of gasoline or of other petroleum products have been made generally or uniformly by all companies, and whether there have been marked local differences in the price changes made.

"Fourth. The profits of companies refining and marketing petroleum in the United States for the years 1920, 1921, and the first half of 1922.

"Fifth. Whether there is any natural reason for the changes of prices of crude oil, gasoline, and of other petroleum products, or whether there has been any understanding or agreement between various oil companies to raise or depress prices, or whether there are any conditions of ownership or control of oil properties or of refining and marketing facilities in the industry in any part of the country or branch of the business which prevent effective competition.

"Sixth. And all such facts as bear upon the recent changes in prices of crude oil, gasoline, or other petroleum products or upon any other of the foregoing matters.

"The said committee is hereby authorized to sit and perform its duties at such times and places as it deems necessary or proper and to require the attendance of witnesses by subpœnas or otherwise; to require the production of books, papers, and documents; to employ counsel, experts, and other assistants; and to employ stenographers, at a cost not exceeding $1.25 per printed page. The chairman of the committee, or any member thereof, may administer oaths to witnesses and sign subpœnas for witnesses; and every person duly summoned before said committee, or any subcommittee thereof, who refuses or fails to obey the process of said committee, or appears and refuses to answer questions pertinent to said investigation, shall be punished as prescribed by law. The expenses of said investigation shall be paid from the contingent fund of the Senate on vouchers of the committee or subcommittee, signed by the chairman and approved by the Committee to Audit and Control the Contingent Expenses of the Senate."

PROPOSED MERGER OF STEEL COMPANIES.

The VICE PRESIDENT. The Chair lays before the Senate a communication from the Federal Trade Commission relative to the proposed merger of certain steel companies, in response to Senate Resolution 286. The communication will be referred to the Committee on the Judiciary and printed.

Mr. LA FOLLETTE. Mr. President, the communication just laid before the Senate is very short. I had an opportunity to see it, and I ask to have it read. It will take but a few moments.

Mr. WATSON of Indiana. Mr. President, I would like to proceed. Can not the letter be read later on? I have already yielded pretty well to my friend.

Mr. LA FOLLETTE. It would take not to exceed 10 minutes to read it, but if the Senator is anxious to proceed I will wait until he has concluded, and then I shall take the floor and read the communication into the RECORD.

Mr. WATSON of Indiana. I will be obliged to the Senator if he will do that.

Mr. LA FOLLETTE. Very well.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

Mr. WATSON of Indiana. Mr. President, there were two courses open to the Republican members of the Finance Committee with reference to the discussion of the pending amendment, and whichever course was chosen we were bound to be more or less at a disadvantage from the beginning because of the ability and the insistence of the opposition.

One course was to refrain from debate. We had been led at the beginning to believe that our friends, the enemy, did not intend that this bill should be passed until a short time before the election. We still believe that. So if we indulged in debate we but played into their hands, and, in a sense, helped to filibuster our own bill. Believing that this measure when passed and placed in operation would justify itself, we chose the opposite course and determined to refrain almost wholly from debate; but, having chosen that course, it was not free from difficulties, for the reason that Senators upon the other side insisted upon asking questions of the chairman of the Committee on Finance, the Senator from North Dakota [Mr. MCCUMBER], and the senior Senator from Utah [Mr. SMOOT]. Thus pressed with questions, those Senators could not fail to respond, because if they had chosen such a course they would have been charged either with ignorance or with mendacity or with purposely declining to debate the great proposition for which they, above all others, stood as sponsors on this floor. So it was not altogether possible for them to refrain from debate. They felt compelled to answer questions, and therefore, later on, to explain items and schedules of the bill. This, of course, has all taken time; and yet it is quite evident that this bill is not to be passed until shortly before the elections; and it is my present view that our friends will permit it to be passed then.

Mr. POMERENE. Mr. President——

The VICE PRESIDENT. Does the Senator from Indiana yield to the Senator from Ohio?

Mr. WATSON of Indiana. I do.

Mr. POMERENE. As one Member on this side of the Chamber, I certainly shall not consent to a filibuster; but in view of the fact that the discussion of this bill began on April 20, 1922, and we have now been, perhaps, six weeks in the discussion, and this side of the Chamber is charged with a filibuster, and in view of the further fact that the House of Representatives began consideration of the bill on January 6, 1921, and it took from January 6, 1921, until April 11, 1922, to get a report from the Finance Committee, let me ask the Senator in all candor, Is he quite fair when he charges Senators on this side of the aisle with a filibuster and an effort to delay? Might we not with more force charge Senators on the other side with being, perhaps, guilty of some sinister purpose when they have taken this long time to get the bill into the Senate?

Mr. WATSON of Indiana. Mr. President, that is a fair question from a fair-minded man, and I shall be very much pleased to answer it.

In the first place, everybody knows that all revenue legislation must originate in the House of Representatives, and that after the internal revenue tax bill had been passed by the House of Representatives and brought over here it was the unanimous verdict of the country and the consensus of opinion in the Senate that the consideration of the tariff bill should be temporarily suspended by the Finance Committee until the internal revenue legislation was out of the way. We followed that course, and, as I now look back upon it, I think wisely. Of course, it took a great deal of time to formulate the revenue measure and it took a great deal of time to pass it through the Senate. Immediately after that the consideration of the pending measure was resumed by the Finance Committee.

That committee labored assiduously and unremittingly from 9 o'clock every morning until 5 o'clock or 5.30 o'clock every evening in the consideration of the measure. We found untoward conditions; we found unusual situations; the commerce of the whole world was in a chaotic condition; values were uncertain; costs were changing; prices were shifting. We labored as no other committee has ever labored within my knowledge of legislation to get at the real facts, to find the basic truths. After we had thus labored we brought forth this bill, which I believe under all the circumstances to be the best balanced tariff bill in all respects that has ever been introduced into the American Congress.

Mr. POMERENE. Mr. President, there is room for an honest difference of opinion on that subject. I agree with the Senator from Indiana that Senators on the other side of the Chamber have had very great difficulty in coming to a conclusion; I judge from what has been said on the floor of the Senate as well as from what has been said to me by individual members of the Finance Committee in private conversation that Republican Senators have had very great difficulty among themselves in coming to a conclusion; but allow me to suggest that the difficulties which confronted my distinguished friend from Indiana and his associates also confront the Members on this side of the Chamber. If it took the majority of the Finance Committee all these long months to give birth to the bill which is now before us, it seems to me that a reasonable time at least ought to be allowed the Senators on this side of the Chamber, who are just as sincerely patriotic as are Senators on the other side of the Chamber, to discuss and consider the bill.

I have judged from some of the things that have been said by certain Members of the Senate that, in the judgment of a few of them, Senators on the other side of the Chamber have a monopoly of all the brains and all of the honor and all of the integrity which is in the Chamber. I am not referring, of course, to my distinguished friend from Indiana on that branch of the subject. It does seem to me, however, that we on this side ought to have at least a fair opportunity to discuss some of the questions involved in this measure.

Mr. WATSON of Indiana. Mr. President, I shall not make reply to the last insinuation of my friend, but as to the first part of his interrogation, which is worthy of reply, I desire to say that the able Senator from Ohio is a lawyer, and what he wants to do is to have as much time to argue the case as it takes to get the evidence before the jury. That is never done, and never ought to be done. Senators on the other side of the Chamber spent four days discussing the tariff rate on vinegar and three weeks in discussing the chemical schedule.

Mr. HARRIS. Mr. President——

The VICE PRESIDENT. Does the Senator from Indiana yield to the Senator from Georgia?

Mr. WATSON of Indiana. I yield.

Mr. HARRIS. Mr. President, I do not desire to get into any partisan debate this morning; what I want is to get through with the business of the Senate; but I desire to remind the Senator from Indiana that the subcommittee of the Committee on Appropriations worked on the Army appropriation bill for six solid weeks all day long. There was a great difference of opinion among members of the committee, including the majority members themselves. Nevertheless we worked hard and reported to the Senate a bill carrying over $300,000,000 and involving a number of questions that would have ordinarily, perhaps, taken weeks to discuss in a legitimate manner, and we got that bill through the Senate in less than half a day. The reason the bill was passed through the Senate in that time was because the minority members of the committee were trying to get through with the business of the Senate in a short time.

I do not know any Senator on this side of the Chamber who wants to filibuster. So far as I am concerned, and so far as the Senators who I hear discuss the question are concerned, we want to get through with this bill. If it is a good bill, as the Senator from Indiana says it is, he ought to be glad to have all the discussion which can take place on it, in order to let the country ascertain how good a bill it is. For my part, I think it is the worst tariff measure that has ever been thrust into the Senate. I think we ought to discuss it, but I am not willing to filibuster, and the Senators on this side are not willing to filibuster, and it seems to me Senators on the majority side can have very little argument to use in favor of the measure when, instead of defending the bill, they come here and charge that we are indulging in a filibuster, when the RECORD shows that we are not.

Mr. WATSON of Indiana. Mr. President, the instance cited by my friend from Georgia recoils upon him and destroys his own argument. For six weeks the Committee on Appropriations labored with the Army appropriation bill. It was a measure of vast importance and contained a large number of items and appropriated a great sum of money, but it was not partisan, and it was, therefore, passed in a day.

Mr. HARRISON. Mr. President, may I ask the Senator a question?

Mr. WATSON of Indiana. I yield; but I am going to quit yielding, because I will not get through to-day unless I do.

Mr. HARRISON. I should like to say that in the preparation of the Army appropriation bill both Democratic and Republican members of the committee were present; they participated in the deliberations of the committee in the consideration of the bill, whereas the preparation of the pending tariff bill was confined to the majority members of the committee when it came to writing the bill, and the Democratic minority were not permitted to come in.

Mr. WATSON of Indiana. There never has been a tariff bill in the entire history of tariff legislation since the beginning of the Civil War, and even before, that was not formulated precisely as the pending bill has been formulated, by the members of the majority, because, being a partisan question, they have the right to formulate it along partisan lines and to express the party thought and opinion in the bill. That is precisely what we have done.

Mr. WATSON of Georgia. Mr. President, before the Senator from Indiana quits allowing interruptions, will he not allow me to ask him a question?

Mr. WATSON of Indiana. I certainly shall.

Mr. WATSON of Georgia. Is it true, as has been rumored, that the Finance Committee heard the same delegations representing the same manufacturing interests again and again and thus killed time?

Mr. WATSON of Indiana. It is not true.

Mr. WATSON of Georgia. I would not have asked the question if I had not been told so by the leader on the other side.

Mr. WATSON of Indiana. Well, we are all leaders over here, and, of course, I do not know to what leader the Senator from Georgia refers.

Mr. WATSON of Georgia. That is the reason why they do not lead.

Mr. WATSON of Indiana. Perhaps we do not lead as Democrats are led; but we get on in mass formation and we always run over the other fellows when the day of battle comes.

Mr. WATSON of Georgia. They have not been doing it very much here of late.

Mr. WATSON of Indiana. A majority of 7,000,000 votes does fairly well.

Mr. HEFLIN. Mr. President, the Senator means that they are now trying to run over the people by this bill, I presume.

Mr. WATSON of Indiana. Mr. President, I desire to refer briefly to the difficulties which confronted the members of the Finance Committee when the consideration of the bill was begun in the Senate. As I have said, we could choose one of two courses: One was to decline to debate in order to insure the passage of the measure; the other was to debate, and therefore play into the hands of the opposition, who, we believed then and believe now, do not intend that this bill shall pass until shortly before the election. I believe as firmly as I am standing on my feet here that if this were now the 1st day of October the opposition to the passage of the bill would melt into nothingness and that we would be permitted to put it through.

The reason is this: Up to this time the opposition has had the newspapers. The forces which attack always get the ear of the newspapers. The other side may or may not, but certainly the side attacking is heard where the side that defends may not have a hearing. So up to this time those who have attacked, the assailants of the measure, have taken up most of the time of the Senate and have occupied most of the space in the newspapers. Therefore they have gotten their side of the controversy before the people. If there be something of misinformation about it and something of misunderstanding about it, it behooves us to correct it, notwithstanding some little time it will take to do it.

Senators, we all go back—those of us who are old enough personally and those who are not old enough go back traditionally—to 1890, when the McKinley bill was passed just a month before the election.

We all know the result to the Republican Party and to the great leader himself, Mr. McKinley. We remember the tactics that were pursued by our Democratic friends in that campaign, and if an opportunity is given they intend now to do the same thing, for they do not propose to give this measure a chance to justify itself by actual operation in the United States. We recall that they went over McKinley's district, and that they sold tin cups, or attempted to sell them, for 50 cents apiece, and coffeepots for $1.50 to $2 apiece, and wash boilers for from $5 to $6 apiece, and when questioned about such outrageous prices they said, "Well, this is the result of the McKinley tariff on tin which your candidate for Congress has put on that product in his tariff bill." My friend over there smiles, but he knows that just as well as he knows that I am talking about it, and I was in the district at the time and campaigning as a young man and saw it myself, and I know its disastrous effect; and yet what was the final result? The final result was, as the world knows, that within five years we were making in the United States all the tin that we consumed in the United States. We had literally picked up that industry in Wales and transported it over to the United States. We were employing American laboring men and paying them a higher wage than was ever paid in Wales, and investing American capital, and adding to the thrift and prosperity of the American people. That is what happened. In other words, that bill did not have a chance to justify and vindicate itself in the eyes of the people.

What was done in 1890 is precisely what our friends on the other side intend to do to-day. If they believed that this bill is as vicious and as illogical and as inequitable and as un-American and as immoral as they say it is, they would get out of the way and let us pass it in the next 15 minutes, with one roll call. There is not a shadow of doubt about it on earth.

Mr. WATSON of Georgia. Mr. President——

The VICE PRESIDENT. Does the Senator from Indiana yield to the Senator from Georgia?

Mr. WATSON of Indiana. I do.

Mr. WATSON of Georgia. Does the Senator from Indiana mean to say that smiles upon this side should be put on the tax list?

Mr. WATSON of Indiana. Mr. President, I have listened to the speeches made on the other side with very much interest, though not with grave concern. I have heard them all before. During the last four or five days I have taken occasion to run back over the tariff discussions beginning with 1824, again in 1828, and in 1832, and on up to 1840, and then the tariff bill of 1846, then the McKinley law, and then the Payne-Aldrich law. I could lift bodily the speeches made in many of these debates and place them in the RECORD of to-day and attribute them to Senators on the other side, and I would not miss five sentences in most of the speeches made—precisely the same charges, precisely the same prophecies, precisely the same predictions, and all with the same inevitable result. Six times in the history of the United States free trade has dissipated our industries, paralyzed the arm of labor, and put capital on crutches, and six times the protective tariff system has resuscitated our industries and brought prosperity to a stricken people; and the same speeches were made on the other side every time, and they are being made to-day.

In 1897 we passed the Dingley law, and the Dingley law was the highest in its rates of any law we ever enacted in the history of the country. Under the McKinley law the average ad valorem was 47.72 per cent. The average free and dutiable was 25.17 per cent. Under the Dingley law the average ad valorem was 47.78 per cent; the average free and dutiable was 26.18 per cent.

Under the Payne law the average ad valorem was 41.21 per cent, 6 per cent less than under either of the previous laws, and the average free and dutiable was 20.13 per cent, 6 per cent less than under the Dingley law, and 5 per cent plus less than under the McKinley law. So under the highest law ever passed in the history of the United States, my fellow citizens, we prospered as no other people ever prospered in all the recorded history of time, and we came out of a condition as deplorable as any nation had ever known; for the administration of Grover Cleveland, with its free trade bill, cost this country more in the loss of wages and more in the decline of prices and more in the shrinkage of values than the Civil War in America, with all the loss that it entailed upon the people and upon the industries of the Republic.

I want now for a little while to show what some of our Democratic friends at that time said was going to happen under the operation of that bill, precisely the words used now, exactly the language employed now, talking about a higher bill than we propose here, for the rates in that bill were higher than those we propose in this bill; and oh, the dismal tales of woe, and oh, the direful prophecies, and oh, the freezing terrors that were going to grip the Republic if that awful law was fastened upon the helpless people of the Nation! Just the same old wail and the same old prophecy, always singing in a minor key, like an owl that sits on the limb of the dead past and hoots the same old dismal hoots that have been hooted for 150 years of American progress.

Senator Vest said—and he was some orator and some statesman, just as dead wrong on this tariff question as the mother that stands on the bank of the Ganges and throws her babe in to appease the wrath of some nonexistent god. What did he say about it? He said:

> I plead, of course, to deaf ears, so far as this Chamber is concerned.

I wish our friends on the other side would come to that same conclusion now.

> I plead, of course, to deaf ears so far as this Chamber is concerned, and I have not the gift of special prophecy; but I tell my friends on the other side, continue this thing and you will repeat history as it occurred after the act of 1890. There is an instinct of fair play and right in the American people which will not tolerate this sort of illogical, indefensible, and outrageous taxation.

Does not that have a familiar sound?

> If any Senator can tell me why, with the existing conditions, this duty upon tin plate should be increased, I shall be more astonished than I have ever been in my whole political career.

We all know why it was increased. It was put on and then decreased under the Democratic law, and it threatened to destroy the industry in the United States, and we put the tariff back on and saved it, and it has marched on from that day to this as a living monument to the wisdom of a protective-tariff system.

Senator Caffrey, of Lousiana, had this to say, expressing the awful fears that seized and gripped his terrified soul:

> Sir, the Republican Party went to defeat under the high tariff of 1890. That was but a skirmish compared to the battle that is to be in 1900. Then will come the Waterloo of Republicanism. The Napoleon of the tariff can then meditate on the ingratitude of the Republic, and the blindness of them who fail to see the blessings of paying somebody else a part of their money to make them rich.
>
> Sir, the industries that have flourished in the United States are those grounded on natural advantages. Our wheat and cotton and corn never needed and can not prosper under a tariff.

Think of a man making a statement of that kind in the light of all that has transpired under that law and under the operation of every other protective tariff.

> It is so of the leading manufacturing industries, iron, cotton, wool, and wood.

Why, my fellow citizens, I stop long enough to say that but for the imposition of a tariff these industries never would have been established in the United States. We put on a tariff to establish the iron industry, we put on one to establish the steel industry, and the cotton-manufacturing industry, and the woolen-manufacturing industry, and the tin-plate industry, and the pearl-button industry. They and all these other industries have

been established in the United States in the first instance because of the imposition of a protective tariff, and would not have been established aside from that, because they never could have met the withering and the blasting competition of the pauper labor of Europe but for the imposition of a protective tariff.

Senator Allen said:

Mr. President, I want to see the bill pass.

There was a man that had the logic of the situation. He was willing to follow it to its direful conclusion, and wanted it tested. I wish my friends on the other side were so frank now.

I want to see the bill pass. I want to see it pass as speedily as possible. In my judgment it will be the gigantic failure of the age. It will fall short of producing revenue. Although its purpose is as I said, I want to see the great body of honest American citizens who believe there is something in the tariff issue to learn by bitter experience, if they can not learn otherwise, that the tariff is a delusion and a snare. * * *

I do not know what course I shall pursue then, but I believe, and I believe the American people are becoming daily convinced, that the bill will be a failure the moment it is adopted.

I shall not stop to give you the history of that just now, for I want to go on and recite others of these prophecies, I trust for your interest, if not for your instruction.

Senator Chilton of Texas said:

The bill, under the guise of levying taxes, is to be made a great instrumentality of protection. In my judgment, it will fall by its own weight. It will fall as the McKinley law fell whenever it comes to the test before the American people and they learn its results by actual experience.

Mr. HARRISON. Mr. President, will the Senator yield?

Mr. WATSON of Indiana. Yes; I yield.

Mr. HARRISON. Will not the Senator read to us what he said in advocacy of the Payne-Aldrich tariff law?

Mr. WATSON of Indiana. Yes; and what I said came true. It was all fulfilled.

Mr. HARRISON. It came true to the extent that your party was turned out of power for passing the Payne-Aldrich bill.

Mr. WATSON of Indiana. Not by reason of the passage of the Payne-Aldrich tariff bill at all. Other things led to the overthrow of the Republican Party in 1912, temporarily. Unfortunately, I was there when it happened, and I know that the Payne-Aldrich tariff bill did not have anything to do with it.

Mr. STANLEY. Mr. President——

The VICE PRESIDENT. Does the Senator from Indiana further yield?

Mr. WATSON of Indiana. Yes.

Mr. STANLEY. As I understand it, the Senator means to state that his party was guilty of a multitude of other sins besides the passage of the Payne-Aldrich bill, and that this industrial crime alone was not responsible for the discomfiture of his party?

Mr. WATSON of Indiana. No; I am not going to Kentucky to raise any standard of either sin or virtue, I will say to my friend across the river. I am not going to talk about that. What I am saying is this. I intend no reflection.

Mr. STANLEY. Mr. President, I do not expect the Senator to come to Kentucky. Those who love darkness rather than light never seek it; and an Indiana Republican will always keep away from Kentucky until a power higher than any party organization has cleansed his political soul and made him fit for the better Democratic life in old Kentucky.

Mr. WATSON of Indiana. And from Kentucky! [Laughter.] Good heavens, think of that!

Senator Mills, of Texas, who himself was the author of a tariff bill, used this language:

Do you think there is no hereafter?

I have heard that question asked on the other side four or five times in this debate.

Wait until the swallows homeward fly. There is a tribunal whose doors are always open, and we will invite you to meet us there. If the people of the United States indorse your doctrine and the policy that you write on the statute books to-day, they are not fit for self-government.

And yet for 125 of the 145 years of the history of this Nation we have operated under the protective tariff system, but this man had the audacity to say that if we adopted the protective tariff system the people were not fit for self-government. I continue reading from that speech:

Nor will they do it, either. They will bring you to an account, and the places that know some of you to-day will know you no more hereafter forever.

We are casting our pearls away faster than our enemies can gather them. We are turning dead ears to the voices that come to us from Massachusetts and Virginia that our Government is for free men, for the preservation of our natural rights, for the security of our happiness and well-being, and not for the profit of any one man, or family, or class of men. Our ship is driving upon the rocks, and unless we seize the helm and change its course, the historian will emerge from the darkness to write the melancholy pages of the decline and fall of the great American Republic.

Think of a man making an assertion of that kind about the passage of the Dingley bill, which absolutely worked wonders, as everybody knows, in the history of the United States—industrially, commercially, and financially. Not only that, but it brought our Nation, numbering less than one-twentieth of the population of the globe, to that high position among the peoples of the earth where we owned one-half of all of its railroads, two-thirds of all its telegraphs, and three-fourths of all its telephones, while we did one-third of its mining, one-fourth of its manufacturing, one-fifth of its agriculture, and owned one-sixth of all its wealth. Yet this man said it would bring despair to the people and usher us into the oblivion of decay.

On page 1671 of the RECORD, Senator Gorman, of Maryland, not a novice, by the way, in political affairs, expressed himself in this fashion:

The country will understand it. The country will understand perfectly that this great scheme of prosperity, this great measure of relief, adds tenfold to the taxation on the consumption of every man of moderate means in the land while there is nothing here that attempts to approach the ideal—making men pay for the support of the Government in proportion to their wealth. The whole system is unequal and unjust. The people's verdict will be that of 1892.

Senator Tillman, then in his prime, gave forth this tribute to the protective-tariff system:

The time will come when the tariff will sink you Republicans, because you can not give prosperity under any scheme of duties that you may enact.

Senator Morgan, of Alabama, a very great leader and a very great statesman, was seized with fear for the downtrodden industrial masses, who were going to be the sufferers, and prophesied panic, disorder, and distress to follow in the wake of the passage of that bill. He said:

But after a while, Mr. President, this thing is going to stop, because the other people who are not provided for, the great industrial masses of this country, will not be able to earn enough to pay these bounties, and depression and calamity will take place in the country; panic will appear in the commercial and financial marts, and this bill will produce it. Causes now exist sufficient to produce it, but this bill will aggravate it; and after this bill has had its first reviving effect upon these so-called industries of manufacturing, etc., when the reaction comes in this country, there is no man, I think, who has bestowed his thoughts sedately upon questions forecast in his mind that this country, by virtue of this political tariff, designed by a political party, is bound to suffer panic, disorder, and distress.

Senator Jones, of Arkansas, the predecessor of my very dear friend from Arkansas, who on Saturday evening delivered himself of a philippic against the pending measure, said:

You can not make the people rich by taxing them, and you can not make them prosperous by making them pay higher prices for what they have to buy without giving them increased facilities for doing so.

Let them try this bill, if the friends of the measure of high protection are sufficiently strong in this body to put it upon the statute books, but when it has become the law of the land the promised prosperity fails to come, as I am sure it will fail to come, then the question will be asked at once of these gentlemen, "You promised us prosperity by the passage of the tariff bill, and what do you propose to do now? How do you propose to give us prosperity now?" The people will be doubtful in their belief of what is promised them because of the failure at this time.

And here is another quotation from Senator Vest:

Mr. President, coming events sometimes cast their shadows before. Our Republican friends propose now to put back the high duties upon wool and upon woolen goods. When the people of this country find that experience in the past has been verified as to results in the future, when they know that these promises have been kept to the ear and broken to the hope, there will come a day of reckoning. The Republican Party, mark it, will come back to this Capitol broken and shattered with the irresistible logic of having made promises which they have not kept.

Senator Bate, of Tennessee, foresaw the lifeblood of labor being sucked out by the enactment of that law. He said:

It will be an indirect and constant drain upon the great body of consumers.

* * * It would increase poverty where it now exists and multiply wealth where it now abounds. It will suck the lifeblood of labor and make of it a pale and sickly dependent. It will encourage capital to combine and build up those modern curses, trusts and monopolies. It will multiply tramps and millionaires.

Think of that sort of a prophecy about the enactment of the Dingley law! Senator Chilton again said:

We now come to Schedule G, entitled "Agricultural products and provisions."

I read this because precisely the same line of attack has been made against the agricultural schedule set forth in the pending bill, and, singularly enough, made by at least one of the men who voted for the emergency tariff act, which carried higher rates than the pending bill carries in the agricultural schedule.

Senator Chilton said:

We now come to Schedule G, entitled "Agricultural products and provisions." This should more properly be styled the "Fraud schedule" because, while designed on its face to benefit the farmer, it really does him no good whatever, and in some paragraphs actually adds to his burdens.

* * * Teach the farmer the truth; teach him to bare his arm against protection at every point; teach the farmer that he can never gain a fair share in this protection robbery; teach him to fight it to-day, to-morrow, and next year; teach him to make war against the first schedule, the second schedule, the fourteenth schedule—all the schedules; teach him to muster with that party which will move manfully toward ultimate free trade in this country; and when you do that, we can write another such platform as the Democratic Party wrote in 1856 and we can win another such victory as was won under Buchanan as our candidate for President.

I pause long enough to read what President Buchanan said in his last message about the tariff of 1856; not directly about the tariff but about the results of that tariff as inevitably to follow as night is to follow day. Buchanan said:

With unsurpassed plenty in all the elements of national wealth, our manufacturers have suspended, our public works are retarded, our private enterprises of different kinds are abandoned, and thousands of useful laborers are thrown out of employment and reduced to want.

Yet a Senator standing on the floor of the Senate said he wanted a return of the tariff that brought about such an anomalous condition in the United States, anomalous because with all of our natural resources, with all of our inventive genius, with all of our capacity for management, and with all of our ability to make skilled laborers in the United States, we ought to lead, industrially, commercially, and financially, and not be prostrate and helpless before all the other people of the world. Yet, whenever we permit, in free and unrestricted fashion, the products of the cheap labor of Europe to come into competition with the products of our labor, there can be but one of two results; our laboring people must come down to the wage level of the foreigners or else shut up shop. There is no other alternative, and every time we have tried a Democratic tariff we have shut up shop, and every time we have adopted a Republican tariff we have opened the shops, the boys have gone back to work, and the hum of industry has again come to bless and gladden the ears of all the people.

Senator Jones, of Arkansas, again said:

* * * I, for one, believe that this bill will, when enacted into law, utterly disappoint its friends; that there will be no substantial revival of business as the result of it; that there will be no stimulation of commerce by reason of this law being written on the statute books.

* * * This bill, levying the highest rates of tariff taxes ever known in this country, will only aggravate the evils already almost unendurable.

Senator Morgan said:

The people will hold you up to it, and that one item of responsibility, to say nothing about pine timber or anything else, will crush this bill into dust and ashes when the people get a chance at it at the next election. They are not deceived. They do not fail to understand the situation, nor, sir, do they fail to feel it.

The Senate did not have a monopoly upon the prophets then or now, and some of them were men with whom my honored friend from Kentucky and my other friend from Alabama associated, along with me and other Members on the other side as well as on this. Congressman Ball, of Texas, had this to say:

* * * The days of the Republican Party will be "few and full of trouble," and the wrath of an outraged people, which reached high-water mark in 1892, will come again and cover them in 1900, as the molten lava from Vesuvius did the ancient cities of Pompeii and Herculaneum.

Oh, how our friends hunted the dictionary to find new adjectives and coin new phrases to describe the terrors that would come upon the people after the Dingley law was passed, and the same prophesies are being uttered to-day on the other side, in almost identical language, about this bill, with lower rates than that bill carried, and it will inevitably be followed by the same result.

Congressman Lanham, of Texas, said:

Pass your bill, reeking as it does with blight and burden, carrying as it does disaster and distress, freighted as it is with woe and waste, filled as it is with injustice and oppression to your fellow men; but it will but briefly blot and blur the statute books of this mighty Nation, for it is against the genius of our institutions, the ethics of civilization, the proprieties of life, the equities of good government, and the conscience of a free people that Mammon shall be enthroned and that money shall rule man in this land.

Beautiful, is it not, and especially in the light of all the facts? I think it was the late Senator Dolliver who said, what comes to me now in speaking of those prophesies, that if Noah had predicted a drouth instead of a flood, and put in a system of waterworks instead of a boat, he would have been a shining example of prophetic insight as compared with these purveyors of woe on the Democratic side. The words come to me now, and I think they are entirely apt and appropriate.

Congressman Handy, of Delaware, said:

When the farmer learns by further bitter experience how heavy are the burdens you lay on him, and how futile the pretended protection for him in this bill, he will join the workingman in the demand for another campaign for tariff reform. You pass this bill to-day, but you must know full well that its reckless provisions are too grievous to be borne with patience. * * * This bill seems to me a cruel and unjust measure, the most outrageous tariff bill that American politics has ever known.

And my friend from Georgia but now repeated the language, his voice still reverberating within the four walls of this Chamber. Every tariff bill is the most outrageous and the most infamous and the most inexcusable and the most illogical and the most un-American of all the tariff bills that has ever been proposed, and yet we have gone on and passed them despite these complaints and these wails; we have made them into law, and the country has gone on from mediocrity to greatness, and from greatness to grandeur under the operation of a protective tariff law, and under the combined operation of all these successive tariff laws we have come to be easily first among all the peoples of the world in everything that pertains to national greatness.

Not only that, but under the stimulating effect of these successive protective-tariff measures we had brought our people to that high place among the nations of the world in 1917 where we were absolutely essential to their salvation. They reached out their blood-stained hands to us across the sea and asked for help, and we were in position to give them help—why? Because we were strong at home, and we remained strong at home because we had attended to our own business; we had developed our own resources; we had diversified our own industries, employed our own labor, and increased its wages. We had invested our own capital and remuneratively invested it, and we had brought our people to that condition among the peoples of the world where we were in a position to help when they wanted help. And, my fellow citizens, the same situation confronts us now. It is up to us whether or not this same policy shall be continued or we shall pursue the will-of-the-wisp, vacuous, and fatuous policy of free trade.

But let me go on. Congressman Stephens, my personal friend for many years in the House, was a very honorable gentleman, who believed what he said. These gentlemen are all sincere—that is to say, as to the fundamentals of the tariff. I can not doubt that some of them are playing a little politics when they stand up against the immediate passage of this bill, because if I were on the other side and I believed the bill would work the havoc they say it will, I would get out of the way and let it go through. It would inevitably result in a Democratic House; it would certainly be followed by a Democratic President; and there would be no escape from either result. But they do not intend that it shall be passed in time to give a demonstration of what its provisions will do by way of the employment of labor and investment of capital and the resuscitation of industry, which, by the way, is fairly well on the upgrade even now.

Congressman Stephens, of Texas, said:

If the trust and money powers, led on, as they are now, by the Republican Party, can carry these, their pet designs, into execution, the laboring and producing millions will be forced into a slavery far worse than the peons of Mexico have ever been subjected to.

Does not this have a natural ring:

I now warn our Republican oppressors that whilst the mills of the gods grind slowly, they grind exceedingly fine, and in the near future I expect to see the laborers and producers of this country by the power of their ballots drive from power the Republican Party and their cormorant allies.

Congressman Dockery, of Missouri, almost 20 years a Member of the House and afterwards governor of his State, a very high-minded and honorable gentleman, too, had this to say:

"McKinleyism" and "Dingleyism" are both extreme illustrations of the vicious policy of paternalism. The McKinley Act in the campaigns following its enactment led the Republican Party to disaster. The Dingley Act in the campaigns to come will prove still more disastrous to that party.

It was Waterloo for the Republican Party in 1890 and 1892. It will be Waterloo, Sedan, and Pultowa, all in one, in 1897 and 1898.

Dire prediction, but, oh, what futile prophecy!

Now I come to the part that I want more particularly to impress upon Senators, because it is the one phase of the situation which our friends on the other side are pressing most insistently upon us, and to which they are most persistently calling the attention of the country, and that is that if we pass the bill we will destroy our foreign commerce and ruin our export trade. Their cry began with John C. Calhoun and Thomas A. Benton. I have their speeches, and never could this argument be more eloquently put than they stated it. Their cry has been repeated from then until now, over and over again,

every time we have tried to pass a tariff law, that we can not sell to other people unless we buy of them, and that we can not buy of them because of our high tariff wall.

That is precisely what my friend the Senator from North Carolina [Mr. SIMMONS] said the other day. He said exactly the same thing about the Payne-Aldrich law, precisely the same thing about it, and those who preceded him, not only from his own State but his colleagues and associates, said the same thing about the Dingley law, and made the same prophecies about the destruction of our export trade. It is not confined to men of this country, but men who come here as the accredited representatives of other nations stand up before us and say that if we expect to trade with them we must not pass this tariff bill, we must not have a high tariff wall interposed between them and us, that they can not sell to us because of the tariff wall, and that we can not sell to them unless we buy of them. That is the argument. It is here to-day. It has been here every day. I want to answer it by the irresistible logic of events and by the irrefutable force of facts.

But I want first to give some of the prophecies, and show how they are to-day repeating the same thing over yonder on the other side of the Chamber, and inevitably they will be followed by the same results.

Senator Morgan said:

We are making war upon the commerce of the world for the purpose of dividing out amongst politicians and political retinues in the United States those benefits which come from political action in a recent presidential election. We are fastening down upon the commerce of the world burdens which it can not stand, which will necessarily cripple our commercial relations with foreign nations, and there is not a nation in the world to-day, from Mexico to Turkey, which does not understand that the tariff bill which we are now enacting is a war upon the commerce of the world.

Again, he said:

* * * Let it come, but when we are destroying our own people and their happiness and prosperity by the exaggeration and outrages of the tariff, do not let us aim our shafts at a country like Japan, which has done so much to try to assist in her civilization and her rise and progress amongst the nations of the earth.

Senator Turpie, as learned a man as ever sat in this body in a generation, whose successor I am on the floor of the Senate, had this to say:

What will be the effect of the increase, the excessive increase of taxation upon imports? It must necessarily affect exports. It must necessarily reduce exports. These two act and react upon each other. It must lessen the demand for cotton, for wheat, for corn, for all the cereals, the true surplus of our country.

Let me stop and ask where on earth my predecessor got that sort of logic? We do not put a tariff on anything that goes out of the country. Everybody is free to come in here and buy, whatever our tariff laws. We put a tariff only on things that come into the United States, not on things that go out. Under our Constitution we are prohibited from placing an export duty upon any article, and they are just as free from duty now, no matter what sort of "tariff wall" we have, if we may use the term "tariff wall."

The nations of Europe and the nations of the world do not buy of us because they love us. No; they buy of us because they can get better goods and cheaper here under the impetus we give to labor and to investments and to invention than they can get anywhere else in the world. That is why they come here and buy, and any import wall which we erect can have no place in our economic policy so far as interfering with foreign commerce is concerned.

Mr. STANLEY. Mr. President, will the Senator yield?

Mr. WATSON of Indiana. I can not yield. I am right in the midst of this quotation from Senator Turpie:

It must lessen and reduce the price of those great commodities of international exchange. It must consequently leave the people less able to pay the rates of taxation than they are at present. I do not think there has been a bill drafted in the history of the Government which commits so large and unprovoked a spoliation upon the commerce of the world as the bill we are to-day considering. The decrease of exports and the falling market for our cereals may be considered the compensatory duties which will follow the passage of this enactment.

I want Senators to keep in mind what my distinguished predecessor said when I come to show the actual facts, to set over against prophecy the logic of what occurred, and that after all is the best answer to any free-trade doctrinaire argument.

Senator Bate said:

At the same time we are considering here in Congress the most effectual tariff system that shall paralyze the industries of other nations, deny them access to our markets, and shut off seventy-five millions of consumers from the production of other nations.

Yes; that is what we are trying to do; not to shut them out but to preserve the American market for the American producer, looking first after our own labor, our own capital, our own farmers, our own natural resources, and our own industries, and then selling abroad whatever surplus we may have, and the facts show that any tariff we ever erected in no wise interferes with that sale.

Let me proceed. Congressman Ball, of Texas, said:

* * * Never yet have the powers of government been so perverted, the interests of favored classes so advanced, and the rights of the masses of our people so trampled upon as by this outrageous and indefensible measure.

* * * This bill is a declaration of commercial war upon the nations of the earth. It will not open a single market for anything we make or produce; it will close many to various industries; it will not add a customer to our mills or factories from abroad, and domestic consumption can not be increased by raising the cost of our own wares to a people without money to buy their present output at existing prices.

Why, our own colleague over here, the Senator from Virginia [Mr. SWANSON], delightful gentleman, whom we all love, uttered this prophecy:

The passage of this bill means to destroy this vast trade, which is fast increasing each year. It means an abandonment by the United States of the markets of the world. It means, on our part, a policy of isolation, instead of one of progress and enterprise. It means a confinement of the sale and purchase of commodities by our citizens to the limit of their own country, to be fleeced by the favored few who are the recipients of the bounties and privileges of this bill.

Congressman Lewis, of Georgia, said:

But your tariff bill will not bring general prosperity. It is true it will enlarge the profits and income of a part of the people, on the one hand, and increase the burdens of the masses, on the other hand.

* * * I tell you this will limit our greatness; it will dwarf our Nation. Protection that forces all consumers to patronize their home manufactories, virtually limiting the manufactories to sell only to our home consumers, reminds me of an old story of two snakes fighting. They began swallowing each other, and at the end of the fight only their heads were left unswallowed.

I shall not go into all of these prophecies, but, without objection, I shall print some others along with my remarks.

Senator Mills, on page 1326 of the RECORD, while discussing the window-glass schedule, saw some danger ahead:

These high rates will be put on, and worse rates will be put on. Your exports will be cut off or reduced in value; your people will be further and further oppressed, and money will be made scarcer, without which it will be impossible to pay debts or to pay the dues to the National, State, and local governments.

Other Senators and Representatives could see only disaster coming upon the people in the discussion of specific items. Senator Vest was a prophet of some renown in those days, and said, at page 1234:

I do not believe that the imposition of larger taxation, either in the shape of import duties or internal revenue taxes, will lift the cloud that now rests upon the people of the United States. I do not believe that higher tariff duties will bring back sunshine and illuminate this whole country, as we have been told over and over again by our Republican opponents.

How do you expect by increasing tariff taxation to enable the farmers of this country to purchase manufactured goods? How do you expect to give them the means with which to buy the articles, the price of which you propose to increase by your tariff imposition?

* * * But I am just as sure as I am of anything that can possibly be determined that the proposed tariff law will not relieve the country, and that your imposition of import and internal revenue taxation will simply increase the trouble and not bring relief to the people.

When we supply the home market, when the Lead Trust is making millions and millions of dollars and declaring its enormous dividends of 12 per cent upon its stock, why should we put up the duty half a cent a pound, double the duty upon lead, and nearly double it upon white lead, which goes upon the cottage of every poor man in the land?

It seems to me that the increase is utterly indefensible.

* * * I do not propose to go into it, but take the crockery and earthenware schedule, to which my friend, the Senator from Rhode Island, alluded. The increases in that schedule, I was about to say, are appalling. They were too high in the Wilson Act, by far too high, and none of us upon this side attempted to defend them.

Senator Caffery, on page 1267, objected to the duty on borax:

I submit, Mr. President, that this is cutting a little too deep with the tariff knife, even upon a bill which is framed on the scientific lines of the highest protective ideas of the Senator from Rhode Island. One hundred per cent upon such a necessary of life as this, which will enhance the cost of every material into which the mineral enters as a raw material, is excessive, and it is clearly shown by the letter which I have read from this firm in New York that this tariff will produce no revenue whatever, but will cut off importations.

Page 2207:

In a few days, Mr. President, this bill will pass, the evil to be wrought by it will be consummated, and the people of the United States will be treated to such a dose of tariff as was never thrust down them before. This bill carries higher rates than the McKinley law. In a time of profound peace we have a bill in comparison with which the Morrill tariff bill of the war pales into utter insignificance.

Senator Clay, on page 1529, doubting as some do at the present time that the tariff was an issue in the late campaign, said:

Pass this bill and place it upon our statute books and its advocates and those who reap its benefits will come back with renewed energy and demand more protection. This bill will not give relief to the people. I deny that it was the real issue of the last campaign.

Senator Gray, from Delaware, on page 1559, had fears for the lumber business of this country. He said:

We should be no better off if consuming fire had devastated every forest north of the Canada border, and yet that would produce the precise effect that you are seeking to produce by a protective tariff. The world's wealth would be that much decreased, and every man, woman, and child who depends upon lumber for shelter would suffer an appreciable loss, but of course the owners of the timberland would gain, because the price of timber would be increased, and that is what a protective tariff seeks to do. It seeks to do what fire and flood might do, to make a scarcity, as the Senator from Nebraska so well said a while ago, and fill the pockets of those who are fortunate enough to possess the article to be sold.

Senator White, on page 1670, foresaw the tightening of the pouches that contained the Republican campaign funds:

The public knew and know that the party to which the distinguished Senator from Iowa belongs is in power; they knew and know that a tariff bill is going through just as the Republican members of the Finance Committee construct it—everyone knows that—and yet, with this absolute certainty before them, the people of this country do not seem to be overburdened with confidence, money coffers have not opened, industry has not awakened, enterprise remains fettered, poverty stares us in the face. These conditions are more emphatic than ever. The looked-for panacea fails to act. The real remedy will not, in my judgment, be found in this or any other tariff bill.

Senator Allen, Populist, from Nebraska, on page 2789, naturally felt as the Democrats, and so expressed himself:

Every burden in the form of high specific duties, added to which are large ad valorem duties, is imposed upon the industrial classes of our country. The bill is made prohibitory in many of its features. The American market is to be turned over to the American shark; the American commercial highwayman is to sail his black flag of piracy unchecked, and he is to fix the price of everything consumed by the farming and laboring classes of the United States. He has ample liberty under the provisions of this most iniquitous bill to impose prices largely in excess of reasonable profits upon what he may produce or handle.

Again, on page 2827, Senator Jones, of Arkansas, was covered with a sweeping and general cloud of anxiety:

The pending bill is framed on the theory that more taxes will relieve the present distress. It is clear enough if one man or one set of men shall be allowed to levy these taxes on their fellows that the condition of those who are permitted to levy the taxes for their own benefit may be greatly relieved by the enactment of such a law. But what must be the condition of those upon whom such taxes are levied? Bowed already by the burdens of taxation, harassed and distressed by debt and want, those who must submit to the exactions of the favored few will only have their condition made harder and harder by the grinding exactions of this bill. An increase in the cost of nails and glass, wood screws, chinaware, glassware, woolen cloths, and cotton goods may readily swell the fortunes of those who manufacture and sell these articles, but every cent legislated into their pockets by this bill must be taken out of the pockets of the consumers.

Congressman Hunter, of Illinois, on page 93, foresaw in detail every possible ill that might be enumerated on the passage of this measure:

Mr. Chairman, this tariff bill brought in here by the Committee on Ways and Means is infamous. It stands like a highwayman in the road of the American people to prosperity. It is an enemy to legitimate industry, a menace to the ambition and hopes of enterprising people, a crime against labor and agriculture. It is a financial outlaw; it has not one redeeming quality in all of its provisions; they are all bad. It revives imperial ideas of government. It puts a premium upon profligacy and idleness. It brings the venal and vicious into control. It fastens a shoddy nobility upon the country. It forces the earnings of the wealth producer into the pockets of a class who render no consideration. It is a harlot masquerading in the robes of virtue. The sum of all covetousness, avarice, and inordinate greed. It stands without a rival in extortion, and brings reproach upon American character.

It lays the burdens of taxation more heavily upon the farmer and the laborer now than ever before.

It limits the exchange of the farmer's surplus product and reduces the price.

It has no reference to raising the necessary revenue to support the Government.

It enhances the value of the protected article to the home consumer and limits the field of labor.

It compels every laboring man in the country to give more of his earnings for the protected goods and leaves labor on the free list.

Its advocates contend that the more money it takes from the taxpayer the richer they become.

It has created 470 trusts and corporations, whose net income is more than six hundred millions annually.

It violates every principle of honesty and integrity.

Its life is drawn from the polluted blood of avarice.

It is robbery under the forms of law.

It closes the doors of the factories and turns men, women, and children into the street to starve and to die in order to influence and secure legislative favors.

Congressman Bailey, of Texas, on page 2739, brings out that oft-repeated but false statement, in effect, that the "tariff is a tax upon the consumer."

But, Mr. Speaker, we do not rest our opposition to this bill solely upon the ground that it will injure the country by encouraging extravagance and discouraging the production of wealth. We go further than that, and without a moment's hesitation we declare that even if it would add nothing to the expenses of the Government and subtract nothing from the wealth of the country it ought not to pass, because it is intended to enable our manufacturers to charge our consumers increased prices for their goods.

Congressman McMillan, of Tennessee, on page 2747, gives in few words his opinion of the bill:

This Congress was called not to raise revenue but to plunder the people and enrich the manufacturers.

While Congressman J. W. Stokes, of South Carolina, on page 111, again and finally warns the Republican leaders:

Let the Republican Party beware. The fate of the Cleveland dynasty awaits them, as it awaits every party that dares trifle with the verdict of the people at the polls. * * * You may pile up the tariff like Pelion upon Ossa, but it can never bring prosperity to the farmer.

Thus history repeats itself. While our friends on the other side of the Chamber may or may not really mean all that they say, yet we of this side believe that the future prosperity of this country—agriculturally, industrially, and commercially—depends upon the protection afforded under the Republican policy, and, moreover, the prosperity of the world depends as never before upon the prosperity of the United States.

Running on down through the prophecies in regard to the Payne-Aldrich law, uttered by the same men in the same language as those who are now prophesying on the other side of the aisle, telling us what awful things are going to happen to us, foreboding dismal in character and limitless in extent, giving wing to the imagination and hunting up new adjectives so as to amplify their vocabulary to describe the awful condition of industry and the people should we pass the pending tariff measure, we find the same old crowd, the same old arguments, the same old prophecies, the same old Democratic Party, and always followed by the same results.

What did we do? I have read some of these prophecies in order to show what they said was going to happen. But what did happen? I will read you these figures very quickly, for this is one way to catch them without studying.

Exports and imports under the McKinley law: Notwithstanding all they said about the destruction of our foreign commerce, about diminishing exports and imports and dwarfing our trade abroad, let me call attention to these. Listen. In 1891, 1892, 1893, and in 1894 our exports were, respectively, $884,480,810, $1,030,278,148, $847,665,194, and $892,140,572; and our imports were, respectively, $844,916,196, $827,402,462, $866,400,922, and $654,994,622. Why was there a falling off in the last year? Because of the anticipated enactment of a Democratic free-trade tariff law. The decrease in imports shows the effect of that law. It is the easiest thing in the world to explain why. When people over here were out of work, they did not have the money with which to buy; therefore they did not buy anything either abroad or at home. That is all there is to it. It was all brought about because of the theory of cheapness. I have speeches here to show that Democrats have said that we ought to go and buy wherever we can buy the cheapest. The doctrine of cheapness is the most fallacious doctrine that has ever tainted political discussion in this country.

In 1893 we learned, and in 1914 we should have again learned but for the interposition of the war, that a thing is dear at any price when you have not got the price. When our factories were closed and our citizens were out of work and wages were not being paid, we did not have the price. We did not buy at home and we did not buy abroad. It is under those circumstances that our foreign commerce falls off, and not when everybody is at work.

My friends, the thing to consider in this country is production. Production ought to be full and unhindered and unhampered, free always and everywhere. Every line of activity ought to be employed; we ought to develop our natural resources to the limit; we ought to employ our labor to the full, and we ought to take advantage of the vast capital we have to the extreme limit; there should be production every day and everywhere, rife, active, and unhampered always. It is a great economic fact, from which there can be no escape, that if we take care of the producers in the United States, the consumers will take care of themselves, or, as Daniel Webster said on the floor of the Senate so many years ago, "Where there is work for the hand of man there will always be work for his teeth." That is the fundamental economic doctrine which our friends on the other side have in their haste overlooked.

Now, I come to the Dingley law. I have read the prophesies about the Dingley law, because it was in operation longer than was any other tariff law that was ever passed, because it was the highest tariff law that was ever enacted in the history of the country, because it met with more bitter opposition and because it was denounced to a more unlimited degree than any other tariff law ever enacted.

I will read very quickly the exports under the Dingley law, running from 1898 to 1908. Listen: They were, in the respective years of that period, $1,231,000,000, $1,227,000,000, $1,394,000,000, $1,487,000,000, $1,381,000,000, $1,420,000,000, $1,460,000,000, $1,518,000,000, $1,743,000,000, $1,880,000,000, $1,860,000,000, an increase in 10 years of over $600,000,000 in what we sold out of the country, and the exports increased in practically every year. Why? Because all our factories were at work and we were producing more and we had more to sell. Listen to me, Senators. We sold abroad so much that the Democrats finally began to howl at us—and Senators remember the howl—that we were selling abroad cheaper than at home, and there was some trouble caused in the United States because of the acrimonious discussion that arose over it. So much for exports, which, as I have shown, increased more than $600,000,000, notwithstanding the dismal prophecies that we were about to destroy the prosperity of the Republic.

What about imports? Listen: From 1898 to 1908 they were, for the respective years, $616,000,000, $697,000,000, $849,000,000, $823,000,000, $903,000,000, $1,025,000,000, $991,000,000, $1,117,000,000, $1,226,000,000, $1,434,000,000, an increase of $800,000,000 in what we bought abroad under the highest tariff law in the history of the United States, notwithstanding all the dismal prophecies and the doleful forebodings of prophets of evil on the other side of the Chamber.

The total of exports and imports for the respective years when the Dingley law was in force were: $1,847,000,000, $1,924,000,000, $2,244,000,000, $2,310,000,000, $2,285,000,000, $2,445,000,000, $2,451,000,000, $2,636,000,000, $2,970,000,000, $3,315,000,000—an increase in what we bought and what we sold under the highest of all our tariff laws of $1,200,000,000, and that, too, right in the teeth of the dismal prophets, who yet to-day are indulging in the same prophecies; but they are not seeing correct visions; they have distorted imaginations. These evils which they foretell exist only in the heated and perfervid imaginations of free-trade doctrinaires.

Now, what about the Payne-Aldrich law? The Democrats made the same old prophecies and the same old predictions, but the same inevitable results followed. Why need we sit here and pay attention to such prophecies? Why do we not go on and pass this bill? We know what it will do, and we need not be terrified by the false predictions or the fatuous prophecies of those on the other side of the aisle.

What about the Payne-Aldrich law? The exports in 1909, 1910, 1911, 1912, and 1913 were, respectively, $1,663,000,000, $1,744,000,000, $2,049,000,000, $2,204,000,000, $2,465,000,000—an increase of $800,000,000 in exports, and yet they told us that we were destroying our commerce; that we were dwarfing our trade with the peoples of the world.

What about imports? They were for the respective years $1,317,000,000, $1,556,000,000, $1,527,000,000, $1,653,000,000 $1,813,000,000—an increase, my friends, of how much? An increase of $502,000,000 in what we sold abroad, and a total increase of $1,300,000,000 in what we sold and what we bought, notwithstanding this high tariff law, notwithstanding the dismal predictions and doleful prophecies of the opponents of the protective tariff system.

What more need I say about that? My friends, the whole argument on the other side up to this time has been based on the destruction of our foreign trade. We are told that we can not buy if we do not sell. Mr. President, when our factories are all operating, when our labor is all employed, when we are paying wages higher than are paid elsewhere on earth, when our mines are running at full force, when everybody is at work drawing American wages, we can buy more than any other nation on earth, and we do buy, regardless of the tariff, and the people of foreign nations come here and buy because ours is the best market on earth in which to buy. At the same time we preserve our own market for our own producers, first of all, as is shown by the fact that before the war 92 per cent of all we made in the country we sold in the country. Our Democratic friends want to give up 92 per cent in order to increase the 8 per cent. I do not. I want to have an American policy, an American tariff to protect our American labor and our American investments, and to employ our own people in profitable enterprises.

That is the logic of it all, and I am backed up by the successes of Republican tariff laws which have been enacted at various times in the history of the country so that no one can prove otherwise.

I ask unanimous consent at this point to insert in the RECORD the tables from which I have quoted as to the exports and imports under the McKinley, the Dingley, and the Payne-Aldrich Acts, respectively.

The VICE PRESIDENT. Without objection, it is so ordered. The tables referred to are as follows:

The official record of our imports and exports under the McKinley law is as follows:

Year ended June 30.	Exports.	Imports.	Total exports and imports.
1891	$884,480,810	$844,916,196	$1,729,397,006
1892	1,030,278,148	827,402,462	1,857,680,610
1893	847,665,194	866,400,922	1,714,066,116
1894	892,140,572	654,994,622	1,547,135,194

NOTE.—A sharp decline in imports during the last year of the McKinley law was due to the anticipated reduction of the tariff by the Cleveland administration.

The Dingley law was in effect for 11 years, and the record of our foreign trade is as follows:

Year ending June 30—	Exports.	Imports.	Total exports and imports.
1898	$1,231,482,330	$616,049,654	$1,847,531,984
1899	1,227,023,302	697,148,489	1,924,171,791
1900	1,394,483,082	849,941,184	2,244,424,266
1901	1,487,764,991	823,172,165	2,310,937,156

Statistics of foreign trade under the Payne-Aldrich Tariff Act:

Year ended June 30—	Exports.	Imports.	Total exports and imports.
1909	$1,663,011,104	$1,311,920,224	$2,974,931,328
1910	1,744,984,720	1,556,947,430	3,301,932,150
1911	2,049,320,199	1,527,226,105	3,575,546,304
1912	2,204,322,409	1,653,264,934	3,857,587,343
1913	2,465,884,149	1,813,008,234	4,278,892,383

Mr. WATSON of Indiana. Mr. President, I have occupied much more of the time of the Senate than I expected. I intended to take up the subject of foreign tariffs; but my good friend, the Senator from Idaho [Mr. GOODING], who is a protectionist after my own heart, has covered it, and I shall not go into it, although I have here an article prepared on that question. I may refer to it later on.

Mr. President, it has repeatedly been stated on the other side since my friend, the Senator from North Carolina [Mr. SIMMONS], made the statement in his opening speech, that the wages of labor in Germany have increased since 1914. I deny that absolutely. I have here a statement of wages for 1913, compiled from the Statistical Yearbook for the German Empire for 1915, page 91. The wages for December, 1921, are compiled from the publication of the General German Trade Union Federation, March 4, 1922. If I had the time I would go into it here, but I shall ask to have it printed without taking the time of the Senate. It shows, however, what a tremendous reduction in wages has occurred in Germany in key industries from 1914 up to the present time. For instance, the wages of bakers, measured in gold, in 1913 were $6.14 as against $2.52 in 1921.

Mr. McLEAN. Does the Senator mean per week?

Mr. WATSON of Indiana. Yes; the wages per week—an average of $6.14 in 1913 to $2.52 now. Brewery workers—that has a sort of ancient sound—brewery workers, skilled, $7.73 then as against $2.43 now; unskilled, $5.83 then as against $2.39 now; tailors, $11.17 then as against $2.78 now; painters, $14.38 then as against $2.58 now; stonecutters, $17.41 then as against $2.56 now; stonemasons, $17.22 then as against $3 now; bookbinders, $6.69 then as against $2.59 now; printers, $7.71 then as against $2.74 now; joiners, $13 then as against $2.59 now; transport workers, $6.57 then as against $2.30 now.

I had another sheet, which I seem to have mislaid, giving the wages paid in cotton factories and woolen factories and other manufacturing establishments, including dye industries. I do not know where it is, although the Senator from Utah [Mr. SMOOT] perhaps has already placed the figures in the RECORD.

The figures quoted by me are absolutely authentic, and there can be no dispute concerning them. I ask unanimous consent that the table be placed in the RECORD at this point.

The VICE PRESIDENT. Without objection, it is so ordered.

The table referred to is as follows:

Wages in Germany—Rates per week for adult male workers.

Source: The wages for 1913 were compiled from the Statisches Jahrbuch für des Deutsche Reich (Statistical Yearbook for the German Empire, 1915), page 91. The wages for December, 1921, are compiled from the Korrespondenzblatt des Allegemeinen Deutschen Gewerkschaftsbundes (the publication of the General German Trade Union Federation, March 4, 1922) pages 4–18, inclusive.

Mark converted to dollars in 1913, at $0.2382.

Mark converted to dollars in December, 1921, at $0.005223, the average buying rate for the month of December, 1921, for New York cable transfers as reported by the Federal Reserve Board.

Mr. WATSON of Indiana. Mr. President, our Democratic friends and the importers, who are organized and militant as never before in this country, are not the only ones who are inveighing against our tariff system. Foreigners are coming here and telling us how to run our country and how to conduct our Government and what laws we ought to pass, and are interfering, I think, unjustly in our domestic affairs.

Mr. BORAH. They are not confining themselves to the tariff.

Mr. WATSON of Indiana. That is quite true, but the tariff is the question now before us, I will say to my friend. I will call the attention of the Senator from Idaho to the singular fact that those who tried to get us into the League of Nations are the ones who are now trying to defeat this bill—free trade and internationalism combine in opposition to it.

Mr. WATSON of Georgia. Mr. President, what does the Senator think of a member of the British Parliament coming over here and telling us what our foreign policy should be?

Mr. WATSON of Indiana. I am going to refer to that later. I think my friend from Georgia is getting religion, perhaps, and if he shall continue to sit on this side we may inoculate him so that he will see the light. It will take considerable inoculation, but we have the material over here. I desire now to quote from the New York Times of May 11, 1922, a very great newspaper and splendidly edited, and about as fair as a newspaper can be, situated as it is and breathing the atmosphere its editors always breathe—

> The anxiety which European nations feel over the possibilities of a prohibitive American tariff was expressed yesterday by the French and British consuls at this port at a luncheon given by the New York Board of Trade and Transportation to the representatives of 37 Governments. The two consuls said in speeches that by preventing importations we would injure our own export trade.

They talked like Democrats, did they not?

> "It is as much in your interest as in ours that your Government deal fairly with this matter," said Gaston Liebert, consul general for France. "We all hope that the tariff you adopt will not be an insurmountable barrier to imports, and thus, also, to exports.
> "All the European countries are in urgent need of recreating riches, and the only way they can recreate riches is to export to America, which has all the gold, all the riches in the world."

Right at the time these people were paying us this lofty tribute the Senators over on the other side were telling us that we were going into the jaws of destruction and despair.

What has France done, by the way, and why? France was confronted with the problem of reestablishing her industries and compensating the loss in customs revenues due to the depreciation of French currency, and she attempted to secure these objects by a general increase of pre-war customs duties by the use of a system of coefficients, which I shall not go into. Some of the pre-war rates were doubled, and others were increased from five to ten times; so that while France has been increasing her tariff rates and increasing the number of articles upon which those duties are imposed, her consuls over here are telling us that we must not pass this bill, and that we must not put on these high rates, because, if we do, France will not be able to sell to us.

I will go on:

> Lewis E. Bernays, who represented Great Britain in the absence of Consul General Armstrong, said: "Trade to be successful must be interfered with as little as possible."

And right in the teeth of that statement, what did Great Britain do? In the first place, she put an embargo on dyes going into her country, and France put an embargo on dyes, and Italy, to whose ambassador I shall refer in a moment, put an embargo on dyes; and, Senators, what else did Great Britain do? I will break off for a moment and go back.

The most notable instance of increase was the safeguarding of industries act passed by the British Parliament, and which went into effect October 1, 1921. This act imposed customs duties. Listen:

> With a view to the safeguarding of certain special industries and the safeguarding of employment in industries in the United Kingdom against the effects of the depreciation of foreign currencies and the disposal of imported goods at prices below the cost of production.

The duty imposed is 33⅓ per cent, and over 6,000 articles were affected by its provisions; and yet, in the teeth of that act, the representative of that Government comes here to say that we must not pass a high tariff act, for if we do they can not sell to us, and the only way we can have trade with other people is to have it "interfered with just as little as possible."

Why, my fellow citizens, that is a pro-British declaration, and our friends on the other side make these pro-British and pro-English declarations, for free trade is an international proposition. It goes along with internationalism. It goes hand in hand with the League of Nations and all efforts to tear down American nationality and involve us in the broils and the quarrels, indeed, in the industrial disturbances, of the Old World. It is all of one cloth and all of one piece:

> Trade to be successful must be interfered with as little as possible. It is not government aid or support, but the initiative of the individual and his knowledge of his own business, that spells success. In my opinion, prosperity can not return to this world until the artificial barriers to pre-war trade be removed.

Why, that doctrine is as old as Cobden. It has been preached by every British free trader for a long number of years, since they abandoned their protective tariff system; and, my fellow citizens, always there has been British propaganda back of free trade in the United States, just as it is now back of free trade in the United States.

Mr. STANLEY. Mr. President——

The VICE PRESIDENT. Does the Senator from Indiana yield to the Senator from Kentucky?

Mr. WATSON of Indiana. Yes.

Mr. STANLEY. The Senator says this doctrine has been preached by free traders. The Senator is a great scholar. Will he give me the name of any great political economist, speaking the English language on either side of the ocean, who ever controverted that doctrine or ever questioned its wisdom?

Mr. WATSON of Indiana. Why, certainly. British statesmen right along have done it. The Senator from Kentucky on this floor, in answer to my questions within the last 30 days, did not quite do it, but he edged up to it so close that I could not see between him and the edge. What did he say? I said to him: "Does the Senator, then, believe in free trade?" "Well," he said, "I would not say just exactly that." Go get your language and look at it. It was in answer to what the Senator said about the hemp industry in Kentucky, in which the Senator specifically stated that free trade in hemp had devastated the hemp fields of Kentucky. He said it, and I had him repeat it. That is a tribute to his policy. That is just what it always does, but I did not think the Senator would say it. He said free trade had devastated the hemp fields of Kentucky; and then I asked him whether or not he believed in going abroad to buy wherever we could buy the cheapest. He would not quite say that; and then my friend from California [Mr. SHORTRIDGE] pressed the Senator, and I will tell you that these speeches I have read here show that the Democratic Party always has stood for free trade, but you have not the courage of your convictions. If you had, you would propose a tariff on tea, and you would propose a tariff on coffee, and you would propose a tariff on spices, and you would propose a tariff on rubber, and on all those things the like of which we do not produce in the United States; for a tariff of that kind is a tax which is added to the price which the consumer pays, and which goes inevitably into the Treasury. That is your doctrine, and you believe in it, but you have not the courage to put it into practice, or even to attempt it, and so you say you are in favor of a tariff for revenue with incidental protection—incidental "robbery"; incidental "infamy."

Mr. STANLEY. Mr. President——

The VICE PRESIDENT. Does the Senator from Indiana further yield to the Senator from Kentucky?

Mr. WATSON of Indiana. I do.

Mr. STANLEY. If the Senator will again yield, I am not concerned about the bald statement of the Senator from Indiana that I have not the courage of my convictions, because the Senator from Indiana knows better, just as every Senator on this floor who knows anything about my attitude on public questions knows better.

Mr. WATSON of Indiana. Is my friend going to ask me a question, or to make a speech?

Mr. STANLEY. I am going to answer a statement of the Senator's now.

Mr. WATSON of Indiana. Oh, no; I am not going to have that done. If the Senator wants to ask me a question, of course I will yield to him, always.

Mr. STANLEY. I thank the Senator. I do not mean to interrupt his speech, but I was a little surprised at that sort of statement from my genial colleague. I have never hesitated to state where I stood, even upon questions where I knew a majority of my own people were hostile.

I wish to say that the Senator from Indiana has not answered my question. I asked the Senator from Indiana if he knew of any great political economist in Europe or America who had ever controverted the truth of the general principle he had just read. He honored me by saying that I did not stand for those doctrines. It does not matter what gentlemen of the size of the Senator from Indiana or myself think about such matters as that. He has a political organization behind him that wants to get fat out of these industries. I may have a political organization behind me whose opinions I may more or less reflect; but no great scholar who has ever studied the question of international relations, from Adam Smith until now, has ever stood for the patent and palpable heresies that the Senator from Indiana so eloquently espouses, and I defy him to name anyone who has.

Mr. WATSON of Indiana. Does the Senator from Kentucky ask me whether or not any man has ever said he believed in straight protection?

Mr. STANLEY. I asked the Senator to name one great political economist of international note, either in Europe or in America, who had ever advocated the principle of high protection as a correct policy.

Mr. WATSON of Indiana. Why, heavens and earth, where has my friend been all these years!—Rip Van Winkle-like, asleep? The first act that we ever passed in the history of the United States was a protective tariff act. It was passed and signed by George Washington and all the mighty men who had formulated the Constitution, and who builded broad and deep the enduring foundations of the Republic. There was no division of sentiment or opinion among them. From that time down, that was the view of nearly everyone except John C. Calhoun and those who immediately followed him. I do not speak offensively. He was an absolute free trader; and yet John C. Calhoun, in 1824 and again in 1828, stood in the Senate of the United States and, without division of party or sentiment, along with Henry Clay, and along with Andrew Jackson, and along with Daniel Webster, and along with many of those great men, without division of party, voted for the tariffs of 1824 and 1828. What were these men if they were not protectionists? What was Abraham Lincoln? What was Henry Clay, from the Senator's own State, who denominated this to be the American system—and that is what it is—as against the English system? One system has been contending against the other from that day to this. What was James G. Blaine? What was William McKinley? What have been all these great lights among the statesmen of our country and of history, save and except pure, unadulterated, unequivocal protectionists? And we have formulated our bills accordingly. You people got your doctrine from Richard Cobden, and you have been following along that line ever since. It is an economic school in which I do not believe, and with which, as an American, I have no patience.

Mr. STANLEY. Mr. President——

Mr. WATSON of Indiana. Let me go on. I do not want the Senator to make a speech in my time.

Mr. STANLEY. I do not want to make a speech.

Mr. WATSON of Indiana. Yes; the Senator does. My friend always wants to make a speech.

Mr. STANLEY. But the Senator has asked me a question, and I should like an opportunity to answer it.

Mr. WATSON of Indiana. No; I did not ask the Senator a question.

Mr. STANLEY. Yes; the Senator asked me about Henry Clay and all the rest of them. I will tell the Senator; it is short. Neither Henry Clay nor Daniel Webster nor Blaine nor McKinley nor any Republican, alive or dead, nor any Whig or any other man who lived for an hour and deserves to be remembered 15 minutes after his funeral obsequies, ever did defend or ever did excuse the abominations of this tariff; and the Senator knows it, and he will not give me time to tell him so.

Mr. WATSON of Indiana. Mr. President, does not that have a natural sound, after all I have been reading here? It is the same old language, from my gifted friend from Kentucky; but oh, when it comes to decrying the abominations of this tariff and the freezing terror of this law, he will put John C. Calhoun and all those other brethren off the map, telling about the awful things which, in the providence of a gracious God, will never happen here or anywhere else on earth.

Mr. WATSON of Georgia. Mr. President——

The VICE PRESIDENT. Does the Senator from Indiana yield to the Senator from Georgia?

Mr. WATSON of Indiana. I have to yield to a member of the family.

Mr. WATSON of Georgia. How does my genial relative, who so well represents the great State of Indiana, account for the fact that the human race got along without a protective tariff system until the time of Louis XIV?

Mr. WATSON of Indiana. That is very easily answered. We did not get along without it immediately after the Revolution. The American Colonies were all divided up, each with its own tariff law, all subject to English commerce and English exploitation, as the Senator knows. What happened? One of the very objects of the fighting of that war was that we might protect ourselves commercially from those who would prey upon us from abroad, and in order to carry it out the very first act passed was a protective tariff act and it was expressly stated it was a protective tariff. Yet we did not have a protective tariff act in the present-day acceptation of the term until 1824, and again in 1828. Up to 1860 we never had a real, genuine protective tariff, as we now understand that term, and in all those years we had accumulated but $16,000,000,000 of wealth. After 1860, when we began to develop our resources, when we began to diversify our industries, when we began to employ our labor, when we began to invest our capital, and when we began to have an American scale of wages, an American system of living, and an American conception of the regal dignity of every man under the flag, then we began that imperial march which has landed us the industrial and commercial primacy of the world. Does the Senator deny the irresistible logic of that?

That is what we did under the protective tariff system. Nobody disputes it except the doctrinaire who still insists that we ought to go somewhere else to buy because we can buy there cheaper than we do at home. If we permit a product to be brought in from some other country and sold at a price cheaper than that at which we can buy it here, we put out of business the fellow who is making it here; and whenever we do that we close factories, we stop home industry, and we para-

lyze labor. That has been the result every time the Democratic Party has had an opportunity to put its theory into practice, and we do not intend to give them another chance.

Now, I want to go on with these foreign representatives of the Democratic idea.

Mr. STANLEY. Mr. President——

The VICE PRESIDENT. Does the Senator from Indiana yield to the Senator from Kentucky?

Mr. WATSON of Indiana. No; I do not want to yield.

Mr. STANLEY. If my good friend will yield for a statement——

Mr. WATSON of Indiana. Will not the Senator wait a little and let me finish this particular line, because I do not want to break into it?

Mr. STANLEY. I will not interrupt the Senator again. I simply want to correct a statement of the Senator, so that in proceeding he can answer. The Senator misapprehended, I am sure he will find if he will examine the record, my statement with reference to the hemp industry of Kentucky. I said the people of Kentucky would see their fields devastated before they would desert the principles of democracy. No field of Kentucky was ever devasted on account of the people's devotion to democracy, or was ever enriched on account of their devotion to the principles of protection.

Mr. WATSON of Indiana. Now, I want to go on with the discussion of the foreign representatives of the Democratic idea. In thus speaking I do so with entire respect for the accredited representatives of foreign Governments to this country. They are entitled to their opinions, and within certain limits should have the privilege of expressing them, but I for one insist that these gentlemen who come here to represent foreign nations should not undertake to dictate to us what our policy shall be. I remember very well that only a short time ago a gentleman got himself into a little trouble by coming here and advocating the election of the Democratic ticket, and it was very much like unto the existing situation, and is therefore worthy of recollection and repetition.

The letter I am about to read, written from Beverly, Mass., September 13, 1888, followed by an explanation in the New York Times, may be illuminating and throw some light on the existing situation and on the rights of foreigners who are representing their Governments among us. The letter reads:

I am in receipt of your letter of the 4th instant, and beg to say that I fully appreciate the difficulty in which you find yourself in casting your vote.

This was in the midst of the election of 1888, in which Harrison and Cleveland were running against each other. I call the attention of my Democratic friends to this significant statement, for it is as true now as it was then:

You are probably aware that any political party which openly favored the mother country at the present moment would lose popularity, and that the party in power is fully aware of this fact. The party, however, is, I believe, still desirous of maintaining friendly relations with Great Britain.

There never was a shadow of a doubt about that on earth; not only then but now they have been anxious to maintain friendly relations with Great Britain. I read further:

The party, however, is, I believe, still desirous of maintaining friendly relations with Great Britain, and is still as desirous in settling all questions with Canada, which have been unfortunately reopened since the retraction of the treaty by the Republican majority in the Senate and by the President's message, to which you allude. All allowances must, therefore, be made for the political situation as regards the presidential election thus created. It is, however, impossible to predict the course which President Cleveland may pursue in the matter of retaliation should he be elected, but there is every reason to believe that, while upholding the position he has taken, he will manifest a spirit of conciliation in dealing with the question involved in his message. I inclose an article from the New York Times of August 22 and remain,

Yours faithfully, L. S. SACKVILLE WEST.

Then follows this item from the New York Times, then, as now, advocating this pro-British doctrine in America:

There is this further consideration in favor of supporting the administration on this issue. It will leave the question still open for friendly means of settlement of some kind, while a support of the Senate's position would close all avenues of future negotiations and bring upon the country the disastrous consequences of retaliation, hostility, and possible war. It would put an end to all prospect of improving the commercial relations of the United States and Canada. This is one of the questions which the people will keep in mind in casting their votes next November.

What happened to Sackville West? He was immediately recalled by the direct action of Grover Cleveland, the President of the United States. But times have changed. The spirit of internationalism is abroad in the land. The League of Nations has been discussed. Tremendous efforts have been made to drag us into all the entanglements and all the broils of Europe, and if it can not be done politically in one way, there are thousands of people in the United States, including certain papers in New York, which intend to do it in another way, and if they can not get us immediately, as a national unit, into all their political entanglements and involvements, they intend to have free trade, as nearly as possible, and to send their representatives over here to inculcate that doctrine among our people and among our citizens. These men have the right to express themselves in their own countries, but I deny the right of the representative of any foreign government, accredited to represent his people here, to come within the confines of the United States and instruct us as to what course we shall pursue with reference to the policies of our Government.

Let me go on. This is a special to the Washington Post:

The Italian ambassador, Vittori Rolandi Ricci, asked to explain the attitude of discrimination against American goods embodied in the tariff legislation of his Government which has been in effect since August, and which proposed legislation threatens to make still more discriminatory, said:

"In accordance with the policy long since adopted by several of the principal countries of the world, including the United States, the Italian Government was obliged to increase the schedule of import duties upon many items.

"The increase in customs duties generally was not very high. Nevertheless, if the campaign of the American agriculturists (the farm bloc) carried on for a high protective tariff on the few olives and lemons which they supply for home consumption is forwarded, and as a result the tariff raised, the Italian Government will be obliged to augment further the duty on American agricultural products imported by Italy.

"It is obvious that if you will prevent us from selling you those products which are natural to our country, we shall not be able to purchase; besides, if we had those means at our disposal we would logically rather spend them in another country which would not bar the opportunity of selling our products."

In other words, that is a threat that if we put up the tariff and do not buy of them they will cease to buy of us. They buy of us now because they have to buy of us, and we will continue to sell to them just as they need our products and just as we have been selling. As I have explained here in language unmistakable, and in figures irrefutable, there is no alteration of the currents of trade by the imposition of a tariff duty. All the figures show it, and there is no one to stand and challenge it in the light of the history of the past.

When our Italian friends came here in unnumbered hundreds of thousands from Italy, why did they come? They came in part to stand under the protecting shadow of the American flag and to be benefited by the freedom which it guarantees. But in part they came to enjoy the prosperity of the United States. They came to share in the good things we have so abundantly bestowed upon us in this Republic, and they were all welcomed. The gates of Castle Garden always swing inward; they never swing outward; and they swing inward because of the prosperity of the American people, prosperity made possible by continued protective tariff enactments, and these people are here to enjoy the blessings and the benefits which always come from such a beneficent policy.

We welcome them here, and I know that no Italian in the United States can best secure his job or best increase his wages by having more imports from his country to compete with what he produces in the United States, nor can any other man laboring in this country under our flag best increase his opportunity or enhance his wages by bringing a larger flood of imports from abroad, thereby depriving him of the right to earn his bread in the sweat of his honest face.

We have no objection to these people expressing their honest views, but we have objection to them trying to dictate the policies of the United States, so long as they are accredited here as the representatives of their nation. Suppose Colonel Harvey should get up in London and tell them they had to pass a tariff bill, or tell them they had to do something, or we would not do business with them. He would not last long over there, would he? They would send him home, and they ought to do it. It is not his business to go over there and dictate the policy of any European government. It is not theirs to comes here and dictate ours. This is an American policy, this is an American Government, and it is to be dictated to only by the sovereign voice of the American people.

I have other quotations from the speeches of the ambassador, but I shall not read them. He further inveighed against our policy of immigration, but I shall not take the time to read what he said about that. He also attacked the policy of prohibition. Whatever anyone may think about it, it is our policy; we made it; we are responsible for it. While it is the law we ought to enforce it. If we do not like the law, let us repeal it or modify it. So we would do if the great majority of the American people thus believed, but I do not think they yet do believe that way, and I hope they never will, speaking for myself.

Sir Auckland Geddes, the very able and distinguished ambassador from England, made a speech in March in which he said:

CHICAGO, March 12.—With America holding two-thirds of the supply of gold in the world, American business can no longer look for cash payments for exports to England, according to Sir Auckland Geddes, British ambassador to the United States.

This is from an Associated Press report published in the morning papers of March 13, 1922:

America must find a means whereby cash payments would not be required or she will face complete loss of her English export trade, now "dwindling because there is no money in England," Sir Auckland says.

Reciprocal trading between England and the United States was one solution of credit men here Saturday. Sir Auckland also suggested that American business use British service, such as insurance and the use of English ships, as a means of solving the problem of diminishing exports, which he attributed almost wholly to the lack of cash in England.

We must not have an American merchant marine, must not have a merchant marine on this side. Who said so? The British ambassador. We must use British ships, we must employ the British merchant marine to do our carrying. This mighty Nation, situated as it is between the two imperial seas of the world, ought to have the carrying trade of the earth and bear American commerce in American ships, built by American laboring men, investing American capital, and flying always the American flag. Is not that the right policy for the United States? Oh, but our friend from abroad says no; we must use British ships; we must not have an American merchant marine, or they will not trade with us.

"The question for America to decide," Geddes said, "is whether she wants to open the country for trade or throw up a barrier."

Now, Mr. President, he is a very great man, a very capable representative of a mighty people, and yet I think is going entirely outside the bounds of propriety in attempting to dictate the policy of this mightiest of nations in the recorded history of time.

I might go on and show the articles that have been written by Nevinson, Gibbs, Gardiner, Repington, and many other British publicists and writers, writing articles for newspapers and magazines every day in the United States, exploiting this British doctrine and inveighing in caustic terms and unmitigated fashion against the protective-tariff doctrine. There you have it. It is the American doctrine as against the British. It is our idea as to what we shall do with our own Government as against the interference of all other Governments. I desire as one Senator to resent interference from abroad in our domestic affairs.

They get happy over there when the Democrats are in power. We all remember the letter written by Ambassador Page to Woodrow Wilson when they passed the Underwood-Simmons law, the lowest tariff law by odds in the history of the Nation, with but 6½ per cent on the average on imports. What would happen to us now or in the future when those countries are resuscitated and rehabilitated and get on their feet commercially and industrially if we had a 6½ per cent tariff? I shall not stop to describe, because we are not going to have it.

The Senate is determined on it, this Congress is determined on it, and our President is determined on it. The American people have so decided, and we intend to listen to that voice and to pass this tariff bill.

Ambassador Page said:

I can assure you emphatically that the tariff act does command their respect and is already having an amazing influence on their opinion of our Government.

He wrote that to Woodrow Wilson, President of the United States. He was our ambassador to England. He said that it was having an amazing influence on their opinion of our Government. Well, it had an amazing influence on our opinion of our own Government—not the Government, but the acts that were passed and the destruction it brought, because everybody knows that by 1914, when the war intervened, we were headed directly for catastrophe, just like all previous low tariff laws had produced in the United States. There is no question about it in the world that the interposition of the World War saved us from that disaster. What else did Mr. Page say?

Lord Mersey, a distinguished law lord and a fine old fellow, of the very best type of Englishman, said to me last Sunday: "I wish to thank you for stopping halfway in reducing your tariff; that will only half ruin us."

We have not any desire to ruin them. That is not our object. But old St. Paul said, "He that careth not for his own household is worse than an infidel," and we do not intend to rest under that charge. We are going to look after our own people and care for our own household, and no one need be alarmed about dwarfing our influence or diminishing the estimate in which we are held by the people of the world.

Mr. President, we have gone through trials and tribulations to the present time. We went through a war which saved us from the disastrous effects of the Democratic tariff. We have come safely through it and new conditions now confront us. These new conditions are exaggerated beyond anything that ever existed before the war. Wages abroad are lower than ever before and wages here are higher than ever before.

So far as the great markets of the United States are concerned, the cities of Germany are closer to them than our own western cities. They are practically side by side. How can our Democratic friends expect to employ our laboring people in our factories and pay the wages we are now paying when precisely the things we are making in our factories come in from all their factories in competition with what we produce, made by men who get one-tenth to one-fifth what we pay our men? It is an utter impossibility.

It is just like having a factory in Ohio and one in Indiana, running side by side, making the same thing, and paying five times the wages in one that were paid in the other. It could not be done. It is utterly impossible, and nobody but our Democratic friends, skilled in argumentation along theoretical lines, would expect such an impossible thing to occur.

So, my friends, notwithstanding the many difficulties that surround us and the obstacles that have beset us, we propose to pass this bill. Like Grant said, we intend to fight it out on this line if it takes all summer—not only all summer, but until the snow flies. The Democrats will not endeavor to prevent its passage until after election. Oh, no; they would then be playing into our hands. They want to pass it just before election. They want to do with this bill just like they did with the McKinley law, and we do not intend that they shall do it if we can help it, and if we can not help it we intend to stay here and fight along this protective tariff line to the very last, because we believe it to be absolutely essential to the prosperity of our country and to the greatness of our land.

Mr. SIMMONS. Mr. President, it is always delightful to listen to our genial, talented, and truly eloquent friend from Indiana [Mr. WATSON]. I know of no man who possesses greater gifts of speech than the Senator from Indiana, and when he has taken time for preparation he is, of course, entertaining.

It is not my purpose to undertake now a general answer to the speech which the Senator has made. To speak the truth, there was so little of the speech that related to the bill, or had any pertinence to the questions we have been discussing here now for five or six weeks, that it does not really require any answer unless it were desirable to enter into an academic discussion of the differences between Democratic theory of the tariff and the Republican theory of the tariff. Most of the Senator's speech might be characterized as graveyard matter. It is something like the discussions that have taken place upon the hustings during the past half century with reference to the merits of the protective tariff system as compared with the low tariff principles advocated by the Democratic Party.

Practically no attention was paid by the Senator to the real issue raised by the bill, and which has been raised in the discussions which have taken place in the Chamber up to this time. I should say, making a rough calculation, that not 10 per cent of the time which the Senator consumed here this morning had anything to do with the bill, or with the real issue that grows out of the bill, or with the contentions that are being made here from time to time by the representatives of the two sides of the controversy.

The Senator did, however, in the beginning of his speech undertake to defend the committee for the time it has consumed in bringing before the Senate this pressing question—pressing from their standpoint—and the time that has been consumed by them since in its defense.

In the first place he tries to justify the committees of the two Houses for delaying a measure which the Republicans promised in their platform should be immediately passed if the Republican Party should be given control of all branches of the Government. He has one excuse after another for these delays. "Other matters had to be considered," he said, "besides the tariff, and therefore we were longer in preparing our tariff measure than usual." Well, always in making tariff measures in committee other things are being discussed in the Senate and in the House, but the fact that other bills have to be enacted into law contemporaneously with this is no excuse for the delay.

There was a distinct promise to the people of the country on the part of the now dominant party that the tariff should be passed speedily upon its coming into power, and it was estimated that it would only require a month or two to enact it into law. Instead of that we find that 18 months and more have elapsed since the Republican Party came into power in all branches of the Government and the tariff bill has not yet been passed. It has been argued that since it came in here we have been responsible for the delays. But who is responsible for the delay of a year and a half before it got here? What was the trouble with the Republican Party that it could not carry out its promise to speedily bring in the tariff bill?

It was because the Republican Party was not in harmony upon this question. It was because one element of the Republican Party was seeking to frame a tariff especially in the interest of 4,000 members of the big industries of the country and another part of the Republican Party was demanding a tariff in the interest of the people. There was no progress made, Mr. President, until the two wings of the Republican Party got together upon a logrolling proposition and united in an agreement to divide the spoils of protection. This bill would have been in committee yet, in all probability, but for that. That is the secret of the delay, and this mongrel and unnatural measure is the kind of bill that has emerged as the result of the "harmony" that was at last restored in the Republican ranks.

The Republicans finally brought out a bill that imposes taxes amounting in the aggregate, when the increase of prices resulting from these taxes is taken into consideration, to three billion or four billion dollars, or practically as much as we collect from the people through the internal taxes which we impose. They have brought us out a bill, I say, to impose those taxes upon the many millions of the people of the United States, embracing the laboring man, the farmers, the clerks, and the salaried men, whose returns upon their investments are not 2 per cent a year. Certainly it is true with reference to the farmers that the net income upon their investment is not 2 per cent a year, and 50,000,000 of farmers will have to pay one-half of this $4,000,000,000 of additional taxes. To whom? The pitiable sum of $300,000,000 to the Government and the balance to about 4,000 manufacturers and profiteers in the country, who are making incomes ranging from 10, 20, 30, 40, 50, to 100 per cent upon their investments.

I say the bill never could have been brought out if a trade had not been consummated by which it was sought—and I am afraid it was accomplished—to purchase the support of the element which stands usually for the 50 per cent who have to pay half of these taxes and who make only 2 per cent on their investment. The bill was brought about by promising that there would be given to a few of the farmers of this country certain benefits upon the particular products which they produced as a compensation and a consideration for their representatives yielding their position and agreeing to support a measure framed in the special interest of 4,000 people who are making exorbitant profits as against the millions who are making practically no profits. That is the reason why in the committee there was such great delay in the consideration of the bill.

I am not speaking now of the delay that took place while the bill was in its formative stage in the other House or while it was going through the process of hearings before the Senate committee, with a view to its revision and rewriting; I am not speaking about that; that necessarily occupied a good deal of time. I am speaking about the time that was taken in the Senate Finance Committee room considering the measure and framing the 2,000 amendments which we are now discussing, and which I shall show before I get through are just as far removed from the principle of protection about which the Senator from Indiana [Mr. WATSON] has been talking so much as is the earth from Mars. There is involved in this bill no principle of protection, as that principle has heretofore been understood by any man or party in the discussion of the question.

It took the Republicans how many months, Mr. President, to report the bill? It took them three months to make these 2,000 changes. Let me say in passing that no other tariff bill with which I have had anything to do—and I have had to do with all that have been passed here during the past quarter of a century—has had more than 400 or 500 amendments put on it. This one has had over 2,000 amendments attached to it; and it took the committee approximately three months to draft them. Why? The Senator from Indiana said it was because conditions here and abroad, throughout the world, were so upset and upturned and chaotic and disorganized that the committee had to go back to the fundamentals; that they had to take up and consider all sorts of questions in connection with the framing of these amendments.

Mr. President, the very debates which we have had here show that that was not the cause. The rates in the pending bill were not fixed upon any rule; they were not framed upon any measurement of the amount of protection to which the industries were entitled. Nobody can successfully contend that they were. They were made by a sort of a haphazard, a guess, the committee generally guessing that what the seeker for protection desired was the correct rate to which he was entitled.

The Senator from Indiana says that his side of the Chamber did not discuss these questions. Mr. President, when they did undertake to discuss them, after they were forced to do so, they clearly showed that they had never analyzed the basis which should support any rate of tariff taxation, and they showed an utter lack of knowledge, an utter want, I will say, of information as to questions which have heretofore been considered absolutely essential to the framing of a tariff law. So they were not really engaged there in the work of finding out the facts which should be obtained in order to levy rates upon the protective principle at all, but their discussions here and the debate as it has been developed show that they had no knowledge of and were not in possession of any information as to these matters.

What were they doing, Mr. President, in those secret sessions for three months, with the corridors outside swarming with the seekers of favors from the Government, with these suppliants for subsidies and bulldozers of bounties from the Government, with these pleaders for privilege in taxing the masses of the people of the country for their own special benefit and profit? They sat there conferring with one of these representatives and then with another, getting their views and hearing their demands as to what they wanted.

It took them frequently a long time to reconcile the views of the members of the committee with the views of these seekers of bounties from the Government, and they never would, as I have heretofore stated, have been able to bring about a reconciliation except for the logrolling scheme to which they finally resorted in order to enable these seekers for special privilege to get all that they asked; and all that they asked is so far above what they are entitled to upon any principle of protection that I say the duties imposed by this bill bear no resemblance to the principle of protection and are as far removed from the principle of protection as is the earth from Mars.

What is the use, therefore, of the Senator from Indiana consuming two hours of time—precious time from his viewpoint, because from his viewpoint it is extremely desirable that this proposed legislation shall be enacted speedily and shall be put upon the statute book so that it may demonstrate its virtues (?) before election day—when nine-tenths of his two and a half hours' speech this morning was consumed in discussing things that have absolutely no pertinence to the question which is under consideration?

Mr. President, with the exception of a few hidebound Republican Party organs, organization newspapers, newspapers partisan under all circumstances and all conditions, there comes from outside of this Chamber, from every impartial source throughout the country, including the disinterested manufacturer—for there are a great many of them who do not participate in this drive against the pocketbooks of the American people—from the press throughout the country, without reference to whether it is Republican or Democratic or independent or nonpartisan or religious or agricultural, trade or commercial, not a voice of protest against the discussion of the pending bill. With the exception of the little clique of partisan newspapers there comes not a single charge that the discussion on the part of the Democrats is filibustering, but, on the contrary, there comes a chorus from every part of the country and from all sources of public information in this country highly commending this discussion, saying it is enlightening to the people, that it is doing good, and if the bill is to pass without further amendment—material, radical amendment—of the taxes it imposes, the discussion ought to continue until the bill shall be defeated, even if it takes a year or two years to accomplish that great end.

I am not speaking loosely; I am measuring my words. I ask the Senator from Indiana to point me to any complaint against the discussions that are taking place here upon this floor upon this bill, outside, as I say, of the small clique of bitterly partisan journals. I ask him to go to the files of the metropolitan press, to start with the great Republican organs—papers that have heretofore stood shoulder to shoulder with the Republican Party in all of its efforts to establish the protective system in this country—go to them first, then go to the independent press of this country, the great metropolitan independent papers, the small journals of the cities of ten to fifty thousand people scattered throughout the country; let him take the dailies of his own party, the independent dailies, and the dailies of the Democratic Party, and I ask him after he shall have done that to come here and file a list of the great papers in this country, exponents of public opinion that are entitled to respect and that have the confidence and respect of their readers, and point out those who are criticizing and who have criticized this debate.

Mr. President, has it been solely in the interest of party politics, as they claim? What has been the fruit of this discussion? I would better ask that question of the Senator from North Dakota [Mr. MCCUMBER], who has charge of the bill,

than of anybody else, I reckon. I should like to have him get up here and state to the Senate how many of these rates, in these daily morning executive sessions that the committee holds from 10 o'clock until 11 o'clock, he has reduced from 10 to 25 or 30 or even, as to some of them, as much as 50 per cent because of the disclosures and the discussions that have been taking place upon this floor, and let him tell the Senate how many of the amendments to the schedules that we have already discussed he has taken back to the committee, and with reference to which it is now considering radical reductions in the rates because the discussions have shown that the taxes he proposed would be oppressive and unjust to the people of the United States.

Mr. POMERENE. Mr. President, the Senator has made a very valuable suggestion, and I wondered if he had a memorandum of the number.

Mr. SIMMONS. I have not made it. I thought the Senator from North Dakota could better make it.

Mr. President, only last Saturday about 12 paragraphs of the metal schedule were passed over, after we had been discussing items, both before and after that, in the same general classification and category. There were 12 items, I think, that were to be looked after by a Senator who happened to be sick the day they were passed over. When on Saturday I suggested to the Senator from North Dakota that we should take them up, as they were then in order, and should dispose of them, he advised me that the committee intended to bring in amendments, material amendments, to every one of those paragraphs that had been passed over.

Mr. JONES of New Mexico. Mr. President——

Mr. SIMMONS. Will the Senator just let me finish this? Not only that, Mr. President, but day after day Republican Senators on the other side are giving the committee to understand that in the light of these discussions that have brought out the iniquity of these rates the committee can not rely upon them for their support unless the committee do reduce these rates, and radically reduce them. That group was led by the Senator from Iowa [Mr. CUMMINS] a day or two ago in a very notable speech in this body.

I yield to the Senator from New Mexico.

Mr. JONES of New Mexico. Mr. President, I just wanted to call attention to a statement by the chairman of the committee in corroboration of what the Senator has just said. On June 1, when we took up the tariff bill, the chairman of the committee stated:

> I desire to suggest several committee changes in the paragraph. It is the paragraph that relates to cylinder, crown, and sheet glass, generally known as window glass, and that character of glass.
>
> I wish to say at this time that the committee in its first hearings gave so much time to the paragraphs of the bill on which there were contests that it may be that in some instances where there was no contest it did not give the consideration that ought to have been given to the amendment of some of the House provisions. It was understood that the committee should be in session every morning for the purpose of looking further into any of these matters as they arose.
>
> The committe has carefully gone over paragraph 219 and will suggest an amendment to each one of these rates, with the exception of the first one.

And then he proceeded to enumerate a number of changes, clearly stating, as I interpret his language, that they brought in here a bill which was not even digested in the committee itself.

Mr. SIMMONS. After three months' work on it.

Mr. JONES of New Mexico. After three months' work; and they expect us and the Senate to accept such work as that without investigation or discussion.

Mr. SIMMONS. Mr. President, I think it is not venturing too much to say that in the light of the exposures—for you can not call it anything else—that have resulted from these discussions, it would have been absolutely impossible to pass this bill through the Senate, even with the logrolling agreement that has been entered into, unless very material reductions were made all along the line.

Mr. President, we have not yet quite finished the third schedule. We are just coming to that part of the bill which, to my mind, is most monstrous of all the unthinkable propositions in the bill. I think, as we go along, that the recklessness of the committee in writing these exorbitant taxes against the people into this bill will be made more and more apparent and glaring, and that before we get through with it, unless the bill shall be practically rewritten in these secret morning sessions of the committee, there will be such a revolt, such an uprising, such an outcry, such a denunciation from one end of the country to the other, irrespective of party, that the majority Members will hardly dare to ask its enactment, and will be glad of an opportunity to drop it, and say it was killed by "the filibustering tactics of the Democratic Party."

Mr. President, if there is any filibustering, they are doing their part of it now, and it may be that that is the reason—that they have discovered that the thing is so bad that it can not be repaired, it can not be remedied, and the best thing to do is to join this side in a whole-hearted discussion of all of these items, and take up time, and finally let the bill fail, either here or in conference, and then say that "the Democrats filibustered" to such an extent that they were not able to get it through in time to have it become a law during this session of the Congress.

Mr. President, I am talking in a practical way. I am not dealing in pyrotechnics. I am not dealing in graveyard stuff. I am not talking of the academic discussions of 15 or 20 or 25 years ago. I am talking about this bill—the thing they now propose to enact into law. That is what we have been trying to get the Republicans to talk about; but whenever we ask them to talk about this bill they begin to talk about protection and the American laborer, and make the same hackneyed speeches we heard so much 25 years ago. Before I get through I want to throw some light upon what they are doing for the American laborer as compared with what they are doing for the American millionaire and the American magnate of the tariff—the American trusts and monopolies.

The Senator read from a great many speeches that were delivered in past times. I think he went back as far as John C. Calhoun and reviewed the discussions then, and then he followed them up and reviewed the discussions up to the passage of the latest tariff act on the part of the Democrats and on the part of the Republicans, discussions of the great fundamental principles underlying the differences in the thoughts and the policies of the Democratic and the Republican Parties upon the great question of tariff taxation. He said that we were hearing the same old thing here in this Chamber that was echoed and reechoed in these speeches of bygone years. Mr. President, there has not been on this side of the Chamber a single academic discussion of the question of protection or of free trade or of revenue tariff, and no such discussion has been made on the other side of the Chamber except by the junior Senator from Idaho [Mr. GOODING]. The other discussions here have related to this particular bill and have been closely confined to this bill.

The Senator says we are making prophecies, and that we have made these prophecies before, and that they have all vanished into thin air when election day came. Mr. President, I think the Senator forgot recent history. He forgot the only Republican tariff bill that has ever been passed that bore any relationship whatever to this one. That one did have some regard for the protective principle. This has none. That one was based on some thought and some information as to the underlying principles of protection. This has not. That bill carried a rate of forty-odd per cent. This bill carries a rate at least 50 per cent higher than that did, and it is laid in such a way that it is at least an additional 50 per cent more oppressive than that bill was.

The Senator says that that bill brought great prosperity to the country, and he read figures of imports and exports in millions and billions until the Chamber reeked with his figures, showing the wonderful development that had resulted from the Payne-Aldrich tariff and the other Republican tariffs, and the great advance that we have made in world trade, all called to a halt as the result of the passage of the Underwood bill.

Mr. President, he forgot the fact that our balance of trade during the first year under the Underwood law was 18 per cent, as compared with 4 per cent under the Payne-Aldrich law. He forgot the fact that in 1921, the only other normal year—for 1921 was a normal year, so far as foreign trade was concerned—under the Underwood rates our balance of trade, for that single year, was as much as our balance of trade during the four long years under the Payne-Aldrich law. He did not tell us about that in his rhetorical and eloquent flourishes about the great benefits of a protective tariff. He thinks that nothing built up this country but a protective tariff. He thinks there has been no development in the world during the past quarter of a century except in America. The figures which are known of all men who study history show the contrary. During that period we may have led the procession, but there are other countries which have come tramping pretty close upon our heels in development and progress, economically, financially, and industrially.

When he spoke of our prophecies with reference to the effect of the enactment of this iniquitous Republican measure now made as being like those which have been made in the past, I am compelled to think the Senator has suffered a lapse of memory. He could not have had his mind upon what happened in this very Chamber in 1909. I was here. I wish the Senator

could have heard, as I heard, the eloquent onslaughts of the great Senator from Iowa, the eloquent and masterful Dolliver, when, day after day, he leveled broadsides against the Payne-Aldrich bill, just as we are leveling them against this bill.

I wish he could have been here and could have heard the eloquent and practical present senior Senator from Iowa [Mr. CUMMINS], who sits just across the aisle from me, when he, together with his great colleague, led the forces against the Payne-Aldrich bill, and predicted dire disaster to the Republican Party if that measure were adopted.

Has the Senator from Indiana forgotten those prophecies? Has the memory of the Senator from Indiana so far lapsed that he has forgotten the consequences of the Senate and the Congress refusing to take the admonition and warning of the two great Senators from Iowa? Has he forgotten that? Upon what issue were the campaigns of 1910 and 1912 fought out? They were fought out upon the issue of the tariff rates in the Payne-Aldrich bill. That was the issue in 1910 and in 1912, and what was the result in both of those years of a contest in which that question was put to the test, and the people were allowed to pass upon the facts that called forth these prophecies of the two great Senators from Iowa, reinforced by a few other great Senators on the other side, as well as on this side of the Chamber? In both of those contests the result was most disastrous to the Republican Party, reversing its control of the House and the Senate in the one campaign, and when it came to a direct question of electing a President upon that issue the Republicans carried but two little States in this Union.

Yet the Senator says that our prophecies are vain, and that he is not concerning himself about them in the least. If he is not concerning himself about them, the leaders of his party outside of this Chamber are concerning themselves about them very much, and I think before we get through with this business we shall find that everybody on the other side of the Chamber, including the eloquent Senator from Indiana, will be concerning themselves about it, and doing everything they can to take the back track, and to try to placate the wrath and indignation of the American people.

Mr. President, away back yonder in the days of William McKinley, the greatest apostle of protection this country has seen, but a man who looked at protection from the standpoint of national welfare and sanity—William McKinley foresaw, as all the great protectionists of that day foresaw, that the only way the protective principle could possibly be preserved, and the only justification, in fact, for its existence and application, was through domestic competition in the products of the country.

When the argument was made that the duties asked would practically shut out foreign importations or greatly restrict foreign importations and thereby affect competition at home, we were assured that prices would not be increased. We were assured by these gentlemen, these first expounders of the doctrine of protection, these great apostles of the doctrine of protection, when it was probably in its swaddling clothes in this country, that there would be no increases in domestic prices as the result of the enactment of a protective policy; that, on the other hand, as soon as we should begin to produce the product in this country to a point anything like the demand of the country, the domestic competition would be so keen that it would keep down prices, and that instead of the exclusion of foreign products advancing prices, it would result in a reduction of prices.

Mr. President, you yourself are a great protectionist [Mr. FRELINGHUYSEN in the chair]. I want to ask you if that was not the plea of protectionists, put forward when this principle was first advanced and urged upon the American people? We then said, "No; we want competition. We are entitled to competition. If you keep out the foreigner, you will simply increase the price." They said, "No; the domestic competition will take care of that."

I know Senators on the other side of the Chamber all deserted when I began to reply to the forensic and sophomoric speech of the Senator from Indiana; they have all departed from the Chamber. They will not hear argument; they will not listen to facts. I want to ask them nevertheless if they would be in favor of protection if it were certified that there would be no competition in the domestic market between domestic producers and that the prices of products would be fixed by the producers in combination and agreement and always fixed as high as the tariff would bear?

Mr. WATSON of Georgia. Mr. President——

Mr. SIMMONS. If they would go before the people and say that to-morrow, I guarantee you that they would not get 5 per cent of the votes of the American people in the next election. I shall now proceed to show that that very condition will inevitably arise as the result of the adoption of the rates carried in this bill.

Mr. WATSON of Georgia. Mr. President——

The PRESIDING OFFICER (Mr. FRELINGHUYSEN in the chair). Does the Senator from North Carolina yield to the Senator from Georgia?

Mr. SIMMONS. I yield to the Senator from Georgia with great pleasure.

Mr. WATSON of Georgia. Now that it has been boldy proclaimed that the purpose of these Republican tariff bills is to put profits into the business of one branch of American industry, namely, the manufacturers, does not the Senator from North Carolina, as a great lawyer, believe that any taxpayer in America could enjoin the enforcement of these rates?

Mr. SIMMONS. Mr. President, I would not say that, in view of the decision of the Supreme Court with reference to the unlimited power of Congress in imposing this class of taxation. But for that I should say undoubtedly that the Senator's question should be answered in the affirmative.

I am seeking to answer the Senator from Indiana by a practical discussion of this particular bill. I do not want to deal with the dead past as the Senator from Indiana did; I am dealing with the present. This bill is not going to tax people who are dead and in their graves; it is going to tax the 110,000,000 people who are living here to-day. It is going to tax them whether they are making 1 per cent profit or 2 per cent profit, and more than half of them are not making more than 2 per cent profit. It is going to tax them from 30 to 40 per cent, sometimes as high as 100 per cent, and I can point out cases where it will tax them 150 per cent for the benefit of four or five thousand especially favored people in this country who are making profits upon what they produce all the way from 10 to 100 per cent.

I said a little while ago that the protective principle was based upon the theory that prices would not be enhanced by reason of the exclusion of the foreign product; that domestic competition would protect the people; that that competition would keep the prices down, and that therefore the consumer need not be in fear because of these duties. If that had not been advanced as a reason why the people would not eternally have to pay these high rates of duty, the protective principle never could have been engrafted upon our economic system. What has happened? I want to show that what has happened in the United States since that time has made the protective principle, as understood by McKinley and Blaine and Dingley, absolutely impossible of fair application to America.

Is there any domestic competition in this country to-day? In 90 per cent of all the products of this country, outside of farm products, is there any competition in this country to-day between the producers? Can anyone name any great industry in this country to-day that is not absolutely dominated either by a trust or by some agreement that is tantamount to a trust in its effect upon competition?

In the Lockwood investigation Mr. Untermyer took the testimony upon the glass schedule in the hearings before the Finance Committee, and from that testimony showed conclusively that there was an understanding and agreement that fixed the price as to practically all glassware products of this country. He showed that there were three great associations, and that there was another sort of holding association composed of elected or selected members from those three great glassware associations. This holding company, so to speak, this association composed of the representatives of the three great glassware associations, fixed the prices and the terms and conditions under which the product was sold, thereby eliminating every vestige of competition.

The following is from the New York Times concerning the glass combine:

[From the New York Times, May 21, 1921.]

GLASS COMBINE PUT PRICES UP 400 PER CENT—LOCKWOOD INQUIRY REVEALS AN ENORMOUS INCREASE, MOSTLY SINCE THE ARMISTICE—RULED BY THREE ASSOCIATIONS—PLANNED TO CREATE AN ARTIFICIAL SCARCITY IN COMMODITY BY SHUTTING DOWN PLANTS—PARQUET FLOORING BOOST—PRICES QUADRUPLED IN FOUR YEARS, BUT RISE WAS CHECKED BY HOUSING INQUIRY.

A combine of glass manufacturers controlling practically $350,000,000 worth of window, plate, and rough glass annually has increased prices 400 per cent since 1915, according to evidence bared before the Lockwood committee yesterday. The signing of the armistice and the relaxation of Federal supervision on industry was followed by a rise in prices of 250 per cent for the year from the end of 1918 to the end of 1919. Prices increased 150 per cent from 1915 to 1918.

The combine consists of three national associations, known as the National Association of Window Glass Manufacturers, with headquarters in Pittsburgh; the Plate Glass Manufacturers of America, with offices in the same building; and the Association of Manufacturers of Rough Glass. The national associations are allied through membership in the National Glass Distributing Association, the organization of

jobbers, which covers the United States and which is divided into the Eastern Association and the Western Association. The jobbers handle the output of the manufacturers.

The evidence revealed by Samuel Untermyer and George R. Brennan, his assistant, showed that the glass manufacturers kept a strict supervision of the amount of glass manufactured, arranged a "quota" of the product to be manufactured by each member, fixed uniform prices, and had the factories shut down when the "quota" was obtained.

A circular sent to the trade of J. R. Johnston, secretary of the National Association of Window Glass Manufacturers, stated that many factories would complete their "quota" before the first week in May and some reported that they would have their "quota" in 12 weeks instead of 15 or 16 weeks. When the 16 weeks elapsed the furnaces were "blown out" and the workmen laid off.

Take any other industry you please. If it is an important industry, if it is big enough to attract or justify a trust or a combination or a concerted action of this character, they get together upon price fixing, and in this way all competition in the domestic market, in the material and essential and staple products of the country, outside of the products of agriculture, has been brought to an end under the process of monopolization into a trust or agreement that names the prices at which the product shall be bought and sold in the American market, without any reference to the law of supply and demand and without any reference to the law of competition.

When the people of this country have lost, as they indeed have lost, the benefits of domestic competition the very foundation stone of the protective tariff system is gone and it can not be justified for a minute, when we admit that the prices in this market are not regulated by competition but are regulated by monopoly. I defy the present Presiding Officer of the Senate [Mr. FRELINGHUYSEN in the chair] or any advocate of protection to rise on the floor of this Chamber and say that the protective principle can be justified if it be conceded that domestic competition has been stifled by monopoly, by trusts, by associations, combines, or understandings of any character whatsoever.

So we now have no foundation for the protective system. If we had, even then there is no protective tariff in this bill. How can anyone, then, justify a protective tariff, even if we have competitive conditions, which I say is the basic principle upon which protection must rest? If we take out the foundation stone, the whole temple falls of its own weight.

Who is undertaking upon the floor of the Senate, when these rates have been attacked, to justify them upon any principle of protection that has ever been advanced heretofore? Who has undertaken to argue that these tariff rates measure the difference in the cost of production here and abroad? Does anyone believe for a minute that the American people would consent to tax themselves to protect these industries from foreign competition to further increase the profits already excessive and out of proportion to those of nine-tenths of the people or for any purpose save to equalize cost of materials and labor and thus bring about fair conditions of competition? Did Aldrich, did McKinley, did Dingley, or did anybody who has ever spoken in behalf of protection in this country attempt to justify it upon any other principle than that of difference in cost of production? It was always the poor laborer of the country whose wages must be kept up to the American standard and that we must give protection to in order to measure the difference in wage cost. That was the cry. If there was a difference in the cost of the materials of production, that was also to be equalized. Nobody has contended in these debates, however, that there is any substantial difference in the material cost here and in foreign countries of many, indeed most, of the things contained in the bill. In fact, as a rule, I take it that it will be agreed that the material cost in most foreign countries is just now about as great as here. Especially is that true where the foreign manufacturer must purchase his own raw materials elsewhere. Of course, if the raw materials are produced in the country of production, there might be some slight difference in cost in favor of some countries of Europe.

Europe is our industrial competitor, but if the difference in exchange cuts against us in the case of imports of foreign merchandise, the same thing cuts against the foreigner when he has to buy his raw materials from abroad. It may, therefore, be laid down as a general principle that there is practically none or little difference in most of the manufactured products of this country and of Europe with reference to material cost. It has not been seriously contended here that there was, as a rule, any substantial differences. Wherever there has been a feeble effort to justify any of these rates upon the protective principle, it has been upon the basis of difference in labor cost. Nobody on the other side of the Chamber up to this time has been rash enough to contend that the duties in this bill were necessary to equalize the labor cost here and abroad, except in isolated cases of certain German products, such as toys and knives. They do not attempt to justify it on that principle. On the contrary, they admit that that principle of measurement had to be scrapped, and had to be scrapped because it had been impossible to get data in the present unsettled condition of affairs. In the uncertain status of markets here and abroad it was impossible to get data as to the cost of production abroad or even here, and therefore the rule could not be applied.

Now, having abandoned that fundamental principle of protection, they have laid down and attempted to justify the bill upon the ground that as to one country in the world, and only one country in the world, the selling price of the foreign product imported to this country is very much below the selling price of the domestic product in this country. That country is Germany. From that country during the last year we imported only $88,000,000 worth of products, and to that country in the last year we exported $347,000,000 worth of products. Because, therefore, of the importation to this country of $88,000,000 as against our exportations of four times that much to that same country, they insist that these rates shall be raised from 50 to 100 per cent higher than the labor costs of those products in other countries of the world, and in many instances 50 per cent higher than the total labor costs of the product in this country.

Mr. President, upon that subject I have some data which I wish to place in the RECORD. I am not going to put in the RECORD a lot of moldy old speeches of a half or a quarter of a century ago. I am not going to fill the RECORD and take up the time of the Senate reading from what John C. Calhoun said or what Vest said or what Clay said or what some great statesman of the past, either Republican or Democrat, may have said about protection when it was an academic question in this country. I am going to show the facts with reference to labor costs, always heretofore regarded as the foundation upon which tariff taxation must rest.

The rates in this bill are made high, it is claimed, because of the difference in the labor cost here and in Germany—not generally, but in Germany, the country to which we sell four times as much as we buy from it. I venture the statement that when we investigate the facts it will be found that German products sell nearly as high in this market as American products sell for in the German market, and that we have been able to sell her four times as much as we bought from her during the last year because of the cheap prices at which we have offered her our products.

I have some figures here about this labor business. I have obtained these figures through experts furnished me by the Tariff Commission. The calculations have not been worked out by free traders; they have not been framed up by tax dodgers, as many of the figures that are brought in here on the other side have been framed up by people who are seeking to gouge the American public. They have been prepared for me by a Government official expert, and the bases of the calculation are the official figures. I am going to read some of them, though it would take too long to read them all.

The first striking example that I have is wrought pipe. The total wage cost of producing wrought pipe in this country—not in Europe but in this country—is 18.2 per cent of the total value of the product. That is the total labor cost. The duty imposed in this bill upon the imports of that product is 27 per cent; in other words, Mr. President, the duty levied upon this product is 9 per cent higher than the total labor cost of the product.

Mr. HITCHCOCK. I think the Senator from North Carolina means 50 per cent higher.

Mr. SIMMONS. It would be 50 per cent in the comparison, but I am merely stating the difference in percentage.

Mr. HITCHCOCK. The tariff rate is one-half higher.

Mr. SIMMONS. Yes; it is one-half higher.

The next item is adding and calculating machines. Those are very much in use in this country, and are very much more important to the men who are engaged in business than a rehash and recital of musty old speeches of the past quarter of a century. The entire labor cost of this product is 25.7 per cent—not quite 26 per cent. The duty imposed upon it is 30 per cent.

Mr. KING. Will it disturb the Senator if I interrupt him?

Mr. SIMMONS. Not at all.

Mr. KING. Mr. President, of course, I can not challenge the accuracy of the expert's statement as to the labor costs as the statement has been submitted to my distinguished friend; but I venture the assertion that those costs have been put entirely too high. The labor cost in the entire chemical industry—and labor there is higher for the product returned than in any other industry, I should imagine, because of the tech-

nical skill supposed to be involved—and the labor cost there is only 8 per cent. Before the war it was only 8½ per cent of the value of the product.

Mr. SIMMONS. What is the average duty which this bill puts on commodities in the chemical schedule?

Mr. KING. The average duty is from 150 to 600 per cent.

Mr. SIMMONS. With a labor cost of only 8 or 10 per cent?

Mr. KING. With a labor cost of only 8 per cent of the entire value of the product. I can not comprehend, if in the entire chemical schedule the labor cost is only 8 per cent, why it should be 20 per cent in the industry to which the Senator from North Carolina refers.

Mr. WALSH of Montana. Will the Senator pardon me for an interruption?

Mr. SIMMONS. Yes.

Mr. WALSH of Montana. I should like to inquire whether the statement is controverted by anyone on the other side?

Mr. KING. I do not think it can be.

Mr. SIMMONS. I presume it can not be, for it is based upon the official records.

Again, Mr. President, as to structural iron not made in steel mills, the labor cost is 20.3 per cent, while the duties upon it imposed in this bill range from 30 to 40 per cent—double the entire labor cost in this country of the product.

Again, Mr. President, in the case of tin plate and terneplates, articles of common use in this country, the labor cost is 5.9 per cent—call it 6 per cent—while the protection given in this bill is 8.2 per cent.

In the case of brass and bronze the labor cost is 20.4 per cent, while the protection accorded is 46.2 per cent—more than twice the entire labor cost. In the case of copper smelting the labor cost, as I understand, is made up of two items, which would make it 19.1 per cent, while the duty is 36.3 per cent.

Mr. POMERENE. Mr. President, I should like to ask the Senator a question. He has given the labor cost, for instance, of wrought pipe, as I recall one item. Does that mean the total labor cost from the ore in the mine to the manufacture of the pipe?

Mr. SIMMONS. I means the total cost of manufacturing the product.

Mr. POMERENE. Out of what? Out of the iron or the steel, as the case may be?

Mr. SIMMONS. Yes; if it is a manufactured product.

Mr. POMERENE. It includes the one process?

Mr. SIMMONS. No; it includes the labor—the employees, clerks, stenographers, and office force—all the labor that is properly chargeable against that product.

Mr. POMERENE. But what I am trying to get at is whether it covers all the processes from the ore in the mine to the pig and from the pig later on to the finished product?

Mr. SIMMONS. I do not understand that this would include the mining of the raw material.

Mr. HITCHCOCK. Will the Senator specify what he means by copper? I did not understand that.

Mr. SIMMONS. It reads "copper smelting." That is the reason I was a bit uncertain as to what it means.

Mr. WALSH of Montana. If the Senator will pardon me, there is some ambiguity there which ought to be cleared up.

Mr. SIMMONS. I ask the Senator if he will not clear it up, for I do not know much about this industry—especially nomenclature—while the Senator from Montana is familiar with it.

Mr. WALSH of Montana. It is quite plain that the item refers to manufactures of brass and bronze and copper and to such smelting as is incident to the manufacturing of the product, not to the smelting of the copper or the zinc ore which enters into the composition of the brass and copper.

Mr. SIMMONS. That was my understanding.

The next item that I come to is electrical machinery, apparatus, and supplies. There is a tremendous output of those products in this country, the output being practically a billion dollars' worth. The entire labor cost is 23.9 per cent; call it 24 per cent. The entire labor cost of this great product in which everybody is deeply interested, which enters so universally into our daily lives and the expense of living is 24 per cent in round figures, as against a protection of 40 per cent under this bill.

Mr. WALSH of Montana. Mr. President, I take it that a very large portion of the remainder of the cost is attributable to the cost of materials entering into the product.

Mr. SIMMONS. Certainly.

Mr. WALSH of Montana. Of course, with reference to many of the raw materials we have an advantage which, to some extent at least, offsets the advantage in the lower cost of labor abroad. The copper, for instance, produced in this country so largely is obviously available to the American manufacturer at a less cost than it is to the European manufacturer, the difference in cost of transportation across the ocean and to the place of use alone being a considerable item. So it is with a multitude of things which are manufactured from raw materials of which America is the source.

Mr. SIMMONS. Yes. I am putting these figures into the RECORD for the purpose of showing that even if the commodities which we buy from abroad did not cost anything in the way of labor over there, if they were sold without real labor cost to the exporter, there would still be 50 per cent more duty imposed in the bill than the entire labor cost of the product in this country.

Mr. WALSH of Montana. Exactly, and I was endeavoring to draw attention to the fact that in determining whether any duty is necessary in order to equalize conditions there are other elements than labor which must of necessity be taken into consideration.

Mr. SIMMONS. Undoubtedly—and, as the Senator says, in many instances these other elements are in our favor, as in the case of copper just referred to by the Senator.

Mr. President, the next item is stamped ware, of which $100,000,000 is the value of the domestic product; the labor cost is 23.4 per cent; and the duty ranges from 40 to 60 per cent. For enamel ware, domestic labor costs 25.7 per cent, the duty is 5 cents a pound to 50 per cent ad valorem. For bath tubs, lavatories, and sinks, the labor cost 30.5 per cent; the protective duty 40 per cent. For table cutlery the labor cost in the American factory is 43.5 per cent and the protection is 132 per cent.

Think about that, Senators!

Razors: Labor cost, 16.1 per cent; protection, 175 per cent.

Knives, except table knives: Domestic labor cost, 46 per cent; protection, 166 per cent.

All other cutlery: Labor cost, 36.7 per cent; protection, 134 per cent.

Edged tools: Labor cost, 32.3 per cent; protection, 40 per cent.

Files—an article in common use in every household and on every farm: Labor cost, 35.2 per cent; protection, 44 per cent.

Hardware: Labor cost, 29.3 per cent; protection, 40 per cent.

Wire: Labor cost, 18.6 per cent; protection, 35 per cent.

Wirework, including wire rope, and so forth: Labor cost, 17.1 per cent; protection, 40 per cent.

Aluminum ware: Labor cost, 17.7 per cent; household ware made of aluminum, 15 cents per pound and 60 per cent; electric attachments, 15 cents a pound and 70 per cent.

Clocks: Labor cost, 33.6 per cent; protection, 41 per cent.

Watches, including parts of watches and clocks: Labor cost, 39.6 per cent; protection, 58 per cent.

I have here a most illuminating case, Mr. President, furnished me by the president of the Fair Tariff League, a protective-tariff association claiming to have 1,500,000 members. He says:

American women are paid 4 cents for knitting a pair of cheap wool socks, piecework, but American women are taxed 18 cents on a pair of these same stockings. This is four and one-third times the labor cost. The woman operative gets a wage of 4 cents. Against labor's 4 cents the woolgrower gets 5 cents protection and the factory 13 cents.

Mr. President, I am simply taking advantage of this occasion to put in the RECORD some matter, and it is not graveyard stuff, either; it is live stuff, pertinent to the duties in this bill. I do not wish to take the time of the Senate to read all of this matter; but upon the same line, with reference to the comparison between the total labor cost and the duties in this bill, I ask permission to insert without reading certain documentary matter that I have. This data is with reference to the matter that I have been discussing. In getting this permission, I do not want to abuse at all the privilege.

The PRESIDING OFFICER (Mr. ASHURST in the chair). Without objection, it is so ordered.

The matter referred to is as follows:

The Fair Tariff League of Racine, Wis., through its president, Mr. H. E. Miles, says that the tariff should be purely a business proposition. That is good business talk. There is no place for party politics in tariff making. The Republican and Democratic Parties have come quite near each other in their tariff declarations. The last definitive Republican statement was in the platform of 1908, which said that the measure of protection should be the difference in cost of production here and abroad. The Democrats say the tariff should be for revenue, with incidental protection. These viewpoints are not so different that they need prevent the framing of a business tariff on business lines.

But the Fordney-McCumber bill imposes duties far higher than have ever been dreamed of before. It pays no attention to the difference in cost of production. It is a bonus bill for manufacturers.

American women are paid 4 cents for knitting a pair of cheap wool stockings, but American women are taxed 18 cents on a pair of these stockings. This is four and one-third times the labor cost. The woman operative gets a wage of 4 cents. Against labor's 4 cents the woolgrower gets 5 cents protection and the factory 13 cents.

The Aluminum Trust sells aluminum to Americans at 21 cents per pound and exports it to England, where the price is 15 cents. This trust is a monopoly. It started with a paid-in capital of about $200,000, which has grown in capital and dividends to some $70,000,000. Its costs are substantially as low as anywhere in the world, but the Fordney-McCumber bill would make its duty from 5 to 9 cents per pound on the metal and 70 per cent on kitchen and table ware.

The cheapest machine-made lace, such as poor women use, made here as cheaply as anywhere in the world, is taxed 90 per cent. With the wholesaler's and retailers' charges this will be 180 per cent upon the lace the working woman and the farmer's wife wear.

The proposed duty on wool will add $4.15 to the price of a cheap dress, part wool, part shoddy. In anticipation of it the American Woolen Co. has already increased its prices 10 to 45 cents per yard.

LINOLEUM.

The Fair Tariff League, of Racine, Wis., says that American women buy very many yards of linoleum every year. The American manufacturers of linoleum have made large profits by supplying American women with it. But the Fordney-McCumber bill gives an additional bonus to the manufacturers. It authorizes them to add 35 cents to every dollar of their price. And their price is already nearly double what it was in 1917. The cost of making a square yard of molded, inlaid linoleum in this country is less than 89 cents. In England the cost is nearly 82 cents. A duty of 10 per cent would more than cover the difference in cost of production here and abroad. But the Fordney-McCumber bill gives a duty of 35 per cent as a bonus to the American manufacturer. It gives him three and one-half times what he has any right to claim, and it gives it to him at the cost of the housewife in millions of small American homes.

GLUE.

Almost every American home contains a bottle of glue. It is made of the by-products of the packing house, good for nothing else. Any tariff is a gift to the packers. The Fordney-McCumber bill gives the packers a bonus in the shape of a duty of 25 per cent upon glue. The glue makers will stick the consumers, the women of America, that much more. The packer would be glad to sell a dollar's worth of this by-product for a dollar, but Uncle Sam gives him the right to charge $1.25 for a dollar's worth, so, of course, he will do so.

JEWELRY.

Jewelry of the quality usually sold in department stores, etc., is made more cheaply in the United States than anywhere else in the world. The only imports of cheap jewelry are fancy novelties. In 1920 imports were six-tenths of 1 per cent of domestic production; in 1919, 60 cents worth was imported for each $100 worth made. We export much more than we import. The present duty is 60 cents on the dollar. The Fordney-McCumber bill gives the manufacturer a bonus of 20 cents more, 80 cents on the dollar.

—

FURTHER STATEMENT OF MR. MILES.

(Statement of H. E. Miles, chairman Fair Tariff League, a protectionist organization representing farmers, wage earners, manufacturers, and distributors.)

It is a crime to call the Senate tariff bill a protectionist measure. Our league has analyzed every schedule. There is no worst schedule. Each one is an utter betrayal of the principle of protection as defined by the Republican Party and every protectionist and requiring that each rate measure the difference in cost of production here and abroad. Look at this:

The poor woman's bread knife with a 10-inch fluted blade is sold from American factories for 6½ cents; the duty proposed is 13 cents. The figures are the same for the common butcher knife with 6-inch blade. The cheap wood-handle kitchen table knife is sold for 4½ cents; duty, 6.85 cents. So with all table cutlery, of which 48 per cent of all that was made in the United States in the last three years was freely shipped to all parts of the world. The makers meet and "fix prices" against American consumers annually.

The cheap check gingham of which the poor woman's dress is made is now shut out of the American market by a 15 per cent duty. None has come in in 20 years. The principal manufacturer showed a capital of about $4,000,000 in 1896, since which time he has increased it to about $40,000,000 and declared some $30,000,000 of cash dividends. He is now cutting wages. The Senate proposes to increase his duty to 39.2 per cent. The total wages in the cotton mills of the United States average about 16 per cent. The duties are often twice this total wage percentage and more.

We all remember the scandal of a few years ago when under the Dingley law sewing-machine makers exported their product at prices far below their domestic prices. The Simmons-Underwood law put them on the free list. They produced in 1919 $43,694,919. Of their total product they exported to all quarters 25 per cent in 1919, 35.7 per cent in 1920, and 16.7 per cent in 1921, when foreign countries were too poor to buy freely. We imported only one-half of 1 per cent in 1919, seven-tenths of 1 per cent in 1920, and nine-tenths of 1 per cent in 1921. The Senate offers these manufacturers 25 per cent on sewing machines worth less than $75 and 40 per cent on more expensive machines. Thus does the Senate of the United States propose to go into the sewing-machine business and make themselves the initial force in low prices for export and extortion against American consumers.

I happen to know from inside and authoritative sources that the great Singer Sewing Machine Co., which is said to produce 80 per cent of all the sewing machines made in the world, fills its orders from China, Japan, and other oriental countries, and these orders are very extensive, from its New Jersey factory because it is cheaper to do so than to ship from its British factory on the Clyde, with the so-called cheap labor of free trade England.

The whole tariff is exactly of this sort. The poor man's wool clothing is taxed 120 to 140 per cent, the rich man's 75 per cent.

—

[From the New York Journal of Commerce, May 19, 1922.]

BARYTES AS AN EXAMPLE.

A day or two ago there occurred in the Senate a characteristic debate which centered around the tariff rate of barytes. The Finance Committee had recommended a rate of $5 per ton on crude and $10 per ton on manufactured barytes, as against a rate of $1.50 per ton in the Payne-Aldrich law. Debate brought out the fact that barytes is imported but little into this country, the bulk of what comes in being used on the Atlantic coast, while the domestic product is used in the western cities. It was apparently largely as a price-fixing expedient that the committee had granted the $5 rate, thereby permitting monopoly charges to be set by local owners of the mines.

Of course, there was little trouble in putting to flight the "cost of production" argument. It appeared that the rate was equal to fully 100 per cent protection, and at the same time an increase of three and one-third times the pre-war rate on the article. Mining men testified that the tariff was enough to cover the costs of the most expensive ore now being mined in any industry, so that as affecting this particular product there was not, by the wildest stretch of imagination, the least ground for the proposal to establish a rate of $5 per ton. Neither on the basis of protective theory, nor on that of comparative cost, nor on that of supposed advantage enjoyed by countries of low currency exchange could there be defense of the suggested tariff duty.

Barytes is not a commodity of popular consumption. The "average man" does not buy much of it. Nevertheless, it figures in the cost of things he does buy, and the effect of playing into the hands of western mine owners by giving them an exclusive monopoly of this market would be simply to raise the cost of all products in which barytes figures as an element of expense. Among these are various rubber products, paints, and other items. The barytes rate was thus a plan to assess monopoly profits indirectly upon consumers of paints and rubber goods of the kinds in which barytes figures. This was not an isolated example, for the same "principle" runs all through the tariff.

—

[From the Chicago Tribune, Tuesday, May 23, 1922.]

The common argument in favor of a protective tariff is to the effect that without such tariff the products of cheap foreign labor, perhaps combined with cheap raw materials and low overhead costs, can compete so successfully with American products in American markets as to put the American competitor out of business, close his factory, or reduce his workmen to starvation wages. That is a good argument. But it doesn't always hold. There are situations in which the reverse is true.

Consider the aluminum business, which we have mentioned before, not because of any antipathy but because it appears to afford startling illustration of possible dangers in a high protective tariff. The production of crude aluminum in the United States is controlled by a monopoly, the Aluminum Co. of America. In addition to producing virtually all the aluminum smelted in this country, that concern, through its subsidiary corporations, is a large producer of fabricated aluminum, such as kitchen utensils, and incidentally makes a vast amount of aluminum castings for use in automobile manufacture.

It has as competitors some 35 or 40 independent aluminum cooking utensil manufacturers and several hundred independent aluminum foundries. It supplies these independents with ingots and sheets from which their products are manufactured. It is frequently delayed in filling orders for such materials. The better business becomes and the greater the demand for materials the more likely is the supply to be delayed.

Two courses then are open to the independents. They can buy abroad or close or restrict their plants. A prohibitive tariff would prevent them from buying abroad. It would also allow the monopoly to put any price it might desire upon its supplies. The effect upon these independents, employing some 10,000 men, is easily understood. It goes further than that. The average weight of aluminum used in automobiles is estimated at more than 100 pounds. The effect of protection of the monopoly upon our vast automobile business would be important.

Yet a tariff which the independents consider prohibitive, and which they say would allow the monopoly to close their plants and put their workers out of a job, is now on the schedule. And that "protection" is asked by and for a monopoly which earned more than $10,000,000 net in 1920 on a capitalization of less than $19,000,000. If such a tariff arrangement could be made in the aluminum business there is little doubt that a similar arrangement exists among others of the thousands of items on the bill. Such a duty does not protect. It exploits. It demands careful investigation of the entire bill.

Mr. SIMMONS. The Senator from Indiana thinks that we can further curtail our imports by raising the wall of protection to such heights as will exclude many products that are now imported in considerable quantities and still enjoy our foreign export market.

Mr. President, this is a strange argument, in the light of the facts as developed in these discussions. It has been conclusively shown that we are not now flooded with foreign imports under the present law, under the moderate import duties that now obtain. Our imports from all the world last year were not much above normal, while our imports from Europe, the country to which we sell most of our surplus of manufactured products and probably two-thirds of our surplus farm products, last year were actually below normal. They were less than they were in any year under the Payne-Aldrich bill. I have the figures here, Mr. President.

Mr. KING. Notwithstanding our population is very much enlarged.

Mr. SIMMONS. Notwithstanding our population is much larger. Under the low rates of the Underwood bill last year our imports from Europe—and it is upon Europe, as I said, that we must rely for a sale for our wheat, our cotton, our pork, our lard, and other fat products, as well as a large part of our manufactured products—our imports from all of Europe last year, 1921, were only $764,000,000. In 1910, the first year under the Payne-Aldrich bill, our imports from Europe were $790,000,000, about $30,000,000 more than in 1921.

In 1911, the second year under the Payne-Aldrich law, our imports from Europe were $770,000,000, $6,000,000 more than they were last year. Our imports in 1912, the third year of the Payne-Aldrich law, were $900,000,000, or $136,000,000 more than in 1921. In 1913, the fourth year of the Payne-Aldrich law, they were $864,000,000, or $100,000,000 more than in 1921. So that it is true that our imports from Europe in

1921 were less than they were any year during the time the Payne-Aldrich law was on the statute books, and they were about $25,000,000 less than they were in 1914, the first year of the operation of the Underwood law. Therefore, they are now below normal, so far as Europe is concerned.

Europe owes us practically $12,000,000,000. If Europe should pay us the interest upon that $12,000,000,000, it would take practically all they receive in exchange for the goods we now buy from her to pay that interest. Business men, great financiers, masters of industry, bankers, political economists recognize, and many of them have asserted heretofore, that it was a question whether we would not have either to arrange to take European products in payment of the interest upon this debt or to cancel it, and many wise men in this country have advocated a policy of canceling this debt, because they argued that Europe could not pay the interest unless we accepted its products in payment; that that would not be desirable under present conditions.

If it be true that it would take substantially the entire purchase price of the products we now import from Europe to pay the interest upon her debt and it is questionable whether for that reason we ought to insist upon payment of the interest at this time, I ask how can Europe pay us for its purchases of the vast surplus products of our fields, of our factories, of our mines which we seek to sell her if we radically curtail the volume of her present importations to us by the tariff bars set up in this bill? Where is she going to get the money to pay us for these things? And must there not follow a disastrous slump in our export trade with Europe unless we are willing to buy in reasonable measure what she has to sell us? All healthy international trade is based on barter, and we must buy if we expect to sell.

Mr. President, it must be obvious that there is no hope of a continuance of that magnificent business we have in the past enjoyed, and in large measure yet enjoy, in the sale of our goods upon the Continent of Europe if we shall raise this wall so high as to further materially reduce the already less than normal importations from that Continent.

Last year we sold for the most part to Europe, $552,000,000 worth of wheat. We sold mostly to Europe something over $500,000,000 worth of raw cotton. We sold mostly to Europe in lard products and meat products nearly another half billion dollars' worth. Of four agricultural products we sold to Europe last year practically one and a half billion dollars' worth of products of our farms alone. Now, it is proposed to further cut down imports from Europe, for no man who has studied this bill can doubt that these high and oftentimes prohibitive rates are aimed chiefly at the products of Europe. There are high rates on some agricultural products, and some of these will affect importations from Australia, of South America, Central America, Canada, Cuba, and so forth. But the objective of the bill and its rates is to curtail or exclude the products of Europe, mostly manufactures. I repeat, the main purpose of this bill is to exclude imports from the European Continent, and I make the prediction now that if this bill passes, our imports from Europe will dwindle to a fraction of what they are to-day, and when that happens, in the condition in which Europe finds herself now, without gold to pay us, with impaired credit, with practically no way of liquidating her purchases except by exchange of products, we may look for a disastrous slump in our export business to Europe, just as has already taken place in our export and our import business with Canada.

The emergency tariff bill was aimed especially at Canada. There is no use beating about the bush about that. Everybody knows the emergency tariff bill was passed to shut out Canadian imports from this country. What has been the effect of that emergency tariff upon our Canadian business? In not quite a year, since the enactment of that law, our trade with the Dominion of Canada has dropped from $1,300,000,000 to a little over $700,000,000, a reduction of something over $600,000,000 in one year.

Mr. KING. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Carolina yield to the Senator from Utah?

Mr. SIMMONS. I yield.

Mr. KING. As a further result of this unwise and impolitic economic policy, I direct the Senator's attention to a fact which perhaps he has discussed, and which no doubt has suggested itself to the able Senator many times, that when those nations with whom we have been dealing, and who have been taking our products in the past, are forced by our unwise legislation from our markets, and are perforce compelled to find a market elsewhere, the result will be that in a few years they will be cut off entirely, even though we would be willing to trade, because they will have developed new avenues of trade and new fields in which they will make their purchases and where they will make disposition of their surplus products.

Mr. SIMMONS. That is self-evident. If we shut English manufactured products out of this country, of course they will seek a market in South America, and if they find a market in South America instead of here, England will buy her agricultural products from South America instead of from us.

If we shut out English manufacturers from this market, they will seek a market in Canada, and they will buy their agricultural products from Canada instead of from us. The same thing will happen with reference to Australia and Brazil and every other country where manufacturing is not highly developed and where agriculture is. If, in other words, we cut off our British imports of manufactured products as the result of this tariff, that does not mean that the British are not going to continue to make those products and sell them, but it means that they are going to sell them in some other market. It will be in the market of an agricultural country, and they will buy their agricultural products in that country instead of buying them in this country.

Mr. President, we not only have lost practically one-half of our trade with our neighbor, Canada, the best customer we had in the world except Europe, but we are going to lose a great deal more of that trade. Right now the authorities of Canada, I am advised, are preparing to promulgate a new preferential tariff in behalf of Great Britain. Instead of giving her the comparatively moderate preference she now enjoys, hereafter Great Britain is to have a preferential tariff rate of 50 per cent over the United States and other countries. If that happens, then we are going to lose, and lose to Great Britain, by reason of a stupid discrimination in tariff imposed here, a large part of the balance of this great and valuable trade we have so long enjoyed. We are going to lose, to a large extent at least, the best customer we have in the world to-day, except one, for our surplus manufactured products.

Mr. President, a fact was demonstrated here the other day in the debate, and it is a fact which I have the documents here to show, though I am not going to take the time to do so now, but before we get through with this discussion we will explode a great many things that have been set up here as pretexts and excuses to justify this unconscionable raid upon the pocketbooks of the American people. I have the data here that I shall put in the RECORD when I get it a little better arranged than it is now to show that as a result of the fact that most of the staple products of this country are monopolized so as to enable the producers to charge the American people what they please, there is only one restraint upon their greed, and that is the fear of foreign competition if they should raise the prices beyond a certain level.

Under these circumstances the great trusts which now control probably three-fourths of our manufacturing industries are charging the American people prices that range from 10 to 30 per cent higher than the prices at which they export the very same articles and sell them to the foreigner. That is going on now where there is trust control, and I say it is almost all-pervading now. But when we leave those trusts without restraint with reference to the matter of price, when the present tariff wall is gradually raised until it is twice and sometimes three times as high as it is at present, so that they may charge the American people without the slightest danger of foreign competition from 25 to 75 per cent and more than they are charging them now, they will be just as eager for the foreign market as they are now. They will be more eager than they are now, and they will, by reason of the higher prices and profits they will then exact and get from the domestic consumer, feel justified in selling their surplus abroad at a lower profit than they would feel warranted in selling them for now. It will be found when the bill is passed and these restraints are removed, and the domestic prices have been jacked up, that the foreign prices will not be likewise increased, but lowered, so that they may be kept to the level of the world price and to promote quick and heavy sales will in many instances be reduced below the world level.

What will be the outcome of those high duties? It will be a higher price paid by the domestic consumer and a lower price paid by the foreign consumer for the American product. If that condition follows, am I not right in saying that the result of your tariff will not be to protect the American consumer or the American laborer? Nor will it be in the interest of the American consumer or the American laborer.

Its sole benefit will inure to the manufacturers of those products already rolling in wealth, already living in princely mansions, and to the foreigner who buys the American manufacturer's surplus.

Are we here for the benefit of making a tariff in the interest of the foreigner? These gentlemen say they are making it in the interest of the American consumer and laborer. I say that the result will inevitably follow of higher prices here and lower prices abroad of the American-produced product, and in many cases the foreigner will get the benefit of the tariff, and not the domestic consumer.

Mr. President, I have talked very much longer than I expected, but before I conclude I want to put a few other things in the RECORD. I have here a most illuminating article, which appeared in the New York World the other day. They sent an expert down here to make an investigation of the bill and of the facts with reference to it and the tariff situation generally. They asked him to thoroughly post himself and make an analysis, and in this article he has made a very illuminating analysis of certain schedules in this bill. It is stated that other articles will appear. I have not yet seen the others, but if they are as good as this I shall be glad to see them. It is written by Mr. Elliott Thurston. I have had the pleasure of meeting him and talking with him. He is one of the most intelligent newspaper men I have ever met. This is one of the strongest articles that has been written by any reporter from the Capital since these debates began. I ask permission to incorporate the article in the RECORD without reading it.

The PRESIDING OFFICER (Mr. ASHURST in the chair). Without objection, it is so ordered.

The article referred to is as follows:

DICTATED BY SUPERLOBBYISTS, TARIFF BILL WOULD ADD BURDEN EQUAL TO PRESENT UNITED STATES TAXES—INQUIRY BY THE WORLD SHOWS THE FORDNEY-MCCUMBER MEASURE WOULD CAUSE COST OF LIVING TO JUMP AGAIN—AGENTS OF HUGE COMBINATIONS DEMANDED AND GOT RATES THAT WOULD INSURE INCOME ON WAR PROFITS—"A DISGRACEFUL SPECTACLE," SAYS SIMMONS—NOTICE OF INCREASE IN PRICES ALREADY SENT OUT IN SOME TRADES—RATES 50 PER CENT ABOVE NOTORIOUS PAYNE-ALDRICH BILL BASED ON FIGURES OF FOREIGN COSTS NOW CHANGED SHARPLY UPWARD—FOOD, CLOTHING, BUILDING MATERIALS, AND OTHER NECESSITIES AFFECTED—JOKERS CUNNINGLY CONCEALED WOULD BAR COMPETITION—HUGE GOLD BRICK FOR FARMERS BOUGHT FARM BLOC'S SUPPORT.

Do you like to be gouged? Do you think any further burdens should be added by the Government to the present heavy war taxes and the high cost of living? If not, do you know what you will have to pay if the Fordney-McCumber tariff bill should be enacted?

Every citizen of the land will come under new and heavy exactions, for every necessity of life will bear its burdens under the bill. The treasure will go mostly to swell the tremendous profits made by big industries during the war.

Appreciating that the public is not aware of what the measure means, the World has had a careful inquiry made into the provisions of the Fordney-McCumber bill by Elliott Thurston, a member of its staff who has had much experience in such matters. Below is the first of Mr. Thurston's articles. Others will be printed at intervals of two or three days until the main points of the greatest tariff gouge ever attempted are made clear.

[By Elliott Thurston.]

(Copyright (New York World) by Press Publishing Co., 1922.)

WASHINGTON, May 28.—Republican leaders hoped to have the Fordney-McCumber tariff bill passed by the end of June. Now Congress is likely to stay in session most of the summer, if not into the fall, in the battle over this measure, for the Senate has begun only the opening skirmishes. Bitter fighting is to come, for the country is just awakening to what this measure means and protests are deluging Senators. Some of the Republicans show signs of breaking under the fire.

A careful inquiry into the bill gives plenty of reason for popular outcry. In all the country's stormy history of tariff making since 1816 no measure ever before proposed for passage was so loaded with burdens for the public. Other bills embodied jokers, concessions to industrial powers, and glaring inconsistencies, but none ever represented so complete a surrender to the will of organized monopoly.

Here are some of the leading features of the Fordney-McCumber bill shown by the World's inquiry:

1. The high cost of living, which has been reduced so slowly and laboriously, will jump again. An insurmountable tariff wall will be erected behind which war prices could be charged for food, all sorts of clothing, shoes, housing, and other necessities of life without danger of competition.

2. An "invisible tax" estimated by experts for the Senate minority to equal, if not exceed, the income and all other Federal taxes now imposed would be wrung from the public under this bill. The bulk of the proceeds would be handed over to the favored beneficiaries under the proposed rates, enabling them to pay dividends on inflated capitalization.

SUPERLOBBYISTS DICTATED RATES 50 PER CENT OVER HIGH RECORD.

3. A small group of superlobbyists, armed with the delegated power of gigantic industrial monopolies, in many cases arrogantly demanded and obtained prohibitive rates which would insure income on swollen war profits as well as old plants. These superlobbyists are a new, specialized product of concerted pressure exerted by combinations. Under their dictation the rates of the bill have been jacked up an average of 50 per cent above the levels of the Payne-Aldrich tariff—the highest heretofore—which caused a revolt in the country.

4. An amazing string of jokers in new guises, evidently intended to escape discovery pending passage of the measure, has been concealed in the technicalities of the bill.

5. A gigantic gold brick would be unloaded upon the unsuspecting farmer, who, for the sake of winning the farm bloc's support for the bill, is allowed a few more dollars for his products. The information that for every dollar he gains he will have to pay out $5 to meet the increased cost of living is being carefully withheld from him.

6. High duties are proposed on cement, brick, and other building materials formerly on the free list, which would add to the already exorbitant building and housing costs. The duties would perpetuate the profiteering and illegal monopolies in the building trades exposed by the Lockwood committee in New York.

EUROPE COULDN'T PAY DEBTS.

7. Importations would be placed under a virtual embargo, thereby blocking Europe's only means of paying off her war debt of more than $11,000,000,000 to the United States. The economically unhealthy gold surplus would remain in this country—over 40 per cent of the world's gold supply is now in Federal reserve bank vaults—instead of flowing back to normal channels and stabilizing exchanges.

8. Unemployment and depression will result in those lines of business and industry which depend upon selling their surpluses abroad. Foreign markets will be closed to America when foreign goods are excluded from this country. Europe can not buy of America except through the process of exchanging merchandise.

9. Notices of price increases in anticipation of the passage of the Fordney-McCumber bill, have already been issued to dealers by several of the chief industrial favorites of the bill. These are industries exerting a control of domestic markets amounting to monopoly.

$100,000 REPORT NOW OBSOLETE.

10. Framers of the bill, professing to abide by the Republican doctrine of fixing tariff rates to equalize the difference between production costs at home and abroad, used as a basis for their calculations the $100,000 report of the Reynolds investigating committee. This report arbitrarily took foreign production costs of August 1, 1921. These costs have since increased so much as to make the whole report obsolete and a false basis of comparison.

11. The bill would give the President the power to increase any of the rates by 50 per cent upon 30 days' notice, or to substitute the discredited American valuation plan with its still higher rates of duty. This plan met with such general denunciation that the Senate was forced to kill it as a part of the bill itself.

ORDERS OF MASTER TO SERVANT WHEN BIG INTERESTS SPOKE.

The superlobbyists were the men who wrote these provisions into the bill. Wielding tremendous political power as the delegates of whole branches of industry, numbering hundreds of individual plants and factories, they approached the House Ways and Means Committee and the Senate Finance Committee as dictators rather than petitioners. They gave their orders. The orders were promptly obeyed with no more than a pretense of inquiry into the facts or justification of the demands.

"I have never seen a more disgraceful spectacle than the way in which the majority of the committee bowed to these representatives of organized industry," are the words of Senator SIMMONS of North Carolina, chief assailant of the bill, veteran of 20 years in the Senate and chairman of the Finance Committee during the Wilson administration. "They did not come in as in the past and make requests. They came in and made demands. Their orders were obeyed without question as the orders of a master to a servant are obeyed."

MEN BEHIND THE SCHEDULES.

Item after item in the proposed bill bears the unmistakable mark of their work. Some of it was performed in open committee sessions, most of it behind closed doors in secret sessions.

Here are some of the men who came before the committees as spokesmen for huge industrial organizations, as shown by the RECORD:

Henry F. Lippitt, former United States Senator, Providence, R. I., representing cotton manufacturers.

Lucius N. Littauer, New York, representing manufacturers of cotton gloves.

Horace B. Cheney, New York, representing the Silk Association of America.

John P. Wood, Boston, representing the National Association of Wool Manufacturers.

Arthur V. Davis, president of the Aluminum Co. of America.

William J. O'Brien, Baltimore, representing 83 of the 88 cement companies in the country.

These names, taken at random from records of hearings on the various schedules of the bill, illustrate the manner in which organized industries left their destinies in the hands of single spokesmen. Comparison of their wishes with the rates in the bill shows the fidelity with which the committees obeyed. More pointed still are the meetings not made a matter of record at which William M. Wood, president of the American Woolen Co. and other industrial powers, made known their will privately and in advance.

JOKE ON THE FARMERS.

Most of the agricultural duties resulted from the trading of the farm bloc, which went so far as to obtain rates on wheat and corn notwithstanding the fact that America is the world's largest producer of both. This has become one of the standing jokes at the present session.

Ever since negotiating this trade—the promise of support for the bill as against the duties they were awarded—members of the bloc have been conspicuously absent from hearings in the Senate on the bill.

These unprecedented tactics in the drafting of the measure have not passed without resentment even in the ranks of the Republicans. Several Senators of progressive leanings admit privately that they are strongly against the extortions proposed and the methods employed. But they are keeping silent in the interest of party unity, hoping for revisions later. Senators LENROOT and NORRIS have gone so far as to express their dissatisfaction on the floor of the Senate. The breaking away from the ranks of these two Senators—with the prospect of others to follow—has caused the Republican leaders no little worry.

NO SIGNS OF DUMPING.

In so far as anyone has undertaken an explanation of the bill it appears that there were two predominant motives considered. One was protection of the American manufacturer against dumping—that is, an inundation of foreign goods that would drive him out of business. The specter of this catastrophe stalks across page after page of the testimony taken at the committee hearings on the various schedules in the bill.

Senator SIMMONS has attempted to run this specter to the ground. He first pointed out that except for a few German toys and pocketknives, about which there has been loud wailing, no evidence of dumping has yet been shown.

Examination of the Department of Commerce's figures on imports discloses no evidence of dumping. On the contrary, imports from Europe in 1921 are found to be $764,000,000, which is $463,000,000 less than in 1920. It is even less than in any year during the life of the high Payne-Aldrich tariff. Likewise imports from all sources for the eight months ending February, 1921, were $2,757,000,000. For the eight months ending February, 1922, they were $1,629,000,000.

In other words, the statistics prove that instead of a swelling flood of foreign goods pouring into America that alleged tide receded, even under the present Underwood tariff, at the rate of more than a billion and a half a year.

MAINTENANCE OF WAGES PLEA.

The other leading consideration was maintenance of good wages for the American worker. The champions of the bill, however, have not elaborated their argument to the point where the American worker can be shown how he is to gain if all his living costs are to go up again, and if industries depending on foreign markets can not sell their goods abroad. This instance is typical of the catch phrases applied to all tariff bills, particularly this one, in the belief that those whom they are designed to reach will take them at their face value.

If the Fordney-McCumber bill was ever intended as a revenue-producing measure, its sponsors have ceased to defend it on that ground in the face of the overwhelming opinion that no revenue can be expected of a bill which will exclude the goods upon which the revenue is to be raised.

In all the sea of conflicting opinion and divergent tariff faith surrounding and clouding the issues at stake, one fact stands out with singular clarity—the bill in its present form gives perfect satisfaction to all the organized and monopolized industries in the country. It is their product. What happens to the public is something for the public to worry about.

Mr. SIMMONS. Mr. President, I have not had much to say about the agricultural schedule of the bill, except disapproval of the methods by which many of the duties were written into the bill and of the understanding that brought about supposed harmony in the ranks of the Republican Party in connection with those rates, but I want to read to the Senate an article that appeared a few days ago in the Nebraska Union Farmer. This newspaper, as I understand, published at Omaha, Nebr., is the official organ of the Farmers' Union of that State. I am told by the Senator from Nebraska [Mr. NORRIS] that the editor is a Republican. I know nothing about that, but the word of Senator NORRIS will be accepted by all. I judge the editor is a Republican also, from some of his comments in the article which I am going to read. The article which I wish first to read appears in the April 26, 1922, issue of this paper and is from President Charles S. Barrett. Mr. Barrett, as I understand, is the national president of the Farmers' Union. That, as I am advised, is the largest farm organization in the United States and probably has the largest membership. Certainly its membership is more widely scattered throughout the country than that of any other farm organization. It is the only great farm organization that has survived in my State, and it still has there a very large membership. Mr. Barrett has been its president for many years. He is an able man. The article is as follows:

FARMERS WORSTED ON TARIFF.

(By National President Charles S. Barrett.)

With reference to the proposed tariff, Chairman MCCUMBER of the Senate Finance Committee makes a statement which is undoubtedly true. He says: "We have given the agricultural interests of the country a better standard of protection than has ever been given in any previous tariff bill."

I think that the farmers of the country are glad to feel that they are likely to receive greater tariff protection on farm products; at least, that is the impression I get from talking with a number of farm representatives here in Washington who have been acting for commodity organizations of dairymen, wool, and cane growers, etc.

They have had a hard fight to secure what they consider proper treatment, and in some instances are not fully satisfied that the tariff duties proposed are sufficient, as, for instance, the organized dairymen, who have made a very strong case for tariff protection against the importation of vegetable oils. There is no doubt in my mind that these commodity experts are amply fortified with data to show consumers that they have taken the right course to protect American agriculture.

INDUSTRY GETS LION'S SHARE.

I feel that it is a matter of concern that the farmers, in order to secure what they believe is fair and reasonable and necessary in the matter of tariff protection, have been forced to submit to unjustly high, if not extortionate, import duties on many of the manufactured articles produced in this country, which, I believe, instead of being higher, should be lower.

Is it not a sad commentary upon legislative conditions that in order for the farmers to receive only what is just and adequate in the matter of protection, there must be months of logrolling operations on the part of Senators and Representatives, and that for every added dollar which agriculture is to receive, the manufacturers, as a whole, will receive probably six or eight times as much—and this despite the fact that the capital investment in agriculture is $77,000,000,000, while that of manufacturing is only $44,000,000,000?

If what some of the tariff authorities say is true, it looks as if the increased tariff rates which the manufacturers expect to get will make possible an increase of their prices of upward of $2,000,000,000. If this is so, then I suppose we must multiply the manufacturers' price by two to get the price the consumers pay after the goods have gone through the middlemen's channels.

On the other hand, I am unable to see where agriculture, as a whole, can expect to secure, through the proposed increased duties, more than $250,000,000. I think this is necessarily so, since with reference to the great staple products, like cotton and grains, and also in the case of hogs and their by-products, we are an exporting nation.

A NOTABLE PAMPHLET.

I have been forcibly impressed with the viewpoint of two well-known manufacturers, George N. Peak and Gen. Hugh S. Johnson, of the Moline Plow Co., whose pamphlet, "Equality for Agriculture," has attracted so much attention. They, like myself, are not satisfied with the present arrangement in tariff making. I do not know that I agree entirely with their views, as when they say, "agricultural tariffs do not protect agriculture, since world prices fix domestic prices of every crop we export a surplus," but I suppose I must agree if their statement were changed to read, "agricultural tariffs do not adequately protect agriculture."

I fully indorse their statement that world prices fix the domestic prices of the crops of which we export a surplus, and I am also most heartily in agreement with their next statement that "industrial tariffs can and do protect prices of articles for which a crop is exchanged," and that "the protective principle is operated for the benefit of industry to the detriment of agriculture."

That is the situation that I must protest as representative of a great national farm organization, and I think the time must inevitably arrive when jockeying and logrolling, which have been forced upon the farmers by the powerfully financed manufacturing interests, must give way to a sound and scientific tariff making, based upon publicly known, indisputable facts with reference to what is necessary in tariff laws, to give proper protection to the various business interests of the Nation.

EXTORTION IN NAME OF LABOR.

I am morally certain that in many cases the highly paid attorneys and technical experts of the manufacturing industry have put one over on our lawmakers, for I am convinced that even with the higher wages paid American labor in order more nearly to secure what is known as the American standard of living, there are certain lines of manufacturing which can produce as cheaply as any foreign nation, and in some cases more cheaply.

This is because the American labor is highly efficient and because of the highly perfected automatic machinery, which in the case of knitting works, to use an illustration, is said to enable an operative to knit 150 dozen pairs of cheap socks a day. If $3 a day is the wage, and this is much higher than in other nations for this class of work, then the labor cost of knitting the 150 dozen pairs of socks is 2 cents per dozen pairs, or, in other words, less than seventeen-hundredths of a cent a pair; and yet, in spite of this condition, the Senators and Representatives upon whom agriculture has had to depend to secure fair and reasonable protection have been forced to agree that the present duties on hosiery will be practically doubled.

I wish it distinctly understood that in offering these observations upon the tariff situation I am making no criticism of the Senators and Representatives coming from agricultural sections of the Nation who have been planning the tariff measure or taking an active part in it. They have done the best they could under the circumstances. They had their duty to perform, and they had to work under a severe handicap.

A WELTER OF SELFISHNESS.

The manufacturers have swarmed to Washington, and with their vast mass of statistics and balance sheets, literally overwhelmed a large part of Congress. Only highly trained statisticians, certified public accountants, and manufacturing experts could possibly assimilate and interpret the alleged facts and figures which many of these manufacturers have successfully pressed in behalf of their claims for still further tariff protection.

The great manufacturing interests of this country have completely outstripped the farmers in many ways, as is shown by the fact that with only about 57 per cent as great an investment their annual turnover is many billion dollars more than that of agriculture; and also by the fact that the present tariff schedules are likely to secure increased prices of upward of $2,000,000,000, making a total of $4,000,000,000 when passed through the middlemen's hands, while, on the other hand, agriculture will probably receive through direct price increases not over one-quarter of a billion dollars.

It is certainly worthy of comment that the officials of the Moline Plow Co. referred to, Mr. Peak and General Johnson, fully acknowledge the supremacy of manufacturing over agriculture. One comment which these great manufacturers make is this:

"Industrial tariff affords protection for industry from cheap foreign competition, because industry can, must, and does regulate supply to demand on domestic markets. It can, because it can control production. Even if overproduced, it is organized and financed to withhold surplus until demand at fair value absorbs it. It must, because failure to do so would destroy it by withdrawal of capital. It can elect when and whether it shall sell in export and at what price."

TIME TO DO SOME THINKING.

This whole problem of benefits that agriculture can permanently expect to secure through our present method of tariff making—with agriculture as yet largely unskilled in the methods which will place it upon a somewhat equal basis with manufacturing as far as securing a return upon its labor and interest upon its investments—must be taken hold of one of these days with vigor and understanding.

Secretary Wallace recognized this fact when recently he called together in Washington a group of financiers and business men to consider the suggestions made by the officials of the Moline Plow Co. The problem is so intricate and forces which have so hugely profited from tariff making in the past are so powerfully intrenched that it may be some years before a better solution is found; but at least it is a matter worthy of consideration and getting ready to tackle.

Editorially the publication says, speaking of the article which I have just read:

THE PRICE OF PROTECTION.

President Barrett's article on the tariff question in this issue affords abundant food for thought. He suggests that the pending tariff measure would operate to increase the prices of some of our agricultural products, such as wool, sugar, butter, and some of the fruits, but that on the great staple farm products of the country—the corn, wheat, cotton, pork, and beef—it would have little, if any, effect.

The operation of the duties in the pending bill would give a total increase in prices of agricultural products of not over one-fourth of a billion dollars a year, President Barrett estimates. On the other hand, he shows that the protection given to manufacturers would enable them to exact $2,000,000,000 a year in added prices on their wares, which would be multiplied by two by the time the goods reached the consumers.

What will it profit the farmers of the country to secure effective protection on a few relatively unimportant agricultural commodities at the cost of increased prices on almost everything they buy? We do not wish to put words into President Barrett's mouth or draw conclusions for him, but it seems to us from his figures that farmers are paying a mighty long price for the so-called protection the tariff bill would afford.

Farmers of the great Corn Belt fare particularly badly in this transaction. Prices of their staple products are not increased by the

"paper" duties placed upon them. As consumers, however, they will not only have to pay a large part of the increase in prices caused by added duties on manufactured products but will also have to help pay the increased prices for some of the agricultural products on which the tariff is effective.

President Barrett invites us to consider how farmers can get a square deal on the tariff question. We have pondered this question a great deal, and have come firmly to the conclusion that farmers should cease to ask for protection on their products. Then they could go before Congress with clean hands to oppose the demands of manufacturers. Until farmers do this, they will be cheated regularly in the tariff-framing game.

Next I insert an editorial from the same Nebraska farmers' organ in its issue of April 12, 1922, as follows:

[Editorial by L. S. Herron in the Nebraska Union Farmer of April 12, 1922.]

TARIFF DICKERING.

From Washington come reports that the Senate has "surrendered" to the farm bloc on the tariff. That is, the members of the farm bloc are to be allowed to write the duties for farm products just as high as they wish—providing, of course, they allow the manufacturing interests to write their schedules as high as they please. Now, that isn't just what we would call a surrender. It appears rather that the members of the farm bloc have been taken into camp by the tariff-sustained monopolists.

Except in a comparatively few cases, of which sugar and wool are examples, tariff duties on farm products do not tend to enhance prices in this country, because prices here are determined by the markets of the world in which the surplus is sold. This has been proved conclusively by the utter failure of the emergency tariff on farm products to have any effect on prices.

If the farmers were organized into a monopoly, they might make tariff duties operative by withholding their products from the market and creating scarcity behind the tariff wall; but farmers are not organized into any such monopoly, and there is no prospect that they will be. On the other hand, the protected manufacturers, for the most part, are organized to restrict production and hold up prices. They make their duties operative.

This means that the members of the bloc, if the reports are true, are trading real price-fixing protection to manufacturers for mere "paper" duties on the preponderant part of agricultural products. This would be a very bad trade at any time, but it is especially bad just now when the country is suffering acutely from price disparity.

Mr. President, I have strayed far from the line of discussion which I had mapped out for myself when I took the floor. I expected only briefly to reply to some of the observations made by the Senator from Indiana [Mr. WATSON], but after finishing with that matter I felt it was opportune, as the Senator had started the discussion, to put into the RECORD some practical facts in connection with the rates carried in the particular bill now pending. I regret that I have taken so much of the time of the Senate in doing so, but I feel that the facts and data that I have been able to offer will be of much value in elucidating these rates and in conveying not only to the Senators who had not had the time and opportunity for studing the details of this measure but to the country at large what the rates in the bill really mean not only to the consumers of the country but to the legitimate business of the United States, especially the trade of the United States that must find an export market for its surplus.

Mr. McCUMBER. Mr. President, I think this is the fourth or, possibly, the fifth time the Senator from North Carolina [Mr. SIMMONS] has delivered a general speech upon the tariff question, and I think I am not stretching the truth in the slightest degree when I say that nine-tenths of the last speech was practically the same as the first and that each one has been along the same line.

The Senator to-day took 2 hours and 20 minutes to tell us what he had told us before, the first time in a 4-hour speech, the second time, I think, in about a 2½-hour speech, and it has been repeated in about the same language on each occasion.

Mr. President, there has been but one speech on this side of the Chamber which pretended to be a general discussion of the tariff question, involving the great principle of protection, and that was the speech made this forenoon by the Senator from Indiana [Mr. WATSON]. Now the Senator from North Carolina has put in another 2 hours and 20 minutes, and I wish to take 2 minutes in replying in substance to practically all that he has said.

The whole gist of his argument has been that if we are to get the interest upon what the countries of Europe owe us we must allow Europe to enter into our markets and take possession of them.

Mr. President, a few weeks ago the Russian government offered to settle the debts which they owed to foreign countries provided those countries would loan them the money with which to do it. That proposal has been ridiculed generally by the press of the country. Germany a short time ago said to the Reparation Commission, "If you will loan us the money with which to pay, we will pay you the reparations." That suggestion, too, has been ridiculed by the press of the country. If a debtor should come to me and say, "I owe you $100 on my note, and if you will loan me $100 I will pay it," I think that proposal would generally be ridiculed. Yet that is exactly what the Senator from North Carolnia proposes as a settlement of the indebtedness owed by Europe to the United States.

He quotes England, for instance, as saying to us that the only way they can pay us the $200,000,000 of interest due is for us to open our markets to her goods. Very well; let us suppose that she makes 10 per cent upon her goods sold in this country. That would mean that we would have to surrender the manufacture of $2,000,000,000 worth of goods in order to allow Great Britain to enter the American market and make enough upon her imports to pay us $200,000,000 of interest which she owes us. We decline to do that. She says to us in effect, "Close down your mills which produce $2,000,000,000 worth of goods; put out of employment half a million American workmen, and give us the market for that much goods and we will pay the interest." We say, however, we will not do that.

The Senator from North Carolina has not told us in all of his argument what we are going to do with the half a million of workmen who would walk the streets if their occupation were taken away on account of the closing down of the mills in which they are employed. We on this side of the Chamber say it is a thousand times better that we do not get a red cent from our debtors than to close down American business or to surrender $2,000,000,000 of it to Great Britain in order that she may pay the interest upon the debt she owes us. I believe, Mr. President, that we should be for America; that we should keep open our mills and our factories and keep our men employed. That is worth more to us than all of the interest that could be paid in a year or ten years or a thousand years from our debtors. That is what we are seeking under the terms of the pending bill.

The Senator from North Carolina says that we have lost $600,000,000 in our trade with Canada because of the emergency tariff law. He says that law is the cause of that loss in trade. That is a very fine argument, but in the very next breath he will say that the cause of our declining commerce is the depression throughout the world. We have lost just as much of our trade and commerce elsewhere. If he will take hold of one horn of the dilemma and say that our business has decreased generally because of world depression, then we will all agree with him that that is the principal cause.

But, Mr. President, we are not meeting merely the condition of to-day. Europe has been paralyzed. She is scarcely on her feet to-day. She has not the goods to export in any great quantities to the United States to-day, but she has the ability, the man power and the woman power, to produce them; and as soon as she can again get upon her feet and start all her factories at work, with the American wage practically double and the foreign wage practically cut in two, no man on earth with ordinary common sense can deny the truth that she will be a stronger competitor in our markets than ever before, and no man can deny that as she becomes a stronger competitor we will need a stronger barrier to hold our own markets against competition.

That is what this bill seeks to do. It does not for a single moment seek to exclude goods. There is not an item in the bill, outside of those that are covered by the embargo, that will not allow importations, and in time sufficient importations to put the foreigner at least on equal ground with the American, and in many instances gives him an advantage over the American producer unless we enormously decrease our own wages. Any one who looks over the situation and says that any one of these rates, other than those contained in the embargo provisions covering dyes, is a prohibitive rate, knows that he is not giving us the true facts.

The time will soon come when we will take the time to answer these so-called Republican papers which are representing only the interests of the importer. We shall be able to show the profits of the manufacturer compared with the enormous profits of the importer who is being represented by this subsidized press—subsidized through the payment of immense sums for advertising—which is willing to destroy the manufacturing interests for the benefit of a few thousand importers.

Mr. President, it is said that these long addresses that we hear every day or two on the other side are necessary in order to explain this bill, so that the American people will be able to understand what it means. When the American people have read an assertion once, they understand English, and do not need to have it repeated 4,000 times in order to comprehend the simple English statement; and yet they tell us, "Oh, no; we are not trying to delay this bill. We can speak three or four hours at a time, and then vote on one or two little items a day, but we are not delaying it at all. We are just trying to explain to the American people its iniquities."

Mr. President, I hope now that we can return for the moment to the real question. It is a hard question, we will admit, either to defend or to attack. We do not, as Repub-

licans, believe in embargoes; but the dye question, the chemical question, raised in the American mind an apprehension which grew out of the war such as has never before faced the American public; and to develop the chemical industry, the dye industry, with all it meant, we placed an embargo, first recommended by a Democratic President, and rightly recommended, to establish an American industry that might protect us and be useful in time of war.

Mr. KING. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Utah?

Mr. McCUMBER. I do.

Mr. KING. I think the Senator is in error—at least, I may have misunderstood his position—in assuming that the embargo feature is before us to-day. It is paragraphs 25 and 26 of the chemical schedule, as I understand, that we are considering to-day.

Mr. McCUMBER. Yes; but I intend to bring the embargo provision right on in connection with them. It was understood that we would take up the dye-embargo part of the bill, so that we could consider and dispose of all of the dye propositions at one time.

Mr. KING. If the Senator will pardon me, I do not know how he got such an understanding. I never so understood it, and I always opposed that. In fact, I have not understood that we were to consider anything but paragraphs 25 and 26, because I shall oppose bringing forward the embargo provision, and I think it would be very unfair to bring it forward, because that is not under consideration now, and has not been reached.

Mr. McCUMBER. It is all on the same subject, Mr. President. One can hardly consider the two paragraphs mentioned by the Senator without considering them in connection with the dye embargo. It was my understanding, and it was reiterated several times, that we would desire to take up the whole question of dyes at one time, but we can consider only these two paragraphs first. I can not tell how much time they will take; I hope not much longer; but I think we can settle on whether we will follow them with the dye embargo when we get through with these two.

Mr. FRELINGHUYSEN. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from New Jersey?

Mr. McCUMBER. I yield the floor.

Mr. KING. If the Senator will pardon me, I approached the Senator from North Dakota some time ago and asked that the consideration of paragraphs 25 and 26 be postponed until we reached the embargo provision, so that they could be considered at the same time. The Senator from North Dakota, as I understood him, when I made that suggestion to him several weeks ago, assented to it; I will not say definitely, but he indicated that as far as he knew that would be agreeable.

Mr. McCUMBER. I thought they ought to come together, whichever way we brought them, either bringing the last one up to these, or bringing these further along to the last section.

Mr. KING. So just before we reached paragraphs 25 and 26 I suggested to the Senator that they go over until we reached the embargo provision. Thereupon the Senator from North Dakota, as I understood him, rather demurred, and said that he would like to consider paragraphs 25 and 26 when they were reached in their regular order. I told him that of course I could not object to that procedure if he insisted, but that I hoped he would permit the consideration of paragraphs 25 and 26 to go over until we reached the embargo.

I confess that I was somewhat disappointed that the Senator should call up paragraphs 25 and 26 before we reached the embargo, but I felt, in view of the fact that they are there, that he could insist upon disposing of the amendments to paragraphs 25 and 26 at this time; but I shall object now to taking up a provision further along in the bill. Indeed, I think it would be a violation of the unanimous-consent agreement to take up the amendments and consider them first.

Mr. McCUMBER. That provision is an amendment.

Mr. KING. No; but I mean in the regular order. The understanding was that we would take up the amendments in the regular order.

Mr. McCUMBER. No, Mr. President; there was no understanding about the regular order, and I have broken the regular order time and time again, not only at the request of the Senator now speaking but at the request of other Senators, for their convenience. I have tried to accommodate them in every possible way, and I want to assure the Senator now that I will try to accommodate him.

Mr. KING. Let me say to the Senator that the Senator from New Hampshire [Mr. MOSES] wants to be here when the embargo provision is up for consideration; but, of course, I do not concede that it is up for consideration to-day, and it will not be until we reach it in regular course in the consideration of the bill.

Mr. McCUMBER. Paragraph 25 is up now.

Mr. KING. Yes; paragraph 25 and paragraph 26.

Mr. McCUMBER. Paragraph 26 will be up when we get through with paragraph 25.

The PRESIDING OFFICER. Will the Senator pardon the Chair? The Secretary advises the Chair that there are three amendments in paragraph 25, and that they have all been agreed to, and that paragraph 25 is disposed of.

Mr. KING. Well, Mr. President, that is not——

The PRESIDING OFFICER. The Chair is only stating what he has been advised.

Mr. FRELINGHUYSEN. Mr. President, am I recognized?

The PRESIDING OFFICER. Just a moment. The Secretary states that on May 12 the first amendment was agreed to, and on June 1 the second and third amendments were agreed to. Now the Senator from New Jersey is recognized.

Mr. FRELINGHUYSEN. Mr. President, as I understand the record, last week we debated paragraph 25. The Senator from Utah offered a motion that we disagree to it. That was defeated, and then the committee amendment was agreed to; and, as I understand, the paragraph, with the committee amendments, has been passed and we are now on paragraph 26.

Mr. KING. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from New Jersey yield to the Senator from Utah?

Mr. FRELINGHUYSEN. Yes.

Mr. KING. I stated during the discussion that I had two amendments to strike out "50" and insert "30," and then that I intended to offer an amendment to the "7 cents per pound." If that may be done at this time——

Mr. FRELINGHUYSEN. Of course, that will be up to the chairman of the committee; but I hope that this whole dye question can be taken up at one time.

Some time past, in debating the question of the duty on antimony, we skipped one of the paragraphs and took up paragraphs further along in the bill, but they related entirely to the other paragraph and cleaned it all up at one time. The embargo and the expansion of the embargo are in two separate paragraphs further along in the bill, but they relate entirely to the dye schedule; and if we are going to settle what our tariff policy shall be on dyes, with the experts here anxious to clean up this schedule and leave and go to their other duties, the practical way to do it is to clean it up at once. So I hope that after paragraph 26 has been debated and settled the chairman will urge the Senate to continue the discussion of the dye embargo and its extension, so that the whole question can be cleaned up at one time.

Mr. KING. All I can say is that, of course, I shall oppose that. I think it would be manifestly unfair and manifestly unjust to import a section down at the tail end of the bill up to this schedule and consider it now. I have no objection to disposing of paragraphs 25 and 26, and have no objection to any Senator discussing the embargo as much as he pleases; but I shall certainly object to the Senate voting upon the embargo now. I should consider that it would be a violation of the rule which we announced at the beginning, namely, that we would take up for consideration the amendments, proceeding with them in order, and pass upon them, going down through the bill; then, after the Senate amendments had been disposed of, that we could recur to the beginning and offer such amendments to the text of the bill as were desired by Senators.

Mr. FRELINGHUYSEN. Mr. President, that is a very impractical and scattering way to do it. At the suggestion of the other side, we settled the entire question of one product, and we skipped all over the bill to do it. I think if we are going to settle our tariff policy on dyes, we ought to settle the entire question, debate it at one time, and close it up. That is my position, and I hope we can do it.

I want to say to the Senator from Utah that the suggestion of the policy of clearing up a whole subject at one time came from the other side, and the committee accepted the suggestion. Therefore, we are not departing from any rule or understanding. We are simply clearing up one schedule at a time in a practical way, and I hope the Senator will not make any objection to a continuation of the debate and the final settlement of the entire question.

Mr. KING. May I say, in response to my good friend, that there was never any suggestion at all that we should bring the embargo provision up to the chemical schedule and consider it at this time. I did suggest to my good friend, the chairman of the committee, before we began the debate, that paragraphs

25 and 26 be relegated to that part of the bill where we would discuss the embargo, as I thought they might with propriety be discussed at that time, and after talking with him I so announced to the Senator from New Hampshire [Mr. MOSES]. Later I talked with the chairman of the committee, and he stated that when we reached paragraphs 25 and 26 we would consider that matter, but I never did and never would assent to the proposition of discussing the embargo now, or at any time when we were discussing paragraphs 25 and 26. I want to say to the Senator that, in my opinion, it would be rather unfair to the Senator from New Hampshire to take up the embargo question now.

Mr. McCUMBER. Let me say to the Senator from Utah that the chairman will try, as far as he can, to accommodate all Senators and to carry out the general understanding. My own understanding was that when we got to the dye matter it would make very little difference whether we put paragraphs 25 and 26 over to the time we should consider the embargo provision, or should bring the embargo matter up immediately after we considered those paragraphs; but I did think we could dispose of all of them at one time. I am informed, and have had some talk with the Senator from New Hampshire myself, that if we will eliminate from this provision in paragraph 26 that which belongs to the administrative portion, he would not care even to be present when the matter was discussed.

Mr. KING. That is, when paragraphs 25 and 26 were discussed?

Mr. McCUMBER. No; as I understand, even when the embargo was discussed.

Mr. KING. I do not so understand it. I think the Senator is in error.

Mr. McCUMBER. I think not; but I will look over the RECORD while we are discussing paragraph 26 and the items in it, and will try to carry out what appears to be the understanding.

Mr. KING. Let me say to the Senator that the Senator from North Dakota never had any understanding from me or from this side, that we would consent to the bringing up of the embargo provision, and acting upon it when we were acting upon paragraphs 25 and 26, because I took the precaution at the beginning to state to the Senator that I would prefer that paragraphs 25 and 26 be passed over until we reached the embargo, and I never assented, nor has anybody upon this side assented, to the bringing forward of the embargo provision.

Mr. McCUMBER. I think there is sufficient in the bill to keep us busy for some time, and I have stated that I would try to accommodate all Senators. I have given them notice that we would take up and dispose of the dye proposition next, both the embargo and the other matter, but I think rather than to mislead, if that has misled any Senator, I will try my best to accommodate each Senator in the matter of considering these questions. However, I do want to look over the RECORD and see what the understanding was.

Mr. KING. I do not know what understanding the Senator had with others, but he had no understanding with me——

Mr. McCUMBER. I will take the Senator's word for that.

Mr. KING. Because the Senator will recall very distinctly that in the beginning I asked that paragraphs 25 and 26 go over until we reached the embargo provision. I have no objection to proceeding with paragraphs 25 and 26.

Mr. McCUMBER. I understand paragraph 25 has been disposed of.

The PRESIDING OFFICER. The present occupant of the chair is advised that the record discloses that all the committee amendments offered to paragraph 25 have been disposed of.

Mr. KING. I did not so understand.

The PRESIDING OFFICER. The Secretary will state what the record discloses as to paragraph 25.

The ASSISTANT SECRETARY. The amendments in paragraph 25 as reported by the committee have each and all been agreed to as reported.

Mr. KING. I did not so understand, and I want to move to reconsider, merely for the purpose of offering an amendment which I indicated in my remarks the other day I should offer. I want to be entirely frank with the Senator, and I say to him that I am not quite clear whether under the unanimous-consent agreement I could attack the specific rates, and if the Senator raises the point of order, I shall submit it to the Chair and take his ruling.

Mr. McCUMBER. If we can get a vote on it right away, I will ask unanimous consent that the vote by which the amendment was adopted may be reconsidered.

Mr. KING. I shall take but very few minutes, I will say to the Senator.

Mr. McCUMBER. I ask, then, that the vote by which the committee amendment, on page 10, line 17, was agreed to be reconsidered.

The PRESIDING OFFICER. Is there objection?

Mr. FRELINGHUYSEN. Reserving the right to object, I should like to ask the Senator from Utah if it is his purpose to offer an amendment to this paragraph for the record?

Mr. KING. Yes.

Mr. FRELINGHUYSEN. Does the Senator intend to take much time on it? We debated it the other night at length.

Mr. KING. Not at all. I stated to the Senator on Saturday evening that it would not take long.

Mr. FRELINGHUYSEN. I will not object, then.

The PRESIDING OFFICER. The Senator from North Dakota asks unanimous consent that the vote by which the committee amendment, on page 10, line 17, was agreed to be reconsidered. Is there objection? The Chair hears none, and it is so ordered.

Mr. KING. I offer the following amendment: I move to insert, in paragraph 25, line 17, after the numerals "1546," the following:

Valued not above 10 cents per pound, 50 per cent ad valorem and 3½ cents per pound; valued above 10 cents per pound, 30 per cent ad valorem and 7 cents per pound.

It introduces a classification.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Utah to the amendment of the committee.

The amendment to the amendment was rejected.

Mr KING. I reserve a separate vote in the Senate upon this and all other amendments which I have offered to these paragraphs.

The VICE PRESIDENT. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The first amendment of the committee in paragraph 26 was, on page 12, line 2, to strike out "gauiacol" and to insert "guaiacol."

The amendment was agreed to.

The next amendment of the committee was, on page 12, line 6, to strike out "35" and insert in lieu thereof "60," so as to read:

and all mixtures, including solutions, consisting in whole or in part of any of the articles or materials provided for in this paragraph, excepting mixtures of synthetic odoriferous or aromatic chemicals, 60 per cent ad valorem and 7 cents per pound.

Mr. KING. I move to amend the committee amendment as follows: On line 6, page 12, in lieu of the words "60 per cent ad valorem and 7 cents per pound" I move to insert the following:

valued not above 25 cents per pound, 35 per cent ad valorem and 3 cents per pound; valued above 25 cents per pound and not above 50 cents per pound, 35 per cent ad valorem and 5 cents per pound; valued above 50 cents per pound, 35 per cent ad valorem and 7 cents per pound.

That introduces three classes. The other evening I called attention to what I conceive to be the unfair basis upon which both these paragraphs were drawn.

Mr. FRELINGHUYSEN. Has the Senator from Utah any objection to having the amendment stated at this time?

Mr. KING. None at all.

The VICE PRESIDENT. The Secretary will state the amendment.

The ASSISTANT SECRETARY. It is proposed to strike out "60 per cent ad valorem and 7 cents per pound," on line 6, page 12, and to insert the following:

valued not above 25 cents per pound, 35 per cent ad valorem and 3 cents per pound; valued above 25 cents per pound and not above 50 cents per pound, 35 per cent ad valorem and 5 cents per pound; valued above 50 cents per pound, 35 per cent ad valorem and 7 cents per pound.

Mr. KING. I argued this question at considerable length the other evening, and I do not intend to consume any time in further presenting the facts in the case. I only want to call attention again to the situation.

In both paragraph 25 and paragraph 26 one classification of intermediates and dyes exists. Notwithstanding some dyes may be sold at 1¾ cents per pound, the pre-war price, some at 2 cents, some at 6, some at 7, some at 10, and others sold at very high prices, the same rates are prescribed—the same rates as to intermediates and the same rates as to the finished products of the dyes themselves. That seems to me to be manifestly unfair. I can not see how we can justify a duty which in some instances would amount to 400 or 500 or 600 per cent, and yet a commodity allied to it, indeed akin to the same product, would bear a duty of perhaps 100 per cent. Yet we

find such incongruities in the bill now before us. The same rate is imposed upon a product the import value of which is 2 or 3 or 4 cents a pound as is imposed upon an article the import value of which may be 60 cents per pound or $1 or more per pound.

I have no particular objection to the ad valorem except that it is too high, but it is the specific rate that I am criticizing particularly. A specific rate of 7 cents a pound upon a commodity the import value of which is 1¾ or 2 or 3 cents per pound would range all the way from 200 per cent to 300 or 400 per cent. That is what I am objecting to. It does seem to me that these articles lend themselves to a logical, to a proper, indeed to a scientific, classification. Many of the dyes, as we know, are cheap. Many of them, as we know, are costly. We have introduced into the other schedules varying rates depending upon a multitude of conditions. We say that some articles are luxuries, and we impose a much higher rate than we do upon articles which are much cheaper and which may be more commonly and universally used. I called attention the other evening to the fact that certain dyes—indigo, sulphur black, and others—are comparatively cheap and that their use is extensive. Now, to impose a 7-cent specific duty upon dyes or intermediates of a value of 1, 2, 3, 4, or 5 cents per pound and the same specific upon dyes that cost $1 a pound to me seems to be wholly unjustifiable.

Mr. President, I will be willing to take a vote.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Utah [Mr. KING] to the amendment of the committee.

Mr. KING. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. HALE (when his name was called). I transfer my pair with the senior Senator from Tennessee [Mr. SHIELDS] to the junior Senator from Maryland [Mr. WELLER] and vote "nay."

Mr. HARRISON (when his name was called). I transfer my general pair with the junior Senator from West Virginia [Mr. ELKINS] to the senior Senator from Texas [Mr. CULBERSON] and vote "yea."

Mr. JONES of New Mexico (when his name was called). I transfer my general pair with the Senator from Maine [Mr. FERNALD] to the Senator from Missouri [Mr. REED] and I vote "yea." I ask that this announcement of the transfer of my pair may stand for the day.

Mr. SIMMONS (when Mr. OVERMAN'S name was called). I wish to announce that my colleague [Mr. OVERMAN] is unavoidably absent. He is paired with the senior Senator from Wyoming [Mr. WARREN]. If my colleague were present, he would vote "yea."

Mr. SUTHERLAND (when his name was called). Transferring my pair with the senior Senator from Arkansas [Mr. ROBINSON] to the junior Senator from Oklahoma [Mr. HARRELD], I vote "nay."

Mr. UNDERWOOD (when his name was called). I am paired with the senior Senator from Massachusetts [Mr. LODGE], who is unavoidably absent. I transfer my pair to the junior Senator from Rhode Island [Mr. GERRY] and vote "yea."

Mr. WARREN (when his name was called). I transfer my general pair with the junior Senator from North Carolina [Mr. OVERMAN] to the senior Senator from Pennsylvania [Mr. CROW]. I ask that this transfer may stand for the day. I vote "nay."

Mr. WATSON of Indiana (when his name was called). I have a general pair with the senior Senator from Mississippi [Mr. WILLIAMS], which I transfer to the junior Senator from South Dakota [Mr. NORBECK], and vote "nay."

The roll call was concluded.

Mr. COLT. I transfer my general pair with the junior Senator from Florida [Mr. TRAMMELL] to the junior Senator from Oregon [Mr. STANFIELD], and vote "nay."

Mr. DIAL. I transfer my pair with the senior Senator from Colorado [Mr. PHIPPS] to the senior Senator from Nebraska [Mr. HITCHCOCK], and vote "yea."

Mr. JONES of Washington (after having voted in the negative). I understand that the senior Senator from Virginia [Mr. SWANSON] has not voted. He is necessarily absent, and I promised to take care of him with a pair. However, I find I can transfer my pair to the junior Senator from New York [Mr. CALDER], which I do, and allow my vote to stand.

Mr. EDGE. I transfer my general pair with the senior Senator from Oklahoma [Mr. OWEN] to the senior Senator from New Hampshire [Mr. MOSES], and vote "nay."

Mr. BALL. I transfer my general pair with the senior Senator from Florida [Mr. FLETCHER] to the senior Senator from Kansas [Mr. CURTIS], and vote "nay."

Mr. DILLINGHAM. I have a general pair with the junior Senator from Virginia [Mr. GLASS]. I observe that he has not voted. I transfer my pair to the Senator from Illinois [Mr. MCCORMICK], and vote "nay."

Mr. MCKINLEY (after having voted in the negative). I transfer my general pair with the junior Senator from Arkansas [Mr. CARAWAY] to the senior Senator from Maryland [Mr. FRANCE], and allow my vote to stand.

Mr. JONES of Washington. I wish to announce the unavoidable absence of the senior Senator from Kansas [Mr. CURTIS]. He stands paired on this vote with the Senator from Florida [Mr. FLETCHER].

The result was announced—yeas 18, nays 40, as follows:

YEAS—18.

Ashurst	Jones, N. Mex.	Pomerene	Underwood
Dial	King	Sheppard	Walsh, Mont.
Harris	La Follette	Simmons	Watson, Ga.
Harrison	Norris	Smith	
Heflin	Pittman	Stanley	

NAYS—40.

Ball	Edge	McKinley	Shortridge
Brandegee	Ernst	McLean	Smoot
Broussard	Frelinghuysen	McNary	Spencer
Bursum	Hale	Nelson	Sterling
Cameron	Jones, Wash.	Newberry	Sutherland
Capper	Kellogg	Oddie	Townsend
Colt	Kendrick	Page	Wadsworth
Cummins	Ladd	Pepper	Warren
Dillingham	Lenroot	Poindexter	Watson, Ind.
du Pont	McCumber	Ransdell	Willis

NOT VOTING—38.

Borah	Gerry	Moses	Robinson
Calder	Glass	Myers	Shields
Caraway	Gooding	New	Stanfield
Crow	Harreld	Nicholson	Swanson
Culberson	Hitchcock	Norbeck	Trammell
Curtis	Johnson	Overman	Walsh, Mass.
Elkins	Keyes	Owen	Weller
Fernald	Lodge	Phipps	Williams
Fletcher	McCormick	Rawson	
France	McKellar	Reed	

So Mr. KING'S amendment to the committee amendment was rejected.

The VICE PRESIDENT. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The VICE PRESIDENT. The next amendment passed over will be stated.

The next amendment passed over was, on page 12, line 19, after the word "act," to strike out the words "no package containing" and to insert "it shall be unlawful to import or bring into the United States."

The amendment was agreed to.

Mr. KING. Mr. President, may I inquire of the Senator having the bill in charge if he is ready to offer the amendment which he indicated?

Mr. MCCUMBER. To strike out a portion of the next committee amendment? Yes.

Mr. KING. Would not that involve the amendment which has just been read by the Secretary?

Mr. MCCUMBER. I think not. But, Mr. President, if we may take a moment, not taking the amendments up in their regular order, I ask at this time that the Senate reject the portion of the committee amendment beginning with the word "Provided," in line 15, on page 14, and going down to and including line 16, on page 15.

In explanation I will simply state that the proviso covers the importation of goods on which there is a trade-mark held or supposed to be held by American manufacturers. Whether it is important to insert such a provision in a tariff bill I am not prepared at this time to say definitely, but I am quite certain that in the form in which it is herein written it ought not to be inserted at any place in the bill except in the administrative provisions, and not even there without a very material amendment to it. Therefore, without prejudicing any right to bring the matter up in some form in the administrative provisions, but certainly not with my consent in the form in which it is now written, I ask that that portion of the committee amendment which I have indicated may be disagreed to.

The VICE PRESIDENT. The amendment proposed by the Senator from North Dakota to the committee amendment will be stated.

The ASSISTANT SECRETARY. On page 13, line 13, beginning with the word "particular," the Committee on Finance proposes to strike out down to and including the numerals "1546," in line 23, and to insert the words printed in italics from that point down to the end of line 16, on page 15.

The Senator from North Dakota now proposes from the portion proposed to be inserted, after the numerals "1546," on page 14, line 15, to strike out the proviso.

Mr. KING. A parliamentary inquiry, Mr. President.

The VICE PRESIDENT. The Senator will state it.

Mr. KING. I desire before this paragraph is finally disposed of to move to strike out lines 11, 12, 13, 14, and 15, down to the word "Provided," which is included in the committee amendment.

The VICE PRESIDENT. The Senator from Utah will have a right to offer his amendment to the amendment after the pending amendment to the amendment shall have been disposed of.

Mr. KING. I have no objection to taking a vote on the amendment to the committee amendment.

The VICE PRESIDENT. The question, as the Chair understands, is on the amendment of the Senator from North Dakota [Mr. MCCUMBER] to the committee amendment.

The amendment to the amendment was agreed to.

The VICE PRESIDENT. The question now is on agreeing to the committee amendment as amended.

Mr. KING. On page 14 I move to strike out lines 11, 12, 13, 14, and 15 of the committee amendment.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Utah to the committee amendment, which will be stated.

The ASSISTANT SECRETARY. In the committee amendment, on page 14, after line 10, it is proposed to strike out:

Provided further, That any article or product which is within the terms of paragraphs 1, 5, 35, 37, 56, 63, 79, or 1578, as well as within the terms of pargraphs 25, 26, or 1546, shall be assessed for duty or exempted from duty as the case may be under paragraphs 25, 26, or 1546.

Mr. KING. Mr. President, just a word. It was developed during the discussion the other day that the lines which I have moved to strike out sought to take from various other provisions of the bill the articles therein referred to and to subject them to the rates of duty that are found in this paragraph provided that any of the compounds were derived from coal tars or from any of their derivatives.

I call attention to the fact that medicines and pharmaceuticals that are found in paragraphs 1, 5, 35, 37, 56, 63, 79, and perhaps in paragraph 1578 bear in those particular paragraphs in which they were found a lower rate of duty than that which is prescribed in paragraph 26. This proviso is for the purpose of taking those particular medicines and medicinal compounds and pharmaceuticals out of those paragraphs, where the average duty, perhaps, is 20 or 25 per cent ad valorem, possibly in some instances higher, and fastening upon them higher rates of duty than would otherwise apply.

The question is this: Is it fair and just and right to establish two different rates of duty for the same character of compounds that bear the same name, have the same therapeutic effect, and are used for the same purpose, and are known by the trade, perhaps, by the same name, and to subject those medicines and compounds to different rates of duty simply because one may be made from coal-tar products or from coal-tar derivatives and others from natural products? I submit that it is unfair and can not be defended; and yet this provision is aimed directly at the accomplishment of that end. If my amendment shall prevail, then those paragraphs which we have considered and which deal with those medicine compounds will bear the same duty that we understood they would bear when we voted upon them. If we adopt the amendment offered by the committee, then, of course, we increase the duties upon some of those products upon which we have already voted and as to which we have understood the rate of duty was fixed. We are making a sort of a pet of the coal-tar products, the by-products of the coke oven. We are saying to two individuals, one of whom manufactures medicines out of natural products and another manufactures the same class of medicines out of coal-tar products, we will differentiate in favor of the latter, so that the man who manufactures certain products used in medicines out of coal tar shall have a higher rate of duty than the individual who manufactures the same kind of a medicine out of some natural product. I can not find any justification for it, and therefore I have offered the amendment to which I have called attention. I presented this matter very fully the other day in the discussion of paragraphs 25 and 26, and I do not care to further elaborate the subject.

Mr. SMOOT. Mr. President, I merely wish to state what I said the other night as to why this provision was put in the bill. The Tariff Commission called attention to the necessity of it, as will be found on page 83 of the Summary of Tariff Information, which I am not going to take the time of the Senate now to read. However, the paragraphs mentioned refer to acids, chemicals, ethers, esters, flavoring extracts, perfumes, colors, compounds of crude oil tar, and explosives not specially provided for.

Would it be fair not to provide a duty upon those articles if they are from coal tar or derivatives of coal tar? The paragraphs enumerated seek specifically to provide for these items where they are not derived from coal tar. There must not be a conflict here, and therefore it is absolutely necessary to include them in this paragraph. They are not provided for in any other part of the bill; but they are provided for in the paragraphs having reference to coal-tar derivatives, and are to be assessed as provided in paragraphs 25 and 26, one of which has reference to intermediates and the other to coal-tar products themselves. Why? Because they are derivatives of coal tar; and chemicals, ethers, esters, perfumes that are derived or produced from coal tar ought to fall in the paragraph in which coal-tar products are taken care of. That is why the particular paragraphs are enumerated in paragraph 26, and why the commodities referred to have imposed upon them the rates of duty provided in that paragraph.

Mr. KING. Mr. President, if I understand my colleague—and perhaps I did not fully comprehend his statement—from paragraph 5, which reads—

all chemical elements, all chemical salts and compounds, all medicinal preparations, and all combinations and mixtures of any of the foregoing, all the foregoing obtained naturally or artificially and not specially provided for, 25 per cent ad valorem—

There are to be excepted those products which are manufactured from coal tar or its derivatives. It appears that, unless there are imported into that paragraph the words "coal tar or derivatives of coal tar," the construction placed upon it by my colleague must be wrong.

Mr. SMOOT. No. It says in each one of those paragraphs "not specially provided for"; and therefore, just as my colleague has said, the articles which are specially provided for are transferred to paragraph 26, and they are to be assessed on the basis of paragraphs 25 and 26. The reason of that is that they are derived from coal tar. Those that are not derived from coal-tar products are taken care of in each one of the paragraphs named in the amendment, namely, paragraphs 1, 5, 35, 37, 56, 63, 79, 156, 146.

My colleague is right in the statement that the rates are higher under paragraph 26 than under the other paragraphs, because of the very fact that the products are derived from coal tar. If that industry is to be protected as a whole, then it is proper that articles derived from coal tar should fall in this paragraph, no matter what the rate is upon other items in the bill. The derivatives of coal tar, whether they be chemicals or whether they be ethers or esters or perfumes or colors not specially provided for, ought to fall in this paragraph. As to the rate, as I said the other night to my colleague, I have not been discussing that at all.

Mr. KING. Mr. President, I agree entirely with what the Senator from Utah states that the provision we are now discussing, which is involved in my amendment, is intended to place all medicines, flavoring extracts, and various other products which are derived from coal tar or any of its derivatives in this paragraph for the purpose of fixing the rate of duty.

That is what I am complaining about. Take paragraph 35, under the head of "ethers and esters." It provides that diethyl sulphate and dimethyl sulphate shall bear a rate of duty of 15 cents per pound; ethyl acetate, 3 cents per pound; ethyl chloride, 15 cents per pound; ethyl ether, 4 cents per pound; and ethers and esters of all kinds not specially provided for, 30 per cent ad valorem.

Mr. SMOOT. But that does not change any of the items that the Senator has just read.

Mr. KING. I agree with the Senator.

Provided, That no article containing more than 10 per cent of alcohol shall be classified for duty under this paragraph.

It is possible that there may be ethers and esters that are the products of coal tar or some of the derivatives of coal tar. There are other paragraphs here; for instance, there are explosives that may be manufactured from certain products, not coal tar or the derivatives of coal tar, and they bear a certain rate of duty; but if the explosives are manufactured in part from coal tar or the derivatives of coal tar, then a different rate of duty is prescribed. The senior Senator from Utah is correct in stating that the provision now under consideration is intended to impress upon all those commodities the same rates that are found in paragraph 26, notwithstanding the fact that other commodities may be manufactured from other products than coal tar or its derivatives and bear a lesser rate of duty.

It is simply, as my colleague says, a question of policy: Shall we discriminate? Shall we say to the man who is engaged in the manufacture of any of these products out of coal tar or any of the derivatives of coal tar, "We are going to give you an advantage. You are a particular pet of the Government, and

we will permit you to enjoy a higher rate of duty than we give to other persons and to other manufacturers"?

That is all there is to this amendment. I insist that the same commodity, the same product, whether it come from coal tar or a derivative of coal tar or some natural product, shall bear the same rate of duty, no higher and no lower, than if it were derived from some other product. In other words, let us treat all commodities of the same character that serve the same purpose, that are applied to the same end, in the same way. Let us impose the same rate of duty upon explosives, whether they are made from the products of coal tar or whether they are made from some other base or primary compound.

I insist that medicines, such as salol, phenacetine, acetanilid, aspirin, and so forth, that may be made from coal tar shall bear the same rate of duty that they would bear if they were made from some other primary compound; but we propose, as I state, to lift them out of the other paragraphs if they are the product of coal tar, and subject them to a higher rate of duty. I think it is manifestly unfair, that it is giving to the manufacturers who are engaged in the coal-tar product business an advantage over those who may be engaged in the production of the same products from other primary compounds.

Mr. SMOOT. Mr. President, let me suggest to my colleague that the discrimination would be the other way about. Why should we give a certain rate upon coal-tar products as found in paragraphs 25 and 26 and take out these little items that are coal-tar products and put them somewhere else? That is where the discrimination comes. Why should one manufacturer, manufacturing articles from coal tar, have one rate of duty, and then, because he made an ester or an ether, why should it be taken out and put somewhere else? All of the items manufactured from coal-tar products ought to fall in one paragraph, as I have already said; and unless they do there is a discrimination between the manufacturer who makes products from coal tar and the manufacturer who makes them from other bases.

It seems to me this is the only logical way to write a bill. As I said before, as to the rates, that is another matter.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Utah [Mr. KING] to the amendment of the committee.

The amendment to the amendment was rejected.

The VICE PRESIDENT. The question now is on agreeing to the committee amendment.

The amendment was agreed to.

Mr. KING. Mr. President, I move to strike out, on line 9, page 14, the word "lowest" and insert in lieu thereof the word "highest," so that it will read:

That if a dye or other article was or is ordinarily used in more than one commercial strength, then the highest commercial strength shall be adopted as the standard of strength for such dye or other article.

Mr. McCUMBER. Will the Senator repeat where his amendment is?

Mr. KING. On page 14, line 9, strike out the word "lowest" and insert the word "highest."

I called attention the other day, when we were engaging in a general discussion of paragraphs 25 and 26, to the fact that before the war, and now, dyes are imported in different standards of strength. I suggested that it would perhaps result in the imposition of exceedingly high rates of duty if we committed to the Treasury Department the authority and the power to apply different specific rates, or, rather, to double or treble the specific rates, as may be done under this provision.

Assume that a given dye has been imported in the past under two standards of strength, 20 per cent and 40 per cent. Assume that the overwhelming majority of that particular product came in under the 40 per cent standard. Nevertheless, if the lesser standard was sufficiently used to enable it to be said that it was commercially used, the Treasury Department under this bill might adopt that lower standard, and in that event would apply a 14-cent specific rate to the product, adopting the lower as the basis of the application of the specific rate. I suggested that that was manifestly unfair, and it seems so to me now.

I therefore have offered the amendment to fix the highest rate where it was commercially used as the standard for the application of the specific rate. If the highest standard was 80 per cent pure, then 80 per cent pure will be the standard now for attaching this specific rate of 7 cents per pound. If the highest standard was 60 per cent, then that would be the one which would govern in the future; but where there have been varying standards obviously it would lead to confusion, and I make the prediction now that if the bill shall pass in this form there will be not only confusion but litigation as the result of the particular provision now under consideration.

Mr. SMOOT. Mr. President, if the amendment is agreed to, I can think of a great many cases where it would be most unjust.

Some lines of business can only use these dyes in a paste form. In other words, they are not prepared to take the powdered form and make it into a paste and do it successfully and do it economically. The other evening I gave a history of the manufacturing of the pastes as originally turned out from the plants, and then improvements being made by producing the same article not in paste form but in powdered form, thus obviating the shipping of the water—for that is all there is in the paste—from a foreign country to all parts of the United States where they use the article. Therefore it was unjust; and if we put it now upon the highest strength, every institution in the United States that could not use the powdered form, but was required under its conditions to use the liquid form, would have to pay, perhaps, 20 per cent more duty, 30 per cent more duty, or 50 per cent more duty. If a paste was 40 per cent and a powdered form was 90 per cent, and the man could not use the powdered form but had to use the liquid form, he would be penalized for that reason.

Whatever rate is established ought to be established upon the lowest standard strength, and then everyone who wanted to use the lowest could use it; and when a man used a higher strength, whether it was a double-strength paste or whether it was in powdered form, he would pay exactly the same rate.

Mr. KING. Mr. President, will my colleague yield?

Mr. SMOOT. Yes.

Mr. KING. I have no objection to that, providing you will strike out the provision which ties the bill to antecedent conditions. If it will apply to matters in futuro, then the argument of my colleague is sound; but the proposition is to go back to the past and take the precedents from the past as the basis for the standardization, whereas we know, as my colleague stated the other evening, that in the past there were various standards, high and low, and if we should take the lowest standard then existing and import it into the present and the future and base the rates upon that lowest standard, obviously there will be many injustices. If, however, we declare that the lowest commercial standard in the future shall govern, then I think my colleague's argument is sound.

Mr. SMOOT. Now, let me call my colleague's attention to the fact that they all fall in this same bracket now, developed since the war or during the war, and most of them have been developed during the war. There were very few coal-tar products that were developed before the war that come in either paste form or powdered form. I mentioned a few of them the other night. The great line of these articles has been developed during the war, and there can then be no conflict in passing this bill.

Mr. KING. Mr. President, if my colleague will strike out the words "was or," I will withdraw my amendment. Then it will read:

That if a dye or other article is ordinarily used in more than one commercial strength.

If my colleague will do that, so that it will apply in futuro, I have no objection; but if you go back 5, 10, or 15 years, as you may under this bill, beyond the period of the war, it does seem to me that manifest injustices may be done.

Mr. SMOOT. I can not see it that way. I very much prefer to take the lowest strength and have a rate apply to that, because if you do not do it you are bound to get into litigation. You can not keep away from it. If you take the highest strength as the basis every shipment that comes in below that strength would have to pay the higher rate, and that would be unfair. The highest strength, when it is perfected, is found in the powdered form, and everybody who would use it other than in the powdered form, as I have already said, would be penalized, and I do not think that would be right. The rate ought to be based upon the lower strength, and then, of course, built up to the higher strength.

Mr. KING. I agree with what my colleague says, that there would be some injustice if the amendment which I have offered should prevail; but I have measured the injustices which would arise under that amendment if it should prevail with the injustice which will arise if the committee amendment prevails, and from all the information I can obtain, the injustices would be less in the former than in the latter case.

I concede that a rate based on the highest standard might be quite oppressive upon some of the importers, whereas the adoption of a rate based on the lowest would relieve them, but it would impose burdens upon a larger number of individuals, because from all I can learn a great majority of those who have imported have not imported the lowest standard, but what might be denominated an intermediate standard, and the imposition of the rates based upon the lowest standard would merely mean, not a 7-cent specific but a 14-cent specific, and possibly a 21-cent specific rate, so that the bill as reported, in my opinion,

will impose a 14-cent specific rate, or a 21-cent specific rate in many instances, instead of a 7-cent specific.

Mr. SMOOT. I take it for granted that my colleague has not had his attention called to the first part of this paragraph, or he would know that we would have to use the words "was or is" in order to cover both sections. It provides:

Provided further, That in the enforcement of the foregoing provisos in this paragraph the Secretary of the Treasury shall adopt a standard of strength for each dye or other article which shall conform as nearly as practicable to the commercial strength in ordinary use in the United States prior to July 1, 1914.

That is prior to the war. Then it goes on:

That if a dye or other article has been introduced into commercial use since said date, then the standard of strength for such dye or other article shall conform as nearly as practicable to the commercial strength in ordinary use.

That only applies, as I said, to the articles which have been developed since the beginning of the war; and then, of course, using those two standards, we say:

If a dye or other article was—

That is, before the war—

or is ordinarily used in more than one commercial strength, then the lowest commercial strength shall be adopted as the standard of strength for such dye or other article.

So I think my colleague will notice now that we have to use the words "was or is."

Mr. KING. We would have to amend, and I intended to suggest an amendment in line 3 to deal with that question. I think my colleague now concedes, however, that under the amendment tendered by the committee the period prior to the war could be resorted to for the purpose of determining the standard.

Mr. SMOOT. That is, as to articles "in ordinary use in the United States prior to July 1, 1914." I will say to the Senator that there were very few of them.

Mr. KING. Prior to the war?

Mr. SMOOT. Yes; prior to the war; and I know of only one or two that are made now in powdered form. Of course, that is the highest strength.

Mr. KING. Let me say to the chairman of the committee that I shall withdraw my amendment, with the understanding that later, upon further consultation with those who are familiar with this matter—dye men, manufacturers, and importers—if the conditions to which I have referred should be found to exist, I may renew my motion.

Mr. SMOOT. I want to call the Senator's attention to one other matter, so that he can give it consideration at the time he takes this up for further study. The Senator will notice that we use the words "ordinary use." Those words are used for the reason that if a sample of very low strength were sent over from a foreign country to America for a special purpose, it never would be taken as the basis of imposing a tax. It would have to be ordinarily used in the United States.

Mr. KING. For commercial purposes?

Mr. SMOOT. For commercial purposes.

Mr. KING. I understand that, and that is the reason why I stated it would lead to confusion and perhaps to litigation, because the phrase "ordinary use" is a very elastic term. Is it "ordinary use" in Boston, "ordinary use" in Philadelphia, "ordinary use" in some textile plants, or "ordinary use" where? If it is a small community or a small State, with a homogeneous population, or a limited area, in which the textile interests are located, then it would not be susceptible of so much confusion or controversy.

Mr. SMOOT. It could not lead to any confusion on the part of the manufacturers, because all of these items are sold and advertised, and the trade know them just as well as they know what sugar is or what flour is, or what anything else is. There is no more trouble with it than with the three grades of flour.

The next amendment was, on page 12, line 19, after the word "act," to strike out "no package containing" and to insert "it shall be unlawful to import or bring into the United States"; and in line 22, after the word "compound," to strike out "shall be admitted to entry into the United States unless such package" and to insert "unless the package, case, or container," so as to make the additional proviso read:

Provided further, That beginning six months after the date of passage of this act it shall be unlawful to import or bring into the United States any such color, dye, stain, color acid, color base, color lake, leuco-compound, indoxyl, or indoxyl compound, unless the package, case, or container, and the invoice shall bear a plain, conspicuous, and truly descriptive statement of the identity and percentage, exclusive of diluents, of such color, dye, stain, color acid, color base, color lake, leuco-compound, indoxyl, or indoxyl compound contained therein.

The amendment was agreed to.

The next amendment was, on page 13, line 5, after the word "act," to strike out "no package containing any such article shall be admitted to entry into the United States if it or the" and to insert "it shall be unlawful to import or bring into the United States any such color, dye, stain, color acid, color base, color lake, leuco-compound, indoxyl, or indoxyl compound if the package, case, or container, or the"; in line 11, before the word "article," to strike out "such" and to insert "the"; and, in line 13, after the word "any," to strike out "particular; in the enforcement of the foregoing provisos the Secretary of the Treasury shall adopt a standard of strength for each dye or other article which shall conform as nearly as practicable to the commercial strength in ordinary use in the United States prior to July 1, 1914: *Provided further*, That any article or product which may come within the terms of other paragraphs of this act, as well as within the terms of paragraphs 25, 26, or 1546, shall be assessed for duty or exempted from duty, as the case may be, under paragraphs 25, 26, or 1546," and to insert "particular," so as to make the additional proviso read:

Provided further, That on and after the passage of this act it shall be unlawful to import or bring into the United States any such color, dye, stain, color acid, color base, color lake, leuco-compound, indoxyl, or indoxyl compound if the package, case, or container, or the invoice bears any statement, design, or device regarding the article or the ingredients or substances contained therein which is false, fraudulent, or misleading in any particular.

Mr. KING. I would like to inquire of the chairman of the committee whether an effort is made in the case of other products to interdict the importation under penalty, unless the container or the receptacle states clearly contents of the package or the receptacle and the information which is sought by this amendment. Is this a discrimination against the dye products which are imported?

Mr. McCUMBER. I understand that is done, but the Senator will understand why we make the change here. It is a question merely of making the entry. As it came over from the House, the bill simply provided against making the entry. The entry, of course, covers filing the inventory, and so forth. This makes it unlawful to import misbranded articles, so that there can be no possibility of not knowing what is intended. It makes it an illegal act to import or bring them into the country, and not merely the fact of making an entry, which is not bringing the article in at all, but simply filing your inventory of an intended bringing in of the article itself.

Mr. KING. What I meant to inquire about was this: Are dye products treated differently from any other products which are imported? Do you make it unlawful, for instance, to import other products than coal-tar products "if the package, case, or container, or the invoice bears any statement, design, or device regarding the article or the ingredients or substances contained therein which is false, fraudulent, or misleading in any particular?"

Mr. McCUMBER. That, of course, is general. That is made to apply, I think, to every article in the other paragraphs or schedules.

Mr. KING. That is what I am inquiring. You do not single out dyes and make it illegal or unlawful to import them with a misleading brand, and let other articles imported into the United States under misleading brands be immune from the penalty here provided?

Mr. McCUMBER. I think we have a general rule which prevents anything that is misleading or fraudulent from being brought in.

Mr. SMOOT. I think if the Senator will look at sections 590 to 592 he will find that they provide for "false drawback" claim, and that, of course, is an entry for a drawback. That is provided in the administrative features of the bill.

Mr. KING. I have no particular objection if a general provision shall be inserted in the bill making it unlawful to import commodities into the United States which are falsely branded.

Mr. McCUMBER. I may not be able to turn to it at the moment, but in the administrative provisions we have sufficiently guarded against fraudulent statements of the contents of packages, and so forth.

Mr. KING. That was my understanding, and that is the reason I wondered why you should specifically insert this language in this paragraph. There would be just as much reason to insert a similar provision in another paragraph.

Mr. McCUMBER. The Senator will notice that it is inserted here, because above that the House provision is:

the invoice shall bear a plain, conspicuous, and truly descriptive statement of the identity and percentage, exclusive of diluents, of such color, dye—

And so forth.

Therefore we inserted a provision against this being imported unless it complied with what was in that particular

provision. Possibly it was not necessary to repeat it there. It may be; but I think it is equally covered in other sections.

Mr. SMOOT. The reason why it was put in this paragraph was more particularly because of the standard of strength being provided for. Here we gave a standard of strength, and therefore it applies more to that than to the general provision. The general provision will be found in section 591.

The VICE PRESIDENT. The question is on agreeing to the committee amendment.

The amendment was agreed to.

Mr. FRELINGHUYSEN. I ask leave to insert at this point the statement of the Tariff Commission on the label feature, which gives the full explanation as outlined by the chairman of the committee.

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

LABELING FEATURE.

The United States Tariff Commission, in its report dated December 12, 1918, "Dyes and other coal-tar chemicals," states:

"It is suggested that all imports of dyes shall be required to bear a plain, conspicuous, and truly descriptive statement of the identity and percentage of the dye contained therein, and that if false, fraudulent, or misleading statements are contained on the package or the invoice therefor the goods shall not be permitted to enter.

"* * * Therefore the requirement that the identity and percentage shall be disclosed will greatly facilitate the assessment of both the ad valorem and specific duties.

"* * * Incidentally, this provision for the truthful labeling of dyes will protect the consumers of dyes against fraud and the American manufacturers of dyes against unfair competition from foreign manufacturers. It is a notorious fact that unfair methods of competition, such as bribery of purchasing agents, adulteration, and misbranding, have been especially prevalent in the dye industry."

The VICE PRESIDENT. This completes the paragraph.

EXTENSION OF NATIONAL-BANK CHARTERS.

Mr. KELLOGG. I ask the Chair to lay before the Senate the action of the House of Representatives on the amendments of the Senate to House bill 9527.

The PRESIDING OFFICER (Mr. ASHURST in the chair) laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 9527) to amend section 5136, Revised Statutes of the United States, relating to corporate powers of associations, so as to provide succession thereof until dissolved, and to apply said section as so amended to all national banking associations, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. KELLOGG. As the House has disagreed to the Senate amendments and appointed conferees, I ask the Senator from Utah [Mr. KING] if he will not now ask consent to withdraw his motion and allow the conferees to be appointed?

Mr. KING. Mr. President, as I indicated the other day, this bill was passed during my absence. I have been opposed, and still am opposed, to granting charters for such a length of time as provided in this bill. The present law grants charters for a period of 20 years. The bill as it passed the House gave perpetual charters to national banks. The Senate committee have amended it, and have granted charters for 99 years. I have understood that an agreement was reached by which the limit would be fixed at 50 years; but, at any rate, the bill has been passed, as I have stated, with a 99-year limit.

I submitted the other day a motion to reconsider the vote by which the Senate had passed the bill in the form I have stated. I have spoken with a number of Senators who I thought shared the view which I entertained, that 50 years was the maximum limit which they would support.

They have acceded to the action of the Senate, and are supporting the bill which grants charters for 99 years. In view of that position, and owing to the fact that there are only a very few of us who take the view which I have expressed, I have consented to withdraw the motion to reconsider, but with the understanding that when the conference report is submitted we may then have a record vote upon the matter.

I therefore ask consent to withdraw the motion to reconsider.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Utah? The Chair hears none, and the motion to reconsider is withdrawn.

Mr. KELLOGG. I move that the Senate insist on its amendments and agree to the conference asked by the House, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. CALDER, Mr. SHORTRIDGE, and Mr. GLASS conferees on the part of the Senate.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. Overhue, its enrolling clerk, announced that the House had passed the bill (S. 2775) to extend for one year the powers of the War Finance Corporation to make advances under the provisions of the act entitled "An act to amend the War Finance Corporation act, approved April 5, 1918, as amended, to provide relief for producers of and dealers in agricultural products, and for other purposes," approved August 24, 1921, with an amendment, in which it requested the concurrence of the Senate.

The message also announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H. R. 7864. An act providing for sundry matters affecting the Naval Establishment; and

H. R. 8996. An act to amend paragraph 440, section 5211, act June 3, 1864.

ENROLLED JOINT RESOLUTION SIGNED.

The message further announced that the Speaker of the House had signed the enrolled joint resolution (H. J. Res. 339) making available funds for repairing and restoring levees on the Mississippi River above Cairo, Ill., and it was thereupon signed by the Vice President.

HOUSE BILLS REFERRED.

The following bills were each read twice by title and referred as indicated below:

H. R. 7864. An act providing for sundry matters affecting the Naval Establishment; to the Committee on Naval Affairs.

H. R. 8996. An act to amend paragraph 440, section 5211, act of June 3, 1864; to the Committee on Banking and Currency.

EXTENSION OF WAR FINANCE CORPORATION.

Mr. SMOOT. I ask the Chair to lay before the Senate the amendment of the House to Senate bill 2775.

The VICE PRESIDENT laid before the Senate the amendment of the House of Representatives to the bill (S. 2775) to extend for one year the powers of the War Finance Corporation to make advances under the provisions of the act entitled "An act to amend the War Finance Corporation act, approved April 5, 1918, as amended, to provide relief for producers of and dealers in agricultural products, and for other purposes," approved August 24, 1921, which was to strike out all after the enacting clause and insert:

That the time during which the War Finance Corporation may make advances and purchase notes, drafts, bills of exchange, or other securities under the terms of sections 21, 22, 23, and 24 of the War Finance Corporation act, as amended, is hereby extended up to and including May 31, 1923: *Provided*, That if any application for an advance or for the purchase by the War Finance Corporation of notes, drafts, bills of exchange, or other securities is received at the office of the corporation in the District of Columbia on or before May 31, 1923, such application may be acted upon and approved, and the advance may be made or the notes, drafts, bills of exchange, or other securities purchased at any time prior to June 30, 1923.

SEC. 2. That the second paragraph of section 12 of title 1 of the War Finance Corporation act, as amended, be further amended to read as follows:

"The power of the corporation to issue notes or bonds may be exercised at any time prior to January 31, 1926, but no such notes or bonds shall mature later than June 30, 1926."

SEC. 3. That paragraph 3 of section 15 of title 1 of the War Finance Corporation act, as amended, be amended by striking out at the beginning of said paragraph the words "beginning July 1, 1922," and inserting in lieu thereof the words "beginning July 1, 1923."

That paragraph 4 of said section 15 be amended by striking out at the beginning of said paragraph the words "After July 1, 1922," and inserting in lieu thereof the words "After July 1, 1923."

Mr. SMOOT. I can state in just a few words what the change is. This is a Senate bill, and the House has passed a substitute bill making one change. Under the act of August 24, 1921—

The power of the corporation to issue notes or bonds may be exercised at any time prior to January 1, 1925, but no notes or bonds shall mature later than July 1, 1925.

The House has changed that to June 30, 1926, extending the power of the commission for one year.

I move that the Senate agree to the House amendment.

The motion was agreed to.

DEDICATION OF MONUMENT TO FRANCIS SCOTT KEY.

The VICE PRESIDENT. In the sundry civil appropriation act of March 4, 1921, there is a provision for the dedication of the monument to Francis Scott Key at Fort McHenry, Baltimore, directing the President of the Senate to appoint three Senators to represent the Senate on that occasion. The dedication ceremonies will occur on the afternoon of June 14. The Chair appoints the Senator from Maryland, Mr. FRANCE, the Senator from Pennsylvania, Mr. PEPPER, and the Senator from Nevada, Mr. PITTMAN, the committee on the part of the Senate.

PETITIONS.

Mr. BALL presented a petition of the Kalorama Citizens' Association, of Washington, D. C., relative to the fiscal relations of the District of Columbia, which was referred to the

Committee on Appropriations and ordered to be printed in the RECORD, as follows:

KALORAMA CITIZENS' ASSOCIATION,
Washington, D. C.

The undersigned officers of the Kalorama Citizens' Association, at a meeting of the association held on May 16, 1922, were empowered and directed to present to the two Houses of Congress the following petition:

Petition.

The Kalorama Citizens' Association, of Washington, D. C., respectfully request that a hearing be accorded to the citizens of the District of Columbia before action is taken by Congress on the conference report on the District of Columbia appropriation bill, or on the amendment of the House of Representatives to the amendment of the Senate on said bill, revolutionizing the fiscal relations between the Federal Government and the District of Columbia on the ground—

1. That while they have no vote and therefore no potent voice in their own affairs, yet, in a spirit of fair play and in conformity with the traditions of Anglo-Saxon government, they have at least the right to be heard before there is imposed upon them, suddenly and without notice, a complete change in their system of taxation which may lead ultimately, if it is not designed presently, to onerous and unbearable burdens.

2. That it has not been shown that property generally in the District is underassessed or not adequately taxed; indeed, the last expression on this subject, emanating from Congress itself, is found in the report of the joint committee of Congress appointed in the Sixty-fourth Congress (1915), which, after an exhaustive investigation, reported:

"We find from the evidence of fair-minded men, residents of Washington, familiar with real-estate values in general, that the present assessment for taxation is fair and reasonable.

"That, taken as a whole, the assessments made against all classes of property in the different locations in the city are equitable.

"The committee believes that, independently of the question of what should be the proper subjects of taxation in the District of Columbia, the payment of taxes on real estate from the assessments as they are now constituted is a fair and reasonable response in such taxation for municipal benefits received by the citizens of the District of Columbia."

3. That whatever inequalities may be alleged to exist as between the Federal Government and the District of Columbia under the present arrangement, the citizens of Washington are in nowise to blame, as their affairs are completely in the hands of Congress and they should not be penalized if Congress has made a mistake in the past.

4. That owing to conditions growing out of the war thousands of people of humble means have been compelled to purchase houses on the installment plan, and the proposed increase in the assessment and in the burden of taxation will work a great hardship on thousands of them, upon many of whom, indeed, quite generally throughout the city, a strong feeling of resentment and dissatisfaction has been provoked at the contemplated action.

5. That if it is desired to place the District on a cash basis—and it is not the fault of the citizens of the District that it is not on a cash basis—the object can be accomplished by giving the District credit for accumulated District tax money now in the Federal Treasury, upon which no interest has been paid, and by providing for the payment of taxes in installments earlier in the year than at present.

6. That it is unjust to deprive the District in part of sources of revenue which in every city in America are devoted exclusively to municipal purposes, such as receipts from licenses, fines, permits, etc., and to cover a portion of such receipts in the general fund of the Treasury.

7. That the present tax on intangibles, which is largely a conscience tax and therefore inequitable, is believed to compare favorably in revenue derived and in the rigor of its terms with similar taxes in most of the States, and no increase is justifiable.

Your petitioners request the Congress to bear in mind that the citizens of the District contribute their full share of national taxation, the amount paid by them exceeding the amounts paid by a number of the States, and that while the citizens of the States contribute a few cents per capita to the maintenance and upbuilding of the Nation's Capital, the citizens of the District contribute probably as much per capita to Federal works and improvements carried on in the respective States, such as good roads, agricultural colleges and extension work, public buildings, rivers and harbors, etc. When the Federal District was created the property holders therein donated half of their property to the Federal Government, while the Federal Government has donated millions upon millions of dollars to various States on their admission into the Union in the form of public lands and otherwise.

A. COULTER WELLS,
President Kalorama Citizens' Association.
EDW. R. WALTON, Jr.,
Secretary Kalorama Citizens' Association.

Mr. CAPPER presented a resolution of the Delphos Farmers' Union, of Delphos, Kans., protesting against the passage of the so-called Jones-Green ship subsidy bill, which was referred to the Committee on Commerce.

He also presented a resolution of the Irving Parent-Teachers' Association of Kansas City, Kans., favoring the enactment of legislation creating a department of education, which was referred to the Committee on Education and Labor.

Mr. NEWBERRY presented a petition of sundry citizens of Fergus, St. Charles, Chesaning, Saginaw, and Hemlock, all in the State of Michigan, praying for the imposition in the pending tariff bill of a duty of $2 per 100 pounds on Cuban sugar, which was referred to the Committee on Finance.

Mr. WILLIS presented the petition of Adam Fischer, of Sylvania, and sundry other citizens of Sylvania, Ottawa, Berkey, Metamora, and Dundee, all in the State of Ohio, and Riga, Mich., praying for the imposition in the pending tariff bill of a duty of $2 per 100 pounds of Cuban sugar, which was referred to the Committee on Finance.

Mr. TOWNSEND presented resolutions adopted by the Presbytery of Lake Superior Presbyterian Church, at Sault Ste. Marie, Mich., favoring amendments to the Constitution providing for uniform marriage and divorce laws and prohibiting polygamy, which were referred to the Committee on the Judiciary.

He also presented a petition of sundry citizens of Battle Creek, Mich., praying that only a moderate duty on kid gloves be imposed in the pending tariff bill, which was referred to the Committee on Finance.

He also presented a petition of sundry citizens of New Lathrop, Mich., praying for the imposition in the pending tariff bill of a duty of $2 per 100 pounds on Cuban sugar, which was referred to the Committee on Finance.

REPORTS OF THE COMMITTEE ON CLAIMS.

Mr. CAPPER, from the Committee on Claims, to which were referred the following bills, reported them severally without amendment, and submitted reports thereon:

A bill (H. R. 5668) for the relief of Cora T. Dering (Rept. No. 747);

A bill (H. R. 8767) for the relief of F. E. Taylor and B. C. Broom (Rept. No. 748); and

A bill (H. R. 9069) for the relief of William H. Slaine (Rept. No. 749).

ENROLLED BILL PRESENTED.

Mr. SUTHERLAND, from the Committee on Enrolled Bills, reported that June 3, 1922, they presented to the President of the United States the enrolled bill (S. 745) to amend section 24 and section 256 of the Judicial Code.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SHEPPARD:

A bill (S. 3676) making appropriation for a quarantine station at Sabine Pass, Tex.; to the Committee on Appropriations.

By Mr. HARRIS:

A bill (S. 3677) authorizing the Director of the Census to collect additional statistics of cotton; to the Committee on Commerce.

By Mr. KING:

A joint resolution (S. J. Res. 203) authorizing return to corporations of neutral countries properties taken over during the World War by the Alien Property Custodian; to the Committee on the Judiciary.

AMENDMENT TO HOUSE RIVER AND HARBOR BILL.

Mr. SHEPPARD submitted an amendment providing for improvement work at Buffalo Bayou, Tex., in accordance with the report submitted in House Document No. 93, Sixty-seventh Congress, first session, and subject to the conditions set forth in said document, intended to be proposed by him to the bill (H. R. 10766) authorizing appropriations for the prosecution and maintenance of public works on canals, rivers, and harbors, and for other purposes, which was referred to the Committee on Commerce and ordered to be printed.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

Mr. McCUMBER. I think the next paragraph in order would have been the one relating to tanning dyes, but the Senator from Wisconsin [Mr. LA FOLLETTE] says he is not prepared to take that up, and asks that it may go over. Therefore I ask that the Senate return to paragraph 302, relating to manganese ore.

Mr. KING. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Frelinghuysen	Lenroot	Shortridge
Borah	Hale	McCumber	Simmons
Brandegee	Harris	McLean	Smith
Broussard	Harrison	McNary	Smoot
Bursum	Heflin	Nelson	Spencer
Cameron	Johnson	Newberry	Sutherland
Capper	Jones, N. Mex.	Nicholson	Swanson
Caraway	Jones, Wash.	Oddie	Townsend
Colt	Kellogg	Page	Underwood
Cummins	Kendrick	Pepper	Wadsworth
Curtis	Keyes	Poindexter	Watson, Ga.
Dial	King	Pomerene	Willis
Dillingham	Ladd	Ransdell	
du Pont	La Follette	Sheppard	

The VICE PRESIDENT. Fifty-four Senators have answered to their names. A quorum is present.

Mr. NICHOLSON. Mr. President, I ask that the amendment I have proposed to paragraph 302 of the pending tariff bill may be reported.

The VICE PRESIDENT. The amendment of the committee will be stated.

The READING CLERK. On page 48, in paragraph 302, on line 20, the committee proposes to strike out "manganese ore or concentrates containing in excess of 30 per cent of metallic manganese, 1 cent per pound on the metallic manganese contained therein; molybdenum," and to insert the word "molybdenum," so as to read:

Molybdenum ore or concentrates, 75 cents per pound on the metallic molybdenum contained therein.

The Senator from Colorado [Mr. NICHOLSON] asks that the Senate restore the House text by disagreeing to the committee amendments.

Mr. NICHOLSON. Mr. President, I send to the desk and ask to have read a joint resolution passed by the Colorado Legislature during its special session, beginning in the month of April, indorsing the House rate on tungsten.

Mr. HARRISON. May I ask the date of the resolution?

Mr. NICHOLSON. May 10, 1922. I desire to state for the information of the Senator from Mississippi that every Republican and Democrat in the house and senate of the Colorado Legislature voted for the adoption of the joint resolution.

Mr. HARRISON. I was merely wondering if they indorsed the bill or merely indorsed the one item.

Mr. NICHOLSON. They merely indorsed the item mentioned in the joint resolution which I have now offered. May we have the joint resolution read?

The VICE PRESIDENT. Without objection, the Secretary will read as requested.

The reading clerk read as follows:

STATE OF COLORADO,
OFFICE OF THE SECRETARY OF STATE.
CERTIFICATE.

UNITED STATES OF AMERICA,
State of Colorado, ss:

I, Carl S. Milliken, secretary of state of the State of Colorado, do hereby certify that the annexed is a full, true, and complete transcript of House Joint Resolution No. 2, which was adopted at the extraordinary session of the twenty-third general assembly of the State of Colorado and filed in this office by the officers of the house of representatives of said assembly.

In testimony whereof I have hereunto set my hand and affixed the great seal of the State of Colorado, at the city of Denver, this 10th day of May, A. D. 1922.

[SEAL.] CARL S. MILLIKEN,
Secretary of State.

House Joint Resolution No. 2.

MANGANESE ORE.

Whereas the mining industry of the West has been and is now suffering because of a lack of profitable markets in which to dispose of its various minerals; and

Whereas the development of the past few years shows that the West and South contain many bodies of availbale minerals largely used by the industries of the Nation, but which have heretofore been largely imported from China, India, Brazil, and other foreign nations because of the cheap production costs therein on account of the cheap labor and cheap ocean transportation; and

Whereas the markets for Colorado farm and range products, because of the long distances of consumption centers of the East, were greatly hampered because of the falling off of mining development and production in the State;

Whereas the building up of mining activities in the State are vastly important in order to furnish added markets for Colorado farm and range products;

Whereas the railroads of the West, the arteries which are essential to the farmer and which now are compelled to charge excessive freight rates on a decreased business, are suffering depression because of the loss of earnings by a lessening of the demand for transportation of ores and minerals, which loss must either be charged against the farmers' product, or manifest itself by diminished and inadequate transportation service; and

Whereas the falling off in returns to the Federal Government under the income tax law because of business depression makes necessary the use of other sources of income in order to meet the required demands of governmental operation and the interest upon the burden of the war debt; and

Whereas the steel industry of the United States annually consumes more than one-half million tons of manganese ores, which have heretofore been imported from foreign countries; and

Whereas the necessities of the war, during which all vessels were needed to carry food and supplies to our soldiers in the trenches of France, made the importation of foreign manganese difficult; and

Whereas the increased price thereby occasioned made possible the increase of production of high-grade manganese ore in the United States from 2,635 tons in 1914 to 305,869 tons in 1918, and a total increase of both high and low grade manganese ores from 100,900 tons in 1914 to 1,474,647 tons in 1918; and

Whereas the developments made in this production demonstrate that the manganese reserves of this country are ample and sufficient to meet all of the industrial needs of the Nation; and

Whereas the House of Representatives of the United States has enacted a bill, known as the Fordney bill, which provides for a duty of 1 cent per pound upon the manganese content of all imported ores: Therefore be it

Resolved by the senate and house of representatives of the State of Colorado, in special session assembled at Denver, Colo., on the 18th day of April, 1922, That we protest against the placing of the Colorado miners in competition with the cheap labor of China, India, and Brazil; and be it further

Resolved, That in order to add to the revenues of the Nation, to furnish adequate business to the railroads of the West, to stimulate western mining production, and particularly that the manganese ores of the State of Colorado can be mined and employment provided for the miners of the West, the Senators of the State of Colorado, Members in the United States Senate, are hereby earnestly urged to exert their best efforts to secure the adoption by the United States Senate of the tariff rates proposed in the Fordney bill for the protection of the manganese industry of the West; and be it further

Resolved, That copies of this resolution be sent to the President of the United States, the Hon. Warren G. Harding, to the Presiding Officer of the United States Senate, Hon. CALVIN COOLIDGE, and Hon. LAWRENCE C. PHIPPS and Hon. SAMUEL D. NICHOLSON, Colorado Members in the Senate of the United States.

Mr. NICHOLSON. Mr. President, I should like to address the Senate on a subject which has heretofore been under discussion and which is one of the most vital questions in the whole tariff bill. I refer to the tariff on manganese.

We may as well admit the issue. The tariff on manganese would have been a settled fact months ago but for the selfishness of the steel industry. I am not talking to you, therefore, to prove any question of necessity for protection, any question of the ability of this industry to develop under protection, or any of the economic factors usually involved in a tariff discussion; these issues have all been settled, and the result was shown by the placing of a duty on manganese by the Ways and Means Committee of the House after the most complete investigation over a period of four months by its subcommittee on metals; I am talking to you solely to counteract, if possible, the insidious propaganda emanating from the selfishness of the steel manufacturers.

The opposition to protection for this key industry in the United States strikes at the very root of our tariff principles. This opposition was conceived in selfishness. It has grown in blindness. It is before you as a most shameful example of proposed selfish legislative enactment. It uproots a high Republican principle to meet the desires of an individual industry—the steel interests.

In the reports of the Ways and Means Committee and the Senate Finance Committee the steel producers are granted a duty of one-half cent per pound on steel ingots, billets, and so forth, valued at $33.60 per ton. This would amount to protection of $11.20 per ton, or a duty of 33⅓ per cent.

The Fordney bill provided for manganese producers a duty of 1 cent per pound metallic content of manganese ore. This is equal to one-third to one-half cent duty per pound on the ore as imported. It is equivalent to 16 cents per ton of manganese contained in raw steel. This is the further equivalent of seven-tenths of 1 per cent duty on steel.

Now, what does this mean? It means that the steel manufacturer has the protection of $11.20 per ton as contrasted to 16 cents per ton which he is asked to pay on the manganese content. Deduct this from his tariff protection and he still has a protection of $11.04 per ton net. Deduct the percentage from his percentage of 33⅓ per cent and he still has a net ad valorem protection of 32.6 per cent.

It is difficult to conceive of a producer receiving $11.20 per ton protection on his product objecting to a protective duty on an essential raw material, which will only affect his net protection seven-tenths of 1 per cent.

After the steel manufacturer has paid his duty on manganese, he still has a net protection of 32.6 per cent.

Let us consider the tariff history of this gigantic industry. It is insisting that those things which it must buy be on the free list, and that those things that it sells shall be protected by high rates of duty.

In 1883 steel was protected by a duty which ranged from $28 to $65 per ton. In all the years since the steel industry has enjoyed free manganese, free iron ore, and free coal. To-day we are told by the steel industry that a duty which increases the cost of steel 16 cents per ton will ruin the industry.

In the tariff act of 1864, which was in effect in substance until 1883, the duty provided on steel ingots was $50.40 per ton. (Tariff acts, U. S. Document 671, 61st Congress, p. 234.) In 1870 a tariff of $28 per ton was provided on steel rails. (P. 273, same reference.)

The tariff act of 1883 carried a duty on iron or steel rails of nine-tenths of 1 cent per pound or $20.16 per ton. (P. 325, same reference.)

The price of steel rails in May, 1889, was $27 per ton. (Mineral resources, Department of the Interior, Miscellaneous Document No. 230, 51st Congress, p. 16.)

The tariff act of 1883 was then in effect. This was a duty therefore of $20.16 per ton on a product valued at only $27 per ton, or an ad valorem rate of 75 per cent.

This was at a time of great railroad expansion in the United States. What burden did this tariff duty put upon the people of the United States?

Under a protective tariff the steel industry has flourished. This is proper. The tariff on certain items has been gradually reduced, but no appreciable tariff was imposed on the materials used in making steel. To-day the steel people say that an increase of 16 cents on the cost of manganese used in a ton of steel will so burden the consumer that he will revolt, and that competition in foreign markets will be impossible.

Iron ores carried a duty of 75 cents per ton in the tariff bill of 1883. The purpose of this duty was to protect an infant industry in its development of iron ore deposits in this country. This emphatically resulted in great benefit to the country. But to do this the duty put a burden of at least $1.60 per ton on raw or finished steel. This is ten times the burden that would be placed on the cost of steel by the proposed manganese tariff.

The favorite statement of the steel interests has been that, "We have no manganese ore in the United States suitable to our needs." This is the same old story that you hear from every manufacturer who wants protection on what he sells, and wants what he buys on the free list. Whether it be a woolen manufacturer who wants free wool and protected worsteds, a graphite manufacturer who wants protected lead pencils and free graphite, or a steel maker who wants protected steel and free manganese ore, it is just the same old story.

In 1918 we produced 310,000 tons of high-grade manganese in the United States, and over 1,000,000 tons of manganiferous iron ore. This ore was all sold to the steel industry. My own State of Colorado has produced millions of tons of manganiferous ore and has many millions in reserve. It will take more than oratory on the part of the steel interests to convince me that we have no manganese in the United States.

There are over 400 districts in the United States capable of producing manganese ore. Over 1,100 deposits have been investigated and reported upon by reputable engineers, mine operators, and geologists.

In many of the districts much more ore has been actually shipped from a single property than was originally credited to the entire district. This apparent discrepancy is due to the fact that no distinction was made between actual ore in sight and ore reserves.

Improved metallurgical processes have also made the utilization of many so-called low-grade manganese ores not only possible but advantageous.

The output of manganiferous iron ore in the United States jumped from 59,403 tons in 1913 to 1,168,777 tons in 1918.

In 1915 our manganese production was triple that of 1914. In 1916 it was three times that of 1915. In 1917 it was again three times that of 1916, and in the first 10½ months of 1918 it was three times that of 1917. This remarkable increase in production came from the operation of only 10 per cent of the known properties. Most of these were in their initial stages, rarely exceeding 50 per cent of their capacity. This development was being carried on diligently in the hope of again trebling production during one more year of intensive effort. It is the judgment of all those connected with the industry that an output of 800,000 to 1,000,000 tons would have been a most modest expectation. This would have taken care of much more than the total manganese requirements of the steel industry for any year of its history.

The domestic production of manganese for 1918 was greater than the total consumption of manganese by the steel industry during any pre-war year. It was greater than the consumption of manganese by the steel industry during 1919 or 1921, and was greater than the average annual consumption of manganese by the steel industry in all the years since the war. It can not be doubted, then, that from three-fourths of a million to one million tons could easily have been produced in 1919 had foreign ores been kept out and the demand continued.

If the companies mining manganese were satisfied that their operations were secure from ruinous foreign competition, the entire management requirements of the United States could be met by domestic production within a few years, and in the meantime the revenue from imported manganese would be welcomed by the Treasury Department and would relieve the undue burdens now resting on the shoulders of American taxpayers.

The statements by certain consumers that we have no adequate manganese reserves are made either from a selfish interest or are due to painful ignorance of our natural resources.

The annual requirement of manganese in the steel industry, as stated by their representatives, is the equivalent of 800,000 tons of 45 per cent manganese ore. Of this amount one-half can and will be consumed in the form of high manganese pig, under modern established furnace practice. High manganese pig is made from manganiferous iron ore. To supply the 400,000 tons of equivalent 45 per cent manganese in this form will require 2,500,000 tons of manganiferous iron ore per annum, as this ore ranges from 10 per cent to 35 per cent manganese.

I have before me [exhibiting] two hundred or more statements of State geologists, mine operators, and mining engineers of recognized authority; statements signed by mine operators and owners, some of them are sworn to, many of them are based on careful engineers' reports, from which are summarized the manganese reserves of the United States.

The principal districts and other known investigated reserves which total more than 25,000,000 tons, based on 45 per cent manganese ore, are as follows:

	Tons.
Alabama	55,000
Arizona	326,000
Arkansas	4,152,000
California	160,275
Colorado	270,859
Georgia	300,000
Montana	8,479,216
Nevada	201,000
New Mexico	201,500
Oregon	16,000
Tennessee	121,000
Utah	15,000
Virginia	11,114,357
Washington	500
Total	25,411,707

Reserves of manganiferous iron ore which have been investigated and checked to date occur in the following States:

	Tons.
Alabama	2,000,000
Arizona	4,107,110
Arkansas	3,859,500
California	60,000
Colorado	2,772,000
Georgia	480,000
Michigan	7,000,000
Minnesota	40,178,510
Montana	227,492
Nevada	1,052,000
New Mexico	2,824,000
Oregon	1,979,000
Tennessee	65,000
Utah	4,000
Virginia	8,406,000

There are known deposits on which only general estimates have been given in the following States:

Maine, Missouri, Mississippi, Maryland, New Jersey, Oklahoma, South Dakota, Texas, Vermont, Wyoming, Idaho.

Mr. President, in addition, there are millions of tons of recoverable manganese associated with the metalliferous ores of the South and West. These will be made available if given adequate protection. These ores, with a value placed on their manganese content, will then be commercially valuable for the combined recovery of all minerals contained.

Concerning the manganiferous iron ore which it is estimated will fill half of the requirements of manganese in the steel industry: At a hearing before a special committee of Senators, appointed to investigate the manganese reserves of the Nation, a prominent producer of manganiferous iron ore stated, in the presence of the officials of the steel companies, who are opposing this very tariff:

> If this tariff is granted, I would be willing to take a contract to supply, not any individual steel company, not the Steel Corporation alone, but the entire steel industry of the United States with its annual requirements of manganiferous iron ore to take care of 50 per cent of the manganese requirements of the United States, and these gentlemen who are here, who are to-day my best customers, know that I fill my contracts and that I would fill this contract.

Mr. President, to this startling statement none of the representatives of the steel industry there present interposed any objection or contradiction. Does this look like insufficiency of reserves? Hardly. And it did not look so to the representatives of the steel industry who were there.

LABOR COSTS.

The cost of production in labor per day in foreign countries producing manganese ore is as follows—and I wish the Senators would take note of this particular schedule. These figures I received from the Department of Commerce a few days ago:

Country.	Source of information.	Cost.
		Per day.
India	Department of Commerce	$0.05
Brazil	do	.28
Cuba	do	1.25
Central America	do	.35
Russia (Ural Mountains)	Government bulletin	.07

This is the kind of labor with which the American miner is asked to compete if he is to produce manganese ore for the great steel corporations of this country.

The average wage paid to manganese miners in the United States is $4 per day. The labor cost per ton of foreign ore varies from 30 cents to $1.25. The labor cost per ton of domestic ore ranges from $6.50 to $15 per ton. The difference between the foreign and domestic labor cost is, therefore, from $6.30 to $14.75 per ton.

RATES.

The ocean freights on imported manganese have ranged from 30 cents per ton to $4 per ton. To this must be added freight rate from mine to ocean port and freight from port of entry to furnace. The total of these two rates averages between $3 and $7. The domestic rate on manganese ore from mine to furnace ranges from $4.50 to $14 per ton, with an average of $10 per ton.

American manganese ore is, therefore, under a labor handicap, which averages $6.30 to $14.75 per ton, and a freight handicap which averages from $4.50 to $10 per ton.

In connection with this discussion of freight rates it should be noted that when the horizontal advance in railroad rates was made in August, 1920, rates on imported manganese ore from New York, Philadelphia, and Baltimore to Pittsburgh stations and Bessemer were increased as follows:

From—	Old rates 1919.	New rates 1920.
New York	$4.10	$5.74
Philadelphia	3.36	5.46
Baltimore	3.36	5.46

On November 15, 1921, the carriers established special reduced rates, as follows:

From—	Reduced rates 1921.	Percentage of reduction.
		Per cent.
New York	$3.12	46
Philadelphia	2.52	52
Baltimore	2.72	50

These rates applied until February 25, 1922, when new rates higher than those of November, 1921, but still 40 per cent lower than those of August, 1920, were made effective, as follows:

New rate, February, 1922.

From—	
New York	$3.96
Philadelphia	3.36
Baltimore	3.56

These rates, however, were apparently unsatisfactory to the steel industry, and on April 1, 1922, practically only one month after the previous change, the special reduced rates granted in November, 1921, were again established, so that the present rates to Pittsburgh and Bessemer are:

Reduced rates, April, 1922.

From—	
New York	$3.12
Philadelphia	2.52
Baltimore	2.72

Note, then, that while the steel industry secured reduction in freight rates on foreign ore no attempt was made to secure any reduction in freight rates on domestic manganese ore.

In his semiannual address to the American Iron and Steel Institute on Friday, May 26, Judge Gary, chairman of the Steel Corporation, advocated—I quote from the statement in the Washington Post of Saturday, May 27—that—

> Congress take the tariff out of politics. * * * The tariff question should be delegated for investigation to a "commission of well-paid, high-minded, intelligent, competent, and nonpartisan appointees, authorized to ascertain and communicate the facts and figures." Their reports should be frequent, so that, if deemed necessary, a change in or amendment to the tariff laws could be made at any time Congress is in session.

Take the tariff out of politics? Of course, the judge would like to have the tariff handled by a governmental executive bureau. It would make it possible to concentrate the educational efforts of such employees as Mr. Hughes toward the realization of their idea of a proper tariff arrangement for the steel industry to have everything they sell protected and everything they buy on the free list.

Their success in getting low freight rates on their manganese ore mined in Brazil from docks to furnace when they import it into this country while domestic ore gets no such consideration from the Interstate Commerce Commission should give them great encouragement in the efficacy of such a system, for the reason that a small commission would be more easily approached and with less publicity than in having the matter discussed in a tariff bill before the United States Congress. These great corporations could keep men constantly in Washington, year in and year out, to see that manganese never got adequate protection.

In 1918 Brazil exported to the United States 345,877 tons of manganese ore, taking an export duty of $1.85 per ton from Brazil, assessed by the Brazilian State of origin. The Government railroad which transported these ores to seaboard increased its freight rate in order to enhance the Government revenues.

This increased the cost of manganese to the United States by approximately $1,000,000, which the steel industry paid without objection. The cost was passed on to the consumer. It is logical, therefore, to presume that in the absence of an import duty here Brazilian export taxes will be increased to the maximum the traffic will bear, all of which will be passed on to the consumers here. This would result in no benefit to this Government, and would be a detriment to our manganese producers.

According to the report of the War Industries Board, page 143, the price of ferromanganese was $37.50 per ton in 1914. It reached $450 in July, 1917, and was stabilized at $250 the latter part of that year through the efforts of the American Iron & Steel Institute. Shortage of shipping and the submarine menace made it necessary to pay this price in order to get American production.

Thus because its own manganese resources had not been developed this country paid a penalty of over $50,000,000. Had importations of manganese ore been cut off, in three months time the steel industry would have been absolutely paralyzed. Ninety per cent of its orders at that time were for essential war materials. This on no less authority than Mr. James A. Farrell, president of the United States Steel Corporation.

The present manganese deposits of the United States are sufficient to meet all the industrial needs of the Nation. An undeveloped deposit is of no value in either peace or war.

The development of the manganese industry under the stabilizing influence of a protective tariff will be vastly different from development to meet war needs. It will be substantial, permanent, constructive. Having assurance of a protected market over a number of years, instead of the hazards of a fluctuating market upon war demands, producers will be able to plan their operations on a permanent basis with true engineering efficiency. They will build up a permanent mineral industry which will compare favorably with the other great mineral industries of this country.

Competition is the life of trade. A duty which will give to the American manganese producer an equal competitive field with foreign production will stimulate domestic production. It will provide revenue for our Government. It will strengthen our national defense.

The wide distribution of our manganese deposits does not lend itself to monopolistic control. From a purely revenue standpoint the manganese industry is as logically entitled to a duty as any other. Upon the basic principles of a protective tariff, it is more entitled to protection than any other.

The development of the manganese industry will create self-supporting communities in 26 States. These communities will furnish steady employment for thousands of men. They will produce substantial railway revenues. They will offer a nearby market for the products of our farms and will increase the purchasing power of American labor.

It has been stated by the steel interests that our exports represent our surplus, and this is exported whether money is made or lost, because more labor is employed, overhead is kept down, and production is cheaper.

It would be interesting to note the amount of excess profits which the American people pay annually to the steel industry. They beg for free manganese in order to create a surplus on the plea of employing home labor. What about the employment of home labor in the manganese mines of America?

In the year 1920 the United States produced approximately 41,000,000 tons of raw steel. On the basis of 1 cent per pound on the metallic content of the ore, it is estimated that the duty on manganese provided by the Fordney bill would yield an approximate revenue of $6,560,000 per year. The steel interests, nurtured and fattened by a protective tariff, and now being long past the infant-industry stage, ask a total tariff protection of $475,000,000 on their products.

I have here statements showing the capitalization and earnings of the United States Steel Corporation, which I send to

the desk and ask to have them incorporated as part of my remarks.

The PRESIDING OFFICER (Mr. ODDIE in the chair). Without objection, it is so ordered.

The matter referred to is as follows:

In 1910 the United States Commissioner of Corporations reported that in 1901 the United States Steel Corporation's estimate of the value of its tangible property exceeded the value as computed by Government experts $804,946,615; in 1907, $572,901,540; in 1910, $506,017,962.

The total capitalization of the corporation in April, 1901 including underlying bonds and purchase money obligations was $1,402,846,817. Its investment in tangible property alone, as indicated by historical analysis, was $676,000,000. The excess of its outstanding securities over its investment amounted to $726,846,817. The total value of its property, tangible and intangible, as indicated by the market prices of its securities was $793,000,000. Its total capitalization exceeded this amount by $609,846,817.

The value of the corporation's tangible property as of December 31, 1920, as shown by its annual report, was $1,995,100,483.86 for 1920. While the value of its property as of that date based upon the 1910 valuation made by the Commissioner of Corporations and adding thereto net additions to investment as shown by the corporation's annual reports, after making adjustments for depreciation, etc., would have been $1,585,939,570.81.

Total outstanding securities, etc., on December 31, 1920, amounted to $1,455,395,645.10. These figures indicate that the enormous overcapitalization of 1901 condemned by the Commissioner of Corporations, in his investigation, has been completely made over into real money out of the pockets of the people of the United States by earnings and profits accumulated since.

It is impossible to determine the true annual net earnings of the corporation by the examination of its annual reports. Several important items are difficult to analyze or explain; for example, the corporation claims to have spent for "repairs and maintenance" in 1914 $40,000,000; 1915, $40,000,000; 1916, $65,000,000; 1917, $85,000,000; 1918, $100,000,000; 1919, $110,000,000; 1920, $145,000,000; apparently in addition to large deductions for depreciation, replacements, etc.

It might well be assumed that some of the corporation's capital expenditures are being written off as expense in order to reduce Federal income and excess profits taxes.

Comparison of investment of steel corporation, with total earnings thereon, as adjusted by the United States Bureau of Corporations, yearly, 1901–1910:

	Total investment in tangible property.	Earnings as adjusted by bureau.	Per cent.
1901	$698,869,756	[1] $77,741,231	[2] 14.8
1902	763,574,919	121,502,344	15.9
1903	806,615,979	94,156,958	11.7
1904	818,238,143	62,491,950	7.6
1905	874,840,920	112,830,835	12.9
1906	947,397,884	143,393,707	15.1
1907	1,078,763,602	155,416,873	14.4
1908	1,090,425,487	84,793,296	7.8
1909	1,146,875,993	120,807,579	10.5
1910	1,186,982,038	127,216,084	10.7
Total		1,100,350,857	
Average	941,258,472	112,856,498	12.0

[1] Nine months—April to December.
[2] Indicated rate per annum based on actual earnings for 9 months.

Estimate of value of tangible assets of the United States Steel Corporation, 1911 to 1920, inclusive, and net earnings, as shown by corporation's annual reports. (Values based on 1910 valuation made by Commissioner of Corporations plus annual net additions to investment.)

	Estimated value of tangible assets.	Net earnings.	Per cent.
1911	$1,234,412,899.12	$104,304,465.87	8.5
1912	1,245,721,173.01	117,926,402.02	9.4
1913	1,298,561,078.46	147,166,616.81	11.3
1914	1,327,185,403.93	81,746,517.86	6.2
1915	1,338,083,273.34	140,250,066.33	10.5
1916	1,395,738,559.39	342,997,092.44	24.6
1917	1,440,150,800.24	304,161,471.53	21.1
1918	1,500,742,942.92	208,281,104.23	13.9
1919	1,532,355,548.17	152,290,639.24	9.9
1920	1,585,939,570.81	185,095,359.28	11.7
Total	13,898,891,249.39	1,784,220,735.61	127.1
Average	1,389,889,124.94	178,422,073.56	12.7

Mr. NICHOLSON. Mr. President, the corporation's annual reports show that in 1916 it had set aside for Federal taxes $22,171,540.47; 1917, $247,463,230.85; 1918, $288,078,865.12; 1919, $70,574,345.84; 1920, $63,063,930.51. It does not follow, however, that the amounts set aside correspond to the amounts ultimately paid. It is safe to assume that the corporation did not pay $247,463,230.85 in 1917 and $288,078,865.12 in 1918.

After securing an adjustment of its invested capital, March 1, 1913, value, depreciation, depletion, war amortization, obsolescence, inventories, and so forth, with the Bureau of Internal Revenue, it is fair to assume that the corporation did not pay the amounts originally set aside. It would be interesting to know just how much of the annual reserves for taxes was actually paid and how much turned back to surplus. It is suggestive to note that the total surplus of the corporation jumped from $180,025,328.74 in 1915 to the enormous sum of $523,454,890.89 on December 31, 1920.

Of course, the revenue law does not permit the Revenue Bureau to disclose the true figures for taxes or the basis for their computation.

The asset value of each share of stock is said by the Magazine of Wall Street of April 15, 1922, to approximate $260, or a total of more than $2,258,500,000, although total outstanding securities, including capital stock, bonded and debenture liability, and so forth, amounted in 1920 to only $1,455,395,645.10.

If the Bureau of Internal Revenue allowed the corporation either an invested capital value, or a March 1, 1913, value, sufficient to give its stock an asset value of $260 per share, when the par value is only $100 per share and the market value little more than that amount, the Government has not received its full share of excess war profits.

At the end of 1910 the total dividends paid on the preferred stock amounted to $269,414,628.66 and on common stock $124,512,257.50. From 1911 to 1920, inclusive, dividends paid on the preferred stock amounted to $252,196,770 and on the common $355,811,750.

Capital stock, surplus, earnings, taxes, dividends, interest, depreciation, and so forth, additions to property account, as shown by annual reports of United States Steel Corporation, 1911 to 1920, inclusive, are as follows:

	Capital stock.	Surplus.	Net earnings.[1]	Tax.
1911	$868,583,600.00	$133,691,195.08	$111,018,324.23	$6,712,858.36
1912	868,583,600.00	136,716,245.27	124,693,497.46	6,767,095.44
1913	868,583,600.00	151,798,428.89	156,067,118.42	8,900,501.61
1914	868,583,600.00	135,204,471.90	90,348,821.38	8,602,303.52
1915	868,583,600.00	180,025,328.74	150,181,011.18	9,930,944.85
1916	868,583,600.00	381,360,913.37	365,168,632.91	22,171,540.47
1917	868,583,600.00	431,660,803.63	651,394,702.38	247,463,230.85
1918	868,583,600.00	466,888,421.38	496,359,969.35	288,078,865.12
1919	868,583,600.00	423,048,201.93	222,864,985.08	70,574,345.84
1920	868,583,600.00	523,454,890.89	248,159,289.79	63,063,930.51
Total	868,583,600.00		2,616,256,352.18	732,265,616.57

	Dividends.	Interest.
1911	$50,634,802.00	$31,144,618.31
1912	50,634,802.00	32,569,199.65
1913	50,634,802.00	32,517,962.96
1914	40,468,752.00	32,321,989.22
1915	31,573,458.25	31,782,688.43
1916	69,696,145.75	31,025,767.84
1917	116,714,127.00	30,125,594.67
1918	96,382,027.00	29,825,540.57
1919	50,634,802.00	29,210,897.57
1920	50,634,802.00	28,514,020.45
Total	608,008,520.00	309,034,279.67

	Depreciation, extraordinary replacement and sinking funds.	Additions to property account.
1911	$26,980,025.63	$72,150,014.60
1912	30,444,978.56	38,499,515.14
1913	31,860,652.72	65,111,535.32
1914	25,143,207.41	45,070,060.67
1915	32,428,048.85	37,661,461.19
1916	39,547,612.65	79,663,068.53
1917	51,553,271.67	107,260,629.11
1918	40,718,823.70	96,912,665.55
1919	45,545,926.43	68,356,644.41
1920	46,684,364.32	97,857,146.25
Total	370,906,911.94	708,542,740.77

[1] Before deducting taxes, dividends, interest, depreciation, replacement, and sinking funds.

During the 10-year period 1911–1920, inclusive, this great monopoly paid:

In dividends	$608,008,520.00
Interest on bonds, etc	309,034,259.47
Into depreciation, extraordinary replacement, and sinking-fund reserves	370,906,911.94
Into surplus	389,763,695.81
Into property investment and stripping and development of mines	708,522,740.77

In 1917 the Steel Corporation, notwithstanding the fact that it set aside $247,463,230.85 for taxes and paid $30,125,594.67 interest on bonds, and so forth, $51,553,271.67 depreciation, re-

placement, and sinking funds, $107,260,629.11 additions to property investment, and $50,299,810.26 to surplus, a total of $486,702,536.56, paid 7 per cent on preferred stock and 18 per cent on common.

In 1918 this corporation, after setting aside $288,078,865.12 for taxes and paying $29,825,540.57 interest on bonds, and so forth, $40,718,823.70 to depreciation, replacement, and sinking funds, $96,912,665.55 to property investment, and $35,227,617.75 to surplus, a total of $490,763,512.69, paid dividends of 7 per cent on preferred stock and 14 per cent on common.

Here is the outrageous spectacle of a great monopolistic combine gouging the consuming public for enormous dividends, credits to surplus, and additions to property investment at a time when the Nation is struggling in the throes of war, when every man and interest are expected to do their bit. These figures prove that the consumer of steel paid not only his own income and excess-profits taxes, if any, but also the hundreds of millions assessed to the United States Steel Corporation.

The history of all the other steel companies combined parallels that of the United States Steel Corporation.

Mr. KING. Will the Senator yield?

Mr. NICHOLSON. Certainly.

Mr. KING. The Senator is now speaking of the Steel Corporation?

Mr. NICHOLSON. Yes; the United States Steel Corporation.

Mr. KING. And its enormous dividends?

Mr. NICHOLSON. Yes.

Mr. KING. That same steel company is asking for increased rates in this bill upon some of its products, I understand.

Mr. NICHOLSON. I have not made a comparison between the rates in the pending bill and those in the Payne-Aldrich law, but I will state for the information of the Senator that I am quite sure the rates are increased over those in the Underwood law.

Mr. KING. In view of the fact that these steel corporations, one or more, have made such enormous profits, does the Senator think we ought to increase the present tariff?

Mr. NICHOLSON. I will state for the information of the Senator that up to this time I have not heard it suggested, either from the other side of the Chamber or from this side, whether the schedules which are to be found in the Fordney-McCumber bill are higher than the difference in the cost of production at home and abroad. I will say emphatically to the Senator from Utah that when he can show me that a rate is greater than the difference between the cost of production in this country and abroad, he will find me voting to reduce the rate to that difference.

Mr. KING. If it has not been stated on this side, one Member on this side will state to the Senator that these steel products ought to be put on the free list. I think the able argument which the Senator is now making is an argument in favor of placing upon the free list these steel products, from which such enormous profits have been made, indeed so enormous as to excite the just indignation of the able Senator from Colorado.

Mr. NICHOLSON. As to that statement I will say that what we need is a regulatory supervision over these prices rather than the allowing of cheap products to come from abroad; what we need is to see that the rates are so adjusted that these enormous profits are not possible.

Mr. KING. Let me say to the Senator, if he will pardon me for further trespassing upon his time, that if he and other Republicans force upon the country this tariff bill, which provides these enormous rates, so that other corporations may make the enormous profits which the Steel Corporation has made, they are going to get regulation, not only of the Steel Corporation and others but of substantially all corporations engaged in interstate commerce, because the American people, while they do not want bureaucracy, paternalism, and socialism, are not going to permit these great corporations to make such enormous profits, exploiting and robbing the people in so doing. They will take hold of them and regulate them, and I am afraid the effect will be to diminish efficiency and to reduce our business activities to dead level of uniformity. But be that as it may, the American people are not going to submit to extortion at the hands of the protected monopolies of the United States.

Mr. NICHOLSON. The statement made by the Senator from Utah was quite extended. Instead of asking a question he has delivered a speech, and I am not going to take time now to reply to the address made by the distinguished Senator from Utah.

Mr. KING. The Senator was making such an interesting statement that I felt impelled to ascertain his views on the question.

Mr. NICHOLSON. These other steel companies have a series of well-developed plans for one or more mergers, which, if completed, would approximate the United States Steel Corporation itself in size and power.

John A. Topping, the present head of the Republic Iron & Steel Corporation, is the most hopeful aspirant for the presidency of this new merger. It is an open secret that his ability to head this merger will be closely gauged by his success in leading the fight against a proper protective tariff on manganese ore to a conclusion successful for the steel companies.

I would like to have the attention of the Senator from Utah [Mr. KING] in order to inform him what took place at a conference between the steel manufacturers and the producers of manganese.

At a conference held in the committee rooms of the Senate Committee on Banking and Currency, at the suggestion of members of the Senate Finance Committee, to attempt to effect a compromise on the proposed tariff on manganese, I asked Mr. Topping what he considered a proper basis for such compromise. I said, "Mr. Topping, the steel industry has built up its enormous prosperity through the benefits and protection afforded by a protective tariff. Are you willing that this manganese industry be permitted to attempt development under the same protection?" To this question Mr. Topping answered, "No." "Very well," I said, "are you willing that the manganese industry shall have a rate of tariff for its protection which shall amount to the difference in the cost of production here and the cost of production in foreign countries?" To this again Mr. Topping answered "No."

At this juncture the junior Senator from Washington, equally interested in just protection of these newly developed mineral industries, entered the room and said, "Pardon my natural curiosity, but who is this that we are asking if they will stand for certain rates of duty on the products of American industry? Who is writing this tariff bill? I was under the impression that this tariff bill was being prepared by the Congress of the United States, not by Mr. Topping and his associates."

The curiosity of the Senator from Washington can be easily understood. The active opposition of the steel industry to a tariff on the materials which are component parts of steel, while they at the same time demand rates of duty on their own products which brought them the prosperity just outlined, is the crying shame of this tariff bill.

Later in this meeting I told Mr. Topping what I thought of the industry that wanted everything which it purchases placed on the free list and everything which it sells protected.

Now, what is back of this whole thing? Let us look this thing right in the eye. The United States Steel Corporation owns a mine in Brazil, the Morra da Mina. They bought this mine less than a year ago. There the Steel Corporation can hire native labor for 28 cents a day. It can ship this ore to the United States and still get it cheaper than it can be produced in the United States with American labor. The other steel companies want to buy ore which is produced in the Ural Mountains with wages 7 cents a day, in India with wages 6 cents a day, while our American workmen are walking the streets seeking employment.

In the capital city of my State only a few months ago the city gave over a day to the alleviation of the condition of former service men out of employment. It was called "Have-a-heart day." Many of the good women of Denver gave practically all of their time for a week in advance and set aside this day, when a thousand of them appeared on the streets soliciting funds to relieve returned soldiers who were in distress because of their inability to secure employment.

Among these unemployed men were thousands of former miners. Yet, within but a few miles of Denver lie magnificent deposits of manganese ore, idle mines at which these men could have been employed, supporting their families, and not a burden upon the public sympathy and public purse. These mines are idle because these very steel companies are now and have been ever since the World War importing all the manganese they could bring in from foreign countries, where it is produced with the cheapest labor in the world.

When the price of steel was jumping by leaps and bounds during the war the consumers of steel products were told, "We have to raise the price of steel because of raw materials which cost us more." After the war was over the prices of steel products remained at their war-time levels for nearly two and a half years.

STEEL PRICES.

On March 2, 1919, the industrial board fixed the price of steel as shown in this table:

Index steel prices per hundredweight.
(Commerce Department and Metal Statistics.)

	Rails.	Shapes.	Plates.	Black sheets.	Bars.
1914	28.00	1.05	1.05	1.80	1.05
1916	38.00	3.10	3.60	4.50	3.00
1917	55.00	3.00	3.25	5.00	2.90
1918	55.00	3.00	3.25	5.00	2.90
1919 [1]	45.00	2.45	2.65	4.35	2.35
1920	45.00	2.45	2.65	4.35	2.35
1921 [2]	40.00	2.20	2.20	4.00	2.10

[1] Prices fixed by industrial board Mar. 21, 1919.
[2] Prices announced by Steel Corporation Apr. 21, 1921.

Mr. KING. Will the Senator permit a question for information?

Mr. NICHOLSON. Certainly. I will be glad to answer if I can impart the information.

Mr. KING. The Senator has stated that certain rates were fixed during the war and maintained——

Mr. NICHOLSON. For two and a half years after the armistice.

Mr. KING. When the rates were fixed during the war, did all the steel companies, the independents as well as the Steel Corporation, adhere to those rates?

Mr. NICHOLSON. So far as I know, they did.

Mr. KING. So long as these rates were in effect, was there a general acceptation of them by all the steel companies of the United States?

Mr. NICHOLSON. I think in a large measure that is true.

Mr. KING. To what extent, may I inquire of the Senator, have the independents since then departed from those rates?

Mr. NICHOLSON. I think the Steel Trust and the independents maintain prices very nearly on an equality. The independents cut prices, as I recall it, below those of the Steel Corporation, but it was for only a short period, because they were informed that if they cut prices the Steel Corporation would cut prices below their prices, and my recollection is that the independents came back to the schedule fixed by the Steel Corporation.

Mr. KING. Has not the investigation which the able Senator has made convinced him that many of the so-called independents have really used the Steel Trust or the big steel company as a shield to fix rates, behind which they took lodgment and availed themselves of the same high rates as announced and maintained by the Steel Trust?

Mr. NICHOLSON. I would place a different construction upon the situation from the construction placed by the Senator from Utah. I would say that the independents, if we are to reason back to the big Gary dinners, were compelled to accept rates fixed by the Steel Corporation, and that it was not of their liking or choosing but due to a matter of compulsion.

Mr. KING. So long as there has been a demand for the combined product of the Steel Corporation and the independents, have not the independents shown a good deal of happy disposition to follow the rates fixed by the Steel Trust.

Mr. NICHOLSON. If the Senator will take the map and see where the steel plants are located, and where the independent plants are located, he will think differently. Take the Midvale Steel or the Bethlehem Steel Co. They would receive an inquiry for a large tonnage, we will say, in Nebraska or Colorado. The United States Steel Corporation could furnish that steel cheaper than the Midvale or the Bethlehem Steel Co. on account of the difference in freight rates. They would ship it from Chicago. If they get contracts in close proximity to the independents they are on an equal basis with them. The Senator can readily see from the placing of the various steel plants of the Steel Corporation that they have a great advantage in freight rates over their independent competitors.

Mr. KING. After all, then, the Steel Corporation fixes the prices of steel products?

Mr. NICHOLSON. I would say so in a large measure.

Mr. KING. If the independents desired to enter into competition and to lower the prices they would fear the domination of the Steel Trust and would trail in behind it, accepting the rates which it fixed. Accepting that conclusion, may I suggest to the Senator whether he does not think now, in all fairness, that we ought to put steel products on the free list?

Mr. NICHOLSON. I want to call the attention of the distinguished Senator from Utah to the fact that it was under the beneficent auspices of a Democratic administration that these enormous profits were permitted to be made.

Mr. KING. I want the Senator to understand that I am sitting at the feet of Gamaliel now and seeking information. I am conceding, as the Senator stated, that there have been these enormous profits, that the steel corporation has gouged the public—and the Senator used that expression, and I think quite properly—and got these enormous profits. The Senator has indicated that they dominated and that the independents have followed behind them and accepted in the main the rates which they fixed. Does not the Senator think in all fairness that we ought not to prostitute the taxing power of the Government to permit this monopoly to continue to rob and exploit the American people?

Mr. NICHOLSON. I will base my reply upon two propositions—first, that the steel industry seems to be more strongly intrenched so far as getting preferential consideration than any other industry that I know of. On my own side of the Chamber we are in favor of protection. On the Senator's side of the Chamber they are in favor of admitting all the raw products free.

Mr. KING. Oh, no; I do not want the Senator to make that statement.

Mr. NICHOLSON. That is the statement of the Senator from Utah.

Mr. KING. Oh, no.

Mr. NICHOLSON. The Democratic Party is a free-trade party.

Mr. KING. The Senator has made his statement too broad.

Mr. NICHOLSON. I hope I have made it too broad.

Mr. KING. There are spotted protectionists on this side, as there are spotted protectionists on the Senator's side of the aisle.

Mr. NICHOLSON. It would be very pleasing to me if I have made too broad a statement so far as the Democratic Party is concerned.

Throughout the remainder of 1919 and all of 1920 and up until about one year ago the corporation maintained these prices. On April 12, 1921, the corporation announced the first reduction of its prices since the signing of the armistice.

Further, a resumption of imports of foreign low-priced basic materials for steel began in 1918 and 1919, and the prices of steel were held at their war-time levels until the late spring of 1921. Steel prices were not cut until about a year ago, and the net earnings of the steel companies during these supposedly lean years have been greater than they were during the years before the war.

What benefit does the consumer of steel derive, or has he ever derived, from this employment of foreign labor, owned and controlled by the steel industries of the United States? It surely has not been reflected in the price to the consumer. Is it possible that the advantage of this ownership of foreign mines is reflected in the earnings of the steel companies?

The monthly earnings of the Steel Corporation in the latter part of 1916 were in excess of $35,000,000 per month. Thereafter the decrease in earnings during 1917, 1918, and 1919 was due entirely to the deduction of the excess-profits tax. With the exception of this deduction, the earnings of the United States Steel Corporation have been $10,000,000 higher per month than they were in 1915. So that at no time were any of these war-time excess-profits taxes ever paid by the Steel Corporation or by any other steel company.

If an article cost them $1 to make and they sold it for $2, their profit being $1, and by the addition of these taxes their cost was increased to $1.50, they sold the same article for $3 and make $1.50 where they had previously made $1.

Here are some typical steel items on which the manganese producer asks 16 cents per ton and on which the steel manufacturer receives the following duties:

AFFECTING THE BUILDING INDUSTRY.

Beams, channel steel, $10.50 per ton upward.
Sashes, frames and building forms, 40 per cent ad valorem.
Galvanized roofing, $19 per ton.
Butt and lap welded pipe, $15 to $35 per ton.
Conduit pipe, 35 per cent ad valorem.
Nails, $8 to $50 per ton.
Rivets, $20 per ton.
Screening, 25 to 45 per cent ad valorem.
Screws, $60 to $200 per ton.

AFFECTING RAILROADS.

Rails, $3.92 per ton.
Fishplates, $5 per ton.
Bolts, $20 per ton.
Lock washers, 40 per cent ad valorem.
Wheels and axle parts, $20 per ton.
Track tools and sledges, $32.50 per ton.

AFFECTING THE FARMER.

Horse and mule shoes, $12 to $40 per ton.
Horseshoe nails, $50 per ton.
Hoop, band iron, and cotton-baling iron, $5 to $11 per ton.
Galvanized wire, $10 per ton.
Crowbars, $27.50 per ton (or 37½ cents for every crowbar used in the United States).
Wire rope, 40 per cent ad valorem.
Chain, $20 to $80 per ton, "provided no chain except anchor and stud chain shall pay a less duty than 45 per cent ad valorem."
Anvils, $32.50 per ton.
Bolts, etc., $12 to $20 per ton.
Lock nuts, 40 per cent ad valorem.
Tin plate, $20 per ton.
Culvert pipe, 30 per cent ad valorem plus $4 per ton.

AFFECTING MISCELLANEOUS MANUFACTURING INDUSTRY.

Steel billets, $11.20 per ton (which at to-day's market is 33⅓ per cent ad valorem).

The protection afforded to the steel industry on this one item alone, of 42,000,000 tons of steel per year, is $475,000,000 or more.

Steel forgings, 30 per cent ad valorem. (Every steel forging for whatever purpose bears a protection of 30 per cent ad valorem.)
Covered wire, 40 per cent ad valorem.
Wire rope, 40 per cent ad valorem.
Spinning-ring travelers, 40 per cent ad valorem.
Wire heddles and healds, 25 cents per thousand plus 40 per cent ad valorem.
Steel wool, $200 per ton plus 30 per cent ad valorem.
Ball bearings, $200 per ton plus 55 per cent ad valorem.

At a hearing before the Senate Finance Committee on August 25, 1921, Mr. John A. Topping, representing the Republic Iron & Steel Co., asked:

Is it a time-honored policy of the Republican Party—protection of finished products and free raw materials?
What, then, shall we say to an ad valorem duty of 33⅓ per cent on steel ingots, basic product of the steel industry of the United States, and the raw material of every metal manufacturing industry; a protection which costs the people of this country $475,000,000 a year, and benefits the steel industry a like amount? The manganese industry is asking this powerful steel industry to permit a duty which amounts to 16 cents per ton on these same steel ingots.
The best answer to this question is a statement by Chairman FORDNEY, of the House Ways and Means Committee, when he said, "There has been a great deal of talk here about raw material; hide on the back of a range steer, which has never had a bit of human care, is a raw material; iron ore, lying in the ground, is raw material; but when one element of human labor has been added to any such thing to prepare it for its market it has become that man's finished product."

Chairman FORDNEY, of the House Ways and Means Committee, had all the facts before him when considering the merits of manganese protection. He appointed a subcommittee to investigate the manganese reserves, he gave the manganese producers a chance to be heard, and, although this committee was besieged by the agents of the steel interests in their opposition to a tariff on manganese, he refused to bend his knees to their dominance and attempted perversion of Republican principles.

President Campbell, of the Youngstown Steel & Tube Co., said:

The duties on manganese ore and alloys will put a considerable tax on the steel industry which the consumer must pay. We will pay it first and then pass it on to the consumer.

If a tariff of 16 cents a ton on steel is passed on to the consumer, the public has little to fear. Mr. Campbell does not hesitate to ask for a duty on his products, such as pipe, amounting to $15 a ton, or on wire rods of $6.72 a ton, which he is perfectly willing to pass on to the consumer.

Mr. President, the sole question is whether American industries shall be operated by American workmen, making this country independent in time of war and prosperous in time of peace; whether we shall promote our industrial welfare by developing our own raw materials, thus enabling our railroads and lake boats to increase the employment of American labor, or whether we shall compete with riffraff employed in foreign mines, while our citizens seek employment and our own abundant natural resources lie undeveloped.

Mr. WILLIS. Mr. President, I desire merely to make some very brief observations with reference to this item which has been so eloquently discussed by the Senator from Colorado [Mr. NICHOLSON].

I will say, in the first place, that I think the Senator from Colorado is utterly mistaken in his viewpoint with reference to the probable effect of the action which he desires the Senate to take. I shall not at this time engage in any discussion of the rates proposed on iron and steel; we have not come to those as yet, nor shall I engage in any attack upon the iron and steel industry. We shall settle the question of rates on iron and steel when we come to those rates. I hold no brief for the United States Steel Corporation or for anybody else, but I do have some interest in the general welfare of the American people; and I think the action contemplated and desired by the Senator from Colorado would not promote that welfare.

I am quite familiar with the argument urged in favor of the establishment of new industries in this country, and I am strongly in favor of the development of the resources of this country; but, Mr. President, we can not develop a resource which does not exist in appreciable quantity. The cold fact is, borne out by the most careful researches, that we have not in the United States a sufficient supply of manganese to make it reasonable to talk about the establishment of a manganese industry. Now, let us see whether that is true, for I think it is fundamental.

Here in part is what is reported in the Summary of Tariff Information, at page 362, concerning manganese:

Operating costs here are much higher than abroad, American mines being situated far from points of consumption and often at considerable distances from railroads.

Now, note this:

Domestic resources have been carefully estimated—

This is the most recent information and the most reliable information that we have—

Domestic resources have been carefully estimated and found to be insufficient to supply our requirements for more than a few years.

Mr. WALSH of Montana. Mr. President——

Mr. WILLIS. I yield to the Senator from Montana.

Mr. WALSH of Montana. I inquire of the Senator why he states that is the "most reliable information" we have?

Mr. WILLIS. It is the most reliable information that I have been able to get from any quarter. It is the information that is furnished by the Tariff Commission, and I should very much prefer to rely upon this information rather than to rely upon information furnished in briefs by those who are seeking to secure a practically prohibitive duty on this product. Does the Senator from Montana know of any more reliable information than this?

Mr. WALSH of Montana. I think so.

Mr. WILLIS. I hope the Senator will give it to the Senate.

Mr. WALSH of Montana. I shall be very glad to do so; but I want now to challenge the statement which the Senator now makes, which is apparently the basis of his argument. The Senator, however, probably knows that the information which the Tariff Commission gives us it gets from the Geological Survey reports.

Mr. WILLIS. Yes.

Mr. WALSH of Montana. The Senator probably also knows, if he has read the hearings, that the Geological Survey admits that it is in error about that.

Mr. WILLIS. Yes. We might as well, however, forthwith get at the facts of the situation. It is admitted that there are deposits of manganese in this country; I think the Senator from Montana, probably, has deposits in his State, and there are such deposits in the State represented by the Senator from Colorado; those two States have, probably, the greatest deposits of manganese in this country; but even there my information is that those deposits are in comparatively small quantities; that they are found in comparatively small "pockets," and are not sufficient to supply the industry for more than two or three years at the outside.

Mr. WALSH of Montana. The Senator from Montana will be able to correct that statement before the consideration of the subject shall have been concluded.

Mr. WILLIS. I shall be very glad if the Senator will be able to correct it; but that is the latest information I have.

Mr. BURSUM. Mr. President——

Mr. WILLIS. I yield to the Senator from New Mexico.

Mr. BURSUM. I desire to call the attention of the Senator from Ohio to the fact that the Geological Survey has made a detailed survey of but a very small portion of the area of this country's resources. There are millions and millions of acres all over this country that the Geological Survey has never been able to examine. The Geological Survey is many years behind in its information. I do not make that statement as reflection on the ability of those who are connected with the Geological Survey, for the truth of the matter is that the Government has never given the Geological Survey sufficient support or appropriations to enable it to make thorough investigations. There might be billions of tons of manganese without there being any record of it so far as any knowledge which the Geological Survey might have obtained.

Mr. KELLOGG and Mr. WALSH of Montana addressed the Chair.

Mr. WILLIS. I yield first to the Senator from Minnesota.

Mr. KELLOGG. Mr. President, it appears, as I understand, in the hearings before the Committee on Finance that the Tariff Commission report is based upon the information fur-

nished by the Geological Survey; that many of their estimates are five or six years old; that they are out of date, and do not include large explorations of manganese ore and manganiferous iron ore which were developed during the war and immediately after the war. For instance, my State has developed about 40,000,000 tons of manganiferous iron ore which is available for the manufacture of steel in this country.

Mr. WALSH of Montana. Mr. President, I ventured to interrupt the distinguished Senator from Ohio because if the facts were as he assumes them to be there would scarcely be room for argument. If there is not enough of manganiferous ore in this country to warrant the belief that any considerable percentage of the domestic demand could be supplied from domestic sources, I suppose probably it would not fall within the protective principle. But I do not want the Senate to proceed upon the assumption that that is the established fact, although the Senator has accepted it.

Mr. WILLIS. Mr. President, I should be very glad if any later or more reliable information can be given to the Senate, but I venture to suggest to the Senator that the mere hypothesis that we have millions of tons of this material scattered around somewhere is a rather unsubstantial basis upon which to construct legislation that affects great industries employing hundreds of thousands of men.

Mr. WALSH of Montana. We all concede that statement to be true, and if there is no better basis than the mere general statement that there are hundreds of millions of tons of manganese in this country, it would scarcely be a safe factor for the guidance of the Senate; but I think that if the Senator will read the testimony taken before the committee he will find the figures to be much more substantial than a mere general statement. I shall be glad to supply further information on the subject.

Mr. WILLIS. My friend from Montana is an experienced, courageous, and able legislator, and he knows, as I know, although I do not know it so well as he, that men in their desire to make out a case will unconsciously perhaps overstate; in other words, in their enthusiasm, in a perfectly honorable and honest way, I think that the advocates of this practically prohibitive duty—and I am referring to what I have read in the hearings; and the duty is prohibitive, and I am astounded to find my friend from Montana advocating such a duty—in the enthusiasm of their cause have worked themselves up into the belief that there are deposits in this country that can be developed. I rely upon the latest information available, and, if I may have permission, I shall place in the RECORD at this point an excerpt from a letter from the Director of the Geological Survey dated October 6, 1921.

The PRESIDING OFFICER (Mr. ODDIE in the chair). Without objection, it is so ordered.

The excerpt referred to is as follows:

> The foregoing discussion of the charges and claims of Mr. Potts should not becloud the fundamental question of the amount of manganese-bearing materials remaining unmined in the United States, for that is the information which Congress needs. It is out of the question for the survey at the present time to attempt an exhaustive reexamination of all or even most of the principal deposits. In considering the present situation I do not think this is necessary. The estimates, even of qualified individuals, concerning the domestic resources of a number of minerals seem bound to differ widely. The estimates of mineral reserves by conservative persons, particularly those conscious of responsibility, will always seem ridiculously low to persons of different temperament and to those seeking to promote selfish ends. After considering the estimates of our domestic manganese reserves made by the survey during 1917 and 1918, the statements of production that have been filed by the producers with the survey, and other sources of information published or furnished informally since that time, I give herewith the survey's present impression of domestic manganese-ore reserves. There is fair assurance of the existence in domestic deposits of about 1,800,000 tons of material containing more than 35 per cent manganese, which are sufficient to make about 75,000,000 tons of steel by present practices. If the large reserves of lower grade material be considered, making proper allowances for necessary adjustments in steel plants and processes, the combined reserves are probably sufficient to make about twice as much steel, or 150,000,000 tons.
>
> Very truly yours,
>
> GEO. OTIS SMITH, *Director.*

Mr. WALSH of Montana. If the Senator will pardon a further interruption, I am willing to announce my concurrence with the view expressed by the Senator that the statements of gentlemen who come before the committee and make arguments concerning conditions upon which they expect to get high rates of duty are to be regarded, as a matter of course, with some degree of suspicion, at least with a high degree of scrutiny. We were read a lecture the other day for venturing to question some statements made from the other side of the Chamber. I am glad to recognize that the Senator from Ohio admits that statements made under certain conditions should be considered with some degree of care and not accepted without careful investigation.

Mr. NICHOLSON. Mr. President, will the Senator yield for a question?

Mr. WILLIS. I will yield to my friend in a moment. I desire to finish reading the statement from the Summary of Tariff Information which I think I had not completed. Then I will yield to my friend. I quote further from page 362 of the Tariff Information Summary:

> Domestic resources have been carefully estimated and found to be insufficient to supply our requirements for more than a few years. Under normal trade conditions, with a free movement of ore from foreign countries, domestic manganese mining can not continue except on a limited scale.

Now I yield to the Senator from Colorado.

Mr. NICHOLSON. Mr. President, I wish to state first, for the information of the Senator, that the Geological Survey is one among some fourteen other bureaus in the Department of the Interior. Suppose that our petroleum industry had been dependent upon the reports made by the Geological Survey, what would be the petroleum production of this Nation to-day? I venture to say to the Senator from Ohio that when the tariff of 1883 was passed and a duty of 25 cents a ton was placed upon iron ore the Geological Survey reports did not disclose one-tenth of the iron deposits of the United States.

I should like to say further, for the information of the Senator, that the report of the Geological Survey from which he is reading is as misleading so far as manganese is concerned as were its reports in 1883 concerning the deposits of iron ore.

Mr. WILLIS. Mr. President, it raises in my mind, to borrow the language of my friend from Montana, a degree of suspicion or, at any rate, suggests exceeding care and scrutiny when in order to make out a case we must attack an agency of the Government and undertake to prove that it does not know what it is talking about. Perhaps the Geological Survey do not know what they are talking about, but Senators who undertake to say that the Geological Survey is without sufficient information, although they are supposed to know about it, owe it to the Senate to bring more convincing testimony than has been brought forth in any statement which has been made upon the floor or in any committee room, as shown by the hearings.

Mr. FRELINGHUYSEN and Mr. BURSUM addressed the Chair.

Mr. WILLIS. I yield first to the Senator from New Jersey.

Mr. FRELINGHUYSEN. Have not the Geological Survey been relied upon as an authority heretofore in connection with information of similar character?

Mr. WILLIS. Absolutely; but in this instance their report does not coincide with the ideas of gentlemen who want a prohibitive duty on manganese, and therefore the Geological Survey is to be cast into "outer darkness, where there is wailing and gnashing of teeth."

Mr. NICHOLSON. Will the Senator yield to me to make one more statement concerning the Geological Survey?

Mr. WILLIS. Certainly.

Mr. NICHOLSON. The Geological Survey has had insufficient funds set aside for its work, so that it has not been in a position to carry on its investigations in a thorough and complete way. I have lived for many years in Colorado; and in that State, after the Geological Survey had made two surveys in the district and never reported that there was one ton of such ore within the confines of the Leadville district, there was discovered carbonate of zinc, and we shipped millions of tons of it.

I wish to say to the Senator from Ohio that I have spent 42 years of my life in mining; I have visited nearly all of the States that produce zinc and lead and manganese, and it is my opinion that, after a few years of intensive development, if all the manganese in the mines of the rest of the world were sealed up, the United States could produce sufficient manganese not only to take care of the iron industry in the United States but in the whole world.

Mr. WILLIS. Mr. President, I attach great weight to the opinion of my friend from Colorado, and have the most profound regard for him personally, but I think he is mistaken about this. For example, to see whether any real investigating work was done here, let us see about it. I am reading now from the hearings, at page 2098, to see whether they really did investigate this matter:

> In this work 18 geologists, of whom 12 were members of this survey, specially chosen because of previous experience and other fitness, devoted a total of about 50 months to field examinations during 1917 and 1918.

Mr. BURSUM. How many?

Mr. WILLIS. Eighteen geologists, of whom 12 were members of the survey.

Mr. BURSUM. Of how large an area does the Senator think that those 12 geologists could make a detailed survey?

Mr. WILLIS. I am no more of a geologist than my friend from New Mexico is. I could not tell how much they could survey. I am simply calling attention to the fact that this idea that is put forth here, that there has not been anything of a careful survey, has nothing to support it. The fact is that the Geological Survey, which heretofore has been relied upon, is now assailed, and its conclusions are called in question simply because it did not find the information that Senators wanted.

Mr. WALSH of Montana. Mr. President, I desire to invite attention to the information now given to the Senate by the Senator from Ohio, namely, that the statement put out by the Geological Survey is based upon surveys made in the years 1917 and 1918. It will be understood that the manganese industry in this country, so far as it has any considerable proportions at all, was a development of the war; that the deposits were opened up during 1917 and 1918, much of them late in 1918, and many of them had not yet become producing at the time the armistice was signed in November, 1918. So that the Senator from Ohio, fair man as he is, must realize that the production since that time has been such as to show that the information relied upon which dates from 1917 and 1918 can not possibly be authoritative.

Mr. WILLIS. Oh, Mr. President, I did not say at all that no investigations were made subsequent to that time. The statement that I read—and I will place the whole paragraph in the RECORD here, at page 2098 of the hearings—was simply undertaking to show the thoroughness with which the work was done in those years. I am repelling the idea that because the department does not reach the conclusion that we think it ought to reach and that we hoped it would reach, therefore the whole thing is to be called in question.

The PRESIDING OFFICER. Without objection, the matter referred to by the Senator from Ohio will be printed in the RECORD.

The matter referred to is as follows:

For your information I attach hereto a brief summary of the estimate of reserves prepared by Messrs. Harder and Hewett, in which the work is classified as to whether it was detailed or reconnaissance and as to whether estimates might warrant revision or not. In this work 18 geologists, of whom 12 were members of this survey, specially chosen because of previous experience and other fitness, devoted a total of about 50 months to field examinations during 1917 and 1918. Of the 1,181 deposits considered, 588 lie in districts where the work was of detailed character involving the preparation of geologic maps. It will be noted that the reserves of high-grade ore in these districts make up 80 per cent of the total in the United States and of the additional reserves in prospect almost the entire amount, if the carbonate ore of the Butte district be omitted. The reconnaissance work was done in districts that mostly offered small promise of reserves of high-grade ore, although a number of districts containing low-grade ore were considered in this manner only. The survey has never had any doubt that the reserves of low-grade manganese ore were adequate to meet any needs that the steel industry would impose for some years to come.

Mr. BURSUM. Mr. President, will the Senator yield?

Mr. WILLIS. Yes; I yield further, but I do want to go on. I do not want to occupy time, but I yield to the Senator from New Mexico.

Mr. BURSUM. I want to impress the Senator from Ohio with the fact that there is no disposition upon the part of anyone to charge inaccurate information on the part of the Geological Survey. What we do say is that the Geological Survey is not in possession of sufficient information——

Mr. WILLIS. To be accurate.

Mr. BURSUM. And that the reason is apparent, that the appropriations have not been such as to enable the Geological Survey to place a sufficient force in the field to make detailed surveys. It has simply been a physical impossibility.

Mr. WILLIS. Mr. President, I will join the Senator in endeavoring to secure more liberal appropriations for this bureau in the future; but I still cling to the lingering belief that that bureau is a tolerably reliable concern now, and I am inclined, until more reliable information is produced, to place credence in its reports.

Mr. ODDIE. Mr. President——

The PRESIDING OFFICER (Mr. STERLING in the chair). Does the Senator from Ohio yield to the Senator from Nevada?

Mr. WILLIS. I yield to the Senator from Nevada.

Mr. ODDIE. I should like to make a statement showing that the Geological Survey has been in error and has admitted its error.

In the hearings will be found a letter to the Finance Committee, dated March 10, 1922, from the Director of the Geological Survey, in which he says:

My attention has been called to a statement which appears on page 2100 of the tariff hearings, Schedule 3, being a quotation from certain comments made by me in a communication to the chairman of the Tariff Commission. These detailed comments were of the nature of a reply to certain charges made before your committee, and, while intended to clarify the matter of the domestic reserves of manganese ore, contained, unfortunately, an inexplicable blunder, which unintentionally does injustice to a well-recognized large reserve of high-grade manganese ore at Butte. * * * There is no question but that there are large deposits of manganese carbonate ore in the Butte district, and of the importance of those carbonate ores in the Emma mine at Butte.

That can apply to many other deposits in the United States, and there is an abundance of evidence to show that the deposits of manganese ore to-day are far in excess of any statements made in any of the Government reports.

Mr. WILLIS. Mr. President, I want now, if I can, to proceed for just a very few minutes and finish what I have in mind to say.

The trouble about the argument of those who desire to overturn the action of the committee is that they assume that if they find somewhere a metal containing a trace of manganese, that is a manganiferous ore, and therefore that is feasible to be used in the manufacture of steel. The fact of the business is that those low-grade ores can not be satisfactorily used. I call the attention of Senators to the fact, which they must admit to be a fact, that although the manufacturers of iron and steel may be charged with a great many things, everybody will have to admit that they are tolerably good business men, that they know their business fairly well, and, I repeat, I hold no brief for them.

If there were in the United States sufficient deposits of manganese, do not Senators suppose that those who have been responsible for the development of the great iron and steel industry of the country would have preferred to secure that material here? And do not Senators know also that every effort has been made to develop the various sources of supply, but it has been found, as I have said, that the material exists in little pockets here and there, and has not been found workable? This is a great industry, and it must have access to a reasonably certain source of supply.

Mr. NICHOLSON. Mr. President, may I ask the Senator another question?

Mr. WILLIS. Certainly.

Mr. NICHOLSON. Does the Senator feel that a duty of 1 cent a pound on the metallic content of all manganese ore imported into this country, which will add only 16 cents a ton to the cost of steel that is manufactured here, is going to destroy the steel industry? Does the Senator feel that that places an excessive burden upon the steel industry, in other words?

Mr. WILLIS. Mr. President, if I had felt that, I should have sought some way to give audible expression to it; but I have not said anything whatever of that sort, and it is apparent that I do not feel that way.

Mr. NICHOLSON. But that is the very question involved here. Does the Senator think that 16 cents added to the cost of a ton of steel in this country is going to destroy the steel industry of the United States?

Mr. WILLIS. Oh, certainly not. I have not made any such suggestion, that it would destroy the steel industry. The Senator knows that.

Mr. NICHOLSON. Why, then, does the Senator oppose this?

Mr. WILLIS. Because I do not desire to have the Senator—if he wants me to say it—unwittingly play into the hands of the United States Steel Corporation, which manufactures its own ferromanganese, and which, if his plan goes through, will have a monopoly of the thing. That is why.

Mr. NICHOLSON. I think I have clearly shown to the Senator that at the places where the independents get their supply of manganese ore it is mined by labor which is paid 6 and 7 cents a day.

Mr. WILLIS. Yes; but that does not respond to what I have just stated to the Senator.

Mr. NICHOLSON. Yes; it does.

Mr. WILLIS. No; that makes no response at all. The fact is——

Mr. POMERENE. Mr. President——

Mr. WILLIS. Let me answer the statement just a little bit further. As I say, I am not at this time discussing the rates upon iron and steel. We will meet that question when we come to it, and the Senator will find that I will go as far as he will to insist that those rates shall be fair; but the fact is that unwittingly the placing of an excessive—a prohibitive—duty upon manganese plays directly into the hands of the United States Steel Corporation, which is the only great steel company that manufactures its ferromanganese. The Senator, in his desire—perfectly commendable and perfectly sincere—is playing into the hands of the corporation that he is denouncing

and putting a burden on the shoulders of those that he would favor. There is not any question about that fact.

Mr. WALSH of Montana. Mr. President, I have been endeavoring to follow the Senator from Ohio; and I must confess that I do not quite understand how, if the Steel Corporation, which manufactures its own ferromanganese, is obliged——

Mr. WILLIS. And the other companies do not, I will say to the Senate. The so-called independent companies do not.

Mr. WALSH of Montana. Yes; the United States Steel Corporation produces its own ferromanganese.

Mr. WILLIS. Yes; that is my understanding.

Mr. WALSH of Montana. Utilizing, of course, manganiferous ores. If a duty is placed upon the importation from a foreign country of manganiferous ores, just how does that help the United States Steel Corporation, which manufactures ferromanganese?

Mr. WILLIS. It must be perfectly apparent to the Senator that if there were only a reasonable duty upon ferromanganese, or if it should be on the free list—personally, I should very much prefer a reasonable duty, though those materials have heretofore been on the free list, and are now on the free list—but if they should be on the free list or come in under only a reasonable duty, it must be perfectly apparent to the Senator that the so-called independent companies, the smaller companies, will have a very much better opportunity of getting their materials than they will have if a practically prohibitive duty is placed upon the importation of this material.

Mr. WALSH of Montana. I can very well understand, Mr. President, that if the manganese ores were admitted free and a duty were imposed upon the ferromanganese that would, of course, operate to the interest of the United States Steel Corporation, which is engaged in the manufacture of ferromanganese; but that would be because of the duty on ferromanganese and not because of the duty on manganese ores. As I understand, we are not now considering the duty on ferromanganese; we are considering the duty on manganese.

Mr. WILLIS. I understand that perfectly well. What I am trying to show to the Senate is that we are about to do the thing that so many times heretofore in legislation has been done in haste and in a spirit of hate, and I am speaking of this only because of the exceedingly critical character of the address and argument made by my friend from Colorado. In order to "get" the United States Steel Corporation, which is alleged to be making great profits, we are likely to do a thing here that really does not increase the burden of the United States Steel Corporation so greatly as it does the burden of the so-called independent companies.

Mr. WALSH of Montana. I have not the slightest objection to the Senator pursuing that argument with the Senator from Colorado, and I should not think of interrupting, but that was not the point. The Senator laid down with very much vigor and force the proposition that those who are in favor of a duty on manganese ore——

Mr. WILLIS. A prohibitive duty, if the Senator will permit me to correct him.

Mr. WALSH of Montana. A prohibitive duty, for that matter, were playing into the hands of the United States Steel Corporation, which, so far as I know, owns no mines in this country valuable because of the manganese content.

Mr. WILLIS. It owned a number of mines, but abandoned most of them, because they were found not to be profitable.

Mr. WALSH of Montana. I am talking about owning producing manganese mines. It does own mines in Brazil, and of course wants to have the ores introduced without duty, the independent companies owning no foreign supplies so far as my information goes.

Mr. WILLIS. Then is it not evident to the Senator that if you shut out all manganese ores from elsewhere you have given a very practical and substantial advantage to the United States Steel Corporation, which, by the Senator's own statement, does own tremendous mines in Brazil? That is perfectly clear to me.

Mr. WALSH of Montana. I should think not. I should think being obliged to pay a duty upon the ores which it gets from Brazil and other places would work to the disadvantage of the steel company.

Mr. WILLIS. I think it would be very much more to the disadvantage of the independents, who did not have any mines anywhere, if their foreign supply were cut off.

Mr. WALSH of Montana. Why?

Mr. WILLIS. That is very clear to me. If the Senator can not see that, I do not want to take the time to discuss it with him, but I think the Senator will see it if he thinks it over.

Mr. WALSH of Montana. Of course if the Senator wants to abandon that argument——

Mr. WILLIS. The Senator does not want to abandon it. I insist upon it with a great deal of vigor, and I say it is a fact, that if this goes through as suggested by the Senator from Colorado, out of a desire to injure or to put a limitation upon one concern, you will really practically give it more advantage over the independent concerns than it now has.

According to the latest figures I have available, in 1921 we produced 85,000 tons of manganese ore, of workable character, not where there is a trace of manganese in it but ore running 35 per cent or above. The normal requirement of manufacture in this country is about ten times that much. We are now producing practically one-tenth of what we must have. I put it to Senators whether it is wise, just in one fell swoop, to say to these people who up to date have been able to produce only one-tenth of what is used in the country that they shall be called upon to produce all that is to be used.

Mr. NICHOLSON. I assume that the Senator from Ohio wants to be fair.

Mr. WILLIS. I am fair.

Mr. NICHOLSON. But his information is misleading in this, that he knows that it is impossible for the miners of the United States to produce this manganese in competition with the cheap labor that is employed in its production abroad. I know the Senator from Ohio, if he will consider these facts, will find the reason for the decline in the production of manganese ore after the armistice was signed. It was because the steel companies, the independents and the United States Steel Corporation, purchased their ores where they could buy them the cheapest. It was not a fact that we did not have any here, but we could not produce it as cheaply as it was produced abroad, and I want to say to the Senator that if we were to produce this ore as cheaply as it is produced abroad it would place the shackles of slavery upon the laborers of America.

Mr. BURSUM. Mr. President——

Mr. WILLIS. Let me answer one Senator at a time. I say to my friend from Colorado that if he had suggested a reasonable rate of duty the situation would have been different. I am in favor of taking pretty strong medicine in the matter of protective tariff duties, as the Senator knows, and I will go a long way to establish protective duties, because I believe in developing American industry; but I do not believe it is in harmony with Republican doctrine to write duties which are prohibitive, and if there has been monopoly in the steel industry I do not think it is wise to undertake to correct that by building another monopoly in the manganese industry. I think if the Senator had suggested a reasonable rate of duty there would have been no difficulty about it at all. Now I yield to the Senator from New Mexico.

Mr. BURSUM. Does the Senator from Ohio believe that a duty which involves practically seven-tenths of 1 per cent on the finished product is prohibitive?

Mr. WILLIS. Practically so; yes. I do not think it would destroy that industry; do not misunderstand me; but I think it is practically a prohibitive duty. That is the hope of the Senator, is it not? He is for it, and he wants it to be prohibitive. He does not want any of this foreign material to come in. I do not remember how much he said there was scattered all around in the West, so that you could find it anywhere; could scoop it up.

Mr. BURSUM. I believe that every ounce of manganese that can be produced by American labor ought to be produced in this country.

Mr. WILLIS. So do I, if it can be produced economically, and in a quantity sufficient to supply the market; but I do not believe that if you find a teaspoonful here and a teapotful over yonder you ought to say to a great industry that needs 800,000 tons a year: "You have to rely on these doubtful sources of supply." Let us put on a reasonable protective duty and develop the industry rather than build a wall so high that we can not defend the rate before the people. This makes a rate of about 120 per cent, and I think there is no defense for it.

Mr. BURSUM. We must either give the miner a chance to live, or we had better not give him any duty. We can not expect miners to live on bread and water.

Mr. WILLIS. No, Mr. President; my friend and I can not get into any argument about that, because we believe in exactly the same theory. The fact is that the Senator is proposing to place a rate that is prohibitive; he wants it prohibitive; I think the better way would be to place a reasonable rate on it, to see whether it is true that the Geological Survey is mistaken, and that the reports of the scientific men are all wrong. I hope they are; I hope we will find mountains of manganese here; but

I think until we find them it is unwise to so legislate as to prohibit the importation of it. I yield the floor.

Mr. BURSUM. The Senator will admit that if we have not the supply of manganese in this country of necessity we will have to import the supply, the same as we are doing now. Even if that were true, as I see it, this would be no serious matter, nothing that would shut down the production of steel in this country.

Mr. WILLIS. I do not desire to be misunderstood or misquoted. I have not said or thought that this was going to shut down the production of steel in this country. I have never entertained such an idea.

Mr. BURSUM. The Senator has time and again said this duty was prohibitive. What did he mean by that?

Mr. WILLIS. I meant that it was prohibitive in that foreign manganese could not come in, and that we would have to have access to these little sources of supply in this country, where admittedly the ore can not, in my opinion, be economically mined.

Mr. BURSUM. If the statement of the Senator from Ohio is true——

Mr. WILLIS. It is true.

Mr. BURSUM. That this duty is prohibitory, that is an admission that we can produce the manganese in this country.

Mr. WILLIS. Certainly. I have said that. The Senator does not need to argue to prove that, because I have said that a number of times, if we want to rely upon these little pocket deposits.

Mr. BURSUM. The Senator makes the statement that this duty is prohibitory, and that would imply that the seven-tenths of 1 per cent which this would increase the cost of the finished product, or the manufactured steel, would be a prohibitory rate, because, after all, the question as to whether a duty is prohibitive or not depends entirely upon its effect upon the manufactured product. I suggest that prior to the war we produced no manganese. Certainly, on account of the impossibility of importing manganese from other countries, from those places were our industrial concerns had been in the habit of purchasing their supplies, it became vital to the country that manganese be produced in this country.

The miners all over this country were asked to go out and prospect and hunt for it, to locate the supplies of manganese, and develop the mines which might yield a production to the Nation in time of great necessity; and, surprising as it was, the miners of this country were able to supply all the requirements during the war. They scarcely developed the product to a point of economical production. Now, I contend it would be unjust to say to these miners, "You developed your property; you have done so at great expense, and now we do not need you. We can get our supplies from Brazil, or from China, or from some other country. We can bring those supplies in as ballast. We can deliver manganese here much cheaper than you can produce it. We are not going to give you protection which will permit you to operate."

I say that is manifestly unjust, that it is unfair, it is wrong to say to the miner, "You either compete with 60-cent laborers of China or the cheap labor of Brazil, or your property will be idle." I say that is unfair and not in harmony with the doctrine of protection to American labor and American industry.

I submit that one of our troubles in this country is high freight rates, and it has been contended, and I believe rightfully so, that one of the reasons why the rates can not be reduced is that there has not been a sufficient volume of tonnage. Develop the mining resources of this country, develop this manganese industry, and it will be a great factor toward giving the railroads a large tonnage of freight, which will be a contributing factor toward making possible lower freight rates. It is impossible for the railroads of the country to compete with tonnage that is brought over in ballast. It simply can not be done.

Mr. FRELINGHUYSEN. Mr. President, in the interest of accuracy, I want to introduce into the RECORD a letter which has been so often quoted in this debate, of Director of the Geological Survey Mr. George Otis Smith in reply to the statement of Charles W. Potts. I want that to go into the RECORD, and also the letter which was partially read by the Senator from Nevada [Mr. ODDIE], now occupying the chair, in which the Director of the Geological Survey admitted the deposits of manganese ore in the Montana district, which is perfectly true.

There is a large deposit of ore there—how extensive has never yet been determined. But I want to point out in the letter, which I ask to have printed in the RECORD, the statement of the director, in justice to him, in which he says:

Finally, to show the unintentional character of what now seems a misstatement, permit me to quote the concluding paragraph of my letter of October 7, also addressed to Dr. Page (see p. 2097 of hearings). In this letter, written only a day later than the submission of the other comments, I make a statement which in my opinion is absolutely correct and does not need the change of a single word.

I ask that this entire letter be printed in the RECORD, with the other letter from the director to which I have already called attention.

There being no objection, the letters referred to were ordered to be printed in the RECORD, as follows:

DEPARTMENT OF THE INTERIOR,
UNITED STATES GEOLOGICAL SURVEY,
Washington, October 6, 1921.

Dr. THOMAS WALKER PAGE,
Chairman United States Tariff Commission.

DEAR DOCTOR PAGE: I have received your letter of September 30 with reference to the statements of Mr. C. W. Potts before the Committee on Finance of the United States Senate.

Mr. Potts's charges are of such a character and of such wide range that they demand rather detailed consideration. It has seemed best, therefore, to prepare rather full answers to each type of charge. I give below a summary of my reply. Considering the reception given to the charges by the Senate committee, I suggest that Mr. Potts be given an opportunity to retract the charges and, if possible, to reappear before the committee under circumstances that permit cross-examination. I need scarcely assure you that you are at liberty to use both this letter and the attached statement as you wish.

Mr. Potts's charges that the survey's estimates of manganese-ore reserves are based upon superficial examinations and obsolete reports and that the examinations were undertaken with pessimism are untrue. His further charges that the reports of reserves in the Butte district are not consistent with reports of production and that the World Atlas of Commercial Geology was based upon material available in 1913 are not only untrue but arise out of his very superficial examination of and careless reference to the publications. On the other hand, he has refused, for the present at least, to give the survey access to the data and methods by which his estimate of 10,000,000 tons of 42 per cent ore was reached. Further, by partial statements and by the incorrect use of data submitted to him, he has reached conclusions which are obviously unsound.

The foregoing discussion of the charges and claims of Mr. Potts should not becloud the fundamental question of the amount of manganese-bearing materials remaining unmined in the United States, for that is the information which Congress needs. It is out of the question for the survey at the present time to attempt an exhaustive reexamination of all or even most of the principal deposits. In considering the present situation I do not think this is necessary. The estimates, even of qualified individuals, concerning the domestic resources of a number of minerals seem bound to differ widely. The estimates of mineral reserves by conservative persons, particularly those conscious of responsibility, will always seem ridiculously low to persons of different temperament and to those seeking to promote selfish ends. After considering the estimates of our domestic manganese reserves made by the survey during 1917 and 1918, the statements of production that have been filed by the producers with the survey, and other sources of information published or furnished informally since that time, I give herewith the survey's present impression of domestic manganese-ore reserves. There is fair assurance of the existence in domestic deposits of about 1,800,000 tons of material containing more than 35 per cent manganese, which are sufficient to make about 75,000,000 tons of steel by present practices. If the large reserves of lower grade material be considered, making proper allowances for necessary adjustments in steel plants and processes, the combined reserves are probably sufficient to make about twice as much steel, or 150,000,000 tons.

Very truly yours,

GEO. OTIS SMITH, *Director.*

DEPARTMENT OF THE INTERIOR,
UNITED STATES GEOLOGICAL SURVEY, OFFICE OF THE DIRECTOR,
Washington, March 9, 1922.

Hon. PORTER J. MCCUMBER,
Chairman Finance Committee, United States Senate.

MY DEAR SENATOR: My attention has been called to a statement which appears on page 2100 of the Tariff Hearings, Schedule 3, being a quotation from certain comments made by me in a communication to the chairman of the Tariff Commission. These detailed comments were of the nature of a reply to certain charges made before your committee, and while intended to clarify the matter of the domestic reserves of manganese ore, contained, unfortunately, an inexplicable blunder which unintentionally does injustice to a well recognized large reserve of high-grade manganese ore at Butte. The statements now made by the Anaconda Copper Mining Co. and Mr. A. J. Seligman are not necessary to set this matter right in my mind, since the same figures of ore shipments for 1918 are already on record with the Geological Survey, being confidentially reported early in 1919 by the Anaconda Copper Mining Co.

There is no question but that there are large deposits of manganese carbonate ore in the Butte district, and the importance of these carbonate ores in the Emma mine at Butte was in fact recognized in 1917 at the time of the study of this district by Mr. Pardee, a geologist of this survey, but at that time no tonnage estimate was regarded as possible, although the high quality of these ores was stated in the survey report "Manganese at Butte, Mont.," published in April, 1918, and later in the same year the table of manganese ore reserves in the United States specifically states that the estimate of tonnage given "does not include large deposits of carbonate ore, 35 to 38 per cent of manganese."

The paragraph in the hearings to which attention has been called (bottom of page 2100 and top of page 2101) seems to be in error in its mention of concentration of low-grade oxide ore. The fact well known to Mr. Hewett and Mr. Pardee, and in fact to all of us who kept in touch with the subject during the search for manganese ores, is that large bodies of high-grade carbonate manganese ores exist in the Emma mine at Butte and were being mined in 1918. However, in showing up what seemed to me Mr. Potts's unfairness in handling the survey

reports, Mr. Hewett himself seems to have confused concentrated low-grade oxide ore with these shipments from the Emma mine. Unfortunately, Mr. Hewett is, now in the field in Nevada, but rather than wait for his explanation of what now appears to me a careless statement, due possibly to the fact that the detailed comment appearing on pages 2097 to 2100 was prepared by Mr. Hewett last October on the eve of his leaving the city on a field trip, I am now submitting this correction and if I hear anything to modify this explanation I will later inform you.

Finally, to show the unintentional character of what now seems a misstatement, permit me to quote the concluding paragraph of my letter of October 7, also addressed to Doctor Page (see page 2097 of hearings). In this letter, written only a day later than the submission of the other comments, I make a statement which in my opinion is absolutely correct and does not need the change of a single word. This brings out the essential fact that the large shipments from the Emma mine in 1918 and 1920 were of a wholly different character from the 2,800 tons of high-grade oxide ore estimated by the Geological Survey.

On the same page in an earlier paragraph Mr. Potts reiterates his reference to the 2,800 tons of high-grade ore in the Butte district, with which he compares a many times larger tonnage of ore shipped from the same district, not specifying, however, the kind of ore so shipped, the survey's distinction in its estimate between oxide and carbonate ores being either unnoticed by Mr. Potts, as he stated to Mr. Hewett, or disregarded by him in his very plain purpose to discredit the United States Geological Survey.

Yours very cordially,

GEORGE OTIS SMITH, *Director.*

Mr. FRELINGHUYSEN. Mr. President, the manganese ore was transferred to the free list only after a very thorough examination by the committee of all the available evidence. The committee reported on manganese as follows:

The transfer of manganese ore to the free list is a further illustration of this policy. Data as to domestic resources have been prepared by the Geological Survey and the Tariff Commission, and their evidence upholds the conclusion that domestic resources of manganese ore are insufficient in quantity to provide adequate supplies of this important metal for any considerable period.

The question in the minds of the committee was whether there was a sufficient supply available in this country for more than two or three years. There is extreme doubt, and the Geological Survey confidently claim that the present resources will not last over that length of time.

The record of manganese production during the war was this—and I read from the Tariff Commission, who made a thorough study of the situation and presented this summary of information:

Prior to the war we produced less than 1 per cent of our manganese requirements, the output rarely exceeding 4,000 tons of high-grade ore. In 1915 production of high-grade ore (metallic content 35 per cent or more) increased to nearly 10,000 tons; in 1916, to 31,000 tons; in 1917, to 129,000 tons; and in 1918, to approximately 305,869 tons. In 1919 it fell to less than 56,000 tons—

I may point out that at the period of the higher production of ferromanganese the metal content sold as high as $450 per ton, which, of course, encouraged the mines to produce. It paid for the expense of mining operations and for the development as well—

but in 1920 increased to about 94,000 tons. During the war the production of manganese ore was a profitable industry in many localities, but only because prices were from three to four times pre-war quotations. Foreign ores are of a better general grade and more easily mined, averaging from 45 to 55 per cent manganese, as compared with domestic "high grade" running from 35 to 45 per cent. Operating costs here are much higher than abroad, American mines being situated far from points of consumption, and often at considerable distances from railroads. Domestic resources have been carefully estimated and found to be insufficient to supply our requirements for more than a few years. Under normal trade conditions, with a free movement of ore from foreign countries, domestic manganese mining can not continue except on a limited scale.

The testimony before the committee showed that the duty of 1 cent per pound on the ore would cost the independent companies $8,000,000. If there is a prospect in this country of sufficient deposits of manganese ore, if it had been shown at the hearings and by the reports of the one recognized authority upon which we depended, the Geological Survey, that there would become available deposits of manganese, undoubtedly the committee would have protected it in order that there might be a sufficient duty to develop the industry and to mine the ore. But the committee did not believe that condition existed, and did not have such information. Of course, certain of the western mining associations believe that it exists. It may exist, but is it a wise policy with that remote possibility to place a burden of $8,000,000 upon the steel industry of the country? It might be worth it if we were assured of a continued supply for all time.

But upon whom does the burden rest? It is not upon the United States Steel Corporation, because they import their ore from Brazil. They have their own reduction furnaces and they can absorb the losses. But when the Taylor Iron & Steel Co., for instance, which makes ferrosteel, and when several other smaller steel corporations have to go out in the open market and pay the increased duty and be subject to the demands of the importer of ferromanganese metal, it means that those independent corporations have a heavier burden by reason of the fact that they have to go into the open market, and they have not the resources or have not the income to mark off their losses.

Whether it were wise or not I am not going to say, but the opinion of the committee was that there was not a sufficient supply of manganese ore in the country, and there is nothing to show it, and therefore the committee felt that it was unwise to take this product off the free list and put a duty upon it. That was the position of the committee.

Mr. WALSH of Montana. Mr. President, by section 315 of the bill it is provided as follows:

That in order to regulate the foreign commerce of the United States and to put into force and effect the policy of the Congress by this act intended whenever the President, upon investigation of the differences in conditions of competition in trade in the markets of the United States of articles wholly or in part the growth or product of the United States and of like or similar articles wholly or in part the growth or product of competing foreign countries, shall find it thereby shown that the duties fixed in this act do not equalize the said differences in conditions of competition in trade he shall, by such investigation, ascertain said differences and determine and proclaim the changes in classifications or forms of duty or increases or decreases in any rate of duty provided in this act shown by said ascertained differences in conditions of competition in trade necessary to equalize the same in the markets of the United States.

That is declared to be the policy and the principle of the bill, namely, to fix the duties upon articles produced alike in this country and in foreign countries at such a rate as will equalize the differences in competition.

In view of the attitude taken by Senators with reference to this particular item, as well as a few more, I think it will be necessary, Mr. President, to make a slight amendment of that provision, namely, to except from its operation those articles that enter into the competition of steel, and to provide that those shall not be subjected to this rule.

Mr. President, conceal it as anyone may, gloss it over as anyone may choose to do, there is one reason and one reason only why the committee took this item off the dutiable list and put it upon the free list, and that is because it would be a tax upon the manufactures of steel in this country. Candor and frankness would compel an admission to that effect.

The Senator from Ohio [Mr. WILLIS] asserts as the basis of his contention that ores containing manganese exist in such limited quantities in this country as that it will be impossible to develop the industry and thus supply in any considerable amount the demands of domestic consumption. The statement is made upon the floor here as though the question were not an open debated one before the committee which considered the bill. The Senator from New Jersey [Mr. FRELINGHUYSEN] now tells us, not really that the supplies do not exist but that the committee had no information upon which it could justify itself in believing that the supplies exist in this country. I shall call attention to the testimony with reference to that matter presently as it was given before the committee.

Now, the fact is not only that it is well established that the supplies are here but that the committee had information to that effect. So far as the supplies are concerned, Mr. President, and the possibility of the development of the manganese industry in this country to a point where it will measurably supply the demands of domestic consumption, I want to call attention to what the record shows.

Some figures were submitted by the distinguished Senator from New Jersey upon that matter. Let me show something about the development of the industry, the possibility of its expansion and extension first. In 1910 there was produced in this country of ore containing 35 per cent of manganese or more only 2,258 tons, and the amount did not increase until 1915 by reason of war demands in any substantial amount, the production of 35 per cent manganese for that year being only 9,613 tons. The war demand, however, increased the production so that in 1916 there were 31,474 tons produced. Bear in mind this is not the low-grade ore at all. It is ore containing 35 per cent or more of manganese, which is a high-grade ore.

In 1917, when we went into the war, the production of this ore increased to 129,405 tons; in 1918 to 305,869 tons; and thus it will be perceived that the quantity was continually increasing as the demand for it existed; but when the armistice was signed and the demand was shut off, the production fell in 1919 to 55,322 tons. In 1920 it rose to 94,420 tons, but in 1921 fell again to 13,000 tons.

We are advised, however, Mr. President, that the quantity of high-grade manganese ore in the country is inconsiderable, and the Senator from Ohio [Mr. WILLIS] tells us that the ore contains only a modicum of manganese. In addition to the supply

of high-grade manganese to which I have called attention there was produced in the United States during 1915, of ore containing from 10 to 35 per cent manganese, 185,000 tons; in 1916 there were 453,000 tons; in 1917, 730,000 tons; in 1918, 916,000 tons; and then the production dropped in the next year to 399,000 tons; in 1920, to 481,000 tons; and in 1921, to 72,000 tons.

But we can go beyond that and utilize ores by concentration very profitably that contain from 5 to 10 per cent of manganese and of these ores enormous quantities were produced in this country. I shall offer for the RECORD the table which I hold in my hand, which is based upon the reports of the Geological Survey and the Bureau of Mines. It will be interesting to note about what percentage of the domestic demand was thus supplied from the domestic sources which we are told are so lean and so rare as to be incapable of development. I trust I may have the attention of the Senator from New Jersey [Mr. FRELINGHUYSEN], because, perhaps, the figures which I am about to quote have not had his notice.

In 1910 we produced in this country only 1.8 per cent of all the manganese utilized in domestic industry; in 1915 our production jumped to 9.1 per cent; in 1916 to 13.2 per cent; in 1917 we were producing 27.2 per cent of the entire domestic consumption; in 1918 we produced almost one-half of all the manganese used in this country—46.6 per cent. Then in the same way the percentage dropped to 24.5 per cent in 1919; to 20.2 per cent in 1920; and to 6.1 per cent in 1921. These important and illuminating tables, Mr. President, I ask to be printed in the RECORD in connection with my remarks as a complete refutation of the contention that the American supply is not worthy of development and is incapable of supplying the domestic demand.

The PRESIDING OFFICER (Mr. ODDIE in the chair). Without objection, it is so ordered.

The tables referred to are as follows:

PRODUCTION OF MANGANESE IN THE UNITED STATES COMPARED WITH IMPORTATION OF MANGANESE.

EXPLANATION.

[Charts omitted in the RECORD.]

Domestic ore produced: Shipping grades of domestic manganese used for steel making are roughly divided into two classes of ores, viz: (1) High grade, containing 35 per cent manganese or more. (2) Combined manganese and iron ores (of which this country has the largest known developed deposits in the world), in which the manganese content is from 5 per cent to 35 per cent and the balance of the metallic content is iron. In this chart all domestic manganese-bearing ore is reduced to terms of high-grade ore.

Imports of manganese ore and ferromanganese: In pre-war times about half of the manganese requirements for steel making was imported in the form of ore, the other half was imported in the crude alloy, ferromanganese. In this chart all importations of manganese are expressed in terms of high-grade ore.

Year.	Production of manganese ore in the United States.[1]	Imports of manganese ore and ferro-manganese into United States.[2]	Year.	Production of manganese ore in the United States.	Imports of manganese ore and ferro-manganese into United States.
	Long tons.	*Long tons.*		*Long tons.*	*Long tons.*
1910	10,510	527,918	1916	122,245	803,641
1911	9,974	377,510	1917	275,565	734,895
1912	9,837	548,504	1918	489,102	559,223
1913	14,350	665,265	1919	135,289	415,899
1914	20,968	490,787	1920	190,670	755,072
1915	45,804	458,936	1921	27,400	423,998

[1] Includes total tonnage containing 35 per cent + manganese and one-fifth tonnage 10–35 per cent grade.
[2] Includes total tonnage high-grade ore and two and one-half times the tonnage of ferromanganese.
NOTE.—This adjustment of medium grade ore to the high-grade basis and of ferromanganese to the ore basis is made necessary in order to accurately compare domestic production with imports.

In the pre-war period, when there were no protective regulations for manganese, there was relatively no domestic ore mined. Pauper labor in India, China, and Russia, and cheap labor in Brazil mined this ore. The steel makers depended on foreign supplies. There was no incentive for development of American deposits.

The partial embargoes imposed as a war measure resulted in the remarkable increase of production shown in above chart.

Less than 10 per cent of the known manganese deposits of the United States were in operation in 1918. Very few of the mines opened up had got to the shipping point, practically no mines had the equipment installed or even purchased to advantageously produce ore, and not 5 per cent of the mines had installed the necessary equipment for concentrating the ores or improving their grades.

About 500 mines were operating or getting started, 7,000 men were employed, $15,000,000 was invested under Government encouragement. America showed its ability to produce. The steel industry, which has developed under and by reason of protection, is the opponent of manganese protection. The great mass of the American people who know the facts concerning a tariff for manganese approve. Shall the people rule?

United States manganese production—1910–1921.[1]

[Long tons.]

Year	Ore containing 35 per cent of manganese or more.	Ore containing 10 to 35 per cent of manganese.	Ore containing 5 to 10 per cent of manganese.	Total.[2]
1910	2,258	41,260	19,841	63,359

1921	27,400	423,998	451,398	6.1

[1] Includes total tonnage containing 35 per cent manganese and one-fifth tonnage 10 per cent–35 per cent grade.
[2] Includes total tonnage high-grade ore and two and one-half times the tonnage of ferromanganese.
[3] With exception of a small tonnage of imported spiegeleisen, this total represents the manganese consumption of the United States.
NOTE.—This adjustment of medium-grade ore to the high-grade basis and of ferromanganese to the ore basis is made necessary in order to accurately compare domestic production with imports.

Mr. FRELINGHUYSEN and Mr. SHORTRIDGE addressed the Chair.

Mr. WALSH of Montana. I yield first to the Senator from New Jersey.

Mr. FRELINGHUYSEN. Has the Senator from Montana any figures showing the percentage of the ferromanganese content of the ores which we produce?

Mr. WALSH of Montana. I have called attention to that. The ores are classified as ores containing more than 35 per cent, ores containing from 10 to 35 per cent, and ores containing from 5 to 10 per cent of manganese.

Mr. FRELINGHUYSEN. Is it not true that the line of demarcation between the ore which may be utilized for ferromanganese and which may be utilized for spiegeleisen, so called, is 40 per cent, and that below that it is penalized?

Mr. WALSH of Montana. I think not. I shall have something to say about that a little later on.

However, Mr. President, I wish first to take up the contention advanced here, based upon the report of the Tariff Commission, which is merely a reproduction of the statement made in the report of the Geological Survey, to the effect that the domestic supplies are limited and are not adequate to meet the demands for more than two years.

Mr. SHORTRIDGE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Montana yield to the Senator from California?

Mr. WALSH of Montana. I yield to the Senator from California.

Mr. SHORTRIDGE. The Senator from Montana has quoted some very important figures showing gradually a great increase in production of manganese and then a falling off. In aid of his thought, with which I fully agree so far as he has proceeded, I desire to suggest that the Senator at this point suggest why

there was a falling off in the production from our American mines.

Mr. WALSH of Montana. That is perfectly obvious.

Mr. SHORTRIDGE. I think so, but I should be glad to have the Senator from Montana state it.

Mr. WALSH of Montana. It was due as a matter of fact to two considerations: In the first place, during the war the steel industry was keyed up to its very limit. The manufacture of steel for war purposes and for purposes incident to war was stimulated in all countries which were engaged in that war, and, consequently, the demand was very great. I have not at hand the production of steel during the subsequent years, but I have no doubt there was a great falling off.

In the second place, as a matter of fact the industry was developed in this country during the war to a very large extent because we were unable to command the shipping necessary to bring the supplies here from foreign countries. As soon, however, as the armistice was declared, at least as soon as repatriation was completed, the ships were released and could then engage in the business of carrying supplies from foreign countries.

Mr. SHORTRIDGE. Is it not a fact that there is no evidence whatever that the falling off in the production of manganese in this country was due to any lack of minable ore?

Mr. WALSH of Montana. There was no evidence whatever that there was any exhaustion of domestic supplies, or that the mines were worked out or anything of that kind.

Mr. FRELINGHUYSEN. Mr. President——

Mr. WALSH of Montana. If the Senator will pardon me, I desire to say that the fact about the matter is that in my State, which, I may say, is far and away the leading producer of manganese, a large number of mines were opened up and were brought right to the productive stage when the armistice was signed and the crash came. Those supplies have never been touched, but, Mr. President, none of the mines that were opened up in my State have shown any indication whatever of exhaustion, a circumstance with reference to which I shall dwell at some length before I conclude. Now I yield to the Senator from New Jersey.

Mr. FRELINGHUYSEN. I merely wish to point out that in the hearings before the Committee on Finance there appears this testimony from the president of the Republic Steel Co., one of the independents, which use this alloy:

> But it was not stated on the floor of the House why the miners of manganese in these States went out of business when the war ended. The reason was not because of free trade in manganese, but because there was no market for domestic lean and high-silicon manganese ores when the richer foreign products of Brazil, India, and Russia were again available.

Mr. WALSH of Montana. That is the statement of the president of a steel company?

Mr. FRELINGHUYSEN. Yes; that is the statement of the president of a steel company.

Mr. WALSH of Montana. I will furnish information about that before I get through.

I might say further with respect to the question addressed to me by the Senator from California that it is recognized upon all hands that the great difficulty in the situation is the matter of freight rates. The transcontinental freight charges so far exceed the cost of transportation by water from foreign sources that the matter of the relative difference in the cost of production at the mines is not so important.

Mr. President, touching the information given to the Senate so definitely by the Senator from Ohio [Mr. WILLIS], and concurred in by the Senator from New Jersey [Mr. FRELINGHUYSEN] so far as the committee is concerned, that the domestic supplies are not of sufficient extent to warrant the development of the industry, it was disclosed further in the course of the discussion by the Senator from Ohio that the information upon which the statement made by the Geological Survey was based was all derived prior to the year 1918. I have pointed out that prior to 1915 the production in this country, we might properly say, was inconsequential, being 1 or 2 per cent of the total requirements; but when the war broke out in Europe, and before our participation in it, the mines in the South, chiefly in Arkansas, began producing a little more generously and the quantity was increased. It was not, however, until we actually entered the war in 1917 and the submarine menace became so threatening and the necessity for ships to transport our men across the sea became so urgent as to make it difficult, if not impossible, to get the foreign supply here, that the Bureau of Mines and other departments of the Government urged the miners in the West to scan the hills and endeavor to locate deposits of manganese and prompted those who knew of deposits of that kind to their speedy development.

They responded patriotically; they responded generously; many of them put the last dollar they had in the world into the development of these properties; and then, as I have indicated, when shipping conditions became more normal and when the high and increasing freight rates confronted them they found themselves utterly unable to compete with the foreign supply, and their enterprises ended in dismal and disastrous failure.

Mr. FRELINGHUYSEN. Mr. President——

Mr. WALSH of Montana. I yield to the Senator from New Jersey.

Mr. FRELINGHUYSEN. Does the Senator believe that there is a sufficient quantity of manganese ore in this country to supply the demand of all the industries here?

Mr. WALSH of Montana. I have not the slightest doubt in the world about it, upon information which I have before me, which I shall give to the Senator.

Mr. FRELINGHUYSEN. I do not want to interrupt the Senator; I am very much interested in the Senator's statement, and I should like to know where it is located.

Mr. WALSH of Montana. I wish to emphasize the point to which I am referring by mentioning that in 1910 manganese was known to exist in less than a hundred districts in the United States. In 1918 Government publications reported it in 427 districts and in 1,181 deposits, and many deposits are now known that were not then examined. Manganese is now known to exist in 30 different States. Also the number of shippers increased from about a dozen in 1910 to 41 in 1915 and to 408 in 1918. In the five-year period, from 1910 to 1914, inclusive, the production of high-grade ore in the United States averaged only 2,612 tons, but in 1918 it was 305,869 tons, an increase of 117 times, equivalent to 1,170 per cent. None of this the Geological Survey had at its command. A part of the information upon which the statements of Senators are based is to the effect that there were then reserves in the Butte district of only 2,800 tons of manganese ore carrying more than 35 per cent.

I trust this item will have the attention of the Senator from New Jersey. The Geological Survey, in its schedule of the deposits of manganese ores in this country, as it had information concerning them, credited the Butte district with reserves to the extent of 2,800 tons of ore containing 35 per cent or more of manganese. Since that time there have actually been shipped out of the Butte district 166,650 tons of ore of a grade higher than 35 per cent.

I have before me a general review of this subject, and I want to read it:

> In spite of all the increase of production, the increased number of known deposits, the published reports of metallurgists concerning the desirability of the domestic ores, the favorable reports of the field geologists of the survey, the favorable reports of State geologists and other geologists and mining engineers of standing, the signed and, in many instances, the sworn statements of the owners of manganese properties, the Geological Survey, in its bulletin, "Manganese and Manganiferous Ores in 1919," published April 6, 1921, says the domestic manganese reserves will last only two years.
>
> It is claimed by the producers that the report has not dealt fairly with the subject of domestic sources of manganese, and that any fair consideration must take into account all sources of domestic manganese and all metallurgical practices of steel making. A general statement concerning the sources of manganese is desirable in the consideration of domestic reserves.
>
> Manganese is a metal; its ores occur in some 112 named minerals; it never occurs in a "free" or metallic form in nature, but always chemically combined with other elements, principally with oxygen, as in the oxides, or with carbon dioxide as carbonates. These oxides or carbonates are frequently associated with the ores of other metals, as iron, zinc, or silver.

Now, we take these three classes—first, the high-grade ores; second, the low-grade ores; and, third, the associated manganese ores:

> I. High-grade ores: (1) High-grade oxide ores, 35 per cent or better, actual and in prospect.—Of the oxide manganese ores there are half a dozen of commercial importance; they are usually black, grey, or brown in color, and contain 40 to 55 per cent manganese.
>
> (2) High-grade carbonate ores, 35 per cent or better, actual and in prospect.—Of the carbonate ores one—rhodochrosite—is of commercial importance; this is a pink one and usually contains 37 to 42 per cent manganese.
>
> II. Low-grade ores: (3) Lower grade oxide ores, less than 35 per cent manganese content in the crude form, where the ores are mixed with sand, clay, silica (rock), etc., but which are amenable to concentration by washing, screening, jigging, magnetic processes, or other means.—This classification comprises both oxides and carbonates disseminated through sand or clay or rock in so small a proportion that the percentage of contained manganese is too low in the crude state to be suitable for smelting, but is capable of cheap concentration to high-grade ore by mechanical or other physical processes. Material containing manganese of less than commercial grade that no means is now known for concentration is not considered ore.

Apparently this was the kind of ore which the Senator from Ohio [Mr. WILLIS] had in mind when he discussed this subject; but that is a matter of no very great consequence to us in the West, because the process of concentration is applied to ores of all classes, and may be applied to manganese ores as well as

to copper ores and others. That process is the elimination of the material of no value or of little value, and the preservation only of that which is useful.

III. Associated manganese ores: These ores may be either oxides or carbonates, but generally they are oxides and are usually associated with iron, silver, zinc, or other metalliferous minerals. Those manganese ores associated with iron ore are known as ferruginous manganese ore (lower grade carbonate ores which in the crude form contain less than 35 per cent manganese, but which can be recovered as a by-product in the concentration of other ores) or manganiferous iron ores (ferruginous manganese ores, Mn. 10 per cent to 35 per cent); those with silver, as manganiferous silver ores; and those with zinc, after passing off in the slag from the zinc smelters, are known as manganiferous zinc residuum.

Bear in mind, Mr. President, that these low-grade ores have actually been used after they have been properly concentrated.

Associated manganese ores of both oxides and carbonates, particularly the former, in combination with various metals as:
Ferruginous manganese ores (Mn. 10 per cent to 35 per cent).
Manganiferous iron ore (Mn. 3 per cent to 10 per cent).
Manganiferous silver ores.
Manganiferous lead ores.
Manganiferous zinc ores.
When the Geological Survey says that there are manganese ore reserves in this country to last the steel industry only two years they only take into account the first classification of ore and only one-tenth of that, according to the latest information.

Mr. KELLOGG. Mr. President——

The PRESIDING OFFICER (Mr. LADD in the chair). Does the Senator from Montana yield to the Senator from Minnesota?

Mr. WALSH of Montana. I yield to the Senator.

Mr. KELLOGG. Is it not a fact that something like 860,000 tons of manganiferous iron ore was produced from the Cuyuna Range of Minnesota during the war?

Mr. WALSH of Montana. The production of the Cuyuna Range—which, as I understand, is manganiferous iron—is very high. I was going to submit the figures from that source.

Uses of manganese: Ninety-five per cent of the manganese consumed in this country is used for making common steel.

Mr. President, I may be pardoned for interjecting here that that is the reason why this is on the free list.

It is not a constituent of the steel but of the raw products that go into steel making. Though 15 pounds of metallic manganese in common practice is added to a long ton of steel, there is approximately no more manganese in the finished product than there was in the combined pig iron and scrap that was charged into the furnace. The additional charge goes off in the slag.

Manganese is called a scavenger or a purifier. Its actual purpose is (1) as a deoxidizer, (2) a desulphurizer, (3) a recarburizer, (4) and to improve the physical structure. No steel is made without manganese; there is no known substitute that fulfills all its functions.

This is the answer to the question addressed to me by the Senator from New Jersey:

FORM IN WHICH MANGANESE IS USED IN MAKING COMMON STEEL.

Manganese is introduced into the making of common steel through different ways—(1) as ferromanganese (a crude alloy containing essentially 80 per cent manganese, 14 per cent iron, and 6 per cent carbon), (2) as spiegeleisen (a crude alloy containing 20 per cent manganese, 75 per cent iron, and 5 per cent carbon).

I might say that the Anaconda Copper Mining Co. has a ferromanganese plant at Great Falls, Mont., and during the war was actively engaged in the production of ferromanganese from the Butte and Phillipsburg mines.

Mr. FRELINGHUYSEN. Mr. President, does the Senator contend that the manganiferous ores in Minnesota are of high enough manganese content to be utilized for ferromanganese?

Mr. WALSH of Montana. Mr. President, I am not so familiar with the Minnesota supply, naturally, and so I am not able to answer the question of the Senator. I assert, however, without any possibility of contradiction, that the Montana ores are peculiarly adapted to the production of ferromanganese.

Third. As high manganese pig iron containing 2 per cent to 6 per cent manganese instead of approximately 1 per cent or less manganese, usual manganese content of pig iron.

Fourth. Silico manganese and silicon spiegel, two alloys of manganese iron and silica that have promising future demands.

Note: Alloys containing less manganese than 80 per cent (standard ferromanganese) or more than 20 per cent (standard spiegeleisen) can be used with equal effectiveness if of uniform grade and free from other deleterious substances.

Equally good steel is made in the utilization of all the crude manganese alloys and also by the high manganese pig-iron method. Advocates of all practices have most ardent exponents.

MAKING THE ALLOYS; HIGH MANGANESE PIG IRON.

Ferromanganese, "spiegel," and high manganese pig iron are all commonly made in a blast furnace. There is a smelting loss of manganese content in volatilization, dust, and slag, varying from 20 to 40 per cent, depending upon the grade of ore and the efficiency of the operation. The common deleterious element in the manganese alloys for steel making is phosphorus. Domestic ores are not generally high in phosphorus. High silica content of ore increases the slag volume, and necessarily the smelting cost, but the product may be of the highest quality. The ratio of iron content to manganese can not be greater than 1 to 10 for the production of 80 per cent ferromanganese, but where higher, lower manganese content of ferro is produced the product is also desirable for steel making. Silica (commonly rock) should be eliminated by concentrating; (this is a mine operation, and under stabilized condition of the manganese mining industry will be accomplished by the mining companies, so that a high-grade ore only will be delivered to the furnaces); higher content iron ores than the prescribed ratio for ferromanganese are used for (1) lower ratio ferromanganese, (2) spiegeleisen, and (3) high manganese pig iron.

I believe I ought to say here to the Senator from New Jersey in answer to his inquiry that I think it quite likely that inasmuch as spiegeleisen contains a high percentage of iron and a relatively low content of manganese, probably the Minnesota ores are more particularly adapted to the production of spiegeleisen than of ferromanganese; but spiegeleisen has its use in the production of steel just exactly the same as ferromanganese has its use, so that that is a matter of no particular consequence. Of course, so far as the Montana ores are concerned they have a very low iron content, and accordingly are more adapted to the production of ferromanganese.

A low-grade manganese ore, if concentrated, will make a high-grade alloy, just as low-grade copper ore can be recovered and smelted into high-grade copper. In both cases it is a question of concentration and recovery.

I dare say that the Senator from Ohio is not familiar with the process of concentration, by which low-grade ores come to produce a product containing a very high percentage of the particular metal which is desired.

Many hundreds of thousands of tons of American manganese ores were utilized during the war with no deterioration in the grade of steel produced thereby.

That is a sufficient answer to the contention which has been made that the domestic ores do not meet the requirements as well as the foreign ores. No contention of that kind was made during the war, when 46 per cent of all the manganese used came from domestic sources:

Of the 305,869 tons of high-grade ore produced in 1918 Montana produced 199,932 tons, of which 129,865 tons were oxide ores and 70,067 tons carbonate ores. About 100 manganese deposits are known in the State of Montana. Property owners and operators claim millions of tons of high-grade carbonate ores, high-grade oxide ores, and also large deposits of manganiferous iron ore.

The United States Geological Survey in its last bulletin dealing with the reserves, "Manganese and Manganiferous Ores in 1919," pages 94 and 95, gives the following for the reserves of manganese in Montana:

BUTTE DISTRICT.[1]

Manganese 35 per cent.			Manganese 5 to 35 per cent, largely more than 20 per cent silica less than 30 per cent iron.			Manganese 5 to 35 per cent largely more than 30 per cent iron and less than 20 per cent silica.

[1] Authority: J. T. Pardee. Number of deposits examined 1916–17: 62. Work concluded: August, 1917. Number of deposits examined less than 50 tons: * * * Remarks: All recorded deposits of oxide ores examined; estimate does not include large deposits of carbonate ore, 35 to 38 per cent of manganese.

[2] Authority: J. T. Pardee. Number of deposits examined 1916–1918: 25. Work concluded: October, 1918. Number of deposits examined less than 50 tons: * * * Remarks: * * *

[3] Authority: J. T. Pardee. Number of deposits examined 1916–17: 4. Work concluded: 1917. Number of deposits examined less than 50 tons: 1. Remarks: Madison County.

That shows of high-grade ores, as I have heretofore advised the Senate, only 2,800 tons, when, as a matter of fact, 166,650 tons have since been shipped. It shows only 400,000 tons of ores from 5 to 35 per cent containing more than 20 per cent of silica and less than 30 per cent of iron, and none whatever from 5 to 35 per cent containing more than 30 per cent of iron and less than 20 per cent of silica.

Mr. FRELINGHUYSEN. Mr. President, will the Senator tell me who made this survey, who compiled this information? It is very interesting.

Mr. WALSH of Montana. From what source I get this?

Mr. FRELINGHUYSEN. Yes.

Mr. WALSH of Montana. I get it from the American Mining Congress, but the figures are the figures of the Geological Survey.

Mr. FRELINGHUYSEN. Has the Senator any information as to the reserves? Has any estimate been made of them?

Mr. WALSH of Montana. Yes; I am going to furnish that to the Senator.

In view of the statement made by the Senator from New Jersey to the effect that the committee was compelled to take the action it did because it did not have these facts before it, of course that is no reason why the Senate, now being fully advised about the matter, should follow the committee. But the fact about the matter is that these facts were all canvassed and discussed before the Finance Committee, as will appear from the following colloquy. Mr. Potts, who collaborated in the preparation of the information which I am now giving the Senate, testifying upon the subject before the Senate committee, was interrogated as follows:

Senator McLEAN. Are these reports equally accurate in respect of oil reserves?

Mr. POTTS. I could not tell you that, Senator.

Senator CURTIS. From what I hear, I think they are.

The CHAIRMAN. I have a theory that 60 or 70 per cent of the Government publications are worthless.

Senator SMOOT. We were told 12 years ago that there was only coal enough in the United States to last 28 years.

The CHAIRMAN. I know that large numbers of these pamphlets are returned to me with letters of indignation by constituents in Pennsylvania.

The fact about the matter is that—the controversy thus waging before the Finance Committee—the matter was called to the attention of the director of the survey, who sent the following letter to the committee:

In calling attention to the small estimate of high-grade manganese ore in the Butte district, 2,800 tons (p. 1690), Mr. Potts quotes from a letter of Albert J. Seligman to the effect that 71,000 tons of manganese ore were produced by his company in 1918 and 63,000 tons in 1920. Mr. Potts admitted in conference with Mr. Hewitt that he was ignorant of the fact that these quantities represent not high-grade manganese ore but low-grade oxide ore which had to be milled to yield a shipping concentrate. This material was part of the estimated 400,000 tons of low-grade material as figured by Mr. Pardee and which appears in the table of reserves.

The director also said, in the hearing before the Finance Committee, page 2007:

Considering the reception given the charges by the Senate Committee, I suggest that Mr. Potts be given an opportunity to retract that charge.

It was apparently the Director of the Survey and not Mr. Potts who was in error concerning the character of the ore shipped by the Butte Copper & Zinc Co., to which reference has been made:

The affidavit of Albert J. Seligman, president of the Butte Copper & Zinc Co., the shipper of the ore, fully impeaches the statement of the Director of the Survey where he says Mr. Potts's "charges arise out of very superficial examination of and careless reference to publications."

The affidavit of Mr. Seligman shows that no low-grade ore was shipped by his company at all, and that every ton that was shipped was of the high-grade, carbonate ore.

I read from the affidavit of Mr. Seligman, to which reference was made. I may say here that I have had the pleasure of very intimate acquaintance with Mr. Seligman for 30 years, and any statement he makes I would accept without serious question, only bearing in mind always that these statements are made by gentlemen who are interested in securing the high rates for which they ask. I read:

Albert J. Seligman, of 61 Broadway, New York City, being first duly sworn, deposes and says: That he is the president of the Butte Copper & Zinc Co., and is the author of a letter referred to in the last paragraph of page 2100 of the hearings before the Committee on Finance on the proposed tariff of 1921, Schedule No. 3.

He further avers that he read the statement of Mr. Hewett to the effect that shipments of manganese ore from the Butte Copper & Zinc Co.'s property in 1918 and 1920 were not high-grade ore but low-grade oxide ore which have been milled and concentrated. The affiant avers that this statement recited by Mr. Hewett is absolutely and unequivocably untrue. The exact tonnage of ore shipped by the Butte Copper & Zinc Co. was as follows:

	Tons.
1918	70,067
1919	320
1920	64,131

Not one ton of ore was concentrated. Every ton shipped was high-grade manganese carbonate ore.

The letter to which reference is made in this affidavit is as follows:

WASHINGTON, D. C., *March 9, 1922.*

Mr. GEORGE OTIS SMITH,
Director United States Geological Survey,
Washington, D. C.

DEAR SIR: A great injustice has been inadvertently done in the statements made in paragraph 3, page 2100, of the tariff hearings, schedule 3, metals and manufactures of, in reference to the shipments of manganese carbonate ores from the Butte Copper & Zinc Co.'s mines, during the years 1918 and 1920, and I am sure you will be glad to make correction of this evident error.

As I am president of the company and can vouch for all of the facts, I beg to state that all of the ore shipped was a high-grade manganese carbonate called rhodochrosite, and that not a pound of the ore was concentrated, it having been shipped in the raw state to practically all the large ferromanganese manufacturers of the Middle West and East.

All the above ore was high-grade ore shipped from a deposit which your department had credited with containing only 2,800 tons of high-grade ore.

Will you not kindly send a letter to the Finance Committee correcting this statement, and inasmuch as the matter is to be decided within a day or so, I would ask you to kindly give it your immediate attention.

Yours very truly,

BUTTE COPPER & ZINC CO.,
ALBERT J. SELIGMAN.

The letter of the director of the survey with reference to the matter was referred to, and I ask that it be printed in the RECORD as a part of my remarks, without taking the time of the Senate to read it.

There being no objection, the letter referred to was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF THE INTERIOR,
UNITED STATES GEOLOGICAL SURVEY,
OFFICE OF THE DIRECTOR,
Washington, March 19, 1922.

Hon. PORTER J. MCCUMBER,
Chairman Finance Committee, United States Senate.

MY DEAR SENATOR: My attention has been called to a statement which appears on page 2100 of the tariff hearings, Schedule 3, being a quotation from certain comments made by me in a communication to the chairman of the Tariff Commission. These detailed comments were of the nature of a reply to certain charges made before your committee, and while intended to clarify the matter of the domestic reserves of manganese ore, contained, unfortunately, an inexplicable blunder, which unintentionally does injustice to a well-recognized large reserve of high-grade manganese ore at Butte. The statements now made by the Anaconda Copper Mining Co. and Mr. A. J. Seligman are not necessary to set this matter right in my mind, since the same figures of ore shipments for 1918 are already on record with the Geological Survey, being confidentially reported early in 1919 by the Anaconda Copper Mining Co.

There is no question but that there are large deposits of manganese carbonate ore in the Butte district, and the importance of those carbonate ores in the Emma mine at Butte was, in fact, recognized in 1917 at the time of the study of this district by Mr. Pardee, a geologist of this survey; but at that time no tonnage estimate was regarded as possible, although the high quality of these ores was stated in the survey's report, "Manganese at Butte, Mont.," published in April, 1918; and later in the same year the table of manganese ore reserves in the United States specifically states that the estimate of the tonnage given "does not include large deposits of carbonate ore 35 to 38 per cent of manganese."

The paragraph in the hearings to which attention has been called (bottom of page 2100 and top of page 2101) seems to be in error in its mention of concentration of low-grade oxide ore. The fact well known to Mr. Hewett and Mr. Pardee and, in fact, to all of us who kept in touch with the subject during the search for manganese ores is that large bodies of high-grade carbonate manganese ore exist in the Emma mine at Butte and were being mined in 1918. However, in showing up what seemed to me Mr. Potts's unfairness in handling the survey's reports, Mr. Hewett himself seems to have confused concentrated low-grade oxide ore with these shipments from the Emma mine. Unfortunately, Mr. Hewett is now in the field in Nevada, but rather than wait for his explanation of what now appears to me a careless statement, due possibly to the fact that the detailed comment appearing on pages 2097 to 2100 was prepared by Mr. Hewett last October on the eve of his leaving the city on a field trip, I am now submitting this correction and if I hear anything to modify this explanation I will later inform you.

Finally, to show the unintentional character of what now seems a misstatement permit me to quote the concluding paragraph of my letter of October 7, also addressed to Doctor Page (see p. 2097 of hearings). In this letter, written only a day later than the submission of the other comment, I made a statement which in my opinion is absolutely correct and does not need the change of a single word. This brings out the essential fact that the large shipments from the Emma mine in 1919 and 1920 were of a wholly different character from the 2,800 tons of high-grade oxide estimated by the Geological Survey.

On the same page in an earlier paragraph Mr. Potts reiterates his reference to the 2,800 tons of high-grade ore in the Butte district, with which he compares a many times larger tonnage of ore shipped from the same district, not specifying, however, the kind of ore so shipped, the survey's distinction in its estimates between oxide and carbonate ores being either unnoticed by Mr. Potts, as he stated to Mr. Hewett, or disregarded by him in his very plain purpose to discredit the United States Geological Survey.

Yours very truly,

GEORGE OTIS SMITH.

Mr. STANLEY. Mr. President——

The PRESIDING OFFICER. Does the Senator from Montana yield to the Senator from Kentucky?

Mr. WALSH of Montana. I yield.

Mr. STANLEY. I see a statement on page 1641 of the hearings, by Mr. Dette, representing Crocker Bros. He said:

Even under the stimulus of war necessity and high prices domestic production furnished only a small part of our total needs, and that only by a sacrifice in quality of the smelted product.

Senator LA FOLLETTE. What is the total consumption?

Mr. DETTE. About 300,000 tons, I should say, normally.

It is safe to say that the steel trade must depend for all time on foreign ores or foreign ferromanganese for at least 90 per cent of its requirements. The proposed duty of 1 cent per pound content, or about $11.20 per long ton on average ores, would be merely a subsidy to one or two ore producers. We recommend that manganese ores be taxed not more than $1 per ton for ores containing 45 per cent manganese and over.

Does the Senator agree in that statement, as to the relative amount of ores necessary to import, considering the quality of

the ore? I have not heard all of the argument but I think that is very vital if true.

Mr. WALSH of Montana. Will the Senator call my attention again to the essential feature of that?

Mr. STANLEY. He states, in the first place, that of the 300,000 tons normal production 90 per cent must come from foreign importations, and that, in the second place, the quality of the domestic ore is not comparable to that of the imported ore; that we must import the foreign ore to mix with the domestic ore in any event. The vital thing is that we only produce, Mr. Dette claims, one-tenth of our total consumption of this product.

Mr. WALSH of Montana. My attention was directed to that, and I supposed I had covered it.

Mr. STANLEY. I do not want the Senator to repeat what he has already said.

Mr. WALSH of Montana. The Senator should bear in mind that this is a party who is producing ferromanganese. He says:

It is safe to say that the steel trade must depend for all time on foreign ores or foreign ferromanganese for 90 per cent of its articles.

I showed that during the war the domestic supply was actually furnishing 46.6 per cent of the total consumption, and that there is not the slightest indication anywhere of the exhaustion of any of the mines from which these supplies were drawn, and many mines have been opened up that have never been brought to the producing stage, because of the subsequent dropping of the price. He continues:

The proposed duty of 1 cent per pound content, or about $11.20 per long ton on average ores, would be merely a subsidy to one or two ore producers.

I have called attention to the fact that the number of shippers actually shipping in 1918 was 408, and the statement to which the Senator has invited my attention is to the effect that this would mean a subsidy to one or two ore producers.

Mr. STANLEY. I would like to call attention to a subsequent statement, as given on page 1641:

The domestic supplies are limited, inferior in quality, and far from consuming points.

Mr. WALSH of Montana. So far as the supply is concerned I have been devoting my attention to that, but I am going now to address myself particularly to the Montana supplies, and then to the Minnesota supplies, which are the two known sources of great supply. That is the kind of testimony, apparently, upon which the committee was acting.

Mr. STANLEY. Is it the Senator's contention that we can produce approximately at the same cost that is paid for imported ores; that is, with a reasonable difference for a reasonable import duty, enough to supply the needs of the iron industry in this country?

Mr. WALSH of Montana. I have no doubt we could supply the iron industry entirely in this country. Just exactly what duty would be necessary to make it worth while developing these properties I have not undertaken to figure out.

Touching the Montana supplies, the following is a summary of the situation so far as Montana is concerned:

MANGANESE IN MONTANA.

Montana was not regarded as a manganese producing State until the war demand for this mineral and the cutting off of importation of manganese from foreign countries made possible the development of the deposits within the State. In 1918–19 Montana supplied nearly two-thirds of the total domestic production of manganese ore.

One of the surprises of the war period was the large production of manganese ore in Montana. In 1917 the production in the Philipsburg district so greatly increased that Montana jumped far ahead of the other States producing manganese ore. Apparently because the carbonate of manganese was new to the ore trade, the bodies of rhodochrosite at Butte, which are among the largest and most valuable sources of manganese in the country, were overlooked for several months after the mining of the oxide ores had begun. In 1918 a further increase in output was made at Philipsburg, and Butte, having begun the mining of its rhodochrosite bodies, became, next to Philipsburg, the most productive district in the United States. Although manganese minerals are known in several other mining districts in Montana, only a small production has so far been made elsewhere than at Butte and Philipsburg. Montana supplied during 1917 and 1918 nearly two-thirds of the total domestic production of manganese ore and nearly one-sixth of the amount of the domestic production and imports. Most of this product was smelted to ferromanganese for use in making steel. At the rate of 3 tons of ore to 1 ton of alloy * * * Montana would have yielded an amount sufficient to manufacture 15,000,000 tons of steel. In 1919 Montana produced nearly half of the total output in the United States. (J. E. Pardee, Bulletin 725–C, U. S. Geological Survey, 1921.)

In all of their earlier reports the United States Geological Survey have completely ignored Montana's manganese reserves, and even in their latest report, above referred to, they credit the Butte district with having a reserve tonnage of only 2,800 tons, notwithstanding the fact that this district has shipped since 1918 166,650 tons of ore containing 35 per cent or more of manganese.

The two properties in Montana that have shipped the largest amount of ores are the Emma mine, owned by the Butte Copper & Zinc Co., and the Algonquin mine, owned by the Philipsburg Mining Co.

The last-named company owns—

Sixty mining claims, on 17 of which manganese was found on the surface; it is the only company in the Philipsburg district that has done extensive development work. They have expended $600,000 in developing the property. Their latest estimate to the Internal-Revenue Bureau was 1,000,000 tons of ore, averaging 35 per cent or better of oxidized manganese. This estimate was made on a probable depth of manganese of that character of 400 feet. Since then one of the shafts has reached a depth of 570 feet, with ore of as high grade as any heretofore found. A reasonable tonnage estimate would be 2,000,000 tons of oxidized ore. The carbonate ores (rhodochrosite) no doubt extend to great depths and probably contain an equal or greater tonnage. (Statement of J. E. Meyer, president Philipsburg Mining Co., Apr. 18, 1922.)

The Butte Copper & Zinc Co.'s properties at Butte are large producers of rhodochrosite (pink manganese). At the request of the Government in 1918 this company concentrated all its efforts toward the rapid extraction of manganese, of which it had very large quantities developed. They produced and shipped over 71,000 tons of manganese in 1918. Their ore is a carbonate, rich in manganese, low in silica, and adapts itself readily to treatment at a low cost. The ore runs about 38 per cent manganese, 7 per cent silica.

It is very difficult to give accurate estimates of the manganese ore deposits. We have in our property many hundreds of thousands of tons of ore developed and probable, and throughout the district the condition prevails that at depth the manganese deposits are wider and richer. The history of the Butte districts is one of continuous development to great depth, and it is fair to assume that in our manganese properties the same conditions will prevail. (A. J. Seligman, president Butte Copper & Zinc Co., Feb. 14, 1921.)

In their sworn statement this company states that they have a proved tonnage of 200,000 tons of 37 per cent ore, with a possible tonnage of this grade of 880,000 tons.

The William A. Clark properties in the Butte district have large showings of manganese. In the Ancient Mine manganese ore occurs to a depth of more than 500 feet, and from 30 to 40 feet in width. This ore averages 48 per cent manganese, in the form of rhodochrosite.

It is difficult to estimate the ore in sight in the Travona property. It would amount to several hundred thousand tons. It is fair to assume that it will extend in depth at least 500 feet additional, and perhaps more. There is one claim belonging to me that lies east of the Ancient claim which evidently contains this same body of ore. (Letter from William A. Clark, former United States Senator, July 16, 1919.)

Bodies of manganese ore and of manganiferous material that may be capable of beneficiation are found in several of the mining districts. Their distribution coincides in general with that of the ores of silver, lead, zinc, but small amounts of manganese and manganiferous ores are found in some areas that have not produced the other metals. (P. 145, United States Geological Survey Bulletin 725–C.)

BUTTE DISTRICT.

Since the report in 1918—

mining developments have shown that some of the mines contain bodies of manganese ore that are formed on the same grand scale as the other ore deposits of this famous district. These deposits consist of rhodochrosite, the carbonate of manganese, a mineral that until late in 1917 was entirely overlooked as a source of the metal. (P. 174 U. S. G. S. Bul., 725–C.)

During 1918, the value of rhodochrosite having been demonstrated, the production of manganese ore at Butte rapidly increased. In fact, in that year the output of this district was about three times as great as that of California, next to Montana the most productive State, and nearly seven times as great as that of Virginia, formerly the principal manganese-producing State in the country. (P. 175 U. S. G. S. Bul., 725–C.)

The reserve of high-grade oxide ore was probably depleted more or less during 1918, but only a small part of the low-grade material has been removed. The quantity of rhodochrosite ore reported as actually developed early in November, 1918, was more than 125,000 tons. To this reserve should be added an unknown and presumably very large amount in prospect. In addition the lodes contain an almost unlimited quantity of low-grade material consisting of the carbonate and silicate of manganese, and quartz * * *. This constitutes a reserve from which the country's needs might be largely supplied. With improvement in the methods of reduction much of it might even become valuable under ordinary conditions. * * * The Butte manganese deposits possess the advantage of being large and economically mined. Most of them can be developed and the ore removed without additions to the workings needed to exploit the ores of the other metals. With abundant facilities available for concentrating the ore and making ferroalloys the operators are in a position to take advantage of any favorable market without delay. Although Butte is rather far from the principal steel-manufacturing centers of the country, it will therefore probably be profitable to mine manganese in this district for some time to come or until trade conditions revert to what they were before the war. (P. 176 U. S. G. S. Bul., 725–C.)

The manganiferous deposits of Butte are parts of the quartz lodes that have been mined chiefly for zinc and silver. Manganese minerals are widely distributed, both horizontally and vertically, but are comparatively scarce in the copper district. As a rule, this mineral—rhodochrosite—forms a very considerable part of the vein matter, and is generally mixed with

quartz, sulphide, and so forth. In places, however, rhodochrosite forms large, practically unmixed bodies similar to the shoots of zinc and silver ores. The total vertical range of the rhodochrosite bodies is at least 2,000 feet.

* * * Oxidized material that carries from 12 per cent to 35 per cent of manganese forms a large part of the lodes. * * * Most of the manganiferous deposits carry noteworthy amounts of silver, lead, or zinc, and several are fairly rich in iron. (Pp. 176, 177, Bul. 725–C, U. S. G. S.)

In 1918 the Anaconda Copper Co. built at Great Falls, Mont., an electric smelter capable of making 90 tons of ferromanganese a day and designed to utilize chiefly the rhodochrosite ore from Butte. This plant was completed in time to run only a short period before the sudden decline in the market, and the smelter has since been closed and the mining of this ore in Montana practically suspended. The Anaconda Copper Co. has suffered an enormous loss in this venture, which loss it will not be able to recover unless it is possible for them to utilize their manganese ore. This, in addition to the slump in the copper market, has caused this company that employs thousands of men to suffer severe financial loss.

Bulletin 725–C of the United States Geological Survey describes 22 deposits in Montana, and says:

The deposits described are typical and illustrative of the Philipsburg district. Several mines not described for lack of sufficient detailed information are equally worthy. Several claims from which no shipments have been made contain promising outcrops and prospective reserves of considerable size. (P. 157.)

The deposits described are known as:

Algonquin, Coyle mine, Climax mine, Trout mine, Gem mine, Pocahontas, Little Gem mine, West Algonquin, Bernard, Horton, Headlight, N. G. Group, Wenger No. 2, Sharktown, Bryant mine, Cliff mine, White Horse, Scratch Awl, True Fissure, Saunders, Marie, Redemption.

Forty-seven individuals and corporations claim a loss totaling $453,533.83 in developing manganese properties during the war, according to the records of the War Minerals Relief Commission. The total investment in these properties will be a complete loss unless a protective tariff is given which will permit the resumption of production.

Montana mining men have an investment of more than $2,000,000 in the manganese industry of the State, all of which is in jeopardy unless they are permitted to operate their properties, which is impossible in competition with foreign manganese and without a compensatory tariff.

Bulletin 725–C of the survey, which is quoted extensively in this report, discusses only generally the properties in the Butte district, the most important of which are the properties of the Butte Copper & Zinc Co. and the William A. Clark properties, upon which we have reports from the companies themselves.

Mr. President, I will undertake to say that no one can read the record and have any doubt about the adequacy of the supplies in our country. There is little excuse for the contention that this particular commodity should be excepted from the operation of the general principle which it is declared has governed in the preparation of the bill.

Mr. FRELINGHUYSEN. Mr. President, may I ask the Senator a question?

Mr. WALSH of Montana. Certainly.

Mr. FRELINGHUYSEN. I have been very much interested in the Senator's statement about the quantity of manganese ore in the Montana district, but I have not yet had a reply to my question as to an estimate of the total reserve in those districts. The Senator has read several statements of estimates of the different mine owners. Has there been a compilation of all the estimates of the different mines and the grades of the ores? Does the Senator believe that there are 3,000,000 tons of manganese in the Montana district?

Mr. WALSH of Montana. I would not hesitate to say that there are three times three million tons in the Butte district, not to speak about the Philipsburg and other districts of the State.

Mr. FRELINGHUYSEN. Does the Senator believe a tariff rate of 1 cent per pound is necessary to produce it, and is he in favor of that rate?

Mr. WALSH of Montana. I am not discussing rates. I am contending, and contending only, that there is no excuse whatever on the other side of this Chamber, professing to frame a tariff bill intended for the protection of American industry and to promote the development of American industries, for putting this item on the free list. The matter of rates some one else besides myself can handle.

Mr. FRELINGHUYSEN. Then I take it the Senator is not in favor of a duty on manganese?

Mr. WALSH of Montana. What is the difference what I am in favor of?

Mr. FRELINGHUYSEN. The Senator has been arguing in favor of the large deposits of manganese and in favor, I think, of the duty that has been proposed by the Senator from Colorado [Mr. NICHOLSON].

Mr. WALSH of Montana. I have been endeavoring to show, and simply to show, that the excuse which is offered here for putting this product upon the free list, in violation of what is professed to be the principle upon which the bill is founded, has no justification whatever.

Mr. FRELINGHUYSEN. I am not convinced that the Senator has shown that there is sufficient manganese ore in the country to supply the demand for any number of years. If his claims are based upon the estimates of mine owners, we have the statement of the Director of the Geological Survey, who, while he admits deposits, still adheres to his statement, even in his letter in which he revised his former statement, that there are not sufficient deposits in this country to supply the industry for any number of years.

I want to put this question to the Senator fairly, and I know he wants to be fair and is fair. The American Mining Congress have been very insistent that on all of these alloys—on magnesite, ferrosilicon, fluorspar, and manganese—there should be a high duty. If their estimates and their hopes are not finally realized, what will be the result of a duty of $20 a ton on manganese? It has not been shown that over 300,000 tons have been produced in any year. Suppose those estimates are not realized; will it not be placing a great burden on the productive industries of the country?

Mr. WALSH of Montana. Of course, beyond question it will increase the cost of producing steel. Of course that is what the Senator has a tariff for, is it not? That is what we have been arguing, that he is burdening the industries of the country with all these high duties. I am very glad to know that the Senator is a convert.

Mr. FRELINGHUYSEN. Of course it is the policy of the party to put a duty on any foreign manufactured product which can be produced and manufactured in this country, but as I said to the Senator, and I fairly stated the position of the committee, the committee were of the opinion, with all the information before them, that there was not a sufficient supply or sufficient quantity or quality of manganese in this country, and, therefore, the duty would not have the effect of increasing the domestic supply.

Mr. GOODING. Mr. President, I would like to ask the Senator from New Jersey if he feels that the Finance Committee made as thorough an investigation of the supply of manganese in this country as the Ways and Means Committee of the House, which appointed a special committee to investigate the matter, and which, after spending something like four months in making a special investigation, recommended a duty of 1 cent a pound?

I want to say to the Senator from New Jersey that we do not think in the West that we have started to develop that wonderful country out there. One of the most marvelous developments has taken place there that the country has ever seen. I want to say to the Senator that we have placed a duty on steel that protects steel clear to San Francisco against Belgium, and yet we will hear arguments upon the floor of the Senate to the effect that there must be a dead line drawn so far as the West is concerned; that they can not come any farther than Chicago with that great product. If we develop the West it will make a market for manufactured products.

I beg the pardon of the Senator from Montana for taking his time——

Mr. WALSH of Montana. I am very glad to yield to the Senator from Idaho.

Mr. GOODING. All this talk about a dead line, so far as the West is concerned, and then permitting a duty on everything that carries it out to the Pacific coast, is hardly fair to the great West. If that part of the country is to be developed to its fullest greatness, we must be given an opportunity to furnish our products to the country. If we can be given that duty and can develop manganese in the West, it will mean something like $10,000,000 in freight rates to the railroads alone. It will give us a chance to live out there, and we shall not have to pay the exorbitant prices we are paying now, which are much more than any product can bear to be carried to market.

If the principle of protection is right, it is right all the way round; and if it is wrong, it is wrong all the way round. We might just as well meet it in that light and in the spirit of fairness. I beg the pardon of the Senator from Montana for having taken so much of his time.

Mr. WALSH of Montana. Mr. President, I think myself exceedingly unfortunate that I have been unable to make a more favorable impression upon the mind of the Senator from New Jersey, who I thought was going to consider the matter in an open-minded way, and yet he proceeds to tell the Senate, notwithstanding all that has been represented here, that the United

States has never succeeded in producing more than 300,000 tons of manganese in any one year. I have put into the RECORD figures showing that in the year 1918 there were produced in this country of ores containing more than 35 per cent of manganese 305,869 tons. The Senator from New Jersey seems to be disposed to disregard and to throw into the dump any ores that do not contain more than 35 per cent manganese. The same figures—and they are from the Geological Survey report for 1921—disclose that in addition to the 305,869 tons of high-grade manganese we produced 916,163 tons of manganese ores containing from 10 to 35 per cent; and that we produced, in addition to that, 252,615 tons of ores containing from 5 to 10 per cent, an aggregate of 1,474,647 tons, as against 300,000 tons, as the Senator from New Jersey understands.

Mr. FRELINGHUYSEN. The Senator from Montana knows that I wish to be accurate. I was quoting from the Summary of Tariff Information, which relates to the ferromanganese ore which is proposed to be protected under the amendment of the Senator from Colorado [Mr. NICHOLSON].

Mr. WALSH of Montana. The Senator is evading the question. All manganese ores are put on the free list, and all manganese ores to which reference has been made here are used in the production of ferromanganese, whether they are high grade or low grade. If they are low grade they have got to be concentrated, that is all. So far as the manganese is concerned, the content is exactly the same whether it is high or low. Mr. President, that is all I care to say about the Montana supply of manganese.

Mr. STANLEY. Mr. President, I desire to ask the Senator from Montana one other question. Has the Senator figured out the ad valorem equivalent of 1 cent a pound on this commodity?

Mr. WALSH of Montana. I have not. As I have stated, I am not concerning myself with the specific rate of duty; I am protesting against putting this commodity upon the free list upon the contention that it is not an industry that is worthy of development because of the inconsequential supply and the inferior character of the ore.

Now, Mr. President, I promised the Senate that I would refer—and I intended to refer—to the magnificent supply of ores which the State of Minnesota commands. I would leave that for the junior Senator from Minnesota [Mr. KELLOGG], who is interested in this subject, but I do not see him in the Chamber at this time. In view of his absence, I am going to call attention to those deposits. They were told about before the Committee on Finance by Mr. Crosby, of Duluth, of that State, as follows:

Mr. CROSBY. In order to get myself properly before the committee, I will state that I am a discoverer and explorer of minerals on the Minnesota, Michigan, and Wisconsin ranges and elsewhere. By exploring is meant the proving of tonnages and grades to determine its merchantability, by the use of power-driven churn and diamond drills. I have had an experience of over a quarter of a century and am one of the pioneers of the Mesabi and Cuyuna Ranges. The Mesabi is an iron-ore bearing range; the Cuyuna Range is known as an iron range, but a considerable portion of the ore from this district carries manganese and has been of considerable economic importance for its manganese content in steel making.

Since the discovery of the Cuyuna iron and manganese range there has been about 2,800 holes drilled, differing in depth from 60 to 1,000 feet. Of those 2,800 holes I have personally drilled 700. I have drilled something like 20 properties. Eight of those properties have become producers of manganese-bearing ore and helped to furnish the manganese that was used in the steel manufacture during the war period.

During the year 1918 there were 860,000 tons of this material shipped from the Cuyuna Range—

There were 860,000 tons of it!—

to the steel industry in this country and used in the manufacture of steel; and, in addition to that, there were 305,000 tons of what we call high-grade manganese ore running 40 per cent or better. This higher grade of manganese came from different localities, more especially from Butte and Phillipsburg, Mont., and from Virginia and Arkansas. The balance of the tonnage was distributed over a large area, and about 30 States were represented.

It has been stated by witnesses here—and I simply am amazed at the statements they have made—that there are no reserve tonnages of manganese ore in this country. As a matter of fact, we will prove to you in a brief that will be presented by Mr. Charles W. Potts, based upon Government reports and reports of producers of this material, who have made explorations of their deposits and measured the tonnages and the grades, etc., that there are 36,000,000 tons of ferruginous manganese ore in reserve; that there are over 20,000,000 tons of high-grade manganese ore that runs over 40 per cent ready to be mined and shipped to the steel manufacturers.

Mr. Crosby continues:

I do not believe it is necessary for me to dwell upon where the manganese that has been used up to 1914 came from, because you are all familiar with that. But I will state that most of it came from Brazil, the Caucasus, and India. It is true that this ore has been the chief source of supply that steel makers have used generally in the manufacture of steel. It comes, perhaps, in larger deposits. However, the grade is no higher than our best domestic ores.

The domestic ore producers rose to the emergency during the war and filled a demand that would have been quite impossible to have filled otherwise.

I personally spent, in trying to produce for war purposes, $1,450,000 in the development of mines in Minnesota, and I wish to state that this money will be almost a total loss to me unless the producers of manganese ore in this country are protected.

I have read the report of the Tariff Commission on the subject of manganese-ore reserves and know the tonnages of manganese-bearing ores and the grades that have been accredited to this range by the United States Geological Survey, series 121. Based on the knowledge I have of the Cuyuna Range, gained through years of experience, these estimates do not fully represent either the actual tonnages or the proper classification of grades of this district.

According to the reports issued by the Geological Survey, there are only 13,628,000 tons of manganese-bearing ore, containing 5 to 35 per cent manganese, in the district. No figures are given for any additional reserve in prospect. This report seriously minimizes the importance of manganese-bearing ores of the Cuyuna Range, for the following reasons:

That the actual tonnage is greater than claimed. There were 24 mines on the Cuyuna Range that were producing or preparing to produce manganese-bearing ore in 1918. I can name two out of this group that contain more ore than the Geological Survey says exists in the whole district. The Sagamore contains 11,000,000 tons; the Ida May, 4,000,000. The proved tonnage of Cuyuna Range is 36,000,000 tons. This constitutes the actual tonnage of manganese-bearing ores included in the classification of ferruginous manganese ores and manganiferous iron ores containing 5 to 35 per cent manganese, of which the balance of the mineral constituent is iron ore.

A fact generally overlooked by the Geological Survey and the Bureau of Mines, that is to say, they take it into consideration, but when they present their totals of reserves they do not mention it, is that 5 per cent manganese ore, if it were contained with rock, would be of little avail as a mineral, but is quite valuable if it is contained with iron ore. For instance, where manganese ore in the Cuyuna Range has 5 per cent manganese it has a constituent mineral which contains 50 to 55 per cent iron ore. Therefore, it becomes commercial in that way, and it is used in making high manganese pig.

And of course one can readily understand that when manganese is found in association with iron ore it is very much more valuable and is commercial, even though the manganese content is very low.

The Government report minimizes the importance of the ores of the Cuyuna Range by ignoring the probable ore. There is an additional tonnage of probable ore not capable of definite calculation, but of certain existence, which would undoubtedly increase the reserve tonnages to approximately 50,000,000 tons.

That will be sufficient, Mr. President, to show the possibilities of Minnesota as a producer of magnesite ore.

Mr. SMITH. From what page has the Senator been reading?

Mr. WALSH of Montana. I have been reading from pages 1669, 1670, and 1671 of the hearings before the Senate Committee on Finance.

Mr. President, this bill can not be defended on the principle upon which it is asserted it is framed if this important commodity, this infant industry, is not treated with the same consideration that is given to many items of much less importance in the bill.

Mr. President, I desire my position with respect to the matter to be definitely understood. I believe that it is unwise to burden the industries of this country at this time and to increase the high cost of living by the imposition of the extraordinary duties which are provided for in the pending bill, and unless it undergoes modification, which I do not at all anticipate, I can not and will not give it my vote; indeed, as I have heretofore stated, I believe that it will work disaster to our country not only by reason of the fact that it will increase the cost of living—and that is the purpose of it—but because it will limit to a large extent our export trade, which is the life and substance of the great agricultural industry of this country, and much of the mineral industry as well. I have spoken heretofore about the two great products of my State—wheat and copper. The industries engaged in producing those commodities can not thrive unless Europe is given an opportunity to sell her products liberally in this country, so that they may have the means by which they can buy these great products of ours.

Mr. STANLEY. Mr. President, the proposed duty on ferromanganese and manganese ore is illustrative of the utter lack of any system underlying this bill. Of course, if, as contended by the Senator from Idaho [Mr. GOODING], protection is a blessed and beneficent thing, a kind of bonus derived from legislation, which makes nobody poor but makes everybody rich, in that event it would be a matter of small importance whether the duty were 1 cent a pound or $1 a pound upon ferromanganese or manganese ore, or anything else, because the importer would pay it and the domestic consumer would get the benefit of it. From a Democratic standpoint, however, Mr. President, as I see it, this duty is peculiarly indefensible.

It has been stated here—and it is true, in a measure—that the largest consumer of manganese ore and of ferromanganese is the United States Steel Corporation, and necessarily so. I hold no brief, as everybody knows, for the Steel Corporation. We, however, should not be biased by any misdeeds of a single corporation engaged in an industry to the point that we are willing to injure the industry. There is a vast difference be-

tween the United States Steel Corporation and the steel industry.

I know of no single industry more peculiarly indigenous to this soil than the production and the fabrication of iron and steel. The time is fast approaching when we shall consume the bulk of our agricultural products, when we shall make our wheat into bread, when we shall make our hides into leather, just as we now more than weave all our wool into cloth. I can see the day when few bales of cotton will leave this coast. We have 7,000,000,000,000 tons of coal—twice as much as all the rest of the world possesses—mined at infinitely less cost than it can be produced anywhere else in the world. That coal can be converted into coke at a less cost and that coke and limestone and ore can be assembled at less cost than anywhere else in the world.

We have brought to perfection the most costly and the most ponderous machinery for the fabrication of iron and steel. We can to-day make rails, structural shapes, beams, bars, girders, tin plate, and an infinite number of agricultural implements and machinery; we can build bridges, we can construct locomotive engines, we can weave wire cables cheaper than any other country in the world. The day is not far distant, under a wise and broad and liberal statesmanship, if this industry is given an opportunity—not fostered, not coddled, not subsidized, but unshackled—when our ships shall carry steel fabrications to every port in the world, and, returning, take your copper, your wheat, and a thousand and one other things.

Iron, not gold, not silver, is to be the commodity that we are to trade for the things we need all over the world; and of all the foolish and silly things, the most foolish and silly is this practice here, this fetish, of protection. It is not a belief in it; it is a superstition. It has ceased to be rational. You have abandoned the old idea of equalizing the cost of production; you have abandoned the old idea of infant industries, and you have slathered this thing all over everything and everybody—agriculture, horticulture, dairying, mining, manufactures, everything.

Everybody must make everybody else rich. It would be absurd if it were not tragic; and it is an economic crime to weight and burden this great industry with petty duties on manganese, on the constituent elements of fire brick, on manganese ores; on this, that, or the other element that goes into the fabrication of steel.

The sane, the rational, the democratic thing, is to give these great masters of the steel business, the steel kings of the world—by nature and by the beneficence of God they are the masters of this industry in all the world—give them a chance, unshackle them, let them secure their raw materials, let them fabricate their various articles for the commerce of the world at as low cost as they fairly can, and then take from them every dime of protection on the finished product, and the only thing that Europe will ever ship here will be a darning-needle, a pocketknife, or a razor.

Mr. POMERENE. Mr. President, just a word.

During the past year I have had a great many letters bearing upon this subject. I have quite a portion of my correspondence here. I do not intend to take the time of the Senate to discuss this matter at length. Many of these letters have been from the independent steel mills of the country. All of them are opposed to it. The substance of these letters is to the effect that if this duty prevails it will add 25 cents a ton to the cost of steel, and one of these writers estimates that the total cost to the steel industry of the country would be not less than $10,000,000, and this to protect an industry engaged in the production of low-grade ore for the most part. Without any definite promise as to what is going to happen, it is said that there are millions and millions and millions of tons. If that fact is so well known, and it is of a grade of ore which can be profitably mined and reduced, I do not understand the need of this tremendously high tariff duty.

Mr. NICHOLSON. Mr. President, may I ask the Senator a question?

Mr. POMERENE. Yes.

Mr. NICHOLSON. The Senator made the statement that this duty would add 25 cents a ton to the cost of steel. It takes only 16 pounds of manganese to make a ton of steel. We are looking for a duty of a cent a pound. As only 16 pounds of manganese is used to produce a ton of steel, where does the Senator get his 25 cents?

Mr. POMERENE. Mr. President, I am not a steel man, but I am quoting the figures as given to me by the best steel men in the country.

Mr. NICHOLSON. I apprehend that that is true; they are good steel men; but I state to the Senator that only 16 pounds of manganese is needed to produce a ton of steel, and the added cost, at a cent a pound, would not exceed 16 cents.

Mr. POMERENE. The difference between the Senator's statement and my own is only nine pounds, or about one-third of the total, as I claim it.

Mr. McCUMBER. Mr. President, I think I can explain the difference between the statements of the two Senators. It is this:

A duty is paid upon the manganese content, but in extracting and smelting it is never possible to get all of the manganese content out of the ore. Therefore, there is a sufficient amount of loss, so that I think you can add somewhat to the 16 cents and bring it up to 20 or 25 cents.

Mr. POMERENE. That is probably the explanation, and I am obliged to the Senator for it.

Mr. STANLEY. Mr. President, will the Senator permit an interruption just at that point?

Mr. POMERENE. Yes.

Mr. STANLEY. The Senator knows more about the details of this business than I do; but, as I understand, the Senator from Montana stated that there are thirty or forty million tons of manganese-bearing ore in the Cuyuna Range, just as there are hundreds of millions of tons of self-fluxing ores—that is, ores containing limestone—in Alabama. As I understand—I may be wrong—this ore containing manganese is just like any other iron ore, except that in smelting that ore it is not necessary to purchase and mix ferromanganese with it, as you would do in the case of other ores. That ore, therefore, would only be the more valuable on account of the manganese content, and would certainly need no duty to develop it.

Mr. POMERENE. Mr. President, I find on looking at this correspondence—I have not turned to the statutes to verify the statement—one of these writers tells me that the McKinley tariff on manganese ore was $6.72; under the Dingley tariff it was $4; and under the pending bill it would be $20 per ton. Why, after hearing some of the speeches which were made here I scarcely know what to think of William McKinley.

I lived in his district. I heard a great many of his speeches upon the tariff question. I was led to believe that he was a protectionist of protectionists. I am constrained to believe, however, that if the majority members of the Finance Committee are Republicans to-day, then William McKinley was a free-trade Democrat.

Mr. WALSH of Montana. Mr. President, the Senator will remember that President McKinley, in one of the last speeches that he made, intimated that the time had come when high duties ought not any longer to prevail.

Mr. POMERENE. Yes.

Mr. WALSH of Montana. Of course our friends have long since passed the protection point of McKinley.

Mr. POMERENE. Yes, Mr. President. I want to correct the Senator to this extent: He says that was one of President McKinley's last statements. That statement was made in his last speech at Buffalo, just before the assassin's bullet struck him low; and then it was, and I think I quote his exact language, that he said:

> We can not expect always to sell and never to buy from foreign countries.

To-day we have listened to a wonderfully eloquent address by the brilliant Senator from Indiana [Mr. WATSON], in which he quoted from Democrats who said that we could not expect always to sell and never to buy. I wondered why he did not quote the words of McKinley in the Buffalo speech, which were substantially the same words that were used by some of these distinguished Democrats from whom the Senator from Indiana quoted.

Mr. McCUMBER. Mr. President, will the Senator tell me whether, in the language that was used by President McKinley, he meant to say that we must always buy from the same country to which we sell?

Mr. POMERENE. Oh, no, Mr. President; and there was nothing in what I said that would indicate that I was trying to represent McKinley as so stating.

Mr. McCUMBER. No; the reason why I asked the Senator was because the argument to-day seemed to be along the line that we must always sell to the country from which we buy.

Mr. POMERENE. Oh, I did not make any such statement as that. McKinley, whatever his earlier views may have been, when he became President and when he died had a mental vision as broad and as comprehensive as the country itself. I am afraid that some of our friends who have been discussing this tariff bill can see nothing at all except the interests of the very few who are specially interested in tariff rates, and perhaps some of them specially interested themselves in having particular rates

adopted; and some of them have advocated rates here under circumstances that are no credit to the Senators themselves.

Mr. President, I have here a letter which bears upon the subject of the duty upon this ore, which I would like to have inserted in the RECORD without reading.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

APRIL 2, 1921.

CHAIRMAN WAYS AND MEANS COMMITTEE,
House of Representatives, Washington, D. C.

DEAR SIR: In connection with the proposed tariff legislation, we wish to be placed on record as opposing any increase in the tariff on ferromanganese, ferrosilicon, ferrovanadium, ferrotungsten, or ferrochromium, or any increase in the tariff on the ores from which these ferroalloys are produced. We particularly protest against any increase in the duty on ferromanganese.

This is a matter of vital interest to us as independent producers of steel.

The selling price of ferromanganese, covering a period of 10 years before the war, averaged about $47.50. It has recently been proposed that the duty on ferromanganese be increased by the sum of $44.80 per ton—nearly a 100 per cent increase.

Under the tariff act of 1897 ferromanganese was assessed $4 per ton, and under the act of 1909 it was assessed $2.50 per ton. As a revenue producer we would not object to a duty not exceeding the tariff act of 1897—that is, $4 per ton—but even in that event the American manufacturers of ferromanganese should be compelled to show by sworn statements if their cost of production is greater than the foreign cost, after making due allowance for the ocean freight and other charges on the foreign product.

Ferromanganese is produced in a blast furnace, and these blast furnaces when not operating on ferromanganese can be utilized for the production of pig iron.

The surplus foreign products of ferromanganese, barred from the American market, would be sold in Europe at low figures, thus giving to the European steel manufacturers a distinct advantage in costs, thereby placing the American steel manufacturers at a disadvantage in the markets of the world where we all hope to sell our surplus products.

Please note that the United States Steel Corporation and a few of the largest steel producers produce their own ferromanganese. This puts the smaller independent steel companies to a great disadvantage as compared with the United States Steel Corporation.

The three or four ferromanganese producers in the United States are seeking a monopoly of the trade under a tariff which would eliminate all competition. Every one of the more than 400 active steel works in the United States would be affected. The entire steel industry would be heavily taxed for the benefit of three or four interests.

Ferromanganese, in any event, must be made from ore bought from distant parts.

Government records will show that the average selling price of ferromanganese in this country during the period from 1908 to 1914, inclusive, was only about $47 per ton. Therefore, the protection which is proposed of $44.80 per ton would be a severe penalty to inflict on the United States consumers of ferromanganese.

A tariff of $4 per ton, or 10 per cent, should easily cover all differences in cost.

These selfish ferromanganese manufacturers are asking for a 100 per cent tariff duty and at the same time asking that manganese ore be continued on the free list.

Please further note that the records show that in the four years from 1915 to 1918 practically all of the imported ferromanganese was delivered to consumers at an average price of $118.13, plus about $4 per ton freight, while in the same period the average quotation for American ferromanganese was $202.83.

We object to the proposed rate on the following grounds:

1. That it is excessive and prohibitive and therefore would not produce a cent of revenue; that it would allow a small group of American makers to monopolize this market and pocket the difference due to this high tariff.

2. Ferromanganese is produced in an ordinary blast furnace, which may be utilized for the production of pig iron when not operating on ferromanganese. Therefore it can not be stated with any degree of truthfulness that this rate is needed to protect an industry, as the manufacture of ferromanganese is not in the true sense of the word an industry. Therefore they are not entitled to a high rate of duty.

As a means of revenue we would recommend a rate of not exceeding $4 per ton, and this amount, added to the present ocean freight of about $4 per ton, would actually give to the American ferromanganese manufacturer a protection of about $8 per ton, which, in our opinion, is more than the difference between the actual cost of production of the average American and English ferromanganese furnaces.

Respectfully submitted.

Mr. McCUMBER. Mr. President, before voting upon this subject, I think it fair for me to state, on behalf of the committee, the thoughts which governed the majority of the committee in deciding to levy no rate against the importation of manganese ore.

Mr. NICHOLSON. Mr. President, I would like to ask a question of the Senator from Ohio. Did I understand the Senator from Ohio to say that if a duty of 1 cent a pound is added it means that the tariff is $20 a ton? Is that the statement the Senator made?

Mr. POMERENE. That is the substance of what I said.

Mr. NICHOLSON. In order that the question may be clearly understood, let us take ore containing 30 per cent manganese. Under the rate asked for here the rate would be $6 a ton, not $20 a ton. If the manganese content should be 35 per cent, it would be $7, not $40. I submit that that is not an exorbitant rate of duty to ask for, when you take into consideration the rates of duty that are afforded on the manufactured products.

Mr. STANLEY. Mr. President, I do not wish to interrupt, but as I understood the Senator, the duty is a cent a pound on the manganese content.

Mr. NICHOLSON. Yes.

Mr. STANLEY. That would amount to $25 a ton on the ore. If they should bring manganese into this country containing one-half of 1 per cent, it would be practically nothing.

Mr. NICHOLSON. It would be practically nothing.

Mr. STANLEY. They would have to import that many more tons of ore.

Mr. NICHOLSON. Yes.

Mr. STANLEY. They would have to produce enough low-grade ore to make it 25 cents on the ton.

Mr. McCUMBER. If the Senators will kindly allow me, I will restate the reasons which actuated the majority of the committee in deciding that this is not an opportune time to levy a duty on manganese ore.

First let it be remembered that all were agreed upon one proposition—that less than 1 cent per pound protection would be of no use whatever to the producers of manganese ore. The junior Senator from Ohio [Mr. WILLIS] indicated to-day that he might be in favor of a reasonable tariff upon the ore, but I think all agreed that if we were going to have protection at all it could not be less than 1 cent per pound upon the manganese content. So that had to be taken into consideration. The manganese content of the ore which is imported averages about 1 cent a pound. That means that the duty of 1 cent would be 100 per cent ad valorem.

The next matter which was taken into consideration by the committee was the fact that a majority of the majority believed that there was not a sufficient amount of manganese ore that could be worked profitably to last more than three or four or five or six years; no matter whether you say it is a couple of years or three years or five years, it was estimated that it was of very short duration. I am not passing judgment upon whether the members of the committee who took that view were right or wrong. I simply say that they were supported by the Tariff Commission and also by the Geological Survey, all holding that there is not a sufficient amount in the United States to last more than a few years. Nor do I pass judgment upon whether their survey was full and adequate or otherwise. I am simply saying that the majority of the committee were led to believe that that was the fact.

Mr. WALSH of Montana. Mr. President——

The VICE PRESIDENT. Does the Senator from North Dakota yield to the Senator from Montana?

Mr. McCUMBER. I yield.

Mr. WALSH of Montana. The first reason the Senator gave as a reason actuating the committee was that a rate of 1 cent a pound on the manganese content would be equivalent to a 100 per cent ad valorem rate. What was the limit fixed by the committee?

Mr. McCUMBER. I stated, first, that anything less than 1 cent a pound was not sufficient protection, if we were going to have protection; that if we were going to have protection at all it would be necessary to have at least 1 cent per pound. I stated in addition to that—and that is my information—that the rate on the ore as imported amounts to putting 1 cent per pound on the manganese content; therefore, that 1 cent per pound was equivalent, of course, to 100 per cent duty. That is my information from the experts.

Mr. WALSH of Montana. That is just the point. The committee would not go above 100 per cent ad valorem upon this particular commodity.

Mr. McCUMBER. I hope the Senator will not say that, because I did not say anything of the kind. I am simply stating some of the things the committee considered.

Mr. WALSH of Montana. I understand perfectly well that the committee found that a rate of 100 per cent ad valorem would not be a protective rate, and accordingly that was the consideration which induced them to drop the idea of fixing a protective rate. What I want to know from the Senator, Did the committee have some limit of ad valorem rates above which it would not go?

Mr. McCUMBER. No, Mr. President, it did not consider at all either how high it would go or how high it would not go. There are a number of items in the bill the rates on which are very much above 100 per cent.

That was not the governing matter, but I thought it was worth considering by the Senate; that is, that it might take into consideration whether, with the 100 per cent that was necessary, taking into further consideration the fact, or at least that which was believed to be the fact, that the supply could not last more than a few years, they were justified in placing either so high a duty or any duty that would be necessary.

The next thing that was taken into consideration was the question of the preservation of the present supply. Assuming, of course, that there was only sufficient to last for a few

years, remembering how the price soared to the very skies when war came on, there was a feeling on the part of many that it would be better to retain the supply which seemed to be in sight to meet any emergency. I am not giving my view or giving the view of any particular Senator, but simply trying, in a straightforward way, to indicate to the Senate the thoughts which came to the minds of the majority of the committee.

It must be remembered, as indicated, that prior to 1914 we produced in this country only 4,000 tons. In 1918, with a content running as high as $450 a ton, we could use any kind of ore, of course, to profit, and we produced 305,000 tons in 1918. That was more than half of what was necessary to supply the American market, I think.

The American ore, according to the report of the Tariff Commission, averages from 35 to 45 per cent manganese content. The foreign averages from 45 per cent to 55 per cent manganese content, and I am informed that if it is less than 50 per cent manganese content, it comes in at a very much reduced rate, owing to the fact that it costs much more to extract the manganese content.

I do not know whether we have enough to supply the country for a good many years or whether we have not. I do not know whether the reports are correct which are given us by the Tariff Commission and by the Geological Survey, but I am simply presenting the facts upon which the majority of the committee acted, and it is for the Senate to decide whether or not, with those facts in view, and with what evidence they have since received from those Senators who are speaking as experts upon this subject, they feel that they are justified in taking this matter off of the free list and disagreeing with the committee amendment.

The VICE PRESIDENT. The question is on agreeing to the amendment proposed by the committee.

Mr. WALSH of Montana. May the amendment be stated by the Secretary, Mr. President?

Mr. UNDERWOOD. I think we had better have a quorum before we have a vote on this question. I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Assistant Secretary called the roll, and the following Senators answered to their names:

Ashurst	Frelinghuysen	Lenroot	Shortridge
Ball	Gooding	McCumber	Smith
Brandegee	Hale	McKinley	Smoot
Broussard	Harris	McLean	Spencer
Bursum	Harrison	McNary	Stanley
Cameron	Heflin	Myers	Townsend
Capper	Johnson	Nicholson	Underwood
Colt	Jones, Wash.	Oddie	Walsh, Mass.
Cummins	Kellogg	Pepper	Walsh, Mont.
Curtis	Kendrick	Poindexter	Warren
Dial	Keyes	Pomerene	Watson, Ind.
du Pont	King	Ransdell	Willis
Edge	Ladd	Rawson	
France	La Follette	Sheppard	

The VICE PRESIDENT. Fifty-four Senators have answered to their names. A quorum is present. The question is on the adoption of the committee amendment, which will be stated.

The ASSISTANT SECRETARY. On page 48, paragraph 302, the committee proposes to strike out "manganese ore or concentrates containing in excess of 30 per cent of metallic manganese, 1 cent per pound on the metallic manganese contained therein; molybdenum" and insert in lieu thereof "Molybdenum," so as to read:

Molybdenum ore or concentrates, 75 cents per pound on the metallic molybdenum contained therein.

Mr. NICHOLSON. Mr. President, I ask that the Senate disagree to the amendment of the committee, and I ask for the yeas and nays on the question.

Mr. WALSH of Montana. I inquire whether the amendment to be voted upon should not be considered as being concluded with the word "therein," at the end of line 22, instead of including the two succeeding words?

Mr. McCUMBER. Of course, one provision is to strike out and the other provision is to place the product on the free list. The one would have to follow the other, and I assume the Senator has the right to ask for a division, there being practically two amendments.

Mr. SMOOT. I will say to the chairman of the committee that there ought to be two votes. The amendment ought to be divided, because there are two entirely different subjects. One is molybdenum ore and the other is manganese ore. The first amendment down to the word "therein" ought to be disagreed to or agreed to.

Mr. McCUMBER. The first amendment would be to strike out lines 20, 21, and 22, ending with the word "therein."

Mr. WALSH of Montana. I ask unanimous consent that the question be divided and that the Senate first vote upon that part of the amendment concluding with the word "therein."

Mr. SMOOT. Or that part which pertains to manganese ore?

Mr. WALSH of Montana. Exactly, that which pertains exclusively to manganese ore.

Mr. McCUMBER. That is satisfactory to me.

Mr. NICHOLSON. Mr. President, I want to understand the question clearly. Agreeing to the committee amendment means the placing of manganese ore on the free list, does it not?

Mr. SMOOT. That is right.

Mr. WALSH of Montana. It does not affect the situation at all, only that by reason of the construction of the sentence molybdenum is combined with manganese, and the purpose of my suggestion is to exclude that part of the amendment which refers not to manganese but to molybdenum, leaving the language we are voting on that which refers to manganese alone.

Mr. McCUMBER. That is perfectly satisfactory.

Mr. NICHOLSON. I wish to have a statement from the Chair if it is not a fact that by voting for the committee amendment we vote to place manganese upon the free list.

The VICE PRESIDENT. That is the understanding of the Chair.

Mr. NICHOLSON. I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. POINDEXTER. Mr. President, a parliamentary inquiry.

The VICE PRESIDENT. The Senator will state the inquiry.

Mr. POINDEXTER. What has been done with regard to the request of the Senator from Montana to divide the question?

The VICE PRESIDENT. Without objection it is so ordered, and the Secretary will state the first part of the amendment.

The ASSISTANT SECRETARY. The first part of the amendment is on page 48, in paragraph 302, to strike out the words "manganese ore or concentrates containing in excess of 30 per cent of metallic manganese, 1 cent per pound on the metallic manganese contained therein."

Mr. POINDEXTER. So this part of the amendment does not involve molybdenum in any way, but restricts it entirely to manganese ore.

The VICE PRESIDENT. That is the understanding of the Chair. The Secretary will call the roll.

The Assistant Secretary proceeded to call the roll.

Mr. BALL (when his name was called). I transfer my general pair with the senior Senator from Florida [Mr. FLETCHER] to the junior Senator from Oklahoma [Mr. HARRELD] and vote "nay."

Mr. COLT (when his name was called). I transfer my pair with the junior Senator from Florida [Mr. TRAMMELL] to the senior Senator from New York [Mr. WADSWORTH] and vote "yea."

Mr. EDGE (when his name was called). Transferring my pair with the senior Senator from Oklahoma [Mr. OWEN] to the Senator from West Virginia [Mr. ELKINS], I vote "yea."

Mr. HALE (when his name was called). I transfer my pair with the senior Senator from Tennessee [Mr. SHIELDS] to the junior Senator from New York [Mr. CALDER] and vote "yea."

Mr. HARRIS (when his name was called). On this question I have a pair with the Senator from South Dakota [Mr. NORBECK]. In his absence I withhold my vote.

Mr. HARRISON (when his name was called). On this vote I am paired with the senior Senator from Idaho [Mr. BORAH]. I understand that if present he would vote "nay." If I were at liberty to vote, I would vote "yea." I ask to be noted as "present."

Mr. JONES of Washington (when his name was called). The Senator from Virginia [Mr. SWANSON] is necessarily absent. I have agreed to take care of him with a pair for the day. However, I find that I can transfer that pair to the junior Senator from Oregon [Mr. STANFIELD], which I do, and vote "nay."

Mr. KENDRICK (when his name was called). I transfer my pair with the senior Senator from Illinois [Mr. McCORMICK] to the senior Senator from Nevada [Mr. PITTMAN] and vote "nay."

Mr. SMITH (when his name was called). I have a general pair with the Senator from South Dakota [Mr. STERLING]. In his absence I transfer that pair to the junior Senator from Georgia [Mr. WATSON] and vote "yea."

Mr. STANLEY (when his name was called). I transfer my general pair with the junior Senator from Kentucky [Mr. ERNST] to the senior Senator from Texas [Mr. CULBERSON] and vote "yea."

Mr. SUTHERLAND (when his name was called). I transfer my pair with the senior Senator from Arkansas [Mr. ROBINSON] to the junior Senator from Vermont [Mr. PAGE] and vote "yea."

Mr. UNDERWOOD (when his name was called). I transfer my pair with the senior Senator from Massachusetts [Mr. LODGE] to the junior Senator from Rhode Island [Mr. GERRY] and vote "yea."

Mr. WARREN (when his name was called). I transfer my general pair with the junior Senator from North Carolina [Mr. OVERMAN] to the junior Senator from Maryland [Mr. WELLER] and vote "nay."

The roll call was concluded.

Mr. KELLOGG (after having voted in the negative). I transfer my pair with the Senator from North Carolina [Mr. SIMMONS] to the senior Senator from Minnesota [Mr. NELSON] and let my vote stand.

Mr. DIAL (after having voted in the affirmative). I have a pair with the Senator from Colorado [Mr. PHIPPS]. I transfer that pair to the Senator from Nebraska [Mr. HITCHCOCK] and allow my vote to stand.

Mr. CURTIS. I wish to announce the following pairs:

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from Indiana [Mr. NEW] with the Senator from Tennessee [Mr. MCKELLAR]; and

The Senator from Indiana [Mr. WATSON] with the Senator from Mississippi [Mr. WILLIAMS].

The result was announced—yeas 19, nays 35, as follows:

YEAS—19.

Brandegee	Frelinghuysen	Pepper	Sutherland
Colt	Hale	Pomerene	Underwood
Curtis	King	Smith	Walsh, Mass.
Dial	McCumber	Smoot	Willis
Edge	McLean	Stanley	

NAYS—35.

Ashurst	France	Ladd	Ransdell
Ball	Gooding	La Follette	Rawson
Broussard	Heflin	Lenroot	Sheppard
Bursum	Johnson	McKinley	Shortridge
Cameron	Jones, N. Mex.	McNary	Spencer
Capper	Jones, Wash.	Myers	Townsend
Caraway	Kellogg	Nicholson	Walsh, Mont.
Cummins	Kendrick	Oddie	Warren
du Pont	Keyes	Poindexter	

NOT VOTING—42.

Borah	Harreld	Norbeck	Stanfield
Calder	Harris	Norris	Sterling
Crow	Harrison	Overman	Swanson
Culberson	Hitchcock	Owen	Trammell
Dillingham	Lodge	Page	Wadsworth
Elkins	McCormick	Phipps	Watson, Ga.
Ernst	McKellar	Pittman	Watson, Ind.
Fernald	Moses	Reed	Weller
Fletcher	Nelson	Robinson	Williams
Gerry	New	Shields	
Glass	Newberry	Simmons	

So the committee amendment was rejected.

Mr. McCUMBER. The action just taken necessitates a disagreement to the amendment on line 23, and I ask that that amendment may be disagreed to.

The PRESIDING OFFICER (Mr. EDGE in the chair). The question is upon agreeing to the amendment indicated by the Senator from North Dakota.

The amendment was rejected.

Mr. McCUMBER. Mr. President, I have not carefully made the estimate of what the duty on ferromanganese should be, but I think we should disagree to the amendment on lines 2, 3, and 4 on page 49; and unless it is desired to make a change, I ask that we disagree to that amendment. If we ascertain afterwards that it is necessary to offer some other amendment in order to meet the differential, the committee can report it.

Mr. KING. I should like to inquire of the Senator from North Dakota whether the proper relation will exist, if the course which the Senator has just suggested be taken, between the duty on manganese ore and the duty on ferromanganese, in view of the action of the Senate a moment ago?

Mr. McCUMBER. I think, as we have gone back to the House rate at the beginning of paragraph 302, of 1 cent per pound upon the metallic manganese content in the ore, that it would be equivalent to about 2½ cents per pound on the metallic manganese content in the ferromanganese.

Mr. KING. I think the Senator will find that the percentage is too high; but with the understanding that the experts will figure that out and that the chairman will report back to the Senate, I have no objection.

Mr. SMOOT. I, myself, think that the differential is a little too high.

Mr. UNDERWOOD. What was the request which the Senator from North Dakota made?

Mr. SMOOT. To disagree to the amendment, and if it is found that 2½ cents is too high the Senator from North Dakota will ask to have a change made in the rate.

Mr. UNDERWOOD. I should like to say to the Senator from North Dakota that if he prefers to go on to-night, of course, I am satisfied to discuss the question. I think the rates on the ferro-alloys are entirely too high, and I think an amendment to change them should be made; but a part of them can not be reached by amendment of the Senate committee amendment. I think it would be better to let the whole paragraph go over until the other items of the bill are finished, when we can offer amendments to the whole paragraph.

Mr. McCUMBER. I think the Senator's suggestion is a good one, especially as we have got to consider other amendments, although I think the first amendment is about correct. In this connection I should like to put into the RECORD a brief statement.

It takes 110 pounds of manganese in the ore to produce 80 pounds of manganese in ferromanganese. At 1 cent per pound the duty on the ore sufficient to make 1 ton of ferromanganese will amount to $24.64, whereas the duty on 80 per cent of ferromanganese at 2½ cents per pound of manganese equals $39.42 per ton. Hence the duty is not only compensatory, but also $14.78 on a ton of 80 per cent ferromanganese, or about eight-tenths of a cent per pound on the manganese content in the ferromanganese.

That, of course, may not be very clear without reading it over carefully. However, Mr. President, I think we had better pass over the remainder of that paragraph and try between now and our meeting to-morrow to get the proper differential that should be made with the duty on the manganese content of the ore at 1 cent per pound.

Mr. KING. In figuring the differential the Senator does not intend, I take it, to add anything in the way of compensation for profits?

Mr. McCUMBER. Will the Senator kindly repeat his question?

Mr. KING. In determining the compensatory duty to be given to ferromanganese, the Senator does not intend to add anything by way of profit, but just a fair allowance to cover the difference?

Mr. McCUMBER. It is merely proposed to fix the proper rate in view of the 1 cent which is given to the manganese content.

Mr. UNDERWOOD. The Senator from North Dakota made some suggestion about taking this matter up to-morrow. If the Senator is going to pass it over, I should much prefer to go on with it to-night, unless the Senator is going to pass it over for some time. I asked that the paragraph be passed over until we finish the remainder of the bill, for when the consideration of the bill is concluded I should like to offer an amendment which will go to the whole paragraph. We are not permitted now to amend the whole paragraph, and I had rather make one argument than to make two or three.

Mr. McCUMBER. The great difficulty is that there will be so many requests to have matters go over until we get to the end of the bill that I am afraid we shall get lost.

Mr. UNDERWOOD. Very well; then we will go on with it to-night.

Mr. McCUMBER. I stated the reason why I thought we ought not to go on with it to-night. Inasmuch as we have now imposed a duty of 1 cent per pound on the manganese content of the ore, it will take some time to figure exactly the compensatory duty. It is difficult to figure it on the floor of the Senate without sitting down with pencil and paper.

Mr. UNDERWOOD. I realize that. Therefore I think it would suit the Senator's convenience that it should go over, but to suit my convenience I do not desire that it go over merely for a day or for two days. I want to compromise and have it go over until the end of the bill shall have been reached.

Mr. McCUMBER. I can see the Senator's point, but let us pass it over at least for to-night, because we can not possibly dispose of it to-night.

Mr. UNDERWOOD. I hope the Senate will take no action on the matter unless I am notified.

The PRESIDING OFFICER. Without objection, the paragraph will be passed over.

ORDER FOR RECESS.

Mr. McCUMBER. Mr. President, I ask unanimous consent that when the Senate concludes its session on this calendar day that it take a recess until to-morrow at 11 o'clock a. m.

The PRESIDING OFFICER. Is there objection to the request of the Senator from North Dakota?

Mr. HEFLIN. Mr. President, is it the purpose of the Senator from North Dakota to take a recess about 10 o'clock to-night?

Mr. McCUMBER. It is my purpose to take a recess just as soon as the Senator from Wisconsin [Mr. LA FOLLETTE] presents a matter which he desires to bring before the Senate.

Mr. CURTIS. Mr. President, we desire to have a short executive session, I will say to the Senator from North Dakota.

Mr. McCUMBER. I understand that.

The PRESIDING OFFICER. Is there objection to the request of the Senator from North Dakota, that when the Senate concludes its session this evening it shall recess until 11 o'clock to-morrow morning? The Chair hears none, and such order will be entered.

MUSCLE SHOALS DEVELOPMENT.

Mr. LA FOLLETTE obtained the floor.

Mr. UNDERWOOD. Mr. President, I ask the Senator from Wisconsin to yield to me for a moment.

Mr. LA FOLLETTE. I yield to the Senator from Alabama.

Mr. UNDERWOOD. I ask unanimous consent that a memorial passed by the Southern Commercial Congress at its meeting at Muscle Shoals in May last in reference to the Muscle Shoals be printed in the RECORD.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and the order will be entered.

The memorial referred to is as follows:

MEMORIAL TO THE PRESIDENT AND THE CONGRESS OF THE UNITED STATES.

Believing that the great industrial project, Muscle Shoals, should be so developed as to secure the greatest good to the Nation, and affirming our confidence in the ability and purpose of the President and the Members of Congress who bear the responsibility for the future of this great national asset, we, the authorized delegates to the national conference on Muscle Shoals, in session under the auspices of the Southern Commercial Congress at Muscle Shoals, May 22–24, 1922, having carefully considered the features of this undertaking and after inspection of this property and the serious study of the several proposals therefor, offer the following memorial in testimony of our unanimous convictions:

National progress and national existence itself depends upon the maintenance of our soil's fertility, together with adequate provision for our national defense.

No single human endeavor in the United States affords such promise of advancing the national welfare in both of these ways as does the uncompleted Muscle Shoals project.

To abandon and scrap this project would be an economic crime.

The real usefulness of Muscle Shoals can be realized only by a comprehensive development that calls for vast capital and organizing ability of a high order, available to but a few private citizens, and to the Government itself.

This country has attained a foremost place in wealth and industry not by governmental engagement in business but by the enterprise and ability of its private citizens, among whom none commands a greater degree of confidence based upon achievements than does Henry Ford.

The Ford proposal is the only offer pending which provides—

For full development of all of the power possibilities of the Tennessee River;

For utilizing the great resources of the Tennessee Valley;

For the adequate improvement of navigation;

For a guaranty of cheap fertilizers on a scale which offers substantial encouragement to millions of American farmers; and

For the maintenance for 100 years of the nitrate plant, assuring at all times a domestic supply of explosives in time of war.

Detailed congressional investigations have confirmed our view of the situation and have disclosed the opposition as that of selfish interests, who, disregarding the national welfare, seek to prevent that which they themselves when offered the opportunity declined to undertake.

The problem has been under consideration by the people of this country for more than a year; the facts are now well known; the issue is clearly defined and the time for action is at hand.

Therefore we do earnestly urge upon the President and the Congress to end the delay and suspense by early and decisive action accepting the offer of Mr. Ford.

In pursuance of the foregoing declarations to the President and the Congress of the United States and to the American people: Be it further

Resolved, That a legislative committee be, and is hereby, appointed to present this memorial to the President and the Congress and to use every proper effort to further the legislative program adopted at this conference, and that the said committee shall consist of Hoke Smith, of Georgia; Thomas R. Preston, of Tennessee; and Clarence J. Owens, director general of the Southern Commercial Congress, Washington, D. C., with the power and authority to increase this committee in their discretion to the number of 11.

PROPOSED MERGER OF STEEL COMPANIES.

Mr. LA FOLLETTE. Mr. President, in response to Senate Resolution 286, passed by the Senate on the 12th of May, the Federal Trade Commission addressed a communication to the Senate which was received this morning and handed down by the Vice President. I was unable at that time to have it read to the Senate for the reason that the Senator from Indiana [Mr. WATSON] had the floor and declined to yield for that purpose. The communication consists of four pages of typewritten matter and will take perhaps 10 minutes to read. I ask to have it read at this time, and that it be printed in the RECORD in 8-point type.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Wisconsin that the communication shall be read and printed in the RECORD in 8-point type? The Chair hears none. The Secretary will read as requested.

The Assistant Secretary read as follows:

FEDERAL TRADE COMMISSION,
Washington.

To the PRESIDENT OF THE UNITED STATES SENATE.

SIR: By Resolution No. 286, agreed to on May 12, 1922, the Attorney General of the United States and the Federal Trade Commission were requested to inform the Senate what steps had been taken, or they proposed to take, to ascertain the purpose and probable effects of the proposed merger of certain steel companies therein named; to inform the Senate as to results of any investigations which they may have conducted; and what actions they have instituted to protect the public interest.

In so far as this resolution is directed to the Federal Trade Commission, that commission presents the following report:

In the early part of December, 1921, the attention of the Federal Trade Commission was attracted by reports and rumors of proposed and impending mergers of considerable importance in many lines of industry. The commission thereupon, by resolution, directed its proper officials to seek all possible information with reference to these proposed mergers and to keep the commission advised as to their progress. Prior to the adoption of Senate Resolution 286, the proposed merger among the steel companies was under observation by the commission, and it was collecting information with reference thereto.

Up to the time of this resolution, however, none of these proposed mergers had reached a sufficiently definite or concrete stage to warrant the commission in reaching a conclusion with reference to the legality of such proposed mergers.

Subsequent to the adoption of the resolution in question it became apparent that the movement toward a merger in the steel industry had taken on the form of a combination of the Bethlehem Steel Corporation and its subsidiaries with the Lackawanna Steel Co. and its subsidiaries on the one hand and a like combination of the properties of the Midvale Steel & Ordnance Co., the Republic Iron & Steel Co., and the Inland Steel Co., these three latter companies proposing to form a new corporation to be known as North American Steel Co.

The Bethlehem-Lackawanna merger has advanced to a stage where it is practically complete except for the necessary ratification by the stockholders of the two companies, and we are informed that this remaining detail will be completed as soon as possible.

The Federal Trade Commission had considerable information already at hand with reference to the position of the Bethlehem Steel Corporation and its subsidiaries and the Lackawanna Steel Co. and its subsidiaries in the steel industry and the relation of each to each other and to competitive conditions in the steel market generally. This information has been supplemented by inquiry and research with the result that the Federal Trade Commission upon the information before it has reason to believe, in the language of its constituent act, that the proposed Bethlehem-Lackawanna merger when consummated will constitute an unfair method of competition in that it contains a dangerous tendency unduly to hinder competition and to restrain trade and commerce, and that a proceeding by the commission in this respect is in the public interest.

In this aspect under its constituent act it becomes the duty of the Federal Trade Commission to issue its complaint and to state its charges in that behalf. The Federal Trade Commission therefore issued its complaint directed to the Bethlehem and Lackawanna companies on Saturday, June 3, and for the further information of the Senate attaches a copy of this complaint hereto.

Of course, the issue of the complaint is merely the institution of formal proceedings to test the legality of the proposed merger. In the ordinary course answer will be filed to this complaint and testimony will be taken both on behalf of the Government and of the two steel companies. At the conclusion of this testimony and after argument the commission will determine the facts and apply the law thereto. And only if such a conclusion is justified by the facts will an order to cease and desist from the proposed merger be issued. Otherwise the complaint will be dismissed. In other words, in the issue of the complaint the Federal Trade Commission expresses no final judgment as to the legality of the proposed merger.

If an order to cease and desist from the proposed merger is issued, it is, of course, subject to review by the United States Circuit Court of Appeals.

THE MIDVALE-REPUBLIC-INLAND MERGER.

With reference to the proposed Midvale-Republic-Inland merger and the formation of the North American Steel Co., we are advised that tentative arrangements entered into between the executive officers of these three companies have been settled upon and agreed to on behalf of the board of directors of the companies, and tentative arrangement has been made with Kuhn, Loeb & Co. for the financing of the proposed merger. The actions of these three companies have not so far advanced toward completion as to reveal the essential facts with the same precision and comprehensiveness as in the Bethlehem-Lackawanna case, and the Federal Trade Commission therefore has not yet been able to reach a reason to believe either that the proposed three-company merger will or will not carry the same tendency and capacity as in the case of the Bethlehem-Lacka-

wanna merger above referred to. The details of this plan are, however, being carefully followed, and so soon as the commission is in possession of sufficient information it will make further report to the Senate as to the second of these proposed mergers.

By the commission.

Respectfully submitted.

NELSON B. GASKILL, *Chairman.*

Mr. LA FOLLETTE. Mr. President, attached to the communication addressed to the Senate, which has just been read, is a complaint which was served on the new Bethlehem and Lackawanna steel merger, on the 3d day of June, which was last Saturday. The whole subject is of such interest to the people of this country that I also ask to have the complaint printed in the RECORD in 8-point type, but not read at this time.

The PRESIDING OFFICER. Is there objection to the request? The Chair hears none, and the order will be made.

The complaint referred to is as follows:

United States of America, before Federal Trade Commission, in the matter of the Bethlehem Steel Corporation and the Lackawanna Steel Co. Docket No. 891.

COMPLAINT.

Acting in the public interest pursuant to the provisions of an act of Congress approved September 26, 1914, entitled "An act to create a Federal Trade Commission, to define its powers and duties, and for other purposes," the Federal Trade Commission charges that the Bethlehem Steel Corporation and the Lackawanna Steel Co., hereinafter referred to as respondents, have been and are using unfair methods of competition in interstate commerce in violation of the provisions of section 5 of said act, and states its charges in that respect as follows:

PARAGRAPH 1. Respondent, Bethlehem Steel Corporation, is a corporation organized under the laws of the State of New Jersey. The outstanding capital stock of respondent amounts to $104,770,000 par value. The funded debt, consisting of obligations of various issues, chiefly of bonds issued by Bethlehem Steel Corporation and bonds issued or assumed by the Bethlehem Steel Co. or their subsidiaries, amounts to $146,432,896.52. It is what is commonly known as a holding corporation, owning a controlling interest in the capital stock of a number of other corporations, the organization and business of which are described in paragraphs 2 to 11 of this complaint.

PAR. 2. The Bethlehem Steel Co. is a corporation organized under the laws of the State of Pennsylvania, and owns and operates plants for the manufacture of crude and semifinished and finished iron and steel products located at Bethlehem, Steelton, Lebanon, and Reading, Pa. The Bethlehem Steel Co. also owns a controlling interest in the capital stock of the Beth-Mary Steel Corporation, which owns and operates a plant for the manufacture of crude and semifinished steel products at Sparrows Point, Md., said plant being operated by the Bethlehem Steel Co. under a lease.

PAR. 3. Bethlehem Steel Bridge Corporation is a corporation organized under the laws of the State of Delaware, which manufactures and sells bridge materials and structural steel for buildings and erects bridges in various parts of the United States.

PAR. 4. Bethlehem-Cuba Iron Mines Co. is a corporation organized under the laws of the State of West Virginia, owning and operating iron-ore mines in Cuba and operating under lease the mines of Juragua Iron Co., Cuba.

PAR. 5. The Juragua Iron Co. is a Pennsylvania corporation owning iron-ore mines in Cuba, the same being leased to the Bethlehem-Cuba Iron Mines Co.

PAR. 6. Bethlehem-Chile Iron Mines Co. is a corporation organized under the laws of Delaware, and operates under lease the Tofo iron-ore mines located at Cruz Grande in the Province of Coquimbo, Chile.

PAR. 7. Cornwall Ore Banks Corporation is a corporation organized under the laws of the State of Pennsylvania. It owns iron-ore mines in Cornwall and Lebanon townships in Lebanon County, Pa., the said mines being operated by the Cornwall Ore Bank Co., an unincorporated association controlled by the Bethlehem Steel Co.

PAR. 8. The Bethlehem Iron Mines Co. is a corporation organized under the laws of the State of New York, owning ore-mining properties in Cuba.

PAR. 9. Finch Run Coal Co. is a corporation organized under the laws of the State of Delaware, owning coal-mining properties in Marion County, W. Va.

PAR. 10. The Penn-Mary Coal Co. is a corporation organized under the laws of the State of Pennsylvania, owning coal-mining properties in Pennsylvania and West Virginia.

PAR. 11. The Bethlehem Mines Corporation is a corporation organized under the laws of the State of Delaware, and owning and operating limestone quarries at Bethlehem, Steelton, Lebanon, and Hanover, Pa., and McAfee, N. J.; and operating under lease the coal mines of Finch Run and Penn-Mary coal companies.

PAR. 12. Respondent, Bethlehem Steel Corporation, also owns a controlling interest in the stock of various other corporations engaged in shipbuilding and in transportation by rail and by water.

PAR. 13. Respondent, Bethlehem Steel Corporation, through its stock ownership in the corporations described in paragraphs 2 to 11, inclusive, of this complaint, is engaged in the business of managing, controlling, and directing the operations and businesses of said subsidiaries, including the sale of their products throughout the United States. Through its subsidiary, the Bethlehem Steel Co., it manufactures and sells large quantities of iron and steel commodities, including, among others, the following: Steel blooms, billets, slabs and sheet bars; rail joints, splice bars, tie plates, and other rail accessories; structural steel shapes; plates; forging ingots; steel bridges, viaducts, buildings, and pier caissons; railroad spikes, truck bolts, and nuts. Said respondent also manufactures and sells through its subsidiaries other iron and steel commodities. It manufactures and sells approximately 7 per cent of all the steel rails and approximately 16 per cent of all the long-angle splice bars and other rail accessories made in the United States. Its production of steel rails amounts to approximately 10 per cent of all such rails manufactured in that portion of the United States which embraces the State of Ohio and the territory north of the Potomac River and to the east of the said State, and its production of long-angle splice bars and other rail accessories amounts to 22 per cent of all these commodities manufactured in the said territory. It manufactures and sells in interstate commerce, as described in paragraph 14 herein, a substantial percentage of the other commodities named in this paragraph made in the United States, and manufactures a large percentage of such commodities made in the State of Ohio and in the territory north of the Potomac River and east of the said State. Respondent, Bethlehem Steel Corporation, and its subsidiaries, and respondent, Lackawanna Steel Co., and its subsidiaries, are important factors in making the market prices of the commodities named in this paragraph sold in interstate commerce in the New England States, New York, New Jersey, and eastern Pennsylvania, and practically control the market in such commodities in those States.

PAR. 14. The respondent, Bethlehem Steel Corporation, through its subsidiaries, taken as a whole, is engaged in the mining of iron ore, the mining of coal, the quarrying of limestone, the production therefrom of iron and semifinished and finished steel commodities, and is thus an integrated enterprise owning and controlling all stages of the production of the commodities sold by it from the raw materials to the semifinished and finished commodities. Said respondent and its subsidiaries sell products and commodities made by said subsidiary corporations to persons in various States of the United States, and cause such commodities, when so sold, to be transported from the points of production or manufacture into and through other States to purchasers at points in States other than the States where such products are manufactured and at points in foreign countries and pursuant to contracts of sale theretofore entered into by respondent or its subsidiaries. In the sale of such products and commodities in interstate commerce as herein described said respondent, of itself and through its subsidiaries, is in direct competition with respondent, Lackawanna Steel Co. and its subsidiaries, and with other individuals, partnerships, and corporations engaged in the manufacture and in the sale in interstate commerce of iron and steel commodities of the same kind and character as those sold by the Bethlehem Steel Corporation and its subsidiaries as set out in paragraph 13 of this complaint.

PAR. 15. Respondent, Lackawanna Steel Co., is a corporation organized under the laws of the State of New York, with its principal place of business in said State. It is both a holding and operating company and either directly or through its subsidiaries is engaged in the mining of iron ore and of coal, quarrying of limestone, and in the manufacture therefrom and sale of iron and steel commodities, and is thus an integrated enterprise owning and controlling all stages of the production of the commodities sold by it from the raw materials to the semifinished and finished commodities. Its capital stock (all common) issued and outstanding is $35,108,500, and it has bonds outstanding to the value of $21,236,000.

The respondent, Lackawanna Steel Co., manufactures, among other things, steel blooms, billets, slabs, and sheet bars; rails, rail joints, splice bars, tie-plates, and other rail accessories; steel shapes; plates forging ingots, railroad spikes, track bolts and nuts; and a number of other iron and steel com-

modities. It manufactures and sells in excess of 15 per cent of all the steel rails made in the United States, or approximately 23 per cent of all such rails manufactured in that portion of the United States which includes the State of Ohio and the territory north of the Potomac River and to the east of said State. It manufactures approximately 11 per cent of all the long-angle splice bars and other railroad accessories made in the United States, or approximately 17 per cent of all these commodities made in the territory above described. It owns an interest in the capital stock of numerous subsidiaries, the names, organization, and businesses of the principal of which are set out in paragraphs 16 to 25 of this complaint, together with the percentage of stock held or owned in each.

PAR. 16. The Lackawanna Bridge Works Corporation is a corporation organized and existing under the laws of the State of New York, and is engaged in the manufacture and sale, in interstate commerce, as described in paragraph 29, of steel bridges and steel for the fabrication of other structures, and in the erection in various parts of the United States of the structures for which said materials are sold. Its entire capital stock is owned by respondent, Lackawanna Steel Co.

PAR. 17. The Sunday Lake Iron Co. is a corporation organized and existing under the laws of the State of Michigan, operating leased iron-mining properties. Its entire capital stock is owned by respondent, Lackawanna Steel Co.

PAR. 18. The Brotherton Iron Mining Co. is a corporation organized and existing under the laws of the State of Michigan, operating leased iron-mining properties. Practically its entire capital stock is owned by respondent, Lackawanna Steel Co.

PAR. 19. Witherbee, Sherman & Co. is a corporation organized and existing under the laws of the State of New York, owning and operating iron-mining properties, and manufacturing pig iron. One-third of its capital stock is owned by respondent, Lackawanna Steel Co.

PAR. 20. Hobart Iron Co. is a corporation organized and existing under the laws of the State of Minnesota, operating iron-mining properties in Minnesota. Two-thirds of its capital stock is owned by Lackawanna Bridge Works Corporation.

PAR. 21. Corsica Iron Co. is a corporation organized and existing under the laws of the State of Minnesota, operating leased iron-mining properties in the State of Minnesota. Approximately two-thirds of its capital stock is owned by respondent, Lackawanna Steel Co.

PAR. 22. The Varona Mining Co. is a corporation organized and existing under the laws of the State of Michigan, operating leased iron-mining properties in Michigan. One-half of its capital stock is owned by respondent, Lackawanna Steel Co.

PAR. 23. Odanah Iron Co. is a corporation organized and existing under the laws of the State of Wisconsin, operating leased iron-mining properties in Wisconsin. Approximately 27 per cent of its capital stock is owned by respondent, Lackawanna Steel Co.

PAR. 24. Hoyt Mining Co. is a corporation organized and existing under the laws of the State of Minnesota, operating leased iron-mining properties in Minnesota. Approximately 30 per cent of its capital stock is owned by respondent, Lackawanna Steel Co.

PAR. 25. The Negaunee Mine Co. is a corporation organized and existing under the laws of the State of Ohio, operating leased iron-mining properties in Michigan. One-half of its capital stock is owned by respondent, Lackawanna Steel Co.

PAR. 26. The Lackawanna Coal & Coke Co. is a corporation organized and existing under the laws of the State of Pennsylvania, owning and operating coal-mining properties in Pennsylvania. Its entire capital stock is owned by respondent, Lackawanna Steel Co.

PAR. 27. The Ellsworth Collieries Co. is a corporation organized and existing under the laws of the State of Pennsylvania, owning and operating coal-mining properties in Pennsylvania. Its entire capital stock is owned by respondent, Lackawanna Steel Co.

PAR. 28. The Lackawanna Steel Co. (of New Jersey) is a corporation organized and existing under the laws of the State of New Jersey and acts as selling agent of the Lackawanna Steel Co. in Illinois and Missouri. Its entire capital stock is owned by respondent, Lackawanna Steel Co.

PAR. 29. Respondent, Lackawanna Steel Co., itself or through its subsidiaries herein described, sells the commodities made and produced by them and named herein to persons in the various States of the United States, and causes such products and commodities, when so sold, to be transported from the points of production or manufacture into and through other States to purchasers at points in States other than those in which such products or commodities are produced or manufactured, pursuant to contracts of sale theretofore entered into by the said respondent or its subsidiaries, in competition with other persons or corporations similarly engaged in the manufacture and in the sale in interstate commerce of such commodities.

PAR. 30. Respondent, Bethlehem Steel Corporation and its subsidiaries on the one hand, and respondent, Lackawanna Steel Co. and its subsidiaries on the other, were, before the doing of the things hereinafter alleged, in competition with each other in the manufacture and in the sale, in interstate commerce, as set out in paragraphs 14 and 29 hereof, of the commodities enumerated in paragraph 15 of this complaint, and were, and are, in competition in the sale, in interstate commerce, of such commodities with other individuals, partnerships, and corporations similarly engaged, in the production and in the sale of such commodities in interstate commerce.

PAR. 31. That on or about April 1, 1922, respondents entered into an agreement to combine or consolidate their respective properties, businesses, and interests into a common enterprise, whereby the properties, assets, and business of respondent, Lackawanna Steel Co., as well as that of its subsidiary, the Lackawanna Bridge Works Corporation, and the capital stocks in the subsidiaries of the respondent, Lackawanna Steel Co., set out in paragraphs 16 to 28, inclusive, of this complaint, held and owned by said respondent, Lackawanna Steel Co., all are to be acquired by said Bethlehem Steel Corporation. Pursuant to said agreement, respondent, Bethlehem Steel Corporation, is now acquiring or has acquired, and respondent, Lackawanna Steel Co. is selling, conveying, assigning, or transferring, or has sold, conveyed, assigned, and transferred to respondent, Bethlehem Steel Corporation, all the physical properties, business, and assets of the respondent, Lackawanna Steel Co., and of its subsidiary, the Lackawanna Bridge Works Corporation, and the capital stocks of the subsidiary corporations of the respondent, Lackawanna Steel Co., described in paragraphs 4 to 11, inclusive, of this complaint.

PAR. 32. That said combination of the respondents, Bethlehem Steel Corporation and Lackawanna Steel Co., by purchase of the physical properties and stocks of various corporations owned by the Lackawanna Steel Co., will when the transfers herein described are consummated, control in excess of 22 per cent of all the steel rails produced in the United States and in excess of 33⅓ per cent of all steel rails produced in the State of Ohio and all territory north of the Potomac River and east of the said State; combination will also control in excess of 26 per cent of the long-angled splice bars and other rail accessories manufactured in the United States and in excess of 39 per cent of these commodities produced in the State of Ohio and all territory north of the Potomac River and east of the said State; that said combination will control very substantial percentages of other crude, semifinished, and finished iron and steel commodities made in the United States, and a substantially larger percentage of these commodities made in the State of Ohio and all territory north of the Potomac River and east of the said State.

PAR. 33. That said acquisition by respondent, Bethlehem Steel Corporation, of the physical properties of the Lackawanna Steel Co. and of the Lackawanna Bridge Co. and of the capital stock of the subsidiary corporations of the Lackawanna Steel Co. described in paragraphs 16 to 28, inclusive, of this complaint will suppress and eliminate all competition which has hitherto existed between Bethlehem Steel Corporation and its subsidiaries, or each or any of such subsidiaries, and the Lackawanna Steel Co. and its subsidiaries, or each or any of such subsidiaries. The said merger or consolidation of properties, business, and interests of the respondent, Bethlehem Steel Corporation, and its subsidiaries, and of the Lackawanna Steel Co. and its subsidiaries as set out herein, has a dangerous tendency unduly to hinder competition in interstate commerce as herein described, or to hinder and lessen competition unduly in interstate commerce, as herein described, in the steel and iron commodities named in this complaint, in certain sections and communities of the United States, and particularly in the New England States, New York, New Jersey, and eastern Pennsylvania.

PAR. 34. That said acquisition by respondent, Bethlehem Steel Corporation, of the physical properties of the Lackawanna Steel Co. and of the Lackawanna Bridge Works Corporation, and of a controlling interest in the capital stock of the subsidiary corporations of the Lackawanna Steel Co., as set out herein, has a dangerous tendency unduly to restrain trade and commerce, as described herein, among the several States in the iron and steel commodities named in paragraphs 13, 15, and 16 of this complaint, and if and when accomplished will unduly restrain such trade and commerce in such commodities, and constitutes an attempt to monopolize and will monopolize such

interstate trade and commerce in certain sections and communities, and particularly in the New England States, New York, New Jersey, and eastern Pennsylvania.

PAR. 35. The acquisition by respondent, Bethlehem Steel Corporation, of the physical properties of respondent, Lackawanna Steel Co., and of its subsidiary, the Lackawanna Bridge Works Corporation, and of the capital stocks of the various subsidiaries of respondent, Lackawanna Steel Co., herein described, and the merger of the respondent corporations in the manner described herein with the tendencies, capacities, or effects charged in this complaint, constitute unfair methods of competition in interstate commerce within the intent and meaning of section 5 of an act entitled "An act to create a Federal Trade Commission, to define its powers and duties, and for other purposes," approved September 26, 1914.

Wherefore, the premises considered, the Federal Trade Commission, on this 3d day of June, A. D. 1922, now here issues this its complaint against said respondents.

NOTICE.

Notice is hereby given you, Bethlehem Steel Corporation and Lackawanna Steel Co., respondents herein, that on the 24th day of July, 1922, at 10.30 o'clock in the forenoon, is hereby fixed as the time, and the offices of the Federal Trade Commission in the city of Washington, D. C., as the place, when and where a hearing will be had on the charges set forth in this complaint, at which time and place you shall have the right under said act to appear and show cause why an order should not be entered by said commission requiring you to cease and desist from the violation of the law charged in this complaint.

In witness whereof the Federal Trade Commission has caused this complaint to be signed by its secretary, and its official seal to be hereto affixed, at Washington, D. C., this 3d day of June, 1922.

By the commission.

[SEAL.] J. P. YODER, *Secretary.*

INTERNATIONAL MANUFACTURERS' SALES CO. OF AMERICA.

Mr. POMERENE. I ask unanimous consent to introduce a bill and have it referred to the Committee on Claims. I also have here a letter giving the history of this claim. I think Senators may be interested in it, and I ask that it be incorporated in the RECORD.

The bill (S. 3678) for the relief of the International Manufacturers' Sales Co. of America (Inc.) was read twice by its title and referred to the Committee on Claims.

The letter was referred to the Committee on Claims and ordered to be printed in the RECORD, as follows:

THURMAN, BULKLEY & QUIGLEY,
Washington, D. C., May 29, 1922.

HON. ATLEE POMERENE,
United States Senate, Washington, D. C.

MY DEAR SENATOR POMERENE: In accordance with your request I herewith submit the following in connection with the proposed bill for the relief of the International Manufacturers' Sales Co. of America which you so kindly consented to introduce in the Senate.

The International Manufacturers' Sales Co. of America was originally incorporated in Illinois in 1910, having its office and principal place of business in Chicago. In 1916 it was reincorporated in New York, and at the times hereinafter mentioned had its office and principal place of business in that city. It was organized for the purpose of carrying on a general sales business in Russia and other European countries. The capital stock was owned exclusively by member manufacturers. The company did not function as an agency for these manufacturers but as a subsidiary sales organization, or, in other words, as the direct branch of these manufacturers in Europe under a cooperative plan.

Under this plan the profits of middlemen were eliminated and prices quoted and goods delivered direct from the factories to the buyer. The company was thus able to reduce operating expenses, lessen overhead charges, minimize advertising costs, etc., and thereby enabled to quote to the buyers on behalf of the member manufacturers prices lower than could have been quoted through agents.

After the organization of the company the directors elected as president and general manager Mr. A. S. Postnikoff, an American citizen and a man of many years experience in the foreign field, where he represented the International Harvester Co. Headquarters were then opened in Russia and other European countries. The first years of the operation of the company proved so successful that additional branches were opened in other parts of the world.

As before stated, the company was reincorporated in New York in 1916. At the times hereinafter mentioned the officers of the company were as follows:

A. S. Postnikoff, president; L. K. Liggett, president United Drug Co., Boston, Mass., first vice president; M. D. Jeffrey, export manager, Jeffrey Manufacturing Co., Columbus, Ohio, second vice president; B. T. Leuzarder, treasurer, Chicago Belting Co., Chicago, Ill., treasurer; L. N. Burns, secretary, J. I. Case Plow Works, Racine, Wis., secretary; A. S. Postnikoff, general manager; and R. H. Morris, assistant secretary.

The board of directors was composed of the following: L. H. Treadway, president, Peck, Stow & Wilcox Co., Cleveland, Ohio; Shiras Morris, president, Hart & Hegeman Manufacturing Co., Hartford, Conn.; F. R. Briggs, chairman of board, Thomas G. Plant Co., Boston, Mass.; J. K. Rodgers, director of sales, Du Pont Fabrikoid Co., Wilmington, Del.; L. K. Liggett, president, United Drug Co., Boston, Mass.; B. T. Leuzarder, treasurer, Chicago Belting Co., Chicago, Ill.; M. D. Jeffrey, export manager, Jeffrey Manufacturing Co., Columbus, Ohio; L. N. Burns, secretary, J. I. Case Plow Works, Racine, Wis.; W. O. Washburn, managing partner, American Hoist & Derrick Co., St. Paul, Minn.; H. F. Hering, vice president, New York Rubber Co., New York; and A. S. Postnikoff, president, International Manufacturers' Sales Co. of America.

The following is a list of the stockholders: J. D. Adams & Co., Indianapolis, Ind.; American Hoist & Derrick Co., St. Paul, Minn.; American Steam Gauge & Valve Manufacturing Co., Boston, Mass.; Ames Shovel & Tool Co., Boston, Mass.; Ann Arbor Machine Co., Ann Arbor, Mich.; Arlington Co., New York, N. Y.; Avery Co., Peoria, Ill.; Burroughs Adding Machine Co., Detroit, Mich.; Cadillac Motor Car Co., Detroit, Mich.; J. I. Case Plow Works, Racine, Wis.; Central Ohio Paper Co., Columbus, Ohio; J. G. Cherry Co., Cedar Rapids, Iowa; Chicago Belting Co., Chicago, Ill.; Chicago Bridge & Iron Works, Chicago, Ill.; Diamond Chain & Manufacturing Co., Indianapolis, Ind.; Du Pont Fabrikoid Co., Wilmington, Del.; Elyria Iron & Steel Co., Cleveland, Ohio; Hart Manufacturing Co., Cleveland, Ohio; Hart & Hegeman Manufacturing Co., Hartford, Conn.; Hilliard & Merrill (Inc.), Lynn, Mass.; Jeffrey Manufacturing Co., Columbus, Ohio; Kelly Axe Manufacturing Co., Charleston, W. Va.; Mrs. A. R. King (Inc.), Philadelphia, Pa.; Koehring Machine Co., Milwaukee, Wis.; Lawrence & Co., Boston, Mass.; A. Y. McDonald Manufacturing Co., Dubuque, Iowa; National Roofing Co., Tonawanda, N. Y.; New York Rubber Co., New York, N. Y.; M. A. Packard Co., Brockton, Mass.; Thomas G. Plant Co., Boston, Mass.; Peck, Stow & Wilcox Co., Cleveland, Ohio; Peoria Drill & Seeder Co., Peoria, Ill.; Pfister & Vogel Leather Co., Milwaukee, Wis.; Quaker Manufacturing Co., Chicago, Ill.; Saxon Motor Car Co., Detroit, Mich.; Scovill Manufacturing Co., Waterbury, Conn.; Sprout, Waldron & Co., Muncy, Pa.; Stromberg Motor Devices Co., Chicago, Ill.; Twentieth Century Machinery Co., Milwaukee, Wis.; United Drug Co., Boston, Mass.; Upson Nut Co., Cleveland, Ohio; White Sewing Machine Co., Cleveland, Ohio.

As before stated, the company enjoyed during the first years of its existence a prosperous business, especially in Russia, but through the Bolshevist uprising later lost a large amount of money in that country.

Early in the fall of 1918, with the approval of the President, a provisional plan was formulated by the Department of State for the purpose of extending economic aid to the Siberian population in Russia. The War Trade Board was intrusted with carrying out this plan and was placed in control of the distribution of supplies licensed for export to Vladivostok, a Mr. August Heid, being appointed as chief of the bureau of the War Trade Board in that city.

The sources of supply of goods to be shipped were arranged by the Department of State and were as follows: (1) Private capital, and (2) a revolving fund of $5,000,000, which, I am advised, was set aside by the President out of the fund appropriated to him for the national security and defense. I may state here that this $5,000,000 was not used, as the time in which this plan was in existence only lasted three or four months, and the International Manufacturers' Sales Co. of America was the only American company to participate in it.

In order to encourage private capital to assist in this plan for the relief of the Siberian population, the Department of State, through press statements and otherwise, urged and invited American merchants and manufacturers to sell goods in Siberia as a relief measure and announced that such merchants and manufacturers could obtain information as to the method of selling goods from the Vladivostok Bureau of the War Trade Board.

In October, 1918, this plan was cabled by the Department of State, through Mr. Morris, ambassador at Japan, who was then in Vladivostok, to Mr. August Heid, Chief of the Bureau of the War Trade Board in that city. It is very clear from the contents of this cable that it was the intention of the department in promoting this plan to encourage private capital to supply articles of prime necessity to the Siberian population.

In the fall of 1918 Mr. Postnikoff was in Vladivostok on business connected with his company and while there was interviewed by Mr. Heid, who explained in detail the plan for the relief of the Siberian population, and asked Mr. Postnikoff to get in touch with the directors of his company and urge them to arrange for the company to send supplies to Siberia in compliance with the request of the Department of State. Mr. Heid, as an official of the United States Government, urged that the company do this, saying that inasmuch as the proposed relief was in reality a call of our Government it was the right thing to comply with it, and further stated that all necessary assistance in distributing the goods and collecting the proceeds from the sales would be given the company by the Government.

Mr. Postnikoff thereupon took up the matter by cable with the directors of the company, with the result that the proposed plan was finally agreed to. The goods—all shoes—were sent to Vladivostok in December, 1918, and January and February, 1919, distributed throughout Siberia as far as Ekaterinburg, and sold at a price which only covered actual estimated expenses and was not intended to furnish any profit.

Profiteering by middlemen in Siberia was avoided, as the goods were sold only to municipalities, cooperative societies, and Zemstvos. In this way the consumer was able to obtain the shoes at the lowest possible price.

As promised by Mr. Heid, every possible assistance was given the company in distributing the goods. The American Red Cross, which at that time was doing extensive relief work in Siberia, assisted the company by supplying railroad cars and attaching them to its special relief trains. General Graves, who was then in command of the American Forces in Siberia, ordered special guards to protect the goods, and the War Trade Board took control of the sale of them.

As previously stated, deliveries were made in December, 1918, and January and February, 1919, and were paid for in March, April, and May of 1919 by the deposit of Russian rubles in several Siberian banks. The total payments amounted to 7,271,202.55 rubles. At the time of these payments the Russian ruble was worth approximately 18 cents of American money. With interest to the 1st of January, 1922, payments for the shoes in American money amounted to $1,308,816.46.

On February 14, 1919, under and in pursuance of an Executive order dated January 26, 1918, the Federal Reserve Board issued the following regulation:

"Until otherwise instructed, the exportation or importation of Russian rubles or the transfer of funds for their purchase by 'persons' and 'dealers' in the United States as described under the Executive order of the President of January 26, 1918, is prohibited."

While nothing was stated in the Executive order or the regulation issued by the Federal Reserve Board as to the reason for the latter, it is well known that it was intended to prevent dealing in Russian gold rubles and Russian gold by persons in the United States, and to prevent the importation of Russian gold to be used in furtherance of Bolshevist

propaganda and also to insure the United States from any future difficulties arising from such importation, the source of the gold being unknown.

It is indeed exceedingly questionable whether it was intended to prevent the completion of business transactions which had been entered into by American firms in Russia prior to the issuance of the order in perfect good faith, and especially so when the transaction had been urged by representatives of the Government and companies had entered into transactions because thereof.

Upon receipt of the notice of deposit of the purchase price of the goods in Siberian banks the company requested those banks to exchange the rubles into United States dollars, but because of the order of the Federal Reserve Board of February 14, 1919, the Siberian banks were unable to buy American dollars for the company. The company then endeavored to sell at least some of these rubles to American institutions in Siberia, such as the Red Cross, the Y. M. C. A., and Army headquarters, but without success, as these institutions dealt with American banks exclusively. The National City Bank of New York and the Guaranty Trust Co. of New York, both of which had branches in Vladivostok, were eager to dispose of as many rubles as possible after the exchange was closed.

There was no way for the company to convert the rubles into dollars by purchasing Siberian products and selling them in America, as the Siberian Government had placed severe restrictions on exports of raw materials. Even had these restrictions not been placed it would have been next to impossible to concentrate the raw materials at seaports, as transportation facilities were impossible to obtain owing to the demoralization and disorganization of the Siberian railroads.

In addition to this, the Siberian government, which was friendly to the United States Government and desired to assist it in every way possible, issued a restriction, following the ruling of the Federal Reserve Board prohibiting ruble exchange, which allowed withdrawals from the banks only in the amount of 1,000 rubles per week.

Every legitimate effort was made by the company at this time to transfer the rubles into dollars, but it was unable to do so. The result was that the rubles had to remain and still remain in Russian banks, and in the meantime the depreciation in the value of rubles has reduced the amount to practically nothing, meaning a total loss to the company. The facts above recited clearly establish the fact that the company was not responsible for allowing the rubles to remain in Siberia.

After the efforts to exchange the rubles, as above set forth, proved futile the matter was presented by the company to the Federal Reserve Board and to the Department of State, both of which held the transaction was within the purview of the order of February 14, 1919, and that no relief could be granted the company.

You will observe that neither the Russian nor the Siberian Government had anything to do with the sale of these goods. They were sold directly to the Siberian population and paid for in full in rubles. It follows, therefore, that the company has no claim against the Russian Government. The goods were sold upon the special request and encouragement of the United States Government and through its agencies, but because of the regulations issued by the Federal Reserve Board later on the company was unable to obtain the proceeds of the sales in American dollars.

I am also advised that Mr. Postnikoff took up with Mr. Heid the matter of reimbursing the company out of the $5,000,000 above referred to, but was informed by Mr. Heid that the fund was not available, having been transferred for the improvement of the Eastern Chinese Railroad Co. and was being used for that purpose.

The International Manufacturers' Sales Co. of America was the only American concern which had time, owing to the short duration of the plan inaugurated by the Department of State, to comply with it and the invitation of the United States Government to aid the Siberian population and was the only American company that actually did so. The transaction was entered into wholly as a humanitarian one at the request of the United States Government. As before stated, the company arranged to and did sell the goods at a price which only covered expenses and was not intended to furnish it any profit. The Government assisted in the distribution of the goods and, therefore, under all the circumstances, the company naturally expected that the Government would assist in obtaining reimbursement if it was found necessary. There was, however, no contractual relation between the company and the United States Government by which the latter could be held to reimburse the company for the losses sustained. The obligation, therefore, is purely a moral one, and such relief as the company may obtain can only be had through an act of Congress.

As a result of its loss in this transaction the company was compelled to liquidate its indebtedness and to temporarily, at least, go out of business. Mr. Postnikoff has corresponded with the Department of State and the Federal Reserve Board in reference to the matter, and both branches of the Government have written him that while the spirit in which the company entered into and conducted the transaction was fully appreciated and sympathy expressed for the losses sustained, stated that they could not adjust the matter, as there was no legal liability on the part of the United States Government.

I have personally interviewed representatives of the Department of State and of the Federal Reserve Board, who were intimately connected with the matter, and have been assured by both that the facts as herein set forth are correct in every detail. In addition to this I have letters, affidavits, and other documents substantiating the facts, which I shall be very glad to present at the hearing before the committee on the bill, if such hearing is granted.

There is a wide scope of activity for a company such as the International Manufacturers' Sales Co. of America, and a great deal of benefit to the foreign trade of the United States might be derived from the resumption of its activities in foreign fields, greatly to be desired at this time. An adjustment of this claim would not only make good a wrong done to the company, but would put it on a sound financial basis again, where it would be able to resume the useful activities it enjoyed before the war and, through such activities, increase the output of something over a hundred factories which are owned by members of the company and which employ many thousands of people.

Thanking you very much for your consideration in this matter, and with personal regards, I remain,

Yours very sincerely,

A. L. THURMAN.

EXECUTIVE SESSION.

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session, the doors were reopened, and (at 9 o'clock and 42 minutes p. m.) the Senate, under the order previously made, took a recess until to-morrow, Tuesday, June 6, 1922, at 11 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate June 5 (legislative day of April 20), 1922.

FEDERAL TRADE COMMISSION.

Vernon W. Van Fleet, of Indiana, to be a member of the Federal Trade Commission, vice John Garland Pollard, term expired September 25, 1921.

APPOINTMENTS, BY TRANSFER, IN THE REGULAR ARMY.

ORDNANCE DEPARTMENT.

First Lieut. Allen Ferdinand Grum, Coast Artillery Corps, with rank from August 20, 1919.

SIGNAL CORPS.

Capt. Haskell Allison, Infantry, with rank from July 1, 1920.

AIR SERVICE.

First Lieut. John Kenneth Cannon, Infantry, with rank from July 1, 1920.

PROMOTIONS IN THE NAVY.

MARINE CORPS.

The below-named midshipman of the class of 1922, United States Naval Academy, to be a second lieutenant in the Marine Corps from the 3d day of June, 1922:

James Austin Stuart.

POSTMASTERS.

ARKANSAS.

Walter G. Baker to be postmaster at Peach Orchard, Ark. Office became presidential April 1, 1921.

Alice R. Beard to be postmaster at Gentry, Ark., in place of N. H. Mitchell. Incumbent's commission expired May 26, 1917.

ARIZONA.

William A. Fowler to be postmaster at Tombstone, Ariz., in place of P. A. Smith. Incumbent's commission expired January 24, 1922.

CONNECTICUT.

Paul N. Shailer to be postmaster at Chester, Conn., in place of E. W. Lewis, deceased.

FLORIDA.

Gillian A. Sandifer to be postmaster at Lake Helen, Fla., in place of E. M. Luffman, resigned.

ILLINOIS.

Ancel R. Dion to be postmaster at Clifton, Ill., in place of E. J. Berger, declined.

Susan Gilman to be postmaster at La Harpe, Ill., in place of J. V. Sperry. Incumbent's commission expired February 4, 1922.

LOUISIANA.

Edward J. Sowar to be postmaster at Norwood, La. Office became presidential January 1, 1921.

Cherie Cazes to be postmaster at Port Allen, La. Office became presidential October 1, 1920.

MAINE.

Carroll H. Clark to be postmaster at Ogunquit, Me., in place of F. R. Brewster. Incumbent's commission expired March 16, 1921.

MISSISSIPPI.

Benson L. Myers to be postmaster at West Point, Miss., in place of B. Y. Rhodes. Incumbent's commission expired January 24, 1922.

MISSOURI.

Eros S. Bradley to be postmaster at Frankford, Mo., in place of Edgar Jones, removed.

Robert W. Evens to be postmaster at Herculaneum, Mo., in place of J. J. W. Donnegan. Incumbent's commission expired April 6, 1922.

MONTANA.

Cornelius T. Hansen to be postmaster at Big Sandy, Mont., in place of C. H. Baker. Incumbent's commission expired April 30, 1922.

NEBRASKA.

Virgil E. Barker to be postmaster at Newport, Nebr. Office became presidential January 1, 1921.

Verne W. Langford to be postmaster at Laurel, Nebr., in place of J. R. Durrie, resigned.

Floyd Buchanan to be postmaster at Silver Creek, Nebr., in place of E. M. Guthrie. Incumbent's commission expired May 25, 1922.

NEW YORK.

Vernon E. Taylor to be postmaster at Lima, N. Y., in place of M. J. Lockington, resigned.

Arthur E. Brundage to be postmaster at Newburgh, N. Y., in place of J. J. Peake. Incumbent's commission expired March 22, 1920.

Augustus P. Altemeier to be postmaster at Port Jervis, N. Y., in place of J. P. Gillen. Incumbent's commission expired March 22, 1920.

NORTH CAROLINA.

Ira L. McGill to be postmaster at Lumberton, N. C., in place of D. D. French, resigned.

OKLAHOMA.

Earl T. Hall to be postmaster at Fargo, Okla. Office became presidential October 1, 1920.

Wilson W. Howe to be postmaster at Pershing, Okla., in place of A. C. Whitaker, resigned.

OREGON.

James D. Fay, to be postmaster at Gold Beach, Oreg. Office became presidential April 1, 1921.

PENNSYLVANIA.

Herbert H. Park to be postmaster at Gibsonia, Pa. Office became presidential April 1, 1920.

J. Richard Duncan to be postmaster at Heilwood, Pa. Office became presidential October 1, 1920.

John Itzel to be postmaster at Salina, Pa. Office became presidential January 1, 1921.

Mary E. Healy to be postmaster at Drexel Hill, Pa., in place of E. C. Eichholtz, declined.

J. Howard Gawthrop to be postmaster at Kennett Square, Pa., in place of E. S. Taylor. Incumbent's commission expired February 4, 1922.

PORTO RICO.

Leonidas M. Lopez to be postmaster at Camuy, Porto Rico. Office became presidential July 1, 1921.

Gaspar Ferran to be postmaster at Barceloneta, Porto Rico, in place of P. M. Rivera, resigned.

SOUTH DAKOTA.

Frank C. Clegg to be postmaster at St. Lawrence, S. Dak., in place of G. A. Frederickson, declined.

TENNESSEE.

Thomas E. Tipler to be postmaster at Grand Junction, Tenn., in place of R. H. Hurst, deceased.

TEXAS.

James H. Loyd to be postmaster at Alba, Tex., in place of H. J. Caldwell, resigned.

William A. White to be postmaster at Cleveland, Tex., in place of R. E. Cherry, resigned.

Mayo McBride to be postmaster at Woodville, Tex., in place of A. H. Hughes, resigned.

UTAH.

Stephen F. Stephensen to be postmaster at Riverton, Utah. Office became presidential January 1, 1922.

VIRGINIA.

William P. Moorman to be postmaster at New Canton, Va. Office became presidential April 1, 1921.

William B. Dew to be postmaster at Sweet Briar, Va., in place of W. B. Dew. Incumbent's commission expired January 18, 1921.

WASHINGTON.

Walter J. Hunziker to be postmaster at Langley, Wash. Office became presidential January 1, 1921.

Alfred R. Bramer to be postmaster at Marlin, Wash. Office became presidential April 1, 1921.

WISCONSIN.

William H. Zuehlke to be postmaster at Appleton, Wis., in place of Gustave Keller. Incumbent's commission expired January 24, 1922.

WYOMING.

David Miller to be postmaster at Cumberland, Wyo. Office became presidential October 1, 1921.

CONFIRMATIONS.

Executive nominations confirmed by the Senate June 5 (legislative day of April 20), 1922.

UNITED STATES MARSHAL.

Frank T. Newton to be United States marshal, eastern district of Michigan.

PROMOTIONS IN THE ARMY.

OFFICERS' RESERVE CORPS.

To be brigadier generals.

Henry Lewis Stimson.
Edward Caswell Shannon.

ADJUTANT GENERAL'S DEPARTMENT.

To be colonels.

Joseph Wheeler, jr.
Charles Higbee Bridges.
Ralph Brewster Parrott.

To be lieutenant colonels.

George Luther Hicks.
David Yulee Beckham.
John Fleming Clapham.

To be majors.

Stuart Ainslee Howard.
Hugh Lawson Walthall.
John Buchanan Richardson.
Clarence Andrew Mitchell.
William Torbert MacMillan.
Henry Newbold Sumner.
James Sylvester Mooney.
Walter Cyrus Gullion.
Frank Cornelius Reilly.

To be captain.

Charles Clement Quigley.

POSTMASTERS.

ARIZONA.

Elfreda M. McIntyre, Gila Bend.
Samuel Simpson, Sonora.

ARKANSAS.

James H. Johnson, Atkins.
Perry W. Hampton, Glenwood.
Charlie C. Cherry, Hoxie.
Robert E. Love, Hughes.
Maie Pierce, Manila.
Isaac J. Morris, Mountain Home.
Herschel Neely, Paragould.
Hubert C. Hallowell, Pocahontas.

CALIFORNIA.

Frances L. Musgrove, Arbuckle.
Fred A. Lindley, Pismo.

MINNESOTA.

Arthur L. Hamilton, Aitkin.
Asa R. Woodbeck, Brookpark.
Marie D. Anderson, Carlos.
Emil Kukkola, Finlayson.
Lawrence J. Nasett, Robbinsdale.
Harry M. Logan, Royalton.
Irving J. Jandro, Waverly.

NEW YORK.

William J. Pike, Sanborn.

OREGON.

Henry Scott, Jordan Valley.

PENNSYLVANIA.

Emery E. Thompson, Elizabeth.
William H. Scholl, Hellertown.
Albert D. Karstetter, Loganton.
Leon M. Cobb, Mount Pocono.

SOUTH CAROLINA.

Ralph W. Wall, Campobello.

TEXAS.

Claud C. Morris, Rosebud.
Clinton J. Farrell, Vernon.

VIRGINIA.

Miriam S. Yates, Brookneal.
Rufus P. Custis, Eastville.
Annie G. Davey, Evington.
Missouri S. Harmon, Melfa.
Mollie H. Gettle, Rustburg.
Ethel V. Vaughan, Timberville.

HOUSE OF REPRESENTATIVES.

MONDAY, *June 5, 1922.*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Our Father in heaven, Thou hast withheld no good thing from us. We thank Thee for Thy love, which is with us at the break of day and remains with us through the dark of night. Surely Thou dost remember us according to the multitude of Thy memories; they explain the divine estimate of man. Whatever the day's tasks, duties, or privileges may be, remove our imperfect views of them. O let us get our wisdom and strength from behind the veils of force and sense. Help us to spend nobly, wisely, and well the hours that await us. In Thy name. Amen.

The Journal of the proceedings of Saturday was read and approved.

UNANIMOUS CONSENT CALENDAR.

The SPEAKER. The business on the Unanimous Consent Calendar is in order, and the Clerk will call the calendar.

AMENDING SECTIONS 5549–5550, REVISED STATUTES.

The first business in order on the Unanimous Consent Calendar was the bill (S. 1010) to amend sections 5549 and 5550 of the Revised Statutes of the United States.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. WALSH. Mr. Speaker, reserving the right to object, I ask that this may be passed without prejudice.

The SPEAKER. The gentleman from Massachusetts asks unanimous consent that this bill be passed without prejudice. Is there objection?

Mr. STAFFORD. Mr. Speaker, reserving the right to object, can the gentleman give any assurance when this bill will be considered on the Unanimous Consent Calendar otherwise?

Mr. WALSH. It is on the calendar a little farther down. There is no objection to its being stricken off, but there are some amendments, I understand, and the gentleman from Georgia is very much interested in the measure and is absent on account of illness, and I think out of courtesy to him we might permit the matter to be passed without prejudice.

The SPEAKER. Is there objection to passing the bill without prejudice? [After a pause.] The Chair hears none.

ENROLLED BILLS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. RICKETTS, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States for his approval the following bills:

H. R. 241. An act to authorize the Secretary of War to grant a perpetual easement for railroad right of way and a right of way for a public highway over and upon a portion of the military reservation of Fort Sheridan, in the State of Illinois;

H. R. 10925. An act to authorize the Secretary of War to sell real property known as the Pittsburgh storage supply depot, at Pittsburgh, Pa.;

H. R. 11408. An act granting the consent of Congress to the county of Winnebago, and the town of Rockton, in said county, in the State of Illinois, to construct, maintain, and operate a bridge and approaches thereto across the Rock River, in said town of Rockton; and

H. R. 11409. An act granting the consent of Congress to the city of Ottawa and the county of La Salle, in the State of Illinois, to construct, maintain, and operate a bridge and approaches thereto across the Fox River.

FORT SABINE MILITARY RESERVATION, LA.

The next business in order on the Unanimous Consent Calendar was the bill (H. R. 10517) confirming and validating the title of certain purchasers from the State of Louisiana of certain lands formerly included in the Fort Sabine Military Reservation, in Cameron Parish, La., now abandoned.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. STAFFORD. Mr. Speaker, reserving the right to object, this is a rather important bill, especially important in view of the decision of the Supreme Court, which held that the State of Louisiana had no right whatsoever to the land on this abandoned military reservation which this bill seeks to validate in the hands of private landholders, and I think it should be objected to unless a very full explanation can be made.

Mr. LAZARO. Mr. Speaker, I ask the gentleman to reserve his objection until the gentleman from Texas [Mr. BOX], who is thoroughly familiar with this measure, can explain it, and if the explanation is not satisfactory to the gentleman, then he will see what we can do. I feel this is a clear bill and a meritorious measure, and I hope the gentleman will not object after he has heard the explanation.

Mr. BOX. Is there any particular feature which the gentleman desires to hear about? Is there any question he has in mind?

Mr. STAFFORD. I have read the report, particularly the explanation contained in the detailed review by the Secretary of the Interior as to the rights of these persons to this land. It is clear from the statements in this report that the State of Louisiana at no time ever had title to any land on the Fort Sabine Military Reservation. Certain persons entered upon it and obtained some title through the State perhaps, others did not obtain any title whatsoever, and now it is sought to validate the title. Why should we surrender valuable lands to private persons under those circumstances?

Mr. BOX. Is there any special feature of the title which the gentleman from Wisconsin does not understand or finds objectionable? The gentleman will understand that this is a Louisiana land matter. The bill as presented to the House was written by the Secretary of the Interior as an amendment to the measure offered by the gentleman from Louisiana [Mr. LAZARO]. My understanding of the record and of the entire title is not as complete as I would like to have it.

I have gone through the record a number of times and the case presented itself to me as one of merit. It seems the grant of these lands made by the Government in 1849 would have included the Fort Sabine Military Reservation but for the fact the lands were then within a military reservation.

Mr. STAFFORD. Permit me to take issue with the gentleman's position in that regard, because the Supreme Court——

Mr. BOX. The gentleman from Texas said that under the act of Congress passed in 1849 the title to these lands would have passed but for the fact that they were within the Sabine Military Reservation. When that reservation was abandoned they were listed by the Commissioner of the General Land Office as belonging to the State of Louisiana. Patents were issued by the State of Louisiana to many of the lands on the theory that the title had in fact passed to the State, making good the title granted by her. The Secretary of the Interior, the State of Louisiana, and the purchasers of the lands for many years treated the title as valid. Taxes were paid on the lands or many of them, and all, or nearly all, concerned assumed that the title issued by the State of Louisiana was in all respects valid. This view was held and acted upon for many decades, and the reversal of it by the Secretary of the Interior in 1904 came more than a generation after the origin of the title. I think the chairman of the Committee on Public Lands is fully familiar with the details of the title. The committee unanimously agreed that the bill was one of merit and that, as recommended by the Secretary of the Interior, it ought to pass.

Mr. SINNOTT. Mr. Speaker, if the gentleman will yield, the matter is a very simple one. When Louisiana first applied for this land in list No. 4, back in the fifties, the department held that the State had no right to the land because the land was embraced in the Fort Sabine Military Reservation. Then in 1871 Fort Sabine Military Reservation was abandoned by an act of Congress. Then the State of Louisiana claimed the land on the theory that the swamp land act attached after the abandonment of the military reservation. The Department of the Interior held with the contention of the State of Louisiana and approved list No. 26 and list No. 51, embracing all these lands.

Now, that approval remained undisturbed for nearly 10 years. In the meantime these additional people purchased the land. Some of the purchases had been made prior to 1895 and some since, these people paying the taxes upon the land during all this time. Then, in 1905, the Secretary of the Interior reversed the ruling in favor of the State. The State of Louisiana appealed the case to the United States Supreme Court, and in 1908 that court decided that the approval of lists 26 and 51, embracing all of this land, was invalid. However, the Supreme Court did not decide another question in the case. If this matter were in court the State of Louisiana could plead the statute of limitations, on the theory that the approval in 1894 and 1895 of these two lists by the Secretary of the Interior was tantamount to a patent to the State. Now, we have this situation——

Mr. STAFFORD. There would not be very much strength to that contention, because the statute does not run to any Government property.

Mr. SINNOTT. It does.

Mr. STAFFORD. It does not in the State of Wisconsin.

Mr. SINNOTT. It does in Wisconsin and in every other State, so far as setting aside a patent is concerned. What the Supreme Court had to say is on page 4 of the report. It says:

The only doubt is raised by the statute limiting suits by the United States to vacate patents to five years.

Now, I do not know how the United States would fare if it endeavored to oust these people. They could plead the statute of limitation. However, they can not commence an action against the United States.

Mr. STAFFORD. The United States did not grant any patent whatsoever to these lands.

Mr. SINNOTT. They granted what the Supreme Court has repeatedly held to be tantamount to a patent, the approval by the proper officials of a certified list to the land. But apart from that, as to the equities——

Mr. STAFFORD. Will the gentleman permit as to the equities? There may be considerable equity as to the land sold by the State of Louisiana prior to the ruling by the Department of the Interior of June 6, 1904, reversing its earlier decision. As to the amount of land entered or sold or squatted upon since 1904, when the Department of the Interior determined that these lands were not swamp lands, is another matter. How much acreage is involved in such later transaction?

Mr. SINNOTT. The report of the Secretary of the Interior states that Louisiana appears to have patented a portion of these lands as late as May 19, 1904. We have not the definite data upon that.

Mr. STAFFORD. Prior to June 6, 1904, the total acreage of lands affected by this act was 6,910 acres. At the present time it runs into many thousands more.

Mr. SINNOTT. From where is the gentleman reading?

Mr. LARSEN of Georgia. I do not think there have been any lands squatted on since that date, but I think the land has been transferred from one party that held the land to another.

Mr. SINNOTT. No squatter can obtain any rights under this bill. The only one who can obtain any rights is some one, or his assigns, who has obtained a title from the State of Louisiana.

Mr. STAFFORD. Mr. Speaker, I had some question as to the rights of the persons who had taken land since the Secretary of the Interior reversed the decision of the Land Commissioner in 1905. If the act does not apply to any entries or sales since that date, I withdraw my reservation of objection.

Mr. WILSON. The gentleman will notice what the Secretary says, that if this had been made before the decision was known it would be on the same basis. The Secretary says that.

Mr. STAFFORD. That is what I wish to have the assurance on, because I do not think they would have any equity at all if they had taken it with notice after the decision was made.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the title of all persons, their heirs or assigns, who have heretofore purchased from the State of Lousiana any lands formerly included in what was known as the Fort Sabine Military Reservation, in Cameron Parish, in the State of Louisiana, established by Executive order of December 20, 1838, and abandoned March 25, 1871, pursuant to the act of Congress of February 24, 1871, and who claim or hold under patents, awards, entries, or other character of title from the State of Louisiana, be, and the same is hereby, confirmed and made valid as against any claim or right of the United States therein or thereto; except that fractional section 32 in township 15 south, range 15 west, used by the United States for lighthouse purposes, is excluded from the provisions hereof.

Also the following committee amendment was read:

Strike out all after the enacting clause and insert:

"That subject to the provisions of this act the title of all persons who prior to January 1, 1909, purchased from the State of Louisiana any lands formerly included in what was known as the Fort Sabine Military Reservation, in Cameron Parish, in the State of Lousiana, established by Executive order of December 20, 1838, and abandoned March 25, 1871, pursuant to the act of Congress of February 24, 1871 (16 Stat. L., p. 430), shall be confirmed and validated against any claim or interest of the United States: *Provided*, That satisfactory evidence of such purchase, with description of the lands claimed by each applicant, in accordance with the system of United States public-land surveys, be submitted to the Secretary of the Interior within six months from and after the approval of this act: *Provided further*, That patents shall issue to such purchasers and shall inure to the benefit of their heirs, assigns, or devisees, to the same extent and as if such purchasers had secured full title from the State of Louisiana through such purchasers: *And provided further*, That section 32, in township 15 south, range 15 west, Louisiana meridian, used by the United States for lighthouse purposes, shall be excepted from the provisions hereof.

"SEC. 2. That the lands within the limits of such abandoned military reservation not affected by the foregoing provisions of this act shall be disposed of under the provisions of the act approved July 5, 1884 (23 Stat. L., p. 103)."

The SPEAKER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended to read as follows: "A bill providing for the confirmation of title of certain purchasers from the State of Louisiana of lands formerly included in the Fort Sabine Military Reservation, in Cameron Parish, La., now abandoned."

On motion of Mr. LAZARO, a motion to reconsider the vote by which the bill was passed was laid on the table.

MAILS FOR THE BLIND.

The next business in order on the Calendar for Unanimous Consent was the bill (H. R. 10496) to provide for the free transmission through the mails of certain publications for the blind.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. WALSH. Mr. Speaker, I ask unanimous consent that the bill be passed without prejudice.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

HOSPITAL SERVICES AND SUPPLIES, WORLD WAR VETERANS.

The next business in order on the Calendar for Unanimous Consent was House Joint Resolution 313, providing for the disposal of articles produced by patients in the United States Veterans' Bureau.

The SPEAKER. Is there objection to the present consideration of the resolution?

Mr. STAFFORD. Mr. Speaker, reserving the right to object, when this bill was last under consideration I suggested an amendment to have it extend to all governmental institutions. I was speaking with the chairman of the committee since the bill was last considered, and he said he could not see that there would be any objection to the amendment I suggested. Has the gentleman, since the consideration of this bill, obtained any further information as to the merits of the proposition I suggested?

Mr. PARKER of New York. I wish to state to the gentleman that I had this matter up with the Veterans' Bureau, and they thought that the bill was broad enough to cover every one of the patients that were being treated by the Veterans' Bureau in any hospital. That was the interpretation put upon the bill by the department.

Mr. STAFFORD. May I inquire who gave the gentleman that information?

Mr. PARKER of New York. Yes. It came from Colonel Forbes's office.

Mr. STAFFORD. I wish to say to the gentleman that from my acquaintance with the supervision of veterans in the hospitals under the jurisdiction of the Board of Managers of the National Home for Disabled Volunteer Soldiers the board has exclusive jurisdiction as to their care and maintenance. They receive an allotment of funds from the Veterans' Bureau, and then the care and control are entirely under the jurisdiction of the Board of Managers.

Mr. PARKER of New York. Mr. Speaker, I think if the gentleman will read that bill carefully he will find that this covers every single patient under the control of the Veterans' Bureau. Let me say to the gentleman that this power is held by a statute to be conferred upon the Public Health Department.

Mr. STAFFORD. I am fully acquainted with that. That was all gone over the last time.

Mr. PARKER of New York. These boys are principally mental cases.

Mr. STAFFORD. Mr. Speaker, with the statement of the gentleman in charge that in the opinion of some one in the Veterans' Bureau this applies to all veterans, whether they are under the direction of the Veterans' Bureau or supervision of the Board of Managers of Soldiers' Homes, I will withdraw my reservation.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

Resolved, etc., That the Director of the United States Veterans' Bureau is authorized to make regulations governing the disposal of articles produced by patients of such bureau in the course of their curative treatment, either by allowing the patients to retain the same

or by selling the articles and depositing the money received to the credit of the appropriation from which materials for making the articles were purchased.

The SPEAKER. The question is on the engrossment and third reading of the House joint resolution.

The House joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. PARKER of New York, a motion to reconsider the vote whereby the joint resolution was passed was laid on the table.

The SPEAKER. The Clerk will report the next bill.

RURAL DELIVERY SERVICE.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 7544) authorizing the Postmaster General to temporarily reduce the pay of rural carriers for disciplinary purposes instead of suspending them without pay.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of this bill?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the Postmaster General be, and he is hereby, authorized in his discretion, whenever for disciplinary purposes he deems it advisable to do so, to reduce temporarily the pay of rural carriers: *Provided*, That in no case shall such a reduction in pay be of more than one grade as fixed by the act of June 5, 1920, nor extend over a greater period of time than one year.

The SPEAKER. The question is on the engrossment and third reading of the bill.

Mr. WALSH. Mr. Speaker, I desire to ask the gentleman in charge of the measure a question. In just what way is this to be a substitute for discipline now imposed by the Post Office Department?

Mr. STEENERSON. The only remedy now in the case of a carrier who is negligent is to suspend him without pay; but in many instances the fault is not conceded to justify that, and by reducing his pay it is believed he will remember it the next time. It was thought advisable to have this substitute.

Mr. WALSH. It would still leave the discretion to suspend him without pay, and this is an additional remedial measure?

Mr. STEENERSON. Yes.

Mr. WATSON. Mr. Speaker, will the gentleman yield?

Mr. STEENERSON. Yes.

Mr. WATSON. When a carrier is suspended without pay is there difficulty in obtaining a substitute temporarily?

Mr. STEENERSON. In many cases there is.

Mr. WATSON. Then this is intended to rectify that?

Mr. STEENERSON. Yes. This is an additional reason. Nobody has objected to it from any source.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. STEENERSON, a motion to reconsider the vote whereby the bill was passed was laid on the table.

SESQUICENTENNIAL EXHIBITION IN PHILADELPHIA.

Mr. BLAND of Indiana. Mr. Speaker, I move to suspend the rules and pass House Joint Resolution 170, with amendments thereto, together with an amendment of the title.

The SPEAKER. The gentleman from Indiana moves to suspend the rules and pass the resolution which the Clerk will report.

The Clerk read as follows:

Joint resolution (H. J. Res. 170) to approve the holding of a national and international exhibition in the city of Philadelphia in 1926 as an appropriate celebration of the one hundred and fiftieth anniversary of the signing of the Declaration of Independence.

Whereas preliminary steps have been taken by the mayor and council and a citizens' committee of Philadelphia to celebrate in that city in 1926 the one hundred and fiftieth anniversary of the signing of the Declaration of Independence by holding an exhibition in which it is expected that the various States of the Union, the Federal Government, and all the nations of the world will be represented; and

Whereas the Legislature of the Commonwealth of Pennsylvania unanimously passed a resolution April 28, 1921, that the Commonwealth should prepare for and participate in such sesquicentennial celebration by making a suitable exhibit therein on the part of the Commonwealth, and requested that the Federal Government should approve the holding of such an exhibition in Philadelphia in 1926 and that appropriate steps should be taken to invite the participation and cooperation of the States of the Union and the nations of the world; and

Whereas the Governor of the Commonwealth of Pennsylvania, in the name and by the authority of that Commonwealth, has issued letters patent incorporating the Sesquicentennial Exhibition Association, May 9, 1921, for the purpose of educating the public by exhibiting artistic, mechanical, agricultural, and horticultural products and providing public instruction in the arts and sciences, thereby celebrating the one hundred and fiftieth anniversary of the signing of the Declaration of Independence by holding in the city of Philadelphia, in the State of Pennsylvania, an exhibition of the progress of the United States in art, science, and industry, in trade and commerce, and in the development of the products of the air, the soil, the mine, the forest, and the seas, to which exhibition the people of all other nations shall be invited to contribute evidences of their own progress to the end that better international understanding and more intimate commercial relationships may hasten the coming of universal peace: Therefore be it

Resolved, etc., That the holding of a national and international exhibition in the city of Philadelphia in 1926 upon the Fairmount Park and parkway site selected by the Sesquicentennial Exhibition Association and lands contiguous thereto which may be acquired for that purpose be approved as an appropriate celebration of the one hundred and fiftieth anniversary of the signing of the Declaration of Independence, and that such steps be taken as the President may deem proper to invite the participation and cooperation of the States of the Union and the nations of the world.

SEC. 2. That a copy of this resolution be forwarded to all the States of the Union requesting cooperation upon their part.

Mr. WALSH. Mr. Speaker, I ask unanimous consent that the amended title be read in lieu of the one reported.

The SPEAKER. The gentleman from Massachusetts asks that the amended title be read in lieu of the one reported. Is there objection?

There was no objection.

The Clerk read as follows:

Joint resolution to approve the holding of a national and international exhibition in the city of Philadelphia in 1926 upon the Fairmount Park and parkway site selected by the Sesquicentennial Exhibition Association, and lands contiguous thereto that may be acquired for that purpose, as an appropriate celebration of the one hundred and fiftieth anniversary of the signing of the Declaration of Independence.

The SPEAKER. Is a second demanded?

Mr. LANHAM. I demand a second.

Mr. WALSH. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. WALSH. Is the gentleman from Texas opposed to the bill?

Mr. LANHAM. I am not.

Mr. WALSH. I was wondering if there is no opposition why it is necessary to consume time on it.

Mr. LANHAM. I will say to the gentleman that I do not propose to take the 20 minutes to delay the passage of the resolution, but simply to make an explanation of it if it becomes necessary.

The SPEAKER. The gentleman from Texas demands a second.

Mr. BLAND of Indiana. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

The SPEAKER. The gentleman from Indiana asks unanimous consent that a second be considered as ordered. Is there objection?

There was no objection.

Mr. BLAND of Indiana. Mr. Speaker, I do not think it is necessary to make a detailed explanation of the details of the resolution.

Mr. HICKS. Mr. Speaker, will the gentleman yield?

Mr. BLAND of Indiana. Yes.

Mr. HICKS. I could not hear from the reading of the resolution any of the detailed items. It carries no appropriation?

Mr. BLAND of Indiana. This bill merely sanctions the holding of a sesquicentennial exhibition at Philadelphia, in Fairmount Park, in 1926.

I will state to the House that this Fairmount Park site was the site where the first national exposition was held in the United States in 1876. The one hundred and fiftieth anniversary of the signing of the Declaration of Independence is certainly a great date in American history, and it is entirely fitting, in view of our habit of celebrating these great events, that on this occasion the Federal Government give its sanction to a national and international celebration of this event in that State.

Of course, there is no controversy as to the place to hold the exhibition because Philadelphia is the place where the Declaration of Independence was signed; it was there where this the greatest Government man ever devised first was conceived and put into existence to bless the world. The city of Philadelphia has appropriated $5,000,000 and as much more as may be necessary to pay the expenses of this exhibition; also the State Legislature of Pennsylvania has approved it and passed memorials favoring it, and there is no doubt but that the great State of Pennsylvania will come forward with any finances that are necessary to take care of the exhibition. I am not saying it will not be necessary, possibly sometime in the future, for the Federal Government to spend some money in order that it may make a showing on this great occasion. I believe it will be necessary to do so, and I would not want the House to understand me as saying that there will not be a demand at some time for the expenditure of some money. But I do not believe there will be a demand for any great amount of money, like the sums expended on some expositions in the years gone, because I do feel that this exposition is going to be

financed splendidly by the great city of Philadelphia and the State of Pennsylvania.

Mr. WALSH. Will the gentleman yield?

Mr. BLAND of Indiana. I yield to the gentleman from Massachusetts.

Mr. WALSH. Is not the purpose of this resolution to furnish the basis for authorizing an appropriation by the Federal Government to participate in the exposition later on?

Mr. BLAND of Indiana. Of course, the purpose of this resolution is to authorize the President to invite the nations of the world to attend, and to invite the States of the Nation to participate. It is to give a national approval to an international exposition. If the United States did not sanction the Philadelphia sesquicentennial we could not expect the nations of the world outside of the United States to take much part in it, and it is certainly proper and wise that we give our consent. I will say in answer to the gentleman's question that this, of course, commits us to the proposition that we are behind this sesquicentennial exposition to make it a success; but that does not mean that we pledge any great appropriation. In the hearings on this bill it was definitely understood that this resolution should not obligate the Committee on Industrial Arts and Expositions or the Congress to stand for any appropriation at all in the future, although it is my personal opinion that we should have an appropriation, and no doubt will have one, for exposition purposes.

Mr. GARRETT of Tennessee. The gentleman will agree, of course, that if this resolution passes, the next Congress will appropriate money in any reasonable sum that may be demanded.

Mr. BLAND of Indiana. I am of the opinion that this Congress may be asked for some appropriation.

Mr. GARRETT of Tennessee. And, therefore, I do not think we ought to pass this bill at this time.

Mr. BLAND of Indiana. For instance, if the minority leader will permit, it is essential in my judgment for the United States to have there exhibits of its mining and agriculture, and of its great inventions and marvelous industrial progress. If the gentleman will recall, the Bell telephone came out of the centennial of 1876. The gentleman will recall that since 1776 the steamboat, the railroad, and all modern means of transportation and communication have been invented and developed.

Some of the greatest developments of industry in the world came from the Centennial Exposition in 1876. It is certainly appropriate that this great Government should take a prominent part, and we may not hope to escape paying something for the part which we take. I want to be frank with the House.

Mr. KING. Will the gentleman yield?

Mr. BLAND of Indiana. Yes.

Mr. KING. What will be the features of internationalism that will be celebrated at this exposition?

Mr. BLAND of Indiana. I take it that the gentleman is fairly familiar with most of the international expositions which have been held, and is also fairly familiar with the different things which they have exhibited at those places.

Mr. KING. Does the gentleman think it will be the means of propagating the further development of the League of Nations?

Mr. BLAND of Indiana. I do not think so and certainly do not hope so.

Mr. KING. I am asking in good faith whether the gentleman has any information about that.

Mr. BLAND of Indiana. Oh, no; it is to celebrate the industrial and historical achievements of the nations of the world. The holding of expositions, if properly and wisely held, can be defended from a financial standpoint. It is a good investment, and certainly in this instance it can be defended from a sentimental standpoint. We need a little more of the spirit of '76 in these troublesome days. We have not had a national celebration for many years. In my judgment there is no better way to promote peace and encourage progress after the devastation of the Great War than to gather together the nations of the world to compare in friendly rivalry the achievements of the world in the arts of peace. [Applause.]

Mr. FESS. Will the gentleman yield?

Mr. BLAND of Indiana. Yes.

Mr. FESS. I notice on page 4 of the report, quoting from the president of this exposition association, he says—

> In 1776 there were 10,000,000 people in this country that spoke the English language.

There were only 3,000,000 all told. What does that statement mean?

Mr. BLAND of Indiana. I do not know. The president of the exposition association made a very eloquent speech, and is a well-informed gentleman, but I will not answer for the accuracy of his figures.

Mr. MONDELL. Perhaps he meant 10,000,000 English-speaking people in the whole world.

Mr. FESS. That may be true.

Mr. BLAND of Indiana. That is evidently what he meant, and he may have been reported erroneously.

Mr. MONDELL. Although I think that was an understatement.

Mr. LEHLBACH. May he not have meant, although there were only 3,000,000 white settlers in this country at the time of the Declaration of Independence, to have included the Indians as well?

Mr. FESS. No; he did not mean that, either.

Mr. MONDELL. Will the gentleman yield?

Mr. BLAND of Indiana. I will gladly yield to the majority leader.

Mr. MONDELL. I assume that we all understand that by giving national sanction to this exposition we shall be expected at the proper time to make whatever appropriations may be necessary for a Government exhibit at this exposition.

I think we all realize that that will be the outcome. The Government will certainly desire to make an exhibition at this very splendid exposition to be. At the same time the passage of the resolution, I am sure, does not bind the Government or this Congress or anyone to vote for any appropriation of expenditure for buildings or for a cash contribution to the exposition. The last great exposition in San Francisco, the only contribution that the Government made, as I recall, was a contribution for the exhibition. The people of San Francisco and California furnished the buildings and we did furnish the exhibits and cared for them. That certainly would be within reason by the passage of this resolution pledging that far. I hope and trust that the resolution pledges us no further, and I feel confident that the great State of Pennsylvania and the great city of Philadelphia will not ask the Government to do more than in every way encouraging the exhibition, giving it a national standing in the world, and making a first-class exhibition there, and making it a success.

Mr. JOHNSON of Mississippi. Will the gentleman yield?

Mr. BLAND of Indiana. Yes.

Mr. JOHNSON of Mississippi. How much has the Legislature of Pennsylvania appropriated?

Mr. BLAND of Indiana. They have not been called upon to appropriate anything yet. They have passed a strong memorial, and I have had assurance from some of the leading men of Pennsylvania stating that the legislature, when it meets, would be glad to contribute anything necessary to make it a success. Philadelphia is one of the richest cities in the world. They have the most beautiful spot on earth in which to hold the exhibition, and there is great enthusiasm for it there, and I have no doubt that this great city can finance it themselves. They did finance the other centennial, and that was the only one that was a financial success in the history of exhibitions. I am sure that this one will be a success and will be the greatest thing of the kind in all history. I do not mean to say by that that we should not spend any money. If I had my way, I would build a permanent building there which would be used to house the Government activities after the exhibition is over. It is to be held in the heart of the city where, to my mind, such a plan is practicable. But that is my individual idea only.

Mr. JOHNSON of Mississippi. I do not know anything about this except what I gather from some Philadelphians who talked to me at the hotel. They have told me that it was a land scheme; that certain gentlemen in Philadelphia have bought a lot of marsh land, filled it up with ashes, and so forth, and were promoting this as a land scheme.

Mr. BLAND of Indiana. I will answer the gentleman. I will say that Fairmount Park is owned by the city, every foot of it, and there could not be any land scheme in it. There are 4,000 acres in the park. There are places in the city where it is possible that it might have been held and where they would have to condemn private property, but this resolution makes it definite that it shall be held in Fairmount Park. Mr. Speaker, I reserve the balance of my time.

Mr. LANHAM. Mr. Speaker, this resolution turns our thoughts from war and the aftermath of war to a consideration of the pursuits of peace. Of course, it is natural that the people of Philadelphia should desire to celebrate in their city the one hundred and fiftieth anniversary of the signing of the Declaration of Independence. This desire on their part, I take it, is prompted by more than the mere wish that the people of this country should return the visit of the Liberty Bell.

Naturally such an exposition as that contemplated will arouse also a patriotic interest throughout our land. American reminiscence will properly be centered at that time in the City of Brotherly Love. The exposition will even take on an international aspect. It is this feature of it which calls specially for action by the Congress at this time, because certain preliminary steps must be taken in the matter of extending properly the invitation to the nations of the world. The resolution which is here presented makes proper provision in this regard.

The gentleman from Mississippi [Mr. JOHNSON] inquired of the gentleman from Indiana [Mr. BLAND], chairman of the Committee of the House on Industrial Arts and Expositions, whether or not this measure represented in essence some local land scheme designed to promote the sale of real property which otherwise could not find a profitable market. This is a natural solicitude and a pertinent inquiry. I wish to say in this connection that this measure as originally introduced was amended by the committee largely, if not primarily, to prevent any such contingency as that. The resolution provides in terms that this exposition be held upon the Fairmount Park and Parkway site selected by the Sesquicentennial Exposition Commission, and lands contiguous thereto which may be acquired for that purpose. All the lands which will be used belong to the city and may be utilized without the usual expense of purchase and without enhancing the value of any private property further than would be naturally incidental to the holding in that city of an exposition of this character. We have the assurance to this effect of prominent citizens and officers of the city of Philadelphia who appeared in person before the committee at the hearings.

Mr. GRAHAM of Illinois. Will the gentleman yield?

Mr. LANHAM. I will.

Mr. GRAHAM of Illinois. Was similar action taken by Congress in the case of the Buffalo, Omaha, and San Francisco Expositions?

Mr. LANHAM. I was not a Member of Congress at those times, and I can not speak definitely.

Mr. BLAND of Indiana. Substantially this action was taken by the Federal Government in all of those cases.

Mr. GRAHAM of Illinois. Did they participate in the expositions?

Mr. BLAND of Indiana. Yes; and contributed $10,000,000.

Mr. LANHAM. I thought the gentleman's question had reference to the designation of a site.

Mr. GRAHAM of Illinois. No. I want to know if Congress passed a similar resolution in the other cases. Does the gentleman from Tennessee know?

Mr. GARRETT of Tennessee. I do not, but I do not think that in any of those cases the Congress was called upon to give its approval to the site.

Mr. LANHAM. I will say to the distinguished gentleman from Tennessee that this site had already been selected by this commission upon land which the city owns, and, inasmuch as that fact precluded the possibility of any private exploitation of property, the committee thought it advisable to incorporate in the resolution the provision that the exposition be held upon that site.

Mr. GARRETT of Tennessee. I do not mean that it is a bad site, but in case of former expositions I do not know that the Congress was ever called upon to approve the site.

Mr. LANHAM. Originally it seems that many sites were proposed and their relative merits were considered by those in charge. A decision was reached and this Fairmount Park and Parkway site chosen. The mayor of the city of Philadelphia and many other leading and distinguished Philadelphians and Pennsylvanians attended the hearings and testified concerning its adequacy and availability. They stressed the fact that it is city-owned territory and that its use will involve no exploitation of private property.

Mr. BUTLER. Mr. Speaker, will the gentleman yield?

Mr. LANHAM. Yes.

Mr. BUTLER. My friend from Texas is very familiar with the history of the expositions approved by Congress and which have been held within the last 50 years. I think I have voted for resolutions somewhat similar to this in 8 or 10 instances—Charleston, I remember, and then the one at Norfolk, the Jamestown Exposition, Buffalo, San Francisco, St. Louis, Omaha, Chicago, and I think each resolution gave the affair a national character and international character as well. I know of a time when Congress withheld its approval. I hope for the success of the coming exposition, and I believe it is a good time for all the nations to meet in a common place and that place America, forgetting past differences. Come pay us a visit and leave their guns at home.

Mr. LANHAM. Mr. Speaker, I know that appropriations have been made for these various expositions and assume that those appropriations have been preceded by some such action as this on the part of Congress.

Mr. KING. Mr. Speaker, will the gentleman yield?

Mr. LANHAM. Yes.

Mr. KING. I think the gentleman ought to clear up the matter in regard to the contiguous territory adjoining Fairmount Park. What is the nature of that, and where is it?

Mr. LANHAM. The contiguous territory referred to is already owned by the city and is a part of Fairmount Park. In other words, the total area of Fairmount Park seems not to be required for the exposition. They want to get it within limits that will permit a spectator in a day's walk to get around reasonably well over the exposition territory.

Mr. WINGO. Mr. Speaker, if the gentleman will yield, I think the gentleman from Texas has forgotten that there is a strip of land across the river from Fairmount Park that is really part of it which the city is going to condemn and take anyway for public purposes.

Mr. BLAND of Indiana. They are condemning it now.

Mr. WINGO. They are condemning it at the present time, and they intend to use it as a park.

Mr. KING. The gentleman from Arkansas has no information that there will be any money made from that.

Mr. WINGO. Not any more than is possible, regardless of whether we passed this resolution or not. The city is paying for it and the proceedings have been started.

Mr. LANHAM. The city is going to acquire that property, regardless of whether we pass this resolution or not.

Mr. LAYTON. Then, as a matter of fact, the Congress does not have to appropriate a penny unless the city of Philadelphia and the State of Pennsylvania show that they come across adequately.

Mr. LANHAM. I will say to the gentleman that, in addition to the $5,000,000 which the city of Philadelphia has set apart for this purpose, their expenditures for a number of years have been in anticipation of this exposition. The city has put up many buildings and has improved and beautified the grounds in order that they might be adapted to this temporary purpose as well as to the permanent purpose for which they were constructed. But, in so far as a congressional expenditure is concerned, it was expressly stated by the members of this committee and understood by the gentlemen from Pennsylvania who appeared at the hearings that the favorable report and passage of this resolution would not be considered as entailing a moral obligation upon the part of Congress to authorize an appropriation for this exposition. An appropriation may be the natural and logical result, but it seems quite likely that a reasonable expenditure for an exposition which will attract the nations of the world may be expected to yield a very gratifying return. That, of course, is a matter for our future determination.

Mr. WATSON. Mr. Speaker, will the gentleman yield?

Mr. LANHAM. I will.

Mr. WATSON. As I understand this resolution, it is only asking Congress to give moral support.

Mr. LANHAM. That is all.

Mr. WATSON. Therefore, if any appropriations are made, they must be made by a future Congress.

Mr. LANHAM. Yes.

Mr. WATSON. I would say that while I am not from Philadelphia, I come from Pennsylvania, and I am quite sure that the Commonwealth of Pennsylvania will do its part. I am very anxious that the resolution should be agreed to.

Mr. LANHAM. Mr. Speaker, we have been given assurance by the gentlemen from Philadelphia and other parts of Pennsylvania that the Commonwealth of Pennsylvania will do its part. It has already sanctioned the exposition. Even if we should be called upon later to make some reasonable appropriation, though we do not regard this resolution as a moral obligation along that line, and so stated very frankly to the gentlemen who appeared before us, I think it would probably be returned manyfold to this country in the helpful association with peoples of other lands, in studying their exhibits and in fostering markets for our products in the other countries of the world. It seems to me that some international awakening now along the lines of the activities of peace may tend to revive our drooping foreign trade and prove very beneficial to this country and to the world. That subject has been in the minds and hearts of many of the most eminent statesmen of our Nation. It may be that through such promotion of friendly international relations and the display and encouragement of the arts and pur-

suits of peace we may come to some solution of the problems and difficulties which confront us in our foreign commerce.

Mr. Speaker, how much time have I remaining?

The SPEAKER. The gentleman has seven minutes.

Mr. LANHAM. I yield five minutes to the gentleman from Arkansas [Mr. WINGO].

Mr. WINGO. Mr. Speaker, this is the customary resolution authorizing the State Department to take formal steps to invite foreign nations to participate in this great exposition. Whether Congress wishes it or not the people of Philadelphia and Pennsylvania are going to celebrate the sesquicentennial of the Declaration of Independence. The city of Philadelphia has already appropriated $5,000,000, and pledged more. The fact that confronted the committee is that you are going to have a great exposition. Now, shall we follow the customary course or shall we say no, we will not do so in the case of Philadelphia? Now, something has been said about the House joint resolution as now printed, which carries with it the committee amendment definitely locating the site. Now, just let us be frank about it. The gentleman from Mississippi [Mr. JOHNSON] has called attention to a rumor that he has heard around here, that came to members of the committee. In exposition matters it is always charged that there is some kind or some sort of graft or something else about it. Now, the city of Philadelphia owns this Fairmount Park; that is, it is a public park while not technically owned by the city. It has contiguous territory for public purposes, and the committee to forestall any question of land speculation definitely located the fair on that site. It lies right at the heart of Philadelphia. The opening of the exposition grounds will be within a short distance from the heart of Philadelphia and its railroad stations. Now, there, right in the throat of that entrance, the people of Philadelphia are erecting an art museum that will be a permanent structure and one of the greatest buildings in the world. It will contain more concrete than the Panama Canal. Now, I think it is proper for us to authorize the Secretary of State to invite the other nations of the earth to come in and participate. While, of course, it is understood that we are under no moral obligation to make an appropriation there is no question whatever that we will at the right time make an appropriation. Now, that appropriation, of course, has to have the restrictions that have been placed on them heretofore. But nobody needs deceive themselves. We are going to make some appropriation, of course.

Mr. GARRETT of Tennessee. Will the gentleman yield?

Mr. WINGO. Yes.

Mr. GARRETT of Tennessee. The gentleman refers to the Secretary of State. I do not think the Secretary of State is mentioned in this joint resolution.

Mr. WINGO. Well, I had in mind——

Mr. GARRETT of Tennessee. "And that such steps be taken as the President may deem proper."

Mr. WINGO. That is the customary form, as I understand it, of such a resolution.

Mr. GARRETT of Tennessee. Well, may I ask the gentleman who is going to detail——

Mr. WINGO. Before we get away from the other, let me answer that. Of course, the language runs in the name of the President, but the Secretary of State is the proper person through whom the President acts in dealing with foreign nations.

Mr. GARRETT of Tennessee. Let me direct the attention of the gentleman to the last two lines of that section, page 3.

> Such steps be taken as the President may deem proper to invite the participation and cooperation of the States of the Union and the nations of the world.

That would seem to indicate the President is to invite the States.

Mr. WINGO. Yes.

Mr. GARRETT of Tennessee. Now, section 3, page 3, line 7, says:

> That a copy of this resolution be forwarded to all the States of the Union asking cooperation on their part.

Does that mean the Clerk of the House is to forward it or the President?

Mr. WINGO. No. I think the Secretary of State will forward it.

Mr. GARRETT of Tennessee. To the States?

Mr. WINGO. Secretary of State Hughes, I presume, will forward them to the governors of the different States. That would be the customary procedure to give each State notice officially of the resolution. That is in forwarding to them copies.

The SPEAKER. The time of the gentleman has expired.

Mr. WINGO. Will the gentleman yield me one minute?

Mr. LANHAM. I yield the gentleman two minutes.

Mr. WINGO. That is all there is to it. Gentlemen, of course, may be opposed to this and say that it is time for economy. These people are going to have this sesquicentennial. It was essentially the proper place for this particular character of celebration—the one hundred and fiftieth anniversary of the signing of the Declaration of Independence—and now shall we say that we will step out and let these people privately celebrate that great event in American history, or shall we take the customary steps and notify the nations of the earth and the States of the Union to participate and at the right time the United States will make an exhibition commensurate with the event as it has always done? That is the practical proposition that confronts us.

Mr. BUTLER. Will the gentleman yield?

Mr. WINGO. I yield.

Mr. BUTLER. Suppose that Congress should decline to approve this, then it would lose the great character that we desire to give it?

Mr. WINGO. I will say to my friend I do not think there is any possibility of that.

Mr. BUTLER. In order to make it a feature of our national life, of course Congress ought to approve it.

Mr. WINGO. Of course, when the appropriation comes in you are going to have your difficulties.

Mr. BUTLER. I want to say to my friend that I have voted for every appropriation of this kind, so far as I know.

Mr. McLAUGHLIN of Pennsylvania. Is it not a fact that in 1876 the money the Government loaned was repaid by the committee?

Mr. WINGO. I think it was. My opinion is that it stands out as a rare event in that regard.

Mr. DARROW. Mr. Speaker, I believe that no further argument is necessary to convince every Member of the House that this resolution should pass. In 1876 Philadelphia planned and carried through to a successful conclusion the first great exposition in the United States. Philadelphia set a world standard then which has been copied by other American cities. She now proposes to set a new standard and fittingly celebrate the one hundred and fiftieth anniversary of the signing of the Declaration of Independence. There is no question or dispute about the time and place. The Nation was born in Philadelphia. The declaration was signed there, and the old Liberty Bell that proclaimed the news still rests in Independence Hall. The First Congress met there. There is no other plan to hold the sesquicentennial.

The Centennial Exposition in 1876 was a financial success. It was also a great asset for the entire Nation. We propose to make the sesquicentennial to be held in 1926 the greatest international exposition the world has ever known. All that we are asking now is that you grant us the necessary recognition by the passage of this resolution.

There has been some discussion about the site. This resolution fixes the Fairmount Park and parkway site. Fairmount Park is one of the largest and most beautiful parks in the world. It covers over 4,000 acres and brings the fair to the very center of the city. This is all owned by the city of Philadelphia. The only additional ground to be used is a very small strip on the banks of the Schuylkill River, which is now being condemned for park purposes and to further beautify this wonderful site.

We do not ask for money now, but the time will come when Congress will be glad to avail itself of this great opportunity and make a liberal appropriation. We may have to restrain your generosity rather than beg for funds.

Nineteen hundred and twenty-six is far enough from the war to have healed many of the wounds of the war, but near enough to it to make the nations want to get together in amity and good will. It is proposed to make the fair educational and show the wonderful advancement in human endeavor during the past 50 years; in short, to make it the most attractive and greatest exposition the world has ever seen.

I hope the resolution will pass unanimously. [Applause.]

Mr. CONNOLLY of Pennsylvania. Will the gentleman yield for a question?

Mr. DARROW. I will.

Mr. CONNOLLY of Pennsylvania. Reference has been made to the State of Pennsylvania not offering any aid as yet. Is it not true that the legislature does not meet until next January?

Mr. DARROW. Yes; and the last legislature did approve and created a State commission to cooperate with a commission appointed by the city.

Mr. BLAND of Indiana. Mr. Speaker, I yield three minutes to the gentleman from Ohio [Mr. FESS].

Mr. FESS. Mr. Speaker, the sentiments just expressed by the gentleman from Indiana [Mr. FAIRFIELD] are my senti-

ments, and I wish to publicly indorse the proposal to assist in the celebration of this historic event.

I now wish to call attention to an item in the committee's report that I mentioned a moment ago as to the growth of the English-speaking population. The item states that in 1776 there were in the Colonies 10,000,000 people that spoke the English language. That, of course, is an error. I have read somewhere that when "Bobbie" Burns wrote there were 10,000,000 people who spoke the English language. I think that is a correct statement. The reports in 1801 show considerably less than that number in England and Wales. That was five years before the adoption of the Declaration of Independence. The remarkable fact is the growth of this language since that day, especially when compared with other languages. There are more than 150,000,000 people throughout the world who are to-day speaking the English language. It is heard in every civilized country in the world, including the islands of the sea. It is difficult to accurately state the number with any degree of exactness. One of the most remarkable observations to be made is in the Orient, where in various centers you can not only hear the English language spoken to-day, but you can read publications printed in English for perusal by the inhabitants, some of whom do not read the ancient language of their native country, while many of the educated natives have learned to both read and speak English.

The time is already here when English has not only become the commercial language of the world, but it is rapidly becoming the diplomatic language, and will continue to be more so as the days come and go.

Mr. BLAND of Indiana. Will the gentleman yield?

Mr. FESS. I yield.

Mr. BLAND of Indiana. I was interested in the gentleman's statement that there are only 150,000,000 people speaking the English language. It is fair to assume that there are 100,000,000 in the United States who speak it. Now, there are English-speaking people all over the world.

Mr. FESS. The gentleman's statement that there are 100,000,000 people in the United States speaking the English language is not correct.

Mr. BLAND of Indiana. If you mean speaking it correctly, of course that is true.

Mr. FESS. No; I do not mean speaking it correctly. There are many people in the United States who do not speak it in any form. That is one of the problems of the country which will ultimately be solved.

Mr. BLAND of Indiana. I have been told by the gentleman from Indiana [Mr. FAIRFIELD] that there are 10,000,000 of those.

Mr. FESS. However, the time will come, I will say to my friend, when there will not be many, if any, people in the United States who will not speak it. That result is assured through our common-school system. The growth of this language is one of the most phenomenal things, not only in the history of ethnology but in the history of civilization.

An ethnological map of the world will show English as the vernacular language in the British Isles, in all North America, Australia, New Zealand, and Southern Africa. It is the leading foreign language, or what might be styled as the second language in western Europe outside of the British Isles, Mexico, southern South America, portions of south and eastern Africa, and the oriental countries, including China and Japan. It is spoken to some extent, but not as a second language, in Russia, the Near East countries, India, west coast of South America, and the islands of the sea. It has really reached the "Seven Seas" of classical history. Its comparative growth compels admiration.

Reports by scholars show that in 1900 there were from 150,000,000 to 160,000,000 people speaking English. A conservative statement made not long ago asserts that more than 150,000,000 people speak the English, 120,000,000 the German, 90,000,000 the Russian, 60,000,000 the French, 55,000,000 the Spanish, and 40,000,000 of each Italian and Portuguese. When considered in percentage of growth, the English has surpassed all other languages. If the rate of growth since the year 1800 is continued, it is estimated that by the end of the present century there will be 1,100,000,000 people speaking the language.

In view of this expansion the question is at once raised whether English is to become a world language. Dr. Brander Matthews, one of the best authorities on the subject, believes that a world language may be possible. He also believes that it will not be either the French or the German. With him most of the scholars of the day agree. The French has had its chance and has failed. The German, although a very vigorous tongue, as shown by its growth, is not a contender for the place. The English more than doubles the French and is far beyond the German; its expansion in the last century is quite remarkable.

It is supported by two of the most energetic, determined, and enterprising nationalities of history; nations best designed for linguistic growth. It possesses elements of growth not possessed by other languages. It is a combination of Romance and Teutonic tongues. These go to the people who speak rather than the language spoken.

The Anglo-Saxons are less tied to the soil. Like the Hebrew, he is more given to enterprise which seeks new lands. As a world trader his wares are found in every port of the world. Modern industrialism by aid of the agencies of communication are making the world but a neighborhood. The application of electricity permits the resident of Hongkong to read at his breakfast table the latest news of his American neighbor's activities on the other side of the world, while both in common observe the doings of the balance of the world. This relationship invites, if it does not demand, an international language, which is believed by more and more to be the English. Recent spasms for a newly constructed language are recalled. No artificial language is likely to ever develop to supply such necessity. On the other hand, English is supported for such position, first, by ease with which it is learned; second, the literature which appeals to the educated of all the world; third, character of the Anglo-Saxon people in trade ability, which compels intercommunication; and, fourth, the spread of this language through the agencies of commerce, which has already made it the vernacular in two great nationalities and the second language in much of the world.

Our own country has long been known as the greatest training field for the spread of this tongue. At a very early period we adopted the common-school system, and later made public education compulsory. To our land come almost every nationality of the earth, bringing with them their own vernacular. At an early period many of these vernaculars were the only language spoken by them. But through the agency of the public schools English entered these homes, and in many if not most cases in time entirely supplanted the native tongue. One by one the language of the immigrant gave way to the language of the country of adoption. In this way this country has become a great training place for the spread of English in other lands.

For some years there has been growing up a strong sentiment not only to make English the language taught in the public schools, but to refuse the use of public funds to teach any other. This sentiment is grounded upon the growing belief that by immigration dangerous dogmas are being imported into the country and promulgated through a foreign tongue.

During the World War this fear was greatly augmented and gave a new impetus to a demand for English as the one language to be taught. There is a cultural value in the study of other languages which will not be underestimated.

The position of the United States before the world, linked with the power and influence of the British Empire in all matters international, will generate a new impetus for making English the diplomatic language as it has long ago become the commercial language of the world. The recent arms conference in Washington is a comment upon this statement.

With the inevitable cumulative importance of economic America to the world, her far-reaching influence on the spread of popular government among other peoples which demands a greater regard for popular education, the language spoken by the citizens of the Republic, representing almost every nation of the earth, will be further stimulated through self-interest of the nations associated with us.

International trade is an established accomplishment. Such trade is most largely under the direction of the nations who speak English. As this commerce expands throughout the world so will the language of commerce grow, until it may become the world language. Its growth is one of the phenomena of modern civilization.

Mr. BLAND of Indiana. Mr. Speaker, I ask unanimous consent that all who have spoken on the House joint resolution be entitled to revise and extend their remarks.

The SPEAKER. The gentleman from Indiana asks unanimous consent that all who have spoken on the House joint resolution be granted unanimous consent to revise and extend their remarks. Is there objection? [After a pause.] The Chair hears none.

The question is on the motion of the gentleman from Indiana to suspend the rules and pass the resolution.

The question was taken; and two-thirds having voted in favor thereof, the rules were suspended and the resolution was passed.

ENROLLED BILL SIGNED.

The SPEAKER announced his signature to enrolled bill of the following title:

S. 539. An act to further amend an act entitled "An act to regulate commerce," approved February 4, 1887, as amended.

Mr. GRAHAM of Illinois. Mr. Speaker, I do not know whether it is too late now or not, but I want to call the attention of the House and that of the chairman to the fact that there is a misspelled word in this bill—the word "anniversary"—that ought to be corrected, in line 2 of page 3. I intended to call attention to it before, Mr. Speaker, but I did not do so.

The SPEAKER. That can be corrected in the Senate.

Mr. GRAHAM of Illinois. Very well.

The SPEAKER. The Clerk will report the next bill.

ESTABLISHMENT OF MOTOR VEHICLE RURAL ROUTES.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 8927) authorizing establishment of rural routes of from 36 to 75 miles in length.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. WALSH. I ask that the bill be reported, Mr. Speaker.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That hereafter the Postmaster General is authorized, in his discretion, to establish motor vehicle rural routes of not less than 36 miles nor of more than 75 miles in length, carriers serving such routes who furnish and maintain their own motor vehicles to receive compensation of not less than $2,160 and not more than $2,600 per annum, to be based upon the length of the routes, in accordance with a schedule of compensation to be fixed by the Postmaster General.

Mr. WALSH. Reserving the right to object, Mr. Speaker, I would like to ask the gentleman from Minnesota how much of an increase this would be for a carrier who now has a 50-mile route if it were extended beyond the limit?

Mr. STEENERSON. Beyond the maximum it would be so much per mile. They are authorized for 36 miles. The compensation is substantially the same per mile as it is now, only when the rate is lengthened I think it is $10 less than it would be to pay the same rate. I have the figures and tables over in my office, but I did not bring them with me. My recollection is that for a maximum route, 75 miles, the rate per mile is just the same as it is now.

The table is as follows:

Motor-vehicle routes are from 50 to 75 miles in length, and this bill does not propose to change that. The maximum compensation is $2,600. The maximum horse-drawn vehicle route is 36 miles, and if this bill becomes a law the authority will be given to lengthen this kind of a route up to 49 miles. The pay for a standard horse-drawn route, so called, is $1,800 and $30 for each additional mile. If it should be extended to 49 miles, or 25 miles additional to the 24 miles, the compensation would be $2,550 and $30 for each additional mile above 24.

In any case this will enable the department to serve parties who are now denied service. The compensation for horse-drawn routes is fixed by statute, but the motor-vehicle route carrier's pay is left to the department, except that a maximum of $2,600 is prescribed.

Mr. WALSH. Is the gentleman satisfied that we are going to get efficient mail service on a route of 75 miles in length with motor equipment?

Mr. STEENERSON. Yes. This is a departmental bill which was sent down, and we held hearings on it, and we are unanimous in the opinion that there are such routes in the country where that would be practicable.

Mr. WALSH. This would permit the rearrangement of all existing routes if this bill passes, would it not?

Mr. STEENERSON. No. The maximum is 75 miles now.

Mr. WALSH. I understand the maximum is 50 miles.

Mr. STEENERSON. No. That is the minimum. This is to bridge the gap between 36 miles and 50 miles. They want to arrange it so that the route that is now 36 miles can be extended to 50 miles.

Mr. GRAHAM of Illinois. Reserving the right to object, Mr. Speaker, I would like to ask the gentleman a question. Is this going to disturb the existing routes?

Mr. STEENERSON. No; but it will allow them to rearrange routes.

Mr. GRAHAM of Illinois. Let us see about that. Let us suppose some particular town where there are six routes running out of it now. Is it proposed, if it is possible to do so, to extend some of those routes and take in more territory and abolish some of them, or how do you expect to make these routes?

Mr. STEENERSON. There are places where the space between the maximum of what is called the horse-drawn route of 36 miles and 50 miles as the minimum of a motor route can not very well be bridged without a rearrangement.

Mr. GRAHAM of Illinois. What I want to know is whether you are going to abolish some rural routes by this bill?

Mr. STEENERSON. I do not know that we will abolish them, but we will rearrange some of them.

Mr. GRAHAM of Illinois. Then you may get the service all bungled up as it was in the last administration.

Mr. ROACH. Mr. Speaker, will the gentleman yield?

Mr. STEENERSON. Yes.

Mr. ROACH. Does this involve a readjustment of the salaries?

Mr. STEENERSON. No. They will get the same.

Mr. WALSH. The language of the bill is that hereafter "the Postmaster General is authorized to establish in his discretion motor-vehicle rural routes of not less than 36 miles or more than 75 miles in length." Now it is just a matter of discretion with the Postmaster General as to where he will establish those routes, whether he will consolidate existing routes or establish new routes. It is left to the Postmaster General.

Mr. ROACH. He has that discretion now.

Mr. WALSH. The discretion now is that he can not have a motor-vehicle route of less than 50 miles in length. Now he may have 36 miles.

Mr. STEENERSON. I will say to the gentleman that the service of the people along the route is not changed.

Mr. HULL. Mr. Speaker, will the gentleman yield?

Mr. STEENERSON. Yes.

Mr. HULL. This gives practical discretion to the Postmaster General to change the number of routes, and he could change six routes into three, if he desires, by this bill, could he not?

Mr. STEENERSON. I could not say whether he could or not.

Mr. HULL. I object.

The SPEAKER. Objection is heard. The Clerk will report the next bill.

LAC DU FLAMBEAU BAND OF LAKE SUPERIOR CHIPPEWAS, WISCONSIN.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 6428) for the enrollment and allotment of the members of the Lac du Flambeau Band of Lake Superior Chippewas, in the State of Wisconsin, and for other purposes.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. WALSH. Mr. Speaker, I am going to object; but if the gentleman from Missouri [Mr. ROACH] desires to make a statement I will reserve it.

Mr. ROACH. I will ask the gentleman to reserve it.

Mr. WALSH. I reserve the right to object.

The SPEAKER. The gentleman from Massachusetts reserves the right to object.

Mr. ROACH. Mr. Speaker, I do not know just what objection the gentleman may have in mind against this bill, but for the information of the gentleman and of the committee I wish to state that this bill came to the Committee on Indian Affairs as one of what might be called "clean-up bills" of the affairs of the Lac du Flambeau Band of Lake Superior Chippewas.

In 1903 there were about 45,000 acres of land allotted to members of that band, and there is remaining about 24,400 acres which is unallotted. It is proposed to allot this remaining 24,000 acres of land that is unallotted to the remaining members of the tribe who have not had lands allotted to them. In other words, the principal number of those to whom this land will be allotted are the new-born Indians, born since the allotment was made in 1903. It is furthermore proposed to make a sale of the timber on these unallotted lands; the proceeds of the sale of this timber will be prorated and divided among these new-born Indians.

Mr. WALSH. Did the committee have a hearing on this bill?

Mr. ROACH. Yes; and we had the Assistant Commissioner of Indian Affairs before our subcommittee, of which I was chairman. He stated the facts in relation to the bill substantially as I have just been stating them to the gentleman. The legislation meets with the approval of the Commissioner of Indian Affairs, with the amendment proposed by the committee, and has the approval of the committee.

Mr. WALSH. This imposes duties and responsibilities upon the Commissioner of Indian Affairs and the Indian Office, does it not?

Mr. ROACH. Yes.

Mr. WALSH. The Bureau of Indian Affairs have not submitted any written report. I understand the gentleman that the assistant commissioner appeared before the committee and in response to inquiries stated that he favored the bill?

Mr. ROACH. There were two letters written by the commissioner to Chairman SNYDER. The first letter, in my opinion,

did not amount to a recommendation one way or the other, and when the bill was referred to the subcommittee of which I was chairman, I called upon the Commissioner of Indian Affairs to make a direct recommendation upon this legislation. While his second letter to me might easily have been construed to be a recommendation, yet it was not a recommendation in so many words, and I therefore called upon Mr. Meritt to come before our committee and state to the committee in plain terms whether the Commissioner of Indian Affairs did or did not approve and recommend this legislation. He thereupon stated that he had intended to make it clear in his second letter to the committee that he did approve it and recommend it, and so testified before the subcommittee.

Mr. STAFFORD. Will the gentleman yield?

Mr. ROACH. I yield to the gentleman from Wisconsin.

Mr. STAFFORD. What were the objections raised by the Commissioner of Indian Affairs originally to this bill?

Mr. ROACH. As I recall it, there never have been any objections to the legislation on the part of the Commissioner of Indian Affairs.

Mr. STAFFORD. Then do I understand that the Commissioner of Indian Affairs had difficulty in expressing himself in the two letters which he wrote and in stating whether he did or did not approve of the legislation?

Mr. ROACH. He did not appear to have any difficulty, and it is possible that I may have been overcritical in the matter. It is a bill in which I have no personal interest, but I did not want to report the legislation to the House unless I knew it had the approval of the Commissioner of Indian Affairs.

Mr. WALSH. Forty-five thousand seven hundred and twenty-six acres have already been allotted, and it is proposed to allot 24,000 acres more to 450 Indians?

Mr. ROACH. Yes.

Mr. WALSH. What will become of the Indians who are born after this allotment is made?

Mr. LAYTON. That is the question that I was about to ask.

Mr. ROACH. This will complete the roll of that band of Indians and close up the affairs of that particular tribe, and it is in accordance with the policy of the Indian Bureau to do that.

Mr. WALSH. Have these Indians reached a fair stage of civilization, or do they still maintain tribal relations?

Mr. ROACH. The condition of this particular tribe of Indians is more clearly set forth in the report which I filed than I can state personally to the gentleman.

Mr. WALSH. I have read the report, and there is nothing said in it about the degree of their civilization. I reserve the right to object, Mr. Speaker.

Mr. LAYTON. Will the gentleman yield?

Mr. ROACH. I yield to the gentleman from Delaware.

Mr. LAYTON. I assume that this Lac du Flambeau Band of Indians had certain lands given them by Federal enactment and that these lands belong to them. Is that true?

Mr. ROACH. Yes. It is my information that there were originally in this reservation 45,000 acres which were allotted, in addition to the 24,000 acres which it is now intended to allot.

Mr. LAYTON. They got this land by Federal enactment?

Mr. ROACH. Yes; but the allotments have never been completed to the individual Indians, except the 45,000 acres already allotted.

Mr. LAYTON. By law there were so many thousand acres of land given to this band.

Mr. ROACH. Yes.

Mr. LAYTON. Why was it that when they began to allot the land they did not make a complete allotment?

Mr. ROACH. I presume the allotment was complete at that date.

Mr. LAYTON. If it was complete, what is the meaning of this bill? Have some of them died?

Mr. ROACH. No; there have been a large number of Indians born in the tribe since that date, and it is proposed by this legislation to take care of those new-born Indians by the allotment of the remainder of this tract of land.

Mr. LAYTON. Do I understand that when land has been allotted to an Indian and he dies his children do not succeed to the title of the property allotted to him? Is that what the gentleman means?

Mr. ROACH. No; I did not mean to convey that impression.

Mr. LAYTON. If it was allotted, why do not the children inherit?

Mr. ROACH. I presume as a matter of fact they would in that sort of a case.

Mr. LAYTON. I do not understand the object of this legislation.

Mr. WALSH. I notice that the bill carries a provision to sell at the current market value the merchantable timber on the lands allotted and distribute it per capita to the members of the band enrolled under the provisions of the act, provided the Secretary of the Interior finds them competent to manage their own affairs, and that of the amount now on deposit derived from the sale of tribal timber $50,000 shall be distributed among the members enrolled as early as practicable after the approval of the roll as herein provided. Are not these Indians being properly taken care of by the Indian Bureau under existing law?

Mr. ROACH. I presume they are; but just what particular bearing that would have on closing up their affairs in the manner provided in this bill I am unable to see. Here are 24,000 acres of land unallotted, with a certain amount of timber, which is to be sold and the proceeds divided and allotted to the allottees entitled to the money; in order to make the distribution equitable with that made to the other Indians it is proposed to add to it the $50,000.

Mr. LAYTON. If the money is distributed to the Indians they can spend it.

Mr. ROACH. It is not proposed to pay the money over to the Indians; the Secretary of the Interior is authorized to do that when they are competent to manage their own affairs. It permits the Indian agency to close up the affairs of the Lac du Flambeau Indians in the manner suggested by the terms of this legislation.

Mr. STAFFORD. Will the gentleman yield?

Mr. WALSH. I yield.

Mr. STAFFORD. This is the most valuable timberland in the State of Wisconsin. If this bill passes it provides for the denuding of those forest lands around the Flambeau Lake and Reservation, and pay the money out to the Indians, and who knows how soon these Indians will have need of assistance by the Government?

Mr. WALSH. They always are in need, and the more you do for them the more you have to.

Mr. STAFFORD. Why is it necessary, when these Indians have $24,000 in the Treasury to their credit, to authorize these lands to be cut over and sell the timber?

Mr. ROACH. That is an inquiry the gentleman should address to the Secretary of the Interior. It seems to be the policy of the department, but whether it is a good or a bad policy I am not familiar enough with the matter to answer. That has been determined by the department to be its policy and to be in the interest of the Indians to do it.

Mr. STAFFORD. But the Secretary of the Interior is authorized to cut down mature timber and sell it for the Indians, and why should not that policy be continued?

Mr. LAYTON. Will the gentleman yield?

Mr. WALSH. I yield.

Mr. LAYTON. Is the committee in possession of any information that these 450 Indians need the passage of this bill in order to provide them food and clothing, sustenance or housing, or anything of that sort at this time?

Mr. ROACH. No; we have no information of that character, but we have information that the Commissioner of Indian Affairs desires to close up the affairs of the Lac du Flambeau Band of Indians and complete and make final the roll, and it is necessary to have this legislation in order to do it. That is the theory upon which the legislation was reported from the committee.

Mr. CARTER. Will the gentleman yield?

Mr. WALSH. I yield.

Mr. CARTER. In reply to the gentleman from Delaware I want to say a word. I have looked at this bill hurriedly and can not make any comments as to how tightly it is drawn. The purpose is to allot the Lac du Flambeau Indians. That is the policy of the Indian Bureau in working out the Indian problem. The Indian problem can not be solved and worked out until the land is allotted to the Indian and he becomes the individual owner. I take it that the principle of the bill is to allot the land in order that they be individualized and the department freed from the community or tribal ownership and the title going to the individual.

Mr. LAYTON. Why was not this land all allotted; why was it allotted in part at one time and then come here with a proposition for another allotment?

Mr. CARTER. I do not know why in this case, but that is quite often done. There are good reasons for it. For instance, the department does not know in making the roll just how many Indians they are going to find. They begin the allotment, and before they finish making the roll, or when they finish, they find they have not so many on the roll as they expected, and they

have land left over. They do not enroll as many Indians as they thought they would, and they have land left over, but whether that was the case here I do not know.

In a great many instances lands are reserved for timber purposes and mineral purposes, and afterwards it is found that they are not valuable for timber or mineral purposes, and then there is an additional allotment.

Mr. LAYTON. Does the gentleman mean to say that after the operations of the Indian Bureau all these years there is no very accurate census as to how many Indians there are in these tribes?

Mr. CARTER. In a great many instances rolls have been completed and in others they have not. The gentleman will see in a moment that that could not be done with some tribes until you get to the point where you begin the allotment of land. Every year a great number are born and a great number die. You commenced to make the allotment of land in 1910 and you do not allot the land until 1915. In the meantime a lot of them that were placed on the rolls in 1910 have died, and there have been others born, so the roll has to be remade for a new allotment.

Mr. LAYTON. It seems to me if that is the case you would have to have a new allotment every year.

Mr. WALSH. Mr. Speaker, I do not think the necessity for the completing of these rolls and making a new allotment as proposed in this bill is such as to require us to pass this legislation now, and I object.

TO ADJUST ACCOUNTS OF CERTAIN DIPLOMATIC AND CONSULAR OFFICERS.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 7764) authorizing the accounting officers of the Treasury to adjust certain accounts of certain diplomatic and consular officers.

The SPEAKER pro tempore (Mr. GRAHAM of Illinois). Is there objection to the present consideration of the bill?

Mr. WALSH. Mr. Speaker, reserving the right to object, I want a little information as to the necessity for the legislation. The report simply states that the committee has considered the matter and reported it back.

Mr. ACKERMAN. Mr. Speaker, if there is no objection I would like to have the bill passed over without prejudice.

The SPEAKER pro tempore. Is there objection to passing the bill over without prejudice?

Mr. STAFFORD. Mr. Speaker, reserving the right to object, will the gentleman in the meantime have incorporated in the RECORD or presented as a sort of supplementary report some real reasons why the bill should be considered, so that the Members of the House may have them before them when the bill is next considered?

Mr. ACKERMAN. I have asked the Treasury officials to give me that information. They have not as yet furnished it, but when they do, I shall be very glad to do that.

The SPEAKER pro tempore. Is there objection to passing the bill over without prejudice?

There was no objection.

RETIREMENT OF CERTAIN CIVIL SERVICE EMPLOYEES.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 11407) to amend an act entitled "An act for the retirement of employees in the classified civil service, and for other purposes," approved May 22, 1920.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. STAFFORD. Mr. Speaker, reserving the right to object, I notice in reading the report that these employees are to be excepted under a proposed Executive order.

Mr. LEHLBACH. Yes; they are. They are to be excepted from the proposed Executive order. They are not to be included within the Executive order which will be issued shortly.

Mr. STAFFORD. The report says that practically all of the employees who may receive the benefits of the legislation are specifically excluded under the terms of a proposed Executive order now under consideration by the President.

Mr. LEHLBACH. Yes; and for this reason: The retirement law provides for classes running from A to F, with maximum and minimum annuities, and provides for the method of computing the annuity of each person entitled to an annuity falling within the class. People having less than $600 would, if they were included within the terms of the retirement law by the Executive order, receive an annuity in excess of what they are entitled to, and in some cases even in excess of their present pay. Therefore, in justice and in reasonableness they could not be included within the Executive order. For instance, take the case of a charwoman in the Bureau of Pensions who has been working there for 22 years and who is now 83 years of age. She gets $240 a year. If she got the minimum in the class to which she belongs, she would get $252 a year annuity, thereby getting more money as annuity than she does when working. Manifestly that is impracticable. This bill merely provides that they are included within the terms of the retirement law, but that in no case shall they get in excess of what a computation of their pay would entitle them to exclusive of the minimum. In other words, this woman would get $100 a year instead of $252 a year.

Mr. STAFFORD. Mr. Speaker, will the gentleman inform the House why this class of employees was not included in the bill the gentleman reported?

Mr. LEHLBACH. Because the bill when originally passed contemplated the permanent employees of the Government, and those in the main are under the civil service. The original law provides that those in civil service and certain other employees, specifying them, shall be within the terms of the act, but it did not take in laborers who may be permanent, but who are not under civil service. The laborers who are permanent are to be included in the Executive order, provided it will not throw them out of line in the annuity that they will receive; in other words, those who receive over $600 a year. This bill will take care of the few scrub women and similar employees who are about to lose their positions, particularly in the Department of the Interior, and probably in other public buildings in the city of Washington, who ought to get something like $8 or $10 a month after 20 or 30 or 40 years' service after reaching the age of 70 or 80.

Mr. STAFFORD. Mr. Speaker, I rose largely because of the statement in the report which the gentleman has explained satisfactorily. I withdraw the reservation of objection.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk reported the bill, as follows:

Be it enacted, etc., That section 2 of the act entitled "An act for the retirement of employees in the classified civil service, and for other purposes," approved May 22, 1920, is hereby amended by inserting after the seventh paragraph the following:

"Class G shall include charwomen, laborers, and other employees, whether classified or unclassified, who are employed on a regular annual basis and whose basic salary, pay, or compensation is at a rate less than $600 per annum. The annuity to any retired employee shall be determined according to the method prescribed in the foregoing schedules, except that no annuity shall hereafter be granted to exceed the per cent nor the maximum provided for the respective period of service. It is provided that this class of employees shall otherwise be subject to the provisions of the act of May 22, 1920."

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. LEHLBACH, a motion to reconsider the vote by which the bill was passed was laid on the table.

DRAINAGE SYSTEM FOR PIUTE INDIAN LANDS, NEVADA.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 10211) authorizing an appropriation to meet proportionate expenses of providing a drainage system for Piute Indian lands in the State of Nevada, within the Newlands reclamation project of the Reclamation Service.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. WALSH. Reserving the right to object, I would like to have some explanation of that.

Mr. LEATHERWOOD. Mr. Speaker, I see that neither of the gentlemen in charge of the bill whose names are on the calendar are here to-day.

Mr. WALSH. Does the gentleman have any objection to passing this over without prejudice?

Mr. LEATHERWOOD. I understand that it is quite important that action be had on the matter.

Mr. WALSH. This authorizes an appropriation of some $40,000 for drainage in connection with certain Piute Indian lands. What are they going to utilize the land for?

Mr. LEATHERWOOD. The Indian lands in question lie contiguous to certain lands included within the Newlands reclamation project in the State of Nevada. In fact, a portion of the land is almost surrounded by the project lands—I mean a portion of the Indian lands. It was shown in the hearings before the committee that a considerable area of the Newlands project has become waterlogged and it is necessary to organize a drainage district and drain those lands if they are to be of any value.

Mr. WALSH. This is that bill where the repayment is to be made, the Government is to be reimbursed in accordance with the existing law?

Mr. LEATHERWOOD. Exactly. The original construction charge amounted to something like $20 an acre. This would increase the charge to the Indians about $10.15. They are amply able to meet that additional assessment as provided by law upon the acreage which will be included under this act. It is further important for this reason—that if you leave out the Indian lands they would be getting the benefit of something to which they ought to contribute; that is, their lands ought to contribute their proportionate share. Neither is it possible to carry through the drainage district without practically draining this Indian land.

Mr. WALSH. I did not recall the bill at first, Mr. Speaker, and I am very glad the gentleman made the explanation, and I withdraw my reservation.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $49,603.05, payable in 20 annual installments of $2,500 each, except the last, which shall be the amount remaining unpaid, for the purpose of meeting the proportionate expense of providing a drainage system for 4,887 acres of Piute Indian lands in the State of Nevada, within the Newlands project of the Reclamation Service.

The money herein appropriated shall be reimbursed in accordance with the provisions of law applicable to said Indian lands.

The committee amendments were read as follows:

Page 1, line 5, strike out "$49,603.05" and insert in lieu thereof "$41,077.05."

Page 1, line 13, strike out "$2,500" and insert in lieu thereof "$2,100."

Page 1, line 9, strike out "4,887" and insert in lieu thereof "4,047."

The question was taken, and the amendments were agreed to.

Mr. BRIGGS. Mr. Speaker, I move to strike out the last word. I just want to ask the gentleman having the bill in charge if the words "authorized to be" ought not to be included after the word "herein," page 2, line 3, so as to make it consistent with the first section, which is an authorization for an appropriation?

Mr. LEATHERWOOD. To what line does the gentleman refer?

Mr. BRIGGS. Line 3, page 2, after the word "herein" insert the words "authorized to be," so it will read, "the money herein authorized to be appropriated."

Mr. LEATHERWOOD. I think that would add to it.

Mr. BRIGGS. I offer that amendment.

The SPEAKER pro tempore. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. BRIGGS: Page 2, line 3, after the word "herein" insert the words "authorized to be."

The question was taken, and the amendment was agreed to.

The bill as amended was ordered to be engrossed and read the third time, was read the third time, and passed.

On motion of Mr. LEATHERWOOD, a motion to reconsider the vote by which the bill was passed was laid on the table.

SALE OF SURPLUS POWER, SALT RIVER RECLAMATION PROJECT, ARIZ.

The next business in order on the Unanimous Consent Calendar was the bill (H. R. 10248) to amend the act of April 16, 1906, and the act of February 24, 1911, relative to the lease of surplus electric power on Federal irrigation projects.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. STAFFORD. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. Is there objection?

Mr. HAYDEN. Mr. Speaker, I hope that I can convince the gentleman from Wisconsin that the bill ought to pass to-day if the gentleman will permit me to briefly explain the merits of the measure.

Mr. STAFFORD. I do not wish to deprive the gentleman of an explanation of the bill. I have considered it and think it is rather an important bill to be considered on the Unanimous Consent Calendar, and further, I question the policy of going into leaseholds for 50 years for water-power purposes as provided by this bill.

Mr. HAYDEN. Under existing law leases of power privileges or for the sale of surplus power may be made on any Federal reclamation project for a period of 10 years except upon the Rio Grande project, where the law authorizes leases for not to exceed 50 years.

Mr. STAFFORD. I am well aware of that fact.

Mr. HAYDEN. This bill merely places the Salt River project on a parity with the reclamation project in Texas and New Mexico that I have mentioned. Fifty-year leases are also authorized by the Federal water power act.

Mr. STAFFORD. I have difficulty in bringing myself over to a position of voting for a policy of allowing other persons to develop water power to be reimbursed from the use of the power for a period of 50 years.

Mr. HAYDEN. The report on this bill shows that certain mining companies, in order to obtain surplus hydroelectric power from the Salt River project, advanced $430,000 for the construction of transmission lines. Under a contract approved by the Secretary of the Interior the companies will be reimbursed for this outlay within a period of 10 years by taking their pay in power. The development of other power units is now planned but the expense will be so great that a much longer period of time is necessary in which to repay the cost by this method.

Mr. STAFFORD. I doubt whether any Congress should tie itself up to a 50-year lease. I know we have done it in one instance, and then we are to do it in two, and then a third, and so on.

Mr. HAYDEN. The National Government, as a matter of fact, now has nothing to do with the operation of the Salt River project. It has been completed, the total cost has been fixed, and the water users under the project have entered into a contract to repay the amount agreed upon within a period of 20 years. All that this legislation would do will be to allow four million and a half or five million dollars to be expended on power plants and transmission lines, the title to which will remain in the Government as additional security for the $9,000,000, which the water users have promised to pay to the United States. The Federal Government has everything to gain and nothing to lose by the enactment of this bill into law.

Mr. STAFFORD. I think, if I sleep over this two weeks, perhaps I may be able to bring myself around to the frame of mind of the author of the bill. In the meantime I am not willing to give my consent to it now.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin? [After a pause.] The Chair hears none.

SMALL CLAIMS ON UNSURVEYED LAND, NEW MEXICO.

The next business in order on the Calendar for Unanimous Consent was the bill (S. 2014) to provide for the settlement of small holding claims on unsurveyed land in the State of New Mexico.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. STAFFORD. Mr. Speaker, reserving the right to object, I would like to inquire of the gentleman reporting it what additional privilege is granted by the present bill to that found in existing law, in section 16 of the act of March 3, 1891?

Mr. MONTOYA. Simply an extension of the time in which to make the survey and the proof.

Mr. STAFFORD. I call the gentleman's attention to the fact that under section 16, to which I have just referred, the provision of that law except the applicability to any city lot, town lot, village lot, farm lot, and the like, which this bill does not. Now, the gentleman states as his reason that it extends it two years. As I read this section, there is nothing that limits the right of the Interior Department to provide surveys in consonance with granting a patent to those who have occupied the land for 20 years in proscriptive right.

Mr. MONTOYA. The opinion is that it does not affect the enactment of the act of May 16, 1921.

Mr. STAFFORD. I think it would in this enactment, in view of the enactment of March 3, 1891.

Mr. MONTOYA. We had important land claims that were closed up in 1895, I believe, and the law gave authority to the board of private land claims to pass upon Mexican land grants that were acquired by the Mexican Government, and also small possessions of land under the same title as grants that settlers have had there from time immemorial, before the American occupation. The court did not reach all of these claims, and since that court closed enactments have been made extending the time, so that these, what we call "small holdings," which we have only in the State of New Mexico, shall have the time in which to make full proof and have the land surveyed.

Mr. STAFFORD. As I read section 16, there is no limit of time as to the effect of that section, nor does the court of private land claims have any applicability to it.

Mr. MONTOYA. The Secretary of the Interior told me that the section should be reenacted for the purpose of giving the people time.

Mr. STAFFORD. Would the gentleman have any objection to passing it over for two weeks?

Mr. MONTOYA. I would like to have it arranged now, inasmuch as I may not be here in two weeks. That would be the only objection.

Mr. STAFFORD. Mr. Speaker, I ask unanimous consent to have the bill passed over for two weeks.

The SPEAKER. The gentleman from Wisconsin asks unanimous consent to have the bill passed without prejudice. Is there objection? [After a pause.] The Chair hears none. The Clerk will report the next bill.

POLLUTION OF NAVIGABLE WATERS.

The next business in order on the Calendar for Unanimous Consent was House Joint Resolution 297, authorizing and requesting the President of the United States to call a conference of maritime nations with a view to the adoption of effective means for the prevention of pollution of navigable waters by oil-burning and oil-carrying steamers by the dumping into such waters of oil waste, fuel oil, oil sludge, oil slop, tar residue, and water ballast.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. STAFFORD. Mr. Speaker, reserving the right to object, the enacting phraseology is much broader than the preamble. I have a doubt in my mind whether or not the phraseology in the preamble would limit the full scope of the activities of this proposed commission to pass upon the question of preventing pollution of navigable waters of all character, by any means whatsoever.

Mr. APPLEBY. I think I can answer the gentleman. This resolution was drawn after numerous hearings before the Committee on Foreign Affairs. The original resolution was referred to the State Department, and that department after making some minor changes in phraseology approved the resolution as it now stands.

Mr. STAFFORD. I have in mind, not so much what the gentleman has in mind in preventing the depositing of refuse oil so as to impair the bathing facilities on the New Jersey coast as the health provisions on the Great Lakes. The steamers on the Great Lakes deposit their spoils in the lake, affecting the water that is used for drinking purposes. I am quite in earnest in having this commission consider not only the effect along the beaches of the New Jersey shore by reason of the deposit of oil refuse from fuel-burning steamers but also the deposit of spoil on the Great Lakes that prevents the water being fit for drinking purposes.

Mr. LAYTON. Will the gentleman yield?

Mr. STAFFORD. I will.

Mr. LAYTON. The gentleman has a partial comprehension of the purposes of this bill. While this depositing of oil, and so forth, does interfere materially with the health of the people and their pleasure during the summer time all down the Atlantic coast and down as far as Sussex County, Del., where I live, that is not all; it has seriously destroyed more and more the fish and the crabs, and all the piscatorial products of the water.

Mr. STAFFORD. I do not wish it to apply only on the high seas but to the Great Lakes, where we have the menace of having the spoils from steamers, both Canadian and American, deposited in the waters of the lakes.

Mr. LAYTON. Does not the gentleman think the Great Lakes would be included in this?

Mr. APPLEBY. The condition referred to no doubt exists in the Great Lakes. That would be a matter of a treaty with Canada, taking the question up under a separate resolution.

Mr. STAFFORD. Canada is a part of the British Empire, from last reports, and should be brought within the purview of this conference, notwithstanding the Canadian Government has declined the overtures of our Government for building that great waterway, the St. Lawrence Canal.

Mr. APPLEBY. Mr. Speaker, my objection to that proposition is this. The matter of oil pollution has been before the Committee on Rivers and Harbors since last June. This resolution is the outcome of information brought out before that committee to the effect that any legislation enacted by Congress would have jurisdiction for 3 miles out at sea only, and the suggestion was made that an international conference be called upon this subject. The chairman of the Committee on Foreign Affairs, Mr. PORTER, will state to you that this resolution was duly considered for three days by that committee, and that the resolution as presented is the outcome of the deliberate hearings upon the subject. Personally, I would not want any more delay in the matter if it can be avoided.

I think the gentleman [Mr. STAFFORD], if he has a resolution on pollution pertaining to other parts of the country, viz, the Great Lakes, he should introduce it and let it take the usual course.

Mr. STAFFORD. If the gentleman will permit, the enacting phraseology of the resolution that the gentleman is sponsoring is broad enough to include the pressing case that I have called to his attention and to the attention of the House. It is not broad enough under the seashore feature of the resolution, as embodied in the preamble, about which the gentleman is so much concerned, and which is the real cause for the gentleman having introduced this resolution.

Mr. APPLEBY. I am not only interested in the seashore feature of the resolution but also in the fishing and lumbering industries of the country.

Mr. STAFFORD. Oh, we all know that this resolution had its genesis by reason of the fact that some four or five years ago the bathing beaches on the Jersey coast were impaired by oil and coal-tar products in the water. I withdraw my objection to the consideration of the resolution, but I think the phraseology of the preamble ought also to cover the Great Lakes, whose waters are contaminated by deposits of oil waste and human spoils from steamers plying on the Lakes.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

Joint resolution (H. J. Res. 297) authorizing and requesting the President of the United States to call a conference of maritime nations with a view to the adoption of effective means for the prevention of pollution of navigable waters by oil-burning and oil-carrying steamers by the dumping into such waters of oil waste, fuel oil, oil sludge, oil slop, tar residue, and water ballast.

Whereas the careless casting of oil refuse into the sea from oil-burning and oil-carrying steamers has become a serious menace to the maritime and the fishing industries of the United States and other countries; and

Whereas the fire hazard created by the accumulation of floating oil on the piles of piers and bulkheads into harbor waters is a growing source of alarm; and

Whereas most serious is the destruction of ocean fisheries resulting from the constant discharge into territorial waters of the waste products of the oil used for fuel on many steamers in place of coal, which threatens to exterminate the food fish, oysters, clams, crabs, and lobsters, which are a vital part of our various national food supplies; and

Whereas the dumping of this oil refuse is not only ruining the bathing beaches situate on the territorial waters of the various countries, which during the summer attract hundreds of thousands of people to the seashore resorts, but the depreciation in value of millions of dollars of sea shore property is most alarming; and

Whereas this pollution takes place on the high seas as well as within territorial waters: Now, therefore, be it

Resolved, etc., That the President is authorized and requested to call a conference of maritime nations with a view to the adoption of effective means for the prevention of pollution of navigable waters.

With a committee amendment:

On page 2, line 3, strike out the words "authorized and."

The SPEAKER. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the House joint resolution.

The House joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended so as to read: "Joint resolution requesting the President of the United States to call a conference of maritime nations with a view to the adoption of effective means for the prevention of pollution of navigable waters by oil-burning and oil-carrying steamers by the dumping into such waters of oil waste, fuel oil, oil sludge, oil slop, tar residue, and water ballast."

On motion of Mr. APPLEBY, a motion to reconsider the vote whereby the resolution was passed was laid on the table.

The SPEAKER. The Clerk will report the next bill.

SUPERINTENDENT OF LIBRARY BUILDING AND GROUNDS.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 11393) to abolish the office of Superintendent of Library Building and Grounds and to transfer the duties thereof to the Architect of the Capitol and the Librarian of Congress.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. LARSEN of Georgia. Mr. Speaker, reserving the right to object, my colleague, Judge PARK, is interested in this matter, and he is unavoidably detained from attendance here to-day on account of sickness in his family. He requested that I make known that condition in the House and ask that this measure be passed over without prejudice for two weeks.

The SPEAKER. The Chair has undertaken to recognize a gentleman to make a motion to suspend the rules on this bill.

Mr. LARSEN of Georgia. I was desiring not to object, but merely reserved the right to object pending the making of the statement.

Mr. FESS. Mr. Speaker, I move to suspend the rules and pass the bill H. R. 11393.

The SPEAKER. The gentleman from Ohio moves to suspend the rules and pass the bill H. R. 11393, which the Clerk will report.

The Clerk read as follows:

Be it enacted, etc., That the office of Superintendent of the Library Building and Grounds is abolished on and after July 1, 1922. Thereafter the Architect of the Capitol shall have charge of all structural work at the Library Building and on the grounds, including all necessary repairs, the operation, maintenance, and repair of the mechanical plant and elevators, the care and maintenance of the grounds, and the purchasing and supplying of all furniture and equipment for the building. The employees required for the performance of the foregoing duties shall be appointed by the Architect of the Capitol. All other duties required to be performed by the Superintendent of the Library Building and Grounds shall be performed thereafter under the direction of the Librarian of Congress, who shall appoint the employees necessary therefor. The position of administrative assistant and disbursing officer is hereby created in the Library of Congress, effective on July 1, 1922. The salary of such position shall be at the rate of $3,000 per annum, and appointments thereto shall be made by the librarian. The administrative assistant and disbursing officer shall disburse the appropriations for the Library of Congress and the Botanic Garden and shall perform such services in connection with the duties hereby imposed upon the librarian as he may direct, and shall give bond payable to the United States in the sum of $30,000, with sureties approved by the Secretary of the Treasury for the faithful discharge of his duties.

SEC. 2. That all books, documents, papers, furniture, and equipment of the office of Superintendent of the Library Building and Grounds shall be divided between and transferred to the Architect of the Capitol and the Library of Congress on the basis of duties transferred.

SEC. 3. That the appropriation of $3,600 for the fiscal year 1923 for the salary of the Superintendent of the Library Building and Grounds is made available for the payment of the salary of the administrative assistant and disbursing officer at the rate of $3,000 per annum during such fiscal year. All appropriations for the fiscal year 1923 for the Library Building and Grounds shall be apportioned between, transferred to, and made available for the Architect of the Capitol and the Library of Congress on the basis of duties transferred. The appropriation for the fiscal year 1923 for printing and binding for the Library of Congress shall be apportioned between the Library of Congress and the Architect of the Capitol and that portion allotted to the building and grounds shall be transferred to and made available for the Architect of the Capitol. The appropriations and portions of appropriations herein transferred to the Architect of the Capitol, and all appropriations hereafter made to him on account of the Library Building and Grounds shall be disbursed for that purpose in the same manner as other appropriations under his control.

The SPEAKER. Is a second demanded?

Mr. LARSEN of Georgia. I demand a second.

Mr. FESS. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

The SPEAKER. The gentleman from Ohio asks unanimous consent that a second be considered as ordered. Is there objection?

There was no objection.

Mr. FESS. Mr. Speaker, this bill is very simple in its terms. It transfers the duties of the superintendent of the Library Building to the Architect of the Capitol. It abolishes the office of the superintendent of the Library Building and also permits the continuance of his duties under the control of the Librarian of Congress.

I think the Members of the House will recall that this office, that of the superintendent of the Library Building, was created at the time this Library Building was finished in 1897, and the office was given to a very distinguished gentleman who had long been identified with the construction of the building. But since that time the office of the Architect of the Capitol has been created and this position is no longer required, since the same work that would be done by the architect, if he had the authority, is being done by another person, although the work could very easily be done by the Architect of the Capitol. He was asked to come before the committee to ascertain if he could accept these duties without embarrassment to himself, or whether it is possible for him to administer this work, and he stated frankly that it could be done. The Librarian of Congress was asked to come before the committee to ascertain his judgment as to whether he could get along without the office of the superintendent of the library, and he stated that it could be very easily done, and that it might be more efficiently done. So that as a matter of concentration of duty, we thought it well to abolish the office and transfer the work over to the Architect of the Capitol.

Mr. WATSON. Mr. Speaker, will the gentleman yield?

Mr. FESS. Yes.

Mr. WATSON. How many places will be dispensed with, probably, if this bill is passed?

Mr. FESS. The head of the office has already resigned. He resigned in December. There is a vacancy there, but the duty will be performed now under the Librarian through an assistant who will be appointed.

Mr. WATSON. There will still be a superintendent?

Mr. FESS. There will be an assistant under the Librarian.

Mr. WATSON. Will the Government save by this bill?

Mr. FESS. I doubt whether the Government will save except in efficiency.

Mr. MADDEN. Yes; the Government will save. In the first place the salary of the assistant to the librarian will be reduced by $600 a year, and there are many people employed there now in the physical and mechanical work that will not be necessary under Mr. Woods's jurisdiction, because he already has people who do that work for him.

Mr. FESS. I was not aware that these men could do that work in addition, although I recall that the architect said that office would be very glad to take it over.

Mr. GARNER. Will the gentleman yield?

Mr. LUCE. I yield to the gentleman from Texas.

Mr. GARNER. Who is filling the office of Superintendent of the Library at the present time?

Mr. LUCE. I think the office has recently been filled by the promotion of one of the assistants in the Library. That was done about two weeks ago.

Mr. GARNER. What is the name of the person appointed?

Mr. LUCE. I do not remember.

Mr. SISSON. A woman, is it not?

Mr. LUCE. A woman.

Mr. GARNER. And you are going to discontinue this office and put its duties in the hands of some one else?

Mr. MADDEN. It is proposed to discontinue the office and put the duties in the hands of Mr. Elliott Woods, the Architect of the Capitol.

Mr. GARNER. I will say that you could not put those duties in better hands; but I want to find out if you are displacing some one who is now filling the place.

Mr. MADDEN. Yes.

Mr. GARNER. And what job are you going to give her?

Mr. MADDEN. We have not in mind any job for anybody.

Mr. GARNER. The administration seemed to be very much interested in her in making this appointment, and I thought maybe you had some other place in view for her, in view of the fact that you are not saving any money.

Mr. MADDEN. As far as we are concerned we have no job in mind for anybody.

Mr. CRISP. Will the gentleman yield?

Mr. FESS. I yield to the gentleman from Georgia.

Mr. CRISP. I know nothing about this bill except that one of my colleagues, Judge PARK, told me about it this morning. As I understand, this bill abolishes the office of Superintendent of the Library?

Mr. FESS. It does.

Mr. CRISP. And transfers the duties formerly exercised by the Superintendent of the Library to the Architect of the Capitol, Mr. Elliott Woods?

Mr. FESS. Yes.

Mr. CRISP. Is it the intention to give Mr. Woods additional employees to perform the duties that are now being performed by the Superintendent of the Library, whose office is to be abolished?

Mr. FESS. I assume that there will be some one to do this work. The author of the bill, the chairman of the Committee on Appropriations [Mr. MADDEN], has all the details in his mind, and I yield to him.

Mr. MADDEN. What this bill does is to transfer the office of the present superintendent of the Library over to the jurisdiction of Mr. Elliott Woods, Architect of the Capitol, and to transfer with that authority the subordinate employees who may be on the pay roll over there now to do the physical work that they are required to do, but it does not transfer anybody in the position of superintendent. Mr. Woods assumes that responsibility and takes the place and performs the functions, and whatever places are taken over will be simply the subordinate places that must be continued in any event.

Mr. CRISP. I will say that I do not think there is a more capable man than Mr. Woods to perform the duties that may be intrusted to him.

Mr. LUCE. Will the gentleman yield?

Mr. FESS. I yield to the gentleman from Massachusetts.

Mr. LUCE. Mr. Woods said this before the committee:

The question of taking on the work does not cut much figure. It could be done without any difficulty and without any additional employment so far as I can see, except in case of any special construction, where we would require a larger force in any event. Our forces are such at present that we are able to take care of the buildings on the bill.

Mr. LARSEN of Georgia. Will the gentleman yield?

Mr. FESS. I yield to the gentleman from Georgia.

Mr. LARSEN of Georgia. You have given what Mr. Woods said. Did you have any hearings from the person actually in charge of the Library?

Mr. LUCE. We had.

Mr. LARSEN of Georgia. What was the statement of that party, the superintendent, or whoever it is?

Mr. LUCE. If the gentleman will proceed, I will try to find the statement of Mr. Putnam, the Librarian.

Mr. LARSEN of Georgia. What saving, if any, in expense will this proposed legislation result in?

Mr. FESS. The chairman of the Committee on Appropriations thinks there will be a saving.

Mr. LARSEN of Georgia. How much?

Mr. FESS. I can not answer that.

Mr. MADDEN. It is hard to tell that, but what it does is to systematize the work. It puts the jurisdiction of the mechanical and construction and building work in the hands of an experienced man, who has the knowledge of what is to be done and how to do it and when to do it, and he knows when a man is needed and when he is not needed, and he will not have a man there if it is not necessary to have him there, and he will be able to reduce the force by a considerable number if he is given jurisdiction. Besides that, it coordinates the work. It puts it in systematic, businesslike order, and takes away the friction that has existed in the Public Library by reason of one man having control over one thing and another man having control of another, and no coordination in either case.

Mr. LARSEN of Georgia. In point of fact, it is to get rid of some one who is not wanted?

Mr. FESS. This office was created in 1897. Since then another office has been created and work is being duplicated, and it is proposed to consolidate the work under one head.

I reserve the remainder of my time.

Mr. LARSEN of Georgia. Mr. Speaker, I am frank to say that I know very little about the provisions in this bill. It seems to me it is a matter of enough importance that we should ascertain what the object of the bill is. Judging from the answers that have been given by the gentlemen who sponsor the measure I am led to the conclusion that the prime object is to get rid of somebody that is not wanted in the management of the Library. It looks to me as if that were true.

Mr. MADDEN. Will the gentleman yield?

Mr. LARSEN of Georgia. Yes.

Mr. MADDEN. I will say that that is the farthest thing from the object of the bill. The object is to put the affairs under the Superintendent of the Library on a business basis, clean up any friction that may be existing, and put the construction work on the building, all the mechanical work in connection with the building, and all things that ought to be done, under a man of experience. That is what this bill proposes to do.

It systematizes the work, cleans up the situation, places a man in whom every man in the country has confidence in charge of the work, and gives to this great building the services and experience of Mr. Woods. It has been 25 years since this building was built, and it needs more or less repairs. There is no time when the experience of a man like Mr. Woods is so essential as now. They have had no such man in connection with the building since 1897. Now, more than ever before, is that experience needed. I want to say further that this bill is not intended to put anybody out of a job. It is not being passed with that purpose in view. The bill does abolish the office of superintendent of the building and transfers that authority to the superintendent of the Capitol, Mr. Woods.

Mr. LARSEN of Georgia. How much additional salary will he get?

Mr. MADDEN. Not one cent.

Mr. LARSEN of Georgia. Now, gentlemen of the House, I admit that Mr. Woods is a good man, but why should we take a good man and pile more work on him than he is able to perform? I see no reason for it. Mr. Woods is a good man, but he is not the only good man in this country. There are a lot of good people. We are too prone to believe that we or our clique are the only ones that can do things. There are just as good men at home in every district as are sent here to represent the district. Mr. Woods is as good a man as there is about the Capitol, but there are just as good men who can be gotten to perform those services. In making the proposed change you run the risk of adding too much to the duties of Mr. Woods. He has duties to perform, and he is performing them well, but if we put adtional duties on him he will probably neglect some of them, and in place of having an efficient man we will have an inefficient one. I see that the gentleman from Illinois [Mr. MADDEN] shakes his head. He is undoubtedly sincere, but there is such a thing as overloading any man. You say the man who was in there has been removed; yes, but there is a lady in charge. What is the matter with the lady? Why not give her an opportunity to make good? The women all over the country are being called into public life; they are making good, and I for one am opposed to putting them out.

Mr. FESS. Will the gentleman yield?

Mr. LARSEN of Georgia. Yes.

Mr. FESS. What is the object of keeping two persons in the employ of the Government, one the architect of the building and another the superintendent, both doing similar work, except the architect has a good deal more to do? What rational reason is there that we should continue the two when it can be concentrated in one?

Mr. LARSEN of Georgia. Ordinarily I would say we ought to concentrate as much as possible, provided that in doing so we reduce the expenditures of the Government. I asked how much expenditure you propose to save, and up to this good moment I have failed to receive a response from any Member who can give me an estimate.

Mr. FESS. The only responsible person I have heard from is the chairman of the Committee on Appropriations, who says that there will be a saving; but assuming that there will be no saving, there will be much less friction and more efficiency.

Mr. LARSEN of Georgia. There will be less efficiency because you are heaping too many burdens upon one man.

Mr. FESS. I think my friend will agree that in order to center responsibility and eliminate friction it is wise to concentrate these duties. Where you have a divided counsel you will have lack of decision and have friction. When you do not have divided counsel you have a unit of decision.

Mr. LARSEN of Georgia. May I ask the gentleman a question?

Mr. FESS. Certainly.

Mr. LARSEN of Georgia. In what way has the present incumbent caused friction, in what way has she failed to meet every emergency?

Mr. FESS. I can not say that she has created any friction.

Mr. LARSEN of Georgia. Then, if she is doing satisfactory work, why make a change?

Mr. FESS. Because we get more efficiency.

Mr. LARSEN of Georgia. When the gentleman says more efficiency that implies that she has not been efficient.

Mr. FESS. And economy also.

Mr. LARSEN of Georgia. The gentleman talks about economy, but he has failed to show where there is any economy in it from a business standpoint. He also talks about more efficiency, and he fails to show wherein the present incumbent is not efficient. What is it that this lady has done or has failed to do?

Mr. LUCE. Mr. Speaker, will the gentleman yield?

Mr. LARSEN of Georgia. Yes.

Mr. LUCE. May I call the gentleman's attention to the fact that the appointment of which he is speaking was made since the report of the Committee on the Library in this matter, and it is fair to assume that the appointment was made and was accepted with the expectation that this rearrangement of the work would come about.

Mr. LARSEN of Georgia. Does the gentleman state that as a fact or is it an assumption on the part of the gentleman?

Mr. LUCE. I think it is a reasonable deduction from the fact that it was well understood by all persons taking an interest in the matter that the technical work previously carried on by the superintendent was to be transferred to Mr. Woods.

Mr. LARSEN of Georgia. That is beautiful language, but it really fails to convey to me the information that I was in hopes of being able to obtain by the question asked. I want to know what the present incumbent understood about it, not what she may have inferred or what deductions may have been drawn from certain circumstances. What does she know about it?

Mr. LUCE. I think I am warranted in saying that the whole program of this bill was perfectly understood at the time of the appointment.

Mr. LARSEN of Georgia. Does the gentleman state that as a fact?

Mr. LUCE. I know that all persons concerned were acquainted with what was proposed in the matter.

Mr. LARSEN of Georgia. The gentleman fails to answer, just as his colleagues did. They have all evaded the question.

Mr. BEGG. Mr. Speaker, will the gentleman yield?

Mr. LARSEN of Georgia. Yes; if the gentleman can shed any light upon the question.

Mr. BEGG. I can not; but I want a little light. The gentleman has repeatedly asked the question whether or not the present incumbent, who, I understand, is a woman, can not or has not discharged the duties of the office satisfactorily. Does the gentleman think that any woman can supervise repair work and construction work and a gang of workmen as efficiently and as satisfactorily as a man, regardless of who the man is?

Mr. LARSEN of Georgia. Yes; I think there are women who can do that, and I assume that she is one of them or she would not have been put into so responsible a position. Inasmuch as

the gentleman has propounded a question to me, may I ask the gentleman if he believes any woman could fill the position?

Mr. BEGG. I believe unhesitatingly that not 1 out of 20 or 1 out of 100 could do the work necessary for a supervisor of a building.

Mr. LARSEN of Georgia. I am asking if there is just one in the United States.

Mr. BEGG. I do not believe she could.

Mr. LARSEN of Georgia. Not even one that could be selected by the present administration?

Mr. BEGG. I do not believe that she would be one, two, three with a man like Elliott Woods.

Mr. LARSEN of Georgia. Does the gentleman believe the administration would select a woman for such a position who was not capable of doing the work?

Mr. BEGG. Oh, temporarily.

Mr. LARSEN of Georgia. Not temporarily at all.

Mr. FESS. Mr. Speaker, will the gentleman yield?

Mr. LARSEN of Georgia. Yes; I would like to have the gentleman from Ohio, Doctor FESS, answer the question. You have all evaded it.

Mr. FESS. Does the gentleman think we can get the same service from a $3,000 official that we can get from a $6,000 man like Mr. Woods?

Mr. LARSEN of Georgia. I think I have made myself plain on that proposition. Mr. Woods has about as much as he can look after efficiently now. I am opposed to putting further burdens upon him unless we are going to save money for the Government.

Mr. FESS. Mr. Woods does not agree with the gentleman on that. He states that he can take over the duties of this office.

Mr. LARSEN of Georgia. Oh, Mr. Woods is like the gentleman from Ohio, who thinks that he can represent a whole State as well as he can represent one district. Probably he can; but the question as to Mr. Woods is one that deserves our serious consideration. It is a matter that concerns many.

Mr. DUPRÉ. Mr. Speaker, will the gentleman yield to me to ask the gentleman from Ohio a question?

Mr. LARSEN of Georgia. Yes.

Mr. DUPRÉ. Can the gentleman from Ohio say how long the former superintendent occupied this position before the lady was appointed?

Mr. FESS. I think six years.

Mr. DUPRÉ. Oh, the gentleman is very ill informed, I think. I think it was more than 26 or 30 years.

Mr. FESS. Oh, no. Mr. Green occupied that position, and it was created for him in 1897. I do not recall the exact date of his death.

Mr. DUPRÉ. Who was the superintendent previous to the lady who was recently appointed from Illinois and confirmed?

Mr. FESS. I think the name is Averill.

Mr. DUPRÉ. How long had he been connected with the Library?

Mr. FESS. I can not recall; but a good many years.

Mr. DUPRÉ. Does the gentleman know anything about his politics?

Mr. FESS. I do not.

Mr. DUPRÉ. The gentleman did not inquire as to that?

Mr. FESS. I did not.

Mr. CANNON. Does the gentleman from Louisiana know anything about his politics?

Mr. DUPRÉ. I am reliably informed that he is a Democrat from the State of New York.

Mr. CANNON. And he has resigned?

Mr. DUPRÉ. At the request of somebody. He did not do it voluntarily.

Mr. CANNON. Then we can indict that man if he made such a request?

Mr. DUPRÉ. I do not believe the gentleman from Illinois made the request, but a lady from the State of Illinois succeeded this man when his resignation was turned in.

Mr. CANNON. Is that the lady who now has the place?

Mr. DUPRÉ. The lady who now has the place is from Illinois.

Mr. CANNON. I am not acquainted with her.

Mr. LARSEN of Georgia. Mr. Speaker, I assume, inasmuch as the lady comes from Illinois, that she will be acceptable to some of the gentlemen from that section of the country, and I object to railroading a lady out of a position simply to accommodate some man who has an ambition to fill many places of importance at once. I believe that the women of this country are as efficient as the men. I believe that they have just as much gray matter, that they are entitled to the same consideration, and I am willing to stand on that proposition. They are citizens of this country and are entitled to all of the rights that you and I enjoy. I am opposed to gentlemen getting together in the committee room and legislating against a woman and then coming upon the floor of the House and saying that she understood this and that when she accepted the position; that she had a right to infer that she would hold the position but a few days. When I call on them for proof they fail to make one single answer that would indicate to any reasonable man that she had such knowledge, or right of inference.

For all we know the little lady, the present incumbent, is at her desk honestly believing that she is quite secure in her position. She believes, just as the gentleman intimated, that when you have gotten rid of an objectionable Democrat, and when you have put in a good Republican lady, that gentlemen would be generous enough and big hearted and big minded enough to let her hold the position without molestation. She believes that her position is safe and secure.

Mr. FESS. Will the gentleman yield?

Mr. LARSEN of Georgia. I do.

Mr. FESS. If the man was removed because of his politics the gentleman——

Mr. LARSEN of Georgia. Well, I do not know.

Mr. FESS. And if our committee reports a bill removing a woman who happens to be a Republican, and I did not know that, does he complain of it?

Mr. LARSEN of Georgia. Oh, the gentleman is dodging the question and the real facts in the case. He says that this bill was reported to get rid of a man. It was reported when the man was in office——

Mr. FESS. The man was out of office; he had resigned.

Mr. LARSEN of Georgia. It was stated a moment ago that when she accepted the position she understood those circumstances. What proof have you of that fact?

Mr. FESS. My understanding is that when the committee made its report there was a vacancy.

Mr. LARSEN of Georgia. I went to one gentleman this morning who has spoken on the bill, and told him that my colleague, the gentleman from Georgia [Mr. PARK] requested that I look after this matter for him to-day and have it passed over until such time as he could present it in person. I was told that the gentleman in whom Mr. PARK was interested had already resigned, so I took the statement to mean that the proposed legislation was put on foot to get rid of him.

Mr. FESS. Will the gentleman yield?

Mr. LARSEN of Georgia. Yes.

Mr. FESS. If the gentleman will take time to read the report of the hearings he will find that the gentleman in whose behalf he is now pleading stated in his statement that he had resigned.

Mr. LARSEN of Georgia. Well, I want to ask the gentleman whether or not his views coincide with those of the gentleman from Ohio [Mr. BEGG], who says that women have not the capacity to look after such matters. I desire to know if that is the reason the gentleman from Ohio is now seeking to get rid of this lady? Does the gentleman believe the women of the country are not capable of looking after such positions?

Mr. FESS. The gentleman from Ohio now on his feet is trying to concentrate the responsibility here in the interest of the public service and on behalf of no individual.

Mr. LARSEN of Georgia. Will the gentleman from Ohio concentrate his thoughts on the question I have asked him and be so fair and frank as to tell me whether he is trying to put this lady out because she is not attending to her duty and can not do it?

Mr. FESS. The gentleman from Ohio [Mr. BEGG] is capable of taking care of himself——

Mr. LARSEN of Georgia. I have got him on record, and I would like to have the other gentleman from Ohio on record. Now, will the gentleman answer? Oh, gentlemen, it is a plain, clear-cut case. It is evident that you are just trying to railroad a little woman out of office who is unprotected and undefended and who perhaps is unaware of the assault that is being made upon her position at this time.

Mr. CANNON. Is the gentleman acquainted with her?

Mr. LARSEN of Georgia. I regret very much that I am not; but, inasmuch as she comes from the good State of Illinois, we may assume she is all right, even though she be a Republican.

Mr. CANNON. Does the gentleman know her politics?

Mr. LARSEN of Georgia. I understand she is a Republican.

Mr. CANNON. I am not acquainted with the lady.

Mr. LARSEN of Georgia. It is very unfortunate.

Mr. CANNON. If I may be allowed a minute, I am not acquainted with the lady; but I want to say——

Mr. LARSEN of Georgia. I will admit all the good things the gentleman may desire to say about her.

Mr. CANNON. I know Elliott Woods, and with all his other duties he says he is competent for this additional duty. Why, Elliott Woods has charge of the Capitol, Elliott Woods has charge of the heating apparatus down here some distance from us, Elliott Woods has charge of the heating of the Government Printing Office, and he has charge of the heating of the Botanic Garden. I want to say that I reported the bill——

Mr. LARSEN of Georgia. May I ask the gentleman if he does not think Mr. Elliott Woods is performing a man's duty at this time without taking a little lady's position away from her?

Mr. CANNON. I have no doubt that Elliott Woods performs his duties about the Capitol and about the various Government buildings adjacent to the Capitol, and is doing amply good work, and that if you add similar duties he could do twice as much.

Mr. LARSEN of Georgia. But the question is this, Is the lady failing to perform her duty?

Mr. CANNON. Good God, I do not know the woman.

Mr. LARSEN of Georgia. Has she failed in anything? If she has not, why should you remove her from office? Elliott Woods is doing his duty and performs his services efficiently, but I want to know if the lady is not doing the same thing? If she is not, put her out; but if she is I am opposed to legislating her out in such manner as you propose.

Mr. CANNON. There has been so much statement about the lady, the lady, the lady. The gentleman is not acquainted with her. I am not acquainted with her. Does the gentleman know her politics?

Mr. LARSEN of Georgia. She is well recommended, and I assume she must be all right. If not, why did the present administration appoint her to so responsible a position?

Mr. CANNON. Very well; but the gentleman attacks these men and says that they have——

The SPEAKER. The time of the gentleman has expired.

Mr. LARSEN of Georgia. Mr. Speaker, I yield the balance of my time to the gentleman from Illinois [Mr. CANNON].

Mr. FESS. Mr. Speaker, I yield the balance of my time to the gentleman from Massachusetts [Mr. LUCE].

Mr. LUCE. There is no occasion to add to the argument that has been presented to the House on this matter, but I would take this opportunity to call the attention of the House to the fact that the suggestion of this change was made by the chairman of the Committee on Appropriations. There has been a great deal in the newspapers in the last few months in praise of the success of the executive department in accomplishing economies. I do not desire to detract one whit therefrom, but simply to emphasize the facts in the present case in order that we may set ourselves right so far as the record goes, as to the performance of duties in this respect through the active leadership and energetic skill of the chairman of the Committee on Appropriations [Mr. MADDEN].

In dollars and cents this is a trifling matter, involving the direct saving of only $600 a year. It perfects, however, an administrative process. The hearings upon it disclosed two far more important instances of economy that I had not myself seen brought to public attention, showing what the chairman of the Committee on Appropriations had accomplished on a much larger scale.

One of them related to the Bureau of Engraving and Printing, where, in the consideration of the problems affecting that bureau, the Committee on Appropriations ascertained that in the operation of the rotary presses it was costing $1,369,000 a year to do what could be done for $610,000, thus indicating that $760,000 more a year was being expended for a certain activity than should be expended. The chairman of this committee thereupon prepared a bill which went to the Committee on Printing and met its approval. I understand that this bill will be presented soon, if it is not already on the calendar, and there is every reason to hope that as a result the saving will be accomplished.

In another instance, concerning the Treasury Department, the Committee on Appropriations discovered that every distillery in the United States, whether obsolete or active, was a bonded warehouse. If there were more than 5,000 gallons of spirits in any distillery it was necessary to employ gaugers and storekeepers, and so on. In that case the chairman of the committee was able to correct the trouble in the appropriation bill, because he had the cooperation of the Senate, and was able to reduce the cost about $900,000 a year.

Those were two big illustrations of the fact that the legislative department of the Government has not failed in its duty to search for economy. Here is a small illustration of the same thing before you now. So we have the extremes, the big and the little, both looked after by our Committee on Appropriations, with its able chairman constantly on watch. [Applause.] It seems to me that this credit should be publicly given to that committee and its chairman. It seems to me that the House itself may ask the attention of the public long enough to realize that by our legislative work the Budget system is being supplemented to the public advantage. [Applause.]

Mr. LARSEN of Georgia. I believe that the gentleman from Massachusetts has always opposed everything in this House that tended to liberate the women, or anything along that line.

Mr. LUCE. I have not been conscious of pursuing such a course.

Mr. LARSEN of Georgia. I take it that the gentleman was opposed to woman suffrage, and inasmuch as the gentleman from Ohio admitted awhile ago that a lady might represent the State of Ohio, if elected to the Senate in his stead, does not the gentleman from Massachusetts think in view of that admission of the gentleman from Ohio, the gentleman from Massachusetts might trust this little library down here to a little lady that has been connected with its administration?

Mr. LUCE. The gentleman's use of the word "little" in connection with the library as well as the lady shows that he may be much more familiar with his subject than I am.

Mr. LARSEN of Georgia. The "gentleman from Georgia" admits that he is much more familiar with the situation than is the gentleman from Massachusetts, otherwise the latter would have agreed with him.

The SPEAKER. The question is on suspending the rules and passing the bill.

The question was taken; and two-thirds having voted in favor thereof, the rules were suspended, and the bill was passed.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had insisted upon its amendments to the bill (H. R. 9527) to amend section 5136, Revised Statutes of the United States, relating to corporate powers of associations so as to provide succession thereof until dissolved and to apply said section to all national banking associations, disagreed to by the House of Representatives, had agreed to the conference asked by the House on the disagreeing votes of the two Houses thereon and had appointed Mr. CALDER, Mr. SHORTRIDGE, and Mr. GLASS as the conferees on the part of the Senate.

ENROLLED BILLS SIGNED.

Mr. RICKETTS, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same:

H. R. 10972. An act to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service.

H. R. 9344. An act providing for the appropriation of funds for acquiring additional water rights for Indians on the Crow Reservation, in Montana, whose lands are irrigable under the Two Leggins Irrigation Canal.

SMALL CLAIMS ON UNSURVEYED LANDS, NEW MEXICO.

Mr. SINNOTT. Mr. Speaker, I ask unanimous consent that the House return to the bill S. 2014, that was passed without prejudice a moment ago. It is No. 280 on the calendar.

The SPEAKER. Has the gentleman consulted with the gentleman who objected?

Mr. SINNOTT. I have spoken to the gentleman from Wisconsin [Mr. STAFFORD] on the matter. I have been able to answer his question.

The SPEAKER. Is there objection?

Mr. WALSH. Reserving the right to object, what kind of an amendment was the gentleman intending to offer? Was he to try to overcome the objection of the gentleman from Wisconsin [Mr. STAFFORD]?

Mr. SINNOTT. It will overcome one objection made by him, and the other objection is overcome by the original act itself. The gentleman from Wisconsin was under the impression that the original act might be in vogue to-day, and he read from section 16, but section 18 of the original act shows that it expired within two years after its passage.

The other question the gentleman from Wisconsin [Mr. STAFFORD] had in mind was that this bill did not except the town lots as the original act did, and I will offer the identical language that is in the original act, excepting the town lots.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The Clerk read as follows:

Be it enacted, etc., That in township surveys hereafter to be made in the State of New Mexico, if it shall be made to appear to the satisfaction of the deputy surveyor making such survey that any person has, through himself, his ancestors, grantors, or their lawful successors in title or possession, been in the continuous adverse actual bona fide possession, residing thereon as his home, of any tract of land or in connection therewith of other lands, all together not exceeding 160 acres, in such township for 20 years next preceding the time of making such survey, the deputy surveyor shall recognize and establish the lines of such possession and make the subdivision of the adjoining lands in accordance therewith. Such possession shall be accurately defined in the field notes of the survey and delineated on the township plat, with the boundaries and area of the tract as a separate legal subdivision. The deputy surveyor shall return with his survey the name or names of all persons so found to be in possession, with a proper description of the tract in the possession of each as shown by the survey, and the proofs furnished to him of such possession.

Upon receipt of such survey and proofs the Commissioner of the General Land Office shall cause careful investigation to be made in such manner as he shall deem necessary for the ascertainment of the truth in respect of such claim and occupation, and if satisfied upon such investigation that the claimant comes within the provisions of this section, he shall cause patents to be issued to the parties so found to be in possession for the tracts respectively claimed by them: *Provided, however*, That no person shall be entitled to confirmation of, or to patent for, more than 160 acres in his own right by virtue of this section.

All claims arising under this act shall be filed with the surveyor general of New Mexico within two years next after the passage of this act, and no claim not so filed shall be valid. No tract of such land shall be subject to entry under the land laws of the United States.

Mr. SINNOTT. Mr. Speaker, I offer the following amendment.

The SPEAKER. The gentleman from Oregon offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. SINNOTT: On page 3, at the end of line 3, add the following: "*And provided further*, That this act shall not apply to any city lot, town lot, village lot, farm lot, or pasture lot held under a grant of any corporation or town the claim to which may fall within the provisions of this act."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the third reading of the Senate bill.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

LAC DU FLAMBEAU BAND OF LAKE SUPERIOR CHIPPEWAS, WIS.

Mr. A. P. NELSON. Mr. Speaker, I ask unanimous consent that the bill H. R. 6428 be restored to its place on the calendar in order that the matter to which reference and objection were made might be cleared up. I have explained it to the gentleman from Massachusetts [Mr. WALSH], and he is agreeable.

The SPEAKER. The gentleman from Wisconsin asks unanimous consent that the bill H. R. 6428 may resume its place on the calendar. Who objected to its consideration?

Mr. A. P. NELSON. The gentleman from Massachusetts [Mr. WALSH].

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

The SPEAKER. The Clerk will report the next bill.

SESSION OF THE UNITED STATES DISTRICT COURT IN THE COUNTY OF SCHENECTADY, N. Y.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 6110) amending section 97 of the act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That section 97 of the act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911, be, and it is, amended so as to read as follows:

"SEC. 97. The State of New York is divided into four judicial districts, to be known as the northern, eastern, southern, and western districts of New York. The northern district shall include the territory embraced on the 1st day of July, 1910, in the counties of Albany, Broome, Cayuga, Chenango, Clinton, Cortland, Delaware, Essex, Franklin, Fulton, Hamilton, Herkimer, Jefferson, Lewis, Madison, Montgomery, Oneida, Onondaga, Oswego, Otsego, Rensselaer, St. Lawrence, Saratoga, Schenectady, Schoharie, Tioga, Tompkins, Warren, and Washington, with the waters thereof. Terms of the district court for said district shall be held at Albany on the second Tuesday in February; at Utica on the first Tuesday in December; at Binghamton on the second Tuesday in June; at Auburn on the first Tuesday in October; at Syracuse on the first Tuesday in April; and, in the discretion of the judge of the court, one term annually at such time and place within the counties of Schenectady, Rensselaer, Saratoga, Onondaga, St. Lawrence, Clinton, Jefferson, Oswego, and Franklin, as he may from time to time appoint. Such appointment shall be made by notice of at least 20 days, published in a newspaper published at the place where said court is to be held. The eastern district shall include the territory embraced on the 1st day of July, 1910, in the counties of Richmond, Kings, Queens, Nassau, and Suffolk, with the waters thereof. Terms of the district court for said district shall be held at Brooklyn on the first Wednesday in every month. The southern district shall include the territory embraced on the 1st day of July, 1910, in the counties of Columbia, Dutchess, Greene, New York, Orange, Putnam, Rockland, Sullivan, Ulster, and Westchester, with the waters thereof. Terms of the district court for said district shall be held at New York City on the first Tuesday in each month. The district courts of the southern and eastern districts shall have concurrent jurisdiction over the waters within the counties of New York, Kings, Queens, Nassau, Richmond, and Suffolk, and over all seizures made and all matters done in such waters; all processes or orders issued within either of said courts or by any judge thereof shall run and be executed in any part of said waters. The western district shall include the territory embraced on the 1st day of July, 1910, in the counties of Allegany, Cattaraugus, Chautauqua, Chemung, Erie, Genesee, Livingston, Monroe, Niagara, Ontario, Orleans, Schuyler, Seneca, Steuben, Wayne, Wyoming, and Yates, with the waters thereof. Terms of the district court for said district shall be held at Elmira on the second Tuesday in January; at Buffalo on the second Tuesdays in March and November; at Rochester on the second Tuesday in May; at Jamestown on the second Tuesday in July; at Lockport on the second Tuesday in October; and at Canandaigua on the second Tuesday in September. The regular sessions of the district court for the western district for the hearing of motions and for proceedings in bankruptcy and the trial of causes in admiralty shall be held at Buffalo at least two weeks in each month of the year, except August, unless the business is sooner disposed of. The time for holding the same and such other special sessions as the court shall deem necessary shall be fixed by rules of the court. All process in admiralty causes and proceedings shall be made returnable at Buffalo. The judge of any district in the State of New York may perform the duties of the judge of any other district in such State upon the request of any resident judge entered in the minutes of his court; and in such cases such judge shall have the same powers as are vested in the resident judge."

With a committee amendment:

On page 2, line 16, after the word "appoint," insert: "*Provided*, That suitable accommodations for holding court at such appointed place be furnished free of expense to the United States.

The SPEAKER. The question is on agreeing to the committee amendment.

Mr. GARRETT of Tennessee. Mr. Speaker, has the objection stage been passed?

The SPEAKER. Yes. The bill has been read.

Mr. GARRETT of Tennessee. I ask for recognition.

The SPEAKER. The Chair recognizes the gentleman from Tennessee.

Mr. GARRETT of Tennessee. May I ask the gentleman from Massachusetts [Mr. WALSH] or the gentleman from New York [Mr. CROWTHER] a question? This seems to go much further than changing terms of court. It seems to change the practice. I have not the bill before me.

Mr. WALSH. This is a reenactment of section 97 of the Judicial Code, and the only change is made by inserting the word "Schenectady" as one of the places where the court may be held by the judge, and by adding the usual proviso that suitable accommodations shall be furnished free of expense. It is a reenactment. As the gentleman will recall, in providing for judicial sittings of the district courts the Judiciary Committee has followed the practice of amending the section by restating the entire section in which changes are desired, and the only change in this section is by putting in the word "Schenectady" and by providing that it shall be free of expense to the United States. Otherwise, it is the same as existing law. The reason for putting in "Schenectady" is that that is the home of a district judge who has been appointed within three or four years, and it was felt that this should be done for his accommodation, as well as for the accommodation of parties litigant who might desire that a term of court should be held in that county at that place, if accommodations could be arranged.

Mr. GARRETT of Tennessee. It does not change the present law?

Mr. WALSH. No. The gentleman from New York [Mr. CROWTHER] introduced the bill.

The SPEAKER. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. CROWTHER, a motion to reconsider the vote whereby the bill was passed was laid on the table.

Mr. GARRETT of Tennessee. Mr. Speaker, reserving the right to object, will the passage of this bill cause the gentleman from New York to cease his attacks on the Senate for not passing the tariff bill earlier? [Laughter.]

Mr. CROWTHER. I would not like to make a promise of that kind at this time. [Laughter.]

Mr. GARRETT of Tennessee. Mr. Speaker, I withdraw my reservation of the right to object.

The SPEAKER. The Clerk will report the next bill.

COMPENSATION TO INJURED UNITED STATES EMPLOYEES.

The next business on the Calendar for Unanimous Consent was the bill (S. 1911) to amend an act entitled "An act to provide compensation for employees of the United States suffering injuries while in the performance of their duties, and for other purposes," approved September 7, 1916.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of this bill?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the act entitled "An act to provide compensation for employees of the United States suffering injuries while in the performance of their duties, and for other purposes," approved September 7, 1916, be amended as follows:

"SEC. 20. That all original claims for compensation for disability shall be made within 60 days after the injury. All original claims for compensation for death shall be made within one year after the death. For any reasonable cause shown the commission may allow original claims for compensation for disability to be made at any time within one year. If the disability or death was the result of an injury sustained during the period of the Great War, and arising out of conditions due to the war, the commission may for any reasonable cause shown allow original claims of civilian employees of the Expeditionary Forces of the United States serving outside of the territory of the United States to be made at any time within one year after the passage of this act."

The SPEAKER. The question is on the third reading of the bill.

The bill was ordered to be read a third time, was read the third time, and passed.

The SPEAKER. The Clerk will report the next bill.

BRIDGE ACROSS LAKE ST. CROIX, WIS.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 10330) to extend the time for the construction of a bridge across Lake St. Croix at or near the city of Prescott, in the State of Wisconsin.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of this bill?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the times for commencing and completing the construction of a bridge and approaches thereto authorized by the act entitled "An act authorizing the Prescott Bridge Co. to construct a bridge across Lake St. Croix at or near the city of Prescott, in the State of Wisconsin," approved February 15, 1921, to be built by the Prescott Bridge Co., a corporation organized under the laws of the State of Wisconsin, or its successors or assigns, across Lake St. Croix at a point suitable to the interests of navigation, at or near the city of Prescott, in the county of Pierce and State of Wisconsin, are hereby extended one and three years, respectively, from the date of the passage of this act.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

With the following committee amendments:

Page 1, line 4, after the word "by," strike out the word "the" and insert the word "an."

Page 1, line 5, after the word "act," strike out "An act authorizing the Prescott Bridge Co. to construct a bridge across Lake St. Croix at or near the city of Prescott, in the State of Wisconsin," and insert the words "of Congress."

Page 1, line 9, after the word "company," strike out "a corporation organized under the laws of the State of Wisconsin, or its successors or assigns."

Page 2, line 1, after the word "Croix," strike out "at a point suitable to the interests of navigation."

Page 2, line 5, strike out the words "the passage of this act," and insert in lieu thereof the words "approval hereof."

The SPEAKER. The question is on agreeing to the committee amendments.

The committee amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was accordingly read the third time and passed.

IMPORTATION OF THE ADULT HONEYBEE.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 11396) to regulate foreign commerce in the importation into the United States of the adult honeybee (Apis mellifica).

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. WINGO. Mr. Speaker, reserving the right to object, what is wrong with this adult honeybee?

Mr. HAUGEN. This is to prevent the importation of diseased bees.

Mr. WINGO. When was the disease discovered?

Mr. HAUGEN. It was discovered in the Isle of Wight in 1904. Investigations have been made in this country, and it is found that the disease has not reached the United States yet. The proposed legislation is to prevent the importation of diseased bees.

Mr. WINGO. Is this a case where the female of the species is not more deadly than the male?

Mr. KINCHELOE. If the gentleman will yield, there is nothing facetious about the bill, if the gentleman understands it.

Mr. WINGO. My friend from Kentucky has drunk so much of the Dawson Springs water that he is not facetious. No man who drinks that water is facetious. [Laughter.]

Mr. KINCHELOE. If the gentleman himself was thoroughly purged once, I do not think he would be quite so facetious. [Laughter.]

Mr. WINGO. The trouble is that I happen to be able to stand more than one purging.

Mr. KINCHELOE. The gentleman has never had an opportunity to be sufficiently purged. That is the trouble.

Mr. WINGO. Perhaps that is true. I used to think that Kentuckians took their liquor straight until I went to Dawson Springs once.

Here by this bill you propose to prohibit absolutely the entrance into the United States of the adult honeybee.

Mr. HAUGEN. Yes; from countries where diseases dangerous to honeybees exist.

Mr. WINGO. And you put all the machinery of the Federal Government, including the Secretary of Agriculture, in pursuit of one honeybee. Is that the object of the bill?

Mr. HAUGEN. Hardly.

Mr. WINGO. Has the honeybee brought any disease into this country now?

Mr. HAUGEN. No; there is none found here now, but there is in other countries, and we want to prevent diseased bees coming here.

Mr. WINGO. How long has this been known?

Mr. HAUGEN. Several years; about 18 years. Investigations have been made in this country during the last two years.

Mr. WINGO. Some one suggested that you took care of this in the tariff bill. Are you afraid this disease will spread over the country before you get the tariff bill passed?

Mr. HAUGEN. I have not had much to do with the framing of the tariff bill.

Mr. WINGO. The gentleman is right about that. The gentleman did not have anything to do with the framing of the tariff bill. He just took what they handed him. But why should the honeybee be barred out? Why can you not inspect him like you inspect any foreign plant that comes in?

Mr. HAUGEN. Because there is no way of telling if the bee is diseased without killing it and examining its respiratory tract in which the mite is found. There is no law now to prevent their importation. There is a law on the statute books to prevent the importation of diseased plants and trees.

Mr. WINGO. Do you want to prevent bees being imported?

Mr. HAUGEN. Yes; from countries where the disease exists. The Post Office Department now prevents the importation of bees through the mails by regulation of the department, but there is no law on the statute books to prevent the importation of these bees in other ways than through the mails.

Mr. WINGO. Is there a statute barring bees from the mails?

Mr. HAUGEN. There is a regulation of the department. The Post Office Department has authority to make rules and regulations governing that.

Mr. WINGO. But what I want to get at is this: You permit bees to come in for experimental or scientific purposes. The gentleman knows what I am driving at. Why is it not possible to regulate the admission of bees? Why not simply bar the admission of diseased adult honeybees?

Mr. HAUGEN. I presume that is exactly what is going to be done. I propose to offer an amendment, on the second page of the bill, giving the Secretary of Agriculture the right to lift the embargo from countries where the disease does not exist.

Mr. WINGO. In other words, you are going to have Congress put on an embargo and then give the Secretary of Agriculture the power to lift it if he wants to?

Mr. HAUGEN. Yes; from countries where the disease does not exist. It must be left to some one to determine where it does not exist.

Mr. WINGO. Why not regulate the admission so as to bar the diseased ones and let the healthy ones come in?

Mr. HAUGEN. It is necessary to kill the bee to detect the disease. I think it would be quite a task to undertake to make the necessary investigations.

Mr. TINCHER. Will the gentleman yield?
Mr. HAUGEN. I yield to the gentleman from Kansas.
Mr. TINCHER. Was not the testimony before the Agricultural Committee that there is no way of telling whether a bee is infected or not without destroying the life of the bee, and that the only way to prevent the disease coming to this country was to stop the importation?
Mr. HAUGEN. We propose to stop the importation from the sections which are infected.
Mr. WINGO. Will the gentleman tell us who testified to what the gentleman from Kansas has stated?
Mr. HAUGEN. Several witnesses.
Mr. TINCHER. A representative of the Department of Agriculture, who had made a careful investigation of the subject, backed up by all of the bee people of the United States.
Mr. WINGO. Where did they make this investigation, in this country or in foreign countries?
Mr. TINCHER. In both this country and foreign countries. They made investigations to determine whether the disease had invaded this country, and they made investigations to determine whether they could tell if a bee was infected or not without destroying the life of the bee, and decided that they could not.
Mr. WINGO. The gentleman from Iowa says they have not this disease in this country now.
Mr. TINCHER. No; they say we have not the disease now, but they have it in other countries from which there is an importation of queen bees. Let me state to the gentleman that the Department of Agriculture proposes by this measure to prevent the disease from coming to this country. Heretofore we have waited until the disease got here, and then had to appropriate money out of the Treasury to wipe out the disease. This bill does not call for any appropriation.
Mr. WINGO. That brings me to the second branch of my inquiry; how much is it estimated that it will cost for bee inspectors and quarantine officers?
Mr. HAUGEN. We have no estimate and this carries no appropriation. I take it that it will be done in conjunction with other work.
Mr. TINCHER. If we prevent the importation of bees, it will not cost anything.
Mr. WINGO. But the gentleman from Iowa said he was going to offer an amendment so that the Secretary of Agriculture could let in good female bees, bees without any disease.
Mr. GARRETT of Tennessee. Will the gentleman yield?
Mr. TINCHER. Yes; if I have the floor.
Mr. GARRETT of Tennessee. Is it determined that only adult bees carry this disease? I see this only prevents the importation of adult honeybees. I am speaking seriously—do not the young bees carry the disease that is found prevalent in the Island of Wight and in Switzerland?
Mr. TINCHER. I think some one asked such a question of the representative of the Department of Agriculture, and I think the only answer made was that there was no importation except of adult bees.
Mr. WINGO. I will state that my understanding of the amendment that is going to be offered is that it not only covers the question of embargo, but the gentleman is going to insert the word "male." Is there any reason for that, or was there any reason given in the hearings?
Mr. TINCHER. I do not understand that male bees are imported. The principal importation of bees is the queen bee; practically all of the imports are the queen bees.
Mr. WINGO. Oh, very well; I understood they were going to restrict it to the male bees and I withdraw my objection. [Laughter.]
Mr. GRAHAM of Illinois. Will the gentleman yield?
Mr. HAUGEN. Yes.
Mr. GRAHAM of Illinois. Why restrict it to the adult? I observe that the letter of the Secretary of Agriculture says the disease is caused by a mite which affects the respiratory organs of the bee and of course can only be told by a microscopical examination. But the disease would affect the young as well as the adult.
Mr. HAUGEN. Only the adult bees are imported.
Mr. GRAHAM of Illinois. This is a bill to keep out the disease; that is the idea, to keep the disease out of the country. Would it not be better to strike out the word "adult" and leave it honeybee?
Mr. BUTLER. Why did you put in the word "adult"?
Mr. HAUGEN. The bill came to the committee prepared by the Department of Agriculture. It was thought that it would fully take care of the situation.
Mr. BUTLER. Can not the young bee have the disease?
Mr. GRAHAM of Illinois. Yes; as far as the report goes.
Mr. WATSON. Will the gentleman yield?
Mr. HAUGEN. Yes.
Mr. WATSON. Is the honey made by the infected bee deleterious to human beings?
Mr. HAUGEN. I can not answer that question. We want to keep the disease out of the country. That is the object of the proposed legislation.
Mr. CHINDBLOM. The gentleman did not sample the honey.
Mr. HAUGEN. No.
Mr. GARRETT of Tennessee. Will the gentleman yield?
Mr. HAUGEN. Yes.
Mr. GARRETT of Tennessee. Have the importations of honey bees been very large?
Mr. HAUGEN. They have been quite heavy. I have not the exact figures.
Mr. GARRETT of Tennessee. But none that are imported have been diseased?
Mr. HAUGEN. Not to the knowledge of the department, except those imported for scientific purposes and for the purpose of investigating this disease. The income from the bee industry in this country amounts to about $75,000,000.
Mr. GARRETT of Tennessee. That is, the industry in this country. Can the gentleman state about how many have been imported?
Mr. HAUGEN. I can not.
Mr. GARRETT of Tennessee. Is there a business of importing honey bees?
Mr. HAUGEN. There is a business of importing them for breeding and selling the new breeds. Various breeds have been imported. The testimony is that there is no urgent need of further importation. I understand that the beekeepers of the country are in favor of this bill.
Mr. GARRETT of Tennessee. I want to say that I am dealing with the matter seriously and I am trying to obtain information about it. Do the breeders of bees in this country import bees from Switzerland or Italy?
Mr. HAUGEN. Yes; I think mostly from Italy. They are developing certain types from various countries. Some make a business of importing for breeding.
The SPEAKER. Is there objection to the consideration of the bill?
There was no objection.
The Clerk read the bill, as follows:

Be it enacted, etc., That, in order to prevent the introduction and spread of diseases dangerous to the adult honeybee, the importation into the United States of the honeybee (Apis mellifica) in its adult stage is hereby prohibited, and all adult honeybees offered for import into the United States shall be destroyed if not immediately exported: *Provided*, That such adult honeybees may be imported into the United States for experimental or scientific purposes by the United States Department of Agriculture: *And provided further*, That such adult honeybees may be imported into the United States from countries where no diseases dangerous to adult honeybees exist, under rules and regulations prescribed by the Secretary of the Treasury and the Secretary of Agriculture.

SEC. 2. That any person who shall violate any of the provisions of this act shall be deemed guilty of a misdemeanor and shall, upon conviction thereof, be punished by a fine not exceeding $500 or by imprisonment not exceeding one year, or both such fine and imprisonment, in the discretion of the court.

The following committee amendment was read:

Page 2, line 1, strike out the word "where" and insert in lieu thereof "in which the Secretary of Agriculture shall determine that."

The committee amendment was agreed to.
Mr. GRAHAM of Illinois. Mr. Speaker, I desire to offer a series of amendments. The first one is to strike out the word "adult" on line 4, page 1.
The Clerk read as follows:

Amendment by Mr. GRAHAM of Illinois: Page 1, line 4, strike out the word "adult."

Mr. GARRETT of Tennessee. Mr. Speaker, will the gentleman yield?
Mr. GRAHAM of Illinois. Yes.
Mr. GARRETT of Tennessee. Why does the gentleman offer that amendment?
Mr. GRAHAM of Illinois. This is a disease that is spread by mites, which are found in the respiratory organs of the bee, according to the letter of the Secretary of Agriculture. It is extremely desirable, inasmuch as this industry represents an annual profit to us of $75,000,000 to $100,000,000, that we keep this disease out, if we can. It may come in on bees that are not adult. I confess I do not know anything about the bee business, but am simply taking the report for the facts.
Mr. GARNER. Mr. Speaker, will the gentleman yield?
Mr. GRAHAM of Illinois. Yes.
Mr. GARNER. Did the gentleman ever have any dealing with bees?
Mr. GRAHAM of Illinois. I have; but not as a bee culturist.
Mr. GARNER. Has the gentleman ever seen an infant bee?
Mr. GRAHAM of Illinois. If there is no such thing as an infant bee, why say adult?

Mr. GARNER. I merely wondered who it was who had ever seen an infant bee.

Mr. GRAHAM of Illinois. There are doubtless bees not considered adult, because they have to get into the adult stage at some time.

Mr. BUTLER. How can you tell an adult bee? How do you know when it is grown up?

Mr. CHINDBLOM. By its sting.

Mr. GRAHAM of Illinois. I see no necessity for having this language in here. I am for the passage of the bill. I think it is a very useful bill; but why put language in the bill so that the man who passes upon the things will have to determine whether the bees are adult or not?

Mr. GARNER. I presume this bill was drawn at the Agricultural Department, and that somebody drew it who is familiar with the subject. He probably had some object in putting that word in. The gentleman from Illinois knows nothing about the business, and yet he wants to change the language, although he says that he is in favor of the bill. I would leave it as it is and let the Agricultural Department language stand.

Mr. GRAHAM of Illinois. I am not so sure but that somebody's judgment on the outside is just as good as some of these department heads who draw these bills. They put in language here which apparently has no purpose. Nobody here seems to know anything about the purpose of it.

Mr. CHINDBLOM. The letter from the Secretary of Agriculture says that the cause of the disease is a mite which invades the respiratory tract of the adult honey bee. Evidently the Department of Agriculture has determined that this mite affects only adult honey bees, and I suppose that is why the proposed law is confined to adult bees.

Mr. MOORE of Virginia. Mr. Speaker, will the gentleman yield?

Mr. GRAHAM of Illinois. Yes.

Mr. MOORE of Virginia. How does one determine what is an adult bee from a scientific or practical standpoint?

Mr. GRAHAM of Illinois. I do not know that anybody can tell. I know one thing surely, that if this law restricts the importation of honeybees you will accomplish your purpose, because the whole will include any part. It seems to me it is safer to strike out the word "adult." Then you will not have to have some one who will pass upon the question of whether the bee is adult or not.

The SPEAKER. The question is on the amendment offered by the gentleman from Illinois.

The amendment was rejected.

The Clerk read as follows:

SEC. 2. That any person who shall violate any of the provisions of this act shall be deemed guilty of a misdemeanor and shall, upon conviction thereof, be punished by a fine not exceeding $500 or by imprisonment not exceeding one year, or both such fine and imprisonment, in the discretion of the court.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. HAUGEN, a motion to reconsider the vote by which the bill was passed was laid on the table.

EXTENSION OF REMARKS.

Mr. CRISP. Mr. Speaker, my colleague, Mr. LARSEN, has asked me to request for him leave to extend his remarks which he made on the floor this afternoon on the bill abolishing the office of Superintendent of the Library?

The SPEAKER. Is there objection?

There was no objection.

BRIDGE ACROSS WHITE RIVER, ARK.

The next bill on the Calendar for Unanimous Consent was the bill H. R. 11244, authorizing the construction of a bridge across White River, in the State of Arkansas.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. WALSH. Mr. Speaker, reserving the right to object, I notice that the county of Independence is authorized to construct a bridge across White River. Is it not usual to locate these counties by the State in which they are?

Mr. HOCH. I think so, and I intend to offer such an amendment.

Mr. WALSH. I have no objection.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the county of Independence is hereby authorized to construct a bridge across White River at or in the immediate vicinity of Batesville, Ark., in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

With the following committee amendments:

Line 4, after the word "construct" insert the words "maintain and operate," and after the words "bridge" insert the words "and approaches thereto."

Line 5, after the word "river" insert the words "at a point suitable to the interests of navigation."

The SPEAKER. The question is on agreeing to the committee amendments.

The amendments were agreed to.

Mr. HOCH. Mr. Speaker, I move to amend, on line 3, by inserting after the word "independence" a comma and the words "State of Arkansas."

The SPEAKER. The gentleman from Kansas offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. HOCH: Page 1, line 3, after the word "independence" insert a comma and the words "State of Arkansas."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. OLDFIELD, a motion to reconsider the vote by which the bill was passed was laid on the table.

PONTOON BRIDGE ACROSS THE MISSOURI RIVER.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 8785) granting the consent of Congress to the Mobridge Co., of Mobridge, S. Dak., to construct a pontoon bridge across the Missouri River.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill? [After a pause.] The Chair hears none.

The Clerk read as follows:

Be it enacted, etc., That the consent of Congress is hereby granted to the Mobridge Bridge Co., of Mobridge, S. Dak., and its successors and assigns, to construct, maintain, and operate a pontoon bridge and approaches thereto across the Missouri River at a point suitable to the interests of navigation, at or near Mobridge, in the county of Walworth, in the State of South Dakota, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. JOHNSON of South Dakota, a motion to reconsider the vote by which the bill was passed was laid on the table.

BRIDGE ACROSS THE PEND OREILLE RIVER.

The next business in order on the Calendar for Unanimous Consent was the bill (H. R. 11265) to authorize the maintenance of a bridge constructed across the Pend Oreille River at the town of Usk, in the State of Washington.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. WALSH. I ask to have the bill reported, Mr. Speaker.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the bridge specified in an act approved August 7, 1919, entitled "An act to authorize the construction of a bridge across the Pend Oreille River at the town of Usk, in the State of Washington," having been constructed without approval of the plans by the Chief of Engineers and the Secretary of War be, and is hereby, declared a lawful structure to be maintained and operated subject to the provisions of an act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906: *Provided*, That unless plans of the said bridge shall have been submitted to the Chief of Engineers and the Secretary of War for their approval and shall have been approved by them within six months after the date of the approval of this act this authority shall then cease and be null and void.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The bill was ordered to be engrossed and read the third time, was read the third time, and passed.

On motion of Mr. WEBSTER, a motion to reconsider the vote by which the bill was passed was laid upon the table.

EXTENSION OF REMARKS.

Mr. APPLEBY. Mr. Speaker, I ask unanimous consent to extend my remarks on House Joint Resolution 297.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The extension of remarks referred to are here printed in full as follows:

Mr. APPLEBY. Mr. Speaker and colleagues, the time for the discussion of House Joint Resolution 297 being far too limited for the importance of the subject, and as the resolution was introduced by me and is of vital interest to my district, as well as to practically all other States having coast lines of any moment, I desire a brief extension of my remarks in the RECORD, that I may call your attention to a few of the more important details connected with the proposed legislation. A brief history of the circumstances leading up to the necessity of calling an international conference on the subject of oil pollution might be of interest.

The problem is one that has arisen largely within the last 5 or 10 years. Up to that time there was no great overseas transportation of crude oil. Prior to this the overseas movement of oil was largely in refined oils. The residue left in the tanks of tank steamers carrying refined oils does very little damage, because they are able to thoroughly clean the tanks; but in the handling of crude oil they never clean the tanks effectively, and then they are filled with water ballast for the return voyage, and when they are nearing harbor they no longer need the ballast and it is pumped overboard, carrying this refuse oil with it. Much of the same thing happens in regard to the oil-burning steamers. And this is again a development of the last few years. These steamers carry oil in their tanks on the outward voyage and fill the tanks with water when the oil is used up, and dump that oily water into the sea when they get near shore. There is also a considerable amount of oil discharged from bilge water in cleaning out the bilge on all ships. A survey of New York Harbor indicates the conditions which is responsible for this rapidly growing evil at this point alone. In a report submitted to the State commissioner of health, Albany, N. Y., by Chief Engineer Theodore Horton on September 26, 1919, he stated:

> From conferences with the officials of the different oil companies whose plants are located on the shores of New York Harbor and its tributaries in Greater New York and New Jersey it was learned that these companies own and operate some 140 tankers, having capacities from 20,000 to 100,000 barrels each, nearly all of which ply between the port of New York and foreign and other domestic ports. This does not include 41 oil tankers owned by the United States Shipping Board, which are used for the transportation of crude and fuel oil to and from New York Harbor and for the bunkering of United States naval vessels and merchant vessels, and merchant vessels of the United States Shipping Board. By December 1 of this year it is expected that the United States Shipping Board will have 70 oil tankers in operation. There are also some 45 or 50 smaller tankers or lighters, having capacity of from 2,000 to 15,000 barrels of oil each, used for the transportation of oil to and from various parts of New York Harbor by the various oil companies. It was also learned that the movement of oil to and from New York Harbor has increased from 300 to 400 per cent within the last five years. During July and August of this year about 60 tankers owned by private oil companies arrived in New York Harbor either with oil or ballast, and some 45 tankers departed from New York Harbor carrying oil or ballast, not including the arrival and departure of tankers owned by the United States Shipping Board.

The careless casting of refuse oil into the sea from oil-burning and oil-carrying steamers has become a serious menace to the fishing industries of the United States; the fire hazard created by the accumulation of floating oil on the piles of piers and bulkheads in our harbors is a growing source of alarm; most serious is the destruction of ocean fisheries from this pollution which threatens to exterminate the food fish, oysters, clams, crabs, and lobsters that are a very material part of our national food supply, in addition to which the dumping of this oil refuse is absolutely ruining the bathing beaches which during the summer attract hundreds of thousands of people to the various seashore resorts along the Atlantic as well as the Pacific coast and the Gulf of Mexico, and the depreciation in value of millions of dollars of seashore property because of this condition is most serious and alarming.

I introduced this resolution in connection with my bill, H. R. 10596, for the prevention of the pollution of the navigable waters of the United States by refuse oil, which is now pending before the Committee on Rivers and Harbors. But any legislation enacted by Congress could only remedy the evil so far as it pertains to territorial waters, and in the testimony both before the Committee on Foreign Affairs and the Committee on Rivers and Harbors it developed through numerous witnesses that much of the pollution took place beyond the three-mile limit. During the hearings on this resolution Secretary Hoover appeared before the committee in support of the resolution, and right here I would like to quote a part of his statement. The Secretary said:

> Early last spring at the request of the various fishermen's associations I called a conference on the problem of oil pollution as it affected the fishermen from all the different coasts and harbors, and they were unanimous in their opinion that there was the greatest menace to their industry from oil pollution. * * * It also developed in the course of the inquiries of the Department of Commerce that the various bathing beaches were seriously affected by this nuisance. Congressman APPLEBY, I think, was the first to raise the question in regard to the bathing beaches on the New Jersey coast. Bathing at many of the points has practically had to be abandoned. When we came to examine into this problem, as the result of bills introduced by Congressman APPLEBY to remedy the evil, the question came up: How are you going to control ships outside of the three-mile limit? It does not seem possible to develop any device of our own for the control of foreign shipping. We then found that foreign governments were equally interested in the problem, and that they have been considering legislation; they have established port control of one sort or another, and particularly in the case of British fisheries they have made fairly extensive studies of the damage being done. The problem here is one which we can no doubt control by legislation, so far as it comes within the three-mile limit. But when we get beyond that, especially in the control of foreign ships, we will have difficulty unless we can make some sort of common arrangement with other governments by which those ships can be controlled; and it is thought that the most effective method of handling that problem was by some sort of conference of the different countries, to see whether we could have some unity of action in control of these problems on the high seas. We would have to agree upon some basis of actual ship control; in other words, legislation which would prevent ships from discharging refuse on the high seas, in the form of oil or bilge water. We do not believe it would seriously interfere with the movements of ships; and we believe that if there were some arrangement made for taking care of this oil refuse in the ports and harbors and treating it, the recovery value of the oil would equalize the cost of removing it.

During Secretary Hoover's testimony the gentleman from New York, the Hon. BOURKE COCHRAN, a member of the Committee on Foreign Affairs, said:

> I should think that the Italian Government and the French Government and the Spanish Government, all of which are deeply interested in this problem, and whose fisheries are deeply affected by this damage, would be glad to come to some kind of an agreement by which this damage could be prevented.

The problem of oil pollution is not a national one; it is international, and foreign governments are equally interested with the United States. It seems to me that, in view of the fact that other nations are interested in this same question and are undertaking to prevent the pollution of waters in their own harbors and along their own shores, a conference called for the purpose of making the question international would be the better way of undertaking to handle matters that might occur outside of the territorial waters of any one of the nations. I believe the leading maritime nations of the world would welcome a conference to discuss ways and means of correcting this oil pollution, and the evidence submitted indicates the importance and urgency of action without undue delay.

TO REBUILD ASSEMBLY HALL, INDIAN SCHOOL, NEAR TOMAH, WIS.

The next business in order on the Calendar for Unanimous Consent was the bill (H. R. 10957) to rebuild the assembly hall of the Indian School, at Tomah, Wis.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. WALSH. Mr. Speaker, reserving the right to object, I would like to ask the gentleman having this matter in charge if he has any objection to striking out, in line 4, page 1, the words "and directed," simply authorizing the rebuilding of the hall, rather than directing it to be built before the appropriation is made?

Mr. BROWN. I have no objection.

Mr. WALSH. I assume the gentleman from New Mexico would accept that amendment?

Mr. MONTOYA. I would.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. WALSH. I withdraw the reservation.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

> *Be it enacted, etc.*, That the Secretary of the Interior be, and he is hereby, authorized and directed to cause the assembly hall of the Indian school, recently destroyed by fire, near Tomah, Wis., to be rebuilt upon the ground and site now owned in that city by the Government, and refurnished in such manner as to meet the present needs of the said school as well as such needs as may reasonably arise in the future, at a cost not to exceed $50,000, including heating, ventilating, plumbing, etc., which may be incident to said rebuilding.
>
> SEC. 2. That the sum of $50,000 is hereby appropriated out of any money in the Treasury not otherwise appropriated for the purposes aforesaid.
>
> SEC. 3. That this act shall be in force from its passage.

The committee amendments were read as follows:

> Page 1, line 4, strike out the words "assembly hall" and insert "school building."
>
> Page 1, line 7, strike out the words "in that city."
>
> Page 2, line 1, after the word "hereby," insert "authorized to be."
>
> Page 2, strike out section 3.

The question was taken, and the amendments were agreed to.

Mr. WALSH. Mr. Speaker, I offer an amendment. Page 1, line 4, after the word "authorized," strike out the words "and directed."

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Page 1, line 4, after the word "authorized," strike out the words "and directed."

The question was taken, and the amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. BROWN, a motion to reconsider the vote by which the bill was passed was laid on the table.

The title was amended so as to read: "A bill to rebuild the school building of the Indian school near Tomah, Wis."

SECOND ASSISTANT SECRETARY AND PRIVATE SECRETARY IN THE DEPARTMENT OF LABOR.

The next bill in order on the Calendar for Unanimous Consent was the bill (H. R. 11155) creating the positions of Second Assistant Secretary and private secretary in the Department of Labor.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. GARRETT of Texas. Mr. Speaker, reserving the right to object, this bill is one of considerable importance. Directly and indirectly it involves some very important questions, as, for instance, the question of immigration, the administration of the immigration laws, and it does not seem to me it ought to come up at this time by unanimous consent. If the gentleman wishes to have it passed without losing its place upon the calendar, I shall not object to it, but I shall object to its being considered by unanimous consent.

Mr. JOHNSON of Washington. If the gentleman will yield, I would like to say to the gentleman this administration and the previous administration have been most insistent of the need of a little more executive help down there. It must be apparent to all gentlemen that a great department of the Government with not to exceed six appointive positions has not too much executive head. Since the last administration we have had a new form of immigration restriction that greatly increases the work of the Secretary, the Assistant Secretary, and the Commissioner of Labor, and their assistants. If there is a place in the whole Government where we need additional executives to act in the name of the Secretary himself, this is the place.

Mr. ZIHLMAN. I will say to the gentleman from Texas the department, under the law, or the Secretary, or the Assistant Secretary, must review all cases of appeal from the immigration laws by an alien demanding or asking admission to our ports, and there are 30——

Mr. JOHNSON of Washington. And Congress has put upon them this labor by giving them the right of review.

Mr. ZIHLMAN. I will say further this small appropriation carried was requested by the Director of the Budget and the members of the Appropriations Committee who handled the appropriations for the Department of Labor have stated that they think this is a very worthy bill and a meritorious bill, and would have granted this appropriation but could not do so as it was legislation on an appropriation bill.

Mr. GARRETT of Tennessee. This involves a question, and the very broad policy, in my opinion—I will leave it to the gentleman if he desires to have it passed over without objection?

Mr. ZIHLMAN. I want to say to the gentleman that a similar bill has passed the Senate, and this comes from our committee with a unanimous report.

Mr. GARRETT of Tennessee. This particular bill has passed the Senate?

Mr. ZIHLMAN. In the form of a Senate bill; this House bill has already passed the Senate and was unanimously reported by our committee.

Mr. GARRETT of Tennessee. In recent days the action of the Senate has gotten to be so it does not appeal to me——

Mr. ZIHLMAN. I say, it is a unanimous report from the House committee.

Mr. RAKER. I would like to say to the gentleman that it appears to me from the hearings that we have had before the Committee on Immigration that this is absolutely an added expense and entirely unnecessary.

The work is getting less, and in the last two months it ought to have been considerably less, and has been, according to the report. There used to be a million and a half immigrants coming in, but now the only ones that are liable to come in will amount to about 200,000.

Mr. JOHNSON of Washington. Now there is a restricted number, but with very important questions involved, whereas formerly there were about a million without appeal.

Mr. RAKER. I know. With the laws in force there will be but little extra labor, if any, in the department, and you are simply adding an assistant secretary when the labor is getting less. This bill should not pass.

Mr. ZIHLMAN. Mr. Speaker, I hope the gentleman from Tennessee will not object.

The SPEAKER. Is there objection?

Mr. GARRETT of Tennessee. I object, Mr. Speaker.

Mr. ZIHLMAN. Mr. Speaker, I move to suspend the rules and pass the bill (S. 3396).

Mr. GARRETT of Tennessee. Mr. Speaker, I make the point of order there is no quorum present.

The SPEAKER. The gentleman from Maryland moves to suspend the rules and the gentleman from Tennessee makes the point of order there is no quorum present.

Mr. ZIHLMAN. Mr. Speaker, I move a call of the House.

The motion was agreed to.

The SPEAKER. The Doorkeeper will close the doors and the Clerk will call the roll.

The roll was called, and the following Members failed to answer to their names:

Andrew, Mass.	Faust	Kunz	Riordan
Andrews, Nebr.	Fenn	Lampert	Robertson

Evans	Knight	Reber	Woodruff
Fairchild	Knutson	Reed, N. Y.	Woodyard
Fairfield	Kreider	Riddick	Yates

The SPEAKER. Two hundred and eighteen Members have answered to their names, a quorum.

Mr. WALSH. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

The SPEAKER. The gentleman from Maryland [Mr. ZIHLMAN] moves to suspend the rules.

Mr. GARRETT of Tennessee. Mr. Speaker, I move that the House do now adjourn.

The question was taken, and the Speaker announced that the noes seemed to have it.

Mr. GARRETT of Tennessee. Division, Mr. Speaker.

The House divided, and there were—ayes 44, noes 102.

Mr. GARRETT of Tennessee. Mr. Speaker, I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 66, nays 156, not voting 208, as follows:

YEAS—66.

Almon	Bulwinkle	Davis, Tenn.	Garrett, Tenn.
Aswell	Byrnes, S. C.	Dominick	Hammer
Bland, Va.	Byrns, Tenn.	Drewry	Hayden

So the motion to adjourn was rejected.

The Clerk announced the following pairs:

Until further notice:

Mr. Treadway with Mr. Cockran.

Mr. Paige with Mr. Sullivan.

Mr. Kahn with Mr. Cantrill.

Mr. Sanders of Indiana with Mr. McClintic.

Mr. Evans with Mr. Bell.

Mr. Funk with Mr. Lee of Georgia.

Mr. Kline of New York with Mr. Bankhead.

Mr. Larson of Minnesota with Mr. Padgett.

Mr. Codd with Mr. Hawes.

Mr. Fitzgerald with Mr. Kuntz.

Mr. McPherson with Mr. Smithwick.

Mr. Glynn with Mr. Tyson.

Mr. Vestal with Mr. Driver.

Mr. Goodykoontz with Mr. Collins.

Mr. Graham of Pennsylvania with Mr. McSwain.

Mr. Newton of Missouri with Mr. Fields.

Mr. Rose with Mr. Oliver.

Mr. Morin with Mr. Upshaw.

Mr. Fairfield with Mr. Clark of Florida.

Mr. Cole of Iowa with Mr. Lyon.

Mr. Dunn with Mr. Swank.

Mr. Campbell of Pennsylvania with Mr. Goldsborough.

Mr. Fordney with Mr. Parks of Arkansas.

Mr. Haugen with Mr. Weaver.

Mr. Hukriede with Mr. Vinson.

Mr. Kelley of Michigan with Mr. Tague.

Mr. Lineberger with Mr. Barkley.

Mr Kiess with Mr. Kindred.

Mr. Nolan with Mr. Sisson.

Mr. Maloney with Mr. Stedman.

Mr. Ansorge with Mr. Thomas.

Mr. Robsion with Mr. Taylor of Arkansas.

Mr. Yates with Mr. Hudspeth.

Mr. Davis of Minnesota with Mr. Sears.

Mr. Winslow with Mr. Cullen.

Mr. Henry with Mr. Deal.

Mr. Reed of New York with Mr. Black.

Mr. Coughlin with Mr. Kitchin.

Mr. Kendall with Mr. Sisson.

Mr. Dickinson with Mr. Lea of California.

Mr. Michaelson with Mr. Stoll.

Mr. Beck with Mr. Drane.

Mr. Knutson with Mr. Montague.

Mr. Stiness with Mr. O'Brien.

Mr. Frear with Mr. Thomas.

Mr. Burtness with Mr. Taylor of Colorado.

Mr. Volk with Mr. Pou.

Mr. Burke with Mr. Griffin.

Mr. Connolly of Pennsylvania with Mr. Harrison.

Mr. Lee of New York with Mr. Rayburn.

Mr. Fuller with Mr. Gallivan.

Mr. Chandler of Oklahoma with Mr. Martin.

Mr. Bowers with Mr. Hardy of Texas.

Mr. Brennan with Mr. Mansfield.

Mr. Hutchinson with Mr. Riordan.

Mr. Perkins with Mr. Blanton.

Mr. Patterson of Missouri with Mr. Sabath.

Mr. Kennedy with Mr. Hooker.

Mr. Olpp with Mr. Rainey of Alabama.

The result of the vote was announced as above recorded.

Mr. ZIHLMAN. Mr. Speaker, I wish to withdraw my motion that the rules be suspended.

The SPEAKER. The gentleman from Maryland withdraws his motion to suspend the rules. The Clerk will report the next bill on the Unanimous Consent Calendar.

A CERTAIN INDEMNITY SCHOOL-LAND SELECTION, FLORIDA.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 8763) validating and confirming a certain indemnity school-land selection of the State of Florida.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. WALSH. Mr. Speaker, I was unable to hear the title of the bill read.

The SPEAKER. The Clerk will again report the title of the bill.

The title of the bill was again read.

The SPEAKER. Is there objection to the present consideration of this bill?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the following Florida indemnity school-land selection be, and the same is hereby, validated and confirmed, notwithstanding its inclusion within an abandoned military reservation, and the Secretary of the Interior is authorized to approve the same to the State of Florida, if the selection list is in all respects regular and accompanied by the necessary fees: Gainesville, 016649, filed May 1, 1920, covering the southwest quarter of the northwest quarter of section 28, township 54 south of range 42 east, Tampa meridian, Florida, 40 acres.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. LARSEN of Georgia, a motion to reconsider the vote whereby the bill was passed was laid on the table.

The SPEAKER. The Clerk will report the next bill.

SPECIAL MISSION TO THE BRAZIL CENTENNIAL CELEBRATION.

The next business on the Calendar for Unanimous Consent was the resolution (S. J. Res. 173) authorizing the President to appoint a commission to represent the Government of the United States at the centennial celebration of the independence of Brazil, to be held at Rio de Janeiro in September next.

The title of the resolution was read.

The SPEAKER. Is there objection to the present consideration of the resolution?

There was no objection.

The Clerk read as follows:

Joint resolution (S. J. Res. 173) authorizing the President to appoint a commission to represent the Government of the United States at the centennial celebration of the independence of Brazil, to be held at Rio de Janeiro in September next.

Whereas the Government of Brazil has invited the Government of the United States to be represented at the centennial celebration of the independence of Brazil, to be held in September next at Rio de Janeiro: Be it

Resolved, etc., That the President is hereby authorized to appoint and send to Brazil a commission not to exceed five members to represent the Government of the United States at the said celebration.

SEC. 2. That the expenses of the said commission shall be paid, under the direction and subject to the approval of the Secretary of State, from the appropriation of $1,000,000 for the expenses of taking part in an international exposition to be held at Rio de Janeiro, Brazil, provided for in the act of Congress approved December 15, 1921, entitled "An act making appropriations to supply deficiencies in appropriations for the fiscal year ending June 30, 1922, and prior fiscal years, supplemental appropriations for the fiscal year ending June 30, 1922, and subsequent fiscal years, and for other purposes."

With a committee amendment, as follows:

Strike out all after the resolving clause and insert:

"That the President is hereby authorized to appoint and send to Brazil a special mission of friendship, good will, and congratulation not to exceed five members to represent the Government and people of the United States at the celebration of the independence of Brazil, to be held in September, 1922, at Rio de Janeiro.

"SEC. 2. That the expenses of the said special mission shall be paid, under the direction and subject to the approval of the Secretary of State, from the appropriation for the expenses of taking part in said international exposition as provided for in the deficiency appropriation act of Congress approved December 15, 1921, and subject to all the provisions thereof."

The SPEAKER. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The SPEAKER. The question is on the third reading of the Senate joint resolution.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed.

By unanimous consent, the title was amended so as to read: "Joint resolution authorizing the President to appoint a special mission of friendship, good will, and congratulation to represent the Government and people of the United States at the centennial celebration of the independence of Brazil."

Mr. WALSH. Mr. Speaker, was the amendment to the preamble agreed to?

The SPEAKER. No. Without objection, the amendment to the preamble will be agreed to.

The preamble was amended so as to read:

Whereas the Government of Brazil has invited the Government of the United States to be represented at the centennial celebration of the independence of Brazil, to be held in September, 1922, at Rio de Janeiro.

On motion of Mr. LANHAM, a motion to reconsider the vote whereby the resolution was agreed to was laid on the table.

The SPEAKER. The Clerk will report the next bill.

DETENTION HOSPITAL AT NOME, ALASKA.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 9528) providing for the retention by the Government of the property in Nome, Alaska, known as the Detention Hospital Building and its use by the Bureau of Education, Department of the Interior.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. CRAMTON. Mr. Speaker, I have made some effort to get information as to what the repair and furnishing of this building will cost the Department of the Interior. Not having been able to get satisfactory information as to that, I ask unanimous consent that the bill be passed over to-day without prejudice.

Mr. SUTHERLAND. Mr. Speaker, I hope the gentleman will withdraw his objection. I will try to give him the information he desires.

Mr. CRAMTON. If the gentleman can state definitely how much it will cost to repair the building and furnish it for the purposes desired, I shall be interested in hearing it, and for that purpose I will reserve the right to object.

Mr. SUTHERLAND. I can not give the gentleman definite figures. It simply means the transfer of the building originally constructed as a detention hospital at Nome to be used as a residence for the teachers employed in the Bureau of Education at Nome.

Mr. CRAMTON. I made some effort to get information before my statement here. I asked the Bureau of Education in the Department of the Interior, and they said it would cost nothing for the repair of the building, which manifestly could not be correct. They could not say how much it would cost for the furniture.

They said they had the money available for furniture in the appropriation bill that we have just passed. An examination of the estimates furnished and of the hearings develops that there appears to be no fund available for buying furniture, but their estimate was at least $1,000 for repairs. That, of course, is a vague statement. The transfer of the building may be a good thing, but I think for the present, until we know something about what the department expect to pay, and until they can give us direct information that does not conflict with other facts and figures which they have presented, I shall have to object, but I am willing to have the bill go over without prejudice.

Mr. SUTHERLAND. Mr. Speaker, I want to state that up in that section of the country the teachers of the Bureau of Education have no elaborate furniture or elaborate houses to live in. In fact, they live under almost primitive conditions. This is a well-constructed, warm building, divided, as I understand, into rooms suitable for their occupancy, and they would like to be able to repair it this summer so that they can occupy it this winter.

Mr. LANGLEY. Will the gentleman yield?

Mr. SUTHERLAND. I yield to the gentleman from Kentucky.

Mr. LANGLEY. For the information of the gentleman from Michigan I wish to say that while we did not know exactly how much would be involved we did know that it would not be a large amount, and the main purpose of the bill met with the hearty approval of every member of the committee, so that we had no hesitancy in unanimously reporting the bill. I hope the gentleman from Michigan will not object.

Mr. CRAMTON. As far as the main purpose of the bill is concerned I probably agree with the gentleman; but if the department has gone into the matter they should have some estimate of cost available, which they apparently have not as yet. This is a House bill. After it passes the House it will have to pass the other body, and there is reason to believe that there is legislation before the other body that will occupy its attention for some time; so I do not think any damage will be done if this bill goes over for a week or two. I therefore ask unanimous consent that the bill go over without prejudice.

The SPEAKER. The gentleman from Michigan asks unanimous consent that the bill go over without prejudice. Is there objection?

There was no objection.

MONUMENT TO FRANCIS SCOTT KEY.

The SPEAKER. The Chair by virtue of the authority vested in him appoints as the committee to attend the dedication of the monument to Francis Scott Key in Baltimore next week Mr. MUDD, Mr. BLAKENEY, Mr. HILL, Mr. LINTHICUM, and Mr. GOLDSBOROUGH.

BRIDGE ACROSS OHIO RIVER NEAR STEUBENVILLE, OHIO.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 11646) authorizing the construction of a bridge across the Ohio River near Steubenville, Ohio.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of this bill?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The bill was read as follows:

Be it enacted, etc., That the consent of Congress is hereby granted to the Steubenville & Pittsburgh Bridge Co. and their successors and assigns to construct, maintain, and operate a bridge and approaches thereto across the Ohio River, at or near the north city limits of the city of Steubenville, Ohio, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That this act shall be null and void unless the construction of said bridge is commenced within two years and completed within five years from the date of the approval hereof.

SEC. 3. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was ordered to be engrossed and read a third time, and was accordingly read the third time and passed.

On motion of Mr. GRAHAM of Illinois a motion to reconsider the vote by which the bill was passed was laid on the table.

DAWSONSPRINGS (KY.) SANATORIUM.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 11588) to amend an act entitled "An act to authorize the Secretary of the Treasury to provide hospital and sanatorium facilities for discharged sick and disabled soldiers, sailors, and marines."

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. WALSH. Reserving the right to object, Mr. Speaker, this is a rather important matter, and I doubt whether it should be taken up by unanimous consent.

Mr. KINCHELOE. I feel sure that if the gentleman knows the facts he will not object. The gentleman will remember that when the original act was passed providing for the sanatorium at Dawsonsprings, Ky., it provided that the land should be deeded to the Government free of charge by the people. While the bill was pending the citizens down there began to get options on this land. The Treasury Department afterwards demanded 5,000 acres. Before the bill finally became a law some of these options had expired.

The money was raised and the State legislature supplemented the amount by an appropriation of $40,000. The balance of the money is now in the bank ready to be paid to the balance of the landowners. The hospital has been completed, but there are a few landowners since the option expired who are trying to hold up the citizens and get fabulous prices for the land. Under the original act the Secretary of the Treasury had not the right to institute condemnation proceedings. I have a letter from the United States district attorney there saying that he will have to institute proceedings, but can not do it until the original act is amended. I took the matter up with the Department of Justice and submitted this amendment to them and they approved it, as did also the Treasury Department. The money is now in the bank, and it is only a question of giving the Secretary of the Treasury the right to call on the Department of Justice to exercise the right of eminent domain. It will all be done without any expense to the Government, because the money is awaiting final action.

Mr. WALSH. That is the intention, of course.

Mr. KINCHELOE. That is what the bill provides, and the money is in the bank.

Mr. WALSH. Assuming that the condemnation proceedings, which no one can tell what the jury may assess, condemns it at a price greater than the money available for the payment of the 5,000 acres. How is the situation going to result?

Mr. KINCHELOE. They will have to raise more money.

Mr. WALSH. Why not raise the money and buy the land?

Mr. KINCHELOE. The money has been raised and is available to buy the land.

Mr. WALSH. I doubt whether the Government ought to establish a precedent of condemning land for the purpose of letting some one else pay for it.

Mr. KINCHELOE. I will say to the gentleman that under the section 9881, volume 10, of the compiled statutes, is where I got the authority for my amendment. I will be glad to show it to the gentleman. It was in connection with rivers and harbors.

Mr. WALSH. Does the gentleman feel assured that the condemnation proceedings which would be instituted and the award that would be made will be within the amount of money available under the act of the State legislature?

Mr. KINCHELOE. I will say that I think it will not only be sufficient, but I think there will be an ample amount left when it is done.

Mr. WALSH. How many tracts of land does this affect?

Mr. KINCHELOE. But very few, as I understand. It is nearly all settled up. After the citizens donated all they were able to, they then went to the legislature and asked for an appropriation sufficient to take care of all emergencies. It is a question for the Treasury Department and the Department of Justice in order to clear this up. The hospital is completed.

Mr. LANGLEY. I want to say to the gentleman that the sentiment is so strongly in favor of the institution, and they are so anxious to make it a great success, that it will act as a deterrent to any tendency to give too high an award.

Mr. WALSH. Yes; but the jury will not come from Dawsonsprings. This will be in the United States court.

Mr. KINCHELOE. Yes.

Mr. LANGLEY. Let me say that I was at Frankfort the other day and there was no question about that. This matter was under consideration by the State legislature. Governor Morrow investigated the matter, and there was no question by anybody as to the award coming within the appropriation.

Mr. WALSH. How much land have they acquired?

Mr. KINCHELOE. I can not say; there are only a few tracts left. In reference to the statement that it will be tried in the Federal court I want to say that it will be tried at Owensboro, Ky.

Mr. GREEN of Iowa. The Government will be made liable.

Mr. KINCHELOE. No; the Government will not be made liable.

Mr. WALSH. Not unless the Legislature of Kentucky should repeal the act.

Mr. KINCHELOE. The Legislature of Kentucky has adjourned, and it has biennial sessions.

Mr. BURTON. I want to say that there is a precedent for this. I believe I drew the act to which the gentleman from Kentucky has made reference. There may be cases come up in the future in which the owners will charge exorbitant prices, and it will be utterly impossible to obtain the land for public improvement within the bounds of reason unless by such a method as this. I remember the case arose in reference to rivers and harbors.

Mr. KINCHELOE. It was a river and harbor statute.

Mr. WALSH. Mr. Speaker, in view of the explanation and the precedent, I withdraw the reservation of objection.

The SPEAKER pro tempore (Mr. DOWELL). Is there objection?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk reported the bill as follows:

Be it enacted, etc., That subsection C of section 7 of the act entitled "An act to authorize the Secretary of the Treasury to provide hospital and sanatorium facilities for discharged sick and disabled soldiers, sailors, and marines," approved March 3, 1919, be amended by adding at the end thereof a new sentence to read as follows: "*Provided*, That whenever any person, company, or corporation, municipal or private, shall undertake or shall have undertaken to secure any land or easement therein, which in the opinion of the Secretary of the Treasury is needed for the site of or in connection with the proper and convenient construction, maintenace, and operation of such sanatorium for the purpose of conveying the same to the United States free of cost and shall be unable for any reason to obtain the same by purchase and acquire a valid title thereto, the Secretary of the Treasury may, in his discretion, cause proceedings to be instituted in the name of the United States for the acquirement by condemnation of said land or easement, and it shall be the duty of the Attorney General of the United States to institute and conduct such proceedings upon the request of the Secretary of the Treasury: *Provided further*, That all expenses of said proceedings and any award that may be made thereunder shall be paid by the said person, company, or corporation, to secure which payment the Secretary of the Treasury may require the said person, company, or corporation to execute a proper bond in such amount as he may deem necessary before said proceedings are commenced."

With the following committee amendments:

Page 2, line 4, strike out the word "sanatorim" and insert the word "sanatorium."

Page 2, line 8, strike out the words "in the name of the United States for the acquirement" and insert in lieu thereof the words "to acquire such land or easement for the United States."

The SPEAKER pro tempore. The question is on agreeing to the committee amendments.

The committee amendments were agreed to.

The SPEAKER pro tempore. Without objection, the Clerk will correct the spelling of the word "approved," in line 6, page 1.

There was no objection.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. KINCHELOE, a motion to reconsider the vote by which the bill was passed was laid on the table.

LEAVES OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. GOODYKOONTZ, for one week, on account of important business.

To Mr. MONTAGUE, for two days, on account of important business.

To Mr. DOUGHTON (at the request of Mr. BULWINKLE) for five days, on account of important business.

To Mr. TAYLOR of Tennessee, for two weeks, on account of important business.

ADJOURNMENT.

Mr. MONDELL. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; and accordingly (at 4 o'clock and 50 minutes p. m.) the House adjourned until to-morrow, Tuesday, June 6, 1922, at 12 o'clock noon.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. CAMPBELL of Kansas: Committee on Rules. S. Con. Res. 23. A concurrent resolution creating a joint committee to determine the indebtedness of the United States to the District of Columbia or of the District of Columbia to the United States growing out of relations existing since the organic act of 1878; without amendment (Rept. No. 1066). Referred to the Committee of the Whole House on the state of the Union.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Pensions was discharged from the consideration of the bill (H. R. 10191) granting a pension to Anna P. McCroskey, and the same was referred to the Committee on Invalid Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. MURPHY: A bill (H. R. 11901) authorizing the construction of a bridge across the Ohio River to connect the city of Benwood, W. Va., and the city of Bellaire, Ohio; to the Committee on Interstate and Foreign Commerce.

By Mr. KISSEL: A bill (H. R. 11902) designating the daisy as the national flower of the United States; to the Committee on the Library.

By Mr. McKENZIE: A bill (H. R. 11903) to authorize and direct the Secretary of War to sell to Henry Ford nitrate plant No. 1 at Sheffield, Ala.; nitrate plant No. 2 at Muscle Shoals, Ala.; Waco Quarry, near Russellville, Ala.; and to lease to the corporation to be incorporated by him Dam No. 2 and Dam No. 3 (as designated in H. Doc. 1262, 64th Cong., 1st sess.), including power stations, when constructed, as provided herein, and for other purposes; to the Committee on Military Affairs.

By Mr. ALMON: A bill (H. R. 11904) authorizing the acceptance of the proposal of Henry Ford for the completion and leasing of the dams and hydroelectric plants at Muscle Shoals, and for the purchase of nitrate plant No. 1, nitrate plant No. 2, the Waco Quarry, and the interest of the Government in the Gorgas Warrior River steam plant, all in the State of Alabama, dated May 31, 1922; to the Committee on Military Affairs.

By Mr. SUTHERLAND: A bill (H. R. 11905) to provide for the establishment of the Supreme Court for the Territory of Alaska, imposing additional duties on the district judges; to the Committee on the Judiciary.

By Mr. JAMES: Joint resolution (H. J. Res. 343) authorizing the Secretary of War to loan cots, mattresses, and blankets for the use of the American Legion at the State encampment to be held in Iron Mountain, Mich., in July, 1922; to the Committee on Military Affairs.

By Mr. MADDEN: Joint resolution (H. J. Res. 344) to authorize the Secretary of the Treasury to detail four persons paid from the appropriation for the collection of customs; to the Committee on Ways and Means.

By Mr. HOGAN: Concurrent resolution (H. Con. Res. 60) providing for the compiling, printing, and binding of 1,000,000 copies of the official records of the United States in the war with Germany; to the Committee on Printing.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BROWNE of Wisconsin: A bill (H. R. 11906) granting a pension to Spencer E. Graves; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11907) granting a pension to Barbara Bever; to the Committee on Invalid Pensions.

By Mr. CONNOLLY of Pennsylvania: A bill (H. R. 11908) granting a pension to Frederick C. Oulahan; to the Committee on Pensions.

Also, a bill (H. R. 11909) authorizing the reinstatement of Frank C. Meade as first lieutenant in the Regular Army; to the Committee on Military Affairs.

By Mr. KNUTSON: A bill (H. R. 11910) granting a pension to Joseph D. Thompson; to the Committee on Invalid Pensions.

By Mr. MICHAELSON: A bill (H. R. 11911) for the relief of John C. Carlson; to the Committee on Claims.

Also, a bill (H. R. 11912) for the relief of E. A. Bergstrom; to the Committee on Claims.

By Mr. MICHENER: A bill (H. R. 11913) granting a pension to Lucy Ann Parker; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11914) granting a pension to Nellie Pettit; to the Committee on Invalid Pensions.

By Mr. MURPHY: A bill (H. R. 11915) for the relief of Harrison Nysewander; to the Committee on Military Affairs.

By Mr. PATTERSON of Missouri: A bill (H. R. 11916) granting a pension to Hanna C. Seward; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11917) granting a pension to Elizabeth Jones; to the Committee on Invalid Pensions.

By Mr. PURNELL: A bill (H. R. 11918) granting an increase of pension to Celesta Lamme; to the Committee on Invalid Pensions.

By Mr. RAMSEYER: A bill (H. R. 11919) granting a pension to William E. Johnson; to the Committee on Pensions.

By Mr. REECE: A bill (H. R. 11920) granting a pension to James R. Daniel; to the Committee on Pensions.

Also, a bill (H. R. 11921) granting a pension to Henry Garfield Clemons; to the Committee on Invalid Pensions.

By Mr. RICKETTS: A bill (H. R. 11922) granting a pension to William H. Poindexter; to the Committee on Pensions.

By Mr. SANDERS of Indiana: A bill (H. R. 11923) for the relief of Earl Mankin; to the Committee on Naval Affairs.

By Mr. THOMAS: A bill (H. R. 11924) granting an increase of pension to Tillie Wester; to the Committee on Pensions.

By Mr. TREADWAY: A bill (H. R. 11925) granting a pension to Mary L. Dill; to the Committee on Invalid Pensions.

By Mr. UNDERHILL: A bill (H. R. 11926) for the relief of the Staples Transportation Co., of Fall River, Mass.; to the Committee on Claims.

By Mr. YOUNG: A bill (H. R. 11927) for the relief of Anna Volker; to the Committee on Claims.

By Mr. MacGREGOR: Resolution (H. Res. 361) to pay Harry J. Hunt for additional services; to the Committee on Accounts.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

5902. By the SPEAKER (by request): Resolutions adopted by the Union Evangelical Church of Three Rivers, Mass., urging the United States to assure protection to the Armenians; to the Committee on Foreign Affairs.

5903. By Mr. CULLEN: Petition of Henry Ford, for the completion and leasing of Muscle Shoals; to the Committee on Military Affairs.

5904. Also, resolution adopted by the members of Group VIII, New York State Bankers' Association, urging the reappointment of Mr. Harding to the position of governor of the Federal Reserve Board; to the Committee on Banking and Currency.

5905. By Mr. GALLIVAN: Petition of Private Soldiers and Sailors' Legion of the United States of America, urging that the Muscle Shoals plant be leased to Henry Ford; to the Committee on Military Affairs.

5906. By Mr. KAHN: Resolution by the Native Sons of the Golden West, San Francisco, Calif., petitioning that all regulations permitting concessions to be granted for educational, religious, or charitable purposes include patriotic purposes; to the Committee on the Judiciary.

5907. Also, resolution by the Native Sons of the Golden West, San Francisco, Calif., opposing the immigration and colonization by Japanese and other Asiatics in California; to the Committee on Immigration and Naturalization.

5908. By Mr. KISSEL: Petition of the United Chemical Works, New York City, relative to the pending tariff bill; to the Committee on Ways and Means.

5909. Also, petition of Aspegren & Co. (Inc.), New York City, relative to the pending tariff bill; to the Committee on Ways and Means.

5910. By Mr. LEA of California: Petition signed by 185 citizens of Healdsburg, Calif., protesting against the passage of Sunday legislation bills; to the Committee on the District of Columbia.

5911. By Mr. RYAN: Petition of citizens of New York City in mass meeting assembled in Madison Square Garden, pledging their moral and financial support to maintain the republic of Ireland and urging the United States to take certain steps relative thereto; to the Committee on Foreign Affairs.

5912. By Mr. SINCLAIR: Petitions of the Business and Professional Women's Club and Kiwanis Club of Devils Lake, N. Dak., protesting against the repeal of section 416 of the transportation act of 1920 and against other adverse railroad legislation; to the Committee on Interstate and Foreign Commerce.

5913. By Mr. SPEAKS: Papers to accompany House bill 11809; to the Committee on Invalid Pensions.

SENATE.

TUESDAY, *June 6, 1922.*

(Legislative day of Thursday, April 20, 1922).

The Senate met at 11 o'clock a. m., on the expiration of the recess.

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Borah	Frelinghuysen	McKinley	Sheppard
Broussard	Gooding	McLean	Simmons
Calder	Hale	McNary	Smith
Cameron	Harris	Myers	Smoot
Capper	Harrison	Nelson	Spencer
Caraway	Heflin	Newberry	Sterling
Colt	Johnson	Nicholson	Sutherland
Culberson	Jones, N. Mex.	Norris	Swanson
Cummins	Jones, Wash.	Oddie	Townsend
Curtis	Kellogg	Overman	Underwood
Dial	Kendrick	Page	Walsh, Mass.
Dillingham	Keyes	Phipps	Walsh, Mont.
du Pont	Ladd	Pitman	Watson, Ga.
Edge	La Follette	Poindexter	Watson, Ind.
Fernald	McCormick	Ransdell	Williams
France	McCumber	Rawson	Willis

The PRESIDENT pro tempore. Sixty-four Senators have answered to their names. There is a quorum present.

CENTENNIAL CELEBRATION AT RIO DE JANEIRO.

Mr. McCUMBER. Mr. President, some time ago the Senate passed a joint resolution (S. J. Res. 173), which went to the House, and some slight changes were made in the phraseology in the House. It is a joint resolution authorizing the President to appoint a commission to represent the Government of the United States at the centennial celebration of the independence of Brazil to be held at Rio de Janeiro in September next. The State Department is anxious that the matter be passed upon. I understand that the joint resolution has passed the House and has been returned to the Senate.

The PRESIDENT pro tempore. The Chair is advised that the joint resolution has not been returned from the House.

Mr. McCUMBER. Very well. I shall have to wait until it comes over.

PETITIONS AND MEMORIALS.

Mr. NELSON presented a resolution adopted by the officers of the Ladies' Aid Society, Presbyterian Church, of Elbow Lake, Minn., favoring the granting of relief to the suffering peoples of Armenia, which was referred to the Committee on Foreign Relations.

Mr. CAPPER presented a resolution adopted by Farmers' Union, Local No. 492, of Tipton, Kans., protesting against the passage of the so-called Jones-Greene ship subsidy bill, which was referred to the Committee on Commerce.

Mr. JONES of Washington presented a petition of sundry citizens of Dalkena and Newport, Wash., praying for the enactment of legislation reviving the United States Grain Corporation so as to stabilize prices of certain farm products, which was referred to the Committee on Agriculture and Forestry.

He also presented a resolution adopted by the Central Washington Presbytery, at Naches, Wash., favoring the enactment of legislation providing for Sunday observance in the District of Columbia, which was referred to the Committee on the District of Columbia.

He also presented resolutions adopted by the Seattle Presbytery, Presbyterian Church at Seattle, Wash., and the Central Washington Presbytery at Naches, Wash., favoring amendments to the Constitution providing for uniform marriage and divorce laws and prohibiting polygamy, which were referred to the Committee on the Judiciary.

PUBLICATION OF SUPREME COURT REPORTS.

Mr. NELSON. Mr. President, I report back from the Committee on the Judiciary with amendments the bill (H. R. 11450) to provide for the printing and distribution of the Supreme Court Reports and amending sections 225, 226, 227, and 228 of the Judicial Code. On account of the urgency and importance of the matter I ask for the immediate consideration of the bill. I will make a brief statement, so that the Senate may understand what is involved.

Mr. UNDERWOOD. Will the Senator allow the bill to be read first for information?

Mr. NELSON. Certainly.

The PRESIDENT pro tempore. The Secretary will read the bill for the information of the Senate.

The Assistant Secretary read the bill by title.

Mr. UNDERWOOD. I do not care to have the bill read at length.

Mr. NELSON. I can briefly explain the substance of the bill. Heretofore decisions of the Supreme Court have been printed under contract with a private publishing company. I think the last contract was with Banks & Co. That contract expired last October. There is as yet no provision for publishing the decisions of the court which have been rendered during this session of the court. The object of the bill is to provide for that publication.

The Judiciary Committee of the Senate unanimously amended the bill as it came from the House so as to provide that the reports shall be printed and distributed by the Government Printing Office. Heretofore the reporter of the Supreme Court has had partly a salary and partly some perquisites through the publisher. Last year under that arrangement his compensation amounted to $9,700 net. Under the bill as we have amended it we propose to abolish all perquisites and to give him a salary of $8,500 a year, equal to the salary of a circuit judge. He is also given an allowance of $3,500 a year for clerk hire and assistance in the work.

The work of the reporter is very important. He has to prepare all syllabi of cases, because they are not prepared by the court. He has to revise and verify all citations of authorities. He has to make abstracts of the briefs of counsel in order to put them into the reports. His work is very important. Under the bill as we have amended it he will be given a compensation of about $1,200 less than he received during the past year.

The reports are to be printed at the Government Printing Office and furnished to the public at cost, whatever the cost may be. The bill as it came from the House provided that the Supreme Court should let the publication of the reports on contract. We eliminated that part of the bill and provided that the reports should be published at the Government Printing Office. We had an estimate made during the hearings by the Government Printing Office, and they think the reports can be published, if I recall correctly, at an average price of about $1.65 or $1.75 per volume.

In view of the fact that no provision exists for the publication of the reports now it is very urgent that the bill should be passed. I am unwilling to take the time of the Senate further in explanation of the measure unless some Senator desires to ask a question.

Mr. OVERMAN. Mr. President, I think this will prove to be a great saving of money to the Government. The Judiciary Committee was asked to allow $3 for every copy of a report and that the reports be printed by contract. We sent down and got an estimate from the Public Printer as to the probable cost of the publication of the reports. He said he could publish them at $1.65 per volume. It will save money to the lawyers and to the Government. Instead of buying them from the publisher they can be obtained from the Public Printer at the actual cost. Not only that, but the printing of the reports will give employment to those persons at the Printing Office who have to give up their jobs in summer time and keep these employed on this work. I have been trying to get this action taken for years. I am glad that the House has passed the bill, and it ought to be passed by the Senate without any objection.

The PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 11450) to provide for the printing and distribution of the Supreme Court Reports and amending sections 225, 226, 227, and 228 of the Judicial Code, which had been reported from the Committee on the Judiciary with amendments.

The PRESIDENT pro tempore. The Secretary will state the committee amendments.

The amendments of the Committee on the Judiciary were, on page 1, line 7, before the word "and," to insert "as"; in line 8, after the words "Chief Justice," to strike out "he shall" and to insert a comma and the words "and when so directed to"; in line 9, after the word "published," to strike out "preliminary" and to insert "advance"; on page 2, line 3, after the words "Government Printing Office," to strike out: "or he may, when so directed by the court or the Chief Justice, enter into a contract or contracts in the name of the United States with private printing establishments for said printing and binding, but no such contracts shall cover a longer period than three years, and no contract shall be awarded except where sealed proposals shall have been submitted in accordance with duly advertised request for bids, with a reservation of the right to reject any or all such bids. Whenever bids are received under the provisions hereof, and before any award shall be made, the reporter shall secure an estimate from the Public Printer of the cost of doing the work in the Government Printing Office, and no contract shall be awarded where such work can be done for less in said Government Printing Office unless the court shall determine it to be in the public interest.

"Any contract awarded hereunder shall be secured by a bond with surety for the faithful performance of same and adequate provision for liquidated damages in case of a breach thereof"; on page 3, line 2, after the word "for," to strike out "furnishing estimates and"; on page 3, after line 3, to strike out "Whenever said printing and binding are done under contract, all volumes, pamphlets, copies, proofs, and plates shall be the property of the United States, and said contract shall contain provisions for the delivery thereof to the Public Printer"; on page 3, line 12, before the words "per annum," to strike out "$7,500" and to insert "$8,500"; in line 14, after the word "law," to strike out the semicolon and the following words "and neither the reporter nor any assistants shall receive further or additional compensation by reason of any contract entered into under the provisions of section 225 of the Judicial Code as amended by this act"; on page 5, line 21, before the word "for," to strike out "General"; on page 7, line 25, after the word "installments," to insert "to be sold by the Public Printer"; on page 8, line 2, after the words "cost of," to strike out "composition, plating, printing, and binding, and such additional amount as shall equal as nearly as may be, one-half," and in lieu thereof to insert "production, including in such cost"; in line 12, after the word "any," to strike out "contract or"; and in line 24, to strike out "the appropriation for the salary and expenses of the reporter" and to insert "miscellaneous receipts," so as to make the bill read:

Be it enacted, etc., That section 225 of the Judicial Code is hereby amended to read as follows:

"SEC. 225. It shall be the duty of the reporter to prepare the decisions of the Supreme Court for printing and publication in bound volumes, as and when directed by the court or the Chief Justice; and when so directed to cause to be printed and published advance copies of said decisions in pamphlet installments.

"The reporter, by requisition upon the Public Printer, shall have the printing and binding herein required done at the Government Printing Office.

"The quality and size of the paper, type, format, proofs, and binding shall be determined by the reporter subject to approval of the court or the Chief Justice.

"Authority is hereby conferred upon the Public Printer for doing the printing and binding specified herein."

SEC. 2. That section 226 of the Judicial Code is hereby amended to read as follows:

"SEC. 226. The salary of the reporter shall be $8,500 per annum, payable out of the Treasury in monthly installments, which shall be in full compensation for the services required by law. He shall also be allowed for professional and clerical assistance and stationery not to exceed $3,500 per annum, to be paid upon vouchers signed by him and approved by the Chief Justice. He shall be furnished a room in the Capitol, with suitable furniture, convenient to the space occupied by the Supreme Court and the law library thereof."

SEC. 3. That section 227 of the Judicial Code is hereby amended to read as follows:

"SEC. 227. The reports provided for in section 225 shall be printed, bound, and issued within eight months after said decisions have been rendered by the Supreme Court, and within said period the Attorney General shall distribute copies of said Supreme Court reports as follows: To the President, the Justices of the Supreme Court, the judges of the Court of Customs Appeals, the judges of the Circuit Courts of Appeal, the judges of the district courts, the judges of the Court of Claims, the judges of the Court of Appeals and of the Supreme Court of the District of Columbia, the judges of the several Territorial courts, the Secretary of State, the Secretary of the Treasury, the Secretary of War, the Secretary of the Navy, the Secretary of the Interior, the Postmaster General, the Attorney General, the Secretary of Agriculture, the Secretary of Commerce, the Secretary of Labor, the Solicitor General, the Assistant to the Attorney General, each Assistant Attorney General, each United States district attorney, each Assistant Secretary of each of the executive departments, the Assistant Postmaster General, the Secretary of the Senate for use of the Senate, the Clerk of the House of Representatives for the use of the House of Representatives, the governors of the Territories, the Solicitor for the Department of State, the Treasurer of the United States, the Solicitor of the Treasury, the Comptroller General of the United States, the Assistant Comptroller General, the Comptroller of the Currency, the Director of the Budget, the Assistant Director of the Budget, the Commissioner of Internal Revenue, the Director of the Mint, the solicitor of the General Accounting Office, each of the chiefs of divisions in the General Accounting Office, the counsel of the Bureau of the Budget, the Judge Advocate General, War Department; the Chief of Finance, War Department; the Judge Advocate General, Navy Department; the Paymaster General, Navy Department; the Commissioner of Indian Affairs, the Commissioner of General Land Office, the Commissioner of Pensions, the Commissioner of Patents, the Commissioner of Education, the Commissioner of Navigation, the Commissioner General of Immigration, the Director of Geological Survey, the Director of the Census, the Forester and Chief of Forest Service, Department of Agriculture; the purchasing agent, Post Office Department; the Interstate Commerce Commission, the Federal Trade Commission, the Clerk of the Supreme Court of the United States, the marshal of the Supreme Court of the United States, the United States Attorney for the District of Columbia, the chairman, United States Shipping Board; the Naval Academy at Annapolis, Md.; the Military Academy at West Point, N. Y.; and the heads of such other executive offices as may be provided by law of equal grade with any of said offices, each one copy; to the law library of the Supreme Court, 25 copies; to the law library of the Department of the Interior, 2 copies; to the law library of the Department of Justice, 5 copies; to the Secretary of the Senate for the use of committees of the Senate, 30 copies; to the Clerk of the House of Representatives for use of the committees of the House, 35 copies; to the marshal of the Supreme Court as custodian of the public property used by the court for the use of the justices thereof in the conference room, robing room, and court room, 3 copies; to the Secretary of War for the use of the proper courts and officers of the Philippine Islands, and for the headquarters of military departments in the United States, 12 copies; and to each of the places where district courts of the United States are now holden, including Hawaii and Porto Rico, 1 copy.

"The Attorney General shall distribute one complete set of said reports and one set of the digests thereof to such executive officers as are entitled to receive said reports under this section and have not already received them; to each United States judge and to each United States district attorney who has not received a set; to each of the places where district courts are now held to which reports have not been distributed and to each of the places at which a district court may hereafter be held, the edition of said reports and digests to be selected by the judge or officer receiving them.

"No distribution of reports and digests under this section shall be made to any place where the court is held in a building not owned by the United States unless there be at such place a United States officer to whose responsible custody they can be committed.

"The clerks of courts (except the Supreme Court) shall in all cases keep the said reports and digests for the use of the courts and of the officers thereof. Said reports and digests shall remain the property of the United States and shall be preserved by the officers above named and by them turned over to their successors in office.

"The Public Printer shall turn over to the Attorney General, upon request, such reports as he may require in order to make the distribution authorized to be made by the Attorney General hereunder."

SEC. 4. Section 228 of the Judicial Code is hereby amended to read as follows:

"SEC. 228. The number of bound volumes and advance pamphlet installments, to be printed under the provisions of section 225, shall be determined by the reporter from estimates furnished by the Attorney General and the Superintendent of Documents, and the prices for said bound volumes and pamphlet installments to be sold by the Public Printer shall be fixed by the reporter with the approval of the Attorney General and shall equal the cost of production, including in such cost the sums appropriated for the salary and expenses of the reporter under the provisions of section 226.

"Receipts from the sale of said reports and pamphlet installments shall be covered into the Treasury to the credit of miscellaneous receipts.

"Whenever the supply of bound copies of any volume produced under any requisition pursuant to section 1 of this act shall have been disposed of, reprints from the original plates shall be made at the Government Printing Office from time to time in sufficient numbers to meet current demands. Such reprints shall equal, as nearly as possible, in quality of presswork, paper, and binding the original editions, and shall be sold at the price fixed for the latest volume published when the reprints are made; so much of the money thus derived as equals the cost of making and distributing the reprints sold shall be credited to the appropriation for printing and binding, the remainder thereof shall be deposited in the Treasury to the credit of miscellaneous receipts."

SEC. 5. That the provisions of this act shall be effective as of November 1, 1921: *Provided, however*, That there shall be deducted from the salary and allowances fixed by section 226 of the Judicial Code, as amended hereby, such sums as may have been paid or allowed out of the Treasury to the reporter for work done by him in the preparation for printing and binding of reports of decisions rendered since the opening of the October, 1921, term of the Supreme Court.

Such sums as may be necessary to carry into effect the provisions of sections 225, 226, 227, and 228 of the Judicial Code as amended by this act are hereby authorized to be appropriated annually out of any money in the Treasury not otherwise appropriated.

The amendments were agreed to.

The bill was reported to the Senate as amended and the amendments were concurred in.

The amendments were ordered to be engrossed, and the bill to be read a third time.

The bill was read the third time and passed.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. CUMMINS:

A bill (S. 3679) to amend the act of June 30, 1906, entitled "An act creating a United States court for China and prescrib-

ing the jurisdiction thereof"; to the Committee on the Judiciary.

By Mr. CALDER:

A bill (S. 3680) for the relief of Charles R. Tice; to the Committee on Civil Service.

By Mr. BALL:

A bill (S. 3681) to incorporate the Washington Rapid Transit Co.; to the Committee on the District of Columbia.

By Mr. SMITH:

A bill (S. 3682) for the relief of Sullivans Island, S. C.; to the Committee on Claims.

By Mr. HEFLIN:

A bill (S. 3683) authorizing the Secretary of the Interior to sell and patent to George M. Bailey certain lands; to the Committee on Public Lands and Surveys.

By Mr. NICHOLSON:

A bill (S. 3684) authorizing the Secretary of the Interior to lease to certain persons and corporations certain lands in Tillman and Cotton Counties, Okla., belonging to the United States, that were, prior to February 25, 1920, claimed in good faith under the placer mining laws of the United States, and for other purposes; to the Committee on Public Lands and Surveys.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. Overhue, its enrolling clerk, announced that the House had passed the bill (S. 1911) to amend an act entitled "An act to provide compensation for employees of the United States suffering injuries while in the performance of their duties, and for other purposes," approved September 7, 1916.

The message also announced that the House had passed the bill (S. 2014) to provide for the settlement of small holding claims on unsurveyed land in the State of New Mexico, with an amendment, in which it requested the concurrence of the Senate.

The message further announced that the House had passed the joint resolution (S. J. Res. 173) authorizing the President to appoint a commission to represent the Government of the United States at the centennial celebration of the independence of Brazil, to be held at Rio de Janeiro in September next, with amendments, in which it requested the concurrence of the Senate.

The message also announced that the House had passed the following bills and joint resolutions, in which it requested the concurrence of the Senate:

H. R. 6110. An act amending section 97 of the act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911;

H. R. 7544. An act authorizing the Postmaster General to temporarily reduce the pay of rural carriers for disciplinary purposes instead of suspending them without pay;

H. R. 8763. An act validating and confirming a certain indemnity school-land selection of the State of Florida;

H. R. 8785. An act granting the consent of Congress to the Mobridge Bridge Co., of Mobridge, S. Dak., to construct a pontoon bridge across the Missouri River;

H. R. 10211. An act authorizing an appropriation to meet proportionate expenses of providing a drainage system for Piute Indian lands in the State of Nevada within the Newlands reclamation project of the Reclamation Service;

H. R. 10330. An act to extend the time for the construction of a bridge across Lake St. Croix at or near the city of Prescott, in the State of Wisconsin;

H. R. 10517. An act providing for the confirmation of title of certain purchasers from the State of Louisiana of lands formerly included in the Fort Sabine Military Reservation, in Cameron Parish, La., now abandoned;

H. R. 10957. An act to rebuild the school building of the Indian school near Tomah, Wis.;

H. R. 11244. An act authorizing the construction of a bridge across White River in the State of Arkansas;

H. R. 11265. An act to authorize the maintenance of a bridge constructed across the Pend Oreille River at the town of Usk, in the State of Washington;

H. R. 11393. An act to abolish the office of the Superintendent of the Library Building and Grounds and to transfer the duties thereof to the Architect of the Capitol and the Librarian of Congress;

H. R. 11396. An act to regulate foreign commerce in the importation into the United States of the adult honeybee (Apis mellifica);

H. R. 11407. An act to amend an act entitled "An act for the retirement of employees in the classified civil service, and for other purposes," approved May 22, 1920;

H. R. 11646. An act authorizing the construction of a bridge across the Ohio River near Steubenville, Ohio;

H. R. 11588. An act to amend an act entitled "An act to authorize the Secretary of the Treasury to provide hospital and sanatorium facilities for discharged sick and disabled soldiers, sailors, and marines";

H. J. Res. 170. Joint resolution to approve the holding of a national and international exhibition in the city of Philadelphia in 1926 upon the Fairmount Park and parkway site selected by the Sesquicentennial Exhibition Association, and lands contiguous thereto that may be acquired for that purpose, as an appropriate celebration of the one hundred and fiftieth anniversary of the signing of the Declaration of Independence;

H. J. Res. 297. Joint resolution requesting the President of the United States to call a conference of maritime nations with a view to the adoption of effective means for the prevention of pollution of navigable waters by oil-burning and oil-carrying steamers by the dumping into such waters of oil waste, fuel oil, oil sludge, oil slop, tar residue, and water ballast; and

H. J. Res. 313. Joint resolution providing for the disposal of articles produced by patients in the United States Veterans' Bureau.

ENROLLED BILLS SIGNED.

The message further announced that the Speaker of the House had signed the following enrolled bills, and they were thereupon signed by the President pro tempore:

S. 539. An act to further amend an act entitled "An act to regulate commerce," approved February 4, 1887, as amended;

H. R. 9344. An act providing for the appropriation of funds for acquiring additional water rights for Indians on the Crow Reservation, in Montana, whose lands are irrigable under the Two Leggins Irrigation Canal; and

H. R. 10972. An act to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service.

CENTENNIAL CELEBRATION AT RIO DE JANEIRO.

Mr. McCUMBER. Mr. President, in the absence of the chairman of the Committee on Foreign Relations, I ask the Chair to lay before the Senate the amendments of the House to Senate Joint Resolution 173.

The PRESIDING OFFICER (Mr. LADD in the chair) laid before the Senate the amendments of the House of Representatives to the joint resolution (S. J. Res. 173) authorizing the President to appoint a commission to represent the Government of the United States at the centennial celebration of the independence of Brazil, to be held at Rio de Janeiro in September next, which were to strike out all after the resolving clause and insert:

That the President is hereby authorized to appoint and send to Brazil a special mission of friendship, good will, and congratulation not to exceed five members to represent the Government and people of the United States at the celebration of the independence of Brazil, to be held in September, 1922, at Rio de Janeiro.

SEC. 2. That the expenses of the said special mission shall be paid, under the direction and subject to the approval of the Secretary of State, from the appropriation for the expenses of taking part in said international exposition as provided for in the deficiency appropriation act of Congress approved December 15, 1921, and subject to all the provisions thereof.

Amend the title so as to read: "Joint resolution authorizing the President to appoint a special mission of friendship, good will, and congratulation to represent the Government and people of the United States at the centennial celebration of the independence of Brazil."

And to amend the preamble so as to read: "Whereas the Government of Brazil has invited the Government of the United States to be represented at the centennial celebration of the independence of Brazil, to be held in September, 1922, at Rio de Janeiro: Be it."

Mr. McCUMBER. Mr. President, the amendments are only slight changes in the form of the words, and are not at all material. I therefore move that the Senate agree to the House amendments.

Mr. KING. There is no change in the number of persons appointed or the amount or anything of that kind?

Mr. McCUMBER. No; "not to exceed five" is the way it reads.

Mr. KING. Upon the representation of the Senator I have no objection.

The PRESIDING OFFICER. The question is on agreeing to the amendments of the House.

The amendments were agreed to.

HOUSE BILLS AND JOINT RESOLUTIONS REFERRED.

The following bills and joint resolutions were severally read twice by title and referred as indicated below:

H. R. 6110. An act amending section 97 of the act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911; to the Committee on the Judiciary.

H. R. 7544. An act authorizing the Postmaster General to temporarily reduce the pay of rural carriers for disciplinary purposes instead of suspending them without pay; to the Committee on Post Offices and Post Roads.

H. R. 8763. An act validating and confirming a certain indemnity school-land selection of the State of Florida; and

H. R. 10517. An act providing for the confirmation of title of certain purchasers from the State of Louisiana of lands formerly included in the Fort Sabine Military Reservation, in Cameron Parish, La., now abandoned; to the Committee on Public Lands and Surveys.

H. R. 11393. An act to abolish the office of Superintendent of the Library Building and Grounds and to transfer the duties thereof to the Architect of the Capitol and the Librarian of Congress; to the Committee on the Library.

H. R. 11396. An act to regulate foreign commerce in the importation into the United States of the adult honeybee (Apis mellifica); to the Committee on Agriculture and Forestry.

H. R. 11407. An act to amend an act entitled "An act for the retirement of employees in the classified civil service, and for other purposes," approved May 22, 1920; to the Committee on Civil Service.

H. R. 11588. An act to amend an act entitled "An act to authorize the Secretary of the Treasury to provide hospital and sanatorium facilities for discharged sick and disabled soldiers, sailors, and marines"; to the Committee on Public Buildings and Grounds.

H. R. 10211. An act authorizing an appropriation to meet proportionate expenses of providing a drainage system for Piute Indian lands in the State of Nevada within the Newlands reclamation project of the Reclamation Service; and

H. R. 10057. An act to rebuild the school building of the Indian school near Tomah, Wis.; to the Committee on Indian Affairs.

H. R. 8785. An act granting the consent of Congress to the Mobridge Bridge Co., of Mobridge, S. Dak., to construct a pontoon bridge across the Missouri River;

H. R. 10330. An act to extend the time for the construction of a bridge across Lake St. Croix at or near the city of Prescott, in the State of Wisconsin;

H. R. 11244. An act authorizing the construction of a bridge across White River in the State of Arkansas;

H. R. 11265. An act to authorize the maintenance of a bridge constructed across the Pend Oreille River at the town of Usk, in the State of Washington;

H. R. 11646. An act authorizing the construction of a bridge across the Ohio River near Steubenville, Ohio; and

H. J. Res. 170. Joint resolution to approve the holding of a national and international exhibition in the city of Philadelphia, in 1926, upon the Fairmount Park and parkway site selected by the Sesquicentennial Exhibition Association, and lands contiguous thereto that may be acquired for that purpose, as an appropriate celebration of the one hundred and fiftieth anniversary of the signing of the Declaration of Independence; to the Committee on Commerce.

H. J. Res. 297. Joint resolution requesting the President of the United States to call a conference of maritime nations with a view to the adoption of effective means for the prevention of pollution of navigable waters by oil-burning and oil-carrying steamers by the dumping into such waters of oil waste, fuel oil, oil sludge, oil slop, tar residue, and water ballast; to the Committee on Foreign Relations.

H. J. Res. 313. Joint resolution providing for the disposal of articles produced by patients in the United States Veterans' Bureau; to the Committee on Finance.

MARKHAM'S LINCOLN MEMORIAL DEDICATION POEM.

Mr. NORRIS. Mr. President, I ask unanimous consent to have printed in the RECORD the poem and the introductory remarks of Edwin Markham, delivered at the dedication of the Lincoln Memorial on the 30th day of May last.

There being no objection, the poem was ordered to be printed in the RECORD, as follows:

THE DEDICATION POEM.

Read by Edwin Markham at the dedication of the Lincoln Memorial at Washington, D. C., May 30, 1922. Before reading, he said:

"No oration, no poem, can rise to the high level of this historic hour. Nevertheless, I venture to inscribe this revised version of my Lincoln poem to this stupendous Lincoln Memorial, to this far-shining monument of remembrance, erected in immortal marble to the honor of our deathless martyr—the consecrated statesman, the ideal American, the ever-beloved friend of humanity."

LINCOLN, THE MAN OF THE PEOPLE.

When the Norn mother saw the whirlwind hour
Greatening and darkening as it hurried on,
She left the Heaven of Heroes and came down
To make a man to meet the mortal need.
She took the tried clay of the common road—
Clay warm yet with the genial heat of earth,
Dasht through it all a strain of prophecy;
Tempered the heap with thrill of human tears;
Then mixt a laughter with the serious stuff.
Into the shape she breathed a flame to light
That tender, tragic, ever-changing face;
And laid on him a sense of the mystic powers,
Moving—all husht—behind the mortal veil.
Here was a man to hold against the world,
A man to match the mountains and the sea.

The color of the ground was in him, the red earth;
The smack and tang of elemental things;
The rectitude and patience of the cliff;
The good-will of the rain that loves all leaves;
The friendly welcome of the wayside well;
The courage of the bird that dares the sea;
The gladness of the wind that shakes the corn;
The pity of the snow that hides all scars;
The secrecy of streams that make their way
Under the mountain to the rifted rock;
The tolerance and equity of light
That gives as freely to the shrinking flower
As to the great oak flaring to the wind—
To the grave's low hill as to the Matterhorn
That shoulders out the sky. Sprung from the West,
He drank the valorous youth of a new world.
The strength of virgin forests braced his mind,
The hush of spacious prairies stilled his soul.
His words were oaks in acorns; and his thoughts
Were roots that firmly gript the granite truth.

Up from log cabin to the Capitol,
One fire was on his spirit, one resolve—
To send the keen ax to the root of wrong,
Clearing a free way for the feet of God,
The eyes of conscience testing every stroke,
To make his deed the measure of a man.
He built the rail pile as he built the State,
Pouring his splendid strength through every blow:
The grip that swung the ax in Illinois
Was on the pen that set a people free.

So came the captain with the mighty heart;
And when the judgment thunders split the house,
Wrenching the rafters from their ancient rest,
He held the ridgepole up, and spikt again
The rafters of the home. He held his place—
Held the long purpose like a glowing tree—
Held on through blame and faltered not at praise.
And when he fell in whirlwind, he went down
As when a lordly cedar, green with boughs,
Goes down with a great shout upon the hills,
And leaves a lonesome place against the sky.

RED RIVER BRIDGE, N. DAK.

Mr. CALDER. By the direction of the Committee on Commerce, I ask unanimous consent for permission to report favorably from the Committee on Commerce Senate bill 3580 and Senate bill 3610, which are bridge bills, and I shall ask unanimous consent for their present consideration.

Mr. UNDERWOOD. Are the bills in the usual form?

Mr. CALDER. Yes; and their passage is recommended by the War Department.

The PRESIDING OFFICER. Is there objection to the request of the Senator from New York? The Chair hears none.

Mr. CALDER. From the Committee on Commerce I report back favorably without amendment the bill (S. 3580) to extend the time for the construction of a bridge across the Red River of the North, at or near the city of Pembina, N. Dak., and I submit a report (No. 750) thereon. I ask unanimous consent for the present consideration of the bill.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read as follows:

Be it enacted, etc., That the time for commencing and completing the construction of a bridge and approaches thereto authorized by the act of Congress approved June 5, 1920, to be constructed by the counties of Pembina, N. Dak., and Kittson, Minn., across the Red River of the North at a point suitable to the interests of navigation at or near the city of Pembina, N. Dak., are hereby extended two and three years, respectively, from the date of approval hereof.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

OHIO BRIDGE NEAR STEUBENVILLE, OHIO.

Mr. CALDER. From the Committee on Commerce I report back favorably without amendment the bill (S. 3610) authorizing the construction of a bridge across the Ohio River near Steubenville, Ohio, and I submit a report (No. 751) thereon. I ask unanimous consent for the immediate consideration of the bill.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read as follows:

Be it enacted, etc., That the consent of Congress is hereby granted to the Steubenville & Pittsburgh Bridge Co., and their successors and assigns, to construct, maintain, and operate a bridge and approaches thereto across the Ohio River at or near the north city limits of the city of Steubenville, Ohio, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That this act shall be null and void unless the construction of said bridge is commenced within two years and completed within five years from the date of the approval hereof.

SEC. 3. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

Mr. HARRISON. Mr. President, on yesterday the Senate listened to a very eloquent speech by the distinguished senior Senator from Indiana [Mr. WATSON]. On that occasion the Senator from Indiana maintained the high reputation that he has won as an orator. I sometimes wonder what the Republican Party would do if it were not for the eloquence of the distinguished Senator from Indiana. Whenever the Republicans in convention assembled or elsewhere need to be inspired they always send for him, and from a Republican viewpoint he always measures up to every expectation. Very recently, when discouragement had spread throughout Indiana and despair filled the heart of every Republican in that State, the Republicans appealed to him to attend their State convention and to give them some of his eloquence, that they might thereby gain encouragement and their hopes revive. From all the reports which have been received from that convention the Senator from Indiana measured up full stature to all of his past performances.

Those who were present tell of an apparent harmonious meeting; they state that the lion and the lamb "lay down together" in that convention. They say that the tribute paid by the distinguished senior Senator from Indiana—whether sincere or forced—to the recent nominee of the Republican Party in that State for the United States Senate was very fulsome; that he proclaimed him as the great Progressive leader of the Nation, and although he did not commit himself to Albert J. Beveridge, should he be selected as the next Senator from that State, as the next Republican nominee for the Presidency, his eulogy on that occasion will be used by the friends of Mr. Beveridge throughout the country in his coming campaign for the Presidency.

It is also stated that the eulogy delivered by Mr. Beveridge in that convention on the senior Senator from Indiana was just as eloquent and just as fulsome as that which the Senator from Indiana had made of him. He practiced reciprocity. He was kind—whether sincere or forced—and proclaimed the Senator from Indiana as the greatest keynoter the world had ever seen.

I understand that he said that his keynote speech in that convention in Indianapolis was to him by far the most attractive as well as welcome he had ever heard the distinguished Senator from Indiana deliver. Evidently it sounded very beautiful to the recent Republican nominee from that State for the senatorship. Apparently to all intents and purposes the senior Senator from Indiana and the recent nominee are now in thorough accord.

So the tariff bill has worked great wonders in this Chamber. The onslaughts made by the distinguished Senator from North Carolina [Mr. SIMMONS], the Senator from New Mexico [Mr. JONES], and the junior Senator from Utah [Mr. KING], and others on this side have caused consternation in the ranks of the majority. Day by day we have seen accretions to our ranks and more votes have been constantly gathering against the outrageous provisions of the pending bill. Before the Senator from Indiana on yesterday made his speech the morale across the aisle was broken; Senators were deserting the lines; divisions were being formed; and it is little wonder that the leadership over there at their meeting the other day resolved on a plan to revive the drooping spirits of certain Republican Senators and give them renewed hope to combat the minority as we fight against the provisions of this tariff bill carrying rates higher than any heretofore framed. So they called the eloquent Senator back from Indiana into that conference; and I can hear the Senator from Massachusetts [Mr. LODGE] and the senior Senator from North Dakota [Mr. MCCUMBER] and the senior Senator from Kansas [Mr. CURTIS] say, "Jim, something must be done; our lines are being broken; we are not able to answer the attacks of Democratic Senators; the country is waking up and finding us out; our boys are in turmoil; they are frightened—running helter-skelter—and something must be done to stem the tide and hold the line."

If anything in the world could accomplish the result of keeping the boys in line, they knew what might do it; they knew that a speech from the distinguished senior Senator from Indiana, if anything could, would turn the trick. So again I imagine I can hear them say, "Now, Jim, we can not stand another week of these onslaughts; the desertions are too great; they are getting in their work; and so on Monday morning the first thing when the Senate meets you must be there ready to go on; we will see the Vice President and arrange that no one else gets the floor, and we will see that the boys are in their seats, and we will hold them there, even though you speak two hours and a half; but you must speak in your old-time fashion and inspire us anew with some of the Republican protective theories." They said, "It doesn't matter if it is old stuff—some of them will know no better—give it to them." So that plan was adopted, and yesterday all of the colleagues of the Senator from Indiana were here; they were listening with bated breath; and he certainly did speak. After it was over it was all arranged that each one in turn, led by the "elder statesmen," should go up and shake his hand and tell him what a great speech he had made, and that would give inspiration to the newer crowd to come in, and they would fall in step, and the lines would be held.

There was a part of that eloquent speech that was good, that was fine, that could not have been improved upon. If he had studied even harder than he did he could not have added to it, because those splendid passages which he quoted from Democratic orators of the past in their attacks against Republican tariff bills were certainly gems, and were—I am sure all will agree—the very best part of his address. It is a pity he did not go further and quote more. As to those of us on this side whom he condemns as following the same tactics as those distinguished statesmen who made their assaults upon prior Republican tariff bills, and in whose footsteps he says we are following, we feel that we are in pretty good company if we are pursuing the same line of argument that they did. But I am wondering why the Senator from Indiana in this eloquent speech did not get some other authorities that were accessible to him and easy to find; why in his recent visit to Indiana, where he hobnobbed with and whispered into the ear of Beveridge, and they walked arm in arm down the aisle of the convention together and sat by each other on the rostrum of that great convention hall, he did not say to Beveridge, "I am going to make a tariff speech. The fellows back at Washington say I must do it to revive their dissipated hopes and give them renewed inspiration. I want to get a copy of a speech that you made on the tariff, because it was full of information, and at the time it was made it expressed the sentiments of the American people. It was a splendid speech. It was a speech against the Payne-Aldrich tariff law." But he did not do that; and I am wondering, during September and October, in Indiana, how the two speeches as they are printed side by side and circulated throughout that State on the tariff question, one of Senator JIM WATSON over here and the other of the would-be Senator Albert J. Beveridge over there, will look to the people of that State.

Surely it will reveal one of them traveling this way and the other that way. Maybe you think that you can catch them coming and going with such a policy as that. Surely the Senator from Indiana has not forgotten the great speech of Beveridge on the Payne-Aldrich tariff law, and he should have quoted it yesterday as he quoted other distinguished Senators against that law.

I will not read much. I may put more in the RECORD. The Senator says "read it all." No; I will not do that, because it would show up the Senator from Indiana in too bad a light if I should read it all.

Senator Beveridge said——

Mr. POMERENE. When?

Mr. HARRISON. This was in 1913.

What then? Does anybody imagine that people who have thus been so fooled and wronged will not strike down the party which has promised all this and not made good? Of course they will.

Mr. WATSON of Indiana. Mr. President, will the Senator permit an interruption?

Mr. HARRISON. Yes.

Mr. WATSON of Indiana. I think the Senator is mistaken in the date.

Mr. HARRISON. No; this was 1913. It was just when the Payne-Aldrich law was a live issue in the country.

Mr. WATSON of Indiana. That was 1909.

Mr. HARRISON. I understand; but this statement of Senator Beveridge was in 1913, after the Payne-Aldrich law had been tried out and had proven a failure, and he saw the sentiment of the country was against it. That is when he wrote this.

Mr. WATSON of Indiana. Is it an article that he wrote?

Mr. HARRISON. It is an article that he wrote in his study, when he could deliberate.

Mr. WATSON of Indiana. He left the Senate in 1910.

Mr. HARRISON. Yes; this article was in the Saturday Evening Post of June 28, 1913. It was some time after the enactment of the Payne-Aldrich tariff law. You see, he held the same opinion for a long time. He had it in 1909, and held it for a long time afterwards. I do not know whether he still holds it or not. We will know in the coming campaign, but there is this about it: Either the senior Senator from Indiana [Mr. WATSON] must repudiate the views of Beveridge, or Beveridge must repudiate the views of the Senator. That remains to be seen; but it ought to be easy for the Senator to repudiate his views or Beveridge's views, either, because since this administration came in on the 4th of March last year he has repudiated so many things that he ought to be in the habit of it now, and it should not be very difficult for him.

But the Senator was about to get me away from what I was reading.

What will the people then do?—

Says Beveridge—

If they turn to the Republican Party, that party will say that at last the people have indorsed the Payne-Aldrich tariff bill; at last Mr. Taft's statement at Winona that the Payne-Aldrich bill was the best ever passed has been proved to be true. That is what the Republican Party will say, and that party will have a right to say just those things. Its leaders are saying just those things right now by way of prophecy. So if the people in their disappointment and despair turn to the Republicans, the latter will give us another dose out of the same bottle from which they dosed us with the Payne-Aldrich tariff bill.

You have given us a worse dose than you gave us in the Payne-Aldrich bill, because the rates throughout this bill are much higher than those carried in the Payne-Aldrich tariff law; and so, if Mr. Beveridge would repudiate the rates carried in the Payne-Aldrich law, certainly he could not stomach this bill at all.

We should have—

Says Mr. Beveridge—

again the same one-sided and worthless hearings.

Here he is picturing you fellows if you could get into control again. He was a prophet. He knew what was going to happen. He was thoroughly accustomed to the way in which you did things. He knew how you got into dark rooms, behind closed doors, and made up your tariff bills. He had been here. He had seen your nefarious work in the preparation of tariff bills before, and so here is what he said:

We should have again the same one-sided and worthless hearings.

Well, you had. You chose your witnesses. The people did not have any witnesses to come before you. You had only the representatives of those interests that had grown fat through your legislation that permitted them to rob many in order to benefit themselves. You heard their views, and over in the House the chairman of the Ways and Means Committee, I understand, as they came in the committee room, would just ask them: "What rate do you want?" And they generally got what they answered him that they desired. So he says further:

The same star-chamber caucus methods.

Yes; you pursued the same star-chamber caucus methods.

The same framing of a bill by a few men, with the unjustly favored interests in the background; the same slugging of the bill through Congress.

He knew that you would use a gag rule, if possible—if you could get enough votes to do it and slug it through here. The Senator from Indiana is a past master at steam rolling—at slugging things through—whether in this Chamber, committee room, or convention.

The same outrages and injustices in the end. The only difference would be that the Republican Party will feel licensed to be more extreme than ever, for it will reason that the people, tired and exhausted with this endless tearing down and building up of tariffs, will stand for anything rather than see it continue.

And a little further in this article he says:

You see, Americans are the only people on earth who can afford a government by politicians.

I do not think he had the distinguished senior Senator from Indiana in mind when he wrote this article, but he could not have more beautifully pictured him than when he used that expression.

We are so few in numbers and so wealthy in resources that we can manage to get along with politician-made tariffs and dark-lantern tariff methods. But ought we to go on with such tariffs and such methods just because our wealth is so great and our numbers so few that we still can live in spite of such tariffs and such methods? * * *

And we are at relentless war with the present-day Republican doctrine of a guaranty of profit to manufacturers.

That is the indictment that he made against the Payne-Aldrich tariff law. What will be the indictment on the hustings that he will make against this makeshift of a bill in the coming senatorial campaign?

Such an idea never was heard of before the Taft-Aldrich-Root-Lodge combine forced it into the Republican platform.

Oh, if the senior Senator from Indiana had been a Member of Congress at that time! I believe it was just about two years before the Payne-Aldrich law was framed that he went out of the House of Representatives.

Mr. WATSON of Indiana. Mr. President, in order that I may have all the credit to which I am entitled, I will say to my genial friend from Mississippi that I was a member of the Ways and Means Committee for several years and helped to formulate the Payne-Aldrich tariff bill in part, having left the House on the 4th of March, 1909, and having sat as a member of the committee largely through the formulation of the bill. Therefore, I want the Senator to give me all the credit to which I am entitled for helping to frame that tariff bill.

Mr. HARRISON. Yes; so the Senator was not in the House, as I understand, when it was voted on?

Mr. WATSON of Indiana. No.

Mr. HARRISON. But before, when the hearings were held and it was being considered, he was on the Ways and Means Committee. So, then, for just a part of the offense that he committed in drafting this bill, not for actual participation in its consideration on the floor afterwards or in voting for it, the people repudiated the Senator; so it is little wonder, since the people of Indiana took it out on the Senator merely for sitting and asking questions of the witnesses as they appeared before the Ways and Means Committee, that they turned your whole party out at the first opportunity following that. They knew you stacked the cards on them then—they will know you have run in a cold deck, worse stacked, this time.

If the Senator had been in the House at the time the Payne-Aldrich bill was voted upon he probably would have been placed in this combine, and the names would not only have been "Taft, Aldrich, Root, and LODGE," but they would have been Taft, Aldrich, Root, LODGE, and WATSON.

I can not understand, it is a miracle to me, how the distinguished nominee for the Senate on the Republican ticket in Indiana left out the name of the Senator from Utah [Mr. SMOOT] in naming this combine, for certainly none was closer to the interests than he, and none displayed his Italian hand more effectively than he in helping to frame that bill. I see now upon his face a disconsolate look for having been slighted.

Why not—

Said Senator Beveridge—

Why not guarantee profits to farmers and barbers and doctors and lawyers?

I shall not read further, although it is very interesting. It may be that the Senator from Indiana can tell us now whether Mr. Beveridge has repudiated the views that he then held, or whether Mr. Beveridge and he now agree in their views touching tariff legislation.

The Senator remains silent, so I suppose we will have to wait until the campaign waxes a little warmer in the State of Indiana. I have no doubt, though, that the present Senator from Indiana and the would-be Senator from Indiana will still, as heretofore, find themselves at disagreement on the tariff.

There is another distinguished authority the Senator could have read on yesterday, but he did not.

Mr. WATSON of Indiana. Did I understand that my friend from Mississippi asked me a question which he expected me to answer now?

Mr. HARRISON. I just made an observation. I took it that the Senator could not answer.

Mr. WATSON of Indiana. Oh, yes; I can answer that. There will be no trouble about it at all.

Mr. HARRISON. I will be very glad if the Senator will answer it. I yield for him to answer.

Mr. WATSON of Indiana. In the first place, I will say to my friend that Senator Beveridge is amply able to speak for himself.

Mr. HARRISON. That is a very good answer.

Mr. WATSON of Indiana. In the second place, there will be no difference between Senator Beveridge and myself in standing together on a Republican platform and alike supporting Republican candidates.

Mr. HARRISON. I understood you stood together on a platform recently in Indiana, but I do not think you can stand together, entertaining these views I have read to the Senate on the tariff question. I know that the Senator is a political acrobat, and it remains to be seen whether the nominee on his ticket for the Senate can display as much agility as he can in changing positions. But certainly the Senator knows that if they get together on the tariff proposition, one or the other must turn a political somersault.

Mr. WATSON of Indiana. If it will not interrupt my friend——

Mr. HARRISON. Not a bit——

Mr. WATSON of Indiana. When he spoke of a political acrobat, did he refer to me?

Mr. HARRISON. If the Senator takes offense at the expression, of course, I will withdraw it, because I would not wound the feelings of the Senator for anything in the world.

Mr. WATSON of Indiana. I take no offense; but the Senator from Mississippi spoke of "the Senator," and I did not know to which Senator he referred. I am wondering whether the Senator thinks I have changed my views on the tariff at any time, so far as the doctrine of protection is concerned, from the time when I was a boy up to the present hour.

Mr. HARRISON. No; I do not think the Senator has ever changed his views.

Mr. WATSON of Indiana. Not at all on that question.

Mr. HARRISON. I think he was married to the special interests a long time ago, and he has remained loyal, aye, faithful to them up to this good hour.

Mr. WATSON of Indiana. As I do in all my marital relations, whatever they be; if I am married to a proposition, I stay with it. I shall not take the time of my friend to go into these personal matters, delightful as they are.

Mr. HARRISON. The Senator talks so well that I shall be glad to yield to him to talk more.

Mr. WATSON of Indiana. My views on the tariff have not changed at any time since I was a young man, and for just about 40 years, now, I have been campaigning, first in my own district, then in my own State, and then in the country, on behalf of the doctrine of protection, in which I believe as profoundly as I ever believed in anything. So, if the Senator wants to charge anybody with being a political acrobat he must not charge that to me, so far as the tariff question is concerned.

Mr. HARRISON. The Senator certainly does not think that I was charging Mr. Beveridge, the candidate for the Senate, his erstwhile political friend, with being a political acrobat?

Mr. WATSON of Indiana. The Senator can draw his own inference.

Mr. HARRISON. The Senator is not charging him with it?

Mr. WATSON of Indiana. I am not. The Senator will recall that in 1912 there were a great many things which entered into the situation and split the Republican Party besides the tariff question, and that the tariff question was really among the very least of the causes of our difficulty. I am not going into all that. We are over that chasm, and those scars are all healed, so far as I know. I happened to be the Taft floor leader in the Republican convention in 1912. My friend on my left [Mr. SMOOT] was one of the very foremost leaders in that convention, and I feel quite sure that he and I alike would agree that our differences are all healed, and that we are all together now as one party, as our friends on the other side will find out when the ides of November shall have come and gone.

Mr. HARRISON. I know that the Senator is very adroit in harmonizing differences. He has many very splendid qualities, qualities which I admire very, very much. I think he is about as thick-skinned as any man I ever saw. At times he takes a lashing, even, to protect his friends. We all saw that clearly demonstrated here very recently. The Senator, of course, can charge frontward just as fast as he can go backwards. I saw him the other day suffer in his own heart, when he expressed to the Senate something which the Attorney General of the United States had told him, and what he said here in defense of Mr. Daugherty had come from Mr. Daugherty. I do not suppose there was a Senator who heard that expression but believed the distinguished Senator from Indiana. When Mr. Daugherty said that the Senator just misunderstood him in order to protect the Attorney General, living up to a very splendid quality, he was so thick-skinned that he just said, "Maybe I was mistaken, and the Attorney General was right." He always goes out of his way to harmonize differences in his party, or protect those who are in trouble. So I am quite sure that if there is anyone in the world who could get the forces in Indiana together, even though they are very much divided, especially on the tariff question, the senior Senator from Indiana can. He is adroit, he is smart, and that is why he was selected to make that memorable speech yesterday, so that he could remove the impression which has gone out to the country that there was any division within the ranks of the Republican Party, and in order that he might sound the keynote, and the boys would all gather around him and again carry the flag.

But whatever sins he may have been guilty of, he has never been inconsistent on the tariff question. The country has always known how he stands upon it. The interests that needed protection have known how he felt about the tariff. I do not know whether he would go as high in placing rates upon imported articles as the distinguished new Senator from Idaho [Mr. GOODING], because I think he goes further than any representative of the Republican Party I have seen in either branch of Congress; but the Senator has always been found in committee room, upon the floor of the House, in the Chamber of the United States Senate, aye, even when he was defeated because of the small part he played in hearing witnesses on the Payne-Aldrich tariff bill, but he has worked as assiduously and unremittingly outside of the Chambers—but in Washington—in carrying out his protective principles as he did as a Member of the House or a Member of the United States Senate. So he has been consistent in his position on these questions.

I do not know that that had anything to do with it, but not long ago I read to the Senate a letter written by the distinguished Senator from Indiana. But it was perhaps because of his consistency, his faithfulness to the special interests of the country which needed protection, that a few months ago, when the exchequer of the Republican Party was almost depleted, when they needed money to carry on their nefarious propaganda in order to poison the minds of the people, he was designated to write the letter which I read:

Mr. J. A. MCDONNELL,
New York City.

DEAR MR. MCDONNELL: Republican Party leaders in conference with National Chairman John T. Adams are convinced that suitable publicity work must be carried on now in order to meet the misrepresentations of the opposition and the radical and socialistic propaganda which is being carried on with unusual force in certain sections of the country.

Funds are necessary to insure the success of this work and to aid in the election of a Republican Congress next year to support the Harding administration, which is now getting well under way in carrying out its platform pledges to the people.

The recent great Republican victory must not lull us into a feeling of false security. This is not alone a matter of partisan politics but of the maintenance of a sound Government based upon fundamental principles.

As you doubtless know, reactionary forces are very active and very aggressive in this country and confiscatory policies are being advocated which, if they can be enacted into law, will undoubtedly overturn our cherished institutions.

The work of Republican publicity can be carried on to the extent that its friends would like to see if men like you will help furnish the funds for that purpose, and therefore I am taking the liberty of writing you to ask for your assistance with a check for any sum from $100 up as you may be able to contribute.

No one realizes more than I do that this is an inopportune time to raise money for any purpose, but the immediate urgency of this matter justifies this request at this time. I shall be glad, therefore, if you will mail a chack in any amount you see fit to bestow to the national Republican publicity fund and send in the inclosed envelope at your earliest convenience.

I have no personal or pecuniary interest whatever in any publicity enterprise, my sole desire in writing you being to further the interests of the Republican Party and to safeguard the institutions of our Government.

Sincerely yours, JAMES E. WATSON.

They knew, too, that he was close to the President; that when the President gets up against a real proposition he calls for the Senator from Indiana to come into conference. He wrote the letter to the special interests asking them to contribute liberally to the depleted treasury of the Republican Party, in order that party hopes might be revived throughout the country. So it is because of his consistency and faithfulness to these interests that he was so designated, and that he is now so close to the present administration.

I could read from the speeches made by the distinguished Senator who now presides over this body [Mr. CUMMINS]. No Senator in this generation has expressed himself so forcefully and employed so much eloquence against high and exorbitant rates being imposed in tariff legislation as has the senior Senator from Iowa. It was under his leadership and that of his colleague, who was one of the most courageous men and ablest statesmen this country has produced, Senator Dolliver, aided by some few other progressives in this body and in the other Chamber, that the forces on the other side were led against the high and exorbitant and unreasonable and inexcusable rates carried in the Payne-Aldrich tariff bill. I dare say that the distinguished Senator who presides over this Chamber now looks back on those days with the greatest pleasure, and he would desire no greater compliment than that reference be made to those magnificent speeches he delivered at that time against certain provisions of the Payne-Aldrich tariff bill.

Why did not the senior Senator from Indiana read some of those speeches on yesterday? I am going to put into the RECORD some of the utterances of the distinguished Dolliver when he fought certain rates, which were not as high as the rates carried in the pending bill. Among other things, Dolliver said:

If those of us who found it inconsistent with our sense of duty to make the Republican support of the tariff act of 1909 unanimous have made any mistake, it is that we have remained silent too long while an organized defamation of our political character has been set on foot, proceeding from the highest public officers of the Government, executive and legislative, and from a congressional campaign committee presided over by a multimillionaire promoter of street-car franchises, with a treasury filled with rotten money, out of which is flowing a choice assortment of vest-pocket literature, much of it bearing the mark of the Bureau of Engraving and Printing, and a muddy stream of parasitic eloquence.

* * * * * * *

The President is in error. It is not necessary for men to swallow down every tariff law that is set before them or "in conscience abandon the party." It is going to be a very difficult thing to get me out of the old Republican Party. It can not be done by lying about me, as those have done who said that I held a brief for foreign importers. It can not be done by calling me names, like free trader, Democrat, or whatever names may be selected to prejudice me in a Republican community. There never was an hour since I entered public life when an American industry, making a fight against foreign competition, coming to Congress asking for a reasonable measure of protection to the wages of its labor or to the investment of its capital, found anything but help and sympathy in me, and I believe such an hour will never come. Least of all can it be done by taking from about my neck the millstone of political patronage, through which even Presidents of the United States have more than once been drowned in the midst of the sea.

* * * * * * *

Now, only a slight glance at these statistics, imperfect and misleading as they are, would have indicated that these reductions were in most cases so small as to have no value to the public, that a full third of the number were yarns and threads of cotton jute, and linen ready for weaving into cloth, and that nearly all of the five billions of consumption is made up either of food products which we export or raw materials like coal, iron ore, petroleum, and the hides of cattle, or partly manufactured materials like pig iron, scrap iron, tonnage steel, and sawed lumber ready for the planing mill. The public has asked, and asked in vain, for anybody to point out a reduction in any article ready to enter into consumption which has any commercial significance of any sort. Even in the iron and steel schedule, where reductions were most numerous, we are exporters of the articles affected, which, according to the statement of Mr. Carnegie, need little or no protection, while the duty was surreptitiously raised on structural frames, in order that the trust may be able to penalize building contractors who have sometimes shown a restless spirit by turning to foreign markets rather than submit to unreasonable delay in the delivery of their orders.

* * * * * * *

If the committee does not have a care the public will get the impression that the tariff was revised by its most intimate friends, and the defense of the performance left to a total stranger. It is probable that those who engineered the tariff bill through the two Houses indulged the expectation that the exact nature of the transaction, while it was going on, could be hidden by the intricate movements of the machinery. But it may well be doubted whether the most buoyant lobbyist about the Capitol expected that the bungling work of Congress—

In that particular he was speaking of the Payne-Aldrich tariff law—

when known and read by all men, could be surrounded by such an array of bogus statistics and high official sanction, disseminated in speeches, in private letters, and by personal telegraphic messages throughout the country, as to very long conceal its actual operation from the American public.

Now I read from what the late nominee for governor in Pennsylvania, Mr. Roosevelt's right-arm man, Gifford Pinchot, said in talking of the Payne-Aldrich tariff law. I am wondering why the Senator from Indiana on yesterday failed to quote from this distinguished Republican, who has recently again come into the light. In speaking of the Payne-Aldrich law he said:

The tariff under the policy of protection was originally a means to raise the rate of wages. It has been made a tool to increase the cost of living. The wool schedule, professing to protect the woolgrower, is found to result in sacrificing grower and consumer alike to one of the most rapacious of trusts.

The cotton-cloth schedule was increased in the face of the uncontradicted public testimony of the manufacturers themselves that it ought to remain unchanged.

The Steel Trust interest by a trick secured an indefensible increase in the tariff on structural steel.

The Sugar Trust stole from the Government like a petty thief, yet Congress by means of a dishonest schedule continues to protect it in bleeding the public.

Now, let me read what the leader of the Republican Party of this body, the Senator from Massachusetts [Mr. LODGE], said in discussing protection. Of course, he was writing as a historian, and his views as here expressed were to be taught little children from his History of the United States. He said:

Two days after the inauguration he issued a proclamation summoning Congress to meet in special session on March 15 for the purpose of revising the tariff, an act made necessary on account of the inadequacy of the revenues under the Wilson bill. Shortly after the meeting of Congress in extraordinary session Nelson Dingley, of Maine, chairman of the Ways and Means Committee, brought in a tariff bill which was rushed through the House in the face of the Democratic demand for more time in which to examine and discuss the measure. In the Senate, however, the bill made slower progress and was amended in some 800 particulars. Most of the Senate amendments were accepted by the conference committee appointed to harmonize the two Houses, and before the end of July the bill had become a law. As finally passed the Dingley bill restored the high rates of the McKinley bill, and on many articles of necessary consumption even much higher duties were imposed. A prominent feature of the Dingley Act was the reciprocity provision, which authorized the negotiation of treaties allowing a reduction of duties on certain commodities when imported from countries which were willing to grant to the United States reciprocal and equivalent concessions. In pursuance of this provision 11 reciprocity treaties were negotiated, but all failed of ratification by the Senate, mainly because the diversity of interests in the country aroused the opposition of some States to each measure. The Republicans therefore hardly lived up to the declaration in their national platform of 1896 that protection and reciprocity were "twin measures" of Republican policy, for while one of the "twins" was nourished and allowed to grow strong and lusty the other was neglected and allowed to languish and die.

Now, let me read what ex-Speaker CANNON, one of the stalwarts of reactionism, said on the question of Republican tariff legislation and especially of the Dingley tariff bill:

If some fellow did introduce a tariff bill, and it was argued and argued, and at the end of 12 months its advocates could gather together enough votes to pass it, the country being held up by the tail in the meantime, I think you would find that the new law would have just as many outrageous things in it as are found in the Dingley Tariff Act.

On yesterday the Senator from Indiana, in his eloquent speech, charged this side with filibustering, and he said that he would not have spoken, and his side would not take up any time in the debate, if it were not for the arranged plans of this side to allow the bill to be passed just about a month before the coming election. I am wondering if the Senator really believed that. The Senator knows that this side has remained here day and night, with no recess for dinner, in order to assist his side in keeping a quorum to get this bill off the calendar. Only six weeks has it been considered here, but for three years it was considered either in the committee rooms of the House or the Senate or in the House of Representatives. It is no little wonder that you would stifle debate and seek to strangle those on this side who would reveal its nefarious provisions. The Senator is smart; he is adroit. I would say that he is cunning, if it were not for the crudeness of the expression.

But he knows that with the country rising en masse against the high rates carried in the bill, something must be done to divert the blame from his side and accuse us of something. So he charges, in order that it can go to the country, that the Democratic minority are filibustering against the bill, when he knows that at the time the Payne-Aldrich tariff law was considered in the Senate it took months before it was passed. It is the old game of trying to distract the attention of the people. The pirate in his little barque, when threatened by the whale, throws a tub overboard to distract his attention so that he may escape danger. The mother bear, when pursued by the hunter, will drop her little cub to distract the attention of her pursuer and permit her to escape.

The thief with stolen goods, when pursued, throws the least costly down to fool the officers, that he may get away with his prize.

So you political marauders, you political pirates, you political buccaneers, in order to get away with these high taxes that you are about to impose on the American people, and take care of your friends and benefactors, the special interests, in order to keep the people from reading what is happening here day by day, in order to divert their attention from these revelations—which have not all come yet, because we are just beginning—are trying to distract their attention, and so you say "we are filibustering."

I charge, and I believe it to be absolutely true, that you do not want to pass this tariff bill. You are sorry it ever came upon the floor of the Senate; you now see that you made a mistake; you now realize it is no time to frame tariff legislation; and what you intend to do—the Senator from Indiana let it out yesterday—is to begin a series of speeches each day to answer the Democratic assault, when yesterday five-sixths of the entire day was taken up in debate by members on the other side of the Chamber. The Senator from Indiana [Mr. WATSON] talked for two and one-half hours. The Senator from Colorado [Mr. NICHOLSON] talked a great deal about his amendment. The Senator from Ohio [Mr. WILLIS] spoke and other Senators over there spoke, and yet we are charged "with filibustering" against the tariff bill.

Mr. WATSON of Indiana. Mr. President——

Mr. HARRISON. I yield to the Senator from Indiana.

Mr. WATSON of Indiana. As the leading political orator on the other side of the Chamber——

Mr. HARRISON. I thank the Senator.

Mr. WATSON of Indiana. And as one who is always on the inside of what is going on, and ought to be——

Mr. HARRISON. Not on the inside of the Senator's side.

Mr. WATSON of Indiana. No; not on this side. We always shut the door against my friend when he comes up on our side. He said that we do not want to pass the bill. Will he confer with the Senator from North Carolina within the next 15 minutes and agree to fix a time to vote on the bill?

Mr. HARRISON. The Senator knows——

Mr. WATSON of Indiana. Any time. Will he agree to vote on it at any time?

Mr. HARRISON. The Senator knows that we could not agree to vote on this bill until all of the provisions are explained and the dire consequences revealed. Now, yesterday he said that we desired to take up as much time in arguing the case as we took up in having the testimony submitted. The Senator knows the Democratic members of the committee were not permitted to come into the conference room when the bill was considered or framed. You would not listen to them, you would not allow them to offer suggestions or make comment. You brought the witnesses whom you desired before the committee, and there for months and months you made up your case. You acted as counsel, judge, and jury. You could be convicted in any court for procuring fixed witnesses. Nobody was there, except one Senator [Mr. LA FOLLETTE], to take care of the interests of the people in hearing the evidence of the representatives of the special interests, and yet you say, "Here is the bill; take it with all its nefarious provisions. You can not discuss it, amend it, or reject it. It is our concoction and you must bear it." Certainly, you do not want the people to know what is in the bill.

I am not surprised at you wanting to place a gag rule on us. Personally, if the bill is to be passed, I want to see it passed within a reasonable time. I do not want to see it stay here until August or September or October. I want you to try it out, if such is to be your policy, because I know what the people will say to you, as well as do to you, when it is tried out on them. What the Senator desires, and what his colleagues want to do, is to fool the people by having them believe that we are filibustering when you yourselves are taking up the time of the Senate in filibustering against your own bill. Then in a couple of months perhaps you will let it pass.

You will then send it to conference, and here is what will happen; the Senator knows it, too. He will not admit it, of course; I do not ask him; but here is what will happen: In conference the bill will stay until after the election in November. Those people in the country who are against these high rates will be told by your spellbinders, Senators here who are seeking reelection, and Members of the House who want to return, that those rates will be lowered in conference.

The special interests to whom the Senator has appealed for contributions and to whom more appeals will go out in the coming campaign will be told just to "remain quiet. Give us the contributions, help us to reelect a Republican Senate and a Republican House, and we will see that in conference these high rates are maintained and a bill to your liking will be placed upon the statute books." That is your plan, and yet you will not reveal it to the American people.

Mr. WATSON of Indiana. Will my friend from Mississippi permit me?

Mr. HARRISON. Certainly.

Mr. WATSON of Indiana. I make the challenge now to my friend to go with the Senator from North Carolina [Mr. SIMMONS], who is in charge of the measure upon that side of the Chamber, and meet with the Senator from North Dakota [Mr. MCCUMBER] and the Senator from Utah [Mr. SMOOT] and the Senator from Kansas [Mr. CURTIS] and agree upon a time to vote on the bill. We will take it as it is here.

Mr. HARRISON. Of course they will. That is what they want.

Mr. WATSON of Indiana. We will agree to vote on the bill, and then we will give as much of the guaranty as is possible for men to give that in three weeks it will be out of conference and back here, ready to be voted on.

Mr. SIMMONS. We would have to give ample opportunity for the Republican members of the committee to make these daily morning reductions of rates.

Mr. WATSON of Indiana. My friend says we do not want to pass the bill. I accept the challenge. We are ready to pass it right now.

Mr. HARRISON. Of course, the Senator does not desire us to discuss the bill. If the Senator wants to, and has the votes, he can pass it.

Mr. WATSON of Indiana. Not only that, but we are going to pass it.

Mr. HARRISON. Yes; I think if the Senator will make a few more speeches and put a little more "pep" in Members on his side of the aisle, they will probably pass it.

Mr. WATSON of Indiana. We are going to pass it.

Mr. HARRISON. But the Senator will have to stay here to do it. He can not leave the Chamber and not make those fiery speeches and appeal to his colleagues, and then think the bill is going to pass, because they will break away over there constantly. They get disheartened quickly. The worst things have not yet been told about the bill. We expect before it is passed, if we have to get out a legislative mandamus, to get the Senator from Utah [Mr. SMOOT] to produce the letter that is in his possession or that he knows about which was given to General Crowder to go as a representative of this Government and try to restrict little, poor, innocent, defenseless Cuba from raising more than two and a half million tons of sugar annually. There is much to come out in this discussion that will, as the days roll by, be unfolded to the people. The Senator from Indiana knows it and the Senator from Utah knows it, and that is why they would get unanimous consent to pass this bill now if they could. Just as soon as we can make these revelations and inform the people, then your bill, if you have the votes, can be passed and not until then.

Mr. SMOOT. Mr. President——

Mr. HARRISON. I yield to the Senator from Utah.

Mr. SMOOT. The Senator was speaking about a breaking away on this side of the aisle because of the duties imposed in the bill. Last night there happened to be a breaking away, such, as I suppose, he had reference to. I noticed that the highest rate which has been voted upon up to the present time was then voted, the rate on manganese. It was carried by the votes of nine Democratic Senators. Without those votes that high rate could not have been put in force. Yet they voted on the Senator's side of the Chamber for that high rate.

It is true that as to a particular item there may be enough Senators on this side of the Chamber, together with a number of Senators on the other side, to change the rate proposed by the committee, but that is not breaking away from the principle of the bill, I will say to the Senator.

Mr. HARRISON. Of course, the Senator does not know what is going on over there on his side of the Chamber. He stays in his office or seat so much he does not know what is taking place in the cloakrooms and corridors. However, there is a breaking away over there. We can hear it. The rumblings fairly resound throughout the Capitol. Senators over there are denouncing the bill. They are finding fault with the leadership and there is disruption everywhere. You have my sympathy.

Mr. STANLEY. Mr. President——

Mr. HARRISON. I yield to the Senator from Kentucky.

Mr. STANLEY. I do not hesitate to heartily and unequivocally concur with the Senator from Utah that there never will be in this bill, bad as it is, and you can not get into it, mean as it is, a more indefensible duty than a 100 per cent ad valorem duty on a raw constituent of steel.

Mr. SMOOT. I did not go that far. The Senator has even gone further than I said. I simply referred to the fact that there was a breaking away last night by nine Democratic Senators who voted for the high tariff on manganese.

Mr. STANLEY. I will go that far.

Mr. SMOOT. I note the names as they appear in the RECORD, and without those Democratic votes from the Senator's side of the Chamber that amendment would not have been agreed to.

Mr. STANLEY. I do not hesitate to go the Senator one better so far as that is concerned on that matter. I am at a loss to see how anybody can defend it on the other side. But the Senator from Utah can not go before the public Adamlike and say "The woman tempted me and I did eat." With an overwhelming majority, with a Republican House and a Republican Senate, the Senator from Utah will hardly go before the American public and say, "This is a bad bill, but nine Democrats voted for it." It is true that we can not always keep all the Democrats away from the filthy fleshpots of Egypt, but that is not going to relieve the Republican Party when the stern hour of judgment comes for this legislative abomination.

Mr. SMOOT. I want to say to the Senator that there is no one on this side of the Chamber asking to be relieved. We are perfectly willing to take the responsibility and we are perfectly willing to go before the people when the bill passes as the work of the Republican Party.

Mr. WATSON of Indiana. Mr. President, will the Senator from Mississippi yield to me again?

Mr. HARRISON. Why, Mr. President, I did not say anything in reference to what the Senator from Utah is talking about. I mentioned sugar to the Senator, but he did not answer me anything about sugar.

I gladly yield to the Senator from Indiana.

Mr. WATSON of Indiana. My friend has said that Senators will break away over on this side of the Chamber. Of course, we have some independence of thought over here about the individual schedules.

Mr. HARRISON. Not very much; only upon the part of a few.

Mr. WATSON of Indiana. The committee can not always control everybody, because with 60 men in the Senate representing different parts of the country, with somewhat diverse interests, we have many men of many minds, not all agreeing exactly on a rate, but all agreeing on the principle of protection and wanting to apply it in a given rate as each individual Senator thinks it should apply.

But I want to call the attention of the Senator to the fact that there was a little breaking away on his side of the Chamber, and I cite the vote taken yesterday, which shows that 10 Democrats voted for the high rate on manganese and but 7 of the faithful voted against it.

Mr. HARRISON. The Senator can not "shake his gory locks at me." I was not one of the 10.

Mr. CARAWAY. Mr. President, will the Senator yield to me?

Mr. HARRISON. Yes.

Mr. CARAWAY. There is this difference between the attitude of the Democratic Senators and the Republican Senators—and the Senator from Indiana and the Senator from Utah both know it—that the Republicans want to give an exorbitant protection to steel and to spell it both ways. If the raw product did not come from a Republican State they wanted not only to give the steel company protection but to put the raw product for this monopoly on the free list. I voted to impose a duty on the raw product, but I shall vote against the bill as a whole because it is indefensible, it is rotten from beginning to end. What you want to do is to protect the monopolies and trusts and combines and rob the American people who are furnishing the raw material. That is exactly what the Senator from Indiana and the Senator from Utah wanted to do.

Mr. WATSON of Indiana. Now, I will ask the Senator from Mississippi if I may reply to that?

Mr. HARRISON. Certainly.

Mr. WATSON of Indiana. In the first place, there is no compensatory duty whatever upon any finished steel having reference to the tariff on manganese. We left manganese on the free list——

Mr. HARRISON. The Senator refers to steel; he spells it s-t-e-e-l, does he?

Mr. WATSON of Indiana. Yes; s-t-e-e-l. I will say to my friend, inasmuch as reference has been made to the subject, that the steel people did not come before the Committee on Finance to demand rates on any of their products; they were quite content to take their chances with other manufacturing industries in the United States, and yet we have added very greatly—and more so by the vote last night—to the cost of their raw material, so that it will run, if my figures are entirely correct, to something over $20,000,000.

Mr. SMOOT. As a result of the duty on manganese I think the additional cost will be $10,000,000.

Mr. WATSON of Indiana. The Senator from Utah corrects me and says it will not be so much as I have indicated, but including the duties on magnesite, ferrosilicon, manganese, and other raw materials over $20,000,000 will be added to the cost, without compensatory duties being asked for or imposed. So that when my friend from Arkansas undertakes to justify a vote in favor of a duty on the raw material, manganese, because he wants to put something on the steel trust, let me remind him that we would put compensatory duties on the finished product if we put them on the raw material, as a matter of course.

Mr. STANLEY. Mr. President, has not that schedule been passed for that very purpose?

Mr. WATSON of Indiana. My friend from Arkansas says that he voted for a tariff on manganese to punish the Steel Trust.

Mr. CARAWAY. No; the Senator from Arkansas did not say that.

Mr. WATSON of Indiana. I understood the Senator from Arkansas to say that.

Mr. CARAWAY. The Senator ought not to have understood me to say that; it was not a telephone conversation.

Mr. WATSON of Indiana. That is what I understood the Senator to say.

Mr. CARAWAY. No; I said that the desire seemed to be to give protection to the Steel Trust and yet to put raw materials on the free list.

Mr. WATSON of Indiana. Therefore the Senator votes for a tariff on the raw material which is produced in Arkansas, so that, even if the bill is passed against his vote and over his protest, the raw material in Arkansas will still be protected by the infamous system of protection, for which he has voted so far as it affects a product of his own State.

Mr. CARAWAY. This bill is infamous; but perhaps it is a bit less infamous when it does justice to one item. The system on which this bill is framed as a whole, however, is infamous, and I can not conceive how any man who really loves the people will vote for it. That will not keep the Senator from Indiana from voting for it; but it is wrong. But what I wanted to say was that if you are going to impose a robber tariff in order to give the Steel Trust an ungodly profit, you ought not at the same time give them their raw material free.

Mr. STANLEY and Mr. LENROOT addressed the Chair.

The PRESIDENT pro tempore. Does the Senator from Mississippi yield, and if so, to whom?

Mr. HARRISON. I yield, first, to the Senator from Kentucky.

Mr. STANLEY. The Senator from Indiana has kindly told us how many Democrats voted for this indefensible duty on ferromanganese. Now, will he be good enough to tell us whether a majority of the Republicans were guilty of the same sin or not?

Mr. WATSON of Indiana. I have not counted them up, and I do not know how many voted for it.

Mr. SMOOT. Twenty-six.

Mr. WATSON of Indiana. Twenty-six Republicans voted for it.

Mr. STANLEY. If it was a good duty you should not have complained; if it was a bad duty where do you get when it appears that you are just as unwise as the Democrats? You are as deep in the mud as we are in the mire. The only difference between us is that over here a few of us occasionally, once, perhaps, in fifty times, act the fool, but you always do it over there.

Mr. WATSON of Indiana. But on this side we believe in the principle of protection and you profess not to; that is the difference; you are acting contrary to your whole theory and your whole doctrine of free trade. On this side we believe in protection, and therefore we thought it ought to be done.

Mr. STANLEY. Does the Senator from Indiana mean to stand up and tell me that he would defend a duty of 100 per cent on ferromanganese?

Mr. WATSON of Indiana. If 100 per cent were necessary, of course, I would.

Mr. STANLEY. Did not the Senator vote against it? Certainly he did.

Mr. WATSON of Indiana. I did not vote at all last night, because I was not here.

Mr. STANLEY. If the Senator had been here, how would he have voted?

Mr. WATSON of Indiana. I would have voted for the tariff unhesitatingly.

Mr. STANLEY. Of 100 per cent on ferromanganese?

Mr. WATSON of Indiana. Certainly.

Mr. STANLEY. The Senator from Indiana is hopeless.

Mr. WATSON of Indiana. I hope I am from the Senator's viewpoint.

Mr. HARRISON. Mr. President, the Senator does not mean to say that his side always acts the fool.

Mr. WATSON of Indiana. I mean to say you profess never to be foolish, and yet you come over and vote with us. On our side we believe in protection.

Mr. LENROOT. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Mississippi yield to the Senator from Wisconsin?

Mr. HARRISON. I yield.

Mr. LENROOT. I should like to ask the Senator from Mississippi to state whether he believes the Steel Trust passes on to the consumer all of its costs plus a profit.

Mr. HARRISON. I said nothing in the world about the Steel Trust—I mean s-t-e-e-l. I referred to sugar, and I tried to draw an expression from my friend from Utah, but he turned it off to ferromanganese.

Mr. LENROOT. I should like to ask the Senator if he will not be kind enough to answer the question I asked him in regard to steel?

Mr. HARRISON. If the Senator will ask the question again I will try to answer it.

Mr. LENROOT. I want to ask the Senator if he believes that the so-called Steel Trust passes on to the consumer all its costs plus a profit?

Mr. HARRISON. Oh, I think as the tariff is piled up—placed on the raw material or any of the ingredient parts, it

goes into the finished product, and the ultimate consumer pays it. That is my idea about the proposition.

Mr. LENROOT. So that the Senator does think that a tariff upon manganese is passed on to and paid by the consumer?

Mr. HARRISON. I think as the tariff is piled up, of course, it adds greatly to the burdens of the consumer.

Mr. LENROOT. The Senator from Arkansas seemed to imply that he voted for the tariff on manganese because it would come out of the Steel Trust. I am glad the Senator from Mississippi admits that it will not come out of the Steel Trust.

Mr. HARRISON. What does the Senator from Wisconsin think about it?

Mr. LENROOT. I think it is passed on, of course.

Mr. HARRISON. Then, I assume, that the Senator voted for it.

Mr. LENROOT. I am a protectionist; I am not voting for high protective tariffs in one breath and denouncing a protective-tariff policy in the next breath.

Mr. HARRISON. The Senator voted for a tariff tax on ferromanganese.

Mr. LENROOT. I did.

Mr. HARRISON. Does he think that that will add greatly to the burdens of the consumer?

Mr. LENROOT. I think it is passed on to the consumer in this case.

Mr. HARRISON. So the Senator yesterday voted to add greatly to the burdens of the consumer?

Now, Mr. President, if I may proceed.

Mr. LENROOT. I should like to ask the Senator another question.

Mr. HARRISON. I am through with the Senator.

Mr. LENROOT. I am not through with the Senator from Mississippi.

Mr. HARRISON. Very well.

Mr. LENROOT. Would the Senator vote for any tariff rate at all?

Mr. HARRISON. Of course, I would vote for some tariff rates; I have voted for some of them—my whole record shows that—but, so far as I know, I have never voted for protection in my life, and I shall never do so. I believe in a tariff for revenue only; and where an article brings no revenue, why place a tariff on it? The Senator knows when the effort was made to place a tariff on long-staple cotton, a commodity that is produced quite largely in my State, one county in my State producing more than any other county in the United States, I would not vote for it because I thought it wrong in principle. I might cite other instances. Those are my views briefly on the tariff question. I voted for a 1-cent duty on sugar, for instance, at one time because it brought revenue. I voted for a revenue tariff on wool. I am not in favor, however, of a duty of 2 cents a pound on sugar nor a protective tariff on wool. I wish we could take all the duty off of sugar, but I know that we have got to raise some revenue as we go along. I am, however, against anything that smells like protection.

Mr. LENROOT. When the Senator votes for a tariff for revenue, then, he votes to increase the price of the commodity to the consumer, does he not?

Mr. HARRISON. Oh, well, of course the tariff on sugar, for instance, does increase the price to the consumer. It is for that reason I want the tariff on sugar as low as possible. I will admit that in the case of a tariff on wool, and on some other articles which are imported into this country, the duty is passed over to the consumer.

Now, if the Senator has gotten the answer he wants, I hope he will allow me to proceed.

Mr. LENROOT. I want to ask just one further question. I agree with the Senator; but last night there were 10 Democrats who left the Democratic fold and only 6 remained faithful. I wonder if the Senator from Mississippi was then so in doubt about the question that he did not know how to vote upon it and so refrained from voting.

Mr. HARRISON. The Senator knows that I was paired with the Senator from Idaho [Mr. BORAH], who was for the tariff on ferromanganese, while I was against it, and the RECORD will show that I was paired against the proposal to impose a duty. I answered "present," but the Senator knows the RECORD speaks accurately my position, and I accommodated one of his colleagues who was unable to be here.

Mr. LENROOT. Then I wish to apologize to the Senator from Mississippi, because that does make his record clear, and at least he was as consistent as the other six.

Mr. HARRISON. The Senator has never found me inconsistent on the tariff question, and never will. I will say, however, that if I were a protectionist and believed in protecting a few interests at the expense of the many and robbing the great masses in order to add to the coffers of a few I would go down the line on protection; and, in order to be consistent as a protectionist, the Senator would have to vote for a tariff on ferromanganese. I do not know whether the Senator agrees with me in that statement.

Mr. LENROOT. As to a tariff robbing the many for the benefit of the few?

Mr. HARRISON. No.

Mr. LENROOT. Of course, I do not agree to any such idea.

Mr. HARRISON. The Senator did not understand me. However, I will not repeat the statement, for it is immaterial.

Returning to my theme, on yesterday the very eloquent senior Senator from Indiana said—and I am sorry he has gone; I wish he had remained with me a while longer, for I will be through in a few seconds—he said:

> Under the stimulating effect of these successive protective tariff measures—
>
> Praising the Dingley law and the Payne-Aldrich law—
>
> we had brought our people to that high place among the nations of the world in 1917 where we were absolutely essential to their salvation.

Protective measures up to 1917! The Underwood-Simmons law went into effect in 1913, and the greatest prosperity that this country has ever seen was brought about under that law.

Mr. SMOOT. It was brought on by the war.

Mr. HARRISON. On yesterday the distinguished Senator from Indiana talked about exports, and, replying to Democratic arguments that high-tariff duties would injure the Nation's foreign trade, he said the history of the operation of protective-tariff laws showed that they had little effect on the normal flow of commerce. He quoted official figures to demonstrate that under the Dingley Tariff Act, described as carrying the highest rates ever enacted in this country, exports had increased $600,000,000 during a period of some 8 or 10 years.

I do not know just how long the Dingley law was in operation; but it was passed, as I recall, in 1897, and I think was in operation about 12 years. Exports, said the Senator in lauding the Republican principle of protection under that tariff law, increased $600,000,000 and imports $800,000,000. In other words, the imports were $200,000,000 more than the exports under the operation of this great Dingley protective tariff law. What are the facts about the operations of the Underwood law?

Here are the exports; here are the imports:

Under the Payne-Aldrich law in 1910 the imports were $1,547,000,000; the exports were $1,744,000,000.

In 1911 the imports were $1,527,000,000; the exports were $2,049,000,000.

Let us see what they were. Let us go down the line in 1913, the year the Underwood tariff law went into effect. The imports were $1,766,000,000; the exports were $2,465,000,000.

What were they in 1915? Imports, $1,648,000,000; exports, $2,768,000,000. You will see our balance of trade constantly growing larger.

In 1916, under the Underwood-Simmons law, the imports were $2,179,000,000; the exports were $4,333,000,000.

Mr. SMOOT. The Senator is not going——

Mr. HARRISON. Now, just wait a minute, if the Senator will. I shall be glad to finish my figures, and then I will yield for an interruption.

Mr. SMOOT. Why, certainly.

Mr. HARRISON. There was an increase from 1910 to 1916 of practically $3,000,000,000 in exports, working under the Underwood-Simmons tariff law; and yet on yesterday this spellbinder, the close friend of the President, the orator of the Republican Party, the mouthpiece of the leadership over there to revive drooping spirits, said that under the Dingley law the exports had increased $600,000,000 in 10 or 12 years, and we hand back to you the fact that under the Underwood-Simmons tariff law the exports had increased over $3,000,000,000 up to 1916.

Oh, the Senator rises—what he wants to say is that in 1917 the war came on, and naturally we exported a lot of munitions, and so on, and that is the reason for the increase. I left out that year. I am going to give the Senator that year now.

Mr. SMOOT. But the war began in 1914.

Mr. HARRISON. Oh, so far as we were concerned, it did not begin until 1917.

Mr. SMOOT. That is when the war began, when everything in the world was changed; and the Senator knows it, too.

Mr. HARRISON. Mr. President, that is the great trouble with the Senators on the other side of the Chamber. Here their champion, the one selected to present this tariff argument, on yesterday said that the measure is the amount of increase under the Dingley law, and portrayed it as a great accomplishment of protective principles when it showed in 12 years an increase in exports of $600,000,000. We accept that standard, we go by that

measure, and then we are told by the Senators on the other side: "Do not use that. That is unfair." Well, if it is all right for the Senator from Indiana to use it, why is it not just as proper for us to use it? What is there unfair about it? We found no fault with its use yesterday, nor did you. You thought it then fine.

Mr. SMOOT. I do not claim that it is unfair to use it.

Mr. HARRISON. No; the Senator wants to present an excuse, and the only excuse he can present is to say that there was a war on the horizon that came on in 1917.

Mr. SMOOT. I know that the Senator is a fair enough man to acknowledge that there was a war, beginning in 1914.

Mr. HARRISON. Of course, some countries began to war in 1914. Everybody knows that.

Mr. SMOOT. And the Senator knows that without the war those exportations would not have been what they were. We were furnishing the Allies with all of the goods that it was possible to get ships to ship abroad, and even then we could not furnish all that they wanted.

Mr. HARIRSON. Mr. President, the trouble is that the same argument that was used, the measure of relief that was to be invoked as used by the other side, is denied those of us on this side. Of course the war came on in 1917 and increased exports, but I have not read those figures. In 1917 the imports were $2,667,000,000, and the exports were $6,290,000,000.

Mr. KELLOGG. Mr. President——

Mr. HARRISON. I have read you the figures of 1916, long before the war came on; I have read you the figures of 1915; I have read you the figures of 1914; and the Senator will not have any of them, because they do not suit him. They disprove his case.

Mr. SMOOT. The war began in 1914. That is when the war began, and that is when we began to furnish goods to Europe.

Mr. KELLOGG. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Mississippi yield to the Senator from Minnesota?

Mr. HARRISON. I yield to the Senator from Minnesota.

Mr. KELLOGG. Does the Senator say that the Underwood law was the cause of the large exports during the war?

Mr. HARRISON. I think it unshackled business in this country.

Mr. KELLOGG. Does the Senator claim——

Mr. HARRISON. Wait a minute; the Senator has asked me a question, and he certainly will be patient enough to let me answer it.

Mr. KELLOGG. Surely.

Mr. HARRISON. I say that I think it unshackled honest business in this country; it opened up the markets of the world; it was a great boon to business; it gave to our business people implements with which to work at trade and commerce with all peoples throughout the world; and the facts that are undeniable, as shown by the record, show that exports increased marvelously under the Underwood-Simmons tariff law. The tariff was not an issue in the last campaign. The people were contented with the present order of things so far as the tariff was concerned.

Of course, I make an exception of those special interests that are always grabbing, and have their friends here at court to produce whenever the call comes or the demand is made.

Mr. KELLOGG. The Senator has not answered my question, but I will ask him another.

Mr. HARRISON. The Senator does not want it answered.

Mr. KELLOGG. Yes; I should like to know if the Senator attributes our large exports during the war to the Underwood tariff law?

Mr. HARRISON. I told the Senator what I thought about the Underwood tariff law. I think that exports under it were increased, and I think that under this bill the exports will fall off, because, what will be done? You will erect the wall of protection at all the customs ports of this land so high that other countries can not ship their goods here, and naturally they will retaliate and follow the same policy against us that we by this bill are inaugurating against them.

Mr. KELLOGG. As the Underwood tariff law is now in force, does the Senator attribute the decrease in exports since the war to the Underwood tariff law?

Mr. HARRISON. The exports now are about $3,000,000,000 higher than they were under the Payne-Aldrich tariff law.

Mr. KELLOGG. And about five billions less than they were during the war.

Mr. HARRISON. Oh, now the Senator selects as the standard the exports during the war. He disagrees with the Senator from Utah, who admonished me against that. Of course, the exports now are lower than they were during the war, because in war times they rose to $8,228,000,000. They are down now to a little less than $5,000,000,000, but——

Mr. SMOOT. Oh, Mr. President——

Mr. HARRISON. Well, I have them for 1921 from the Tariff Commission. Of course, if the Senator has more information than the Tariff Commission, and knows more about it than the experts up there, then there is no use in my making an assertion.

I ask unanimous consent to have the table to which I have referred, together with the accompanying letter, printed in full in the RECORD.

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

Imports and exports—Values only.

Fiscal years.	Imports entered for consumption.	Exports.	Excess exports (merchandise only).
1910	$1,547,109,137	$1,744,984,720	$188,037,290
1911	1,527,945,652	2,049,320,199	522,094,094
1912	1,640,722,902	2,204,322,409	551,057,475
1913	1,766,689,411	2,465,884,149	652,875,915
1914	1,903,400,394	2,384,579,148	470,653,491
1915	1,648,386,280	2,768,589,340	1,094,419,600
1916	2,179,034,601	4,333,482,885	2,135,590,375
1917	2,667,220,021	6,290,048,394	3,630,693,209
1918	2,864,893,987	5,919,711,371	2,974,055,968
1919	3,827,683,431	7,920,425,990	4,016,061,058
1920	5,101,823,393	8,228,016,307	2,949,534,817
1921	2,556,658,139	4,485,122,696	1,976,097,293
Total	29,234,567,348	50,774,487,608	21,161,179,585

Mr. SMOOT. Mr. President, I want the Senator from Mississippi to understand that I frankly admit that whenever there is a war in Europe, when all Europe is involved in war and drawing upon the United States for supplies, I would not care whether the law in force was an Underwood tariff law or any other tariff law; there would be prosperity in the United States. In other words, the only time that a Democratic tariff law can be a success is in war time.

Mr. HARRISON. Mr. President, the facts do not show that at all. The Senator from Utah and the Senator from Minnesota will have to get together on the questions that they propound and on the facts that they believe in.

Mr. SMOOT. In other words, I will say to the Senator, if there had not been any war there would not have been the exports that there were under the Underwood tariff law, nor would there have been the imports, and there would have been chaos in this country instead of prosperity.

Mr. HARRISON. Oh, yes; that is like the statements generally of Republican Senators. I will tell you what your protective bill will do. It will mother the monopolies of this country, just like it did when you passed the Dingley bill. The Senator from Indiana yesterday talked about the wholesome features of that act.

Between January 1, 1898, and January 1, 1900, 149 trusts were formed to suppress competition and control prices.

That was the beginning. The passage of the Dingley tariff law was the beginning of the formation of trusts in this country; and from that good hour up until the time that the last administration came into power, in 1913, they have held a stranglehold upon this country.

From January 1, 1900, to January 1, 1904, 8,664 great plants were combined, with a total capitalization of $20,379,162,511.

From January 1, 1904, to January 1, 1908, trust consolidation made mighty strides, and the total capitalization reached the astounding sum of $31,672,160,754.

So that was the period, under the Republican protective tariff bill, when trusts first formed and the rights of honest and legitimate business was first challenged. Under this bill they will breed like oysters.

Mr. President, I have said all I desire to say; but I hope that the plan that you have over there of filibustering on this bill and delaying it, and then in conference permitting it to sleep until you can extract huge contributions from the special interests of the country in the coming election, will be thwarted, and that after a reasonable discussion of the provisions of this bill, if you have enough votes, you can pass it.

Mr. WILLIS. Mr. President, the Senate met this morning at 11 o'clock. It is now 20 minutes to 1. About an hour and a half of that time has been occupied most delightfully by my distinguished and eloquent friend, the able Senator from Mississippi. I rise merely to observe that this is an illustration of the method proposed by him of "facilitating" the passage of the tariff bill.

On April 26 the Senator from Mississippi said:

We on this side of the aisle expect to facilitate the passage of the bill in every way we can.

On April 21 he said:

There is no desire on the part of any Senator on this side of the aisle unnecessarily to delay the consideration of the bill at all. On the contrary, it is the desire on this side of the Chamber to cooperate with Senators on the other side of the aisle and to get the bill out of the way as soon as we can.

Before I take my seat, I desire to place in the RECORD some statements that have been made by Senators on the other side of the aisle, stating their position with reference to the passage of this bill. I desire also to call attention to the amount of time that has been consumed in the discussion of this and other tariff bills; but before I do that, inasmuch as the present distinguished and able occupant of the chair [Mr. CUMMINS] has been referred to and has been quoted from by my friend from Mississippi, I think it might be helpful to quote further from the remarks made by the distinguished senior Senator from Iowa, the present occupant of the chair, giving an account of what took place when the present tariff law was under consideration.

The Senator from Mississippi complained, and others on the other side of the aisle have complained, because, they say, in the consideration of this bill the minority has been excluded.

Fortunately, the Senator from Iowa on July 19, 1913, gave a most accurate description of the method that was followed when this original, dyed-in-the-wool, blown-in-the-bottle Democratic tariff law was enacted. Here is what he said about it. No doubt the Senator from Mississippi intended to read this, but in his desire to expedite business and economize time and facilitate the passage of the bill he simply omitted to read the portion which I now read. Here is what the Senator from Iowa then said, at page 2556 of the RECORD, talking about the Democratic tariff law of 1913. He says, speaking of the Finance Committee:

They gave hearings to those who were immediately interested, and I have no doubt devoted all the time they could to the subject; but the country did not know what was happening before them, and the other Members of the Senate have no information of their proceedings.

Note this:

The whole process was secret and intended to be secret, save as to those of the majority party to whom the work was committed.

Senators, we might just as well be perfectly frank about this. The fact is that this tariff bill was framed as every other tariff bill has been framed in the history of the country, and as they ought to be framed, as party measures.

Mr. SMOOT. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Ohio yield to the Senator from Utah?

Mr. WILLIS. I yield.

Mr. SMOOT. I want the Senator to mention one exception. In framing this bill any Member of the House or any Senator, whether he was a Republican or a Democrat, was admitted to the committee, and his views could be expressed upon any subject which was then under discussion, or, if it was not under discussion, the committee would take it up for him, while when the Underwood bill was under consideration, no Republican Senator was allowed even to go before the committee, no Republican Senator was allowed even to express to the committee an opinion as to what rate should be adopted in that bill, and when the bill came in on the floor of the Senate, no Republican Senator knew what the rates were until it was reported.

Mr. HEFLIN. Mr. President——

Mr. WILLIS. I yield, although I desire to proceed.

Mr. HEFLIN. What Democratic members of the Finance Committee were present when you framed the pending tariff bill?

Mr. SMOOT. At the beginning of the hearings they were all present who wanted to be there, but when the rates were marked up they were not there, and the members of the minority party have never been present, since the first tariff bill was ever framed, when the rates were decided upon.

Mr. HEFLIN. The charge being made here is that no Democrat was present when you framed this bill, and therefore they did not know what was in the bill until you had finished. Is not that true?

Mr. SMOOT. That is not all the truth. That was true when the Underwood bill was framed and brought into this body, that was true when the Wilson-Gorman bill was framed and brought into this body, and that has been the plan in the framing of every tariff bill. If it were not so, I will say to the Senator we never would get a bill out of the committee, and the next Democratic bill, if there ever is another one, will be framed in exactly the same way.

Mr. HEFLIN. It would have been better if you never had brought this one out.

Mr. SMOOT. That is the Senator's opinion. Perhaps it would have been better if the committee had fixed some rates so low that the Senator would have been willing to vote to raise them.

Mr. WILLIS. Mr. President, I desire now to finish reading the statement made by the Senator from Iowa on July 19, relative to the present tariff law, the Underwood-Simmons bill. The Senator said—and he told the truth, as he always does:

The whole process was secret and intended to be secret, save as to those of the majority party to whom the work was committed. When these subcommittees had finished their assignments the bill came before a body made up of all the Democratic members of the Finance Committee. Again the Republican members of the committee were not admitted, and again the public was excluded.

That is the way the present law was framed. I continue reading from his statement:

For something like three weeks this fragment of the committee considered the bill, and it finally reached a conclusion. It was then reported to a closed caucus made up of all the Democratic Members of the Senate, and for two weeks the caucus debated it, offered amendments to it, and voted upon it both in detail and as a whole. Again the public was forbidden the opportunity to know what was being done or what arguments and influences in the end prevailed.

Then, finishing that paragraph, he said:

When all this had been done the bill was then brought before the full Finance Committee and was before the committee less than two hours.

That is the way the present law was framed, according to the description given by the present distinguished occupant of the chair. But it is only fair, as bringing out in bold relief the difference between the attitude of Republicans when Democrats are framing a tariff bill and the attitude of Democrats when Republicans are framing the tariff bill, to read what the same Senator said, on that same day, July 19, 1913. The senior Senator from Iowa said:

Mr. President, may I ask the Senator from Missouri [Mr. Stone] if the chairman of the Finance Committee is ready to proceed with the tariff bill? It seems to me that we ought to go ahead as rapidly as possible with this very important measure, and that unless it be very inconvenient to Senators upon the other side we ought to take it up now.

The attitude of the Republican Senators was that this legislation should be speeded and not impeded, and that is quite in contradistinction from the attitude which obtains here; at any rate, in action, if not in statement.

But I wanted to put into the RECORD statements which have been made by distinguished Senators on the other side of the aisle.

Mr. SIMMONS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Ohio yield to the Senator from North Carolina?

Mr. WILLIS. I yield.

Mr. SIMMONS. There ought to be no misunderstanding with reference to the practice of the committee in making up tariff bills. It has been the uniform policy of both parties that tariff bills, being political measures, should be written by the majority members of the committee, and that has always been done in executive session. That was done with reference to the present law, it was done with reference to the Payne-Aldrich bill, with reference to the emergency tariff, and all other tariff measures about which I know anything.

Mr. WILLIS. The Senator admits, then, that the description given by the Senator from Iowa was substantially correct?

Mr. SIMMONS. In part it is. The difference between the manner in which the present bill was framed and the manner in which other tariff bills have been framed, especially the present law, does not consist in the fact that they were both framed by the majority in executive session, but it consists in the fact that the pending bill was framed not only in executive session, but in strictly secret executive session, and that the result of their deliberations and their actions while the bill was in framing was not announced as the schedules and paragraphs were agreed upon, either to the public or to Senators and Members of Congress, but the information was withheld until the bill was finally framed and given to the public immediately before its presentation to the Senate.

With reference to the framing of the Underwood bill by the committee, each day at the end of the day on which the majority members were in session the members of the press were either invited into the room or were seen on the outside and given a statement of the results of all the action by the committee on that day, so that the public was informed and the Congress was informed from day to day what the action of the committee had been on the particular day. I want to say to the Senator that, so far as I was personally concerned, I was unable to get the result of the action of the majority members of the Finance Committee in framing this bill until the bill was finally ready to be presented to the full committee. I could have gotten it if I had been willing to receive information in violation of confidence, as I was informed. I was told

by certain gentlemen who were working with the committee in an official capacity, when I asked for information, that they were pledged to secrecy, and upon learning that, I said: "I do not desire any information from you with reference to it, because I do not wish to have you violate any confidence." Occasionally I asked a member of the committee what had been done about certain particular items, and as a rule I was told, "We have not decided anything," and that was kept up until the bill was finally laid down on the table in full committee, and we were asked to vote upon it, without discussion, and without opportunity of amendment. That is the sole ground of my complaint, and I want to be perfectly fair about it.

Mr. SMOOT. I want to say to the Senator from North Carolina that the Senator from Utah was never informed as to the rates in the Underwood bill. I asked many times what certain rates were, and I was not informed. The press has been treated exactly the same while this bill has been under consideration as it was treated when the Underwood bill was under consideration. I want to be perfectly fair, and I say now to the Senator that whenever a Democratic bill is up for consideration, I think it is the duty of the majority, if the Democrats are in the majority, to mark up the bill, and the Senator knows that if that responsibility were not put upon the majority, the minority could hold up bills in the committee for months and months, and it would not be right.

Mr. SIMMONS. I trust the Senator does not understand that I am objecting to the method of framing this bill. I do not know to what extent the Senator took the press into his confidence. I do know that the papers of the country gave us practically no information.

Mr. WILLIS. Mr. President, I am furnishing the time for this, and I would like to hear it. Will not the Senator speak a little louder?

Mr. SIMMONS. I say that I do not know to what extent, following out the idea of the Senator from Utah, the press was taken into the confidence of the committee from day to day, but I do know that the papers of the country gave us very little information as to what was done in the committee, and on some occasions, when data was published by the press, upon inquiry I was informed that the information was obtained through certain parties who were interested in the legislation, and not from the committee.

The Senator from Utah can make his statement as to the extent to which they took the press into their confidence; but I say that, so far as the Underwood bill was concerned, every newspaper in Washington knew that at the end of our daily sessions whatever action was taken each day would be fully and freely given to the press, and it was fully and freely given to the press, and our action was not kept from the public.

Mr. SMOOT. I can take the Senator over to my office and show him hundreds and thousands of telegrams which have come to me objecting to or approving of rates which were passed upon by the committee as published in the press; and I want to say to the Senator that during that whole time if he or any other Senator asked me whether a rate had been agreed upon I cheerfully gave the information.

Mr. SIMMONS. Mr. President, I do not believe I ever asked the Senator for information about a rate and was refused; but the Senator, like most of the members of the committee, when I asked him said that they had not agreed upon anything; and for a long time it was said that they would not agree upon anything until after they had settled the basis of the valuation, and until they had decided that question they had nothing to give out.

Mr. McCUMBER. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Ohio yield to the Senator from North Dakota?

Mr. WILLIS. I yield to the Senator from North Dakota.

Mr. McCUMBER. It seems to me that we ought to get through with our quibbling about this matter——

Mr. SIMMONS. I think so. I think we ought to get down to the bill.

Mr. McCUMBER. Quibbling about how a Republican majority or a Democratic majority frame a tariff bill. This bill was framed in accordance with a custom we have always followed. I think, on the whole, it is a good custom to follow. Those who have had charge of Democratic measures have agreed with us upon that proposition and have followed the same system.

The Senator from North Carolina complains because he did not get the rates from day to day, as he said. When the Senator was framing his bill it was a revenue bill only; it was not a tariff for protection. All he had to ascertain was the amount of imports, what duty the article would stand, and to fix his ad valorem duty.

We had to take up, as the Senator from Ohio knows and everyone else knows, the question of imports, American wages, and a thousand other things that enter into the matter of making a protective tariff. We had to take it up at a time when there were constant changes in the selling prices of articles, when everything was unstable. It was impossible to make a rate and be certain that we could stand by that rate when we reported the bill, and it was improper to say, "We are going to give this rate," when some additional information or change in the cost price of an article abroad might necessitate a change in the tariff rate which we would place upon it.

We have handled this exactly as the Democratic Party has always handled any tariff bill, with one exception, and that exception is a simple one. We considered that the committee was a creature of the Senate, and that the creature was not superior to its creator, and, therefore, as to any Senator who wanted to come into the committee room at any time the doors swung inward for him to come if he so desired. It made no difference whether he was of Democratic proclivities or Republican, each had the same opportunity. I will say for the Democratic members of the committee that they recognized the propriety of the bill being made by the Republicans and did not ask, of course, to be present; but some of them came in to see us on some schedules in which they were interested.

Mr. WILLIS. Mr. President, I do not desire to consume any more time on this historic matter, but in the interest of accuracy and to keep the record straight. I ask permission to insert in the RECORD at this point a portion of the address of the senior Senator from Iowa [Mr. CUMMINS], as it appears in the RECORD of July 19, 1913, at page 2556. I want that statement in the RECORD so that clear judgment may be formed as to the processes which were followed when the present law was made.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The matter referred to is as follows:

When it came here from the House it was referred to the Committee on Finance. It was at once parceled out among so-called subcommittees made up entirely of members of the majority party. For many weeks these misnamed subcommittees worked over their respective allotments, excluding not only the minority members of the Committee on Finance but the public as well. They gave hearings to those who were immediately interested, and I have no doubt devoted all the time they could to the subject; but the country did not know what was happening before them, and the other Members of the Senate have no information of their proceedings. The whole process was secret and intended to be secret, save as to those of the majority party to whom the work was committed. When these subcommittees had finished their assignments the bill came before a body made up of all the Democratic members of the Finance Committee. Again the Republican members of the committee were not admitted, and again the public was excluded. For something like three weeks this fragment of the committee considered the bill, and it finally reached a conclusion. It was then reported to a closed caucus made up of all the Democratic Members of the Senate, and for two weeks the caucus debated it, offered amendments to it, and voted upon it both in detail and as a whole. Again the public was forbidden the opportunity to know what was being done or what arguments and influences in the end prevailed. I do not know just what occurred, but it is commonly understood that in some fashion or other an obligation grew up by the force of which nearly all of the majority Members of the Senate will feel compelled to abide by the action of the majority of the caucus.

When all this had been done the bill was then brought before the full Finance Committee, and was before the committee less than two hours, which, of course, means no consideration whatever. It was then reported to the Senate, and it is here with the strength not only of the Democratic members of the Finance Committee behind it but with the seal of the secret caucus upon it.

Mr. WILLIS. Mr. President, now I have very strong hopes that we are going to vote on the tariff bill at an early date. I know Senators will be delighted to be assured of that. I will tell why I am confident of that. I have been searching the records, I have talked with Senators, and I find no one on this side of the aisle but who is anxious to have a vote upon the bill. I find some statements in the RECORD, which I accept at their face value, of course—statements from leading Senators on the other side of the aisle that they are proposing to cooperate to bring the bill to an early vote. For example, I read from page 6362 of the RECORD this language from the distinguished Senator from North Carolina [Mr. SIMMONS], the leading member of the minority on the Finance Committee:

I have assured the Senator, not once but twice, that there was no purpose on this side of the Chamber unnecessarily to prolong discussion or in any way delay speedy action on his bill. I have said to him frequently, and I meant it, that if this bill must pass, as soon as we have had time to discuss it sufficiently to inform the people as to its provisions and to inform Senators as to what it means, so they may vote intelligently, we will do nothing to delay action; but, on the other hand, we will cooperate with him in securing just as speedy action as is consistent within these limitations. It is not the purpose of this side

to demand discussion on every item of the bill. * * * I will cooperate with the Senator in every time-saving device he may suggest that is consistent with reasonable debate.

Again, the Senator from North Carolina said on April 20:

I assure the majority that I shall not obstruct, but shall do everything we can to facilitate the speediest possible final determination of this very important measure.

I have already quoted from the Senator from Mississippi [Mr. HARRISON], who said that he desired to facilitate the passage of the bill in every way possible, and to cooperate with Senators on this side of the aisle to get the bill out of the way as soon as it could possibly be done.

My distinguished and eloquent friend, the junior Senator from Alabama [Mr. HEFLIN] said on May 4:

I do not think that there is any disposition over here to filibuster at all; certainly there is none on my part. I should like to see the tariff bill passed on within a month's time, and probably that may be done.

That was on May 4, and it is now June 6. The month is almost up.

Again, on May 5 his colleague, the distinguished leader of the Democracy, the senior Senator from Alabama [Mr. UNDERWOOD], said in part at page 6359 of the RECORD:

I am sure there is no effort on this side of the Chamber to filibuster or unduly delay the bill. * * * It seems that Senators on both sides of the Chamber are perfectly willing to go to the country and face the issues in the country on the bill, and neither side cares for a delay on that account. * * * I am opposed to his bill; I hope it will be defeated; I think the passage of his bill will defeat his party in the coming election; but nevertheless his party is in power; they are proposing this legislation, and they are entitled, after due consideration, to have an opportunity to vote on it.

Again, the leader of the minority said on May 5:

I have no desire whatever to delay its consideration. I am willing to cooperate in reaching an early disposition of the bill.

The distinguished Senator from New Mexico [Mr. JONES] said on May 10:

I want to disclaim any thought of unnecessarily delaying the passage of this bill. I have no such intention as that in my mind.

Again, he said on May 17:

I do not intend to do anything to delay this bill.

There are many other leading Senators who might be quoted, but I have quoted enough to establish, first, the fact that the leaders on the other side do not desire to filibuster, will not filibuster, will cooperate in every possible reasonable way in facilitating the passage of this bill, or, at any rate, the bringing of the bill to a vote. They have frankly said, of course, that they are opposed to the bill. I rather suspect from what I have heard them say some of them will vote against the bill on its final passage. But we are led to believe from what they say that they are perfectly willing to come to a vote. So we have that fact established. They do not propose to filibuster, to impede, to delay, but to cooperate in every reasonable way in bringing the measure to a vote.

Secondly, I feel that everybody on this side wants to bring the bill to a vote, and consequently I expect at a very early date the bill will be voted on. At any rate, it ought to be, because in view of the history of tariff debates in the country and the progress that has been made on this bill, the time consumed in the discussion or alleged discussion of the measure is out of all proportion to anything that has ever taken place in the history of the country with reference to tariff legislation.

We were interested in the address of the eloquent Senator from Indiana [Mr. WATSON] yesterday, in which he told us of certain tariff bills and tariff legislation. It occurred to me that Members of the Senate might be interested in knowing the amount of time that has been taken in the consideration of other measures. Since we have it established now that Senators on both sides are willing to cooperate after reasonable debate, let us seek to establish, if we can, what is reasonable debate as determined by the history of the country.

The first tariff law was that of 1790 and was taken up on the 8th day of April and was passed on the 11th day of June, about two months. Those of us who have read the rather meager reports of debates have a right to assume that that great measure was discussed with great ability, and yet in two months from the time it was taken up it was passed.

I may say in passing that, though it would seem that the command of vituperative epithets had been completely exhausted in describing the pending bill, what has been said about this bill up to date was not anything at all compared with what was said about the tariff bill of 1828, the famous bill of abomination. There were able men in the Chamber in those days. Great questions were discussed by men certainly the peer of any of those of our time, and yet the tariff bill of 1828 was debated only from May 5 to May 13, a little over a week. The bill now under consideration, as I recall, was reported April 11, 10 days given for study—and properly given—and the bill was then taken up on April 20. It is now June 6; and yet that great bill of 1828 was debated for only eight days.

Let me pass on now to another tariff measure. The compromise measure of 1833 is next. Senators are all familiar with history and know of the tremendous importance of the tariff legislation in the years 1832 and 1833, particularly the tariff bill of 1833, amending the bill of 1828, which had brought the Nation almost to the verge of disunion, when the great pacificator, the great compromiser from Kentucky, came to the front in the compromise tariff of 1833. It was a great bill. It saved the country—at any rate postponed the crisis until the country was strong enough to stand it—and yet that bill, so tremendously important in the history of the Republic, was debated only from February 19 to February 27, again about one week. Yet the bill before us has been debated already more than 42 days, and 24 of those days in sessions beginning at 11 o'clock in the morning and running until 10 o'clock at night.

The tariff bill of 1842 passed the House of Representatives on July 16 and passed the Senate on August 5, so it could not have been pending in the Senate much more than two weeks.

The tariff bill of 1846, to which reference has been made as a great law, was reported July 13. Everybody knows that law, which has been referred to here as perhaps the best illustration of a law framed. The act of 1846 was reported on July 13 and was passed on July 28, after only 15 days of discussion, and yet we have now had 42 days of debate on the pending bill. The act of 1846, as I recall it, remained on the statute books perhaps as long as any other tariff act that was ever written.

I now come to the tariff bill of 1857. How much time was consumed in debating that? Here is what the record shows, and all that I was able to find. It was reported February 24. This was a great tariff law, that remained on the statute books until the Morrill Act went into effect. The bill was reported February 24, and the record shows that it was discussed, amended, and passed in a single session, which was prolonged for the purpose until after midnight. We have had here for weeks sessions running until 10 and 11 o'clock at night, and yet Senators say they have not had sufficient time to discuss the bill.

The tariff act of 1860 was reported February 1 and passed February 20, being under consideration 19 days.

Mr. CARAWAY. Mr. President——

Mr. WILLIS. I yield to the Senator from Arkansas.

Mr. CARAWAY. If the Senator had been a member of that Senate, they could not have passed through it in that time, because he has taken more time than that on this bill, has he not?

Mr. WILLIS. I accept that in perfect good humor, but the Senator, of course, knows that he makes an unfair statement because I leave it to him and his colleagues as to whether I have consumed very much time in the Senate in a discussion of the tariff bill or any other measure.

Mr. CARAWAY. If the Senator will pardon me, I do not think he was discussing the bill just now, but he was talking about it.

Mr. WILLIS. When I have consumed one-tenth of the time that the Senator from Arkansas has consumed, it will be time for him and others to question my right to speak on the floor of the Senate.

Mr. CARAWAY. I am not questioning the Senator's right.

Mr. WILLIS. The Senator stated that I had been occupying a good deal of time.

Mr. CARAWAY. I am not questioning the Senator's right. He has the right and he is exercising it. I am congratulating him. He is delaying the passage of a very bad bill.

Mr. WILLIS. I accept that in perfect good humor, but it is entirely without justification, because my colleagues on both sides here know that I am not in the habit of consuming the time of the Senate unnecessarily, and I trust it is a habit I shall not learn from my good friend from Arkansas.

In 1864 the tariff bill was reported on June 14 and passed on June 17, after three days' debate.

Coming on down I pass to the tariff act of 1875, which was reported February 26 and passed on March 2, and it was not by any means a foregone conclusion as to whether it could pass. It was a very close vote. It finally passed by a vote of 30 to 29, bitterly contested, and yet the men of those days were able to and did discuss that great measure in a period of less than a week, from February 26 to March 2.

In the revision of the tariff of 1883 the report on the bill was made January 10 and the bill was passed on February 20, after a debate of five weeks. The revision of 1883 was one of

very great importance; and yet we have consumed on the pending bill more time than was required to pass that great bill, and there are many sections of this bill which we have not yet considered at all.

The McKinley bill was taken up on July 23, 1890, and passed on September 10, after a discussion lasting seven weeks; whereas the pending bill, as I have pointed out, was reported on April 11 of this year, and, although nearly a week of the month of June has passed, not very much progress has been made with it. However, we have the assurance of our friends on the other side of the Chamber that they are going to cooperate; that there will be no filibuster; that they will aid in every possible way in securing an early vote.

Mr. SIMMONS. Mr. President——

The PRESIDING OFFICER (Mr. LADD in the chair). Does the Senator from Ohio yield to the Senator from North Caroline?

Mr. WILLIS. I yield to the Senator.

Mr. SIMMONS. I wish to ask the Senator from Ohio if in his investigations as to the length of time occupied in the consideration of the various bills to which he has referred it has occurred to him to ascertain how many amendments those bills carried? I presume the Senator did not make that investigation; otherwise he would have given the Senate the benefit of the information. I wish to suggest to the Senator, and make the suggestion in perfect good faith and not in any way to embarrass the point which the Senator is trying to make, that if he would make such an investigation as I have suggested he would find that this particular bill carries very nearly as many, if not as many, amendments as all the tariff bills to which he has referred, including the Payne-Aldrich bill and the Underwood bill to which the Senator has not referred.

Mr. WILLIS. Mr. President, I think the question of the Senator from North Carolina is perfectly proper and that there is some merit in it. There are many amendments to this bill, but I wish the Senator to remember——

Mr. SIMMONS. If the Senator will please, let me add, in order to show the situation, that on yesterday afternoon we had under consideration the relatively small item of manganese. There was a disagreement on the other side of the Chamber with reference to that item.

Mr. WILLIS. There was also a disagreement on the Senator's side of the Chamber relative to it.

Mr. SIMMONS. There was a disagreement on both sides of the Chamber, if the Senator desires to have it put in that way, but I think the contest was probably led by some Members on the majority side of the Chamber. I was not present while the item was being discussed and do not know who objected to the committee amendment. That one item, however, I think consumed the time of the Senate from some time between 4 and 5 o'clock until the recess was taken at 10 o'clock.

There was another item in the bill, that of cyanide, as to which there was a controversy, which was led by the junior Senator from Nevada [Mr. ODDIE] against the committee. I think the total discussion incident to that controversy, which was largely on the Republican side of the Chamber, consumed nearly two days, including all the discussion that took place upon it. I think, however, to be fair about the matter, we all realize that the pending bill is framed upon an entirely new principle; that it is not framed upon any of the principles which have heretofore governed the framing of tariff bills. Senators on the other side of the Chamber have practically admitted that to be so. They have stated that the economic and financial conditions of the world would not permit them strictly to apply any of the old tariff theories, and that they, therefore, had to fix the rates as best they could, dealing with the subject in the only way that was available to them. That being so, of course the schedules of the bill and the items in the various paragraphs naturally provoke more discussion than if the bill were framed in strict compliance with some well settled and established principle on the part of the majority party which is responsible for the legislation.

I make this suggestion to the Senator from Ohio because I think in the discussion of these pure matters of procedure we ought at least to be fair with each other.

Mr. WILLIS. I certainly desire to be fair. In reference to the Senator's suggestion, let me observe that, while a large number of amendments have been reported to the pending bill, many of those amendments are of a somewhat formal nature. Senators will recall that the bill which passed the House was framed upon one theory of valuation, but that the bill reported by the Senate Committee on Finance is based upon another theory of valuation. That, of course, necessitated very many changes of the rates. There was no change in principle; there is no conflict of principle at all on the part of those who have framed this bill. That accounts for very many of the amendments.

Mr. McCUMBER. I will say to the Senator from Ohio, if he will allow me, that the change of valuation accounts for about 50 per cent of the amendments which have been reported to the bill.

Mr. WILLIS. I may say that, while I bow to the very superior wisdom of the committee as to the procedure, I had hoped that a substitute bill would be reported embodying all the amendments. I hoped that would be done, but, I understand, the committee considered that method and found it impracticable. So I do not criticize them.

Mr. GOODING. Mr. President——

Mr. WILLIS. I yield to my friend from Idaho.

Mr. GOODING. The discussion has not centered around the amendments, as I understand; time is not being consumed because a change has been made in the basis of the bill making amendments necessary, but the question of rates is being discussed.

I venture the assertion that if the rates provided by the House had been accepted, just as much of our time would have been wasted in discussing the rates on salt, on vinegar, on graphite, and on every other paragraph as has been taken up in the seven weeks during which the bill has been discussed. It is the rates which are being discussed here and not amendments. The fact that the bill is a little different from other tariff bills presented to the Senate, to my mind, has had but little to do with the amount of time occupied.

Mr. WILLIS. Mr. President, I wish now to complete the brief statement of facts which I have collected with reference to the debate on various tariff bills. The Wilson bill, which was enacted in 1894, was taken up in the Senate on the 2d day of April, and was passed on the 3d day of July, consuming about three months. As I now recall, the debate upon that bill was the longest ever had upon a tariff bill, considering that full period of time; but it should be said in fairness that the reason for that was that our Democratic friends, who were then in control of Congress, were so mixed and muddled up about their legislation that the bill was reported to the Senate and sent back to the committee, rereported to the Senate, and again sent back to the committee, so that the bill really was not before the Senate for the full period indicated; but even at that, the time which elapsed between the date when the bill was first taken up and when it was passed was only from April 2 to July 2.

The Dingley Act of 1897 was not passed without a terrific contest, but it only occupied the time of the Senate for approximately six or seven weeks, from May 25 to July 7, and was passed by the close vote of 38 to 28. The Payne-Aldrich law, upon which there was the longest debate ever conducted upon any tariff legislation, occupied the attention of the Senate from the 21st day of April, 1909, up until the 8th day of July in that year, a period of 11 weeks; and yet, Mr. President, if we should agree at this hour to take the final vote on the passage of the pending bill on the 8th day of July, at that time we should have occupied very much more time than was occupied in the discussion of the Payne-Aldrich bill. If we could reach a unanimous-consent agreement to fix the time for a vote just a little over a month ahead, even then we should have exceeded all previous records of the time consumed in considering and disposing of tariff legislation.

The Underwood-Simmons law, the present law, was taken up in the Senate on July 19 and was passed on September 9, after nine weeks of debate. Already the debate that has occurred on this bill exceeds more than 2,000,000 words, and if the discussions as printed in the CONGRESSIONAL RECORD were placed line by line, the debate that has been had on the bill would reach 10 miles; and the end apparently is not in sight. Yet, Mr. President, because of the statements that I have read from the leaders upon the other side that they are going to cooperate and that they do not desire in any way to impede the progress of the bill, and, in view of the fact that we have already occupied more time than has ever been occupied before in the consideration of a tariff bill, I am very confident our friends are going to carry out their promise to us, made in good faith, and that at an early day when the chairman of the committee asks unanimous consent to fix a time for a vote there will be no objection on the other side of the aisle.

Mr. McCUMBER. I should like to return now to paragraph 309, page 55, line 25, "thermostatic metal."

The PRESIDING OFFICER. The amendment of the committee will be stated.

The READING CLERK. On page 55, line 25, after the words "ad valorem" and the semicolon, it is proposed to insert:

Thermostatic metal in sheets, plates, or other forms, 50 per cent ad valorem.

Mr. KING. Mr. President, I came into the Chamber as the Senator from Ohio [Mr. WILLIS] was closing his speech. I am not entirely certain whether he was delivering a lecture to the opponents of this bill or was indulging in a species of Ohio humor. If the Senator's purpose was to terrorize Democrats, or progressive Republicans who are dissatisfied with the inequalities and obliquities of the pending bill, then I beg to assure him he will fail in his purpose. Threats and denunciations will not avail nor deter a full discussion of the schedules of this bill and a searching examination of its provisions, many of which are intricate, confusing, and, may I add, misleading and deceptive.

The time has not yet arrived in the history of this Republic when fearless criticism of policies and measures will be interdicted in the Senate of the United States. This is one place where there is free discussion and where neither gag rule nor Executive authority can prevent the fullest discussion of public questions. The welfare of this Republic will be promoted by free speech and a searching examination of bills presented for consideration. The "previous question," which forecloses debate, possesses some advantages, but it often hides iniquities and prevents the exposure of evil which if not corrected may prove injurious to the Republic.

The beginning of liberty is found in the assertion of freedom of speech and the right to criticize rulers and public officials and governmental policies. No despot or bureaucrat has favored unlimited debate or full opportunity for discussion of their conduct and their policies. The fathers of this Republic knew how important it was that there should be free speech and free thought and those personal guaranties which constitute the crown and glory of this Republic.

Dark and devious governmental policies are, by their promoters, hidden, if it is humanly possible, from the public, and every possible obstacle is interposed to their discussion. It is important that every public measure and every policy, economic, political, or otherwise, which affects the public weal should be brought to the bar of public opinion. It is vital to the welfare of this Republic that there should be the fullest opportunity to criticize, examine, and analyze every matter affecting the interests of the Nation.

Democracy is a school, the efficacy and success of which depend upon the degree of participation therein by the people of the land. Undoubtedly there will be in the discussion of all important questions and in every forum many foolish words, ill-considered suggestions, and unwise and indeed unfair criticism.

It requires much work and effort and hammering and labor to take the raw ore from the ground and fashion it into beautiful ornaments or vessels of the highest utility. Much dross and waste material are eliminated in the various processes through which the ore passes. No political truth or sound national policy, whether economic, industrial, or civil, was ever adopted except as the result of years, and perhaps centuries, of contest and bitter struggle. Battles are often fought to secure the triumph of an idea, and polemical discussions, often bitter, intemperate, and heated, are frequently engaged in for indefinite periods before the truth is separated from the error and the right is crowned with success.

In the discussion of public questions in the Senate and elsewhere there have been in the past, and there will be in the future, many unwise and wholly futile words, and doubtless an unnecessary consumption of time. It is inevitable that such should be the case; but the gains that may be obtained by stifling debate and preventing free discussion will be negligible measured by the irreparable loss that will result to the political and industrial welfare and life of the people.

We often become impatient because others do not view questions in the same light that we do. We become imbued with our own ideas and can not concede that others may be right. We become intolerant of opposition and seek by force or undue pressure to compel the acceptation of our own views. The only progress which is enduring is that which rests upon solid foundations. It were better to build slowly than to build insecurely. Hothouse plants do not fare well in the mutable clime which the struggles of the people create.

Our Republican friends and others who were opposed to the Versailles treaty, or at least to the provisions therein dealing with the League of Nations, debated the questions involved for weeks and months. Some of us who believed that the treaty should be promptly ratified regarded much of the discussion as irrelevant and unenlightening. There were those who regarded the protracted debate as evincing a purpose to filibuster and prevent a vote upon the treaty. Undoubtedly long debate, whether it was germane or immaterial to the issue involved, brought reactions and undoubtedly influenced in a very profound way public opinion in the United States.

I have always opposed cloture or any rule that will deny this body the fullest discussion of every question. I have always contended that the Senate was not only a legislative body but it was a forum in which sovereign States were represented. Here Senators speak for their sovereign and independent States. They are more than legislative representatives. They are ambassadors of States. As such they must be bound by no technical parliamentary rules which obtain in other bodies.

Senators had the right, in discussing the League of Nations, to press their views, to challenge attention to what they conceived to be the dangers which would result, from their viewpoint, if the United States became a member of the league. I did not complain during the weary weeks of the apparently never-ending discussion because Senators debated the Versailles treaty and the multitudinous questions involved in the consideration of the league.

The bill before us is a most important one. It affects the economic and industrial welfare not only of the people of the United States but the people of other nations. It deals not only with domestic concerns but it affects our international relations. At a time when there is industrial chaos throughout the world and when the peoples of most countries are looking to the United States, if not for aid, at least for guidance and for stabilizing policies, we propose a measure which in the view of many increases the world's troubles, multiplies its problems, and adds to the confusion and economic, industrial, and political perils. We propose by this bill not only to give no aid to the world but to place impediments in their pathway, and at the same time to add to our own difficulties. When we might by aiding others aid ourselves we declare by this bill that we will neither aid others nor aid ourselves.

Never before in the history of this Republic was a tariff bill so important. There never was a period in the history of this Republic when the enactment of a tariff bill was so impolitic and unwise. The economic convulsions following the war have left the world in an unstable and unsettled condition. The violent fluctuations in exchange react upon the industrial and economic life of the people. Conditions in the economic world to-day will change upon the morrow. The inflation policy of many of the European countries has been arrested and a policy of deflation will in the future be pursued. This fact makes for financial incertitude and industrial change. The prices of commodities will change with the day and with the hour. The paper issues circulating as money have variable values, so violent and so sudden as to disarrange all commercial plans and prevent the adoption of any permanent business or commercial policy. Yet in the light of this unparalleled situation we propose to enact a tariff bill upon the basis of the hysterical situation existing in the world to-day. It is designed by this bill to project into the future the high prices which the war produced and which combinations and various conditions have perpetuated since the armistice. Conditions and prices, particularly the cost of labor, alleged to have existed in September of last year, have been suggested as the basis for some of the rates written into this bill. The discussion has revealed that most of these rates have no justification and are demanded by special interests, favored business enterprises, and grasping and greedy monopolistic organizations.

It can be said that there is scarcely a commodity or article that enters into the lives of the people that is not comprised within this bill. Undoubtedly its provisions affect in a profound and material way the welfare of all the people in our land.

The food and clothing and homes of the people are not alone affected by this measure. Everything that we eat and drink and wear; everything that ministers to our physical and intellectual wants are touched and influenced and affected by the bill before us. It seems to have been designed to reach everything from the cradle to the grave—every matter that touches our lives or that affects our well-being. And yet, with a bill so far-reaching in its consequences, it is suggested that it be passed with but a few general observations and under the whip and spur of cloture rule.

None of the tariff bills of the past have been so pregnant with evil consequences as this. None has been so universal in application and in effect as this. The conditions existing when the early tariff bills were passed were not such as we find in the world to-day. When the Dingley bill was passed and the Payne-Aldrich law was enacted, the economic and industrial, and, indeed, the political conditions in the world were entirely different.

Bad as the bills last referred to were, they were models of virtue compared to the present one. They did not so seriously affect the world and our relations to the world as does this bill. Europe was not owing, when those bills were passed, hundreds

of billions of dollars, nor were the industrial and the political foundations of Europe undermined as they have been undermined by the World War and by conditions following the same.

We were not then a creditor nation, but a debtor nation. Europe did not then owe the United States Government $11,000,000,000 and the American people from six to eight billions of dollars. We had not then developed a foreign trade of from ten to thirteen billions of dollars annually, such as the United States enjoyed in 1918, 1919, and 1920. We did not then have hundreds of ships, at a cost to the Government of $4,000,000,000. We did not occupy then the position of leadership in the world that came to this Nation during the eight years of Democratic administration and when Woodrow Wilson was President.

In many of the discussions attending the consideration of tariff bills of the past much of the discussion was limited to a consideration of the relative merits of free trade and protection. The writings of political economists, such as Adam Smith, Saye, and John Stuart Mills, were the basis of many discussions. Learned arguments were submitted as to the constitutionality of measures which were confessedly for protection and not for revenue. The discussions were more general, perhaps more learned, than those which the present bill has provoked. It is sought apparently by some of those upon the other side of the aisle to preclude an examination and discussion of the various schedules and of the multitudinous items in the schedules. They desire that the opponents of the bill shall content themselves with a general discussion of the measure but not engage in an examination of the items which are found within the various schedules.

This bill, as I have indicated, because of its far-reaching effects upon our own industrial life and upon our relations with all the world, calls for the minutest consideration and the fullest discussion.

Senators recall that before the days of the Civil War, when Calhoun, Webster, and Clay, and Benton, and other great Americans occupied seats in the Senate, constitutional questions were discussed; not alone for weeks, but for years. The relation of the States to the Federal Government was an issue vital and irrepressible. Who shall assert that the free and unlimited debate of the great constitutional questions involved was not of the highest importance and benefit to the Republic?

Weeks and months were given to the discussion of the Philippine question and to the policy which our Government entered upon when it took from Spain the latter's possessions in the Caribbean Sea and in the Pacific Ocean.

Where shall the line be drawn, Mr. President? Shall we content ourselves with a general reference to each schedule, denying to Senators the right to examine each item and show its relation to the people and the reasons for or against the rates given to such item in the pending bill? If the views of the opponents of this bill are correct, then no more iniquitous measure relating to the economic and industrial welfare of the people was ever enacted. It is conceded by all political economists that tariff rates do affect prices. It is conceded even by the proponents of this bill that its object is to keep out imports and to that degree prevent competition.

The design, manifestly, of the proponents of the bill is to give to the domestic manufacturers and producers a market from which foreign competition will be driven. Obviously this means the maintenance of prices at higher levels, which in turn carries to the people heavier burdens in all commodities which they are compelled to purchase. Undoubtedly this bill will place upon the people annual burdens of billions of dollars. Who shall say that a measure fraught with such consequences shall not be examined and criticized and discussed regardless of the time consumed in such examination?

Of course, the beneficiaries of these high schedules do not want discussion. The Dye Trust would be glad to keep from the public view the fact that it is charging extortionate prices for its products. The Cement Trust and the Carbide Trust and the Steel Trust, and the multitude of monopolistic organizations that are plundering the people, would be glad if their profiteering activities could be hidden and they permitted to continue unscathed in their predatory careers.

It has been charged upon this side of the Chamber that this bill is in the interest of trusts and monopolies and that the rates have been largely, if not wholly, framed by special interests and the beneficiaries of tariff schedules. It is averred that there are giant monopolies in the United States which will be benefited by this measure, and that they intend to continue their monopolistic course to the injury and oppression of the people. If they can prevent competition from abroad they have a freer field for exploiting the people.

The evidences are overwhelming that in many of the industries and business enterprises of the country monopolies exist and organizations and combinations have been formed and are now being formed in order to fix prices and to control the domestic market.

The Sherman antitrust law is not being enforced, and giant trusts and monopolies continue, apparently unafraid of action being taken by the Department of Justice or the Government, to compel them to respect the law of supply and demand and the competitive theory which many of us insist must be preserved in the industrial life of the people. Associations have been formed and are being formed embracing most of the industries of the United States, and many of them violate the law and have been formed in order that competition might be strangled and monopoly intrenched. The Hardwood Lumber Co. case exposes the evils of these associations. Since that decision there has been some little consternation upon the part of some corporations who know that they have violated the law and that the associations with which they have affiliated are within the denouncement of the Sherman antitrust law.

Mr. President, we propose to discuss this bill, not for delay but that its inequities may be shown to the people and with the hope that some of its evils may be mitigated. We could not believe that the Republicans were so indurated, so devoted to trusts and monopolies as to support all of the iniquitous schedules in this bill when their hideous deformities were exposed to view and when their oppressive and burdensome character, burdensome to the people and oppressive to the great American public, were brought to their attention.

We still have hopes that our Republican friends will repent and join with us in rectifying many of the evils found in this bill. I can assure my friend from Ohio that we will in every legitimate way join in expediting the consideration of this bill. We regret that it is receiving such unanimous support upon the other side of the aisle, but we propose to continue this discussion directing attention to the items in the bill and to the lack of justification for the high rates which have been written into the various schedules.

If this bill were passed with but perfunctory discussion the American people could with justice charge the minority with having been a party to its passage and to the betrayal of the people. The minority have a duty to perform, no less important than that of the majority. While the majority may be responsible for the policies of the Government and the legislation enacted, upon the minority rest the responsibility of being faithful watchers of proposed legislation and vigilant defenders of the Republic and the people. It is their duty to scrutinize every bill, to discuss every policy, to point out the defects in measures suggested, and to warn against evils which will flow from the triumph of the policies of the party in power.

The history of enlightened nations shows that the liberties of the people have been preserved by the vigilance, the patriotism, the vitality of minorities. We assure our Republican friends that we shall scrutinize every measure they submit. We shall examine the policies which they propose, not in a captious way, not merely for the purpose of criticism, but with a view to the public welfare and to the protection of the liberties of the people and the safeguarding of their rights.

Mr. SIMMONS. Mr. President, I do not desire to consume much time in discussing this particular amendment. I notice that in the same paragraph with this amendment, and immediately preceding it, there is a tax levied upon "sheets or plates composed of iron, steel, copper, nickel, or other metal with layers of other metal or metals imposed thereon by forging, hammering, rolling, or welding, 30 per cent ad valorem." Then follows this amendment, "thermostatic metal in sheets, plates, or other forms, 50 per cent ad valorem."

There seems to be no information whatsoever in the tariff hearings upon this subject. It is a new item in the bill, put in by the Senate committee, but I am utterly unable to see, and I am advised that many others who are familiar with this subject are unable to see, any difference between thermostatic metal in sheets, plates, and other forms and the sheets of iron, steel, copper, nickel, or other metal with layers of other metal or metals imposed thereon by forging, which in the part of the paragraph immediately preceding the amendment are taxed at 30 per cent.

It is only a difference in name, so far as it appears to me and to others who have studied this question, and there would seem to be no justification whatever for placing a higher duty upon so-called thermostatic metal in sheets and plates than upon the sheets and plates in the portion of the bill which immediately precedes it.

I have here a statement with reference to this matter, which has been sent to me, signed by H. Boker & Co., 101 Duane Street, New York, which I will read, as it is the only information I have been able to get, except from a controversy which arose

in the hearings between two companies who are in some way or other connected with this particular metal. This is what this gentleman says:

This is a metal composed of a layer of nickel steel being welded on a layer of brass to the extent of half and half in thickness.

It is, therefore, substantially the same and prepared in exactly the same manner as the nickel-plated or brass-plated steel sheets of the preceding part of the same paragraph—page 55, lines 22–25—the only difference being that one refers to steel sheets plated with other metal, such as brass, whereas thermostatic metal is nickel steel sheets containing 35 per cent nickel plated with brass. The brass-plated steel sheets have been assessed with 30 per cent duty, and there is an inconsistency to assess the brass-plated nickel steel sheets with 50 per cent duty by calling them thermostatic metal. That means that if brass-plated nickel steel sheets should not be used for thermostatic purposes they should pay 30 per cent duty, and if used for thermostats they pay 50 per cent duty. With other words, it is the purpose of the sheets which is taxed and not the value of the article.

There are two makers of thermostatic metal in the United States and one in Germany, who originated the use of brass-plated nickel steel sheets in 1910.

Excessive waste is claimed by the American manufacturers as compelling a high duty of 50 per cent or more.

That seems to be the only reason why they say the product of the welding together of these two metals to make the thermostatic metal should be taxed at a higher duty than the metals themselves are taxed at, as I gather from reading this statement and the testimony before the committee. Let me repeat that.

Excessive waste is claimed by the American manufacturers as compelling a high duty of 50 per cent or more. Why should the American maker have more waste than the German manufacturer? Ingenuity is as high in the United States as in Germany. The component material of chief value of the metal is nickel and brass, and both the nickel and the copper in the brass the Germans import from the United States.

There are about 20 consumers of this metal in the United States—

Meaning large consumers, evidently—

and two makers. The thermostats made of this metal are used in heat regulators in every cooking range used by every American housewife and also in heat regulators in automobiles. The consumption is estimated at about 100,000 pounds per year. Fifty per cent duty means about 50 cents per pound, and why should this $50,000 go from 20 thermostat makers, with the large number of ultimate consumers, into the hands of the two metal makers in the United States.

Large users are:

The Stewart Warner Speedometer Co., Chicago.

The Connecticut Telephone & Telegraphic, Meriden, Conn.

All other names of users can be supplied.

It is conceded that the metal is difficult to make, but we also hear that the one only German manufacturer could not begin to supply all of American market.

As it is proven that only the purpose or use of the metal is protected by this 50 per cent by the name of thermostatic metal, what situation is liable to arise if a totally different metal of different composition but suitable for thermostat should ever be invented, a metal which these two American manufacturers are not even making? By virtue of such a new metal being suitable for thermostat it would have to pay 50 per cent duty.

On the other hand, by defining now exactly what thermostatic metal is composed of, namely, half brass and half 35 per cent nickel steel welded together and then rolled out, it will be shown that there is no logic in a 30 per cent duty in one and a 50 per cent duty in the other, especially as nickel is imported from the United States to Germany.

It seems to be an article in pretty general use in this country. It seems to be composed of two metals welded together, which are taxed at 30 per cent, and taxed at that not only when they are separate but taxed at 30 per cent when they are rolled together, just as these metals are to make a thermostat. A thermostat is nothing in the world but two of these metals welded together. If you weld them together and call them anything but a thermostat, they pay 30 per cent. If you weld them together and make a thermostat, they pay 50 per cent. The justification is that in the process of welding for the purpose of making this index to temperature, as I understand it, there is likely to be considerable waste, and because of that waste there ought to be a differentiation in these taxes between 30 and 50 per cent on identically the same material.

This gentleman from whom I have read makes the statement that there is no reason why there should be any greater waste in the American factory than in the German factory, and he makes the further statement that all of the materials out of which this instrument is made by the sole German producer of it have to be imported from the United States. Is not that a very remarkable situation? They are asking a duty of 50 per cent upon an instrument made by the welding of two metals, which are taxed in the section before, when they are welded, at 30 per cent, because, and only because, it is alleged that the American producer is liable to great waste without any evidence to show that the German producer—there are two factories in this country and one in Germany—is not liable to the same waste and even a greater waste. Then to that we add the fact that the American producer has his material right at hand. The American produces both of the metals that make this product, while the German has neither and he must buy his raw materials in this country.

I do not desire to say anything more about it. Senators on the other side may desire under the circumstances to put this duty upon it. Of course, if these arguments and these facts do not appeal to them, I feel that no argument and no facts would deter them from carrying out their purpose to impose this duty for the special benefit and profit of two American producers, ignoring the interests and the rights of the millions of people in this country who use the product.

Mr. FRELINGHUYSEN. Mr. President, it is perfectly true that this tariff is not imposed for the benefit of H. Boker & Co., importers of these goods, who have written the brief from which the Senator has just been reading. It was imposed to protect a war industry created during the war.

The Senator from North Carolina has said that there was no information concerning this metal that he was able to find. In the tariff hearings on page 1795——

Mr. SIMMONS. Mr. President, I hope the Senator will not put those words in my mouth. I said there was no information in the Tariff Summary. I said there were, however, statements about it in the hearings.

Mr. FRELINGHUYSEN. I am reading from the tariff hearings.

Mr. SIMMONS. I meant the Tariff Commission Summary of Information.

Mr. FRELINGHUYSEN. Very well; I apologize to the Senator from North Carolina. If he had read the tariff hearings, he would have found that Mr. George F. Hurd, representing the H. A. Wilson Co., testified in regard to this matter as follows:

This metal is a scientific instrument and it goes into finished products which are scientific instruments. The metal must be very carefully selected so as to be of uniform consistency; it must be of uniform thickness; and the welding must be uniform throughout the entire surfaces in contact. If not, this metal, which comes out in a sheet approximately 6 feet long and several inches wide, will not be suitable for the purposes for which it is intended. From it are made, for example, several hundred of these little parts there [indicating] and they must all operate exactly alike under the same temperature conditions.

Some very fine and delicate instruments are made from this metal, and a variation in distortion of one sixty-fourth of an inch will result in a difference in temperature of an oven of 50°. It must be made with extreme exactness.

Now, may I call the attention of the Senator from North Carolina to this statement. The Senator spoke of the similarity of this metal to the other metals in the schedule. This statement is made by a manufacturer:

Neither in the method of manufacture nor in the materials used nor in the function of the product is our product in any way similar to those metals described in section 309.

In the brief filed by Mr. Hurd, representing this manufacturing concern in Newark, he gave this explanation of thermostatic metal:

Thermostatic metal is a combination of two metals in the form of either a sheet or strip, the metals used having widely different coefficients of expansion; that is to say, one of the metals must have the property of expanding to a great degree when heated and the other metal of expanding when heated only slightly if at all.

* * * * * * *

Thermostatic metal is used as an oven indicator. The thermostatic metal used in this device was in the form of a coil which when heated over a burning match changes its form with uniform action so as to register upon the dial of the instrument the temperature thus produced in the metal. The second of the devices shown to the committee was a desk thermometer operated also by a coil of thermostatic metal for the same purpose and with the same result. The third device exhibited to the committee was a Westinghouse apparatus used to cut off the current from an electric oven at any desired temperature in the oven.

Mr. President, the committee ascertained that the manufacturing processes of this metal are extremely difficult, demanding the closest attention of the artisan, and that they are very intricate. Prior to the war all the thermostatic metal which was used in this country was manufactured in Germany. I now read further from the brief of the H. A. Wilson Co., who, during the war, manufactured this metal:

In 1914 the people of the United States were subjected to real inconvenience, even hardship, because of the loss of the sole source of supply of a material essential in the operation of necessities of living in ordinary use. The H. A. Wilson Co. undertook the study of the art of manufacture of this material. For more than five years this study was pursued with diligence and at great expense. The company has mastered the art of production of thermostatic metal of highest quality and in commercial quantities and has become an established and known source of supply with a capacity to fulfill American requirements of the metal. Costs of manufacture in the United States are approximately two and one-half times the costs of manufacture in Germany, and the German manufacturer will forthwith lay down his product in American ports at a price which will reflect this relation of comparative costs. The American manufacturer can not survive such competition, and unless the American manufacturer is given substantially the protection requested by the Wilson Co. the industry of the manufacturer of thermostatic metal in the United States must die.

The committee sent one of the Tariff Commission experts to the Wilson factory, and I have here the report, which clearly shows that 50 per cent ad valorem duty will only protect the difference in cost of this article as between Germany and here. I shall not read the entire brief. The cost in Germany is $1.40. The manufactured costs here are $3.58. .I ask that the Tariff Commission's report may be printed in the RECORD without reading.

This is not a large industry, but thermostatic metal is a distinct product. It is an intricate process. It requires great skill. If it is to be protected at all it is entitled to a separate classification. The uses of the metal the Senator from North Carolina knows. It is used as a thermostat to register heat, changes of heat, varying temperatures. If the industry is to be maintained, if it is worth maintaining and keeping alive in this country, this duty is a proper one. If it is not, of course the Senate can reject the amendment.

The Wilson Co. undertook to manufacture this product during the war. They are an old and reputable concern. Not only did they give the country the product which they needed, but they threw open their laboratories for experimentation on this and other metals in an effort to establish the industry in this country.

Mr. SIMMONS. Mr. President, the Senator stated the cost of production was three dollars and some cents a pound.

Mr. FRELINGHUYSEN. Three dollars and fifty-eight cents.

Mr. SIMMONS. What is the price at which this product is sold by the Wilson Co.?

Mr. FRELINGHUYSEN. The Wilson Co. sold it at $3.50 a pound and in smaller lots at $6.50 a pound, but I think the brief states it was $3.50.

Mr. SIMMONS. Does the Senator know whether the Wilson Co. retail the product or sell to jobbers at $6 a pound?

Mr. FRELINGHUYSEN. I will just read the brief to the Senator.

Mr. SIMMONS. I do not care to have that done.

Mr. UNDERWOOD. Will not the Senator from New Jersey have the brief read at the desk? If he is going to put it in the RECORD, let us have it read.

Mr. SIMMONS. I do not care to take up the time if the Senator will just answer my inquiry.

Mr. UNDERWOOD. I would like to have it read, if the Senator does not object.

Mr. SIMMONS. Very well.

The PRESIDING OFFICER. The Secretary will read as requested.

The reading clerk read as follows:

FEBRUARY 16, 1922.

PERSONAL MEMORANDUM FOR HON. JOSEPH S. FRELINGHUYSEN IN RE THERMOSTATIC METAL.

An engineer of the United States Tariff Commission visited the factory as well as the laboratories and offices of the H. A. Wilson Co., in Newark, N. J., last fall. While it is extremely difficult to make any positive statements as regards actual costs of production the commission's engineer was convinced of the substantial accuracy of the Wilson Co.'s estimate of $3.78 per pound as the actual cost of producing their metal during the first six months of 1921. This seemingly high cost includes about 90 cents engineering and technical supervision which, on the basis of a necessarily small production, does not seem excessive. Selling expense to the amount of $0.34 is also included in this estimate. The matter of waste of raw material was investigated with some care, and in view of the nature of the processes, considerable losses may be considered as absolutely necessary. Among the chief items may be mentioned the planing of faces of each of the dissimilar metals so as to prepare an absolutely perfect joint. The waste from these operations is recoverable and may be remelted. A more serious item inherent to the process is the loss of the short ends of strips. These are practically valueless, as they consist of varying proportions of the constituent metals. In any event the total raw material cost, including all waste, normally amounts to only about 80 cents per pound of finished metal. This figure includes a certain amount of wasteage owing to accidents, etc.

The salaries and wages paid by the Wilson Co. were not excessive as compared to those received by similarly qualified employees in other Newark industries. The labor cost is naturally unusually high in view of the comparatively small quantities of material produced.

The equipment is ample for the production of several times the probable American requirements of this metal, but it is doubtful if a plant could have been designed for economical operation on a much smaller scale. It is possible that later some sort of by-product or joint product might be developed whose manufacture in the same plant would reduce the overhead and supervision and also permit the employment of workmen on the same job day after day rather than have them change from one job to another as the material is carried through the various stages of production.

The character of Wilson Co.'s material is apparently better than that imported, and at every stage great care is taken to insure uniformity, thereby materially adding to the cost of the material but unquestionably resulting in a better product and one which does not require excessive calibration and adjustment when put to its final use.

Owing to suspicion found in certain quarters as to the prices charged by the Wilson Co., a careful study was made of the sales books. The evidence is practically conclusive that the Wilson Co. has charged $3.50 a pound on all lots of 100 pounds or less, in some cases on very small lots receiving as much as $6.50 per pound. Under new orders on lots of 100 pounds or more discounts of 5 per cent and 5 per cent are allowed, making the net price $3.10. Large deliveries, however, have been made under contracts entered into some time ago, especially with the Stewart Warner Co. and General Motors and its subsidiaries at lower prices. Several of these contracts were taken over by the Wilson Co. from the General Electric when the latter company ceased to manufacture the metal. Among the records investigated the minimum price was apparently $2.77 per pound net, and based on sales records amounting to 25,297 pounds of metal. The average net price received by the Wilson Co. was $2.91 per pound.

Investigation of the invoices and books of H. Bocker & Co., the sole importer of competing metal, showed the importation of only one small lot of thermostatic metal since the war. The landed cost of this small lot was $1.26 without adding the duty of 15 per cent under the act of 1913, which brings the cost to $1.44 per pound. The imported metal was held tentatively at $2.50, but no sales had been made up to last October.

Another feature that might be taken into consideration, although not bearing directly upon the tariff problem, is the large amount of research work carried on by the Wilson Co. in the development and standardization of heat regulators and other equipment in which their metal may be employed. While some of the largest concerns are able to maintain extensive laboratories, many of the smaller firms receive a great deal of help improving their product from the research laboratories maintained by the Wilson Co. These laboratories, however, are of service more in developing new devices and can not be considered as service laboratories which would guarantee the use of the Wilson Co.'s metal, after the manufacture of any special article has become standardized, if cheaper metal were easily obtainable.

Respectfully submitted.

WM. BURGESS.

The PRESIDING OFFICER. The question is on the amendment of the committee.

Mr. UNDERWOOD. Mr. President, I merely wish to say a word in reference to this amendment. I hesitate to say anything on the subject, because I am not familiar with the manufacture of this particular metal, and my information about it is very slight. Therefore I hesitate to discuss the question at all.

The feature that strikes me in this case—and it has come to my attention in the case of many of the increases of duty on metals—is that the information that comes to Congress about this particular matter comes from the man who is interested. I do not make that statement in any way to reflect upon the man who is interested; I have no doubt that the gentlemen engaged in the manufacture of this metal are honorable, high-class men; but we know that the human equation affects us all. A man who belongs to that faith of economics which believes in a protective tariff has but one step to take to believe that he is entitled to the American market against all competition. When he reaches that viewpoint, his only idea is to have the tariff high enough to prevent competition from any source.

This metal is a very important item in American economics. Its use will grow and develop in the homes and the factories in the future. It is of vital importance. As I heard read the statement coming from the Tariff Commission, it clearly indicates that this is practically an experimental plant, although it is engaged in actual business and is now producing for the market. The report states that it is the smallest possible plant that could be worked. The report also says that one of the great items of cost involved is the overhead.

The report also states that there have been practically no importations except of one small lot. I think this is very slight testimony on which to impose a tax on the American people of 50 per cent on the import price. The report indicated that the cost of production is $3.78, but included in that are large engineer charges, for which apology is made in view of the small size of the plant, and also a great overhead charge, which, of course, will be eliminated in the event of the growth of the plant; but the report showed the present average price to be in the neighborhood of $2.91. We are going to have a 50 per cent tax on that imposed on the American people; and it is going to be done solely on the say so or on information that comes to this committee from the producers of this metal. The men who are engaged in the business want this tax for their benefit, and they are going to get it because they want it.

Mr. President, I am not in favor of levying taxes in that way. This is a new commodity. I do not mean to say at all that a tax at the customhouse may not be justified, provided it is so levied that it does not destroy competition and foster monopoly behind the tariff wall; but I do say that we are very reckless in our treatment of the American people when we propose to say to gentlemen, no matter how honest or how high they may stand as business men, that they may come to Congress and tell us what tax they are entitled for their benefit to levy on the American people.

The report which has been submitted indicates that this operation has been going on for five years. Five years carries us back to the time just before the entry of the United States into the war. Mr. President, against the figures that are given here I wish to call attention to the fact that these gentlemen invested their money, their time, their patience, their brains, and their energies in the production of this material under a 15 per cent tax five years ago, when they had no assurance whatever that a Republican Congress was going to be elected or that

a Republican Congress was going to give them a duty of 50 per cent. One statement may be balanced against the other; but that is the fact. They felt that they were capable of entering upon the manufacture of this product and of manufacturing it successfully for themselves and the country under a tariff duty of 15 per cent, or they would not have put their money, their time, and their energies into the enterprise. So far as they knew five years ago they would continue to operate under a tariff of 15 per cent, and yet they were willing to risk their future under that condition. I say that that is a pretty good indication that they were not in any danger of being wiped off of the map as producers if they, on their own judgment, were willing to take that risk at that time.

Of course, I realize that the disturbed conditions of the exchange market at the present time may make conditions fluctuate to some extent; but that will not last forever; in fact, it is being rapidly improved to-day, and the ink will not be dry on this bill before the German mark will probably become stabilized at some price and then reflect itself in the markets of the world on the basis of its gold value, whatever that may be. So I can not understand why, merely on the statement of one interested firm, the committee should propose to put a tax of 50 per cent on the American people. That is the case as it stands before the Senate. If we are going to put a tax on, I think we ought to have more information not only as to what it costs here but what the actual cost is abroad, or we ought to let the duty remain where it is and try it out. That is not the destruction of the American manufacturer.

I only say this much at this time to show the reckless manner in which this bill has been manufactured, for it is a manufactured bill; it is a bill that has been written, to a large extent, on information furnished by interested parties who desire to use the power of taxation that belongs to the American people in their own interest.

Mr. ASHURST. Mr. President, it will be remembered that on June 2 there was an article in the New York World which dealt with the cotton schedule, especially with manufacture of cotton. That article went on to say that our former colleague, Mr. Lippitt, had been here in the guise of a lobbyist—the World designated him as a superlobbyist—with a view of securing the highest possible duties on the manufactures of cotton. Mr. President, we know that our former colleague, ex-Senator Lippitt, is engaged in the manufacture of cotton goods; indeed, he is one of the most if not the most extensively engaged in the manufactures of cotton of anybody I know at this time; of that I make no complaint; but while our former colleague was here urging the highest possible rate on the manufactures of cotton, which would directly benefit his pocketbook—I doubt the propriety and I doubt the ethics of a man coming here, having once been a Senator, and having entrée to the Chamber; I do not assert that he came into the Chamber, though it would not be offensive to me if he did, because our personal relations were always pleasant—but I call attention to the circumstance that he was here interviewing Members with a view of increasing schedules and that he himself would directly, financially, profit by an increase of those schedules; and at the same time, Mr. President, at the same hour, at the same place, with the patience of and the industry of a bee, he was working with his by no means small ability to put long-staple cotton on the free list.

Think of that, Senators! I may have something later to say as to my views of a protectionist who will come here and labor zealously to put the manufacturers of cotton under a high duty and at the same time seek to put the raw material which he uses on the free list. Mark you now, Mr. Lippitt is engaged in the manufacture of what we call luxurious cloth, and he justifies in an article in the papers this morning, or attempts to justify, his attitude on the ground that he is largely engaged in the manufacture of luxurious cloth, which can stand a high duty. But, Mr. President, the long-staple Pima cotton is the cotton which makes the luxurious cloth; and if there be anything, according to the protective theory, that could stand a high tariff, it would be that long-staple cotton which makes the luxurious cloth.

So here we have an ex-Senator coming here and working patiently to increase the tariff schedules on the article which he is manufacturing, and at the same time, with a like industry and a like patience, he is working with his knowledge and skill to place his raw material upon the free list. It is that against which I inveigh. It can not be defended as a policy of government.

I am told, but I do not believe it—I do not believe that the Finance Committee would do such a thing—that Mr. Lippitt was permitted to come before that committee, that the door was closed, that no invitation was given or extended to the growers of long-staple cotton, but that the manufacturers, the ones engaged in the manufacture of long-staple cotton, were permitted to come before that committee. I do not believe any such story.

Mr. SMOOT. Mr. President, the Senator knows that it is not true, does he not?

Mr. ASHURST. I can not believe that that is true.

Mr. SMOOT. The Senator knows that it is not true, does he not?

Mr. ASHURST. I am not a member of the committee.

Mr. SMOOT. Yes; the Senator does know it, because the Senator knows that the representatives of the long-staple cotton growers in Arizona appeared before the committee, and were given all the time that they wanted, and put in a brief after the hearings, and the Senator himself came before the committee and the committee listened to what the Senator said in relation to a duty on long-staple cotton, and the committee gave a duty upon long-staple cotton.

Mr. ASHURST. I am not quarreling about that. I now thank the Senator from Utah and each and every member of that committee for extending an opportunity and giving all the time they wished to the growers of cotton to present their case; and it was well presented. The governor of the State and the editor of one of our largest journals made excellent arguments, and in the best way that I could I presented my view; but the story is going the rounds that after the hearings were closed, some days later, that ex-Senator Lippitt was permitted to go in, after the bill had been ordered reported, and make an argument before the committee. Now, I do not believe that.

Mr. SMOOT. It is not true.

Mr. ASHURST. I am glad to hear that. I could not have believed it.

Mr. SMOOT. Not only that, but if the Senator will take up the bill and study the bill he must then finally conclude that, no matter how often ex-Senator Lippitt appeared before the committee, he did not have very much influence upon the committee in changing the rates.

Mr. ASHURST. I will say that that is true. I know that Mr. Lippitt tried to influence the committee, and I think the Senator—I will not ask him to say, because the Senator need not submit to anybody's cross-examination—but I assert that Mr. Lippitt attempted, in a proper way, of course, to influence the committee and try to get this cotton on the free list, and at the same time was arguing with the committee that his product—this luxurious cloth that he is manufacturing—ought to have the highest possible duty.

Mr. SMOOT. In justice to ex-Senator Lippitt, I simply want to say that he did say that if the long-staple cotton had a duty upon it, then he insisted that a compensatory duty should be placed upon the cotton goods made from it; and I know the Senator from Arizona will say that is right.

Mr. ASHURST. I am not arguing that side of the question. I object to any man's ethics who argues in one breath for a high duty on his manufactured goods and for free trade on his raw material in the same breath.

Mr. McCUMBER. Mr. President, notwithstanding the fact of the great influence of former Senator Lippitt, notwithstanding the fact that he insisted before the committee that the long-staple cotton, or Pima cotton, produced in Arizona could not be used at all for the purposes for which they used a certain quality of the long-staple cotton from Egypt, nevertheless the committee did give a duty of 7 cents per pound upon the long-staple cotton for the purpose at least of partially protecting the industry of Arizona.

Now, Mr. President, I want to return for a moment to the particular amendment under consideration.

The Senator from Alabama [Mr. UNDERWOOD] states that this new industry sprang into existence during the operation of a tariff law that gave a duty of only 15 per cent. The Senator is mistaken there. This industry sprang into existence when there was practically an embargo, due to the war. That is bigger than any duty that the committee has ever thought of imposing. It has grown and developed under an embargo during the war. The only question now is, What rate of duty ought to be sufficient to sustain that industry in the United States? I agree with the Senator from Alabama that there was not a great deal of testimony on this subject, and not very much information to guide us as to just what rate would be protective; but, taking all matters into consideration, the committee came to the conclusion that a protection of 50 per cent would be about right.

The Senator from Alabama placed a duty upon this metal in the Underwood bill, and I think he had about as much information about it then as he has now, and that neither of us has a great deal of information about the exact cost, either abroad or at home. I think that, taking into consideration the limited use of the product, taking into consideration the difference in the cost of labor in the two countries in which it is produced, taking into consideration the fact that the raw material can be purchased abroad as cheaply as it can be purchased here, and that it can be manufactured with labor the cost of which ranges from one-sixth to one-tenth of the cost on this side of the water, a 50 per cent duty is not excessive.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment of the committee.

Mr. SIMMONS. Mr. President, I move to strike out "50" and insert "30," so as to read "30 per cent."

The PRESIDENT pro tempore. The amendment to the amendment will be stated.

The READING CLERK. On page 56, line 1, it is proposed to strike out "50," and in lieu thereof to insert "30."

The PRESIDENT pro tempore. The question is upon agreeing to the amendment proposed by the Senator from North Carolina to the amendment of the committee.

The amendment to the amendment was rejected.

The PRESIDENT pro tempore. The question now is upon the amendment proposed by the committee.

The amendment was agreed to.

Mr. McCUMBER. Mr. President, I should like to return now to paragraph 331, page 65. There are two amendments which I will propose as committee amendments to the committee amendments.

On line 16, page 65, on behalf of the committee I move to strike out "30" and in lieu thereof to insert "15."

The PRESIDENT pro tempore. The Secretary will state the amendment proposed by the Senator from North Dakota to the amendment of the committee.

The READING CLERK. On page 65, line 16, in lieu of the amount proposed by the committee, it is proposed to insert "15," so that it will read:

Cut tacks and brads, hobnails and cut nails, of iron or steel, not exceeding 2 inches in length, 15 per cent ad valorem.

Mr. JONES of New Mexico. Mr. President, of course I realize that this is a considerable reduction, but I just want to call attention to the fact that at the present time these nails and spikes are on the free list, and there is no indication, as far as I can learn, that the industry is being injured by any importations. The exports very greatly exceed the imports. In 1914 the domestic production was 740,436 kegs of 100 pounds each, and the imports were only 1,428 kegs. The exports were 101,360 kegs. We were exporting about one hundred times as much as was being imported, and we were producing about seven hundred times as much as was being imported. Since the war it has kept up in relative proportion. In 1921 we imported only 923 kegs, and we exported 24,512 kegs.

I really can not see why there should be any duty on these nails. I just wanted to present the situation. Yesterday we heard a good deal about the determination on the part of the proponents of this bill to explain the bill and defend it. I should like to know whether there is any defense to this. I presume that I could not move to put this item on the free list at this time, where it has been. With it on the free list, the industry has prospered; it has grown great and strong without any duty, and I do not know of anyone who proffers any defense for putting it upon the dutiable list at this time.

I think I shall not offer an amendment, but when the bill gets into the Senate, out of the Committee of the Whole, or when we come to reconsider this, I shall move to put it on the free list.

Mr. McCUMBER. Mr. President, if the committee believed for a single moment that the importations would not increase if this were left upon the free list but would remain as they are now it would do as it would have done in a great many instances—leave it on the free list. There are reasons why there are very little importations at the present time; but, as has been stated, this bill has to be formulated as nearly as possible with a view of what we may reasonably expect in the near future.

We have increased the duty on Swedish iron in the bill nearly a cent a pound, and that would add somewhat to the cost of nails. The conditions may change very materially when we make even the little difference in the duty of nearly a cent a pound upon the material out of which they are made and then allow the nail itself to come in free in the form of a nail; but it is cut down here to a very low figure, 15 per cent ad valorem.

Mr. JONES of New Mexico. May I inquire if the Senator believes that these nails are made out of imported Swedish iron?

Mr. McCUMBER. The tacks themselves are not; but we have in this same paragraph horseshoe nails and other matters bearing practically the same duty, and I did not have that particularly in mind; but we have duties upon the steel of which all of these articles are manufactured.

I am not looking for any importations of the ordinary steel; but taking into consideration, as I have stated, the difference between the wages at home and abroad and making allowance for the fact that the raw material costs about the same in one country as it does in another, I think we can foresee a condition, if there is no protection, in which there will be a vast increase in the importations.

Mr. JONES of New Mexico. May I inquire of the Senator from what country he is anticipating the imports might come?

Mr. McCUMBER. From every country which can make these nails, from every country which produces iron and steel.

Mr. JONES of New Mexico. The Senator does not believe that they are producing iron and steel more cheaply in any other country now than in the United States?

Mr. McCUMBER. I think they can produce it for these purposes about as cheaply as we can in the United States, and when they come to convert it into these little articles, they can convert it much more cheaply than we can in the United States.

Mr. JONES of New Mexico. Of course, the Senator from North Dakota can express his thoughts on the subject, but all of the evidence, so far as I have been able to ascertain, is to the effect that we not only produce these things in this country as cheaply as they do anywhere else in the world, but we are producing them more cheaply than they are anywhere else in the world. We are exporting large quantities. The imports are merely nominal. Doubtless some particular nail to which somebody somewhere took a fancy is brought in, but when you begin to consider the industry, it is childish, it seems to me, to talk about any fear of competition from any country in such items and to refer to Swedish ore going into the nuts and bolts and rivets and things of that sort is wholly beside the fact.

Swedish ore is imported, and Swedish steel is imported, only for the very finest grades of tool steel, and none of it goes into such common commodities as this. We are shipping these things all over the world, competing with everybody. But, of course, Senators may think that some time in the future some country may spring up somewhere, or be discovered, probably near the North Pole, where they will find a lot of these nails already manufactured and bring them in as ballast. They may conjure up such fears as that, but, so far as the facts are known, there is no reason for fear.

I believe I shall ask for the yeas and nays on the pending amendment.

Mr. UNDERWOOD. Mr. President, I desire to say a few words before the vote is taken. I dislike to delay the Senator on questions of this kind, but I know of no other way in which the American people can find out what is being done to them by this bill except by the explanation of those who are opposed to it.

I fear very much that the country is about to suffer at the hands of the committee, which has a case of nervous prostration over foreign importations. We find no facts to justify these enormous raises of rates on ordinary commodities we know all about. We find no statement of facts on which to base the change, but the chairman of the committee, in his kindly and persuasive voice, repeatedly says to us that, of course, he realizes that if he had to depend on the extent of the commerce in the commodities in the past he would in many cases leave them on the free list, where they are now, but he has reason to expect, and the committee has reason to expect, that great importations in the immediate future are going to flow into America, and American industry is going to be overwhelmed; and that is all we can get out of him.

This particular item is not one of the American production which has grown out of war conditions. Its status has existed for the last 25 years or more. In 1912, when the present law was originally drafted, although it did not become a law until 1913, the matter of these nails was very carefully investigated, and it was shown beyond any question of a doubt that the American manufacturer of nails was more than able to compete with any competitor whatever along all lines of competition.

In the first place, both of these nails are machinemade. They are made by throwing a piece of steel into a machine and letting the machine do all the rest, even putting them into the keg ready for shipment. The element of human labor is at the very minimum. The wage cost amounts practically to nothing, and everybody knows that the American production, through American machines, is unequaled in all the world.

The Senator has spoken about Swedish iron. Not enough Swedish iron comes into this country to enter into the manufacture of 10 per cent of the nails made in America. More than that, it is not used for this purpose. These nails are made out of ordinary American iron and steel, and always have been. Further than that, as I have repeatedly said, they are the part of the product which build the American home.

Eight or nine years ago the Congress made an effort to reduce the cost of the building of American homes, so far as the customs costs were concerned; but this committee step by step is wiping out whatever advantages were gained. It is true they have not taken rough lumber off the free list, but they have increased the rates on other lumber. Pretty nearly everything that went into the home they have raised the taxes on, and now nails, which must build the houses, mend the fences, erect the barns, shoe the horses of the American farmer, are to be put back on the tax list, without any justification at all except a case of nervous prostration, political or otherwise, where the patient imagines that something is going to happen that has never happened and could not happen, because there is no labor cost in this country. The raw material cost is no different, but if it were different it would be infinitesimal in the final cost, and the ocean transportation affords so much protection on these articles that practically none come in.

I think the Senator from New Mexico is correct in his statement that there is no reason why we should offer amendments to reduce the rates now fixed. Under the rule of the Senate we can not make the proposal which ought to be made, that these nails should go back on the free list, where they are under the present law. So I do not intend to resist these rates now, except to vote against them; but I hope, when the opportunity comes for this side of the Chamber to propose its amendments, that the Senator from New Mexico will follow the suggestion he has just made and move to put this entire bracket on the free list, where it belongs.

In the meanwhile, as we have it up, I want the RECORD to disclose the recent history regarding this article. The record for 1921 is only for 9 months, but in the average it does not materially differ from 1920; and I will take 1920, as the figures are for the whole year.

In 1920 the production of cut nails and spikes was 844,583 kegs, of 100 pounds each. The imports were 13,316 kegs, of 100 pounds each. There were 13,000 kegs imported, as against 844,583 produced.

Mr. President, that is conclusive. It did not amount even to an interesting competition. At the same time, as the Senator from New Mexico has pointed out, the exports for 1920 amounted to 8,642,668 pounds or to 86,426 kegs which were exported into the open market of the world. When we come down to horseshoe nails I can not give the production because the figures are not here. In wire staples in 1920 the census figures were separated from those of wire tacks and brads, and the 1919 output was shown as 68,221,300 pounds. The imports for that year amounted to 6,830 pounds, the next year to 129,000 pounds, and for 9 months of 1921 to 105 pounds. This clearly shows that there were no importations which at all threatened or endangered American production.

Mr. McLEAN. Mr. President, as the Senator knows, the best quality of horseshoe nails are made of Swedish iron, which is imported, and which bears a tax of 0.6 of a cent per pound.

Mr. UNDERWOOD. The Senator means under this bill?

Mr. McLEAN. Yes. It places the horseshoe nail on a different plane from the cut nail.

Mr. UNDERWOOD. The fact that they are made out of imported iron—there may be a few of them—does not apply to the great bulk of the horseshoe nails used in America.

Mr. McLEAN. The best nails are made of imported iron. They are all included in this paragraph.

Mr. UNDERWOOD. Those are for people who have high-class horses, but I am talking about the thing the common man in America pays for.

Mr. McLEAN. There is some competition.

Mr. UNDERWOOD. I think it is absolutely a joke, a positive joke, for the Republican Party to go before the country and say that we tax the raw material coming from abroad and therefore we have to take articles off the free list and put a tax on them for the American people to pay. An argument of that kind does not stand in reason.

Mr. McLEAN. With reference to horseshoe nails, I will say to the Senator that there are some importations. Canada puts an ad valorem duty of 35 per cent and a specific duty of 2½ cents on horseshoe nails. That would make about 7 cents a pound that the American would have to pay to get his horseshoe nails into Canada.

Mr. UNDERWOOD. And that clearly demonstrates that we are making them cheaper than Canada, and that Canada is afraid of our products, because Canada has put a duty on our products to keep them from coming in there. I can not follow the logic of that argument.

Mr. McLEAN. If we can sell them so much cheaper than Canada, then we ought to be able to sell good nails that much cheaper, which, of course, we can not do. They come free into this country. They do import some into this country, and there is no question about that. If it be true that we manufacture such enormous quantities in this country and there is such an undue and keen competition in these nails, the Senator must admit that the tariff can not affect the price, that the price is entirely controlled by the domestic competition, and if anybody wants to import those nails into this country he must fix his price to meet the domestic price, so that no harm is done to anyone. However, there are some importations.

Mr. UNDERWOOD. Certainly, and we might say, "Very well, we will put a tariff on water. No water can be imported into this country and therefore we will tax water." I think the argument would be unnecessary to the American people to say that it is necessary to protect water.

The Senator admits himself that none of these nails can come in, so therefore we will tax them. I will tell you why I do not want the tax——

Mr. McLEAN. I do not admit that. There are importations.

Mr. UNDERWOOD. I assume the Senator's argument meant that.

Mr. McLEAN. There are importations. They are imported from Canada and the importations will increase. There are some importations from Norway and some fram Sweden in recent months, so I am informed.

Mr. UNDERWOOD. Of course, there are a few.

Mr. McLEAN. All I say is that the importations which do come in must meet the domestic price.

Mr. UNDERWOOD. There are some importations, no doubt. In 1920 there were 129,000 pounds.

Mr. McLEAN. The suggestion that we might as well put a tariff on water is hardly analogous to the situation.

Mr. UNDERWOOD. Well, let us look at it. I want to be fair with the Senator. I do not mean to reflect on the committee or say anything that would be offensive to them or hurt their feelings, but I do think this proposition is just as absurd as to levy a tax on water. There were 68,000 pounds of wire staples, under the paragraph in which horseshoe nails come, produced in 1919. In that year there were only 6,830 pounds imported. In nine months of 1921 there were only 105 pounds imported, and those came in somewhere along the border.

They can not import horseshoe nails. There may be a few of them made out of Swedish iron for high-class horses. The great bulk of horseshoe nails in America are made out of American iron and have been from the very beginning. But for the Senator to come in here now and say, "This iron can come in free and untaxed, but we concluded we would put a tax on it, and therefore we must tax everything else that might possibly be made out of Swedish iron," is carrying the argument, I say, to the point of absurdity.

Mr. McLEAN. That is the very reason why these special nails should pay a tax. If we do not import any other variety than those which are used on the valuable horses, is there any reason why they should not pay a duty of 1½ cents a pound?

Mr. UNDERWOOD. If you will say that all nails imported into this country which are made out of Swedish iron shall bear this tax, I shall not object, because, although I think it is wrong in principle, the American people would be saved from the hands of the committee to such a great extent that I think we could make the sacrifice of allowing you to protect Swedish iron. But you do not do that. In order to keep out a few horseshoe nails made out of Swedish iron, which you say may compete with high-class nails made here, you levy this tax on all nails.

Of course you say that it can not hurt anybody and will not raise the price, but here is where the difficulty comes: I do not

say that there is competition or that there is going to be any amount of competition, because I think it will never come, but I know the men who appeared before your committee and asked for this tax came there for a purpose. I sat on the committee many, many years and have had them come before me. They do not come there just to be pleasant. They come there because they have a purpose to accomplish, and that purpose is to fix a wall around America so they can control the market. Even where there is no competition they want to have the unrestricted right, in their trade agreements with each other and their understandings, to fix the market price and have no competition.

That was done time and time again, just exactly like it was done on steel rails. The present law puts billets, where there was some competition, on the tax list, and yet we put steel rails on the free list. That seemed anomalous, but why was it done? It was because of the fact that it was clearly demonstrated at that time that there was an understanding between the producers of steel rails in America and in Europe that the European rails should not invade the American market, and the American rails should not invade the European market. They divided up the balance of the world between themselves to exploit the price of steel rails, and they had reached an understanding as to the control of prices.

That is the purpose of these tariffs. There can not be any other purpose, because these gentlemen are men of ability, men who understand their business. They understand as well as you and I do that they are in no serious danger of active competition as long as this item is on the free list. We have had it on the free list for 8 or 10 years, and they know the situation as well as you and I do before they come and ask your committee to put a tax on these commodities, which are untaxed now, for a purpose of their own.

There has not been a word said or a line produced in reference to these matters to justify taking these commodities off the free list and putting them on the tax list, except that the chairman of the committee says that he expects something might come out of the heavens like a bolt of lightning out of a clear sky and overwhelm somebody in theory, but not in fact.

The able Senator from Connecticut thinks we should leave this tax on all nails because possibly some horseshoe nails are made out of Swedish iron and the committee has been hardhearted enough to put iron back on the tax list instead of letting the Swedish iron come in free. I can not follow that reasoning or logic, and I can not understand why any committee of the American Congress, regardless of their political faith and regardless of whether they are protectionists or revenue men or free traders or what not, should continually come with proposals of this kind in the bill unless they want to see that nothing in the bill shall be on the free list except those articles that the American manufacturer himself asked to have put on the free list.

Mr. McLEAN. Mr. President, with regard to horseshoe nails, I will say to the Senator from Alabama that the statement of interested parties which was presented to the committee clearly indicates that a tariff of 4 cents a pound is necessary if they are to be expected to hold their American trade on horseshoe nails.

I state this because I want the Senator from Alabama to understand that in very few instances did the rates given by the committee come anywhere near the rates asked for by interested parties in many lines. On this particular item it seemed to me that inasmuch as there were some importations of these high-priced nails and they were selling at prices that clearly warranted 4 cents a pound duty, we were quite justified in 1½ cents a pound, including the compensatory duty of one-eighth of 1 cent a pound, which would leave the protection less than 1 cent a pound, as a revenue duty, if for nothing else, to be paid on these highly priced Swedish nails which came into this country to be used for racehorses and by people who will not use any other kind of nails on their animals.

It did not seem to me if there were no other importations that the tariff would in any way affect the price to the consumer of the common or cheap nails. I am not particularly interested in the cut nails, but I confess that I can not see how the duty is going to affect the price to the consumer of nails in this country. That being so, there is no occasion for any more concern over the matter.

Mr. McCUMBER. Mr. President, I shall not stop now to compute the awful misery that will be suffered by the American people if they are to pay 1 mill upon the 10-cent cost of a package of tacks. I think tacks come in the ordinary package at about 1 penny a package, and are to-day sold at the 10-cent stores at 10 cents a package. That is only 900 per cent increase, of course, in the cost, and I have assumed that possibly the trade would absorb this one mill and a half without putting it upon the public. However, if it really is imposed upon the people, I believe that the little added amount on tacks, and so forth, will not cause a revolution in this country.

However, I want to call attention to the fact, as stated in the report of the Tariff Commission—

> Cut tacks, brads, and sprigs were admitted free under the act of 1913. Under prior acts, except that of 1894, there was a specific duty ranging from three-fourths to 3 cents per pound.

In other words, duties were imposed upon these articles both in Republican and in Democratic tariff acts with the exception of the act of 1913.

Canada imposes a duty of from 25 to 42½ per cent ad valorem upon these articles. A glance at the late statistics will show that, while before the war most of the imported tacks and articles of this kind came in from Germany, since the war most of them are coming in from Canada and are used especially in Detroit and other great manufacturing centers in the construction of automobiles, and so forth. I do not think it is a heavy tax; and if Canada can impose a tax of from 25 to 42½ per cent—and she is the chief exporter of these articles to the United States—it seems to me she ought not seriously to complain of a 15 per cent duty levied by the United States on what she exports to the United States. I think that the whole matter is hardly worth the time that we are taking in the consideration of it as a specific proposition.

Mr. UNDERWOOD. Mr. President, I know the chairman of the Committee on Finance does not think this is worth the time.

Mr. McCUMBER. I was referring particularly to tacks, not nails; nails are a little more important.

Mr. UNDERWOOD. I understand that tacks are included in this paragraph as well as nails. I happen to be discussing nails and the Senator from North Dakota answers me in tacks, and says that the tax on tacks is very slight, if it is distributed to each individual consumer. That is not the proposition. The American people have got to pay taxes. I admit that. If they are paying to the Government taxes which are justly levied, I have no objection; but if they are paying taxes indirectly behind a tariff wall to other American citizens, I do object. It is not the amount of money I am talking about, though that is not so infinitesimal as the Senator says, but in comparison to the principle involved it is infinitesimal. When Senators admit in their entire argument that the American manufacturers are in no danger from competition, they admit their protective argument out of the window, for then there is no ground for levying a tax of this kind for protection. I never have justified a tax for protection, and by their own standard Senators on the other side can not justify it for protection on what has just been stated. If it can not be justified for protection, for what purpose are they building this wall? For what are these interested parties asking us to build this wall? For their own benefit, of necessity. They are not fools; they are not idlers; they came here for some purpose. They know, as you and I do, that their business is in no danger from foreign competition, but they want a tariff wall built around the United States that will exclude imports from other countries.

What Canada does is not material. Every man who understands the iron and steel trade knows that the furnaces and mills of Canada are not capable of competing with the mills of America on an even basis; and every man who knows anything about this schedule knows that the English irons and steels go into Canada at a third less tariff rate than the American product, and yet the American product along all lines goes into the Canadian market and competes with the Canadian product after paying freight, and with the English product after it receives a third off in tariff duties.

I am not so much concerned, Mr. President, with the rate; but I say that the principle is wrong, and the American people must realize sooner or later that the principle is wrong and defeat it and its advocates, because it is a false principle to give the power of taxation into the hands of special interests in America because they ask for it.

The PRESIDING OFFICER. The question is on agreeing to the amendment reported by the committee.

Mr. JONES of New Mexico. Mr. President, I merely wish to call attention to some information we have regarding cut nails and spikes. Perhaps it may make some impression. The history of this industry is brief, but very significant, as stated by the Tariff Commission:

The manufacture of cut nails is a declining industry in the United States. In 1904 1,311,549 kegs of 100 pounds each, valued at $2,394,180, were made in the rolling mills of the country. The production in 1909 was approximately 300,000 kegs less, and in 1914 it had declined to 740,436 kegs, valued at $1,469,780. To this may be added the value of the product of establishments other than rolling mills, $1,752,394, making a total of $3,222,174. The decline in the production of the cut nail represents the decline in its use, due to the increasing use of the wire nail.

After giving the processes of manufacture showing that they are made altogether by machinery, we find the statement regarding the American production and the percentage of the American production used in consumption. Here is what is said regarding exports:

Exports: The percentage of the production exported has varied from 21.3 per cent in 1912 to 12.2 per cent in 1915. The bulk of this export normally goes to North and South America. In the fiscal year 1913 Europe took only 279 kegs, while in 1916 it imported from the United States 12,805 kegs, 13 per cent of the total export. In 1919 the amount was 3,356 kegs, or 5 per cent of the total export.

Here is what is said about imports:

Imports have been small, varying from 51 to 1,428 kegs, 1909–1916, and never amounting to over 0.2 of the production. The revenue under the act of 1909 averaged slightly over $100 per year, collected on a specific duty equivalent to 14.7 per cent on the total import under the act.

In 1910 the price of cut nails per 100-pound keg at Philadelphia was $2.10. The following years show a lower price, the lowest being $1.90, reached in 1914. Prices increased after this year until adjusted by the Government at $4 per keg. For the last quarter of 1918 this price was raised to $5.

The exports are given here by years. In 1910 we exported nearly 20,000,000 pounds; in 1911, 23,000,000 pounds; in 1912, 27,000,000 pounds; in 1913, 11,000,000 pounds; in 1914 about the same. Of course, during the war the exportations decreased, but since the war they have reached a considerable volume.

Mr. President, I do not see any excuse for this duty. So far as I am advised, cut nails are not made of Swedish steel; they have nothing to do with Swedish steel. Swedish steel comes under the next item, horseshoe nails, and when we reach that I shall have just a word to say regarding it. The first item, on which we are now to vote, however, is a declining industry. The cut nails are being supplanted by the wire nails. The imports amount to nothing worth considering. Our exports are large.

We offer no objection, of course, to the first motion of the Senator, to amend the committee amendment by reducing the figures from "30" to "15."

SECRETARY HOOVER AND ATTORNEY GENERAL DAUGHERTY.

Mr. WATSON of Georgia. Mr. President, one day last week the Senator from Kentucky [Mr. STANLEY] addressed the Senate on the subject of an article which had appeared in a Philadelphia paper. In that article the President of the United States was represented as having referred apparently to certain Members of the Senate and of the House of Representatives as blackguards and rascals.

I have the highest respect for the office of Chief Executive, and I have had nothing but high regard for the present occupant of the White House. I am prepared to believe, and do believe, that if the President was correctly understood, and even if he used language of this sort, it was due to one of those sudden gusts of temper which overcome all of us now and then. I pass that by.

Particular objection was found it would seem to criticism leveled at Herbert Hoover, or rather Mr. Hoover was asked some questions. He was asked if it were true, as was stated in a New York magazine, that he allowed 2,000 tons of flour to rot upon the wharves of Trieste within a few miles of Vienna, for which city the food was destined, when the railroad transportation facilities were good and when the Viennese were dropping from starvation upon the streets of that city. It was a fair question. The statement was made in a New York magazine. I think I addressed a question to Mr. Hoover about it here last December. Nobody has ever answered the question. One of the reporters of a great syndicate of American newspapers told me in my office that it was currently reported and commonly believed that even out of the Russian relief expedition for which we provided $20,000,000, there were shiploads of American grain, American food intended for the relief of the Russians in the interior, which stayed on board the ships on the Sea of Azof because Mr. Hoover and his agents had provided vessels which drew too much water to pass over the bar at the mouth of the river, so that they could get up into the interior and distribute the food.

But, Mr. President, I should like to know upon what theory Mr. Herbert Hoover—who was a good Democrat during the Wilson administration, and is a good Republican now during the Harding administration—is above criticism. Why does he claim immunity from being questioned about his public acts and his disposal of the money of the American people? He has had the money of individuals of every State in the Union, of very nearly if not quite all of the charitable associations of America. He has had the money of the Government. He has had in his hands larger sums of money than any human being ever did have before since the dawn of time, and all I said about him was that he has not published any itemized statement, and he has not published any vouchers. That statement remains.

Before going into a matter which may be something of a sensation, and which appears to be backed up by proof, I should like to call attention to some of the vast sums that Mr. Hoover has handled; and I ask again, What is the mystery that shrouds this man? What is the mystery of his power? He suddenly appeared on the horizon of American public life shortly before we entered the war, and almost immediately there was a nation-wide propaganda in favor of Hoover, and the whole country was hypnotized by the name of Hoover, and the whole country apparently is to be again hypnotized with the magic name of Hoover.

Who is Hoover, anyway? He is the man who stretched the rod of tyranny over every storehouse, over every granary, over every boarding house, over every hotel in America. On certain days you could not eat meat, on certain days you could not have flour, on certain days you could not have more than a handful of sugar, on certain days you could not have more than a certain amount of meat; and storehouses were broken open and searched without warrant, and smokehouses were broken open and searched, and larders were broken open and searched, and men and women persecuted if they were found to have or thought to have more than the amount of food that Hoover said they should have. Such a thing was never known before in the history of the world. Nero never thought of such a thing. Tiberius never did. No Russian Czar ever did. Why, the waistcoat of Hoover grew suddenly as big as the overcoat of the Kaiser.

Listen to this:

SUMMARY OF TOTAL CHILDREN'S RELIEF DELIVERIES PAID FOR FROM THE CONGRESSIONAL FUND FOR RELIEF (METRIC TONS).

Breadstuffs, rice, beans and peas, meats and fats, milk, cocoa and sugar, clothing and shoes:

For Poland, 16,000,000 tons.
For Czechoslovakia, nearly 7,000,000 tons.
For Serbia, 3,500,000 tons. I am using round numbers.
For Finland, 2,272,000 tons.
For Latvia, nearly 2,000,000 tons.

And so on; the total being 36,000,000 tons, at a time when there was hunger from the Canadian border to Miami, and from the Great Lakes to the Gulf, from sea to sea.

Here are some expense accounts for relief in Belgium:

London office:
Accountants' charges, $81,000. I am using round numbers.
Printing and stationery, $78,000.
Cables and postage, $77,000.
Office rent, $38,597.
Traveling expenses—in London, now, mind you—in round numbers, $27,000.
General expenses, $56,500. General expenses! No itemized statement, no voucher.
Press salaries and expenses, over $3,000.
Salaries and wages, in round numbers, $294,000.

Who got those salaries? Give us the names of the men. Give us the names of the women. Tell us what they did and where they did it.

Then the Bradford office expenses were, in round numbers, $7,000, and clothing expenses, $2,000; that is, these men who were engaged in this charity work bought clothing for themselves, apparently, from this report. By what right? Could not they have paid for their clothing out of their salaries? They had to charge it up to the children's fund.

Then the amount for automobiles is something amazing. Who used those automobiles, and for what purpose?

Mr. President, without taking up more of the time of the Senate, I ask unanimous consent that I may insert in the RECORD as a part of my remarks some of these remarkable tables.

The PRESIDING OFFICER (Mr. CALDER in the chair). Is there any objection to inserting in the RECORD the matter referred to by the Senator from Georgia? The Chair hears none, and it is so ordered.

The matter referred to is as follows:

TABLE A.—*Summary of deliveries to European Governments under the congressional fund, for which obligations of repayment were taken.*

Mr. WATSON of Georgia. Mr. President, in the Children's Relief Fund, to June 30, 1920, after mentioning Czechoslovakia, two and a quarter million dollars, we come to Poland, which gets in round numbers $5,000,000—and Poland was aggressively making war upon Russia, or had just been doing so—Serbia, over $1,000,000.

It is charged, and apparently the charge is well founded, that Mr. Hoover supplied the army of Youdenitch, one of those generals who tried to reinstate the Government of the Czar and to overturn the Government of the Soviets.

As Senators will remember, there were the armies of Admiral Kolchak, of Baron Wrangel, of the Cossack Denikin, and also of Youdenitch. Now, let me show the Senate what apparently proves that Mr. Hoover took this charity fund, contributed by big-hearted Americans, and supplied an army that was endeavoring to overturn the Government of Russia, and in that connection let me briefly remind the Senate that we took part in blockading Russia. With France and England we threw a cordon of steel around her and kept the whole world's commerce from her ports and kept hers from the ports of the world. Inflicting hardships upon innocent men, women, and children, who had taken no part in the war and who had nothing to do with the revolution and who had never given provocation to France, Great Britain, or the United States, we blockaded that coast, and we brought famine upon millions of the Russian people, who have always been our friends. Not only that, we took part in sending four different armies to invade her best producing Provinces, and one of these armies was that of Youdenitch.

On July 24, 1919, which was long after the armistice, the ship *Lake Fray*, of the United States Shipping Board, with Capt. James B. Martin in command, was at Bordeaux, France, loading a cargo for return to the United States, when the captain's orders were canceled and he was instructed to reload his ship with army trucks and supplies, which were sent by the American Relief Administration to General Youdenitch, commander in chief of the Russian forces at the northwest front, for use in the offensive against Petrograd.

Think of it! The money was asked for in the name of charity, and these golden streams pour out of America's resources in the belief that they will relieve the suffering in Russia and in various other European countries; and the captain who was in charge of the vessel is ordered to take Army trucks and supplies for the use of one of the armies which is trying to overthrow the Soviet government and to restore the régime of the Czar, under which 49,000,000 Russian peasants were whipped with the scourge if they did not pay their taxes in labor, in money, or in kind.
